BITTER HERBS (געריים), merórim: πt האוש און איז איז געריים), merórim: און איז געריים curs in Ex. xii. 8; Num. is. 11; and Lam. iii. 15: in the latter passage it is said, "He hath filled me with bitterness, he hath made me drunken with wornwood." The two other passages refer to the observance of the Passover: the Israelites were commanded to eat the Paschal lamb "with unleavened bread and with bitter herbs."

letters is similar. The province of Pontus was not constituted till the reign of Nero [PONTUS]. It is observable that in Acts ii. 9 Pontus is in the summeration and not Bithynia, and that in 1 Pet. Is abundance to supply their numbers either in Fgypt.

Gate of Nicsea, the capital of Bithynia.

where the first passover was eaten, or in the deserts of the Peninsula of Sinai, or in Palestine. The Mishna (Pestchim, c. 2, § 6) enumerates five kinds of bitter berbs - chazereth, 'ulshin, thamcah, charchabina, and muror, which it was lawful to eat either green or dried. There is great difficulty in identifying the plants which these words respectively denote, but the reader may see the subject discussed by Bochart (Hieroz. i. 691, ed. Rosenmüller) and by Carpzovius (Apparat. Hist. Crit. p. 402). Acsording to the testimony of Forskal in Niebuhr's Preface to the Description de l'Arabie (p. xliv.), the modern Jews of Arabia and Egypt out lettuce, se, if this is not at hand, bugloss a with the Paswhat lamb. The Greek word $\pi ucple$ is identified by Sprangel (Hist. Rei Herb. i. 100) with the Hel-

minthia Echioides, Linn. [rather Gaertn.; Picris Echioides, Linn.], Bristly Helminthia (Ox-tongue), a plant belonging to the chicory group. The Picris of botanists is a genus closely allied to the Helminthia.

Aben Ezra in Celsius (*Hierob.* ii. 227) remarks that, according to the observations of a certain learned Spaniard, the ancient Egyptians always used to place different kinds of herbs upon the table, with mustard, and that they dipped morsels of bread into this salad. That the Jews derived the custom of eating herbs with their meat from the Egyptians is extremely probable, for it is easy to see how, on the one hand, the bitter-herb salad ahould remind the Jews of the bitterness of their bondage (Ex. i. 14), and, on the other hand, how

• النان الثور (lissan etthor), which Porskil (Flor. Egypt. p. lxti.) identifies with Borago offer mails.

it should also bring to their remembrance their | ing of the Arabic version el-houbaru, a species of merciful deliverance from it. It is curious to observe in connection with the remarks of Aben Ezra. the custom, for such it appears to have been, of lipping a morsel of bread into the dish (70 TPUBAIov), which prevailed in our Lord's time. May not $r\partial \tau \rho i \beta \lambda_{i} \rho r$ be the salad dish of bitter herbs, and ro www.u., the morsel of bread of which Aben Ezra speaks? a

The merorim may well be understood to denote various sorts of bitter plants, such particularly as belong to the crucifere, as some of the bitter cresses, or to the chicory group of the composite, the hawk-weeds, and sow-thistles, and wild lettuces which grow abundantly in the Peninsula of Sinai, in Palestine, and in Egypt (Decaisne, Florula Sinaica in Annul. des Scienc. Nat. 1834; Strand, Flor. Palast. No. 445, &c.). W. H.

BITTERN (707, kappid : exiros, reherder, Aq.; rúnvos, Theod. in Zeph. ii. 14: ericius). The Hebrew word has been the subject of various interpretations, the old versions generally sanctioning the "hedgehog" or "porcupine;" in which rendering they have been followed by Bochart (Hieroz. ii. 454); Shaw (Trav. i. 321, 8vo ed.); Lowth (On Isriah, xiv. 23), and some others; the " tortoise," the "beaver," the "otter," the "owl," have also all been conjectured, but without the slightest show of reason Philological arguments appear to be rather in favor of the "hedgehog" or "porcupine," for the Hebrew word kippod appears to be identical with kunfud, the Arabic word b for the hedgehog; but zoologically, the hedgehog or porcupine is quite out of the question. The word occurs in Is. xiv. 23, where of Babylon the Lord says, "I will make it a possession for the kippod and pools of water; "- in Is. xxxiv. 11, of the land of Idumea it is said "the kaath and the kinpixl shall possess it; " and again in Zeph. ii. 14, "I will make Nineveh a desolation and dry like a wilderness; flocks shall lie down in the midst of her, both the kaath and the kippod shall lodge in the chapiters thereof, their voice shall sing in the windows." . The former passage would seem to point to some solitude-loving aquatic bird, which might well be represented by the bittern, as the A. V. has it; but the passage in Zephaniah which speaks of Nineveh being made "dry like a wilderness," does not at first sight appear to be so strictly suited to this rendering. Gesenius, Lee, Parkhurst. Winer, Fürst, all give "hedgehog" or "porcupine" as the representative of the Hebrew word; but neither of these two animals ever lodges on the chapiters d of columns, nor is it their nature to frequent pools of water. Not less unhappy is the read-

a Our custom of eating salad mixtures is in all probability derived from the Jews. "Why do we pour ever our lettuces a mixture of oll, vinegar, and mustard ? The practice began in Judsea, where, in order to render palatable the bitter herbs eaten with the peschal lamb, it was usual, says Moses Kotsinses, to sprinkly over them a thick sauce called Karoseth, which was composed of the oil drawn from dates or from pressed raisin-kernels, of vinegar and mustard." " Extract from the Portfolio of a Man of Letters,' Monthly Magazine, 1810, p. 148.

BITTERN

mistard - the Houbara undulata, see /bis. i. 284 -which is a dweller in dry regions and quite incapable of roosting. We are inclined to believe that the A. V. is correct, and that the bittern is the bird denoted by the original word; as to the objection alluded to above that this bird is a lover of marshes and pools, and would not therefore be found in a locality which is "dry like a wilderness," a little reflection will convince the reader that the difficulty is more apparent than real. Nineveh might be

made "dry like a wilderness," but the bittern would find an abode in the Tigris which flows through the plain of Mesopotamia; as to the bittern perching on the chapiters of ruined columns, it is quite probable that this bird may occasionally do so; indeed Col. H. Smith (Kitto's Cyclop. art. Kippod) says, "though not building like the stork on the tops of houses, it resorts like the heron to ruined structures, and we have been informed that it has been seen on the summit of Tank Kisra at Ctesiphon." Again, as was noticed above, there seems to be a connection between the Hebrew kippod and the Arabic kunfud, "hedgehog." Some lexicographers refer the Hebrew word to a Syriac root which means " to bristle," e and though this derivation is exactly suited to the porcupine, it is no. on the other hand opposed to the bittern, which from its habit of erecting and bristling out the

to the hedgehog or porcupine. The expression is of course inapplicable to these animals, but it is not certain that it refers to them at all. The word their is not in the original; the phrase is elliptical, and im-plies "the voice of birds." "Sed quum canendi ver-

bum adhibent vates, haud duble דָרָל post est subaudiendum " (Rosenmüll. Schol. ad Zeph. ii. 14). See on this subject the excellent remarks of Harmes (Observ. iii. 100).

d Such is no doubt the meaning of הקרור ;

but Parkhurst (Lex. Heb. s. v. קקר) translate word "door-porches," which, he says, we are at Hberr to suppose were thrown dow .

-9.0. See Simon. Lez. Heb. s. v. 757.

feathers of the neck, may have received the name of the porcupies bird from the ancient Orientals. The bittern (Botaurus stellaris) belongs to the Arsleids, the heron family of birds; it has a wide range, being found in Russia and Siberia as far north as the river Lena, in Europe generally, in Barbary, S. Africa, Trebizond, and in the countries between the Black and Caspian Seas, dc.

BITUMEN. [SLIME.]

BIZJOTH'JAH (דַוֹיוֹהַ [contempt of /ehovah]: LXX. [Vat. Alex.] omits, [but Comp. Bιζιωθία; Ald. 'Eβεζουθιαί:] Baziothia), a town in the south of Judah named with BEER-SHEBA and BAALAH (Josh. rv. 28). No mention or identification of it is found elsewhere. G.

BIZTHA (NJI]: Bajar, [Vat. FA.* Ma-(ar;] Alex. Ba(ea: Bazatha), the second of the seven eunuchs of king Ahasuerus's harem (Esth. i.

10). The name is Persian, possibly & beste, a word referring to his condition as a eunuch (Ges. Thes. p. 197)

BLACK. [COLORS.]

BLAINS (אַבְעָבָעֹת: אָאַגאוויאַ: אָגאיי rairai, LXX.; Ex. ix. 9, draféourai ér re roîs àr tula ardens), violent ulcerous inflammations (from YAD, to boil up). It was the sixth plague of Egypt, and hence is called in Deut. xxviii. 27, 35, י the batch of Egypt" (מצרים; cf. Job ii. 7, שרויך רע). It seems to have been the wapa dypla or black leprosy, a fearful kind of dephantiasis (comp. Plin. xxvi. 5). It must have come with dreadful intensity on the magicians whose art it baffled, and whose scrupulous cleanliness (Herod. ii. 36) it rendered nugatory: so that they were unable to stand in the presence of Moses

because of the boils. Other names for purulent and leprous eruptions are ההה שאר (Morphea alba), ההה (Morphes nigra), and the more harmless scab 1700, Lev. xiii. passim (Jahn, Arch. Bibl. § 189). F.W.F.

BLASPHEMY ($\beta\lambda\alpha\sigma\phi\eta\mu(\alpha)$, in its technical English sense, signifies the speaking evil of God (קב שָׁם יָה), and in this sense it is found Ps. bxxiv. 18; Is. lii. 5; Rom. ii. 94, &c But according to its derivation (βλάπτω φημή quasi βλα-abuse (or even an unlucky word, Eurip. Ion. 1187): see 1 K. xxi. 10; Acts xviii. 6; Jude 8, &c. Hence in the LXX. it is used to render 372," Job ii. 5;

ירִכִים, 8 K. xix. 6; הוֹכִים, 2 K. xix. ₄, and

127, Hos. vii. a 16, so that it means "reproach," "derision," &c.: and it has even a wider use, as 2 Sam. xii. 14, where it means "to despise Juiaism," and 1 Macc. ii. 6, where $\beta\lambda\alpha\sigma\phi\eta\mu/a=$ dolatry. In Ecclus. iii. 16 we have as Bhaogyuos δ εγκαταλιπών πατέρα, where it is equivalent to κατηραμένος (Schleusner, Thesaur. s. v.). Blasphemy was punished with stoning, which

was inflicted on the son of Shelomith (Lev. xxiv. LXX. of Jb il. 5 and Hos. vil. 16 illustrates the use 11) On this charge both our Lord and St. Sto- of Bharquia or its cognate-

phen were condemned to death by the Jews. From Lev. xxiv. 16, wrongly understood, arose the singular superstition about never even pronouncing the name of Jehovah. Ex. xxii. 28, " Thou shalt not revile the gods, nor curse the ruler of thy people,' does not refer to blasphemy in the strict sense, since "elohim" is there used (as elsewhere) of magis trates, dc.

The Jews, misapplying Ex. xxiii. 13, "Make no mention of the name of other gods," seemed to think themselves bound to give nicknames to the heathen deities; hence their use of Bosheth for Baal [Hos. iz. 10, comp. Ish-BOSHETH, MEPHIBO SHETH], Beth-aven for Beth-el [Hos. iv. 15], Beel zebul for Beelzebub, &c. It is not strange that this "contumelia numinum" (Plin. xiii. 9), joined to their zealows proselytism, made them so deeply unpopular among the nations of antiquity (Winer, s. v. Gotteslüsterung). When a person heard blaspheny he laid his hand on the head of the offender, to symbolize his sole responsibility for the guilt, and rising on his feet, tore his robe, which might never again he mended. (On the mystical reasons for these observances, see Lightfoot, Hor. Hebr. Matt. xxvi. 65.)

It only remains to speak of "the blasphemy against the Holy Ghost," which has been so fruitful a theme for speculation and controversy (Matt. xii. 32; Mark iii. 28). It consisted in attributing to the power of Satan those unquestionable miracles, which Jesus performed by "the finger of God," and the power of the Holy Spirit; nor have we any safe ground for extending it to include all sorts of willing (as distinguished from willful) offenses, besides this one limited and special sin. The often misunderstood expression "it shall not be forgiven him, neither in this world, &c.," is a direct application of a Jewish phrase in allusion to a Jewish error, and will not bear the inferences so often extorted from it. According to the Jewish school notions, "a quo blasphematur nomen Dei, ei non velet partitentia ad suspendendum judicium, nec dies expiationis ad expiandum, nec plagæ ad adstergendum, sed omnes suspendunt judicium, et mors abstergit." In refutation of this tradition our Lord used the phrase to imply that "blasphemy against the Holy Ghost shall not be forgiven; neither before death, nor, as you vainly dream, by means of death " (Lightfoot, Hor. Hebr. ad locum). As there are no tenable grounds for identifying this blasphemy with "the sin unto death," I John v 16, we shall not here enter into the very difficult inquiries to which that expression leads.

BLASTUS (BAdoros [shoot or sproud]), the chamberlain (δ eπ) τοῦ κοιτῶνος) of Herod Agrippa I., mentioned Acts xil. 20, as having been made by the people of Tyre and Sidon a mediator between them and the king's anger. [See CHAMBERLAIN.] H. A.

* BLESSING. [SALUTATION.] BLINDING. [PUMBHMENTS.]

BLINDNESS (עַהְרָרָן, from the root

a . It does not appear how the rendering of the R

316 BLINDNESS

TAN, to bore) is extremely common in the East from many causes; e. g. the quantities of dust and sand pulverized by the sun's intense heat; the perpetual glare of light; the contrast of the heat with the cold sea-air on the coast where blindness is spesially prevalent; the dews at night while they sleep on the roofs; small-pox, old age, &c.; and perhaps more than all the Mohammedan fatalism, which leads to a neglect of the proper remedies in time. One traveller mentions 4000 blind men in Cairo, and Volney reckons that 1 in every 5 were blind, besides others with sore eyes (i. 86). Ludd, the aucient Lydda, and Rumleh, enjoy a fearful notoriety for the number of blind persons they contain. The common saying is that in Ludd every man is either blind or has but one eye. Jaffa is said to contain 500 blind out of a population of 5000 at most. There is an asylum for the blind in Cairo (which at present contains 300), and their conduct is often turbulent and fanatic (Lane, i. 39, 292; Trench, On the Miracles; Matt. ix. 27, &c.). Blind beggars figure repeatedly in the N. T. (Matt. xii. 22), and "opening the eyes of the blind" is mentioned in prophecy as a peculiar attribute of the Messiah (Is. xxix. 18, &c.). The Jews were specially charged to treat the blind with compassion and care (Lev. xix. 14: Deut. xxvii. 18).

Penal and miraculous blindness are several times mentioned in the Bible (Gen. xix. 11, doparla, LXX.; 2 K. vi. 18-22; Acts ix. 9). In the last sange some have attempted (on the ground of St. Luke's profession as a physician) to attach a technical meaning to axis and orders (Jahn, Arch. Bibl. § 201), viz. a spot or "thin tunicle over the cornea," which vanishes naturally after a time: for which fact Winer (s. v. Blindheit) quotes Hippocr. (Pradict. ii. 215) àχλύες . . . ἐκλεαίνονται καl άφανίζονται, ην μη τρώμά τι έπιγένηται έν τούτφ τῷ χωρίφ. But this does not remove the miraculous character of the infliction. In the same way analogies are quoted for the use of saliva (Mark viii. 23, &c.) and of fish-gall in the case of the λεύκωμα of Tobias; but whatever may be thought of the latter instance, it is very obvious that in the former the saliva was no more instrumental in the cure than the touch alone would have been (Trench, On the Miracles, ad loc.).

Blindness willfully inflicted for political or other purposes was common in the East, and is alluded to in Scripture (1 Sam. xi. 2; Jer. xxxix. 7).

F. W. F

BLOOD (27). To blood is ascribed in Scripture the mysterious sacredness which belongs to life, and God reserves it to Himself when allowing man the dominion over and the use of the lower animals for food, &c. (as regards, however, the eat-Thus reserved, it acing of blood, see FOOD). quires a double power: (1) that of sacrificial atonement, in which it had a wide recognition in the beathen world; and (2) that of becoming a curse, when wantonly shed, e. g. even that of beast or fowl by the huntaman, unless duly expiated, e. g. oy burial (Gen. ix. 4; Lev. vii. 26, xvii. 11-18). As regards (1), the blood of sacrifices was caught by the Jewish priest from the neck of the victim in a basin, then sprinkled seven times (in case of birds

BLOOD, REVENGER OF

at once squeezed out) on the altar, i. e. on its horns its base, or its four corners, or on its side above or below a line running round it, or on the mercy-seat, according to the quality and purpose of the offering. but that of the passover on the lintel and doorposts (Exod. xii.; Lev. iv. 5-7, xvi. 14-19; Ug>lini, Thes. vol. x. and xiii.). There was a drain from the temple into the brook Cedron to carry off the blood (Maimon. apud Cramer de Arâ Exter Ugolini, viii.). In regard to (2), it sufficed to pour the animal's blood on the earth, or to bury it, as a solemn rendering of the life to God; in case of human bloodshed a mysterious connection is observable between the curse of blood and the earth or land on which it is shed, which becomes polluted by it; and the proper expiation is the blood of the shedder, which every one had thus an interest in seeking, and was bound to seek (Gen. iv. 10, ix. 4-6; Num. xxxv. 33; Ps. cvi. 38; see BLOOD. REVENCER OF). In the case of a dead body found, and the death not accounted for, the guilt of blood attached to the nearest city, to be ascertained by measurement, until freed by prescribed rites of ex-piation (Deut. xxi. 1-9). The guilt of murder is one for which "satisfaction" was forbidden (Num. xxxv. 81). Н. Н.

BLOOD, ISSUE OF (□7 그래 : □7, Rabbin.: fluxu laborans). The term is in Scripture applied only to the case of women under menstruation or the fluxus uteri (Lev. xv. 19-30; Matt. ix. 20, yurh aluoppoouva; Mark v. 25 and Luke viii. 43, obra er pure aluaros). The latter caused a permanent legal uncleanness, the former a temporary one, mostly for seven days, after which she was to be purified by the customary offering. The "bloody flux" (δισεντερία) in Acts xxviii. 8, where the patient is of the male sex, is, probably, a medically correct term a (see Bartholini, De Morbis Biblicis, 17). Н. Н.

BLOOD, REVENGER OF (Sei). It was, and even still is, a common practice among nations of patriarchal habits, that the nearest of kin should, as a matter of duty, avenge the death of a murdered relative. The early impressions and practice on this subject may be gathered from writings of a different though very early age, and of different countries (Gen. xxxiv. 30; Hom. 11. xxiii. 84, 88, xxiv. 480, 482; Od. xv. 270, 276; Müller on Æschyl. Eum. c. ii. A. & B.). Compensation for nurder is allowed by the Koran, and he who transgresses after this by killing the murderer shall suffer a grievous punishment (Sale, Koron, ii. 21. and xvii. 230). Among the Bedouins, and other Arab tribes, should the offer of blood-money be refused, the "Thar," or law of blood, comes into operation, and any person within the fifth degree of blood from the homicide may be legally killed by any one within the same degree of consanguinity to the victim. Frequently the homicide will wander from tent to tent over the desert, or even rove through the towns and villages on its borders with a chain round his neck and in rags begging contributions from the charitable to pay the apportioned blood-money. Three days and four hours are allowed to the persons included within the "Thar for escape. The right to blood revenge is never

island that this disorder is by no means unthere at the present day (Smith's Voyage and Ship wreck of S. Paul, p. 167, ed. 1806)

a . It has been objected that though the term may is technically correct, Luke has erred in assigning "dysen_ery " to a dry climate, like that of Malta. But we have now the testimony of physicians in that

BLOOD, REVENGER OF

sort, except as annulled by compensation it do-; others of an absurd kind, the following: a: the scends to the latest generation. Similar customs, with local distinctions, are found in Persia, Abyssinia, among the Druses and Circassians. (Niebuhr, Descr. de l'Arabie, pp. 28, 30, Voyage, ii. 350; Burckhardt, Notes on the Bedouins, up. 68, 85, Travels in Arabia, i. 409, ii. 830, Syria, pp. 540, 113, 643; Layard, Nin. & Bab. pp. 305-307; Chardin, Voyages, vol. vi. pp. 107-112.) Moneycompensations for homicide are appointed by the Hindú law (Sir W. Jones, vol. iii. chap. vii.), and Jacitus remarks that among the German nations · luitur homicidium certo armentorum ac pecorum numero " (Germ. c. 21). By the Anglo-Saxon law also money-compensation for homicide, wer-gild, was sanctioned on a scale proportioned to the rank of the murdered person (Lappenberg, ii. 336; Lingard, i. 411, 414).

The spirit of all legislation on the subject has probably been to restrain the license of punishment assumed by relatives, and to limit the duration of feuds. The law of Moses was very precise in its directions on the subject of Retaliation.

1. The willful murderer was to be put to death without permission of compensation. The nearest relative of the deceased became the authorized

avenger of blood (That, the redeemer, or avenyer, as next of kin, Gesen. s. v. p. 254, who rejects the opinion of Michaelis, giving it the sig. of "polluted," i. e. till the murder was avenged (& ayxioreber, LXX., propinques occisi, Vulg., Num. xxxv. 19), and was bound to execute retaliation himself if it lay in his power. The king, however, in later times appears to have had the power of restraining this license. The shedder of blood was thus regarded as impious and polluted (Num. xxxv. 16-31; Deut. xix. 11; 2 Sam xiv. 7, 11, xvi. 8, and iii. 29, with 1 K. ii. 31, 33; 2 Chr. xxiv. 22-20).

2. The law of retaliation was not to extend beyoud the immediate offender (Deut. xxiv. 16; 2 K. tiv. 6; 2 Chr. xxv. 4; Jer. xxxi. 29-30; Ez. xviii. 20; Joseph. Ant. iv. 8, § 39).

3. The involuntary shedder of blood was permitted to take flight to one of six Levitical cities, specially appointed out of the 48 as cities of refuge. three on each side of the Jordan (Num. xxxv. 22 23; Deut. xix. 4-6). The cities were Kedesh, in Mount Naphtali; Shechem, in Mount Ephraim; Hebron in the hill-country of Judah. On the E. side of Jordan, Bezer, in Reuben; Ramoth, in Gad; Golan, in Manasseh (Josh. xx. 7, 8). The elders of the city of refuge were to hear his case and protect him till he could be tried before the authorities of his own city. If the act were then decided to have been involuntary, he was taken back to the city of refuge, round which an area with a radius of 2000 (3000, Patrick) cubits was assigned as the limit of protection, and was to remain there in enfety ill the death of the high-priest for the time being. Beyond the limit of the city of refuge, the evenger might slay him, but after the high-priest's eath he might return to his home with impunity (Num. xxxv. 25, 28; Josh. xx. 4, 6). The roads to the cities were to be kept open (Deut. xix. 3). · To these particulars the Talmvdists add, among

cross-roads posts were erected bearing the word מקלט, refuge, to direct the fugitive. All facilities of water and situation were provided in the cities: no implements of war or chase were allowed there. The mothers of high-priests used to send presents to the detained persons to prevent their wishing for the high-priest's death. If the fugitive died before the high-priest, his bones were sent home after the high-priest's death (P. Fagius in Targ. Onk. ap. Rittershus. de Jure Asyli, Crit. Sacr. viii. 159; Lightfoot, Cent. Chorogr. c. 50. Op. ii. 208).

4. If a person were found dead, the elders of the nearest city were to meet in a rough valley, untouched by the plough, and washing their hands over a beheaded heifer, protest their innocence of the deed and deprecate the anger of the Almighty H. W. P. (Deut. xxi. 1-9).

* BLUE. [Colors.]

BOANER'GES (Boarepyes), Mark iii. 17, a name signifying viol Boovrins, "sons of thunder," given by our Lord to the two sons of Zebedee, James and John. It is the Aramaic pronunciation (according to which Sheva is sounded as oa) of

בכי הבלש. The latter word in Hebrew signifies a tumult or uproar (Ps. ii. 1), but in Arabic and Syriac thunder. Probably the name had respect to the fiery zeal of the brothers, signs of which we may see in Luke ix. 54; Mark ix. 38; comp. Matt. xx. 20 ff. Ĥ. A.

BOAR. [SWINE.]

* BOAT. [Ship.]

BO'AZ (IVD, fleetness: " Book; Vat. [Boos; Alex. Boos exc. Ruth ii. 15, iv. 8, and 1 Chr. Boo(:) 1. A wealthy Bethlehemite, kinsman Booz). Elimelech, the husband of Naomi. Finding that the kinsman of Ruth, who stood in a still nearer relation than himself, was unwilling to perform the

office of 723, he had those obligations publicly transferred with the usual ceremonies to his own discharge; and hence it became his duty by the "levirate law" to marry Ruth (although it is hinted, Ruth iii. 10, that he was much her senior. and indeed this fact is evident whatever system of chronology we adopt), and to redeem the estates of her deceased husband Mahlon (iv. 1 ff.; Jahn, Arch. Bibl. § 157). He gladly undertook these responsibilities, and their happy union was blessed by the birth of Obed, from whom in a direct line our Lord was descended. No objection seems to have arisen on the score of Ruth's Moabitish birth; a fact which has some bearing on the date of the narrative (cf. Ezr. iz. 1 ff.). [BETHLEHEM.]

Boaz is mentioned in the genealogy (Matt. i. 5) but there is great difficulty in assigning his date. The genealogy in Ruth (iv. 18-22) only allows 10 generations for 350 years, and only 4 for the 450 years between Salmon and David, if (as is almost certain from St. Matt. and from Jewish tradition) the Rahab mentioned is Rahab the harlot. If Long be identical with the judge Ibzan [IBZAN], as is

^{7) 「}五, in whom is strength, affords a similar mean ing. Gesenius thinks the name as applied to Sou omon's pillar may have been that of the Jonor or ar chitect.

[·] Cassel (Richter u. Ruth, p. 215) derives Boas from

고, son of strength : which as the name of the on the left of Solomon's porch, agrees botter With Jachin (firmness), name of the pillar on the right (admir) the mate of Boas The derivation from

stated with some shadow of probability by the Je- | Jacob (Gen. xxviii. 11, 18) and Elijah (1 K. xiz rusalem Talmud and various rabbis, several generations must be inserted. Dr. Kennicott, from the difference in form between Salmah and Salmon (Ruth iv. 20, 21), supposes that by mistake two different men were identified (Dissert. i. 543); but we want at least three generations, and this supposition gives us only one. Mill quotes from Nicolass Lyranus the theory, "dicunt majores nostri, et bene ut videtur, quod tres fuerint Booz sibi succedentes; in Mt. i. isti tres sub uno nomine com-prehenduntur." Even if we shorten the period of the Judges to 240 years, we must suppose that Boaz was the youngest son of Salmon, and that he did not marry till the age of 65 (Dr. Mill, On the Genealogies; Lord A. Hervey, Id. p. 262, &c.).

2. BOAZ [in 1 K. BOAM, Vat. Baλa, Alex. Boos, Comp. Boa; in 2 Chr. LXX. loχús, strength], the name of one of Solomon's brazen pillars erected in the temple porch. [JACHIN.] It stood on the left, and was 171 cubits high (1 K. vii. 15, 21; 2 Chr. iii. 15; Jer. lii. 21). It was hollow and surmounted by a chapiter, 5 cubits high, ornamented with net-work and 100 pomegranates. The apparent discrepancies in stating the height of it arise from the including and excluding of the English, as in Scotch to this day, the word "bonornament which united the shaft to the chapiter, F. W. F. Ac.

BOC'CAS (& Bonneds: Boccus), a priest in the line of Esdras (1 Esdr. vin. 2). [BUKKI; Bo-RITH.]

BOCH'ERU (ハラン [youth or first-born]: Bocru: 1 Chr. viii. 38, ix. 44, according to the present Hebrew text), son of Azel; but rendered πρωτότοκοs by LXX. in both passages, as if pointed ADD. [BECHER.] A. C. H.

BO'CHIM (D'DET, the weepers : & Khave μών, Κλαυθμώνες: locus flentium sive lacrymarum), a place on the west of Jordan above Gilgal (Judg. ii. 1 and 5), so called because the people " wept " there.

* The LXX. insert en Basets after Bochim, and thus follow an opinion, possibly a tradition, that the place of weeping was near Bethel. The going up thither "of the angel" from Gilgal (לבְּעָל) favors that view. Bertheau (Richter, p. 50) infers from the sacrifices (ver. 5) that the Hebrews could not have been at the time far from one of their sacred places, perhaps Shiloh; but (see Keil's Book of Judges. p. 264) they were not restricted in this manner, but performed such rites in any place where Jehovah appeared to them. Beyond this there is no clew to the exact spot H. where the scene occurred.

BO'HAN (] TI [/humb]: [Baiwr; in Josh. rviii. 17 Alex. Baaµ; Comp. Ald.] Bady: Boen), a Reubenite after whom a stone was named, possibly srected to commemorate some achievement in the vonquest of Palestine (comp. 1 Sam. vii. 12). Its position was on the border of the territories of Benjamin and Judah between Beth-arabah and Bethhogia on the E., and Adummim and En-shemesh on the W. Its exact situation is unknown (Josh. xv. 3, xviii. 17). [STONES.] W. L. B.

BOIL. [MEDICINE.]

BOLSTER. The Hebrew word (TUNTO, meradahoth) so rendered, denotes, like the English, will offering (1 Sam. xxx. 24-26; 2 Sam viii. 11 rimply a place for the head. Hardy travellers, like 1 Chr. xxvi. 97).

6), sleeping on the bare ground, would make use of a stone for this purpose; and soldiers on the march had probably no softer resting place (1 Sam xxvi. 7, 11, 12, 16). Possibly both Saul and Elijah may have used the water-bottle which they carried as a bolster, and if this were the case, David's midnight adventure becomes more conspicuously daring. The "pillow " of goat's hair which Michal's cunning put in the place of the bolster in her husband's bed (1 Sam. xix. 13, 16) was probably, as Ewald suggests, a net or curtain of goat's hair, to protect the sleeper from the mosquitoes (Gesch. iii. 101, note', like the "canopy" of Holo-fernes. [DAVID, Amer. ed.] W. A. W. fernes. [DAVID, Amer. ed.]

* BOLLED. "The flax was bolled," Ex. ix. 31, i. e. swollen, podded for seed. The word boll is etymologically cognate with ball, bole, bool. The Hebrew term here used, בָּבְעֹל, does not imply anything more than that the flax was in bud, ready to flower (see Ges. and Fürst, s. v.). See also FLAX.

BONDAGE. [SLAVERY.]

BONNET. [See HEAD-DRESS.] In old net" was applied to the head-dress of men. Thus in Hall's Rich. 111., fol. 9 a.: "And after a lytle season puttyng of hys boneth he sayde: O Lorde God creator of all thynges, howe muche is this realme of Englande and the people of the same bounden to thy goodnes." And in Shakespeare (Haml. v. 2):

"Your bonnet to his right use : 'tis for the head."

BOOK. [WRITING.]

BOOTHS. SUCCOTH ; TABERNACLES. FEAST OF.]

BOOTY. This consisted of captives of both sexes, cattle, and whatever a captured city might contain, especially metallic treasures. Within the limits of Canaan no captives were to be made (Deut. xx. 14 and 16); beyond those limits, in case of warlike resistance, all the women and children were to be made captives, and the men put to death. A special charge was given to destroy the "pictures and images " of the Canasnites, as tending to idolstry (Num. xxxiii. 52). The case of Amalek was a special one, in which Saul was bidden to destroy the cattle. So also was that of the expedition against Arad, in which the people took a vow to destroy the cities, and that of Jericho, on which the curse of God seems to have rested, and the gold and silver, &c. of which were viewed as reserved wholly for Him (1 Sam. xv. 2, 3; Num. xxi. 2; Josh. vi. 19). The law of booty was that it should be divided equally between the army who won it and the people of Israel, but of the former half one head in every 500 was reserved to God, and appropriated to the priests, and of the latter one in every 50 was similarly reserved and appropriated to the Levites (Num. xxxi. 26-47). As regarded the army, David added a regulation that the baggageguard should share equally with the troops engaged. The present made by David out of his booty to the elders of towns in Judah was an act of gratefin courtesy merely, though perhaps suggested by the law, Num. I. c. So the spoils devoted by him te provide for the temple, must be regarded as a free H H.

BO'OZ (Rec. T. Bodć; Lachm. [Treg. and of a kid's skin. These bottles when rent are rel'ach. (7th ed.)] with ABD [in Luke] Bods; Thach. (8th ed.) in Matt., with B and Sin., Bods; by gathering up the wounded place in manner of a purse; sometimes they put in a round flat piece

BO'RITH (Boruh), a priest in the line of Esdras (2 Esdr. i. 2). The name is a corruption of BUKKI.

BORROWING. [LOAN.]

BOS'CATH (אָרָקר), 2 K. xxii. 1. [BOZKATH.]

• BOSOM. For the bosom of a garment and its uses, see DRESS, 3. (4.); for the expression "to lie at or in one's bosom," see MEALS, also ABRA-HAN'S BOSOM. See also CRUSE, 3. A.

BO'SOR, 1. (Boσóp; [Alex. Boσσop in ver. 26:] : Bosor), a city both large and

fortified, on the East of Jordan in the land of Gilead (Galand), named with Bozrah (Bosora), Carnaim, and other places in 1 Macc. v. 26, 36. It is probably BEZER, though there is nothing to make the identification certain.

2. (Bósop: Bosor), the Aramaic mode of pronouncing the name of BEOR, the father of Balaam (2 Pet. ii. 15); in accordance with the substitution,

frequent in Chaldee, of S for V (see Gesenius, 1144). G.

BOS'ORA (Bosapa [?] and [Comp.] Bosopha; [Rom. Alex. Bossopa, Bosop; Sin. Bossopa:] Joj da: Barasa, Bosor), a strong city in Gilead

taken by Judas Maccabeus (1 Macc. v. 26, 28). doubtless the same as BOZRAH.

BOTCH. [MEDICINE.]

BOTTLE. The words which are rendered in A. V. of O. T. "bottle" are, (1.)

14, 15, 19): donos: wer; a skin-bottle. (2.) בֶּבֶל,

or גבל (1 Sam. x. 3; Job xxxviii. 37; Jer. xiii. 12; Is. v. 11, xxx. 14: Lam. iv. 2): מארייניטיי ארטעניטיי, אראייניטיין אווייטיין אווייטיין אווייטיין אווייטיין ארטעניטיין אווייטיין אווייטיין אווייטיין אווייטיין אווייטיין

сиа. (3.) Эд (Jer. xix. 1): Викоз ботран-

ros: laguncula. (4.) TN 1 (Josh. ix. 4, 13; Judg. iv. 19; 1 Sam. xvi. 20; I's. cxix. 83): ἀσκός: uler, lagena.

In N. T. the only word rendered "bottle" is $\frac{\lambda\sigma_{K}\sigma_{S}}{\lambda\sigma_{K}}$ (Matt. ix. 17; Mark ii. 22: Luke v. 37). The bottles of Scripture are thus evidently of two kinds: (1.) The skin bottle. (2.) The bottle of earthen or giass-ware, both of them capable of being closed from the air.

1. The skin bottle will be best described in the following account collected from Chardin and oth-The Arabs, and all those that lead a wandering life, keep their water, milk, and other liquors, n leathern bottles. These are made of goatskins. When the animal is killed, they cut off its feet and its head, and they draw it in this manner out of the skin, without opening its belly. In Araoia they are tanned with acacia-bark and the hairy part left outside. If not tanned, a disagreeable inste is imparted to the water. They afterwards sew up the places where the legs were cut off and the tail, and when it is filled they tie it about the The great leathern bottles are made of the eack. skin of a he-goat, and the small ones, that serve watered of a bottle of water, on the road, are made

BOTTLE

a purse; sometimes they put in a round flat piece of wood, and by that means stop the hole (Chardin, ii. 405, viii. 409; Wellsted, Arabia, i. 89; ii. 78; Lane, Mod. Eg. ii. c. 1; Harmer, from Chardin's notes, ed. Clarke, i. 284). Bruce gives a description of a vessel of the same kind, but larger. "A gerba is an ox's skin, squared, and the edges sewed together by a double seam, which does not let out water. An opening is left at the top, in the same manner as the bunghole of a cask; around this the skin is gathered to the size of a large handful, which, when the gerba is full of water, is tied round with whipcord. These gerbas contain about sixty gallons each, and two of them are the load of a camel. They are then all beameared on the outside with grease, as well to hinder the water from oozing through, as to prevent its being evaporated by the heat of the sun upon the gerba, which, in fact, happened to us twice, so as to put us in danger of perishing with thirst." (Travels, iv 884.)

Skin Bottles. (From the Museo Borbonico.)

Wine-bottles of skin are mentioned as used by Greeks, Romans, and Egyptians, by Homer (Od. vi. 78, olvor $\delta\chi ever$ 'AGR $\hat{\phi}$ dr $al\gamma e(m; ll. iii.$ 247); by Herodotus, as used in Egypt (ii. 121),where he speaks of letting the wint out of the skin $by the <math>\pi o\delta\epsilon dr$, the end usually tied up to serve as the neck; by Virgil (Georg. ii. 384). Also by Athenaeus, who mentions a large skin-bottle of the nature of the gerba ($\delta\sigma\kappa\deltas$ dr $\pi\alpha\sigma\deltaa\lambda\deltar$ $\delta\epsilon\rho\mu drosr$ djbaµµ(aros, v. 28, p. 199). Chardin says thatwine in Persia is preserved in skins saturated withpitch, which, when good, impart no flavor to thewine (Voyuges, iv. 75). Skins for wine or otherliquids are in use to this day in Spain, where theyare called borrachas.

The effect of external heat upon a skin-bottle is indicated in Ps. cxix. 83, " a bottle in the smoke," and of expansion produced by fermentation in Matt. ix. 17, " new wine in old bottles " [or " skins "].

2. Vessels of metal, earthen, or glass ware for liquids were in use among the Greeks, Egyptians

Γιρσηνή, Athen. i. 20 (28); ἀργυρέη φιάλη, ILxxiii. 243; ἀμφίθεταν φιάλην ἀπύρωτον, 270), and also no doubt among the Jews, especially in later times. Thus Jer. xix. 1, "a potter's earthen bottle." The Jews probably borrowed their manufactures in this particular from Egypt, which was celebrated for glass work, as remains and illustrations of Egyptian workmanship are extant at least as early as the 15th century B. C. (Wilkinson, ii. 59, 60).

Glass Lottles of the 3d or 4th century B. C. have been found at Babylon by Mr. Layard. At Cairo many persons obtain a livelihood by selling Nile water, which is carried by camels or asses in skins, or by the carrier himself on his back in pitchers of porous gray earth (Lane, Mod. Eg. ii. 153, 155; Burckhardt, Syria, p. 611; Maundrell, Journey, p. 407, Bohn; Wilkinson, Egypt, c. iii. vol. i. 148-158; Dict. of Antiq. VINUM; Layard, Nineveh and Babylon, pp. 196, 503; Gesenius, s. rr.)

* BOTTOMLESS PIT. [DEEP, THE.] BOW. [ARMS.]

 BOWELS (בְחַמִים, מִצְּאַמָּאַ, רַחַמִים, מּאַמֹאַזאַ, מּאַמֹאַזאַ, מאַמאַנאַ, מאַמאַנאַ, מאַמאַנאַ The bowels were regarded by the Hebrews as the seat of the tender affections, and the term is therefore often used tropically, like heart, breast, and bosom in English. Our translators have sometimes judiciously varied the expression to suit the English idiom, as in Ps. xxv. 6, xl. 8, Prov. xii. 10, Luke i. 78, 2 (or. vii. 15 (see the margin in these places); but in many other cases they have given a bald, verbal translation where a different rendering would have more happily expressed the meaning; as, "The scenels (hearts) of the saints are refreshed by thee" "Ye are not straitened in us, but are straitened in your own bowels" (affections); see Cant. v. 4; Jer. iv. 19, xxxi. 20; Ecclus. xxx. 7; 2 Cor. vi. 12; Phil. i. 8, ii. 1; Col. iii. 12; Philem. 7, 12, 20; 1 John iii. 17.

BOWL. (1.) הלא: הדרה משטנעוסי: fonic ula,] concha. (3.) לכל also in A. V. dish. (4.) ברע הברע הסמדאף: scyphus. (נ.; הבים: העמטס: העמטי cynthus. Of these words (1) may be taken to inlicate chiefly roundness, from גָלַל, roll, as a ball or globe, placed as an ornament on the tops or capitals of columns (1 K. vii. 41; 2 Chr. iv. 12, 13): also the knob or boss from which proceed the

Apparently from the root TUN, " to be straight," then to be " fortunate," " beautiful." So in the book Telemmedenu it is said, " Quare vocatur theasehur ? quia

BOX-TREE

Firuscals, and Assyrians (xourdrumos qudiy) branches of a candlestick (Zech. iv. 2), and also a suspended lamp, in A. V. "golden bowl" (Reel. xii. 6); (2) indicating lowness, is perhaps a shal-low dish or basin; (3) a hollow vessel; (4) a round vessel (Jer. XXXV. 5) Repápuor LXX.; (5) a hustra-

tory vessel, from 772, pure.

A like uncertainty prevails as to the precise form and material of these vessels as is noticed under BASIN. Bowls would probably be used at meals for liquids, or broth, or pottage (2 K. iv. 40). Modern Arabs are content with a few wooden bowls. In the British Museum are deposited several terra-cotta bowls with Chaldsean inscriptions of a superstitious character, expressing charms against sickness and evil spirits, which may possibly explain the "divining cup" of Joseph (Gen. xliv. 5). The bowl was filled with some liquid and drunk off as a charm against evil. See a case of Tippoo Sahib drinking water out of a black stone as a charm against misfortune (Gleig, Life of Munro, i. 218). One of the Brit. Mus. bowls still retains the stain of a liquid. These bowls, however, are thought by Mr. Birch not to be very ancient (Layard, Nin. and Bab. 509, 511, 528. Birch, Anc. Pottery, i. 154. Shaw, 231). H. W. P.

* There is no such Hebrew word as 8, above); the word translated dish in the passage which must be referred to (Judg. v. 25) is (No. 2), for which an obsolete verb DD has been assumed by some lexicographers as the root. Fürst rejects this etymology. Other Hebrew words transhated bouch in the A. V. are 5, Zech. iv. 2; מזרק, see BASIN; and FD, 1 K. vii. 50; 2 K. xii. 18 (14), also rendered basin. A.

* BOX. The Hebrew word (? 2: pands: lentsculu) so rendered in 2 K. ix. 1, 3 (" a box of oil "), properly denotes a flask or bottle. In 1 Sam. x. 1 it is more correctly translated "vial." See also ALABASTER.

néõpos: buxus, pinus) occurs in Is. lx. 18, together with "the fir-tree and the pine-tree," as furnishing wood from Lebanon for the temple that was to be built at Jerusalem. In Is. xli. 19 the teashur is mentioned in connection with the cedar, "the firtree and the pine," &c., which should one day be planted in the wilderness. There is great uncertainty as to the tree denoted by the tensshur. The Talmudical and Jewish writers generally are of opinion that the box-tree is intended, and with them agree Montanus, Deodatius, the A. V. and other modern versions; Rosenniüller (Bibl. Bot. 300), Celsius (Hierob. ii. 153), and Parkhurst (Heb.

Lex. s. v. האשור (האשור) are also in favor of the boxtree. The Syriac and the Arabic version of Saadiaa understand the tensshur to denote a species of cedar called sherbin, b which is distinguished by the small size of the cones and the upright growth of the branches. This interpretation is also sanctioned by Gesenius and Fürst (Heb. Concord. p. 134) Hiller (Hierophyt. i. 401) believes the Hebrew word may denote either the box or the maple. With

est folicissima et prestantissima inter connes species cedro um " (Buxt. I. c.).

شربېن.

BOZE7

with the sherbin, there is not, beyond the authority knowledged difficulty, has been taken by Bochert. of the Syriac and Arabic versions, any satisfactory Rosenmüller, and others, to uphold the claim of the evidence to support it. It is uncertain moreover box-tree to represent the teasshur. For a full acwhat tree is meant by the sherbin : it is supposed to be some kind of cedar: but although the Arabio Rosenmüller's Schol. in Fz. xxvii. 6. version of Dioscorides gives sherbin as the rendering of the Greek *ké5pos*, the two trees which Dioscorides speaks of seem rather to be referred to the genus jumperus than to that of pinus. However inlaid with box-wood from the isles of Chittim." ('elsius (lierob. i. 80) and Sprengel (Hist. Rei Now it is probable that the isles of Chittini may Herb. i. 267) identify the sherbin with the Pinus refer to any of the islands or maritime districts of cedrus (Linn.), the cedar of Lehanon. According the Mediterranean. Bochart believes Corsica is to Niebuhr also the cedar was called sherbin. The intended in this passage: the Vulg. has "de insulis same word, however, both in the Chaldee, the Syriac, Italize." Corsica was celebrated for its hox-trues and the Arabic, is occasionally used to express the (Plin. xvi. 16; Theophrast. II. P. iii. 15, § 5), and berich. Although the claim which the box-tree | it is well known that the ancients understood the has to represent the teasshur of Isaiah and Ezekiel art of veneering wood, especially box wood, with is far from being satisfactorily established, yet the vory, tortoise shell, &c. (Virg. En. x 137). This evidence rests on a better foundation than that passage, therefore, does certainly seen to favor the

regard to that theory which identifies the leasahur passage in Ez. xxvii. 6,b although it is one of account of the various readings of that passage see Resemmiller's Schol. in Ez. xxvii. 6. The most satisfactory translation appears to us to be that of Bochart (Geog. Suc. i. iii. c. 5, 180) and Rosenmüller: "Thy benches have they made of ivory which supports the claims of the sherbin. The opinion that tensshin denotes the word of the box-

bid, Gesen. s. v.: Bosópha: Bosóp, also dybouna Jer. xlix. 22, reixos Am. i. 12; [0Alvis Mic. ii. 12, Vulg. orile :] Bosra), the name of more than one place on the east of Palestine. 1. In Edom the city of Jobab the son of Zerah, one of the early kings of that nation (Gen. xxxvi. 33; 1 Chr. i. 44). This is doubtless the place mentioned in later times by Isaiah (xxxiv. 6, lxiii. 1 (in connection with Edom), and by Jeremiah (xlix. 18, 22), Amos (i. 12), and Micah (ii. 12, "sheep of B.," comp. Is. xxxiv. 6; the word is here rendered by the Vulgate and by Gesenius "fold," "the sheep of the fold," Ges. Thes. 230). It was known to Eusebius, who speaks of it in the Onomasticon (Bordop) as a city of Esau in the mountains of Idumsea, in connection with Is. lxiii. 1, and in contradistinction to Bostra in Persea. There is no reason to doubt that the modern representative of Bozrah is el-Busaireh,

البصير, which was first visited by Burckhardt

(Syr. 407; Beszeyra), and lies on the mountain district to the S. E. of the Dead Sea, between Thifileh and Petra, about half-way between the latter and the Dead Sea. Irby and Mangles mention it under the name of *Ipseyru* and Bauida (chap. viii.: see also Robinson, ii. 167). The "goats" which Isaiah connects with the place were found in large numbers in this neighborhood by Burckhardt (Syr. 405).

2. In his catalogue of the cities of the land of Moab, Jeremiah (xlviii. 24) mentions a Bozrah as in "the plain country" (ver. 21, המישר אורץ המישר i. e. the high level downs on the east of the De Sea and of the sower Jordan, the Belka of the modern Arabs). Here lay Heshbon, Nebo, Kirjathaim. Diblathaim, and the other towns named in this passage, and it is here that we presume Bozrah should be sought, and not, as has been lately suggested, at Bostra, the Roman city in Bashan, full sixty miles from Heshbon (Porter's Damascus, ii. 163, &c.). On the other hand, Bozrah stands by itself in this passage of Jeremiah, not being mentioned in any of the other lists of the cities of Moab, e. g. Num. xxxii.; Josh. xiii.; Is. xvi.; Ez. xxv.; and the catalogue of Jeremiah is expressly said to include cities both "far and near" (xlviii. 24). Some weight also is due to the consideration of the improbability that a town at a later date so important and in so excellent a situation should be entirely omitted from the Scripture. Still there is the fact of the specification of its position as in the Mishor; and also this, that in a country where the very kings were "sheep masters" (2 K. iii. 4), a name signifying a sheep-fold must have been of common occurrence.

For the Roman Bostra, the modern Busra, on the south border of the Haurán, see Reland, p. \$65, and Porter, ii. chap. 12. G.

BRASS

Gold Egyptian Bracelet. (Wilkinson.)

Men as well as women wore bracelets, as we see from (ant. v. 14, which may be rendered, "His wrists are circlets of gold full set with topazes." Layard says of the Assyrian kings: "the arms were encircled by armlets, and the vrisis by brace

Assyrian Bracelet Clasp. (Nineveh Marbles.)

lets, all equally remarkable for the taste and beauty of the design and workmanahip. In the centre of the bracelets were stars and rosettes, which were probably inlaid with precious stones" (Nisserek, ii. 323). These may be observed on the sculptures in the British Museum. [ARMLET; ANKLET.] F. W. F.

BRAMBLE. [THORNS.]

BRASS (Xalkos). The word TT (from

the root Wind, to shine) is improperly translated by

brass " in the earlier books of Scripture, since the Hebrews were not acquainted with the compound of copper and zinc known by that name. In most places of the O. T. the correct translation would be copper (although it may sometimes possibly mean bronze (Xalkds Kenpauevos), a compound of copper and tin. Indeed a simple metal was obviously in-tended, as we see from Deut. viii. 9, "out of whose hills thou mayest dig brass," and Job xxviii. 2, "Brass is molten out of the stone," and Deut. xxxiii. 25, "Thy shoes shall be iron and brass." which seems to be a promise that Asher should have a district rich in mines, which we know to have been the case, since Euseb. (viii. 15, 17 [de Mart. Pal. c. 7]) speaks of the Christians being condemned τοιs κατά Φαινώ της Παλαιστίνης χαλкой µerdadois (Lightfoot, Cent. Chorogr. c. 99). [Asher.]

Copper was known at a very early period, and the invention of working it is attributed to Tubalcain (Gen. iv. 29; cf. Wilkinson, Amc. Egypt. iii. 243; comp. "Prior zeris erat quant farri cognitus usus," Lucr. v. 1292). Its extreme ductility ($\chi \alpha \lambda$. $\kappa \partial s$ from $\chi \alpha Ad\omega$) made its application almost universal among the ancients, as Hesiod expressly mys (Dict. of Ant., art. $\mathcal{Z}s$).

Digitized by GOOS

mments (Es. xvi. 36; a Matt. x. 9, &c.).

It is often used in metaphors, e. g. Lev. xxvi. 19, "I will make your heaven as iron and your earth as brass," i. c. dead and hard. This expression is reversed in Deut. xxviii. 23 (comp. Coleridge's "All in a hot and copper sky," &c., Anc. Mar.). "Is my flesh of brass," i. e. invulnerable, Job vi. 12. "They are all brass and iron," i. e base, ignoble, impure, Jer. vi. 28. It is often used as an emblem of strength, Zech. vi. 1; Jer. i. 18, &c. The "brazen thighs" of the mystic image in Nebuehadnezzar's dream were a fit symbol of the "A xauou xalkoxitwres. No special mention of orichalcum seems to be made in the Bible.

The word xalkoll Baror in Rev. i. 15, ii. 18 (of $\pi \delta \delta \epsilon s$ abrow $\delta \mu o i o i \chi a \lambda \kappa o \lambda i \beta d r \varphi$), has excited much difference of opinion. The A. V. renders it "fine brass," as though it were from xalads and Aelße (smelting brass), or that opelxalkos, which was so rare as to be more valuable than gold. Bochart makes it "ses album igneo colore spiendens," as

though from 12, "shining." It may perhaps be deep-colored frankincense, as opposed to doyupohi-Baror (Liddell and Scott's Lex.). F. W. F.

* BRAYING IN A MORTAR, Prov. xxvii. 22. [PUNISHMENTS, III. (a.) 4.]

* BRAZEN SEA, 2 K. xxv. 13; Jer. lii. 17. [SF.A., MOLTEN.]

BRAZEN SERPENT. [SERPENT.]

BREAD (כלהום). The preparation of bread as an article of food dates from a very early period. It must not, however, be inferred from the use of be word lechem in Gen. iii. 19 ("bread," A. V.) hat it was known at the time of the fall, the word here occurring in its general sense of foul: the earliest undoubted instance of its use is found in Gen. xviii. 6. The corn or grain (דָרָן, דְיָוֶבֶר) employed was of various sorts. The best bread was 1.ade of wheat, which after being ground produced the "flour" or "meal" (ΠΩ: άλευραν; Judg. vi. 19; 1 Sam. i. 94; 1 K. iv. 22, xvii. 19, 14), and when sifted the "fine flour" כלר: more הַמַח סֹלֵה Ex. xxix. 2; or הַלֶת חָמָים, הַמַח Gen. xviii. 6; $\sigma \in \mu(\delta \alpha \lambda_{15})$ usually employed in the sacred offerings (Ex. xxix. 40; Lev. ii. 1; Ez. xlvi. 14), and in the meals of the wealthy (1 K. iv. 22; . K. vii. 1; Ez. xvi. 13, 19; Rev. xviii. 13). "Barley" was used only by the very poor (John vi. 9 13), or in times of scarcity (Ruth iii. 15, compared with i. 1; 2 K. iv. 38, 42; Rev. vi. 6; Joseph. B J. v. 10, § 2): as it was the food of horses (1 K iv. 28), it was considered a symbol of what was muan and insignificant (Judg. vii. 13; comp. Joasph. Ant. v. 6, § 4, μά (ar κριθινην, όπ' εὐτελείas ανθρώποιs άβρωτον; Liv. xxvii. 13), as well as of what was of a mere animal character, and hence ordered for the offering of jealousy (Num. v. 15; scap. Hos. iii. 2; Philo, ii. 307). " Spelt ' (ΠDDD): Shupa, Sta: rye, fitches, spell, A. V.) sus also used both in Egypt (Ex. ix. 32) and Palwine (Is szviii. 25; Ez. iv. 9; 1 K. xiz. 6, LXX.

• • Translated "filthiness " in Meek. xvi. 86 /4. V.) method of brass or money () (), xalasis). H.

²ympuplas δλυρίτης). Herodetus indeed states

Tas same word is used for money, in both Tes-| (ii. 36) that in the former country bread was made exclusively of olyra, which, as in the LXX., he identifies with sea; but in this he was mistaken, as wheat was also used (Ex. ix. 32; comp. Wilkinson's Anc. Egypt. ii. 397). Occasionally the grains above mentioned were mixed, and other ingredients, such as beans, lentils, and millet, were added (Es. iv. 9; cf. 2 Sam. xvii. 28); the bread so produced is called "barley cakes" (Ez. iv. 12, "as barley cakes," A. V.), inasmuch as barley was the main ingredient. The amount of meal required for a single baking was an ephah or three measures (Gen. xviii. 6; Judg. vi. 19; 1 Sam. i. 24; Matt. xiii. 33), which appears to have been suited to the size of the ordinary oven. The baking was done in primitive umes by the mistress of the house (Gen. xviii. 6) or one of the daughters (2 Sam. xiii. 8): female servants were however employed in large households (1 Sam. viii. 18): it appears always to have been the proper business of women in a family (Jer. vii. 18, xliv. 19; Matt. xiii. 83; cf. Plin. xviii. 11, 28). Baking, as a profession, was carried on by men (Hos. vii. 4, 6). In Jerusalem the bakers congregated in one quarter of the town, as we may infer from the names "bakers' street " (Jer. xxxvii. 21), and "tower of the ovens" (Neh. iii. 11, xii. 38, "furnaces," A. V.). In the time of the Herods, bakers were scattered throughout the towns of Palestine (Ant. xv. 9, § 2). As the bread was made in thin cakes, which soon became dry and unpalatable, it was usual to bake daily, or when required (Gen. xviii. 6; comp. Harmer's Observations, i. 483): reference is perhaps made to this in the Lord's prayer (Matt. vi. 11; Luke xi. 3). The bread taken by persons on a journey (Gen. xlv. 23; Josh. ix. 12) was probably a kind of biscuit. The process of making bread was as follows: the flour was first mixed with water, or perhaps milk (Burckhardt's Notes on the Bedomins, i. 58); it was then

kneaded (שֹלש) with the hands (in Egypt with the

Egyptians kneeding dough with their hands. (Will son. From a painting in the Tomb of Rem at Thebes.)

feet also; Herod. ii. 36; Wilkinson, ii. 386) in a small wooden bowl or "kneading-trough"

(TTNUD, a term which may, however, rather refer to the leathern bag in which the Bedouins carry their provisions, and which serves both as a wallet and a table; Niebuhr's Voyage, i. 171; Harmer, iv. 366 ff.; the LXX. inclines to this view, giving eyncralelpuara, "store," A. V., in Deut. xxviii. "; the expression in Ex. xii. 84, however, "bound up in their clothes," favors the idea of a

wooden bowl), until it became dough (722: orais Ex. xii. 84, 39; 2 Sam. xiii. 8; Jer. vii. 18; Hos

figyptians kneeding the dough with their feet. At a and *i* the dough is probably left to ferment in a basket, as is now done at Cairo. (Wilkinson.)

vii. 4. The term "dough" is improperly given in the A. V. as = $\mathcal{D} \cap \mathcal{D}$, in Num. xv. 20, 21; Neh. x. 37; Ez. xliv. 30). When the kneading was completed, leaven ($\mathcal{D} \cap \mathcal{D}$; $\mathcal{G}(\mu,\eta)$ was generally added [LEAVEN]; but when the time for prepartion was ahort, it was omitted, and unleavened takes, hastily baked, were eaten, as is still the prevlent custom among the Bedouins (Gen. xviil. 6, xix. 3; Ex. xii. 39; Judg. vi. 19; 1 Sam. xxviil.

24). Such cakes were termed ΠΥΞΏ (άζυμα, LXX.), a word of doubtful sense, variously supposed to convey the ideas of thinness (Fürst. 1.e.r. s. v.), succenteess (Gesen. Thesaur. p. 815), or purely (Knobel, Comm. in Ex. xii. 20), while leavened

bread was called V_{2} (it. sharpened or sourcel; Ex. xii. 39; Hos. vii. 4). Unleavened cakes were ordered to be esten at the passover to commemorate the hastiness of the departure (Ex. xii. 15, xiii. 3, 7; Deut. xvi. 3), as well as on other sacred occasions (Lev. ii. 11, vi. 16; Num. vi. 15). The leavened mass was allowed to stand for some time (Matt. xiii. 33; Luke xiii. 21), sometimes for a whole night ("their baker sleepeth all the night," Hos. vii. 6), exposed to a moderate heat in order to forward the fermentation ("the ceaseth from stir-

ring " בְּעַיר] " raising," A. V.] the fire " until it be leavened," Hos. vii. 4). The dough was then divided into round cakes (בְּרִוֹת כֶּרְוֹם), lit. sircles : śoros: " loaves," A. V.; Ex. xxix. 23; Judg. viii. 5; 1 Sam. x. 3; Prov. vi. 26; in Judg.

vii. 13, $\forall \exists : \mu \alpha \gamma(s)$, not unlike flat stones in shape and appearance (Matt. vii. 9; comp. iv. 3), alout a span in diameter and a finger's breadth in thickness (comp. Lane's Modern Egyptians, i. 164). Three of these were required for the meal of a single person (Luke xi. 5), and consequently one was barely sufficient to sustain life (1 Sam. ii. 86, "morsel," A. V.; Jer. xxxvii. 21, "piece," A. V.), whence the expression $\forall \Box \Box \Box \Box \Box$, "bread of affiction" (1 K. xxii. 97; Is. xxx. 30), referring not to the quality (powe plebeio, Grotius), but to the quantity: two hundred would suffice for a party 'or a reasonable time (1 Sam. xxv. 18; 2 Sam. tvi 1). The cakes were sometimes prescurved, and BRRAD

hence called ", (κολλυρίς; F.x. xxix. 2, 23; Lev. ii. 4, viii. 26, xxiv. 5; Num. xv. 20; 2 Sam. vi. 19), and mixed with oil. Similar cakes, sprinkled with seeds, were made in Egypt (Wilkinson, ii. 386). Sometimes they were rolled out into wafers

Rgyptians making cakes of bread sprinkled with seeds. (Wilkinson.)

A doubtful expression, referred by some to the whiteness of the bread (κανά χονδριτών; Aquil. κόφινοι γυρέως: consisten farines), by others, as in the A. V., to the whiteness of the baskets, and again, by connecting

An Egyptian carrying Jakes to the oven (Wilkinson.) in

b) the word "I with the didea of a hole, to an open-work basket (margin, A. V.), or lastly to bread baked in a hole (Kitto, Cyclop., art. Bread). The basketa were placed on a tray and carried on the baker's head (Gen. xl. 16 Herod. ii. 385; Wilkinson, ii. 386).

The methods of bak-

ing (T, were, and still are, very various a the East, adapted to the various styles of Mis. In the towns, where professional bakers vesided, there were no doubt fixed ovens, in shape and size resembling those in use among surselves; but more asually each household pos-

sessed a portable oven (אבור : האנג (Baros), consist ing of a stone or metal jar about three feet high which was heated inwardly with wood (1 K. rvii. 12; Is. zliv. 15; Jer. vii. 18) or dried grass and flower-stalks ($\chi \delta \rho \tau \sigma s$, Matt. vi. 30); when the fire had burned down, the cakes were applied either inwardly (Herod. ii. 92) or outwardly: such ovens were used by the Egyptians (Wilkinson, ii. 385), and by the Easterns of Jerome's time (Comment. in Lam. v. 10), and are still common among the Bedouins (Wellsted's Travels, i. 850; Niebuhr's Descript. de l'Arabie, pp. 45, 46). The use of a single oven by several families only took place in time of famine (Lev. xxvi. 26). Another species of oven consisted of a hole dug in the ground, the sides of which were coated with clay and the bottom with pebbles (Harmer, i. 487). Jahn (Archool. i. 9, § 140) thinks that this oven is referred

to in the term בירים (Lev. xi. 85): but 'he dual number is an objection to this view. The term

Gen. 1. 16) has also been referred to it.

Other modes of baking were specially adapted to the migratory habits of the pastoral Jews, as of the modern Bedouins; the cakes were ither spread upon stones, which were previously heated by lighing a fire above them (Burckhardt's Notes, i. 58) or beneath them (Belzoni s Travels, p. 84); or they were thrown into the heated embers of the fire itself (Wellsted's Travels, 1. 350; Niebulr, Descript. p. 46); or lastly, they were roasted by being placed between layers of dung, which burns slowly, and is therefore specially adapted for the purpose (Ex. iv. 12, 15; Burckhardt's Notes, i. 57; Niebuhr's Descript. p. 46). The terms by which

such cakes were described were T37 (Gen. xviii. 6; Ex. xii. 39; 1 K. xvii. 13; Ez. iv. 12; Hos. vii.

8), אָעָלוֹ (1 K. xvii. 12; Ps. xxxv. 16), or more

fully רְצָכָום אָזָת (1 K. xix. 6, lit. on the

stones, "coals," A. V.), the term $\overrightarrow{\Pi} \underbrace{P}_{X}$ referring, however, not to the mode of baking, but to the rounded ahape of the cake (Genen. Thesaur. p. 997): the equivalent terms in the LXX. $\epsilon_{\gamma R \rho \nu \rho} \rho_{a x}$, and in the Vulg. subcinericius passie, have direct reference to the peculiar mode of baking. The cakes required to be carefully turned during the process (Hos. vii. 8: Harmer, i. 488). Other methods were used for other kinds of bread: some

58) or like the Greek ray/prea, which were . sked in oil, and eaten warm with honey (Athen. tw. 55, p. 648); such cakes appear to have been chiefly used as eacred offerings (Lov. ii. 5, vi. 14, vii. 9; 1 Chr. xxiii. 29). A similar cooking utensil was used by Tamar (2 Sam. xiii. 9), named

ר (דוֹזיבי), in which she baked the cakes,

and then emptied them out in a heap $(7)^{\circ}$, not $3_{\frac{1}{2}}$ in thick. (English bricks are usually 9 in powred, as if it had been broth) before Amnon. long, $4_{\frac{1}{2}}$ wide, $3_{\frac{1}{2}}$ thick.) They most of them bear a different kind of bread, probably resembling the the name inscribed in cunsiform character, of Neb-

fita of the B.douins, a pasty substance (Burchhardt's Notes, i. 57) was prepared in a saucepan

ΠΟΥ, (arxiv) (arxi

term $\Box \neg \neg \neg$, to break == to give bread (Jer. xvi. 7): the pieces broken for consumption were called $\kappa \lambda d\sigma \mu a \tau a$ (Matt. xiv. 20; John vi. 12). Old bread is described in Josh. ix. 5, 12, as crumbled

(בֹּוָדְעָׁם): Aquil. ἐψαθυρωμένος: in frusta com minuti; A. V. "mouldy," following the LXX. ἐυροττών καl βεβρωμένος), a term which is also applied (1 K. xiv. 3) to a kind of biscuit which easily crumbled (κολλυρίς: "crackneis," A. V.).

BREASTPLATE. [ARMS, p. 161; HIGH-PRIEST, I. (2.) G.]

• BREECHES (Δ)??: περισκελή: feminalia), a kind of drawers, extending only from the loins to the thighs, worn by the priests (Ex. xxviii. 42, xxxix. 28; Lev. vi. 10, xvi. 4; Ez. xliv. 18; comp. Joseph. Ant. iii. 7, § 1; Philo, De Monarch. lib. ii. c. 5, Opp. ii. 325 ed. Mang.). See PRIEST, Dress. A.

BRETHREN OF JESUS. [BROTHER.]

ers used brick instead of stone, and slime (つつつ・ Eggaλτos), for mortar (Gen. zi. 3; Joseph. Ant. i 4, § 3). In the alluvial plain of Assyria, both the material for bricks and the cement, which bubbles up from the ground, and is collected and exported by the Arabs, were close at hand for building purposes, but the Babylonian bricks were more commonly burnt in kilns than those used at Nineveh. which are chiefly sun-dried like the Egyptian. Xenophon mentions a wall called the wall of Media, not far from Babylon, made of burnt bricks set in bitumen (πλίνθοις όπταῖς ἐν ἀσφάλτφ κειμέναις) 20 feet wide, and 100 feet high. Also another wall of brick 50 feet wide (Diod. ii. 7, 8, 12; Xen. Anab. ii. 4, § 12, iii. 4, § 11; Nah. iii. 14; Lavard. Nineveh, ii. 46, 252, 278). While it is needless to inquire to what place, or to whom the actual invention of brick-making is to be ascribed, there is perhaps no place in the world more favorable for the process, none in which the remains of original brick structures have been more largely used in later times for building purposes. The Babylonian bricks are usually from 12 to 18 in. square, and 34 in. thick. (English bricks are usually 9 in

BRICK

BRICK

schadnessar, whose buildings, no doubt, replaced Greeks preferred brick walls in general to stan-those of au earlier age (Layard, Nis. and Bab. pp. | (xxxv. 14; Vitruv. ii. 3, 8). Bricks of more than 505, 531). They thus possess more of the character of tiles (Ez. iv. 1). They were sometimes glazed and enamelled with patterns of various colors. Semiramis is said by Diodorus to have overlaid some of her towers with surfaces of enamelled brick bearing elaborate designs (Diod. ii. 8). Enamelled bricks have been found at Nimroud (Layard, ii. 312). Pliny (vii. 56) says that the Babylonians used to record their astronomical observations on tiles (coctilibus laterculis). He also, as well as Vitruvius, describes the process of making bricks at Rome. There were three sizes, $(1.) 1\frac{1}{2}$ ft. long, 1 ft. broad; (2.) 4 (Greek) palms long, 12-135 in. (8.) 5 paims long, 15-16875 in. The to prevent cracking, but those formed of clay taken breadth of (2.) and (3.) the same. He says the from the torrent beds on the edge of the desert,

3 palms length and of less than 1; palm, are mentioned by the Talmudists (Gesen. s. v.). The Israelites, in common with other captives, were employed by the Egyptian monarchs in making bricks and in building (Ex. i. 14, v. 7). Kiln-bricks were not generally used in Egypt, but were dried in the sun, and even without straw are as firm as when first put up in the reigns of the Amunophs and Thothmes whose names they bear. The usual dimensions vary from 20 in. or 17 in. to 141 in. long; 81 in. to 61 in. wide; and 7 in. to 41 in. thick. When made of the Nile mud, or alluvial deposit, they required (as they still require) straw

:1gs. 1, 2. Men returning after carrying the bricks. Figs. 3, 6. Taskmasters. Figs. 4, 5. Men carrying bricks. Figs. 9-18. Digging and mixing the clay or mud. Figs. 8, 14. reeds and sticks, placed at intervals to act as bind- scriptions indicating their date and purpose (Birch, ara (Wilkinson, ii. 194, smaller ed.; Birch, Ancient i. 11, 17). Among the paintings at Thebes, one fottery, i. 14; comp. Her. i. 179). Baked bricks on the tomb of Reknhars, an officer of the court of iowever were used, chiefly in places in contact with Thothmes III. (about 1400 B. C.), represents the water. They are smaller than the sun-dried bricks enforced labors in brick-making of captives, who (Birch, i. 23). A brick-kiln is mentioned as in are distinguished from the natives by the color in Agypt by the prophet Jeremiah (xliii. 9). A brick which they are drawn. Watching over the laborpyramid is mentioned by Herrichus (ii. 136) as the ers are "task-masters," who, armed with sticks work of King Asychis. Secostris (ii. 138) is said are receiving the "tale of bricks" and urging or to have employed his captives in building. Nu-the work. The processes of digging out the clay merous remains of buildings of various kinds exist, of moulding, and of arranging, are all duly repre-

acid together without straw; and crude brick walls constructed of sun-dried bricks, of which many speo-had frequently the additional security of a layer of imens are to be seen in the British Museum with un-

santed, and though the laborers cannot be deternimed to be Jews, yet the similarity of employment illustrates the Bible history in a remarkable degree (Wilkinson, H. 197; Birch, i. 19; see Aristoph. Av. 1133, Alγóπτιοs πλινθοόρος; Ex. v. 17, 18). Trav. is Pal. 8, 300; Burckhardt, Syria, 315;

The Jews learned the art of brick-making in Egypt, and we find the use of the brick-kiln in David's time (2 Sam. xii. 31), and a complaint made by Isaish that the people built altars of brick instead of unbewn stone as the law directed (Is. lxv. 3; Ex. xx. 26). [POTTERY.] H. W. P.

BRIDE, BRIDEGROOM. [MARRIAGE.]

BRIDGE. The only mention of a bridge in the Canonical Scriptures is indirectly in the proper name Geshur (בְּשָׁאָר), a district in Bashan, N. E of the sea of Galilee. At this place a bridge still exists, called the bridge of the sons of Jacob a (Gesen. s. v.). Absalom was the son of a daughter of the king of Geshur (2 Sam. iii. 8, xiii. 37, xiv. 23, 32). The Chaldee paraphrase renders "gates," in Nahum ii. 6, "bridges," where, however, dykes or weirs are to be understood, which being burst by inundation, destroyed the walks of Nineveh (Diod. ii. 27). Judas Maccabaeus is said to have intended to make a bridge in order to besiege the town of Casphor or Caspis, situate near a lake (2 Mac. xii. 13). Josephus (Ant. v. 1, § 8), speaking of the Jordan at the time of the passage of the Israelites, says it had never been bridged before, our ffeurro πρότερον, as if in his own time bridges had been made over it, which under the Romans was the case. (See the notices below.) In Is. xxxvii. 25,

קאר, dig for water, is rendered by LXX. אקיער דופא, dig for water, is rendered by LXX.

Permanent bridges over water do not appear to have been used by the Israelites in their earlier times, but we have frequent mention made of fords and of their military importance (Gen. xxxi. 22; Josh. ii. 7; Judg. iii. 28, vii. 24, xii. 5; Is. xvi. 2). West of the Jordan there are few rivers of importance (Amm. Marc. xiv. 8; Reland, p. 284), and perhaps the policy of the Jews may have discouraged intercourse with neighboring tribes, for it seems unlikely that the skill of Solomon's architects was unable to construct a bridge.

Herodotus (i. 186) describes a bridge consisting of stone piers, with planks laid across, built by Nitoeris, B. C. circ. 600, connecting the two portions of Babylon (see Jer. li. 31, 32, l. 33), and Diodorus speaks of an arched tunnel under the Euphrates (ii. 9). Bridges of boats are described also by Herodotus (iv. 88, vii. 36; comp. Æsch. Pers. 69, $\lambda urdőserges \sigma cycš(a)$, and by Xanophon (Anab. ii. 4, § 12). A bridge over the Zab, made of wickerwork, connecting stone piers, is described by Layard (i. 199), a mode of construction used also in South America.

Though the arch was known and used in Egypt as early as the 15th century B. C. (Wilkinson, ii. VO3 ff., Birch, i. 14) the Romans were the first onstructors of arched bridges. They made bridges over the Jordan and other rivers of Syria, of whion remains still exist (Stanley, 296; Irby and Mangles,

a \bullet This bridge spans the Jordan, between the HMrA and the lake of Galilee, and is called *Jir Bendt* Ya². Gasm, Bridge of Jacob's daughters (hobinson, *Phys.* Geogr. p. 155). It is 60 paces long, and has 4 pointed webes. Though comparatively modern, it no doubt tands where a bridge stood in the earliest times, since much of the traffic and travel between Damascus and 1344).

90, 91, 92, 143, 148). A stone Iridge over the Jordan, called the Bridge of the daughters of Jacob, is mentioned by B. de la Broquière, A. D. 1432, and a portion of one by Arculf, A. D. 700 (Early Trav. in Pal. 8, 300; Burckhardt, Syria, 315; Robinson, ii. 441). The bridge ($\gamma e \phi i \rho a$) connecting the Temple with the upper city, of which Josephus speaks (B. J. vi. 6, § 2, Ant. zv. 11, 5), seems to have been an arched viaduct (Robinson, i. 288, iii. 294). H. W. P.

BRIERS.^b No less than six Heb. words are thus rendered in eleven passages of the O. T. In Heb. vi. 8, it represents *& KauvBa*. In the 8th chapter of Judges occurs twice (v. 7, 16) the word

אין געצע, which the LXX. render by דמוֹ Bap-האין [Vat ABapהאיני, Bapanyvei,], or [Alex.] Bapacapuet, [Bapanyvei,] and the A. V. by briers. This is probably an incorrect rendering. The word properly means a threshing machine, consisting of a flat, square, wooden board set with teeth of iron, flint, or fragments of iron pyrites, which are abundant in Palestine. Gesenius con-

jectures that]] was the name for pyriles, from

קרק, fulguravit; and hence that יקרק = trib-

ula pyritis munita == 2710 (see Robinson, il. 307).

For אָדָר, Mic. vii. 4, and ללך, Es. xxviii. 24, see under THORNS.

In Ez. ii. 6, we read "Though briers and thorns be with thee," briers representing the Heb. בקרבים,

which is explained by rebels in the margin. The

root is $\Box \Box \Box$, rebellie vel refractarius fuit, and the rendering should be "Though rebellious men like thorns be with thee."

In Is. Iv. 13, we have "instead of the brier shall come up the myrtle-tree," the Heb. word for brier being TO, sirpid: koru(a: urtica. Koru(a is a strong-smelling plant of the endive kind, fleabane, Inula helenium, Linn. (Arist. H. A. iv. 8, 28; Diosc. iii. 126). The Peshito has j_{2} sutureia, savory, wild thyme, Thymus serpythum, a plant growing in great abundance in the desert of Sinai according to Buckhardt (Syr. ii.). Gesenius rejects both flee bare and wild thyme on etymolog ical grounds, and prefers urtica, nettle, consider

ing '무한 to be a compound of 키그, weit, and

T일깆, punzit. He also notices the opinion of Ewald (Gram. Crit. p. 520) that Sinapi album, the white mustard, is the plant meant.

In Is. v. 6, we have mention of briers and thorns as springing up in desolated and wasted lands; and here the Hebrew word is איַבְיר from root אָיָבִיר riguit, horrwit [ADAMANT] (comp. Is. vii. 23, 94, 25, ix. 18, and xxxii. 13. In Is. x. 17, xxvii. 4,

שָׁכִיר is used metaphorically for men. The LXX. In several of these passages have anarba; in one xboros, in another appearus Enpá.

Palestine must always have passed this way. See Gasmus. H.

^b • The eminent Hebraist, Professor District of Marvurg, treats of the subject of this article under the head of Dorman and Distrimantes (pp. 35-68) in his Abhandlungen für Semisiarke Wortforschung (Leipzig, 1944).

There is nothing in the etymology or usage by which we can identify the שְׁלָארֹ with any particnlar species of prickly or thorny plant. Possibly it is a general term for the very numerous plants of this character which are found in the uncultivated lands of the East. W. D.

BRIGANDINE. The Hebrew word thus rendered in Jer. xlvi. 4, li. 3 (γ^{i} , *siryón*: $\theta depa \xi$: *lorica*) is closely connected with that ($\gamma\gamma\gamma\psi$, *shiryón*) which is elsewhere translated "coat of mail" (1 Sam. xvii. 5, 38), and "habergeon" (2 Chr. xxvi. 14; Neh. iv. 16 [10]). [ARMS, p. 161 a.] Mr. Wedgwood (*Dict. of Eng. Elym.* s. v.) says it "was a kind of scale armor, also called Briganders, from being worn by the light troops called Brigands." The following examples will illustrate the usage of the word in Old English: "The rest of the armor for his body, he had put it on before in his tent, which was a Sicilian cassocke, and vpon that a *brigandine* made of many foldes of canuas with oylet-holes, which was gotten among the spoiles at the battell of Issue" (North's Plutarch, Alex. p. 735, ed. 1595).

"Hyn selfe with the Duke of Buckyngham stode barnessed in olde euil-fauoured Briganders" (Hall, Edso. V., fol. 15 b, ed. 1550). The forms brigantoille and brigantine also occur. W. A. W.

BRIMSTONE (בְּרָרוֹת, gophrith: ecor: miphur). There can be no question that the Hebrew word which occurs several times in the Bible is correctly rendered " brimstone; " b this meaning is fully corroborated by the old versions. The word is very frequently associated with "fire:" "The Lord rained upon Sodom and Gomorrah brimstone and fire out of heaven" (Gen. xix. 24); see also Ps. xi. 6; Ez. xxxviii. 22. In Job xviii. 15, and Is. xxx. 33, "brimstone" occurs alone, but no doubt in a sense similar to that in the foregoing passages, namely, as a synonymous expression with lightning, as has been observed by Le Clerc (Dissert. de Sodomæ subrersione, Commentario [in] Pentateuch. adjecta, § iv.), Michaelis, Rosenmüller, and others.c There is a peculiar sulphurous odor which is occasionally perceived to accompany a thunder-storm; the ancients draw particular attention to it: see Pliny (N. H. xxxv. 15), "Fulmina ac fulgura quoque sulphuris odorem habent;" Seneca (Q. nat. ii. 53), and Persius (Sat. ii. 24, 25). Hence the expression in the Sacred writings "fire and brimstone" to denote a storm of thunder and lightning. The stream of brimstone in ls. xxx. 33 is, no doubt, as Lee (Heb. Lex. p. 123) has well expressed it, " a rushing stream of lightning."

From Deut. xxix. 23, "the whole land thereof is brimstone like the overthrow of Sodom," it would appear that native sulphur itself is alluded to (see also Is. xxxiv. 9). Sulphur is found at the present time in different parts of Palestine, but in the greatest abundance on the borders of the Dead Sca. "We picked up pieces," says Dr.

Probably allied to לַכָּרָ a general name for such trees as abound with resincus inflammable exudations;
 tence: לְבָרָרָ "sulphur," as being very combastible. See the Lexicons of Parkhurst and Generature,

Of the Arabic بريت, kibell.

Robinson (Bib. Res. ii. 221), "as large as a wal nut near the northern shore, and the Araba said it was found in the sea near 'Ain el-Feshkhak is lumps as large as a man's fist: they find it in sufficient quantities to make from it their own gunpowder." See Irby and Maugles (Trarels, p. 453), Burckhardt (Trarels, p. 394), who observes that the Arabs use sulphur in diseases of their camels, and Shaw (Trarels, ii. 159). There are hot sulphurous springs on the eastern coast at the ancient Callirrhoë (Irby and Mangles, Trar. p. 467, and Robinson, Bib. Res. ii. 222).

The pieces of sulphur, varying in size from a nutmeg to a small hen's egg, which travellers pick up on the shore of the Dead Sea, have, in all probability, been disintegrated from the adjacent limestone or volcanic rocks and washed up on the shores. Sulphur was much used by the Greeks and Romauin their religious purifications (Juv. ii. 157; Plm xxxv. 15): hence the Greek word Geior, lit. " the divine thing," was employed to express this substance. Sulphur is found nearly pure in different parts of the world, and generally in volcanic dua tricts; it exists in combination with metals and in various sulphates; it is very combustible, and is used in the manufacture of gunpowder, matches, &c. Pliny (l. c.) says one kind of sulphur was employed "ad ellychnia conficienda." **W**. Н.

• BRING. "To bring a person on his way" or "journey" is used in the A. V. in the sense of to conduct or accompany him, for a part or the whole of the distance, often with the associated idea of fitting him out with the necessary supplies

(П²Ф: синтропе́нтво, пропе́нтво: deduco, premitio; Gen. xviii. 16; Acts xv. 3, xxi. 5; Rom. xv. 24; 1 Cor. xvi. 6; 2 Cor. i. 16; Tit. iii. 13; 3 John 6). A.

• BROIDER. • See EMBROIDERER. In many modern editions of the A. V., broidered in 1 Tim. ii. 9 — "not with broidered hair" — is a corruption of broided, the rendering of the ed. of 1611 and other early editions. Broided is an old form of brouided. The marginal rendering is "plaited;" Gr. $\delta y \pi \lambda \delta \gamma \mu a \sigma i y$; Vulg. in tortis crimibus. A.

BROOK. Four Hebrew words are thus rendered in the O. T.

1. (7), dphik (Ps. xlii. 1 [2]), which properly denotes a violent torrent, sweeping through a mountain gorge. It occurs only in the poetical books, and is derived from a root dphak, signifying "te be strong." Elsewhere it is rendered "stream," "channel," "river."

2. $\neg \wedge \gamma$, geor (Ia. xix. 6, 7, 8, xxiii. 3, 10), an Fgyptian word, generally applied to the Nile, or to the canals by which Egypt was watered. The only exceptions to this usage are found in Dan. xii. δ , 6, 7.

3. כיקל, micâl (2 Sam. xvii. 20), which occurs but once, and then, according to the most probable conjecture, signifies a "rivulet," or small stream of water. The etymology of the word is

c See the different explanation of Hengs enberg (Pe xi. 6), who maintains, contrary to all reason, the Sodom and Gomorrah were destroyed by "a litere raining of brimstone."

b From A. S., brennan, " to burn," and sone.

Ine Fargum erroneously renders it language alone, to take "brethren" as meaning sbecure. " Jordan."

4. בָּתָא, nachal, a term applied both to the iry torrent-bed (Num. xxi. 12; Judg. xvi. 4) and to the torrent itself (1 K. xvii. 3). It corresponds with the Arabic unday, the Greek $\chi \epsilon \mu d \beta \rho o v_5$, the Italian fummara, and the Indian null-in. For fur-ther information, see RIVER. W. A. W.

BROTHER (TS: aderpos). The Hebrew word is used in various senses in the O. T., as (1.) Any kinaman, and not a mere brother; e. g. nephew (Gen. xiv. 16, xiii. 8), husband (Cant. iv. 9). (2.) Une of the same tribe (2 Sam. xix. 12). (3.) Of the same people (Ex. ii. 11), or even of a cognate people (Num. xx. 14). (4.) An ally (Am. i. 9). (5.) Any friend (Job vi. 15). (6.) One of the same office (1 K. ix. 13). (7.) A fellow man (Lev. xix. 17). (8.) Metaphorically of any similarity. It is a very favorite Oriental metaphor, as in Job xxx. 29, "I am become a brother to the jackals" (Gesen. S. C.).

The word abertoos has a similar range of meanings in the N. T., and is also used for a disciple (Matt. xxv. 40, dc.); a fellow-worker, as in St. Paul's Fpp. passim; and especially a Christian. Indeed, we see from the Acts that it was by this name that Christians usually spoke of each other. The name Christian was merely used to describe them objectively, i. e. from the Pagan point of view, as we see from the places where it occurs, namely, Acts [xi. 26], xxvi. 28, and 1 Pet. iv.

The Jewish schools distinguish between "brother ' and "neighbor;" " brother " meant an Israelite by blood, "neighbor" a proselyte. They allowed neither title to the Gentiles; but Christ and the Apostles extended the name "brother" to all Christians, and "neighbor" to all the world, 1 Cor. v. 11; Luke x. 29, 30 (Lightfoot, Hor. llebr. ad Matt. v. 22).

We must now briefly touch on the difficult and interesting question as to who were "the brethren of the Lord," and pass in review the theories respecting them. And first we would observe that in arguing at all against their being the real brethren of Jesus, far too much stress has been laid on the assumed indefiniteness of meaning attached to the word "brother" in Scripture. In all the adduced cases it will be seen that, when the word is used in any but its proper sense, the context prevents the possibility of confusion; and indeed in the only two exceptional instances (not metaphorical). namely, those in which Lot and Jacob are respectively called "brothers" of Abraham and Laban, the word is only extended so far as to mean "nephew;" and it must be remembered that even these exceptions are quoted from a single book, seventeen centuries earlier than the gospels. If then the word 'brethren," as repeatedly applied to James, &c., seally mean "cousins" or "kinsmen," it will be the only instance of such an application in which no data are given to correct the laxity of meaning. Again, no really parallel case can be quoted from he N. T., except in merely rhetorica. and tropical rasinges; whereas when "nephews are meant ey are always specified as such, as in Col. iv. 10; Acts xxiii 16 (Kitto, The Apostles, &c. p. 165 E). There is therefore no adequate warrart in the

· Not the primitive bishop of this name, of Hierap- century. Prof. Lightfoot (on Galas. p. 259) has pointed We, but a mediseval namesake who lived in the 11th out this slip of the writer.

"relatives;" and therefore the a priori presump tion is in favor of a literal acceptation of the term. We have dwelt the more strongly on this point because it seems to have been far too easily assumed that no importance is to be attached to the mere fact of their being invariably called Christ's brethren; whereas this consideration alone goes far to prove that they really were so.

There are, however, three traditions respecting them. They are first mentioned (Matt. xiii. 56) in a manner which would certainly lead an unbiased mind to conclude that they were our Lord's uterine brothers. " Is not this the carpenter's son? is not his mother called Mary? and his brethren James, and Joses, and Judas, and Simon? and his sisters, are they not all with us?" But since we find that there was a " Mary, the mother of James and Joses" (Matt. xvii. 56), and that a "James and Judas (?) " were sons of Alphæus (Luke vi. 15, 16), the most general tradition is - I. That they were all our Lord's first cousins, the sons of Alphaus (or Clopas - not Cleopas, see Alford, Gr. Test. Matt. x. 3) and Mary, the sister of the Virgin. This tradition is accepted by l'apias, a Jerome Cat. Script. Ecc. 2), Augustine, and the Latin Church generally, and is now the one most commonly received. Yet there seem to be overwhelming arguments against it: for (1.) The reasoning entirely depends on three very doubtful assumptions, namely, (a.) That "his mother's sister" (John xix. 25) must be in apposition with "Mary, the wife of Cleophas," which would be improbable, if only on the ground that it supposes two sisters to have had the same name, a supposition substantiated by no parallel cases [Wieseler (comp. Mark xv. 40) thinks that Salome, the wife of Zebedee, is intended by "his mother's sister"]. (b.) That "Mary, the mother of James," was the wife of Alphaus, i. e that the James intended is 'Idrasso' AA palov. (c.) That Cleophas, or more correctly Clopas, whose wife Mary was, is identical with Alphaeus; which may be the case, although it cannot be proved. (2.) If his cousins were meant, it would be signally untrue that "neither did his brethren believe on him " (John vii. 5 ff.), for in all probability three out of the four (namely, James the Less, Matthew (or Levi), and Jude, the brother (?) of James) were actual Apostles. We do not see how this objection can be removed. (3.) It is quite unaccountable that these "brethren of the Lord," if they were only his cousins, should be always mentioned in conjunction with the Virgin Mary, and never with their own mother Mary, who was both alive and in constant attendance on our Lord. (4.) They are generally spoken of as distinct from the Apostles; see Acts i. 14; 1 ('or. ix. 5; and Jude (17) seems to clearly imply that he himself was not an Apostle. It seems to us that these four objections are quite adequate to set aside the very slight grounds for identifying the "brethren of the Lord" with the "sons of Alphaus."

II. A second tradition accepted by Hilary. Epiphanius, and the Greek fathers generally, makes them the sons of Joseph by a former marriage with a certain Escha or Salome of the tribe of Judah: indeed Fpiphanius (Hæres. xrix. § 4) even men tions the supposed order of birth of the four sons and two daughters. But Jerome (Com. in Matt. xii. 49)

slights this as a mere conjecture, horrowed from the "deliramenta Apocryphorum," and Origen says that it was taken from the Gospel of St. Peter. | 56; Lightfoot, Hor. Hebr. Matt. v. 22, &c., &c.) F. W. F. The only shadow of ground for its possibility is the apparent difference of age between Joseph and the Virgin

III. They are assumed to have been the offspring of a levirate marriage between Joseph and the wife of his deceased brother Clopas. But apart from all evidence, it is obviously idle to examine so arbitrary an assumption.

The arguments against their being the sons of the Virgin after the birth of our Lord, are founded 70 -- (1.) The almost constant tradition of her Le naoberla. St. Basil (Serm. de S. Nativ.) even monds a story that " Zechary was slain by the Jews between the porch and the altar " for affirming her to be a Virgin after, as well as before the hirth of her most holy Son (Jer. Taylor, Duct. Dubit. 11.3, 4). Stil the tradition was not universal: it was denied, for instance, by large numbers called Anti dicomarianite and Helvidiani. To quote Fz. xliv. 2, as any argument on the question is plainly absurd. (2.) On the fact that on the cross Christ commended his mother to the care of St. John; but this is easily explicable on the ground of his brethren's apparent disbelief in Him at that time. though they seem to have been converted very soon afterwards. (3.) On the identity of their names with those of the sons of Alphæus. This argument loses all weight, when we remember the constant recurrence of names in Jewish families, and the extreme commonness of these particular names. In the N. T. alone there may be at least five contemporary Jameses, and several Judes, not to mention the 21 Simons, 17 Joses, and 16 Judes mentioned Ly Josephus.

On the other hand, the arguments for their being our Lord's uterine brothers are numerous, and taken collectively, to an unprejudiced mind almost irresistible, although singly they are open to objections: e. g. (1.) The word *apartoronos vids*, Luke 1. 7. (2.) Matt. i. 25, oùn εγίνωσκεν αυτην έως υ^τ ετςκεν. κ. τ. λ. to which Alford justly remarks. st:ly one meaning could have been attached but for preconceived theories about the actmapferia. (3.) The general tone of the gospels on the subject, since they are constantly spoken of with the Virgin Mary, and with no shadow of a hint that they were not her own children (Matt. xii. 46; Mark iii. 31. dc.). It can, we think, hardly be denied that any one of these arguments is singly stronger than those produced on the other side.

To sum up then, we have seen (I.) that "the brethren of the Lord " could hardly have been identizal with the sons of Alpha-us, and (II.) that we have no grounds for supposing them to have been the sons of Joseph by a previous, or (III.) a levirate marriage: that the arguments in favor of their being actual brothers of our Lord are cogent, and that the tradition on the other side is not sufficiently weighty or unanimous to set them aside. Finally, this tradition of the perpetual virginity of the mother of our Lord (which any one may hold, if he will, as one of the " pie credibilia," Jer. Taylor, Duct. Dub. II. 3, 6) is easily accounted for by he general error on the inferiority of the wedded o the virgin state: Scripture in no way requires ne to believe it, and since Mary's previous virginity s alone "quisite to the Gospel narrative, we must erard a question of mere curiosity. [JAMES;

* On this question of " the brethren of the Lord," Dr. Lange maintains the cousin-theory, but with a peculiar modification. He derives the cousinship not from the mothers (the two Marys being sisters) but from the fathers (Clopas or Alphaeus and Joseph being brothers). See his Bibelwerk, i. 201, and Dr. Schaff's Translatum, p. 255. Professor Lightfoot thinks the words on the cross, "Woman, behold thy son," said of John the Evangelist, are decisive, as showing that the mother of Jesus had no sons of her own, and hence according to his view " the brethren " must have been sons of Joseph by a former marriage (St. Paul's Ep. to the Galat., pp. 241-275). Of these two explanations (the cousintheory being regarded as out of the question) Dr. Schaff (on Lange, pp. 256-260, where he has a full note) prefers the latter, partly as agreeing better with the apparent age of Joseph, the husband of Mary (who disappears so early from the history), and also with the age of the brothers who seem at times to have exercised a sort of eldership over lesus (comp. Mark iii. 31 and John vii. 3 ff.). Undoubtedly the view adopted in the foregoing article, that Jesus had brothers who were the sons of Mary, is the one which an unforced exeges: quires; and, as to the fact of the Saviour's committing the mother in his last moments to the care of John, which this view is said to make irreconconcilable with "the claims of filial piety," if Mary had sons of her own, it is not easy in point of principle to make out the material difference (affirmed by those who suppose a previous marriage of Joseph) between such claims of her own sons and those of step-sons. "The perpetual virginity of Mary," says the late Prof. Edwards, "is inferred from half a verse (Matt. i. 25), which by natural implication teaches the direct contrary." This question is brought up again under JAMES. н

* BRUIT, Jer. x. 22; Nah. iü. 19, is used in the sense, now obsolete, of "report," "tidings." The A. V. in the passages referred to follows the Genevan version. Α.

BUBAS'TIS. [PIBESETH.]

* BUCKLER. [ARMS, II. 5; SHIELD.]

BUK'KI () [contracted for)]; see infra]: Bonni; [Alex.] Bonai; [Vat. Bor, Bonai:] Bocci). 1. Son of Abishua and father of Uzzi. fifth from Aaron in the line of the high-priests in 1 Chr. v. 31, vi. 36 (vi. 5, 51, A. V.), and in the genealogy of Ezra, Ezr. vii. 4, and 1 Eadr. viii. 2. where he is called Bound, BOCCAS, which is corrupted to BORITH, 2 Esdr. i. 2. Whether Bukks ever filled the office of high-priest, we are not informed in Scripture. Epiphanius in his list of the ancestors of Jehoiada, whom he fancifully supposes to be brother of Elijah the Tishbite, omits both Bukki and Abishua (Advers. Melchizedec. iii.). Josephus (Ant. viii. 1, § 3) expressly says that all of Aaron's line between Joseph (Abishua) the highpriest, and Zadok who was made high-priest in the reign of David, were private persons (idurrebrarres) i. e. not high-priests, and mentions by name " Bukki the son of Joseph the high-priest," as the first of those who lived a private life, while the pontifica. dignity was in the house of Ithamar. But in v egard a question of mere curiosity. [JAMES; 11, 55, Josephus says as expressly that Abiahua (there osks; JUDE.) (Pearson, On the Oresed, Art. called Abiezer) having received the bigh-priesthoos

from his father l'hinehas, transmitted it to his own son Bukk; who was succeeded by Uzzi, after whom it passed to Eli. We may conclude therefore that Josephus had no more means of knowing for certain who were high-priests between Phinehas and Eli, than we have, and may adopt the opinion, which is far the most probable, that there was no high-priest between them, unless perhaps Abishua. For an account of the absurd fancies of the Jews, and the statements of Christian writers relative to the succession of the high-priests at this period, see Selden, de Success. in Pontif. Hebr. ; also Generalog. of our Lord, ch. x. A. C. H.

2. (Banxlp [Vat. -xeip]; Alez. Bonni: Bucci.) Son of Jogli, "prince" (N'D)") of the tribe of Dan, one of the ten men chosen to apportion the

land of Canaan between the tribes (Num. xxxiv. 22). BUKKI'AH (TT) [wasting from Jehorak], Bukkijahu: Bovnlas [Vat. -ner-]; Alex. Bonrias, [Konnias:] Bocciau), a Kohathite Levite, of the sons of Heman, one of the musicians in the Temple, the leader of the sixth band or course in the service (1 Chr. xxv. 4, 18).

BUL. [MONTHS.]

BULL, BULLOCK, terms used synonymously with ox, oxen, in the A. V. as the representatives at several Hebrew words. [See Ox.] Twice in the N. I'. as the rendering of raupos, Heb. ix. 18. x. 4.

is properly a generic name for horned catthe when of full age and fit for the plough. Ac-urdingly it is variously rendered bullock (Is. lxv. 25), cow (Ez. iv. 15), ozen (Gen. xii. 16). Hence in Deut. xxi. 8, אָרָלָת פָּקָר is a keifer; Ex xxix. 1, פר הָרְבָרָה, a young bullock; and in Gen. xviii. 7, simply جَرَبَتَ rendered a culf in A. V. It is derived from an unused root, , to cleave, hence to plough, as in Latin ar-**B**LCO m is aramentum.

in the same way an infiers from בַּקָר in the same way an TW, a sheep, from 183, a flock of sheep. It is a generic name, but almost always signifies one head of horned cattle, without distinction of age or vex. It is very seldom used collectively. The Chaldee form of the word, "U, occurs in Ezr. vi. 9, 17, vii. 17; Dan. iv. 25, &c.; and Plutarch (Sull. c. 17) says Θώρ of Φοίνικες την βούν κα-λούσι. It is probably the same word as ταύρυς, tourus, Germ. stier, Engl. steer. The root "70

is not used, but the Arab. 近, excitavit pulcerem, a a very natural derivation of the word.

ענל, a calf, male or female, prop why of the first year, derived, as Gesenius thinks, from an Æthiopie word signifying fetus, embryo, vullus, catulus, while others derive it from 22 zdrit, rotavit, festinavit. The word is used of a sained heifer (Hos. x. 11), of one giving milk (Is. Ai. 21, 22), of one used in ploughing (Judg. xiv. 3), and of one three years old (Gen vv. 9). Al-

The " printer " are only specified to seven triber not of the two : not to Judah, Simson, or Benjamin.

most synonymous with עַרָל is שָׁם, the latter sig nifying generally a young bull of two years old though in one instance (Judg. vi. 25) possibly s bull of seven years old. It is the customary term for bulls offered in sacrifice, and hence is used met aphorically in Hos. xiv. 2, "so will we render, ' sa bullocks,' our line."

BURIAL

There are four or five passages in which the word

אביר is used for bulle. It is the plural of אברים strong, whence its use. See Ps. xxii. 12, l. 13, lxvlii 30; Is. xxxiv. 7; Jer. l. 11.

All the above words refer to domesticated cattle, which formed of old, as now, an important part of the wealth of the people of Palestine. In Is. ii. 20

the word NVA occurs, and is rendered " wild hull " but "wild ox " in Deut. xiv. 5. The LXX have σευτλίον in the former passage and δρυγα in the latter. It was possibly one of the larger species of antelope, and took its name from its swiftness -

the Arabic Libeing cursu antevertit. The An-telope Oryx of Linnseus is indigenous in Syria, Arabia, and Persia. Dr. Robinson mentions large herds of black and almost hairless buffaloes as still existing in Palestine, and these may be the animal W. D. indicated (iii. 396).

BULRUSH, used synonymously with Rush in the A V. as the rendering of the words 기고과 and NO?. In Is. iz. 14, xiz. 15, we have the proverbial expression הפפה ואכמון, A. V. "branch and rush," equivalent to high and low alike (the LXX. have µ éyar kal µ κρόν in one passage, dox h καl τέλοs in the other), and in Is. Iviii. 5, 71028 is rendered bulinuth. W. D.

* The remainder of this article in the English edition is entirely superseded by the art. REED, which see.

* BULRUSHES, ARK OF. [Moses.]

BU'NAH (「リコ [discretion]: Barad; [Vat. Baraia; Ald. Baard.] Buna), a son of Jerahmeel. of the family of Phares in Judah (1 Chr. ii. 25).

BUN'NI. 1. ('DD [built]: Bonni), one of the Levites in the time of Nehemiah (Neh. ix. 4); possibly the same person is mentioned in x. 15. The LXX. in both cases translate the name by viós.

2. [FA.8 Borral; Comp. Borra: Boni.] Another Levite, but of earlier date than the preceding (Neh

xi. 15). The name, `크고, is also slightly different LXX. [in most MSS.] omits.

Bunni is said to have been the Jewish name of Nicodemus (Lightfoot on John iii. 1; Ewald, v. 233).

• BURDEN. The Hebrew NWD, rendered "burden" in the A. V., denotes both a burden, and an oracle or prophecy. This double sense of the word is referred to in Jer. xxiii. 33 ff. See Noyes's note on the passage (Trans. of the Hebreu Prophets, 3d ed., 1966, ii. 340).

BURIAL, SEPULCHRES, TOMBS. The Jewr "niformly disposed of the corpse by entombment where possible, and failing that, by interment; extending this respect to the remains even of the

Digitized by GOOG

\$8), in the latter case by express provision of law. Since this was the only case so guarded by Mosaic precept, it may be concluded that natural feeling was relied on as rendering any such general injuncion superfluous. Similarly, to disturb remains was regarded as a barbarity, only justifiable in the case of those who had themselves outraged religion (2 K. xxiii. 16, 17; Jer. viii. 1, 2). The Rabbis quote the doctrine "dust thou art, and unto dust shalt thou return," as a reason for preferring to entomb or inter their dead; but that preferential practice is older than the Mosaic record, as traceable in patriarchal examples, and continued unaltered by any Gentile influence; so Tacitus (Hist. v. 5) notices that it was a point of Jewish custom, corpora condere quan cremare.

On this subject we have to notice: (1) the place of burial, its site and shape; (2) the mode of burial; (8) the prevalent notions regarding this duty; [and (4) the rapidity with which burial took place after death.]

1. A natural cave enlarged and adapted by excavation, or an artificial imitation of one, was the standard type of sepulchre. This was what the structure of the Jewish soil supplied or suggested. A distinct and simple form of sepulture as contrasted with the complex and elaborate rites of Egypt clings to the region of Palestine and varies but little with the great social changes between the periods of Abraham and the Captivity. Jacob and Joseph, who both died in Egypt, are the only known instances of the Egyptian method applied to patriarchal remains. Sepulchres, when the owner's means permitted it, were commonly prepared beforehand, and stood often in gardens, by roadsides, or even adjoining houses. Kings and prophets alone were probably buried within towns (1 K. ii. 10, xvi. 6, 28; 2 K. x. 35, xiii. 9; 2 Chr. xvi. 14, xxviii. 27; 1 Sam. xxv. 1, xxviii. 8). Sarah's tomb and Ruchel's seem to have been chosen merely from the accident of the place of death; but the successive interments at the former (Gen. xlix. 31) are a chronicle of the strong family feeling among the Jews. It was the sole fixed spot in the unsettled patriarchal life; and its purchase and transfer, minutely detailed, are remarkable as the sole transaction of the kind, until repeated on a similar occasion at Shechem. Thus it was deemed a misfortune or an indignity, not only to be deprived of burial (Is. xiv. 20; Jer. passim; 2 K. ix. 10), but, in a lesser degree, to be excluded from the family sepulchree (1 K. xiii. 22), as were Uzziah the royal leper, and Manasseh (2 Chr. xxvi. 23, xxxiii. 20). Thus the remains of Saul and his sons were reclaimed to rest in his father's tomb. Similarly it was a mark of a profound feeling towards a person not of one's family o wish to be buried with him (Ruth i. 17; 1 K ciii. 31), or to give him a place in one's own epulchre (Gen. xxiii. 6; comp. 2 Chr. xxiv. 16). The head of a family commonly provided space for more than one generation; and these galleries of kindred sepulchres are common in many eastern vranches of the human race. Cities soon became opulous and demanded cemeteries (comp. the term ToAudronov, Fz. xxxix. 15), which were placed without the walls; such an one seems intended by the expression in 2 K. xxiii. 6, "the graves of the shildren of the people," situated in the valley of the fumes in his honor," i. e. his near relation, on Kedron or of Jehoshaphat. Jeremiah (vil. 32, xiz. whom such dutie devolved; not, as Winer (a. v 11) threatens that the eastern valley called Tophet, Begrabes) and others think "the burner of the

sain enemy and malefactor (1 K. xi. 15; Deut. xxi.) the favorite haunt of idolatry, should be polluted by burying there (comp. 2 K. xxiii. 16). Such was also the "Potter's Field" (Matt. xxvii. 7), which had perhaps been wrought by digging for clay inte holes serviceable for graves.

> The Mishnaic description of a sepulchre, complete according to Rabbinical notions, is somewhat as follows: a cavern about 6 cubits square, or 6 hs 8, from three sides of which are recessed longitud-

> inaliy several vaults, called D'DID, each large enough for a corpse. On the fourth side the cavern is approached through a small open covered court

> or portico, 737, of a size to receive the bier and bearers. In some such structures the demoniac may have housed. The entry from this court to that

> cavern was closed by a large stone called גולל. as capable of being rolled, thus confirming the Evangelistic narrative. Sometimes several such caverns, each with its recesses, were entered from the several sides of the same portico. (Mishna, Bara Bathra, 6, 8, quoted by J. Nicolaus, de Sepulchris Hebraorum [lib. iii. c. xi.].) Such a tomb is that described in Buckingham's Travels in Arabia (p. 158), and those known to tradition as the "tombs of the kings" (see below). But earlier sepulchres were doubtless more simple, and, to judge from 2 K. xiii. 21, did not prevent mutual contact of remains. Sepulchres were marked sometimes by pillars, as that of Kachel; or by pyramids, as those of the Asmoneans at Modin (Joseph. Ast. xiii. 6, 7); and had places of higher and lower honor. Like temples, they were. from their assumed inviolability, sometimes made the depositaries of treasures (De Saulcy, ii. 183). We find them also distinguished by a "title" (2 K. xxiii. 17). Such as were not otherwise noticeable were scrupulously "whited " (Matt. xxiii. 27) once a year, after the rains before the passover, to warn passers by of defilement (liot-tinger, Cippi Hebr. [Ugolini, xxxiii.] p. 1034; Ros-teusch de Sepul. Calce notat. Ugolini, xxxiii.).

> 2. With regard to the mode of burial, we should remember that our impressions, as derived from the O. T., are those of the burial of persons of rank or public eminence, whilst those gathered from the N. T. regard a private station. But in both cases "the manner of the Jews" included the use of spices, where they could command the means. Thus Asa lay in a "bed of spices" (2 Chr. xvi. 14). A portion of these were burnt in honor of the deceased, and to this use was probably destined part of the 100 pounds weight of "myrrh and aloes" in our Lord's case. On high state occasions the vessels, bed, and furniture used by the deceased were burnt also. Such was probably the "great burning " made for Ass. If a king was unpopular or died disgraced (e. g. Jehoram, 2 Chr. xxi. 19; Joseph. Ant. ix. 5, § 3), this was not observed. In no case, save that of Saul and his sons, were the bodies burned, nor in that case were they so burnt as not to leave the "bones," easily concealed and transported, and the whole proceeding looks like a hasty precaution against hostile violence. Even then the bones were interred, and re-exhumed for solemn entombment. The ambiguous word in Am.

vi. 10, アンフロン, rendered in the A. V. "he that burneth him," probably means " the burner of per-

BURIAL

surpres." a For a great mortality never causes men | separately. Previously to this being done, spices to burn corpses where it is not the custom of the sountry; nor did the custom vary among the Jews on such an occasion (Ez. xxxix. 12-14). It was the office of the next of kin to perform and preside over the whole funereal office: but a company of public buriers, originating in an exceptional necessity (Ez. L c.), had become, it seems, customary in the times of the N. T. (Acts v. 6, 10). The closing of the eyes, kissing, and washing the corpse (Gen. xlvi. 4, l. 1; Acts ix. 87), are customs common to all nations. Coffins were but seldom used, and if used were open; but fixed stone sarcophagi were sommon in tombs of rank. The bier, the word for which in the O. T. is the same as that rendered led [see BED], was borne by the nearest relatives, and followed by any who wished to do honor to the

were applied to the corpse in the form of ointment, or between the folds of the linen; hence our Lord's remark, that the woman had anointed his bod . πpos to errapidseir, " with a view to dressing it in these dyrdpia;" not, as in A. V. " for the burial." For the custom of mourners visiting the sepulchre, see MOURNING; for that of frequenting totule for other purposes, see NECROMANCY.

3. The precedent of Jacob's and Joseph's remains being returned to the land of Canaan was followed, in wish at least, by every pious Jew. Following a similar notion, some of the Rabbins taught that only in that land could those who were buried ob tain a share in the resurrection which was to ushe in Messiah's reign on earth. Thus that land was called by them, " the land of the living," and the sepulchre itself, " the house of the living." Some dead. The grave-clothes $(\partial\theta \delta \mu a, \partial \mu \tau d \rho a)$ were sepulchre itself, "the house of the living." Some probably of the fashion worn in life, but swathed and fastened with bandages, and the head covered ever else buried, rolled back to Canaan under ground even feigned that the bodies of the righteous, wher-

Plan of the Tombs called " Tombs of the Prophets."

were, in popular belief, led by the same teaching invested with traditions. Thus Machpelah is stated (Lightfoot, Centuria Chorographics, s. v. Hebron) to have been the burial-place not only of Abraham and Sarah, but also of Adam and Eve; and there was probably at the time of the N. T. a spot fixed upon by tradition as the site of the tomb of every prophet of note in the O. T. To repair and adorn these was deemed a work of exalted piety (Matt. cxiii. 23). The scruples of the Scribes extended even to the burial of the ass whose neck was broken (Ex. xxxiv. 20), and of the first-born of cattle. (R. Maimon. de Primogen. ch. iii. § 4, quoted by J. Nicolaus, de Sepulchr. Heb. [lib. iii. c.] xvi. 1, 3, 4).

The neighborhood of Jerusalem is thickly studded with tombs, many of them of great antiquity. succinct but valuable account of them is given in Porter's Handbook (p. 143 ff.); out it is only necmeany in this article to refer to two or three of the most celebrated. The so-called "Tombs of the

and found there only their appointed rest (J. Nico- | Prophets " will be best explained by the preceding have, de Sepulchr. Iteb. [lib. iii. c.] xiii. 1). Tombs plan, taken from Porter (p. 147), and of which he gives the following description : -

"Through a long descending gallery, the first part of which is winding, we enter a circular cham ber about 24 ft. in diameter and 10 high, having a hole in its roof. From this chamber two parallel galleries, 10 ft. high and 5 wide, are carried southwards through the rock for about 60 ft.; a third diverges S. E., extending 40 ft. They are connected by two cross-galleries in conventric curves, one at their extreme end, the other in the middle. The outer one is 115 ft. long and has a range of thirty niches on the level of its floor, radiating outwards. Two small chambers, with similar niches, also open into it."

The celebrated "Tombs of the Kings" have re ceived this name on account of their remarkable character; but they are supposed by Robinson and Porter to be the tomb of Helena, the widowed queen of Monobazus king of Adiabeue. She besame a proselyte to Judaism, and fixed her revi-

Plan of the Tombs called " Tombs of the Kings."

ticulars see Porter, from whose Handbook the preceding account is taken.)

The so-called " Tomb of Zechariah," said to have been constructed in honor of Zechariah, who was slain "between the temple and the altar" in the reign of Joash (2 Chr. xxiv. 21; Matt. xxiii. 35), is held in great veneration by the Jews. It is doubtful, however, whether it be a tomb at all, and the style of architecture can scarcely be earlier than

(Num. xix. 11 ff.). We have a striking instance of this usage in the account of Ananias and Sapphira, who were borne to the grave as soon as t'e bodies could be haid out and shrouded for that purpose (Acts v. 1 ff.). The deaths in this case were extraordinary, and possibly that fact may have hastened the burial somewhat; though even under ordinary circumstances a person among the Jews was

Front of the Vestibule of the Tombs called "Tomi of the Kings." (From Photograph.)

sur era. A drawing of it is inserted here on account of its celebrity. It bears a considerable resemblance to the so-called tomb of Absalom, which is figured on p. 17. H. H.

* 4. In eastern climates generally, interment takes place very soon after the death of a person. This is made necessary to some extent, on account of the rapidity with which decomposition ensues witer death (see John xi 39). The Jews no doubt

The so-called "Tomb of Zecharish." (From Phote graph.)

commonly buried the same day on which he died. See Winer's Realso. ii. 16. Even among the present inhabitants of Jerusalem, says Tobler (Denkblätter suried with the greater haste, because they were so aus Jerusalem, p. 325, St. Gallen, 1853), surial, as tearful of being defiled by contact with a corpse a general rule, is not deferred more than three or

bur hours. If the death occurs at evening, so that offering," as representing the one, is opposed to there is no time for the funeral on the same day, it takes place the next morning at the earliest break of dawn. The body is placed on a bier, and the mourners, men and women, the near relatives and neighbors, follow it to the grave (comp. Luke vii. 12-15). See Denkblätter, p. 325.

When the body was embalmed, as among the Egyptians, the same reason for a speedy burial did not exist. Hence Joseph, after the 40 days spent in the process of embalming the body of Jacob his father, waited 30 (or 70) a days longer, before he proceeded to Canaan to deposit the remains in the save of Machpelah (Gen. l. 1 ff.). De Wette refers to Gen. xxiii. 2-4 and xxv. 9, as showing that the ancient Hebrews did not hasten burial, like the later Hebrews (Lehrb. der hebräisch-jud Archaulogie, p. 400, 4te Aufl.); but the passages hardly warrant that conclusion. Abraham's plea, " Let me bury my dead out of my sight," indicates at least H. impatience of any needless delay.

* BURNING. See BURLAL, 2; PUNISH-MKNTS, III. (a.) 8.

פוֹלָה or עֹלָה (עוֹלָה or עוֹלָה) and in poetical passages 2, i. e. "perfect ": δλοκάρτωσις (Gen.), δλοκαύτωμα (Ex. and Ler., δc.), LXX.; δλοκαύτωμα, Ν. Τ.: holocaustum, Vulg.). The original derivation of the word is from the root עלה is from the root יעלה; " ascends; " and it is applied to the offering, which was wholly consumed oy fire on the altar, and the whole of which, except the refuse ashes, "ascended " in the smoke to God. It corresponds therefore in sense, though not exactly in form, to the word δλοκαύτωμα, " whole burnt-' from which the name of the sacrifice in offering,' modern languages is taken. Every sacrifice was in part "a burnt-offering," because, since fire was the chosen manifestation of God's presence, the portion of each sacrifice especially dedicated to Him was consumed by fire. But the term is generally restricted to that which is properly a "whole burntoffering," the whole of which was so offered and so consumed.

The burnt-offering is first named in Gen. viii. 20, as offered after the Flood. (In iv. 4 we find

the more general word TTTD " offering," a word usually applied to unbloody sacrifices, though in the LXX. and in Heb. xi. 4 translated by $\theta v \sigma(a.)$ Throughout the whole of the book of Genesis (see xv. 9, 17, xxii. 2, 7, 8, 13) it appears to be the only sacrifice referred to; afterwards it became distinguished as one of the regular classes of sacrifice under the Mosaic law.

Now an sacrifices are divided (see Heb. v. 1) into "gifts" and "sacrifices-for-sin" (i. e. eucharistic and propitiatory sacrifices), and of the former of these the burnt-offering was the choicest specimen. Accordingly (in Ps. xl. 8, 9, quoted in Heb. x. 5, 6) we have first (in ver. 8) the general opposition, as above, of sacrifices (duolas) (propitiatory), and offerings (roopopal), and then (in ver. 9) "burnt-

"sin-offering," as representing the other. Similarly in Ex. x. 25 (less precisely) "burnt-offering" is contrasted with "sacrifice." (So in 1 Sam. xv. 22; Ps. l. 8; Mark xii. 33.) On the other hand, it is distinguished from "meat-offerings" (which were unbloody), and from "peace-offerings" (both of the eucharistic kind), because only a portion of them were consumed. (See 1 K. iii. 15, viii. 64, dec.)

The meaning, therefore, of the whole hurnt-offering was that which is the original idea of all sacrifice, the offering by the sacrificer of himself soul and body, to God, the submission of his will to the Will of the Lord. See Ps. xl. 10, li. 17, 19. and compare the more general treatment of the subject under the word SACRIFICE. It typified (see Heb. v. 1, 3, 7, 8) our Lord's offering (as especially in the temptation and the agony), the perfect sacrifice of his own human will to the Will of his Father. As that offering could only be accepted from one either sinless or already purified from sin, therefore the burnt-offering (see Ex. xxix. 36, 37, 38; Lev. viii. 14, 18, ix. 8, 12, xvi. 3, 5, &c.) was always preceded by a sin-offering. So also we Christians, because the sin-offering has been made once for all for us, offer the continual burnt-offering of ourselves, "as a living sacrifice, holy and acceptable to the Lord." (See Rom. xii. 1.)

In accordance with this principle it was enacted that with the burnt-offering a "ment-offering" (of flour and oil) and "drink-offering" of wine should be offered, as showing that, with themselves, men dedicated also to God the chief earthly gifts with which He had blessed them. (Lev. viii. 18, 22, 26, ix. 16, 17, xiv. 20; Ex. xxix. 40; Num. xxviii 4, 5.)

The ceremonial of the burnt-offering is given in detail in the book of Leviticus. The animal was to be a male unblemished, either a young bullock, ram, or goat, or, in case of poverty, a turtle dove or pigeon. It was to be brought by the offerer "of his own voluntary will," and slain by himself, after he had laid his hand upon its head, to make it his own representative, on the north side of the altar. The priest was then to sprinkle the blood upon the altar," and afterwards to cut up and burn the whole victim, only reserving the skin for himself. The birds were to be offered similarly, but not divided. (See Lev. i., vii. 8, viii. 18-21, &c.) It will be observed how all these ceremonies were typical of the meaning described above, and canecially how emphatically the freedom of will in the sacrificer is marked.

The burnt-offering being thus the rite which represented the normal state and constant duty of man, when already in covenant with God," was the one kind of sacrifice regularly appointed. Thus there were, as public burnt-offerings -

1st. The daily burnt-offering, a lamb of the first year, sacrificed every morning and evening (with an offering of flour and wine) for the people (Ex. xxix. 29-42; Num. xxviii. 3-8).

include the 40 days of the embalming (Tuch, Genesis, secrifices should be rigidly separated, because the ideas > 595), though some make the former additional to which they enshrine, though capable of distinction, are yet inseparable from one another.

c This is remarkably illustrated by the fact that heathens were allowed to offer burnt-offerings, and that Augustus ordered two lambs and a bullock to by er was much greater, and had a peculiar signifi- offered for him every day (Joseph. B. J. ii. 17, § 20.

2dly. The Sabbath burnt-offering, double of that | direct evidence of any cassia growing in the local which was offered every day (Num. xxviii. 9, 10).

3dly. The offering at the new moon, at the three great festivals, the great Day of Atonement, and feast of trumpets: generally two bullocks, a ram, and seven lambs. (See Num. xxviii. 11-xxix. 39.)

Private burnt-offerings were appointed at the consecration of priests (Ex. xxix. 15; Lev. viii. 18, ix. 12), at the purification of women (Lev. xii. 6, 5), at the cleansing of the lepers (Lev. xiv. 19), and removal of other ceremonial uncleanness (xv. 15, 30), on any accidental breach of the Nazaritic vow, or at its conclusion (Num. vi.; comp. Acts xxi. 26), &c

But free.ull burnt-offerings were offered and accepted by God on any solemn occasions, as, for example, at the dedication of the tabernacle (Num. vii.) and of the temple (1 K. viii. 64), when they were offired in extraordinary abundance. But, except on such occasions, the nature, the extent. and the place of the sacrifice were expressly limited by God, so that, while all should be unblemished and pure, there should be no idea (as among the heathen) of buying his favor by costliness of sacrifice. Of this law Jephthah's vow was a transgression, consistent with the semi-heathenish character of his early days (see Judg. xi. 30, 35). The sacrifice of cows in 1 Sam. vi. 14 was also a formal infraction of it, excused by the probable ignorance of the people, and the special nature of the occasion. A. B.

BUSH (T, a sench : Baros: rubus). The Hebrew word occurs only in those passages which refer to Jehovah's appearance to Moses "in the fiame of fire in the bush" (Ex. iii. 2, 3, 4; Deut. axxiii. 16). The Greek word is Báros both in the LXX. and in the N. T. (Luke xx. 37; Acts vii. 35; see also Luke vi. 44, where it is correctly rendered "bramble bush" by the A. V.). Bdros is used also to denote the seneh by Josephus, Philo, Clemens, Eusebius, and others (see Celsius, Hierob. ii. 58). Some versions adopt a more general interpretation, and understand any kind of bush, as the A. V. The Arabic in Acts vii. 35 has rhamnus. Others retain the Hebrew word.

Celsius (Hierob. ii. 58) has argued in favor of the Rubus vulgaris, i. c. R. fruticosus, the bramble or blackberry bush, representing the sench, and traces the etymology of (Mt.) "Sinai" to this name.b It is almost certain that seneh is definitely used for some particular bush, for the Hebrew siach c expresses bushes generally; the $\beta d\tau os$ and rubus of the LXX. and Vulg. are used by Greek and Koman writers to denote for the most part the different kinds of brambles (Rubus), such as the raspberry and the blackberry bush; Celsius's opinion, therefore, is corroborated by the evidence of the oldest versions. Pococke (Descr. of the East, i. 215), however, objects to the bramble as not growing at all in the neighborhood of Mount Sinai, and proposes the hawthorn bush, Oxyacantha Arabica (Shaw).d Etymologically one would be inclined to refer the seneh of the Hebrew scriptures to some species of senns plant (cassia), though we have no

« Probably from TOO (unused root) = سبوں, " to Arpen."

^b Prof. Stanley (S. § P. p. 17) thinks Sinai is derived from Sench, "an acacia," as being a thorny tree. . שיח י

f It is uncertain what Dr. Shaw speaks of; Dr. bramble, Rubus fruticosus."

ities about Mount Sinsi, neither Decaisne nor Bove mentioning a senna bush amongst the plants of this mountain. Sprengel identifies the sench with what he terms the Rubus sanctus, I and says it grows abundantly near Sinai. The monks of St. Catherine, it is well known, have planted a bramble bush near their chapel, to mark the spot and perpetuate the name of the supposed bush in which God aupeared to Moses. It is quite impossible to say what kind of thornbush is intended by seneh, lut Sinsi is almost beyond the range of the genus *Rubus*.

W. H.

* The word "bush" (Baros, as in Mark xi) 26; denotes a section of the Pentateuch. See BIPLE, III. (1).

* BUTLER. [CUPBEARER; JOSEPH.]

BUTTER (TRCT, chem'ah: Bobruper: bu

(grum), curdled milk, as distinguished from $\Box \supseteq \Box$. fresh milk; hence, curds, butter, and in one place probably cheese. It comes from an unused root,

NOT = Arab. خما , spissun fuit lac. In Gen. xviii. 8, butter and milk are mentioned among the things which Abraham set before his heavenly guests (comp. Judg. v. 25; 2 Sam. xvii. 29). Milk is generally offered to travellers in Palestine in a curdled or sour state, " lebben," thick, almost like butter (comp. Josephus's rendering in Judg. iv. 19: -γάλα διεφθορός ήδη). In Deut. xxxii. 14, we find among the blessing הַמָאָת בָּזָר וַהַלָב צאו which Jeshurun had enjoyed, where milk of kine would seem contrasted with milk of sheep. The two passages in Job (xx. 17, xxix. 6) where the word TNCI occurs are also best satisfied by rendering it milk; and the same may be said of Ps. lv. 21,

which should be compared with Job xxix. 6. In Prov. xxx. 33, Gesenius thinks that cheese is

meant, the word V Th signifying pressure rather than churning. Jarchi (on Gen. xviii. 8) explains ెస్టిదిల్లె to be pinguedo lactis, quam de ejus superficie colliguat, i. e. cream, and Vitringa and Hitzig give this meaning to the word in Is. vii. 15-22. Butter was not in use among the Greeks and Romans except for medicinal purposes, but this fact is of no weight as to its absence from Palestine. Robinson mentions the use of butter at the present day (Bib. Res. i. 449), and also the method of churning (i. 485, and ii. 418), and from this we may safely infer that the art of butter-making was known to the ancient inhabitants of the land, so little have the habits of the people of Palestine been modified in the lapse of centuries. Burckhardt (Travels in Arabia, i. 52) mentions the different uses of butter by the Arabs of the Hedjaz. W. D.

* The Arabs of the present day do not make we kind of butter, such as we eat with bread, but the

Hooker thinks he must mean the Orategus Aronis which grows on Mount Sinsi.

« Compare the Arabic U.u., " senna, seu folia « nse," Kam. (Freytag, Arab. Lez. s. v.). f "This," says Dr. Hooker, "is a variety of our

) is butter to all intents and purposes — \overline{i} e. it is the fatty particles of the milk, separated from the whey and the caseine by agita tion. When in some of the cities they make from sold cream a little of our butter to supply the demand of a few Frank families, they call it zubdeh 101

(زبلة), which really means cream, or fresh semm

but is applied to our butter for the sake of distinction. The semn is liquid during the hot months, but gets quite hard in winter, and our butter also liquefies in summer, so that it is almost impossible to make it at all in that season; and if it were made in the hot sun, as the semn is, it would be quite as liquid as the semn. See also Dr. Thom-C. V. A. V. son's Land of Book, i. 393.

BUZ (MD, contempt : 5 Babg: [Buz]), the second son of Milcah and Nahor (Gen. xxii. 21).

The gentilic name is 'THE, and Elihu is called " the Buzite" (Bou(irns) of the kindred of Ram, i. e. Aram. Elihu was therefore probably a descendant of Buz, whose family seems to have settled in Arabia Deserta or Petræa, since Jeremiah (xxv. 23 'Pŵs), in denouncing God's judgments against them, mentions them with Tema and Dedan. Some connect the territory of Buz with Busan, a Roman fort mentioned in Amm. Marc. xviii. 10, and others with Basta in Arabia Petrsea, which however has only the first letter in common with it (Winer, s. v.).

The jingle of the names Huz and Buz is by no incans so apparent in the Hebrew (ソラン, ひヨ); but it is quite in the Oriental taste to give to relations these rhyming appellatives; comp. Ishua and Ishui (Gen. slvi. 17); Mehujael and Methusael (Gen. iv. 18), Uzziel and Uzzi (1 Chr. vii. 7): and among the Arabians, Hároot and Mároot, the rebel angels, Hasan and Hoseyn, the sons of 'Alee, &c. The Koran abounds in such homoioteleuta, and so pleasing are they to the Arabs, that they even call Cain and Abel, Kabil and Habil (Weil's Bibl. Legends, 23; also Southey's Notes to Thalaba), or Habil and Habid (see Stanley, p. 413). The same idiom is found in Mahratta and the modern languages of the East.

2. (Bobs; Alex. AxiBous; [Vat. ZaBouxan for Bob($a\delta \epsilon \lambda \phi o \hat{v}$:] Buz). A name occurring in the genealogies of the tribe of Gad (1 Chr. v. 14). F. W. F.

BU'ZI (TD, no article: Bougel: Buzi), father of Ezekiel the prophet (Ez. i. 3). [The personal name here is gentilic elsewhere. As the son was a priest the father must have been so too. -- H.]

BUZ'ITE ("ITE : Bougirns; [Vat. Sin. - fer-Alex. Toy Boufi:] Buzites). A descendant of Buz. The term is applied to Elihu, who was of the kindred of Ram or Aram (Job xxxii. 2, 6).

* BY. This preposition, among its other uses, formerly meant "against" (though never very common in that sense), and so undoubtedly our translators (taking ¿µavro as dat. incomm.) employed it in 1 Cor. iv. 4: "For I know nothing by (=against) myself." See Trench On the Authorized Version p. 43 (9d ed. 1859), and Eastwood and W-ight's Bible Word-Book, p 88. But probably the Greek

means only " I am conscious to myself of nothing," i. e. blameworthy or wrong. That the consciousness is not self-condemnatory lies in oùdér, not duaura. H. έμαυτφ.

* BY AND BY is used in the A. V in the sense of immediately (Mark vi. 25, étavrîs; siti. 21, evous; Luke zvii. 7, zzi. 0, evoteus). A. BYSSUS. [LINEN.]

CAB. [MEASURES.]

CAB'BON (7) 22: XaBod; [Comp.] Alex. Xaßßa; [Ald. Xaßßar:] Chebbon), a town in the low country (Shefelah) of Judah (Josh. xv. 40) which is only once mentioned, and of which nothing has been since discovered. G.

CA BUL (ΞΞΞ: Χωβαμασομέλ, including

the Hebrew word following, במשמאל [Ald.] Alex. XaBáh: Cabul), a place named as one of the landmarks on the boundary of Asher (Josh. xix. 27). From its mention in proximity to Jiphthachel - afterwards Jotapata, and now Jefat - it is probable that it is the same with that spoken of by Josephus (Vit. § 43, 45) as in the district of Ptolemais, and 40 stadia from Jotapata. In this case it may fairly be considered as still existing in the modern Kabul, which was found by Dr. Smith and by Robinson 8 or 9 miles east of Akka, and about the same distance from Jefut (Rob. iii. 87, 88. For references to the Talmuds see Schwarz, p. 192). Being thus on the very borders of Galilee, it is more than probable that there is some connection

between this place and the district (ארץ כבורל, "the land of C.") containing twenty cities, which was presented by Solomon to Hiram king of Tyre (1 K. ix. 11-14). The LXX. rendering of the name, "Opior, appears to arise from their having read

כבול Gebool, "boundary," for כבול. On the other hand, the explanation of Josephus is quite in accordance with that hinted at in the text - itself thoroughly in keeping with Oriental modes of speech. Hiram, not liking Solomon's gift, seizes on the name of one of the cities, which in his own Phœnician tongue expresses his disappointment (κατά Φοινίκων γλώτταν, οὐκ ἀρέσκον, Jos. Ant. viii. 5, § 3), and forms from it a designation for the whole district. The pun is doubtless a Phrenician one, since there is no trace of it in the Heorew beyond the explanation in ver. 12, "they pleased him not;" the Hebrew words for which,

לא יְשְׁרוּ בּמִינָיו, have no affinity whatever with "Cabul." See however possible derivations of the name in the Onomasticons of Simonis (p. 417), and Hiller (435, 775). G.

CAD'DIS (Kaddis; [Alex. Ald. raddis; Sin. Γαδδεις:] Gaddis), the surname (διακαλούμενος) of JOANNAN, the eldest brother of Judas Maccabeeus (1 Macc. ii. 2).

CAE'SAR (Kaîσap, also δ Σεβαστός [AUGUS-rus] in Acts xxv. 21, 25), always in the N. T. the Rom a emperor, the sovereign of Judaa (John xix. 15; Acts xvii. 7). It was to him that the Jews paid tribute (Matt. xxii. 17 ff.; Luke xx. 22, xxiii. 2); and to him that such Jews as were cires Romani had the right of appeal (Acts xxv. 11 f., xxvi. 32, xxviii. 19); in which case, if their cause was a criminal one, they were sent to Rome (Acts xxv. 12, 21, - comp. Pliny, Epp. x. 97), where was the court of the emperor (Phil. iv. 22). The N. T. history falls entirely within the reigns of the five first Roman Cassars, namely, Augustus, Tiberius, Caligula, Claudius, and Nero; only the two former of whom, and Claudius, are mentioned by name; but Nero is the emperor alluded to in the Acts from ch. xxv. to the end, and in Phil. (l. c.), and possibly in the Apocalypse. See further under AUGUSTUS, and under the names of the several Csesars abovementioned. H. A.

^a Casar. as a title of the Roman emperors, occurs about 30 times in the N. T. It is applied to Augustus (Luke ii. 1), to Tiberius (Luke iii. 1; John xiz. 12, 15), to Claudius (Acta xvi: 7, and if the common reading be correct, xi. 28), and to Nero (Acts xxv. 3, xxvi. 32, &c.). There appears to have been some difference in the use of the name at a later period. After Nero's time the emperor was still called both Augustus (which see) and ('æsar: but his son or designated successor on the throne was also called Casar, though properly the title was put after the individual's name, instead of being prefixed to it, as in the case of the reignng Casar. See Pauly's *Rent-Encycl.* ii. 46. II.

* CÆSAR'S HOUSEHOLD. The chief point of interest here is whether this expression refers to any of the immediate relations of the emperor, or to some of his servants and dependents in the palace. Nero was on the throne when Paul wrote to the l'hilippians. It has some bearing on the question, that Nero had no very near kindred living after he became emperor (Rilliet, L'Epitre aux Philipp. p. 342). It is possible, of course, if he had such, that some of them might have heard the Gospel and have believed. History gives no account of any such conversions, and it is altogether improbable, if they occurred, that the testimony to this effect would be wanting. Meyer lays special stress on this silence of the oldest writers. We are led therefore to seek for some other explanation of Paul's language. It seems essential to any correct explanation that it should recognize the apparent connection between Acts xxviii. 16, Phil. i. 13, and iv. 22. (1.) Soldiers under the general custody of the Prætorian Prefect (this is the meaning of $\tau \hat{\omega}$ στρατοπεδάρχη, Acts xxviii. 16, text. rec.^a) attended Paul while he was a prisoner, and in the performance of this service would often relieve each Las 'Acts). (2.) In the course of time the -postle would thus become known as a preacher of she gospel to many of these soldiers (Phil. i. 13), and through them to their comrades and acquaint-

ances. (8.) Some of the friends of these subtien thus brought by them into connection with Paul may have been employed about the palace of the emperor, and so could have been the members of "Cressr's household" who sent greetings to the church at Philippi. Perhaps one step of the combination may be left out. The camp of the Pretorians, situated out of the city, may have included also those of their number, a small division, quartered near the palace in the city, and who as the emperor's hody-guard might be said to belong to his "household." There is no proof that the imperial residence itself was ever called " prætorium." Paul may have gained converts from these, as one after another of them acted as sentries over him. As the reason why they in particular greeted the Christians at Philippi, Neander suggests that they may have known some of the church there who had been at Rome, or possibly may themselves have been natives of that city. It may be that Paul's " chiefly " (µahora, Phil. iv. 22), which so emphasizes the greeting of "those of Cæsar's household," represents the tone of hearty earnestness with which they spoke up as he was writing, and asked him to send also their kiss of love (agraguds) to these Philippians of whom they had heard so much from the apostle. For this, the parties need not have had any personal knowledge of each other.

The subject has been often discussed, with more or less divergence of views. For references, see Büttger's Beiträge in die Paulin. Briefe, No. 2, p. 47 ff.; Wieseler, Chron. des apost. Zeitalt. p. 420 ff., p. 457 ff.; Schenkel, Briefe un die Epheser. Plitipper. &c., pp. 119, 162; Bleek, Einl. in dus N. T. p. 433; Meyer, Exceget. Handb. (March, 1857); Conyheare and Howson's Life and Epistles of Paul, ii. 448, 553, Amer. ed.; and Wordsworth, Greek Test. with Notes, iii. 337, 1st ed.

CÆSARE'A (Kaiodoeia, Acte viii. 40, ix. 30, x. 1, 24, xi. 11, xii. 19, xviii. 22, xxi. 8, 16; xxiii. 23, 33; xxv. 1, 4, 6, 13). The passages just enumerated show how important a place this city occupies in the Acts of the Apostles. It was the residence, apparently for several years, of Philip, one of the seven deacons or almoners (viii. 40, xxi. 8, 16), and the scene of the conversion of the Italian centurion, Cornelius (x. 1, 24, xi. 11). Here Herod Agrippa I. died (xii. 19). From hence St. Paul sailed to Tarsus, when forced to leave Jerusalem or his return from Damascus (ix. 30), and at this port he landed after his second missionary journey (xviii. 22). He also spent some time at ('æsarea on his return from the third missionary journey (xxi. 8, 16), and before long was brought back a prisorer to the same place (xxiii. 23, 33), where he remained two years in bonds before his voyage to Italy (xxv. 1, 4, 6, 13).

Creasarea was situated on the coast of Palestine on the line of the great road from Ty:e to Egyp., and about half way between Joppa and Dora (Joseph. B. J. i. 21, § 5). The journey of St. Peter from Joppa (Acts x. 24) occupied rather more than a day. On the other hand St. Paul's journey from Ptolemais (Acts xxi. 8) was accomplished within the day. The distance from Jerusalem was about 70 miles; Josephus states it in round numbers as 600 stadia (Ant. xiii. 11, § 2: B. J. i. 3, § 5). The Jerusalem Itinerary gives 68 miles (Wesseling, p.

^{• •} Whether the term is textually certain or not, the fact stated there is certain, and presupposed in Phil. i. See CAPTAIN OF THE GUARD, Amer. ed. H.

however, that there was a shorter road by Antiputris Ilerod the Great. The work was in fact accomof Acts xxiii. [ANTIPATRIS.]

coast merely a town called "Strato's tower," with a full name was Kaurdoeia ZeBarth (Joseph. Ant. landing-place (πρόσορμον έχων), whereas, in the xvi. 5, § 1). It was sometimes called Cæsarea Stratime of Tacitus, Casarea is spoken of as being the tonis, and Casarea Palaesting; sometimes also (from

600. Dr. Robinson thinks this ought to be 78: head of Judses ("Judses caput," Tac. Hist. ii. 79). Bib. Res. ii. 242, note). It has been ascertained, It was in this interval that the city was built by than that which is given in the Itinerary, - a point plished in ten years. The utmost care and expense of some importance in reference to the night-journey were lavished on the building of Cæsaren. It was a proud monument of the reign of Herod, who In Strabo's time there was on this point of the named it in honor of the Emperor Augustus. The

h erl baddrry (id. vii. 1, § 3). It must be care- gave to it the Jus Italicum. The history of the fully distinguished from C.ESAREA PHILIPPI.

The magnificence of Cæsarea is described in detail by Josephus in two places (Ant. xv. 9; B. J. i. 21). The chief features were connected with the harbor (itself called $\Sigma \in \beta a \sigma \tau \delta s \lambda : \mu \not \eta \nu$ on coins, and by Josephus, Ant. xvii. 5, § 1), which was equal in size to the Pirseus. A vast breakwater, composed of stones 50 feet long, curved round so as to afford complete protection from the south-westerly winds, leaving an opening only on the north. Broad landing-wharves surrounded the harbor: and conspicuous from the sea was a temple, dedicated to Cæsar and to Rome, and containing colossal statues of the Emperor and the Imperial City. Cassarea contained also an amphitheatre and a theatre. The latter was the scene of the death of Herod Agrippa I. Cresarea was the official residence of the Herodian kings, and of Festus, Felix, and the other Roman procurators of Judsea. Here also were the head-quarters of the military forces of the province. It was by no means strictly a Jewish city. The Gentile population pre-dominated; and at the synagogue-worship the Scriptures of the O. T. were read in Greek. Constant feurls took place here between the Jews and Greeks; and an outbreak of this kind was one of he first incidents of the great war. It was at Cas-

its position) mapdies (Joseph. B. J. iii. 9, § 1), or made it a Roman colony, called it by his name, and place, during the time of its greatest eminence, h summed up in one sentence by Pliny : - " Strato nis turris, eadem Cæsarea, ab Herode rege condita nunc Colonia prima Flavia, a Vespasiano Imperatore deducta '' (v. 14).

> To the Biblical geographer Cæsarea is interesting as the home of Eusebius. It was also the scene of some of Origen's labors and the birth-place of Pre copius. It continued to be a city of some importance even in the time of the Crusades. Now, though an Arabic corruption of the name still lingers or the site (Kaisariyeh), it is utterly desolate; and its ruins have for a long period been a quarry, from which other towns in this part of Syria have been built. (See Buckingham's Trarels and the Appendix to vol. i. of Dr. Traill's Josephus.) J. S. H

> CÆSARE'A PHILIP'PI (Kaigdoeia n . $\lambda(\pi - 22)$ is mentioned only in the two first Gospels (Ma*t. xvi. 13; Mark viii. 27) and in accounts of the same transactions. The story in Eusebius, that the woman healed of the issue of blood, and supposed to have been named Berenice, lived at this place, rests in no foundation.

Caesarea Philippi was the northernmost point of our Lord's journeyings; and the passage in His see that Vespasian was declared emperor. He life, which was connected with the place, was other

340 CÆSAREA PHILIPPI

Palasine, p. 391.) The place itself too is remarkable in its physical and picturesque characteristics, and also in its historical associations. It was at the easternmost and most important of the two recognized sources of the Jordan, the other being at Tell +L-Káchi (DAN or LAISH, which by Winer and others has been erroneously identified with Cass. Philippi). Not that either of these sources is the most distant fountain-head of the Jordan, the name of the river being given (as in the case of the Mississippi and Missouri, to quote Dr. Robinson's illustration), not to the most remote fountains, but the most copious. The spring rises, and the city was built, on a limestone terrace in a valley at the base of Mount Hermon. Casarea Philippi has no O. T. history, though it has been not un-reasonably identified with Baul-Gad. Its annals run back direct from llerod's time into heathenism. There is no difficulty in identifying it with the Panium of Josephus; and the inscriptions are not yet obliterated, which show that the God Pan had once a sanctuary at this spct. Here Herod the Great erected a temple to Augustus, the town being then called from the grotto where Pan had been honored. It is worth while here to quote in succession the words of Josephus and of Dr. Robinson: "Herod, having accompanied Cæsar to the sea and returned home, erected him a beautiful temple of white marble near the place called Panium. This is a fine cavern in a mountain; under which there is a great cavity in the earth; and the cavern is abrupt, and very deep, and full of still water. Over it hangs a vast mountain, and under the mountain rise the springs of the river Jordan. Herod adorned this place, which was already a very remarkable one, still further by the erection of this temple, which he dedicated to Caesar." (Joseph Ant. xv. 10, § 3; comp. B. J. i. 21, § 3.) ۵ Ťbe situation is unique, combining in an unusual degree the elements of grandeur and beauty. It nestles in its receas at the southern base of the mighty Hermon, which towers in majesty to an elevation of 7000 or 8000 feet above. The abundant waters of the glorious fountain spread over the terrace uxuriant fertility and the graceful interchange of copse, lawn, and waving fields." (Robinson, iii. 404.)

Panium became part of the territory of Philip. tetrarch of Trachonitis, who enlarged and embellished the town, and called it Cæsarea Philippi partly after his own name, and partly after that of the emperor (Ant. xviii. 2, § 1; B. J. ii. 9, § 1). Agrippa II. followed in the same course of flattery, and called the place Neronias (Ant. xx. 9, § 4). Josephus seems to imply in his life (17t. 13) that many heathens resided here. Titus exhibited gladatorial shows at Cæsarea Philippi after the end of he Jewish war (B. J. vii. 2, § 1). The old name was not lost. Coins of Casarea Paneas continued

a * Baumgarten (Comm. iib. Pentateuch, i. 78) adopts the sense of "spear," "weapon," as the name of the firstborn whom Eve had thus "obtained from Jehovah," because she would recognize in him the means et victory, i. e. the promised seed who was to overcome the great enemy (Gen. iii. 15). According to this view the words הַכָּה, הַיָרָה, without being related in sigsification, are merely paronomastic (nomen et omen), though they serve at the same time to express the

wise a very marked one. (See Stanley's Since of through the reigns of many emperers. Under the simple name of Paneas it was the seat of a Greek bishopric in the period of the great councils, and of a Latin bishopric during the crusades. It is still called Banias, the first name having here, as in other cases, survived the second. A remarkable monument, which has seen all the periods of the history of Caraarea Philippi, is the vast castle above the site of the city, built in Syro-Greek or even Phoenician times, and, after receiving additiona from the Saracens and Franks, still the most remarkable fortress in the Holy Land. J. S. H.

CAGE. The term so rendered in Jer. v. 27.

קלהב, is more properly a trap (παγίs, decipula). in which decoy birds were placed : the same article is referred to in Ecclus. xi. 30 under the term rdorallos, which is elsewhere used of a tapering basket. [FOWLING.] In Rev. xviii. 2 the Greek term is $\phi \nu \lambda a \kappa h$, meaning a prison or restricted habitation rather than a cage. W. L. B.

CATAPHAS [8 syl.] (Kaldpas, said (Winer,

&c.) to be derived from ND.D, depressio, Targ. Prov. xvi. 26), in full JOSEPH CAIAPHAS (Joseph. Ant. xviii. 2, 2), high-priest of the Jews under Tiberius during the years of our Lord's public ministry, and at the time of his condemnation and crucifixion. Matt. xxvi. 8, 57 (Mark does not name him); Luke iii. 2; John xi. 49, xviii. 13, 14, 24, 28; Acts iv. 6. The Procurator Valerius Gratus, shortly before his leaving the province, appointed him to the dignity, which was before held by Simon ben-Camith. He held it during the whole procuratorship of Pontius Pilate, but soon after his removal from that office was deposed by the Proconsul Vitellius (A. D. 36), and succeeded by Jonathan, son of Ananus (Joseph. Ant. xviii. 4, § 3). He was son-in-law of Annas. [ANNAS.] Some in the ancient church confounded him with the historian Josephus, and believed him to have become a convert to Christianity. (Assemann, Biblioth. Orient. ii. 165.) H. A.

CAIN [2 syl. in Heb.] (777, derived either

from T27, to acquire, Gen. iv. 1; from 777, a spear, as indicative of the violence used by Cain and Lamech, Gesen. Thesaur. p. 120; or from an Arabic word kayn, a smith, in reference to the arts introduced by the Cainites, Von Bohlen, Introd. to Gen. ii. 85: Kdīv; Joseph. Kdīs: Cain).ª The historical facts in the life of Cain, as recorded in Gen. iv., are briefly these: - He was the eldest son of Adam and Eve; he followed the business of agriculture; in a fit of jealousy, roused by the rejection of his own sacrifice and the acceptance of Abel's, he committed the crime of murder, for which he was expelled from Eden, and led the life of an exile; he settled in the land of Nod, and built a city which he named after his son Enoch; his

from 77 = 77, i.e. a possession which she had acquired, suggests itself as more natural, and is more forcible as including an affinity of sense as well as of sound. See Mr. Wright's note to this effect in his Book of Genesis in Hebrew, &c., p. 18. Generius (Handw. p. 766, 6te Aufl.) does not seem to object to this etymology as unphilological. Fürst (Handso. 1

815) defines 777 as " something brought forth," " crea

(Heb. xi. 4; 1 John iii. 12; Jude 11.)

The following points deserve notice in connection with the Biblical narrative: - 1. The position of the land of Nod. The name itself tells us little; it means flight or exile, in reference to v. 12 where a cognate word is used: Von Bohlen's attempt to identify it with India, as though the Hebrew name

Ilind (7377) had been erroneously read han-Nod, is too far fetched; the only indication of its position is the indefinite notice that it was "east of Eden " (16), which of course throws us back to the previous settlement of the position of Eden itself. Knobel (Comm. in loc.) who adopts an ethnological interpretation of the history of Cain's descendants, would identify Nod with the whole of Eastern Asia, and even hints at a possible connection between the names Cain and China. It seems vain to attempt the identification of Nod with any special locality; the direction "east of Eden" may have reference to the previous notice in iii. 24, and may indicate that the land was opposite to (Katévarti, LXX.) the entrance, which was barred against his return. It is not improbable that the east was further used to mark the direction which the Cainites took, as distinct from the Sethites, who would, according to Hebrew notions, be settled towards the west Similar observations must be made in regard to the city Enoch, which has been identified with the names of the Heniochi, a tribe in Caucasus (Hasse), Anuchta, a town in Susiana (Huetius), Chanoge, an ancient town in India (Von Bohlen), and Iconium, as the place where the deified king Annacos was honored (Ewald): all such attempts at identification must be subordinated to the previous setthement of the position of Eden and Nod.

2. 'The "mark set upon Cain" has given rise to various speculations, many of which would never have been broached, if the Hebrew text had been consulted: the words probably mean that Jehovah gave a sign to Cain, very much as signs were afterwards given to Noah (Gen. ix. 13), Moses (Ex. iii. 2, 12), Elijah (1 K. xix. 11), and Hezekiah (Is. xxxviii. 7, 8). Whether the sign was perceptible to Cain alone, and given to him once for all, in token that no man should kill him, or whether it was one that was perceptible to others, and designed as a precaution to them, as is implied in the A. V., is uncertain; the nature of the sign itself is still more uncertain.

3. The narrative implies the existence of a considerable population in Cain's time; for he fears lest he should be murdered in return for the murder he had committed (14). Josephus (Ant. i. 2, § 1) explains his fears as arising not from men but rom wild beasts; but such an explanation is wholly unnecessary. The family of Adam may have largely increased before the birth of Seth, as is indeed implied in the notice of Cain's wife (17), and the mere circumstance that none of the other children are noticed by name may be explained on the ground that their lives furnished nothing worthy f notice.

4. The character of Cain deserves a brief notice He is described as a man of a morose, malicious and revengeful temper; and that he presented his as objects of divine worship. Among the Greeks, aftering in this state of mind is implied in the re- | Apollo was held to be the inventor of music, Valsuke contained in ver. 7, which may be rendered

tescenciants are enumerated, together with the in- | the options rooseverysps), is there not an elevation rentions for which they were remarkable. Occa- of the countenance (i. e. chcerfulness and hoppisional references to Cain are made in the N. T. ness)? but if thou doest not well, there is a sinking of the countenance : sin lurketh (as a wild beast) at the door, and to thee is its desire: but thou shalt rule over it." The narrative implies there fore that his offering was rejected on account of the temper in which it was brought.

UAIN

5. The descendants of Cain are enumerated to the sixth generation. Some commentators (Knobel, Von Bohlen) have traced an artificial structure in this genealogy, by which it is rendered parallel to that of the Sethites: e. y. there is a decade of names in each, commencing with Adam and ending with Jabal and Noah, the deficiency of generation in the Cainites being supplied by the addition of the two younger sons of Lamech to the list; and there is a considerable similarity in the names, each list containing a Lamech and an Enoch; while Cain in the one - Cain-an in the other, Methusael -Methuselah, and Mehujael = Mahalaleel: the inference from this comparison being that the one was framed out of the other. It must be observed however, that the differences far exceed the points of similarity; that the order of the names, the number of generations, and even the meanings of those which are noticed as similar in sound, are sufficiently distinct to remove the impression of artificial construction.

6. The social condition of the Cainites is proninently brought forward in the history. Cain himself was an agriculturist, Abel a shepherd: the successors of the latter are represented by the Sethites and the progenitors of the llebrew race in later times, among whom a pastoral life was always held in high honor from the simplicity and devotional habits which it engendered: the successors of the former are depicted as the reverse in all these respects. Cain founded the first city; Lamech instituted polygamy; Jabal introduced the nomadic life; Jubal invented musical instruments; Tubalcain was the first smith; Lamech's language takes the stately tone of poetry; and even the names of the women, Naamah (pleasant), Zillah (shadow). Adah (ornamental), seem to bespeak an advanced state of civilization. But along with this, there was violence and godlessness; Cain and Lamech furnish proof of the former, while the concluding words of Gen. iv. 26 imply the latter.

7. The contrast established between the Cainites and the Sethites appears to have reference solely to the social and religious condition of the two races. On the one side there is pictured a high state of civilization, unsanctified by religion, and productive of luxury and violence; on the other side, a state of simplicity which afforded no material for history beyond the declaration "then began men to call upon the name of the Lord." The historian thus accounts for the progressive degeneration of the religious condition of man, the evil gaining a predominance over the good by its alliance with worldly power and knowledge, and producing the state of things which necessitated the flood.

8. Another motive may be assigned for the introduction of this portion of sacred history. All ancient nations have loved to trace up the invention of the arts to some certain wathor, and, generally speaking, these authors have been regarded can of the working of metals, Triptolemus of the ame: " If thou doest well (or, as the LXX. has it, plough. A similar feeling of curiosity prevailed among the Hebrews; and hence the historian has Julius Africa.ns, Origen, Eusebius, st even Jervane, recorded the names of those to whom the invention had access to. It seems certain, therefore, that his of the arts was traditionally assigned, obviating at the same time the daugerous error into which other nations had fallen, and reducing the estimate of their value by the position which their inventors W. L. B. held.

CAIN a [2 syl. in [leb.] (with the article,

7'PT = "the lance," Ges.; but may it not be

derived from 77, Ken, "a nest," possibly in allusion to its position: Zararatu [Vat. -e.u], Alex. Zarwanesu, both by including name preceding: Accain), one of the cities in the low country (Ske-(elah) of Judah, named with Zanoah and Gibeah (Josh. xv. 57). It does not appear to have been mentioned or identified by any one.b G.

CAI'NAN [2 syl.] (Marg. correctly Kenan [and so the test 1 Chr. i. 2]; 7277: Kairar Cainan; possessor, Fürst; teli faber, Gesen., as if

== ???, from the Arab. to forge, as in Tubal-Cain, Gen. iv. 22; see Dr. Mill's Vindic. of our Lord's Geneal. p. 150). 1. Son of Enos, aged 70 years when he begat Mahalaleel his son. He lived 840 years afterwards, and died aged 910 (Gen. v. 9-14). The rabbinical tradition was that he first introduced idol-worship and astrology - a tradition which the Hellenists transferred to the post-diluvian Cainan. Thus Ephraem Syrus asserts that the Chaldees in the time of Terah and Abram worshipped a graven god called Cainan; and Gregory Bar-Hebraus, another Syriac author, also ap plies it to the son of Arphaxad (Mill, ut sup.). The origin of the tradition is not known; but it may probably have been suggested by the meaning of the supposed root in Arabic and the Aramean dialects; just as another signification of the same root seems to have suggested the tradition that the daughters of Cain were the first who made and sang

to musical instruments (Gesen. s. v. 717).

2. [Alex. Karray in Gen. x. 24; Tisch. (with Sin. B L.) Kaurdu in Luke iii. 36.] Son of Arphaxad, and father of Sala, according to Luke iii. 35, 36, and usually called the second Cainan. He is also found in the present copies of the LXX. in the genealogy of Shem, Gen. x. 24, xi. 12, and 1 Chr. i. 18 (though he is omitted in 1 Chr. i. 24), but is nowhere named in the Hebrew codd., nor in any of the versions made from the Hebrew, as the Samaritan, Chaldee, Syriac, Vulgate, &c. Moreover it can be demonstrated that the intrusion of the name into the version of the LXX. is comparatively modern, since Augustine is the first writer who mentions it as found in the O. T. at all; c and since we have the absolute certainty that it was not contained in any copies of the Alexandrine Bible which either Berosus, Eupolemus, Polyhistor, Josephus, Philo, Theophilus of Antioch,

name was introduced into the genealogies of the Greek O. T. in order to bring them into harmony with the genealogy of Christ in St. Luke's Gospel, where Cainan was found in the time of Jerome. The question is thus narrowed into one concerning its introduction into the Gospel. It might have been thought that it had found its way by accident into the genealogy of Joeeph, and that Luke inserted that genealogy exactly as he found it. But as Beza's very ancient MS. presented to the University of Cambridge, does not contain the name of ('ainan, and there is strong ground for supposing that neither did Irenseus's copy of St. Luke, it seems on the whole more probable that Cainan was not inserted by St. Luke himself, but was afterwards added, either by accident, or to make up the number of generations to 17, or from some other cause which cannot now be discovered. For further information, see General of our Lord J. C., ch. viii.; Heidegger, Hist. Patriarch. ii. 8-15; Bochart, Phaleg, lib. ii. cap. 13; and for the op-posite view, Mill's Vindic. of our Lord's Geneal. p. 143 ff. A. C. H.

CAIUS. [JOHN, SECOND AND THIRD EPIB-TLES OF.]

CAKES. [BREAD.]

CA'LAH ([פָלַח], in pause] פָלַח] (completion]: Xardx: Chale), one of the most ancient cities of Astyria. Its foundation is ascribed to the patriarch Asshur (Gen. x. 11). The name has been thought identical with the Halah (is found in Kings (2 K. xvii. 6, and xviii. 11) and Chronicles (1 Chr. v. 26); but this view is unsupported by the Septuagint, which renders Halah by AAaé. According to the opinions of the best Oriental antiquaries, the site of Calah is marked by the Nimrud ruins, which have furnished so large a proportion of the Assyrian remains at present in England. If this he regarded as ascertained, Calah must be considered to have been at one time (about B. C. 930-720) the capital of the empire. It was the residence of the warlike Sardanapalus and his successors down to the time of Sargon, who built a new capital, which he called by his own name, on the site occupied by the modern Khorsabad. Calah still continued under the later kings to be a town of importance, and was especially favored by Esarhaddon, who built there one of the grandest of the Assyrian palaces. In later times it gave name to one of the chief districts of the country, which appears as Calaciné (Ptolem. vi. 1) or Calachéné (Strab. xvi. 1, § 1) in the geographers.

* Mr. J. L. Porter (Kitto's Cyc. of Bibl. Lit. 3d ed., art. (ulah) objects to the identification of Calah with Nimrúd, that sufficient space is not left for Resen, which is described in Gen. x. 12 se "a great city" lying between Nineveh and Calah;

^a The letter \overline{D} is generally rendered in the A. V. by

K. A possible connection of this name with that of the "Kenives" is obscured by the form Cain, which is probably derived from the Vulgate.

b * Knobel (Josua, p. 437) says that Cain according o all appearance is the Arabic Yikin not far from Jebron (Rob. Bibl. Res., 1st ed., ii. 449). Dr. Robinson records the name, but says nothing of the identification. The position may be right enough, but the reembien a of the names is too slight to be of any ac- them agree with the computation of the altered copier MANDE Ĥ.

c Demotrius (s. c. 170), quoted by Eusebius (Prop. Erang. ix. 21), reckons 1960 years from the birth of Shem to Jacob's going down to Egypt, which seems to include the 130 years of Cainan. But in the great fluctuation of the numbers in the ages of the patriarchs, no reliance can be placed on this argument Nor have we any certainty that the figures have not been altered in the modern copies of Eusebius, to make of the LXX

to distance between Nimrikl and the ruins of anrient Nineveh (opposite Mosúl) being less than twenty miles. He would therefore identify Resen with Nimrud, and Calah with Kalah- or Kileh-Snerghat, forty miles south of Nimrúd on the right bank of the Tigris. He further observes: " Kalah-Sherghat was one of the most ancient places in Assyria. On a cylinder discovered there is an inscription recording the fact that the King Tiglath-pileser restored a monument which had been taken down sixty years previously, after having stood for 641 years. It must, therefore, have been founded about B. C. 1870 (Rawlinson's Herod. i. 457, 460; Vaux, Nin. and Pers. p. 13). On the bricks and pottery found at Kalah are the names and titles of the earliest known Assyrian kings. The name Asshur is found among them." Kalisch (Genesis, p. 261) likewise identifies Resen with Nimrud, and Calah with Kalah-Sheryhut. See Assyria, p. 187; Nineven; Resen.

CALAMOLA'LUS (Καλαμώλαλος; [Vat. Καλαμωκαλος:] Clionus), 1 Edr. v. 22, a corrupt mame, apparently agglomerated of ELAM, LOD, and HADDD.

CALAMUS. [REED.]

CAL/COL (אבלכל) [perh. sustenance, Ges.]: Kalyda [Vat. Kalra], Kalradš [Alex. Xalyaa]: Chulchal, Chalcol), a man of Judah, son or descendant of Zerah (1 Chr. ii. 6). Probably identical with CHALCOL (A. V. only; no difference in the Hebrew), son of Mahol, one of the four wise men whom Solomon excelled in wisdom (1 K. iv. 31). For the grounds of this identification ge DARDA. G.

• CALDE'A, CALDE'ANS, CAL'DEES, cour in the A. V. ed. 1611 and other early editions pressim for CHALDEA, etc., which see. A.

Ephratah, and consequently grantifisher of Caleb the spy. His brothers, according to the same author ity, were Jerahnued and Ram; his wives Asubah Jeri>th, and Ephratah; and his concubines Ephuah and Maachah (ver. 9, 42, 46, 48). But from the manifest corruption of the text in many parts of the chapter, from the name being written 277[CHELUSAI] in ver. 9, which looks like a patronymic from $2\sqrt{27}$, Chelub (1 Chr. iv. 11) the brother of Shuah, from the evident confusion hetween the two Calebs at ver. 49, and from the nonappearance of this elder Caleb anywhere except in this genealogy drawn up in Hezekiah's reign [AZA-HAM, No. 6], it is impossible to speak with confidence of his relations, or even of his existence.

2. Son of Jephunneh, by which patronymic the illustrious spy is usually designated (Num. xiii. 6. and ten other places), with the addition of that of "the Kenezite," or "son of Kenaz," in Num. xxxii. 12: Josh. xiv. 6, 14. Caleb is first mentioned u. the list of the rulers or princes (NUD), called in the next verse """, " heads," one from each tribe, who were sent to search the land of ('anaan in the second year of the Exodus, where it may be noted that these D'NUT or D'U'N an all dif ferent from those named in Num. i. ii. vii. x. us princes or heads of the tribes of Israel, and consquently that the same title was given to the chiefs of families as to the chiefs of the whole tribe. Caleb was a NUD or WN in the tribe of Judah. perhaps as chief of the family of the Hezronites. at the same time that Nahshon the son of Amminadab was prince of the whole tribe. He and Oshea or Joshua the son of Nun were the only two of the whole number who, on their return from Canaan to Kadesh-Barnea, encouraged the people to enter in holdly to the land, and take possession of it; for which act of faithfulness they narrowly escaped stoning at the hands of the infuriated people. In the plague that ensued, while the other ten spies perished, Caleb and Joshua alone were spared. Moreover, while it was announced to the congregation by Moses that, for this rebellious murmuring, all that had been numbered from 20 years old and upwards, except Joshua and Caleb, should perish in the wilderness, a special promise was made to Caleb the son of Jephunneh, that he should survive to enter into the land which he had trodden upon, and that his seed should possess it. Accordingly, 45 years afterwards, when some progress had been made in the conquest of the land, Caleb came to Joshua and reminded him of what had happened at Kadesh, and of the promise which Moses made to him with an oath. He added that though he was now 85 years old, he was as strong as in the day when Moses sent him to spy out the land, and he claimed possession of the land of the Anakima, Kirjath-Arba, or Hebron, and the neighboring hillcountry (Josh. xiv.). This was immediately granted to him, and the following chapter relates how ne took possession of Hebron, driving out the three

took possession of record, driving out the three sons of Anak; and how he offered Achsah his daughter in marriage to whoever would take Kirjath-Sepher. i. e. Debir; and how when Otlmiel, his younger brother, had performed the feat, he not

Districh is his addition of Grannics (1888) adopts the same stymology.

344

only gave him his daughter to wife, but with her | first whose name is not given, the mother of Jerah the upper and nether springs of water which she mee, Ram, and Caleb or Chelubai; the second asked for. After this we hear no more of Caleb, nor is the time of his death recorded. But we learn from Josh. xxi. 13, that in the distribution of cities out of the different tribes for the priests and Levites to dwell in, Hebron fell to the priests, the children of Aaron, of the family of Kohathites, and was also a city of refuge, while the surrounding territory continued to be the possession of Caleb, at least as late as the time of David (1 Sam. xxv. 3, xxx. 14).

But a very interesting question arises as to the birth and parentage of Caleb. He is, as we have scen, styled "the son of Jephunneh the Kenezite," and his younger brother Othniel, afterwards the first Judge, is also called "the son of Kenaz' (Josh. xv. 17; Judg. i. 13, iii. 9, 11).

On the other hand the genealogy in 1 Chr. ii. makes no mention whatever of either Jephunneh or Kenaz, but represents Caleb, though obscurely, as being a descendant of Hezron and a son of Hur (see too ch. iv.). Again in Josh. xv. 13 we have this singular expression, "Unto Caleb the son of Jephunneh he gave a part among the children of Judah : " and in xiv. 14, the no less significant one, "Hebron became the inheritance of Caleb the son of Jephunneh the Kenezite, because that he wholy followed Jehovah God of Israel." It becomes, therefore, quite possible that Caleb was a foreigner by birth; a proselyte, incorporated into the tribe of Judah, into which perhaps he or his ancestors had married, and one of the first-fruits of that Gentile harvest, of which Jethro, Rahab, Ruth, Naaman, and many others were samples and signs. And this conjecture receives a most striking confirmation from the names in ('aleb's family. For on turning to Gen. xxxvi. 11, 15, we find that Kenuz is an Edomitish name, the son of Eliphaz. Again, in 1 Chr. ii. 50, 52, among the sons of Caleb the son of Hur we find Shobal and half the Manahethites or sons of Manahath. But in Gen. xxxvi. 20-23, we are told that Shobal was the son of Seir the Horite, and that he was the father of Manahath. So too Korah, Ithran, Elah (1 Chr. ii., iv.), and perhaps Jephunneh, compared with Pinon, are all Edomitish names (1 Chr. i.; Gen. xxxvi.). We find too Temanites, or sons of Teman (1 Chr. i. 36), among the children of Ashur the son of Herron (1 Chr. iv. 6). The finding thus whole families or tribes, apparently of foreign origin, incorporated into the tribes of Israel, scena further to supply us with an easy and natural solution of the difficulty with regard to the great numbers of the Israelites at the Exodus. The seed of Abraham had been multiplied by the accretion of proselytes, as well as by generation.

3. CALEB-EPH'RATAH, according to the present text of 1 Chr. ii. 24, the name of a place where Hezron died. But no such place was ever heard of, and the composition of the name is a most improbable one. Nor could Hezron or his son have gives any name to a place in Egypt, the land of their bondage, nor could Hezron have died, or his The son have lived, elsewhere than in Egypt. present text must therefore be corrupt, and the "ending which Jerome's Hebrew Bible had, and which is preserved in the LXX., is probably the true one, namely, אַיָּרָהָח רָלֵב אָיָרָאָ "Caleb same in unto Ephratah." The whole information with certain Egyptian proselytes (Godwyn's Mos

Abiah, the daughter of Machir, whom he married when 60 years old, and who bare him Segub and Ashur. Also that ('aleb had two wives, Azubah, the first, the mother, according to Jerome's version, of Jerioth; and Ephratah, the second, the mother of Hur; and that this second marriage of Caleb did not take place till after Hezron's duath.

A. C. H.

* Caleb-Ephratah (see 3 above), it is true, dom not occur elsewhere; but in 1 Sam. xxx. 14 we find mention made of a district Caleb, which must have been a part of Judah, and so called from Caleb. Joshua's spy, to whom it was allotted. Bertheau in his note on 1 Chr. ii. 24 (Böcner der Chronik, p. 17) suggests that the northern part of this territory of Caleb where it approached Ephratah, i. e. Bethlehem, may have been distinguished from the southern part by the more definite name of Caleb-Ephratah. He remarks further that the proposed change of the text $(\bar{\eta}\lambda\theta\epsilon Xa\lambda\dot{\epsilon}\beta \epsilon is 'E \phi pa \theta d$ in the LXX. which the Vulg. follows) removes the difficulty, but introduces a notice altogether foreign to the text, since the verse relates to Hezron and not to Caleb. There may be some doubt about the translation. But the chronology and history of this period are too obscure to allow us to say that Hezron must have died in Egypt, and could not have died in Caleb-Ephratah (1 Chr. ii. 24). See Wordsworth on the passage, Chronicles, p. 171 (1866). H.

CALEB. "The south of Caleb" is that por-

tion of the Negeb (גֶרֶב) or "south country" of Palestine, occupied by Caleb and his descendants (1 Sam. xxx. 14). In the division of Canaan Joshua assigned the city and suburbs of Hebron to the priests, but the "field" of the city, that is the pasture and corn lands, together with the villages, were given to Caleb. The south, or Negeb, of Caleb, is probably to be identified with the extensive basin or plain which lies between Hebron and Kurmul, the ancient Carmel of Judah, where Caleb's descendant Nabal had his possessions.

W. A. W.

CALF (אָרָלָד, אָנָק: μόσχος, δάμαλις). In Ex. xxxii. 4, we are told that Aaron, constrained by the people in the absence of Moses, made a molten calf of the golden ear-rings of the people, to represent the Elohim which brought Israel out of Fgypt. He is also said to have "finished it with

a g. wing-tool," but the word bill may mean a mould (comp. 2 K. v. 23, A. V. "bags;" LXX budanos). Bochart (Hieroe. lib. ii. cap. sxxiv explains it to mean "he placed the ear-rings in a bag," as Gideon did (Judg. viii. 24). Protectory, however, it means that after the calf had been cast, Aaron ornamented it with the sculptured wings, feathers and other marks, which were similarly represented on the statues of Apis, &c. (Wilkinson, iv. 348). It does not seem likely that the car-rings would have provided the enormous quantity of gold required for a solid figure. More probably it was a wooden figure laminated with gold, a process which is known to have existed in Egypt. "A gilded or covered with a pall " was an emblem of Osiris (Wil kinson, iv. 335).

The legends about the calf are numerous. The suggestion is said by the Jews to have originated given seems to be that Hezron had two wives, the and Aar. iv. 5); Hur, " the desert's martyr " was

sept 12,000 worshipped it; when made, it was magcally animated (Ex. xxxii. 24). "The Devil." save Jonathan, "got into the metal and fashioned it into a culf" (Lightfoot, Works, v. 398). Hence, the Koran (vii. 146) calls it "a corporeal calf, made of their ornaments, which lowed." This was effected not by Aaron (according to the Mohammedans) but by al Sâmeri, a chief Israelite, whose descend ants still unbabit an island of the Arabian gulf. He took a handful of dust from the footsteps of the horse of Gabriel, who rode at the head of the host, and threw it into the mouth of the calf, which immediately began to low. No one is to he punished in hell more than 40 days, being the number of days of the calf-worship (Sale's Koran, ed. Daven port, p. 7, note; and see Weil's Leyends, 125'. It was a Jewish proverb that "no punishment befallsth the Israelites in which there is not an ounce of this calf" (Godwyn, ubi supr.).

Bronze figure of Apis. (Wilkinson.)

To punish the apostasy Moses burnt the calf, and then grinding it to powder scattered it over the water, where, according to some, it produced in the drinkers effects similar to the water of jealousy (Num. v.). He probably adopted this course as the deadliest and most irreparable blow to their superstition (Jerome, Ep. 128; Plut. de Is. p. 362), or as an allegorical act (Job xv. 16), or with reference to an Egyptian custom (Herod. ii. 41; Poli Syn. ad loc.). It has always been a difficulty to explain the process which he used; some account for it by his supposed knowledge of a forgotten art (such as was one of the boasts of alchymy) by which be could reduce gold to dust. Goguet (Origine des Lois) invokes the assistance of natron, which would have had the additional advantage of making the 'raught nauseous. Baumgarten easily endows the tre employed with miraculous properties. Bochart and Rosenmüller merely think that he cut, ground, and filed the gold to powder, such as was used to sprinkle over the hair (Joseph. Ant. viii. 7, § 3).

There seems little doubt that 770 = Karakala LXX. (Hävernick's Introd. to the Pentat. p. 292.)

It has always been a great dispute respecting this calf and those of Jeroboam, whether, I. the Jews intended them for some Egyptian God, or 11. for a nere cherubic symbol of Jehovah.

I. The arguments for the first supposition are, 1. The ready apostasy of the Jews to Egyptian superstition (Acts vii. 39, and chap. v. passim; Lactant. (not. iv. 10). 9. The fact that they had been worhippers of Apis (Josh. xxiv. 14), and their extreme amiliarity with his cultus (1 K. xi. 40). 3. The

tilled for opposing it; Abu'lfeda says that all ex- | to the featural in honor of Apis (Suid. s. s. "Anides). Of the various sacred cows of Fgypt, that of Isia, of Athor, and of the three kinds of sacred bulls Apis, Basis, and Mnevis, Sir G. Wilkinson fixes or the latter as the prototype of the golden calf; "the offerings, dancings, and rejoicings practiced on that occasion were doubtless in imitation of a ceremony they had witnessed in honor of Mnevis" (Anc. Egypt., v. 197, see Plates 35, 36). The ox was worshipped from its utility in agriculture (Plut. de /s. p. 74), and was a symbol of the sun, and consecrated to him (Hom. Od. i. xii. &c.; Warburton. Div. Leg. iv. 3, 5). Hence it is almost universally found in Oriental and other mythologies. 4. The expression "an ox that eateth hay," &c. (Ps. cvi. 20, &c.), where some see an allusion to the Egyptias custom of bringing a bottle of hay when they cousulted Apis (Godwyn's Mos. and Aar. iv. 5). Yes these terms of scorn are rather due to the intense hatred of the Jews, both to this idolatry and that of Jeroboam. Thus in Tob. i. 5, we have one of Jeroboam's calves called $\dot{\eta}$ $\delta d\mu a \lambda is B da \lambda$, which is an unquestionable calumny; just as in Jer. xlvi. 15 "Anis & µooxos oou & ententos is either a mistake or a corruption of the text (Bochart, Hieroz. ii. 28, 6, and Schleusner, s. v. "Amis).

II. It seems to us more likely that in this calfworship the Jews merely

" Lakened their Maker to the graved ox ; "

or in other words, adopted a well-understood cher ubic emblem. For (1.) it is obvious that they were aware of this symbol, since Moses finds it unnecessary to describe it (Ex. xxv. 18-22). (2.) Josephus seems to imply that the calf symbolized God (Ant. viii. 8, § 4). (3.) Aaron in proclaiming the feast (Ex. xxxii. 5) distinctly calls it a feast to Jehovah, and speaks of the god as the visible representation of Him who had led them out of Egypt. (4.) It was extremely unlikely that they would so soon adopt a deity whom they had so recently seen humilisted by the judgments of Moses (Num. xxxiii. 4). (5.) There was only one Apis, whereas Jeroboam erected two calves. (But see Jahn, Arch. Bibl. § 464.) (6.) Jero boam's well-understood political purpose was, not to introduce a new religion, but to provide a differ ent form of the old; and this alone explains the fact that this was the only form of idolatry into which Judah never fell, since she already possessed the archetypal emblems in the Temple. (7.) It appears from 1 K. xxii. 6, &c. that the prophets of Israel, though sanctioning the calf-worship, still regarded themselves, and were regarded, as " prophets of Jehoonh."

These arguments, out of many others, are ad duced from the interesting treatise of Moncaeus, de Vitulo Aureo (Critici Sacri, ix.). The work is in hibited by the Church of Rome, and has been auswered by Visorinus. A brief resume of it may be found in Poli Syn. ad Ex. xxxii., and in Watt's "Remnants of Time " (ad finem). [CHERUBIM.]

The prophet Hosea is full of denunciations against the calf-worship of Israel (Hos. viii. 5, 6, x. 5), and mentions the curious custom of kissing them (xiii 2). His change of Beth-el into Beth-aven possibly rose from contempt of this idolatry (but see BET)-AVEN). The calf at Dan was carried away by Tiglath-Fileser, and that of Bethel 10 years after by his son Snalmaneser (2 K. xv. 29, xvii. 3; Prideaux, Connection, i. 15).

Bochart thinks that the ridiculous story of Celsus usemblanco of the feast described in Ex. xxxii. 5, about the Christian worship of an as-bead" of aty

i. 14, could only guess), sprang from some misunderstanding of cherubic emblems (Minuc. Fel. Apol. ix.). But it is much more probable, as Origen conjectured, that the Christians were confounded with the absurd mystic Ophiani (Tac. Hist. v. 4: Merivale, Hist. of Emp. vi. 564).

In the expression "the calves of our lips" (Hos. xiv. 2), the word "calves" is used metaphorically for victims or sacrifices, and the passage signifies either "we will render to thee sacrifices of our lips," that is, "the tribute of thanksgiving and praise," or "we will offer to thee the sacrifices which our lips have vowed." The LXX. erroneously translate καρπόν των χειλέων, which is followed by the Syr. and Arab. versions, and is supposed to have been borrowed by the author of the epistle to the Hebrews (xiii. 15). For allusions to the "fatted calf" see Gen. xviii. 7; Luke xv. 23, &c.; and on the custom of cutting up a calf, and "passing between the parts thereof" to ratify a covenant, see Jer. xxxiv. 18, 19; Gen. xv. 10, 17; Ephrem Syrus, i 161; 17. 17 ::: 908 F. W. F.

CALITAS (Kalitas; [Vat. in ver. 23 corrupt; in ver. 48 Vat. Alex. Kaleras:] Culitas, [Calithes]), 1 Eedr. ix. 23, 48. [KELITA.]

CALLIS THENES (Kalliotérns), a partisau of Nicanor, who was burnt by the Jews on the defeat of that general in revenge for his guilt in setting fire to "the sacred portals" (2 Macc. viii. 33). B. F. W.

CAL'NEH, or CAL'NO (פַּלְנָה) : פַּלְנָר Xarárry, Xardry [see Calno]: Chalanne), apears in Genesis (x. 10) smong the cities of Nimrod. The word is thought to mean "the fort of the god Ana or Anu," who was one of the chief objects of Babylonian worship. Probably the site is the modern Niffer, which was certainly one of the early capitals, and which, under the name of Nupher, the Talmud identifies with Calneh (see the Yoma). Arab traditions made Niffer the original Babylon, and said that it was the place where Nimrod endeavored to mount on eagles' wings to heaven. Similarly, the LXX. speak of Calneh or ('alno, as "the place where the tower was built" (Is. x. 9). Niffer is situated about 60 miles S. E. E. of Babylon in the marshes on the left bank of the Euphrates: it has been visited and described by Mr. Layard (Nin. of Bab. ch. xxiv.), and Mr. Loftus (Chaldaea, p. 101). We may gather from Scripture that in the 8th century B. C. Calneh was taken by one of the Assyrian kings, and never recovered its prosperity. Hence it is compared with Car chemish, Hamath, and Gath (Is. x. 9; Am. vi. 2), and regarded as a proof of the resistless might of Assyria. G. R.

CAL/NO (")? : Χαλάνη; [Vat. Sin.] Alex. Andarry, the passage [in the LXX], however, does sot agree with the Hebrew: Calano), Is. x. 9. [CALNEH.]

· Hence we have 3 variations of the name: Calno n Isaiah, Calneh in Genesis and Amos, and Canneh n Ezekiel xxvii. 23. The idea which the Seventy ering into the text of Is. x. 9 (not in the Hebrew),

אַקַשׁאָתַנִים •

 Arab. جهل, portare, according to Secondes, Fürst, and others. Bochart derives the word s. v.

salled Gapa Bailed), Oren A (a story, at the source is that the tower of Babel was built at Calno as of which Tertullian, 'Oronolans, Apol. 16, Ad Nat. [Chalane, as if a protest against source different opinion. See Gesenius über Jesaia (i. 394). The Bible is silent respecting this ancient place during all the long ages between Nimrod (Gen. x. 10) and the prophet Amos (vi. 2). Dr. Pusey (Minor Prophets, ii. 202) agrees with those who think that Calneh or Calno was the later Greek Ctesiphon, on the left of the Tigris, about 40 miles from Babylon. [CAL-NEH.]

> CAL/PHI (& Xalpl; [Sin. Alex. Xalpe:;] Jos. Xatpaios: Calphi), father of Judas, one of the two captains (doxorres) of Jonathan's army who remained firm at the battle of Gennesar (1 Macc. xi. 70).

> CALVARY (nearlow: Syr. Karkaptha : Calvaria), a word occurring in the A. V. only in Luke xxiii. 33, and there no proper name, but arising from the translators having literally adopted the word caivaria, i. e. a bare skull, the Latin word by which the *sparlor* of the Evangelists is rendered in the Vulgate; sparlor again being nothing but the Greek interpretation of the Hebrew Gol GOTHA.

> Koarlov is used by each of the four Evangehsts in describing the place of the Crucifizion, and is in every case translated in the Vulg. calvaria; and in every case but that in St. Luke the A. V. has "skull." Prof. Stanley has not omitted to notice this (S. of P. 460, note), and to call attention to the fact that the popular expression " Mount Calvary" is not warranted by any statement in the accounts of the place of our Lord's crucifixion. There is no mention of a mount in either of the narratives. [CRUCIFIXION; GOLGOTHA; JERU-BALEM.] G.

> * The transfer of Calvary to our language from the Vulg. has often been noticed. The association of "mount" with the place of crucifixion has in all probability a monastic origin. The epithet was applied to the rock at Jerusalem, held to be the one on which the cross was erected. The expression "monticulus Golgotha" occurs in the Itiner. Hieros. (A. D. 333) and was current, no doubt, at a somewhat earlier period. Thus introduced, the term spread at length into all the languages of Christendom. See note in Rob. Bibl. Res. ii. 17. Yet after all the popular idea of Golgotha may not be wholly without support in Scripture. The best explanation of *kparlor* (a skull, Luke xxiii. 83) is that it denotes a spot slightly elevated and so called for that reason, and because it was skull-shaped. As to Mr. Fergusson's theory that the place of crucifixion was Mount Moriah, see the addition to JERUSALEM (Amer. ed.). H.

> CAMEL. Under this head we shall consider the Hebrew words gâmâl, becer or bicrâh, and circaroth. As to the achashteranima in Esth. viii. 10, erroneously translated "camels" by the A. V., see MULE (note).

> 1. Gâmâl (בְּבָל [burden-bearer]: געיאחאסי camelus) is the common Hebrew term to express the genus "camel," irrespective of any difference of species, age, or breed: it occurs in numerous passages of the O. T., and is in all probability derived from a root ^b which signifies " to carry." The

from ウロラ, " to revenge," the camel being a vin lictive animal. The word has survived to this day in the languages of Western Europe See Genenius, The

CAMEL

among the presents which l'haraoh bestowed upon 'xxvii. 9, xxx. 17); forty camels' burden of good Abram when he was in Egypt. It is clear from this things were sent to Elisha by Beu-hadad, king of passage that camels were early known to the Egyptians (see also Ex. ix. 3), though no representation of this animal has yet been discovered in the paintings or hieroglyphics (Wilkinson, Ano. Egypt. i. 234, Lond. 1854). The camel has been from the earliest times the most important beast of burden amongst Oriental nations. The Ethiopians had fore his affliction (Job i. 3), and six thousand after-" camels in abundance " (2 Chr. xiv. 15); the queen of Sheba came to Jerusalem " with camels that bare

frut mention of camels occurs in Gen. xii. 16, as from the Geshurites and the Amalekites (1 Sam Syria, from Damascus (2 K. viii. 9); the Ishmael ites trafficked with Egypt in the precious gums of Gilead, carried on the backs of camels (Gen. xxxvii. 25); the Midianites and the Amalekites possessed camels "as the sand by the sea-side for multitude" (Judg. vii. 12); Job had three thousand camels bewards (xlii. 12).

The camel was used for riding (Gen. xxiv. 64; spices and gold and precious stones " (1 K. x. 2); 1 Sam. xxx. 17); as a beast of burden generally the men of Kedar and of Hazor possessed camels (Gen. xxxvii. 25; 2 K. viii. 9; 1 K. x. 2, &c.), for (Jer. xliz. 29, 32); David took away the camels draught purposes (ls. xxi. 7: see also Sustonius,

Two-humped Camels on Assyrian monuments. (Layard.)

that camels were used in war: compare also Pliny (N. H. viii. 18), Xenophon (Cyrop. vii. 1, 27), and Herodotus (i. 80, vii. 86), and Livy (xxxvii. 40). It is to the mixed nature of the forces of the Persian army that Isaiah is probably alluding in his description of the fall of Babylon (Is. xxi. 7).

John the Baptist wore a garment made of camel's hair (Ma.t. iii. 4; Mark i. 6), and some have supposed that Elijah "was clad in a dress of the same stuff" (Calmet's Dict. Frag. No. cccxx.; Rosenmüller, Schol. ad Is. xx. 2), the Hebrew expression "lord of hair" (2 K. i. 8) having reference not to his beard or head, but to his garment (compare Zech. xiii. 4; 1 K. xix. 18, 19) [SACKCLOTH], but see ELIJAH. Chardin (in Harmer's Observ. ii. 487) says the people in the East make vestments of camel's hair, which they pull off the animal at the time it is changing its coat. Alian (Nat. H. xvii. 34) speaks of the excellent smooth quality of the hair of camels, which the wealthy near the Caspian Sea used to wear; but the garment of camel's hair which the Baptist wore was in all probability nerely the prepared skin of the animal.

Camel's milk was much esteemed by Orientals Aristot. Hist. Anim. vi. 25, § 1, ed. Schneid.: P.iny, N. H. xi. 41, xxviii. 9); it was in all probshility used by the Hebrews but no distinct refer-

Amongst the live stock which Jacob presented to an ware "thirty milch camels with their colts."

is literally " caruels giving suck." fhis passage has been quoted to prove that the Israel tes used the milk of the camel, which however . canpot fairly be said to do. The milk which Jael offered sers (Judg. iv. 19), according to Josephus (Ant. v. e, § 4), was sour. Some of the Rabbis, Michaelis, and issemmiller (Not. ad Hieroz. 1. 10), say it was for the stars. See Rawlinson's note on Herod. iii. 8. H. Terpose of intoxicating Sissea, sour samel's milk, as d "Niveo lunata monilia dente ' on horses' needs.

Nero, c. 11).^a From 1 Sam. xxx. 17 we learn | ence to it is made in the Bible.^b Camel's flean. although much esteemed by the Arabs (Prosp. Alpinus, H. N. Ag. i. 226), was forbidden as food to the Israelites (Lev. xi. 4; Deut. xiv. 7), because, though the camel 'cheweth the cud, it divideth not the hoof." Many attempts have been made to explain the reason why camel-flesh was forbidden to the Jews, as by Bochart (Hieroz. i. 11), Rosenmüller (Not. ad Hieroz. L c.), Michaelis (Laws of Moses, iii. 234, Smith's translat.), none of which, however, are satisfactory. It is sufficient to know that the law of Moses allowed no quadruped to be used as food except such as chewed the cud and divided the hoof into two equal parts: as the camel does not fully divide the hoof, the anterior parts only being cleft, it was excluded by the very terms of the definition.

> Dr. Kitto (Phys. H. of Palest. p. 391) says " the Arabs adorn the necks of their camels with a band of cloth or leather, upon which are strung small shells called cowries in the form of half-moons." This very aptly illustrates Judg. viii. 21, 26, with reference to the moon-shaped ornaments " that were on the necks of the cameis which Gideon touk from Zebah and Zalmunna. (Comp. Stat. Thebaid, in 687.)d [ORNAMENTS.]

Ezekiel (xxv. 5) declares that Rabbah shall be a

they affirm, having this effect. The Arabs use sour camel's milk extensively as a drink.

Compare also is iii. 18: " Bound tires like the moon," A. V. The LXX. has appiones. Vulg. lunula.

* Cassel's note (Lange's Bibelwerk, p. 88) confirms and illustrates this oriental usage of putting "little moons " on the necks of the camels. It no doubt had some connection with the Sabaranism of the Arab tribes who worshipped so extensively the moon and

a " Comminit etiam camelorum quadrigas."

"stable for camels, and the Ammonites a couching place for flocks." Buckingham (*Trav.* p. 329) speaks of ruins in this country as "places of resort to the Bedouins where they pasture their camels and their abeep." See "Illustrations of Scripture," in vol. ii. pt. iz. of "Good Words."

From the temperate habits of the camel with regard to its requirements of food and water, and from its wonderful adaptation, both structurally and physiologically, to traverse the arid regions which for miles afford but a scanty herbage, we can readily give credence to the immense numbers which Scripture speaks of as the property either of tribes or individuals. The three thousand camels of Job may be illustrated to the very letter by a passage in Aristotle (H. A. ix. 37, § 5): "Now some men in upper Asis possess as many as three thousand camels."

and Sym.: dromedarius, cursor). The Hebrew words occur only in the two passages above named, where the A. V. reads "dromedary."

Isaiah, foretelling the conversion of the Gentiles says, "The caravans of camels shall cover thee, the dromedaries of Midian and Ephah." The Midianites had camels "as the sand of the sea" (Judg. vii. 12). In Jeremiah God expostulates with Israel for her wickedness, and compares her to a swift bicráh "traversing her ways." Bochart (Hieroz. i. 15 ff.) contends that the Hebrew word is indicative only of a difference in age, and adduces the authority of the Arabic becra in support of his opinion that a young camel is signified by the term. Gesenius follows Bochart, and (Comm. üb. d. Jes. lx. 6) answers the objections of Rosenmüller, who (Not. ad Bocharti Hieroz. l. c.) argues in favor of the "dromedary." Gesenius's remarks are commented on again by Rosenmüller in his Bibl. Naturgesch. ii. 21. Etymologically the Hebrew word is more in favor of the "dromedary." So too are the old versions, as is also the epithet "swift," applied to the *bicráh* in Jeremiah; while on the other hand the term is used in the Arabic ^c to denote "a young camel." Oedmann, commenting on the Hebrew word, makes the following just observation: " ' The multitude of camels shall cover thee he dromedaries of Midian,' &c. - a weak distinc-.ion, if bicrim means only young camels in opposiion to old ones " (Verm. Sam.). The " traversing her ways " is well explained by Rosenmüller, " mox uc mox illuc cursitans quasi furore venereo coreptus, suique non compos, quemadmodum facere solent cameli tempore æstus libidinosi." We are of opinion that the becer or bicrah cannot be better represented than by the "dromedary" of the A. V.

a See Schleusner (Thes. in LXX.) s. v. out.

b From הַכַּרָר, i. q. הָבָּרַר, " to be first."

a young camel," of the sar age as " a " a young man " amongst men. But the idea of swiftness

is involved even in the Arabic use of this word for

= properare, festinare (v. Gesenius, Thes.)

d "), i.e." the camel's saddle," with a kind of anopy over it. See Jahn (Arch. Bibl. p. 54, Upham's

CAMEL

leap," " to gallop; " but the idea involved is surely inapplicable to the jolting trot of a camel. The old versions moreover are opposed to such an explanation. We prefer, with Michaelis (Suppl. ad Lex. Heb. No. 1210) and Parkhurst (s. r.), to understand by circáróth " panniers " or " baskets " carried on the backs of camels or mules, and to refer the word to its unreduplicated form in Gen. xxxi. 34.d The shaded vehicles of the LXX. may be illustrated by a quotation from Maillet (Descript. de l'Egypte, p. 230*), who says, "other ladies are carried sitting in chairs made like covered cages hanging on both sides of a camel;" or by a remark of Dr. Russell (Nat. H. of Aleppo, i. 256), who states that some of the women about Aleppo are commonly stowed, when on a journey, on each side a mule in a sort of covered cradles.

The species of camel which was in common use amongst the Jews and the heathen nations of Palestine is the Arabian or one-humped camel (*Camelus Arabicus*). The dromedary is a swifter animal than

Arabian Camel

the baggage-camel, and is used chiefly for riding purposes — it is merely a finer breed than the other: the Arabs call it the *Heirie*. The speed of the dromedary has been greatly exaggerated, the Arabs asserting that it is swifter than the horse; eight or nine miles an hour is the utmost it is able to per-

translation): "Sometimes they travel in a coversity vehicle which is secured on the back of a camel, and answers the purpose of a small house." Parkhurst says

"רררור" is in the reduplicate form, because these baskets were in pairs, and slung one on each side of the beast." In this sense the word may be referred G. s.

to the Arabic كُور, " sella camelina, aliis, cum ap

paratu suo" (Freytag, s. v.). See figures in Posseba Descript. Orient. 1. tab. 58.

CAMEL

forms; this pace, however, it is able to keep up for bours together. The Bactrian rames (*Unacles Bac*ricenses), the only other known species has two by more; it is not capable of such endurance as its by more; it is not capable of such endurance as its

Bectrian Camel.

Arabian cousin: this species is found in China, Russia, and throughout Central Asia, and is employed by the Persians in war to carry one or two guns which are fixed to the saddle. Col. H. Smith says this species appears figured in the processions of the ancient Persian satrapies among the baareliefs of Chehel Minar. Though the Bactrian camel was probably not used by the Jews, it was doubtless known to them in a late period of their history, from their relations with Persia and Chaldara. Russell (N. Hist. of Alep. ii. 170, 2d ed.) says the two-humped camel is now seldom seen at Aleppo.

The camel, as may be readily conceived, is the subject amongst Orientals of many proverbial expressions; see many cited by Bochart (*Hieroz.* i. 30), and comp. Matt. xxiii. 24, and xix. 24, where there can be no doubt of the correctness of the A. V., notwithstanding the attempts which are made from time to time to explain away the expression: the very magnitude of the hyperbole is evidence in its favor; with the Talmuds [Talmudic writers] "an elephant passing through a needle's eye" was a common figure to denote anything impossible.

We may notice in conclusion the wonderful adaptation of the camel to the purposes for which it is designed. With feet admirably formed for journeying over dry and loose sandy soil; with an internal reservoir for a supply of water when the ordinary sources of nature fail; with a hump of fat ready on emergencies to supply it with carbon when sven the prickly thorns and mimosas of the burning desert cease to afford food; with nostrils which can close valve-like when the sandy storm fills the air, this valuable animal does indeed well deserve the significant title of the "ship of the desert." a The camel belongs to the family *Camelida*, order *Rumimontia*. W. H.

It is a disappointment to know that the many verticeable qualities of the camel which have been numerated, are far from being matched by any porrespondent social or moral instinct to increase ar regard for him. Dr. Kitto (Daily Biok II-

"Of all the animals which have been domesticated for higher purposes than to serve mankind merely as food, the camel is, past all doubt, the most churlish, irascible, revengeful, and self-willed. We have heard of strong attachments between man and all other domestic animals, but never between a man and his camel. Of all the creatures promoted to be man's companions in travel and in rest, no one so unloving and unloved exists. Its very countenance, which the inexperienced call patient, is the very impersonation of malice and illnature - even when its eyes are not kindled up into active spite, and when its mouth does not quiver with burning rage. Even among themselves quarrels are frequent; and he who has been summoned by their sharp and bitter cries to witness a camelfight, will not easily forget the scene." The traveller in the East is soon led to observe this want of sympathy between the camel and his owner or driver, and not being able to enter into all the provocations which there may be for such severity, finds it a constant outrage to his feelings to witness the blows and scourgings which he sees inflicted on the bearer of such heavy burdens. Camels are almost unknown in Europe for purposes of travel and transportation. It was not without surprise that the writer encountered a small caravan of them. laden with military stores, in Greece, on the road between Delphi and Amphissa.

Much important information in respect to the general characteristics and habits of the camel will be found in U.S. Senate Documents (viii. No. 62, pp. 1-238, 1856-7) relating to the purchase of camels for purposes of military transportation. A circular was addressed by agents of the U.S. Government to American residents in the East, e-pccially our missionaries (H. G. O. Dwight, Edwin E. Bliss, W. F. Williams) whose intelligent replies to the inquiries made are replete with important facts and suggestions illustrative of the subject. Hints for Scripture also may be gleaned from them. It is stated e. g. (p. 80) that camels, ordinarily occupying from 30 to 45 days on the journey to Mosin from Aleppo by the way of Orfa and the Desert, will accomplish the distance on an emergency in 13 days. (See addition to HARAN, Amer. ed.) The Hon. George P. Marsh has written a valuable treatise on "The Camel, his Organization, Habits, and Uses, considered with reference to his Introduction into the United States," Boston, 1856, 16mo. It is understood that the attempt to domesticate and employ the camel in the southeru parts of our country has proved a failure. Ħ.

CA'MON () (72); [standing-place, fastness]: 'Paµváv; Aler. Paµµav; [Comp. Akl. Kaµáv;] Jos Kaµáv: Cumm), the place in which JAIR the judge was buried [Judg. x. 5]. The few notices of Jair which we possess have all reference to the country E. of Jordan, and there is therefore no reason against accepting the statement of Jose thus (Ant. v. 7, § 6) that Camon was a city of Gilead In support of this is the mention by Polybius (v. 70, § 12) of a Camoun (Kaµoũv) in company with Pella and other trans-Jordanic places (Keland, 679). In modern times, however, the name has not been recovered on the E. of Jordan. Eusebius and Jerome identify it w.th CYAMON, in the plain of Eadraciou. (i

CAMP. [Escampicerte.]

[•] An expression derived from the Arabs. See the puoletion from the Arabian naturalist Damir, quoted by Boshart, *Hicros.* 1. 18.

OAMPHIRE $(\neg \neg \neg \neg)_{a}$ copher: rivepos: cyparus, Cyprus). There can be no doubt that "camphire" is an incorrect rendering of the Hebrew term, which occurs in the sense of some aromatic substance only in Cant. i. 14, iv. 13: the margin in both passages has "cypress," giving the form but not the signification of the Greek word. *Camphire*, or, as it is now generally written, camphor, is a product of a tree largely cultivated in the island of Formose, the Camphora officinarum, of the Nat. order Lauracea. There is another tree, the Dryobalanops aromatica of Sumatra, which also yields camphor; but it is improbable that the substance secreted by either of these trees was known to the ancients.

From [For?] the expression "cluster of copher in the vineyards of Engedi," in Cant. i 14, the Chaldee version reads "bunches of grapes." b Several versions retain the Hebrew word. The substance really denoted by copher is the Kumpos of Dioscorides, Theophrastus, &c., and the cypros of Pliny, i. e. the Lawsonia alba of botanists, the henna of Arabian naturalists. So R. Ben Melek (Cent. i. 14): "The cluster of copher is that which the Arabs call al-henna" (see Celsius, Hierob. i. 223). Although there is some discrepancy in the descriptions given by the Greek and Latin writers of the cypros-plant, yet their accounts are on the whole sufficiently exact to enable us to refer it to the henna-plant. The Arabic authors Avicenna and Serapion also identify their henna with the cypros of Dioscorides and Galen (Royle in Kitto's Bibl. Cycl. art. Kopher).

"The *wompos*," says Sprengel (Comment. on Dioscor. i. 124), "is the Lunsonia alba, Lam., which includes the L. inermis and spinosa, Linn. it is the Copher of the Hebrews and the Hennus of the Arabs, a plant of great note throughout the East to this day, both on account of its fragrance and of the dye which its leaves yield for the hair." In a note Sprengel adds that the inhabitants of Nubia call the henna-plant Khofreh; he refers to Delisle (Flor. Ægypt. p. 12). Hasselquist (Trav. 246, Lond. 1766), speaking of this plant, says "the leaves are pulverized and made into a paste with water; the Egyptians bind this paste on the nails of their hands and feet, and keep it on all night: this gives them a deep yellow [red?], which is greatly admired by Eastern nations. The color lasts for three or four weeks before there is occasion to renew it. The custom is so ancient in Egypt that I have seen the nails of the mummies dyed in this manner." Sonnini (Voyage, i. 297) says the women are fond of decorating themselves with the dowers of the henna-plant; that they take them in their hand and perfume their bosoms with them. Compare with this Cant. i. 13; see also Mariti Truv. i. 29), Prosper Alpinus (De Plant. Ægypt. . 13), Pliny N. H. xii. 24), who says that a good kind grows near Ascalon, Oedmann (Verm. Sam.

a From 기일길, oblevit: "Quia mulieres in oriente sugues oblinunt" (Simonis, Lez. s. v.). Cf. Arabic

فَحْ, piz, and the Syriac J: 2005. The Greek

compos is the same word as the Hebrew [?].

b The Heb. "", also denotes " redemption," must surely express more than " led " suplation; " whence some of the Hebrew doctors, sy dividing "שולא, have found out the mystery of word (John iv. 46) with the Peaklite

i. c. 7, and vi. p. 102), who satisfactorily answers Michaelis's conjecture (Supp. ad Lex. Heb. ii. 1905) that "palm-flowers" or "dates" are intended; see also Rosenmüller (Bib. Bot. p. 183), and Wilkin son (Anc. Egypt. ii. 845).

Lausonia alba.

Some have supposed that the expression rendered by the A. V. "pare her nails" c (Deut. xxi. 12) has reference to the custom of staining them with henna-dye; but it is very improbable that there is any such allusion, for the captive woman was ordered to shave her head, a mark of mourning: such a meaning therefore as the one proposed is quite out of place (see Rosenmüller, Schol. ad Deut. xxi. 12). Not only the nails of the hands and the feet, but the hair and beard were also dyed with henna, and even sometimes the manes and tails of horses and asses were similarly treated.

The Lausonia alba when young is without thorns, and when older is spinous, whence Linnsus's names, L. inermis and L. spisosa, he regarding his specimens as two distinct species. The henna-plant grows in Egypt, Syria, Arabia, and N. India. The flowers are white, and grow in clusters, and are very fragrant. The whole shrub is from four to six feet high. The fullest description is that given by Sonnini. The Lausonia alba, the only known species, belongs to the natural order Lythrucea. W. H.

CA'NA OF GALILEE, ONCE CANA IN GAI-ILEE (Karā rīņs Faλtλalas; Syriac, Pesh. Katsa, LLAO, Nitriau, Katnah, CLLAO: ^d Cana Galilaze), a village or town memorable as the scene of Christ's first miracle (John ii. 1, 11, iv. 46), as well as of a subsequent one (iv. 46, 54), and also as the native place of the Apostle Nathanael (xzi. 2).

the Mossiah, יכל ככל שא, " the man thas propitiates all things " (Patrick's Commentary).

د ((())); it. "and she shall do her nails." Onkelos and Saadias understand the expression to denote "letting her nails grow," as a sign of grief. The Hebrew "do her nails," however must surely express more than "letting them alone." d • This is an error. The Nitrian 'est published by Cureton (Lond. 1869) agrees in the form of the word (John iv. 46) with the Peakite A

Digitized by Google

The four passages quoted - all, it will be observed from St. John - are the only ones in which the same occurs. Net her of them affords any clue to the situation of Cana. All we can gather is, that it was not far from Capernaum (John ii. 12. iv. 46), and also on higher ground, since our Lord went down $(\kappa a \tau \epsilon \beta \eta)$ from the one to the other (ii. 12). No further help is to be obtained from the notices either of Josephus (Vit. § 16; B. J. i. 17, 3 5) - even if the place which he mentions be the same - or of Eusebius and Jerome in their Onomasticon.

The traditional site is at Kefr Kenna, a small village about 41 miles northeast of Nazareth. - 14 now contains only the ruins of a church said to stand over the house in which the miracle was performed, and -- doubtless much older -- the fountain from which the water for the miracle was brought (Mislin, iii. 443-6). The Christians of the village are entirely of the Greek Church. The "waterpots of stone" were shown to M. Lamartine, though at St. Willibald's visit centuries before there had been but one remaining (Early Trav. 16). In the time of the Crusades, the six jars were brought to France, where one of them is said still to exist in the Musee d'Angers (see M. Didron's Essays in the Annales Archéologiques, xi. 5, xiii. 2).

The tradition identifying Kefr Kenna with Cana is certainly of considerable age. It existed in the time of Willibald (the latter half of the 8th cent.), who visited it in passing from Nazareth to Tabor, and again in that of Phocas (19th cent. See Re land, 680). From that time until lately the tradition appears to have been undisturbed. But even by Quaresmius the claims of another site were admitted, and these have been lately brought forward by Dr. Robinson with much force. The rival site is a village situated further north, about 5 miles north of Seffurich (Sepphoris) and 9 of Nazareth. near the present Jefat, the Jotapata of the Jewish wars. This village still bears the name of Kand

eLJett (قانا الحليل), a name which is in every respect the exact representative of the Hebrew

ent from it - and it is in this fact that the chief strength of the argument in favor of the northern Kana seems to reside. The argument from tradition is not of much weight. The testimonies of Willibald and Phocas, given above, appear to have ascaped the notice of Dr. Robinson, and they certainly form a balance to those of Adrichomius and others, which he quotes against Kefr Kenna (Rob. u. 346-9, iii. 108, with the note on De Saulcy; comp. Ewald, v. 147; Mislin, iii. 443-6).

The Gospel history will not be affected whichever site may be discovered to be the real one.

* Dr. Robinson (Bibl. Res. iii. 205, ed. 1841) pronounces the addition of el-Jell to the northern Kand conclusive in favor of that village: most of the later writers acquiesce in this view. Thomson raises a doubt whether any such designation distinguishes the one place from the other. Of the nany, he says, to whom he put the question, "only ene had ever heard of the word Jell as a part If the name; and from the hesitancy with which his one admitted it, I was left in doubt whether te did not merely acquietos in it at my suggestion." Land and Book, ii. 191) Mr. Dixon (Holy Land,

\$39) has a long note in which he contends for the

other Kand in opposition to Robinson's view. It is impossible to say which of these villages was the scene of the first miracle. Both of them are seve enough to Nazareth to make them, in oriental life, parts of the same neighborhood. It has been alleged for the northeastern Kand that it is more directly on the way to Capernaum. But there is not a word of proof that Jesus was going down to Capernaum at the time; he was at Cana, wherever it was, because he and his disciples had been invited there to attend the marriage (John ii. 2). Nor if he went down to Capernsum from Cana immediately after the marriage (which is not certain -since µerd rouro, John ii. 12, may mark that movement as only relatively subsequent) does the expression 'going down' settle anything; for it would be topographically exact whether he went from the one Kand or the other. Nor does the nobleman's coming to him at Cana, from Capernaum, to intercede for his son (John iv. 46 ff.) decide the question; for it is merely said that on hearing that Jesus had returned to Galilee from Judsea, he came to him where he was - of course, whether the Cana in which he found him was the nearer or the more distant one.

Stanley (Notices of Localities, fc., p. 188) suggests that Cana may have been one of the Galilean homes of Jesus; but his going thither on the return from Judges (John iv. 43 ff.) so far from favoring this. is rather opposed to it. The reason assigned for doing so, namely, that "a prophet is not without honor save in his own country," explains in effect why he avoided Nazareth (his $\pi a \tau \rho(s)$), to which he might have been expected to go, and went to Cana, a place having so much less interest for him. H.

CA'NAAN (נְעָלָן) (= C'na'an; comp. the Greek name Xrâ, as mentioned below) [low, hum bled]: Xarady; Jos. Xardaros: Chanaan). 1. The fourth son of Ham (Gen. x. 6; 1 Chr. i. 8; comp. Jos. Ant. i. 6, § 4), the progenitor of the Phœnicians ("Zidon"), and of the various nations who before the Israelite conquest peopled the seacoast of Palestine, and generally the whole of the country westward of the Jordan (Gen. x. 15; 1 Chr. i. 13). [CANAAN, LAND OF; CANAANITES.] In the ancient narrative of Gen. ix. 20-27, a curse is pronounced on Canaan for the unfilial and irreverential conduct of Ham: it is almost as if the name had belonged to both, or the father were already merged in the son.

2. The name "Canaan" is sometimes employed for the country itself - more generally sty'ed " the land of C." It is so in Zeph. ii. 5; and we also find "Language of C." (Is. xix. 18): "Wass of C." (Judg. iii. 1): "Inhabitants of C." (Ex. xv 15): "King of C." (Judg. iv. 2, 23, 21, v. 19): " Daughters of C." (Gen. xxviii. 1, 6, 8, xxxvi. 2): "Kingdoms of C." (Ps. cxxxv. 11). In addition to the above the word occurs in several passages where it is concealed in the A.V. by being translated. These are: Is. xxiii. 8, "traffickers," and xxiii. 11, "the merchant city;" Gesenius, "Jehovah gab Befehl über Canaan:" Hos. xii. 7, "He is a merchant;" Ewald, " Kanáan hält trügerische Wage:" Zeph. i. 11, "merchant-people;" Ewald, "dass alle Cananiter sind dahin."

CA'NAAN, THE LAND OF (7937 VTH

from a root DDD, signifying to be low, see 2 Chr. xxviii. 19; Job xl. 19, amongst other passages in which the verb is used), a name denoting the coun-

852 CANAAN

try west of the Jordan and Dead Sea, and between maan, that being in the Greek both of the LXX those waters and the Mediterranean; specially opposed to the "land of Gilead," that is, the high table-land on the east of the Jordan. Thus: "our ittle ones and our wives shall be here in the cities of Gilead but we will pass over armed into the land of Canaan " (Num. xxxii. 26-32), and see xxxiii. 51: " Phineas . . . returned from the children of Reuben and the children of Gad out of the land of Gilead into the land of Cansan to the children of Israel," Josh. xxii. 32: see also Gen. xii. 5. xxiii. 2. 19, xxxi. 18, xxxiii. 18, xxxv. 6, xxxvii. 1, xlviii. 3, 7, xlix. 30; Num. xiii. 2, 17, xxxiii. 40, 51; Josh. xxi. 2; Judg. xxi. 12. True, the district to which the name of "low land" is thus applied contained many very elevated spots: -- Shechem (Gen. xxxiii. 18), Hebron (xxiii. 19), Bethel (xxxv. 6), Bethlehem (xlviii. 7), Shiloh (Josh. xxi. 9; Judg. xxi. 12), which are all stated to be in the " land of Canaan." But high as the level of much of the country west of the Jordan undoubtedly is, there are several things which must always have prevented, as they still prevent, it from leaving an impression of elevation. These are, (1) that remarkable, wide, maritime plain over which the eve ranges for miles from the central hills; a feat:ure of the country which cannot be overlooked by the most casual observer, and which impresses itself most indelibly on the recollection; (2) the still deeper, and still more remarkable and impressive hollow of the Jordan valley, a view into which may be commanded from almost any of the heights of central Palestine; and, (3) there is the almost constant presence of the long high line of the mountains east of the Jordan, which from their distance have the effect more of an enormous cliff than of a mountain range -- looking down on the more broken and iso'ated hills of Canaan, and furnishing a constant standard of height Lefere which everything is dwarfed.

The word "Camanite" was used in the O. T. in two senses, a broader and a narrower, which will be most conveniently examined under that head; but this does not appear to be the case with "Canaan." at least in the older cases of its occurrence. It is only in later notices, such as Zeph. ii. 5, and Matt. xv. 22, that we find it applied to the low maritime plains of Philistia and Phrenicia (comp. Mark vii. 26). In the same manner it was by the Greeks that the name Xva, C'na, was used for Phoenicia, i. r. the sea-side plain north of the "Tyrian ladder" (see the extract in Reland. 7, and Gesenius, 696), and by the later Phoenicians both of Phœnicia proper and of the Punic colonies in Africa. (See the coin of Laodicea ad Lib. and the testimony of Augustine, both quoted by Gesenius, 696.) The LXX. translators had learnt to apply this meaning to the word, and in two cases they render the Hebrew words given above by Xúpa Tŵr Pourínwr (Ex. xvi. 35; Josh. v. 12. somp. v. 1), as they do "Canaanites" by polvices. G.

* CANAAN, LANGUAGE OF, is. xix. 8. See CANAANITES; HAM.

CA'NAANITE, THE (Rec. T. & Kararlins, 4. Karareiτης; Luchm. [Tisch. Treg.] with B C, δ Kararaios; D [in Matt.], Xararaios: Chanoneus), the designation of the Apostle SIMON, stnerwise known as "Simon [the] Zelotes." It rocurs in Matt. x. 4; Mark. ili. 18.

CANAANITES

and the N. T. Xararaios = 'JUJD (comp. Matt xv. 22 with Mark vii. 26). Nor does it signify, se has been suggested, a native of Kana, since that would probably be Karing. But it comes from Chaldee or Syriac word, 7837, Kaneda, or JULLO, Kanenick [?], by which the Jewish sect or faction of "the Zealots" - ac prominent in the last days of Jerusalem was designated (see Buxtorf, Lex. [Tahn.] s. v.)." This Syriac word is the reading of the Peshito version. The Greek equivalent of Kanean is Znharths, Zelotes, and this St. Luke (vi. 15; Acts i. 13) has correctly preserved. St. Matthew and St. Mark, on the other hand, have literally transferred the Syriau word, as the LXX. translators did frequently before them. There is no necessity to suppose, as Mr. Cureton does (Nitrian Rec. lxxxvii.), that they mistook the word for OLLALO

= Xavaraîos, a Canaanite or descendant of Canaan. The Evangelists could hardly commit such an error, whatever subsequent transcribers of their works may have done. But that this meaning was afterwards attached to the word is plain from the readings of the Codex Bezse (D) and the Vulgate, as given above, and from the notice quoted from ('otelier in the note to Winer's article (u. 463). The spelling of the A. V. has doubtless led many to the same conclusion; and it would be well if it were altered to "Kananite," or some other form distinguished from the well-known one in which it now stands. G.

• Simon is supposed to have been called the Cananite " or " Zealot " because of his former zeal in behalf of Judaism. As there was another Simon among the Apostles, he appears to have retained the name after he became a disciple, as a means of distinction, though it had ceased to mark the trait of character out of which it arose. It has been said that he took the appellation from his having belonged to a political sect known as the Zealots, mentioned by Josephus (B. J. iv. 3, § 9); but though he may have shown the same tendencies of character, the party historically distinguished by that name did not appear till a later period. See Wetstein's Nor. Test. i. 366. Н.

CAMAANITES, THE () , i. e. a. curately according to Hebrew usage - Gesen. Heb. Gram. § 107 - "the Canaanite;" but in the A. V. with few exceptions rendered as plural, and ther-

fore indistinguishable from L'2V2", which also, but very unfrequently, occurs: Xaravaios, tolrit, Ex. vi. 15, comp. Josh. v. 1: Chananeus), a word used in two senses: (1) a tribe which inhabited a particular locality of the land west of the Jordan before the conquest; and (2) in a wider sense, the people who inhabited generally the whole of that country.

1. For the tribe of "the Canaanites" only - the dwellers in the lowland. The whole of the country west of Jordan was a "lowland" as compared with the loftier and more extended tracts on the east but there was a part of this western country which was still more emphatically a "lowland." (a., There were the plains lying between the shore of the Mediterranean and the foot of the hills of Benjamin, Judah, and Ephraim - the Shefelah or The word does not signify a descendant of Ca- I plain of Philistis on the south - that of Shares

UANAANITES

between Jaffa and Carmel - the great plain of Es-| stricter sense; but the expression "inhabitunts of dracion in the rear of the bay of Akka; and lastly, the plain of Phœnicia, containing Tyre, Sidon, and all the other cities of that nation. (b.) But separated entirely from these was the still lower region of the Jordan Valley or Arabah, the modern Ghor. a region which extended in length from the sea of Cinneroth (Gennesareth) to the south of the Dead Sea about 120 miles, with a width of from 8 to 14. The climate of these sunken regions --- especially of the valley of the Jordan - is so peculiar, that it is natural to find them the special possession of one tribe. "Amalek" - so runs one of the earliest and most precise statements in the ancient records of Scripture - "Amalek dwells in the land of the south ; and the Hittite, and the Jebusite, and the Amorite, dwell in the mountains; and the Canaanite dwells by the sea, and by the side of Jordan" (Num. xiii. 2.J). This describes the division of the country a few years only before the conquest. But there had been little or no variation for centuries. In the notice which purports to be the earliest of all, the seats of the Canaanite tribe as distinguished from the sister tribes of Zidon, the Hittites, Amorites, and the other descendants of Canaan - are given as on the seashore from Zidon to Gaza, and in the Jordan valley to Sodom, Gomorrah, and Lasha (afterwards ('allirhoe), on the shore of the present Dead Sea (Gen. x. 18-20). In Josh. xi. 3 - at a time when the Israelites were actually in the western country - this is expressed more broadly. "The Canaanite on the east and the west" is carefully distinguished from the Amorite who held "the mountain" in the centre of the country. In Josh. xiii. 2, 3, we are told with more detail that "all the 'circles' (בלילוֹת) of the Philistines . . . from Sihor (the Wady el-Arisk) unto Ekron northward, is counted to the Canaanite." Later still, the Canaanites are still dwelling in the upper part of the Jordan Valley -Hethshean; the plain of Esdraelon - Taanach, Ibleam, and Megiddo; the plain of Sharon - Dor: and also on the plain of Phœnicia - Accho and Zidon. Here were collected the chariots which formed a prominent part of their armies (Judg. i. 19, iv. 3; Josh. xvii. 16), and which could indeed be driven nowhere but in these level lowlands (Stankey, S. & P. p. 134).

The plains which thus appear to have been in possession of the Canaanites specially so called, were not only of great extent; they were also the richest and most important parts of the country, and it is not unlikely that this was one of the reasons for the name of "Canaanite" being

2. Applied as a general name for the non-Israel ite inhabitants of the land, as we have already seen was the case with "Canaau."

Instances of this are, Gen. xii. 6; Num. xxi. 3 - where the name is applied to dwellers in the south, who in xiii. 2) are called Amalekites; Judg. i. 10 - with which comp. Gen. xiv. 13 and xiii. 18. and Josh. x. 5. where Hebron, the highest land in l'alestine, is stated to be Amorite: and Gen. xiii. 12, where the "land of Canaan" is distinguished from the very Jordan valley itself. See also Gen. xxiv. 3, 37, comp. xxviii 2, 6: 1.x. xiii. 1., comp. 5. But in many of its occurrences it is difficult to know in which category to place the word. Thus in Gon. 1. 11: if the floor of Atad was at Bethhogia, close to the west side of the Jordan, "the

the land " appears as if intended to be more general. Agrin, in Gen. x. 18, 19, where the present writer believes the tribe to be intended, Gesenius takes it to apply to the whole of the Canaanite nations. But in these and other similar instances allowance must surely be made for the different dates at which the various records thus compared were composed. And besides this, it is difficult to imagine what accurate knowledge the Israelites can have possessed of a set of petty nations, from whom they had been entirely removed for four hundred years, and with whom they were now again brought into contact only that they might exterminate them as soon as possible. And before we can solve such questions we also ought to know more than we do of the usages and circumstances of people who differed not only from ourselves, but also possibly in a insterial degree from the Orientals of the present day. The tribe who possessed the ancient city of Hebron, besides being, as shown above, called interchangeably Canaanites and Amorites, are in a third passage (Gen. xxiii.) called the children of Heth or Hittites (comp. also xxvii. 46 with xxviii. 1, 6). The Canaanites who were dwelling in the land of the south when the Israelites made their attack on it, may have been driven to these higher and more barren grounds by some other tribes, possibly by the Philistines who displaced the Avvites, also dwellers in the low country (Deut. ii. 23).

Beyond their chariots (see above) we have no clue to any manners or customs of the Camanites. Like the Phœnicians, they were probably given to commerce; and thus the name became probably in later times an occasional synonym for a merchant (Job xli. 6; Prov. xxxi. 24; comp. Is. xxiii. 8, 11; Hos. xii. 7; Zeph. i. 11. See Kenrick, Phase. p. 2:12)

Of the language of the Canaanites little can be said. On the one hand, being - if the genealogy of Gen. x. be right - Hamites, there could be no affinity between their language and that *s* the laraelites, who were descendants of Shem. On the other is the fact that Abram and Jacob shortly after their entrance to the country seem able to hold converse with them, and also that the names of Canaanite persons and places which we possess, are translatable into Hebrew. Such are Melchizedek, Hamor, Shechem, Sisera . . . Ephrath, and also a great number of the names of places. But we know that the Egyptian and Assyrian nan es have been materially altered in their adoption into Hebrew records, either by translation into Hebrew equivalents, or from the impossibility of accurately rendering the sounds of one language by those of another. The modern Arabs have adopted the lie brew names of places as nearly as would admit of their having a meaning in Arabic, though that meaning may be widely different from that of the Hebrew name. Examples of this are Beit-ur, Beit luhm, Bir es-Sebn, which mean respectively, "house of the eve," " house of flesh." " well of the lion." while the Hebrew names which these have superseded meant "house of caves," "house of bread," "well of the oath." May not a similar process have taken place when the Hebrews took possession of the Canaanite towns, and "called the lands after their own names?" (For an examination of this interesting but obscure subject see Gesenius, Hebr Spr. pp. 223-5.)

The " Nethinim " or servants of the temple seen Canaanites" must be intended in the narrower and to have origunated in the dedication of captives

300gl

taken in war from the petty states surrounding the Israelites. [NETHINIM.] If this was the case and if they were maintained in number from similar sources, there must be many non-Israelite names in the lists of their families which we present in Ezr. ii. 43-54; Neh. vii. 46-56. Several of the names in these catalogues - such as Sisera, Mehunim, Nephushim - are the same as those which we know to be foreign, and doubtless others would be found on examination. The subject perhaps would not be beneath the examination of a Hebrew scholar.

This is perhaps the proper place for noticing the various shapes under which the formula for designating the nations to be expelled by the Israelites is given in the various books.

1. Six nations: the Canaanites, Hittites, Amor-ites, Perizzites, Hivites, and Jobusites. This is the usual form, and, with some variation in the order of the names, it is found in Ex. iii. 8, 17, xxiii. 23, xxxiii. 2, xxxiv. 11; Deut. xx. 17; Josh. ix. 1, xii. 8; Judg. iii. 5. In Ex. xiii. 5, the same names are given with the omission of the Perizzites

2. With the addition of the Girgashites, making up the mystic number seven (Deut. vii. 1; Josh. iii. 10, xxiv. 11). The Girgashites are retained and the Hivites omitted in Neh. ix. 8 (comp. Ezr. ix. 1).

3. In Ex. xxiii. 28, we find the ('anaanite, the Hittite, and the Hivite.

4. The list of ten nations in Gen. xv. 19-21 includes some on the east of Jordan, and probably some on the south of Palestine.

5. In 1 K. ix. 20 the Canaanites are omitted from the list. G.

CAN DACE (Karodary, Strab. xvii. p. 820), a queen of Ethiopia (Meroë), mentioned Acts viii. 27. The name was not a proper name of an individual, but that of a dynasty of Ethiopian queens. (See Plin. vi. 35; Dion Cass. liv. 5; Strab. I. c.) The eunuch of this queen, who had charge of all her treasure, is mentioned in Acts as having been met by Philip the Evangelist on the desert road from Jerusalem to Gaza, and converted to Chris tianity. Ethiopian tradition gives him the name of Indich; and in Iren. iii. 12, and Euseb. II. E. ii. 1, he is said to have first propagated the gospel in Arabia Felix and Ethiopia, but Sophronius makes him preach and suffer martyrdom in the island of ('evion. (See Wolf, Curve, ii. 113.)

H. A.

The foregoing is the generally received view but is subject still to some doubt. Of the writers to whom appeal is made, Strabo (xvii. 2, § 3) says expressly that the inhabitants of Meroë appoint kings (Baoilias) as their sovereigns, and appoint them for their personal qualities, being therefore elective, and not hereditary; and also that the royal residence of Candace was Napata (τοῦτο 青ν τὸ βa *σίλειον* της Karodanys), a different place from Meroë, eighty-six geographical miles farther north. Dion Cassius (liv. 5, though he writes erroneously Tarday) makes the same distinction, referring the queens who bore this title to Napata, and not Meroë. In accordance with these notices, Rawlinson (Herodotus, ii. 41) makes Napata the capital of one part of Ethiopia, and Meroë the seat of another independent kingdom. The passage in Pliny (Hist. Nat. vi. 35) does not disagree with this conclusion, hough it is chiefly his language that has misled readers, if they have fallen into error here. His of the number of the planets " (Whiston's Jos. at

words are the following: "Inde Napeta LJ LA mill.; oppidum id parvum inter predicta a...m Ab eo ad insulam Meroën CCCLX M. Herbas irca Meroën demum viridiores, silvarumque aliquid apparuisse et rhinocerotum elephantorumque vestigia Ipsum oppidum Meroën ab introitu insulæ al ess LXX. mill. passuum : juxtaque aliam insulam Tadu dextro subcuntibus alveo, quæ portum faceret. Ædificia oppidi pauca. Regnare feminam Candacem; quod nomen multis jam annis ad reginase transiit." If "zedificia oppidi" refers to "Ma If "sedificia oppidi" refers to "Meroën," just before, then "regnare Candacem" does of course, and Candace reigned in the city and island of that name. But, on the other hand, Meroë was an important city, and could not well be said to consist of "a few buildings," and Napata might be so described; and hence, as some suppose, Pliny at this point goes back to the remoter Napata, of which he has already spoken as "parvum," and so much the more as that is uppermost in the mind, as being the place from which he reckons the situation of the other places named.

Others suppose that Napata was only one of the capitals of Meroë, and that Strabo and Dion Cassius speak of Candace in connection with the former place rather than the latter, because she had a noted palace there. It follows, then (to make the conciliation here complete), that Strabo must mean by "kings" rulers of both sexes. Ritter (Erdkumle, i. 592, 2d ed.) regards the Napata of Pliny as a different place from that of Strabo. For a fuller statement of the case, the reader is referred to J C. M. Laurent's Neutestamentliche Studien, pp 140-146 (Gotha, 1866); and Bibl. Sacra, 1866 pp. 515-16. The name Candace, says Rüctschi (Herzog's

Real-Encykl. vii. 243), appears not to be of Semitic origin, at least no satisfactory etymology has yet been assigned for it. The supposition that the Candace in Acts viii. 27 was the one who fought against the Romans B. C. 22 (Strabo, zvii. 1, § 54) is just possible, so far as the dates are concerned. but has every presumption against it. Some of the commentators suppose her to have been the same; in which case she must have reigned under the emperor Claudius, and bave been nearly ninety years old at the time of Philip's baptizing the eunuch. Pliny's statement that Candace was a transmitted title of these Ethiopian queens renders so violent a supposition needlesr. H.

CANDLESTICK (איצרי גערים: אעציום דסט איציום אעציום לא איציום איצרי איציום איצוים τός, 1 Macc. i. 21; δ άθαματις - Λεγόμενος λύχ νος καl καιόμενος άδιαλείπτως ... τς ναφ, 100d. Sic. ap. Schleusn. Thes. s. v.), which Mess was commanded to make for the tabernacle, is described Ex. xxv. 31-37, xxxvii. 17-24. It is called in Lev. xxiv. 4, "the pure," and in Ecclus. xxvi. 17, "the holy candlestick." With its various appurtenances (mentioned below) it required a talent of "pure gold," and it was not moulded, but "of beaten work " (ropeuth). Josephus, however, says (Ant. iii. 6, § 7) that it was of cast rold (nexweenern),

and hollow. From its golden base (T, Bdors, Joseph.), which, according to the Jews, was 3 feet high (Winer, Leuchter), sprang a main shaft or reed

(77,277), "and spread itself into as many branches as there are planets, including the sun. It terminated in 7 heads all in one row, all standing parallel to one another, one by one, in imitation

CANDLESTICK

march) As the description given in Ex. is not very the first apartment of the tabernacle, opposite the shear, we abbreviate Lightfoot's explanation of it. table of shew-bread, which it was intended to il-- The foot of it was gold, from which went up a lumine, in an oblique position ($\lambda o \xi \hat{\omega} s$) so that the shaft straight, which was the middle light. Near lamps looked to the east and south (Joseph. Ast. what the foot was a golden dish wrought almondwise; iii. 6, § 7; Ex. xxv. 37); hence the central was and a little above that a golden knop, and above called "the western" lsup, according to some, that a golden flower. Then two branches, one on though others render it 'the evening lamp,' and each side, bowed, and coming up as high as the middle shaft. On each of them were three golden cups placed almondwise, on sharp, scollop-shell fashion; above which was a golden knop, a golden fower, and the socket. Above the branches on the middle shaft was a golden boss, above which rose two shafts more; above the coming out of these was another boss, and two more shafts, and then on the shaft upwards were three golden scollop-cups, a knop, and a flower: so that the heads of the hes stood an equal height" (Works, ii. 399, hone ed. Pitman). Calmet remarks that "the number 7 might remind them of the sabbath." We have seen that Josephus gives it a somewhat Egyptian reference to the number of the planets, but elsewhere (B. J. vii. 5, § 5) he assigns to the 7 branches a merely general reference, as $\tau \hat{\eta} s \pi a \rho d$ Tois loudalois ébondoos the tinhe inpartsor The whole weight of the candlestick was 100 TES. minæ; its height was, according to the Rabbis, 5 feet, and the breadth, or distance between the exterior branches 31 feet (Jahn, Arch. Bibl. § 329). It has been calculated to have been worth 50761. exclusive of workmanship.

According to Josephus the ornaments on the shaft and branches were 70 in number, and this was a notion in which the Jews with their peculiar reverence for that number would readily coincide; but it seems difficult from the description in Exodus to confirm the statement. On the main shaft (called "the candlestick," in Ex. xxv. 34) there is said to be "4 almond-shaped bowls," with their knops and their flowers," which would make 12 of these ornaments in all; and as on each of the 6 branches there were apparently (for the expression in verse 33 is obscure) 3 bowls, 3 knops, and 3 flowers, the entire number of such figures on the candlestick would be 66. The word translated

• bowl " in the A. V. is 272, sparthe, for which

oseph. (l. c.) has κρατηρίδια και βοίσκοι. It is wid to have been almond shaped (77200, externwww.évos naputonoss), but whether the fruit or flower of the almond is intended cannot be certain. The

word TURD is variously rendered "knop" (A. V.), "pommel" (Geddes), openporthe (LXX.), spherula (Vulg.), "apple" (Arabic, and other versions); and to this some apply the potoreoi, and not (as is more natural) the orpaipla of Josephus.

The third term is TTD, "a bud," *splva* (LXX. and Joseph.), which from an old gloss seems to be ut for any kroos ebwdidsor, kpirois duoior. From the fact that it was expressly made "after the pattern shown in the mount," many have endesvored to find a symbolical meaning in these ornaments, especially Meyer and Bühr (Symbol. i. \$16 ff). Generally it was "a type of preaching" (Godwyn's Moses and Aaron, ii. 1, or of "the light of the law" (Lightfoot, L c.). Similarly sandlesticks are made types of the spirit, of the Charren, of witnesses, &c. 'Con.p. Zech. iv.; Kev. **5.** xi. 4, &c.; Wemyss, *Clav. Symbol.* s. v.) The condestick was placed on the south side f ried in triumph immediately before the conqueror

say that it alone burned perpetually (Ex. xxvii. 20, 21), the others not being lit during the day, al-though the Holy Place was dark (Ex. xxx. 8; 1 Macc. iv. 50). In 1 Sam. iii. 3 we have the expression "ere the lamp of God went out in the temple of the Lord," and this, taken in connection with 2 Chr. xiii. 11 and Lev. xxiv. 2, 3, would seem to imply that "always" and "continually," merely mean "tempore constituto," i. e. by night; especially as Aaron is said to have dressed the lamps every morning and lighted them every evening. Rabbi Kimchi (ad loc.) says that the other lampe often went out at night, but "they always found the western lamp burning." They were each sup plied with cotton, and half a log of the purest olive-oil (about two wine-glasses), which was sufficient to keep them burning during a long night (Winer).

The priest in the morning trimmed the lamps with golden snuffers (בילקהים: לאמטעסדהפו: לאמטעסדהפו: furcipes), and carried away the snuff in golden

dishes (בַּהַתּיה: אדסטיב: אדסטיב: מכפרים: מכפרים Ex. xxv. 38). When carried about, the candlestick was cov ered with a cloth of blue, and put with its append ages in badger-skin bags, which were supported on a bar (Num. iv. 9).

In Solomon's temple, instead of this candlestick (or besides it, as the Rabbis say, for what became of it we do not know), there were 10 golden candlesticks similarly embossed, 5 on the right and 5 on the left (1 K. vii. 49; 2 Chr. iv. 7). These are said to have formed a sort of railing before the vail, and to have been connected by golden chains, unvler which, on the day of atonement, the highpriest crept. They were taken to Babylon (Jer. İii. 19).

In the temple of Zerubbabel there was again a single candlestick (1 Macc. i. 21, iv. 49). It was

ick. (Dram Arch of Titas.)

Digitized by Google

(Joseph. B. J. vii. 5, § 5). The description given (tal, and flower, each pair of side-branches resting of its klow and Aerrol KauAlorkos by Josephus, agrees only tolerably with the deeply interesting sculpture on the Arch of Titus; but he drops a hint that it was not identical with the one used in the Temple, saying (possibly in allusion to the fantastic griffins, de., sculptured on the pediment, which are so much worn that we found it difficult to make them out), to Epyor Ethanarto Tis Kata rhv ήμετέραν χρήσιν συνηθείας: where see Whis-ton's note. Hence Jahn (Hebr. Com. § clix.) says that the candlestick carried in the triumph was "momenchat different from the golden candlestick of the temple." These questions are examined in Reland's treatise De Spoliis Templi Hierosol. in Arcu Titiano conspicuis. The general accuracy of the sculpture is undoubted (Prideaux, Con. i. 166).

After the triumph the candlestick was deposited in the Temple of Peace, and according to one story fell into the Tiber from the Milvian bridge during the flight of Maxentius from Constantine, Oct. 28. 312 A. D.; but it probably was among the spoils transferred, at the end of 400 years, from Rome to Sarthage by Gentaric, A. D. 455 (Gibbon, iii. 291). It was recovered by Belisarius, once more carried in triumph to Constantinople, "and then respectfully deposited in the Christian church of Jerusalem " (Id. iv. 24), A. D. 533. It has never been heard of since.

When our Lord cried "I am the light of the world" (John viii. 12), the allusion was probably suggested by the two large golden chandeliers, lighted in the court of the women during the Feast of Tabernacles, which illuminated all Jerusalem (Wetstein, ad loc.), or perhaps to the lighting of this colossal candlestick, "the more remarkable in the profound darkness of an Oriental town " (Stan-F. W. F. lev, S. of P. p. 428).

 According to the description given in Ex. xxv. 31-37, the candelabrum, or chandelier, of the tabernacle (improperly called candlestick in the common English version) was constructed as follows:

From a base or stand (called 1, properly the upper portion of the thigh where it joins the body. and hence, naturally, the support on which a structure rests) rose an upright central shaft (

a reed, cane) bearing the central lamp; from two opposite sides of it proceeded other shafts (ロンフ) three on a side, making six branches from the main shaft, all being in the same plane with it, and each bearing a lamp.

As parts of the main shaft and its branches, serving for ornaments of the structure, are mentioned flower-cups (2, properly a cup or bowl, hence, the calyx or outer covering of a flower), capi-

tals (「「うう」, crown of a column, its capital, Am.

ix. 1; Zeph. ii. 14), and flowers (디그의). In shape, the capital may have had the rounded form of fruit, as indicated in some of the ancient versions and Josephus.

From the representation in verses 33-35, these parts appear to have been arranged as follows: Fach of the six side-branches (ver. 33) had three lower-cups (calyxes) shaped like the calyx of the almond blossom, and terminated in a crown or capital, with its ornamental flower, as a receptacle for The central shaft (vers. 34, 35) was he lamp.

on the capital (ver. 85) of one of the three lower the fourth and uppermost bearing the central lamp.

As thus understood, the passage is interpreted according to its strictest grammatical construction. and each term is taken in its ordinary acceptative in the Hebrew Scriptures. The form, as thus represented, is more symmetrical than the one sculptured on the Arch of Titus, which plainly conflicts with some points in the description, and has no historical claim to represent the form of the candel abrum of the first Hebrew tahernacle.

Whether the lamps were all on the same level. as supposed to be represented on the Arch of Titus (for the central shatt is defaced at the top), whether the central lamp was highest, as supposed by Ewald, and whether the seven lamps were arranged in a pyramidal form, as supposed by Scachius, is matter of mere speculation. But on either of the two latter suppositions, the structure is not only more symmetrically artistic in itself, but harmonizes better with the designation of the central

shaft by the general name of the whole (in ver. 34), the other parts being only its subordinate appendages. Keil, in the Bibl. Commentar of Keil and Delitzach, and in his Archäulunie, where an engraved representation is given, arbitrarily re-

verses the order of the אָביע and the הַבּריַצָ as given three times in the Hebrew text.

The term condlestick (A. V.) is obviously inappropriate here. It is also improperly used in the New Testament in passages where lamp-stand is meant by the Greek word (Auxula).

As to the allusion in our Saviour's words, "I am the light of the world," it has been shown by Lücke (who examines the subject minutely), and by Meyer, that they could not have been suggested by the lighting of the lamps in the temple. On the contrary, there is a manifest reference to the repeated and familiar predictions of the Messiah, as "a light of the Gentiles" (Is. xlii. 6, xlix. 6), as "the Sun of righteousness" (Mal. iv. 2), to which allusion is made in Luke i. 78, 79, as "the day-sit in darkness." 32. T. J. C.

CANE. [REED.]

CANKERWORM. [Locust.]

CAN'NEH (כלנה , one Coder כלנה: Xavad; Alex. Xavoav: Chene), Ez. xxvii. 23. [CAL-NEH.]

CANON OF SORIPTURE, THE. may be generally described as "the collection of books which forms the original and authoritative written rule of the faith and practice of the Christian Church." Starting from this definition it will be the object of the present article to examine shortly, I. The original meaning of the term; II. The Jewish Canon of the Old Testament Scriptures as to (a) its formation, and (B) extent; III. The Christian Canon of the Old; and IV. of the New Testament.

I. The use of the word Canon. - The word

Canon (Karór, akin to 737 [cf. Gesen. Thes. a v.], rdrn, rdrra, canna [canalis, channel], can cannon) in classical Greek is (1.) properly a straig composed of four such combinations of calyz, capi- rod, as the rod of a shield, or that used in weaving mage offers an easy transition to the metaphorical ase of the word for a testiny rule in etnics (comp. Arist. Ett. Nic. iii. 4, 5), or in art (the Canon of Polycletus; Luc. de Salt. p. 946 B.), or in language (the Canons of Grammar). The varied gift of tongues, according to the ancient interpretation of Acts ii. 7, was regarded as the "canon" or test which determined the direction of the labors of the several Apostles (Severian. sp. Cram. Cut. in Act. ii. 7, δίδοται έκάστο γλώσσα καθάπερ κανών). Chronological tables were called narores xporunol (Plut. Sol. p. 27); and the summary of a book was called *maxin*, as giving the "rule," as it were, of its composition. The Alexandrine grammarians applied the word in this sense to the great "classical " writers, who were styled " the rule " (5 Karér), or the perfect model of style and language (3.) But in addition to these active meanings the word was also used passively for a measured space (at Olympia), and, in later times, for a fixed tax (Du Cange, s. v. Canon).

The ecclesiastical usage of the word offers a complete parallel to the classical. It occurs in the LXX. in its literal sense (Jud. xili. 6), and again in Aquila (Job xxxviii. 5). In the N. T. it is found in two places in St. Paul's epistles (Gal. vi. 16; 2 Cor. x. 13-16), and in the second place the transition from an active to a passive sense is worthy of notice. In patristic writings the word is commonly used both as "a rule" in the widest sense, and especially in the phrases "the rule of the Church," "the rule of faith," the rule of truth " (δ κανών της έκκλησίας, δ κανών της άληθείας, 6 Karber The mistews; and so also Karber eKKAnsuasticos, and & cardy simply). This rule was regarded either as the abstract, ideal standard, embodied only in the life and action of the Church; or, again, as the concrete, definite creed, which set forth the facts from which that life sprang (regula: Tertull. de Virg. vel. 1). In the fourth century, when the practice of the Church was further systematized, the decisions of synods were styled " Canous," and the discipline by which minsters were bound was technically "the Rule," and those who were thus bound were styled Canonici ("Canons"). In the phrase "the canon (i. e. fixed part) of the mass," from which the popular sense of "canonize" is derived, the passive sense again prevailed.

As applied to Scripture the derivatives of Karón are used long before the simple word. The Latin translation of Origen speaks of Scriptures Canonicas (de Princ. iv. 33), libri regulares (Comm. in Matt. § 117), and libri canonizati (id. § 28). In another place the phrase haberi in Canone (Prol. in Cant. s. f.) occurs, but probably only as a translation of marori (eordar, which is used in this and cognate senses in Athanasius (Ep. Fest.), the Laodine Canons (Anaróriora, Can. lix.), and later writers. This circumstance seems to show that the title "Canonical" was first given to writings in the sense of "admitted by the rule," and not as " form

« Credner accepts the popular interpretation, as if aw," and supposes that scriptures legis, a phrase on- shown that & marin was used at an early period for surring in the time of the persecution of Diocletann, the list of sacred books, then it would be the simpler revents ypadai sardros, which however does not, as her as I know, occur anywhere (Zur Gesch. d. Kan. p. 67). The terms canonical and canonics are prob-ably of Alexandrine origin; but there is not the digitizet evidence for connecting the "canon " of clas-

sintoreess), or a carpenter's rule. (2.) The last | ing part of and giving the rule." It is true that an ambiguity thus attaches to the word, which may mean only "publicly used in the Church;" but such an ambiguity may find many parallels, and usage tended to remove it.ª The spirit of Christendom recognized the books which truly expressed its essence; and in lapse of time, when that spirit was deadened by later overgrowths of superstition, the written "kule" occupied the place and received the name of that vital "Rule" by which it was first stamped with authority (δ carbor $\tau \eta s \delta \lambda \eta$ belas al beias ypapal, Isid. Pelus. Ep. cxiv.; comp. Aug. de doctr. Chr. iv. 9 (6); and as a contrast Anon. ap. Euseb. H. E. v. 28).

The first direct application of the term narrier to the Scriptures seems to be in the verses of Amphilochius (c. 380 A. D.), who concludes his well-known Catalogue of the Scriptures with the words obros άψευδέστατος κανών αν είη των θεοπνεύστων $\gamma \rho a \phi \hat{\omega} r$, where the word indicates the rule by which the contents of the Bible must be determined, and thus secondarily an index of the constituent books. Among Latin writers the word is commonly found from the time of Jerome (Prol. Gal. . . . Tobias et Judith non sunt in Canone) and Augustine (De Civ. xvii. 24, . . . perpauci auctoritatem Canonis obtinuerunt; id. xviii. 38, . . . inveniuntur in Canone), and their usage of the word, which is wider than that of Greek writers. is the source of its modern acceptation.

The uncanonical books were described simply as "those without," or "those uncanonized" (anaибиюта, Conc. Laod. lix.). The Apocryphal books, which were supposed to occupy an intermediate position, were called "books read" (dray: progradµeva, Athan. Ep. Fest.), or "ecclesiastical" (+0clesiastici, Rufin. in Symb. Apost. § 38), though the latter title was also applied to the cauonical Scriptures (Leont. I. c. infr.). The canonical books (Leont. de Sect. ii. τὰ κανονιζόμενα βιβλία) were also called "books of the Testament" (έν $\delta_{id}\theta\eta\kappa a \beta_{i}\beta\lambda(a)$, and Jerome styled the whole collection by the striking name of "the holy library (Bibliotheca sancta), which happily expresses the unity and variety of the Bible (Credner, Zur Gesch. d. Kan. § 1; Hist. of Canon of N. T. App. D).

II. (a) The formation of the Jewish Canon. -The history of the Jewish Canon in the earliest times is beset with the greatest difficulties. Before the period of the exile only faint traces occur of the solemn preservation and use of sacred books. According to the command of Moses the - book of the law " was " put in the side of the ark " (Deut. xxxi. 25 ff.), but not is it (1 K. viii. 9; comp. Joseph. Ant. iii. i. 7, v. 1, 17), and thus in the reign of Josiah, Hilkiah is said to have "found the book of the law in the house of the Lord " (2 K. xxii. 8; comp. 2 Chr. xxxiv. 14). This " book of the law," which, in addition to the direct precepts (Ex. xxiv. 7), contained general exhortations (Deut. xxviii. 61) and historical narratives (Ex. xvii. 14), was further increased by the records of Joshua (Josh. xxiv. 26), and probably by other writings (1 Sam

sical authors with the "canon" of Scripture, not anonical were equivalent to "having the force of | withstanding the tempting analogy. If it could be interpretation to take zavovigendas in the sense of " being entered on the list." [For this view see F. C Pour, Die Besteutung des Wortes Karder. in Hilger. teld's Zeitschr f. wiss. Theol., 1858, i. 141-180

z. 25), though it is impossible to determine their contents." At a subsequent time collections of proverbs were made (Prov. xxv. 1), and the later prophets (especially Jeremiah; comp. Kueper, Jerem. Libror. ss. interp. et vindez, Berol. 1837) were familiar with the writings of their predecessors, a circumstance which may naturally be connected with the training of "the prophetic schools." It perhaps marks a further step in the formation of the Canon when "the book of the Lord " is mentioned by Isaiah as a general collection of sacred teaching (xxxiv. 16; comp. xxix. 18), at once familiar and authoritative; but it is unlikely that any definite collection either of "the psalms" or "the prophets" existed before the Captivity. At that time Zechariah speaks of "the law" and "the former prophets" as in some measure coordinate (Zech. vii. 12); and Daniel refers to "the

books" (Dan. ir. 2, D7507) in a manner which seems to mark the prophetic writings as already collected into a whole. Even after the Captivity the history of the Canon, like all Jewish history up to the date of the Maccalees, is wrapt in great obscurity. Faint traditions alone remain to interpret results which are found realized when the darkness is first cleared away. Popular belief assigned to Ezra and "the great synagogue" the task of collecting and promulgating the Scriptures as part of their work in organizing the Jewish Church. Doubts have been thrown upon this belief (Rau, De Synag. magnå, 1726; comp. Ewald, Gesch. d. V. /sr. iv. 191), and it is difficult to answer them, from the scantiness of the evidence which can be adduced: but the belief is in every way consistent with the history of Judaism and with the internal evidence of the books themselves. The later embellishments of the tradition, which represent Ezra as the second author of all the books [2 ESURAS], or define more exactly the nature of his work, can only be accepted as signs of the universal belief in his labors, and ought not to cast discredit upon the simple fact that the foundation of the present Canon is due to him. Nor can it be supposed that the work was completed at once; so that the account (2 Macc. ii. 13) which assigns a collection of books to Nehemiah is in itself a confirmation of the general truth of the gradual formation of the Canon during the Persian period. The work of Nehemiah is not described as initiatory or final. The tradition omits all mention of the law, which may be supposed to have assumed its final shape under Ezra, but says that Nehemiah "gathered together the [writings] concerning the kings and prophets, and the [writings] of David, and letters I kings concerning offerings " while " founding a brary" (καταβαλλόμενος βιβλιοθήκην έπισυ rhyaye tà repl tur Bagiléur kal roopytur kal τά τοῦ Δαυίδ και ἐπιστολάς βασιλέων περί ἀνα-θεμάτων; 2 Macc. I. c.). The various classes of books were thus completed in succession; and this

view harmonizes with what must have been the natural development of the Jewish faith after the Return. The Constitution of the Church and the formation of the Canon were both from their nature gradual and mutually dependent. The construction of an ecclesiastical polity involved the practical determination of the divine rule of truth, though, as in the parallel case of the Christian Scriptures, open persecution first gave a clear and distinct expression to the implicit faith.

The persecution of Antiochus (B. C. 168) was for the Old Testament what the persecution of Diocletian was for the New, the final crisis which stamped the sacred writings with their peculiar character. The king sought out "the books of the law" (rà BiBala rou ropov, 1 Macc. i. 56) and burnt them; and the possession of a "book of the covenant " (BiBAlor diathiens) was a capital crime (Joseph. Ant. xii. 5, § 4, hparifere είπου βίβλος εδρεθείη ίερα και νόμος . . .). According to the common tradition, this proscription of "the law" led to the public use of the writings of the prophets, and without discussing the accuracy of this belief, it is evident that the general effect of such a persecution would be, to direct the attention of the people more closely to the books which they connected with the original foundation of their faith. And this was in fact the result of the great trial. After the Maccabsean persecution the history of the formation of the Canon is merged in the history of its contents. • The Bible appears from that time as a whole, though it was natural that the several parts were not yet placed on an equal footing, nor regarded universally and in every respect with equal reverence (comp. Zunz, Die gottesd. Vortr. d. Juden, pp. 14, 25, &c.).

But while the combined evidence of tradition and of the general course of Jewish history leads to the conclusion that the Canon in its present shape was formed gradually during a lengthened interval, beginning with Ezra and extending through a part or even the whole (Neh. xii. 11, 22) of the Persian period (B. C. 458-332), when the cessation of the prophetic gift d pointed out the necessity and defined the limits of the collection, it is of the utmost importance to notice that the collection was peculiar in character and circumscribed in contents. All the evidence which can be obtained, though it is confessedly scanty, tends to show that it is false, both in theory and fact, to describe the O. T. as "all the relics of the Hebrao-Chaldaic literature up to a certain epoch " (De Wette, Einl. § 8), if the phrase is intended to refer to the time when the Canon was completed. The epilogue of Ecclesiastes (xii. 11 ff.) speaks of an extensive literature, with which the teaching of Wisdom is contrasted, and "weariness of the flesh" is described as the result of the study bestowed upon it. It is impossible that these "many writings" can have perished in the interval between the composition of Ecclesiastes and the Greek invasion, and the

d After Malachi, according to the Jewish tradition (Vitringa, Obs. Sucr. vi. 6; ap. Kell, l. c.).

a According to some (Fabric. Cod. Pseudep. V. T. . 1113), this collection of sacred books was preserved by Jersminh at the destruction of the Temple (comp. B Macc. ii. 4 f.); according to others it was consumed logether with the ark (Epiph. de Pond. civ. ii. 162). In 2 K. xxii. 8 f., 2 Chr. xxxiv. 14 f., mention is made valy of the Law.

⁵ The reference to the work of Judas Macc. in 2 dates. H. 14, wearings be san Judas rate datawaresektra hair while wide, way the years from the connection to refer a data rate full, appears from the connection to refer.

in particular to his care with regard to the restitution of the copies of the sacred writings which were "lost" (Scares rescord). It is of importance to notice that the work was a *restoration*, and not a *new collection*.

c Yet the distinction between the three degrees of inspiration which were applied by Abarbanel (Kell, *Eind.* § 158, 6) to the three classes of writings is unknown to the early rabbins. d After Malachi, according to the Jewish tradities

Apperyphs includes several fragments which must as referred to the Persian period (Buxtorf, *Tiberias*, 10 f.; Hottinger, *Thes. Phil.*; Hengstenberg, *Bei*träge, i.; Hävernick, *Einl.* i.; Oehler, art. *Kanon* d. A. T. in Herzogi *Encycki.*).

(B) The contents of the Jewish Canon. - The first notice of the O. T. as consisting of distinct and definite parts occurs in the prologue to the Greek translation of the Wisdom of Sirach (Ecclesiasticus). The date of this is disputed [ECCLESIASTICUS; JESUS SON OF SIRACH]; but if we admit the later date (c. B. C. 131), it falls in with what has been said on the effect of the Antiochian persecution. After that "the law, the prophecies, and the remainder of the books" are mentioned as integral sections of a completed whole (5 romos, ral at προφητείαι, καl τά λοιπά των βιβλίων), and the phrase which designates the last class suggests no reason for supposing that that was still indefinite and open to additions. A like threefold classification is used for describing the entire O. T. in the Gospel of St. Luke (xxiv. 44, 4v Tŵ vóµw Mwöréws каl профятаis кal ψадноїз; comp. Acts xxviii. 23), and appears again in a passage of Philo, where the Therapeutze are said to find their true food in "laws and oracles uttered by prophets, and hymns and (τà άλλα) the other [books?] by which knowledge and piety are increased and perfected " (Philo, de Vita cont. 3). [BIBLE.]

The triple division of the O. T. is itself not a mere accidental or arbitrary arrangement, but a reflection of the different stages of religious development through which the Jewish nation passed. The Law is the foundation of the whole revelation, the special discipline by which a chosen race was trained from a savage willfulness to the accomplishment of its divine work. The Prophets portray the struggles of the same people when they came into closer connection with the kingdoms of the world, and were led to look for the inward antitypes of the outward precepts. The Hagiographa carry the divine lesson yet further, and show its working in the various phases of individual life, and in rela tion to the great problems of thought and feeling, which present themselves by a necessary law in the later stages of civilization (comp. Ochler, art. Kanon, in Herzog's Encykl. p. 253).

The general contents of these three classes still, however, remain to be determined. JOSEPHUS, the earliest direct witness on the subject, enumerates twenty-two books "which are justly believed to be divine" ($r\lambda$ *biscalars* $\theta\epsilon ia$ $\pi ericr \epsilon u e i vance in$ books of Mosea, thirteen of the prophets, extendingto the reign of Artaxerzes (*i. e. Lither*, accordingto Josephus),^a and four which contain hymns anddirections for life (Joseph. c. Apion. i. 8). Still'sere is some ambiguity in this enumeration, for

a The limit fixed by Josephus marks the period to which the prophetic history extended, and not, as is commonly said, the date at which the O. T. canon was itself finally closed.

either to rank Job among the prophets, or to exclude one book, and in that case probably Eccle siastes, from the Hagiographa. The former alter native is the more probable, for it is worthy of special notice that Josephus regards primarily the historic character of the prophets (ra kar' aurous $\pi \rho \alpha \chi \theta \epsilon \nu \tau \alpha$ $\sigma \nu \nu \epsilon \gamma \rho \alpha \mu \alpha \gamma$, a circumstance which explains his deviation from the common arrangement in regard to the later annals (1 and 2 Chr., Ezr., Neh.), and Daniel and Job, though he is silent as to the latter in his narrative (comp. Orig. ap. Euseb. H. E. vi. 25). The later history, he adds, has also been written in detail, but the records have not been esteemed worthy of the same credit, " because the accurate succession of the prophets was not preserved in their case " (812 70 µh ye νέσθαι την των προφητών ακριβή διαδοχήν). "But what faith we place in our own Scriptures (ypdµµaσır) is seen in our conduct. They have suffered no addition, diminution, or change. From our infancy we learn to regard them as decrees of God (Geoû Sóyµara); we observe them, and if need be, we gladly die for them " (c. Apion. i. 8; comp. Euseb. H. E. iii. 10).

In these words Josephus clearly expresses not his own private opinion, nor the opinion of his sect, the Pharisees, but the general opinion of his countrymen. The popular belief that the Sadduceen received only the books of Moses (Tertull. De Prosecr. Haret. 45; Hieron. in Matth. xxii. 31, p. 181; Origen, c. Cels. i. 49), rests on no sufficient authority; and if they had done so, Josephus could not have failed to notice the fact in his account of the different sects [SADDUCKES].^b In the traditions of the Talmud, on the other hand, Gamaliel is represented as using passages from the Prophets and the Hagiographa in his controversies with them, and they reply with quotations from the same sources without scruple or objection. (Comp. Fichhorn, Einl. § 35; Lightfoot, Horas Hebr. et Talm. ii. 616; C. F. Schmid, Enarr. Sent. Fl. Josephi de Libris V. T. 1777; G. Güldenspfel, Dissert. Josephi de Sadd. Can. Sent. exhibens, 1814.)

The casual quotations of Josephus agree with his express Canon. With the exception of Prov., Eccles., and Cant., which furnished no materials for his work, and Job, which, even if historical, offered no point of contact with other history, he uses all the other books either as divinely inspired writings (5 Moses, Is., Jer., Ez., Dan., 12 Proth.), or as authoritative sources of truth.

The writings of the N. T. completely confirm the testimony of Josephus. Coincidences of language abow that the Apostles were familiar with several of the Apocryphal books (Bleek, Ueber d. Stellung d. Apokr. u. s. w. in Stud. u. Krit. 1853. pp. 267 ff.); ^o but they do not contain one authoritative or direct quotation from them, while, with the exception of Judges, Eccl., Cant., Esther, Ezra

^b In Ast. xiii. 10, § 6, Josephus simply says that the Sadducess rejected the precepts which were not conmined in the laws of Mores (ārep oùr àray/γραπται iv rois Masöries νόμοις), but derived only from tradiion (τλ àr περαδοστες, opposed to τλ γεγοαμμυτα). The statement has no connection whatever with he "ther writings of the Canon."

The Canon of the SAMARTANS was confined to the Fundatouch, not so much from their mostility to the 'ewa, as from their undue exaltation of the Law (Kell, End. § 118).

c The chief passages which Bleek quotes, after Stier and Nitzech, are James I. 19 || Ecclus. v. 11; 1 Pet. I. 6. 7 || Wisd. iii. 3-7; Hob. xi. 34, 35 || 2 Macc. vi. 13 vii. 42; Heb. I. 8 || Wisd. vii. 23, &c.; Rom. i. 20-32 || Wisd. xiii.-xv.; Rom. ix. 21 || Wisd. xv. 7; Eph. vi. 13-17 || Wisd. v. 18-20. But it is obvious that if these passages prive antifactorily that the Apostolic writers were acquasized with the Apocryphal books, they indica's with equal clearness that their s ince with regard to them cannot have been purely accidental. An ear lise criticism of L. a slegged coincidences is giver in Oosin's Canon of Scripture, §§ 35 fl.

and Nebemiah, every other book in the Hebrew Canon is used either for illustration or proof.^a

Several of the early fathers describe the contents of the Hebrew Canon in terms which generally agree with the results already obtained. MELITO of Sardis (c. 179 A. D.) in a journey to the East made the question of the exact number and order of "the books of the Old Testament" a subject of special inquiry, to satisfy the wishes of a friend (Euseb. H. E. iv. 26). He gives the result in the following form; the books are, 5 Moses . . . Josh. Jud., Ruth, 4 K., 2 Chr., Ps., Prov. (Zalopieros Napoullas ral Zopla), Eccl., Cant., Job, Is., Jer., 12 Proph., Dan., Ez., Edr. The arrangement is peculiar, and the books of Nehemiah and Esther are wanting. The former is without doubt included in the general title "Esdras," and it has been conjectured (Eichhorn, Finl. § 52; comp. Routh, Rel. Sucr. i. 136) that Esther may have formed part of the same collection of records of the history after the exile.^b The testimony of ORIGEN labors under a similar difficulty. According to the present Greek text (Euseb. H. E. vi. 25; In Ps. i. Philoc. 3), in enumerating the 22 books "which the Hebrews hand down as included in the Testament (droughmovy)." he omits the book of the 12 minor prophets, and adds "the Letter" to the book of Jeremiah and Lamentations ('Iepeulas our Ophrois Ral Th έπιστολŷ έν ένί). The number is thus imperfect. and the Latin version of Rufinus has rightly preserved the book of the 12 prophets in the catalogue placing it after Cant. and before the greater prophets, a strange position, which can hardly have been due to an arbitrary insertion (cf. Hil. Prol. in Ps. 15)." The addition of "the Letter" to Jer. is inexplicable except on the assumption that it was an error springing naturally from the habitual use of the LXX., in which the books are united, for there is not the slightest trace that this late anocryphal fragment [BARUCH, BOOK OF] ever formed part of the Jewish Canon. The statement of JELOME is clear and complete. After noticing the coincidence of the 22 books of the Hebrew Bible with the number of the Hebrew letters, and of the 5 double letters with the 5 "double books" (Sam., K., Chr., Ezr., Jer.), he gives the contents of the Law, the Prophets, and the Hagiographs, in exact accordance with the Hebrew authorities, placing Daniel in the last class; and adding that whatever is without the number of these must be placed among the Apocrypha. ("Hic prologus Script. quasi galeatum principium omnibus libris quos de Hebreo vertimus in Latinum convenire potest, ut scire valeamus, quidquid extra hos est, inter Apocrypha ense ponendum," Hieron. Prol. Gal.). The statement of the Talmud is in many respects so ramarkable that it must be transcribed entire. " But who wrote [the books of the Bible]? Moses wrote his own book (?), the Pentateuch, the section

• Some passages are quoted in the N. T. which are not found in the canonical books. The most important of these is that from the prophecies of Enoch "BBOW. Boox of (Jude, 14). Others have been found in Itize x1. 49-51; John vil. 38; James iv. 5, 6; [Cor. H. 9; but these are more or less questionable.

¹ Holy (Dr B^{ids}, Text. p. 646) quotes a ringular now, falsely attributed to Athanasius, who likewise smits Esther. "Sunt stiam at antiquis Hebrais qui Bither admittant, atque ut numerus idem (22) asrewar, cum Judicious copularunt." The book is wantbrg also in the Synops. S. Stript, Gragor. Naz., Ambileshing, Nicephorus Cullierus, 2c.

about Bala m and Job. Joshua wrote his eve book and the eight [inst] verses of the Pentatench Samuel wrote his own book, the book of Judges and Ruth. David wrote the book of Pualma, for which, however, some were composed] by the ter. venerable elders, Adam, the first man, Melchizedek Abraham, Moses, Haman, Jeduthun, Asaph, and the three sons of Korah. Jeremiah wrote his own book, the hooks of Kings and Lamentations. Hesckiah and his friends [reduced to writing] the books contained in the Memorial word IaMSCHaK. i. e. Isaiah, Proverts, Canticles, Ecclesiastes. The men. of the great Synagogue [reduced to writing] the books contained in the memorial letter KaNDaG, i. e. Ezekiel, the 12 lesser prophets, Daniel, and Esther. Ezra wrote his own book, and brought down the genealogies of the books of Chronicles to his own times . . . Who brought the remainder of the books [of Chronicles] to a close? Nehemiah the son of Hachalijah " (Baba Bathra f. 14 b, mp. Ochler, art. Kanon, I.c.).

In spite of the comparatively late date (c. A. D. 500), from which this tradition is derived, it is evidently in essence the earliest description of the work of Ezra and the Great Synagogue which has been preserved. The details must be tested by other evidence, but the general description of the growth of the Jewish Canon bears every mark of probability. The early fables as to the work of Ezra [2 ESDRAS; see above] are a natural corruption of this original belief, and after a time entirely supplanted it; but as it stands in the great collection of the teaching of the Hebrew Schools, it hears witness to the authority of the complete Canon, and at the same time recognizes its gradual formation in accordance with the independent results of internal evidence.

The later Jewish Catalogues throw little light upon the Canon. They generally reckon twentytwo books, equal in number to the letters of the Hebrew alphabet, five of the Law, eight of the Prophets (Josh., Judg. and Ruth, 1, 2 Sam., 1, 2 K., Is., Jer. and Lam., Ez., 12 Proph.), and nine of the Hagiographa (Hieron. Prod. in Reg.). The last number was more commonly increased to eleven by the distinct enumeration of the books of

Ruth and Lamentation (" the 24 Books " D"DD

TVDTN), and in that case it was supposed that the Yod was thrice repeated in reverence for the sacred name (Hody, De Bibl. Text. p. 644; Eichhorn, Einl. § 6). In Hebrew MSS., and in the early editions of the O. T., the arrangement of the later books offers great variations (Hody, l. c., gives a large collection), but they generally agree in reckoning all separately except the books of Fxrs and Nebemiah d (Buxtorf, Hottinger, Hengstenberg, Hävernick, U.cc.; Zunz, Gottesd. Vorträge d. Juden).

c Origen expressly excludes 1 Macc. from the canon (if a 52 rourse ior) ra Maxs.), although written in Habrew. Berthold's statement to the contrary is incorrect (Einl. § 81), although Keil (de Auct. Can. Look. Macc. 67) maintains the same opiniou.

A Notwithstanding the unanimous judgment of later writers, there are traces of the existence of doubts among the first Jewish doctors as to some books. Thus in the Mishna (Jad. 8, 5) a discussion is recorded as to Cant. and Eccles. whether they "soil the bands;' and a difference as to the latter book existed between the great schools of Hillel and Shammai. The same doubts as to Eccles. are repeated in another from "

Janon was uniform and coincident with our own : a at while the Palestinian Jews combined to preverve the strict limits of the old prophetic writings, the Alexandrine Jews allowed themselves greater freedom. Their ecclesiastical constitution was less definite, and the same influences which created among them an independent literature disinclined them to regard with marked veneration more than the Law itself. The idea of a Canon was foreign to their habits; and the fact that they possessed the sacred books not merely in a translation, but in a translation made at different times, without any unity of plan and without any uniformity of execution, necessarily weakened that traditional feeling of their real connection which existed in l'alestine. Translations of later books were made (1 Macc., Ecclus., Baruch, &c.), and new ones were written (2 Macc., Wisd.), which were reckmed in the sum of their religious literature, and probably placed on an equal footing with the Hagiographa in common esteem. But this was not the result of any express judgment on their worth, but a natural consequence of the popular belief in the doctrine of a living Word which deprived the prophetic writings of part of their distinctive value. So far as an authoritative Canon existed in Egypt, it is probable that it was the same as that of Palestine. In the absence of distinct evidence to the contrary this is most likely, and positive indications of the fact are not wanting. The translator of the Wisdom of Sirach uses the same phrase (& ropos ral of $\pi \rho \circ \phi \hat{\eta} \tau a$ ral $\tau \dot{a} \dot{a} \lambda \lambda a \beta \cdot \beta \lambda (a)$ in speaking of his grandfather's Biblical studies in Palestine, and of his own in Egypt (comp. Eichhorn, Einl. § 22), and he could hardly have done so, had the Bible been different in the two places. The evidence of PHILO, if less direct, is still more conclusive. His language shows that he was acquainted with the Apocryphal books, and yet he does not make a single quotation from them (Hornemann, Obserr. ad illustr. doctr. de Can. V. T. ex Philone, pp. 28. 2.), ap. Eichhorn, Einl. § 26), though they offered much that was favorable to his views. On the other hand, in addition to the Law, he quotes all the books of "the Prophets," and the Psalms and Proverbs, from the Hagiographa, and several of them (Is., Jer., Hos., Zech., Ps., Prov.) with clear assertions of their "prophetic" or inspired character. Of the remaining Hagiographa (Neh., Ruth, Lam., 1, 2 Chron., Dan., Eccl., Cant.) he makes no mention, but the three first may have been attached, as often in Hebrew usage, to other books (Ez., Jud., Jer.), so that four writings alone are entirely unattested by him (comp. Hornemann,

the Talmud (Sabb. f. 30, 2), where it is said that the

book would have been concealed (123) but for the questations at the beginning and the end. Comp. Hieron. Comm. in Erders. r. f.: "Aiunt Hebrael cum inter vasions scripts Salomonis ques antiquats sunt nee in memoris duraverunt, et hie liber obl' strandus videratar, so quod vanas Del assereret creatures... es hoc uno capitulo (sil.) meruisse auctoritatem? Parallel passages are quoted in the notes on the passage, and by Bleck, Stud. u. Krit. 1863, pp. 222 ff. The docties as to Esther taxe been already noticed.

A series of references to the Apocryphal books from ewish writers has been made by Hottinger (*Thus. Philel.* 1859), and collected and reprinted by Wordsworth (*On the Cason of the Scriptures*, App. C.). Comwes also the valuable notices it. Zuns, *Die gottest. "war. d. Judca*, pp 126 fl.

So her then R has been shown that the Hebrew $|l.c.\rangle$. A further trace of the identity of the Alexandrine Canon with the Palestinian is found in the st while the Palestinian Jews combined to prethe strict limits of the old prophetic writings, a Alexandrine Jews allowed themselves greater a Alexandrine Jews allowed themselves greater a Alexandrine (Jews allowed themselves greater) a Alexandrine (Jews allowed themselves greater) a Alexandrine (Jews allowed themselves greater) books " are specially distinguished from the mass a Alexandrine Jews allowed themselves greater) a Alexandrine (Jews allowed themselves greater) books (Jews) a Alexandrine (Jews) books (Jews) books (Jews) books (Jews) a Alexandrine (Jews) books (Jews) boo

From the combination of this evidence there can be no reasonable doubt that at the beginning of the Christian era the Jews had only one Canon of the Sacred writings, defined distinctly in Palestine, and admitted, though with a less definite apprehension of its peculiar characteristics, by the Hellenizing Jews of the Dispersion, and that this Canonwas recognized, as far as can be determined, by our Lord and his Apostles. But on the other hand, the connection of other religious books with the Greek translation of the O. T. and their common use in Egypt, was already opening the way for an extension of the original Canon, and assigning an authority to later writings which they did not de rive from ecclesisation.

III. a. The History of the Christian Canon of the Old Testament. — The history of the Old Testament Canon among Christian writers exhibits the natural issue of the currency of the LXX., enlarged as it had been by apocryphal additions. In proportion as the Fathers were more or less absolutely dependent on that version for their knowledge of the Old Testament Scriptures, they gradually lost in common practice the sense of the difference between the books of the Hebrew Canon and the Apocrypha. The custom of individuals grew into the custom of the Church; and the public use of the Apocryphal books obliterated in popular regard the characteristic marks of their origin and value, which could only be discovered by the scholar. But the custom of the Church was not fixed in an absolute judgment. It might seem as if the great leaders of the Christian Body shrank by a wise forethought from a work for which they were unfitted; for by acquirements and constitution they were little capable of solving a problem which must at last depend on historical data. And this remark must be applied to the details of patristic evidence on the contents of the Canon. Their habitmust be distinguished from their judgment. The want of critical tact which allowed them to use the most obviously pseudonymous works (2 Esdras,-Enoch) as genuine productions of their supposed authors, or as "divine Scripture," greatly diminishes the value of casual and isolated testimonies to single books. In such cases the form as well as the fact of the attestation requires to be examined, and after this the combined witness of different Churches can alone suffice to stamp a book with ecclesiastical authority.

^o The passages from the Taimud relating to Canticles and Ecclesiastes are quoted and translated in full by Ginsburg (*CoArleth*, Lond. 1861, pp. 18-15). The phrase used in some of these passages. 'to soil (or 'pollte') the hands,'' has often been misunderstood. As applied to a book, it signifies "to be swored.' or "canonical," not the reverse, as might naturally be supposed. This fact is clearly shown, and the reason of it given, by Ginsburg, *Song of Songs*, London, 1867, p. 8, note.

C The dream of a second and third revision of the Jerish Canou in the times of Eleaser and Hillel, by which the Apocryphal books were ratified (Genebrard), rest on no basis whatever. The supposition that the Jews rejected the Apocrypha after our Lord's counting (Oard. Perron) is equally unfounded. (Jvein, (second) of Scrivter. §5 23, 25

Digitized by Google

The confusion which was necessarily introduced ; is the only one which is distinctly recognized, and by the use of the LXX. was further increased shen the Western Church rose in importance. The LXX. itself was the original of the Old Latin, and the recollection of the original distinction between the constituent books of the Bible became more and more difficult in the version of a version; and at the same time the Hebrew Church dwindled down to an obscure sect, and the intercourse between the Churches of the East and West grew less intimate. The impulse which instigated Melito in the second century to seek in "the East" an "accurate" account of "the books of the Old Testament," gradually lost its force as the Jewish nation and literature were further withdrawn from the circle of Christian knowledge. The Old Latin version converted use popularly into belief, and the investigations of .lerome were unable to counteract the feeling which had gained strength silently, without any distinct and authoritative sanction. Yet one important, though obscure, protest was made against the growing error. The Nazarenes, the relics of the Hebrew Church, in addition to the New Testament "made use of the Old Testament, as the Jews (Epiph. Har. xxix. 7). They had "the whole Law, and the Prophets, and the Hagiographa su called, that is the poetical books, and the Kings, and Chronicles and Esther, and all the other books in Hebrew" (Epiph. I. c. map' airrois yap mas d νόμος και οι προφήται και τα γραφεία λεγόμενα, φημί δε τα στιχηρά, και αι Βασιλείαι και Παραλειπόμενα και Λισθήρ και τάλλα πάντα Έβραϊ-Rus arayirásterai). And in connection with this fact, it is worthy of remark that JUSTIN MARTYR. who drew his knowledge of Christianity from Palestine, makes no use of the apocryphal writings in ity of the Apocryphal books to the judgment of the any of his works.

From what has been said, it is evident that the history of the Christian Canon is to be sought in the first instance from definite catalogues and not from isolated quotations. But even this evidence is incomplete and unsatisfactory. A comparison of the subjoined table (No. I.) of the chief extant Catalogues will show how few of them are really independent; and the later transcriptions are commonly of no value, as they do not appear to have been made with any critical appreciation of their distinctive worth.

These Catalogues evidently fall into two great classes, Hebrew and Latin; and the former, again, exhibits three distinct varieties, which are to be traced to the three original sources from which the Catalogues were derived. The first may be called the pure Hebrew Canon, which is that of the Church of England (the Talmud, Jerume, Joan. Damase.). The second differs from this by the mission of the book of Esther (Melito, [Athan.] 3m. S. Script., Greg. Naz., Amphiloch., Leont. Niceph. Callist.). The third differs by the addiin of Baruch, or "the Letter" (Origen, Athavas., Cyr. Hieros., [(oncil. Laod.,] Hil. Pictur.). The omission of Esther may mark a real variation n the opinion of the Jewish Church [ESTHER], but the addition of Baruch is probably due to the place which it occupied in direct connection with Jeremiah, not only in the Greek and Latin transtions, but perhaps also in some copies of the lebrew text [BARUCH, BOOK OF]. This is rensered more likely by the converse fact that the Lamuntations and Baruch are not distinctly enumerated y many writers who certainly received both books. Juring the four first centuries this Hebrew Canon the Prophets," which were supported by the witness

it is supported by the combined authority of these fathers whose critical judgment is entitled to the greatest weight. In the mean time, however, as has been already noticed, the common usage of the early fathers was influenced by the position which the Apocryphal books occupied in the current versions, and they quoted them frequently as Scripture when they were not led to refer to the judg ment of antiquity. The subjoined table (No. II. will show the extent and character of this partial testimony to the disputed books.

These casual testimonies are, however, of comparatively slight value, and are, in many cases, opposed to the deliberate judgment of the authors from whom they are quoted. The real divergence as to the contents of the Old Testament Canon is to be traced to AUGUSTINE, whose wavering and uncertain language on the point furnishes abundant materials for controversy. By education and character he occupied a position more than usually unfavorable for historical criticism, and yet his overpowering influence, when it fell in with ordinary usage, gave consistency and strength to the opinion which he appeared to advocate, for it may be reasonably doubted whether he differed intentionally from Jerome except in language. In a famous passage (de Doctr. Christ. ii. 8 (13)) be enumerates the books which are contained in "the whole Canon of Scripture," and includes among them the Apocryphal books without any clear mark of distinction. This general statement is further confirmed by two other passages, in which it is argued that he draws a distinction between the Jewish and Christian Canons, and refers the author-Christian Church. In the first passage he speaks of the Maccabsean history as not " found in the Sacred Scriptures which are called canonical, but in others, among which are also the books of the Maccabees, which the Church, and not the Jews, holds for canonical, on account of the marvellous sufferings of the martyrs [recorded in them] . . . " (quorum supputatio temporum non in Scripturis Sanctis, que Canonicse appellantur, sed in aliis invenitur, in quibus sunt et Machabæorum libri, quos non Judsei, sed ecclesia pro Canonicis habet . . . De Cir. xviii. 36). In the other passage he speaks of the books of the Maccabees as "received (recepta by the Church, not without profit, if they be read with sobriety" (c. Gaud. i. 38). But it will be noticed that in each case a distinction is drawn between the "Ecclesiastical" and properly "Canonical " books. In the second case he expressly lowers the authority of the books of the Maccabees by remarking that "the Jews have them not like the Law, the Psalms, and the Prophets to which the Lord gives His witness " (Aug. L c.). And the original catalogue is equally qualified by an introduction which distinguishes between the authority of books which are received by all and by some of the Churches; and, again, between those which are received by churches of great or of small weight (de Doctr. Chr. ii. 8 (12)) so that the list which immediately follows must be interpreted by this rule. In confirmation of this view of Augustine's special regard for the Hebrew Canon, it may be further urged that he appeals to the Jews, "the librarians of the Christians," as possessing "all the writings in which Christ was prophesied of" (In Ps. zl., Ps. lvi.), and to "the Law, the Pashus, and

x the Jews (c. Goud. 1. c.), as including "all the tione habentur, pro sacris et canonicis non suscept samunical authorities of the Sacred books" (de Unit. rit . . . anathema esto, Conc. Trid. Sess. iv.) Eccles. p. 16), which, as he says ir another place (de Civ. xv. 23, 4), "were preserved in the temple of the Hebrew people by the care of the successive priests." But on the other hand Augustine frequently uses passages from the Apocryphal books as coördinate with Scripture, and practically disregards the rules of distinction between the various classes of sacred writings which he had himself laid down. He stood on the extreme verge of the age of independent learning, and follows at one time the conclusions of criticism, at another the prescriptions of habit, which from his date grew more and more powerful

The enlarged Canon of Augustine, which was, as it will be seen, wholly unsupported by any Greek authority, was adopted at the Council of CAR-THAGE (A. D. 897?), though with a reservation (Can. 47, De c infirmando isto Canone transmarina ecclesia consulatur), and afterwards published in the decretals which bear the name of INNOCENT, DAMASUS, and GELASIUS (cf. Credner, Zur Gesch. d. Kan. 151 ff.); and it recurs in many later writers. But nevertheless a continuous succession of the more learned fathers in the West maintained the distinctive authority of the Hebrew Canon up to the period of the Reformation. In the sixth century PRIMASIUS (Comm. in Apoc. iv. Cosin. § 92?). in the 7th GREGORY the Great (Moral. xix. 21, p. 622), in the 8th BEDE (In Apoc. iv.?), in the 9th ALCUIN (ap. Hody, 654; yet see Carm. vi., vii.), in the 10th RADULPHUS FLAV. (In Levil. xiv. Hody, 655), in the 12th PETER OF CLUGNI (Ep. c. Par. Hody, l. c.), HUGO DE S. VICTORE (de Script. 6), and JOHN OF SALISBURY (Hody, 656; Cosin, § 130), in the 13th HUGO CARDINALIS (Hody, 656), in the 14th NICHOLAS LIRANUS (Hody, p. 657; Cosin, § 146), WYCLIFFE (? comp. Hody, 658), and OCCAM (Hody, 657; Cosin, § 147), in the 15th THOMAS ANGLICUS (Cosin, § 150) and THOMAS DE WALDEN (Id. § 151), in the 16th Card. XIMENES (Ed. Compl. Pref.), SIXTUS SE-NENSIS (Biblioth. 1. 1), and Card. CAJETAN (Hody, p. 662; Cosin § 173), repeat with approval the decision of Jerome, and draw a clear line between the Canonical and Apocryphal books (Cosin, Scholastical History of the Canon; Rouss, die Gesch. d. heiligen Schriften N. T., Ed. 2, § 328).

Up to the date of the COUNCIL OF TRENT, the Romanists allow that the question of the Caron was open, but one of the first labors of that assembly was to circumscribe a freedom which the growth of literature seemed to render perilous.^a The deeree of the Council "on the Canonical Scriptures," which was made at the 4th Session (April 8th, 1546), at which about 53 representatives were present, pronounced the enlarged Canon, including the Apocryphal books, to be deserving in au its parts of "equal veneration" (pari pietatis affectu), and added a list of books " to prevent the possibility of doubt " (ne cui dubitatio suboriri possit). This hasty and peremptory decree, unlike in its form to any catalogue before published, was closed by a solsum anathema against all who should "not receive the entire books with all their parts as sacred and vanonical " (Si quis autem libros ipsos integros cum unnibus suis partibus, prout in ecclesia catholica egi consueverunt et in veteri vulgata Latina edi-

This decree was not, however, passed without opposition (Sarpi, 139 ff. ed. 1655, though Pallavacine denies this); and in spite of the absolute terms in which it is expressed, later Romanists have sought to find a method of escaping from the definite equalization of the two classes of Sacred writings by a forced interpretation of the subsidiary clause Du Pin (Dissori. prelim. i. 1), Lamy (App. Bibl. ii. 5), and Jahn (Einl. in d. A. T., i. 141 ff. ap. Reuse, a. a. O. § 337), endeavored to establish two classes, of proto-Canonical and deutero-Canonical books, attributing to the first a dogmatic, and to the second only an ethical authority. But such a classification, however true it may be, is obvioualy at variance with the terms of the Tridentine decision, and has found comparatively little favor among Romish writers (comp. [Herbst] Welte Einl. ii. ff. 1 f.).

The reformed churches unanimously agreed in confirming the Hebrew Canon of Jerome, and refused to allow any dogmatic authority to the Apooryphal books, but the form in which this judgment was expressed varied considerably in the different confessions. The Lutheran formularies contain no definite article on the subject, but the note which Luther placed in the front of his German translation of the Apocrypha (ed. 1534), is an adequate declaration of the later judgment of the Commun ion : "Apocrypha, that is, Books which are not placed on an equal footing (nicht gleich gehalten; with Holy Scripture, and yet are profitable and good for reading." This general view was further expanded in the special prefaces to the separate books, in which Luther freely criticised their individual worth, and wholly rejected 8 and 4 Esdras, as unworthy of translation. At an earlier period Carlstadt (1520) published a critical essay, De canonicis scripturis libellus (reprinted in Credner, Zer Gesch. d. Kan. pp. 291 ff.), in which he followed the Hebrew division of the Canonical books into three ranks, and added Wisd., Ecclus., Judith, Tobit, 1 and 2 Macc., as Hagiographa, though not included in the Hebrew collection, while he rejected the remainder of the Apocrypha with considerable parts of Daniel as "utterly apocryphal" (plane apocryphi; Credn. pp. 389, 410 ff.)

The Calvinistic churches generally treated the question with more precision, and introduced into their symbolic documents a distinction between the "Canonical" and "Apocryphal," or "Ecclesiastical ' books. The Gallican Confession (1561), after an enumeration of the Hieronymian Canon (Art. 3). adds (Art. 4) "that the other ecclesiastical books are useful, yet not such that any article of faith could be established out of them " (quo [sc. Spirite Sancto] suggerente docemur, illos [sc. libros Canon-icos] ab aliis libris ecclesiasticis discernere, qui, ut sint utiles, non sunt tamen ejusmodi, ut ez iis constitu possit aliquis fidei articulus). The Belgie Confession (1561?) contains a similar enumeration of the Canonical books (Art. 4), and allows their public use by the Church, but denies to them all independent authority in matters of faith (Art. 6). The later Helvetic Confession (1562, Bullinger) notices the distinction between the Canonical and Apocryphal books without pronouncing any judgment or, he question (Niemeyer, Libr. Symb. Fe

³ The history of the Catalogue published at the and it was probably limited to the determination of search of Florence (1441) is obscure (Cesin §§ 159 f.), books ftr Exclosionical use (Reuss, § 325).

No. L - CHRISTIAN CATALOGUES OF THE BOOKS OF THE OLD TESTAMENT.

The list extends only to such books as are disputed. Of the signs, • indicates that the book is expressly reckened as Holy Scripture: † that it is placed expressly in a second rank : ? that it is mentioned with doubt. A blank marks the silence of the author as to the book in question.

ies. Ref. p. 468). The Westminster Confession | establishment of doctrine; and a similar decision is given in the Irish Articles of 1615 (Hardwick, L c., 841 f.). The original English Articles of 1559 contained no catalogue (Art. 5) of the contents of "Holy Scripture," and no mention of the Apocryphs, although the Tridentine decree (1546) might seem to have rendered this necessary. The example of foreign Churches may have led to the addition upon the later revision.

> The expressed opinion of the later Greek Church on the Canon of Scripture has been modified in some cases by the circumstances under which the declaration was made. The "Confession" of Cyril

NOTES ON TABLE NO. I.

Ganon, as an original part of the collection, is derisive, in spite of the defense of Bickell (Stud. u. Krit. iii. 611 ff.), as the present writer has shown at length in another place (Hist. of N. T. Canon, iv. 498 ff. [p. \$84 ff., 2d ed.]). The Canon recurs in the Capitular. Aquisgran. c. xx., with the omission of Baruch and mentations.

3 The same Canon appears in Conc. Hipp. Can. The Greek version of the Canon omits the XXXVI. books of Maccabees; and the history of the Council itself is very obscure. Comp. Cosin, § 82.

8 This Canon mentions three books of the Maccabee Judith is not found in some MSS.; and generally it may be observed that the published text of the Con-ciliar Canons needs a thorough revision. Ecclesiastiens is thus mentioned : Efeber & spoorstopeiste vuis pardiness infor role whose the ordear to rolupushole Serging. Comp. Constit. Apost. 11. 57. The Canons of Leodices, Carthage, and the Apostolic anons, were all ratified in the Quini-Sextine Council,

Oan. 2

4 'Lepsuias σèr Θρήνοις και ἐπιστολή ἐν ἐνί. Ori-gen expressly says that this catalogue is ès 'Εβραΐοι wapabibbars, and begins with the words, eis' be ai einor dio Bistor Kal "Espaious aide. He quotes sereral of the Apocryphal books as Scripture, as will be een below; and in his Letter to Africanus defends the interpolated Greek text of Daniel and the other O. T. books, on the ground of their public use (Ep. ad Afric. § S ff.). The whole of this last passage is of the deepest interest, and places in the clearest light the influence which the LXX. exercised on common opinion.

5 Athanasius closes his whole catalogue with the words : דבעדב דריאם דטע סערקאוטי . . . אי דטעדטוב א לνοις το της ευσεβείας διδασκαλείου εύαγγελίζεται. Μηδείς τούτοις έπιβαλλέτω · μπολε τούτων άφαιρείσθω דו ... לטדוי אמו לדיףה אואאום דטידשי לבשלרי, טי אמים-דיגלטורדה שלי דרדשהטערים לל המאל דעי המדלאשי לדמיניט המנסטמו דטיי לאדו האסטראצטעלדטור המל אטאטעלדטור המדק yeisona roy up: sivefields hoyov. 6 The list of the Apocryphal books is prefaced by a

slause nearly identical with that in Athanasius. In a second enumeration (Credner, a. a. O. p. 144), three books of the Maccabees and Sugarna are enumerated among the dortheyouses. 7 The Apocryphal books are headed : sal dora dort

Adyoural the radalas abraí elour. Susanna (i. e. Add. **to** 1 Daniel) is reckoned among them.

8 The catalogue ends with the words : waras frees al rus & rourner dards ein in yangelous. 9 The verses occur under the name of Gregory of

CANON

Me. IL. -- QUOTATIONS OF THE APOCRYPHA AS SORIPTURAL

366

Leser, who was most favorably duposed towards | Paul, omitting 1 & 9 Chr., Ezr., Neh., Esther, 7084 e Protestant Churches, confirms the Laodicene Catalogue, and marks the Apocryphal books as not possessing the same divine authority as those whose anonicity is unquestioned (Kimmel, Mon. Fid. Eccles. Ör. i. p. 42, το κύρος παρά του παναγίου πνεύματος οὺκ ἔχουσιν ὡς τὰ κυρίως καὶ ἀναμφι-βόλως κανονικὰ βιβλία). In this judgment Cyril Lucar was followed by his friend Metrophanes Critopulus, in whose confession a complete list of the books of the Hebrew Canon is given (Kimmel, ii. p. 105 f.), while some value is assigned to the Apocryphal books (ἀποβλήτους οὐχ ἡγούμεθα) in consideration of their ethical value; and the detailed decision of Metrophanes is quoted with approval in the "Orthodox Teaching" of Platon, Metropolitan of Moscow (ed. Athens, 1836, p. 59). The "Orthodox Confession" simply refers the subject of Scripture to the Church (Kimmel, p. 159, $\dot{\eta}$ έκκλησία έχει την έξουσίαν . . . να δοκιμάζη ταs ypaceds; comp. p. 123). On the other hand the Synod at Jerusalem, held in 1672, "against the Calvinists," which is commonly said to have been led by Romish influence (yet comp. Kimmel, p. lxxxviii.), pronounced that the books which Cyril Lucar "ignorantly or maliciously called apocryphal," are " canonical and Holy Scripture," on the suthority of the testimony of the ancient Church ([Kimmel,] Weissenborn, Dosith. Confess. pp. 467 f.). The Constantinopolitan Synod, which was held in the same year, notices the difference existing between the Apostolic, Laodicene, and Carthaginian Catalogues, and appears to distinguish the Apocryphal books as not wholly to be rejected (Soa μέντοι των της παλαίας διαθήκης βιβλίων τή άναριθμήσει των άγιογράφων ού συμπεριλαμβάretai . . . ούκ ἀπόβλητα τυγχάνοισι διόλου). The authorized Russian Catechism (The Doctrine of the Russian Church, &c., by Rev. W. Blackmore, Aberd., 1845, pp. 37 ff.) distinctly quotes and defends the Hebrew Canon on the authority of the Greek Fathers, and repeats the judgment of Athanasius on the usefulness of the Apocryphal books as a preparatory study in the Bible; and there can he no doubt but that the current of Greek opinion, in accordance with the unanimous agreement of the ancient Greek Catalogues, coincides with this judgment.

The history of the Syrian Canon of the O. T. is involved in great obscurity from the scantiness of the evidence which can be brought to bear upon it. The Peshito was made, in the first instance, directly from the Hebrew, and consequently adhered to the Hebrew Canon; but as the LXX. was used afterrards in revising the version, so many of the Apocvphal books were translated from the Greek at an arly period, and added to the original collection (Assem. Bibl. Or. i. 71). Yet this change was only made gradually. In the time of Ephrem (c. A. D. 370) the Apocryphal additions to Daniel were yet wanting, and his commentaries were confined to the books of the Hebrew Canon, though he was acquainted with the Apocrypha (Lardner, Credi bility, &c., iv. pp. +27 f.; see Lengerke, Daniel, exii.). The later Syrian writers do not throw much light upon the question Gregory Bar Hebrzus, in his short ~mmentary on Scripture, treats of the books in the following order (Assem. Bibl. Orient. 4. 282) . the Pentateuch, Josh., Judg., 1 & 2 Sam. Ps., 1 & 2 K., Prov., Ecclus., Eccl., Cant., Wisd.

1 & 2 Macc., Judith, (Baruch?), Apocalypse, Epis James, 1 Pet., 1 John.

In the Scriptural Vocabulary of Jacob of Edease (Assem. L c. p. 499), the order and number of the books commented upon is somewhat different: Pent., Josh., Judg., Joh, 1 & 2 Sam., David (i. e. Ps.), 1 & 2 K., Is., 12 Proph., Jer., Lam., Burnech, Ez., Dan., Prov., Wied., Cant., Ruth, Esth., Judith, Ecclus., Acta, Epist. James, 1 Pet., 1 John, 14 Epist. of St. Paul, 4 Gosp., omitting 1 & 2 Chr., Ezr., Neh., Eccl., Tobit, 1 & 2 Macc., Apoc (comp. Assem. Bibl. Orient. iii. 4 not.).

The Catalogue of Ebed-Jesu (Assem. Bibl. Orient., iii. 5 ff.) is rather a general survey of all the Hebrew and Christian literature with which he was acquainted (Catalogus librorum omnium Ecclesias-ticorum) than a Canon of Scripture. After enumerating the books of the Hebrew Canon, togethes with Ecclus., Wisd., Judith, add. to Dan., and Bo ruch, he adds, without any break, "the traditions of the Elders " (Mishnah), the works of Josephus, including the Fables of Æsop which were popularly ascribed to him, and at the end mentions the " book of Tubias and Tubit." In the like manner after enumerating the 4 Gosp., Acts, 3 Cath. Epist. and 14 Epist. of St. Paul, he passes at once to the Distessaron of Tatian, and the writings of "the disciples of the Apostles." Little dependence, rowever, can be placed on these lists, as they rest on no critical foundation, and it is known from other sources that varieties of opinion on the subject of the Canon existed in the Syrian Church (Assem. Bibl. Orient. iii. 6 not.).

One testimony, however, which derives its origin from the Syrian Church, is specially worthy of notice. Junilius, an African bishop of the 6th century, has preserved a full and interesting account of the teaching of Paulus, a Persian, on Holy Scripture, who was educated at Nisibis where " the Divine Law was regularly explained by public masters," as a branch of common education (Junil De part. [div.] leg. Proof.). He divides the outer of the Bible into two classes, those of " perfect," and those of "mean" authority [media auctoritatis]. The first class includes all the books of the Hebrew Canon with the exception of 1 & 2 Chr., Job, Canticles, and Esther, and with the addition of Ecclesiasticus. The second class consists of Chronicles (2), Job, Esdras (2), Julith, Esther, and Maccabees (2), which are added by "very many" (plurimi) to the Canonical books. The remaining books are pronounced to be of no authority, and of these Canticles and Wisdom are said to be added by "some" (quidam) to the Canon. The classification as it stands is not without difficulties, but it deserves more attention than it has received (comp. Hody, p. 653; Gallandi, Bib-lioth. xii. 79 ff. [Migne, Patrol. Lat. vol. lxviii.] The reprint in Wordsworth, On the Canon, App. A., pp. 42 ff., is very imperfect). [See Westcott's Canon of the N. T., 2d ed., pp. 485-87.]

The Armenian Canon, as far as it can be ascertained from wittions, follows that of the LXX., but it is of no critical authority; and a similar remark applies to the Æthiopian Canon, though it is more easy in this case to trace the changes through which it has passed (Dillmann, Ueber d. Ælk Kar 'n Ewald' Jahrbücher, 1853, pp. 144 ff.).

In addition to the books already quoted under Ruth, Hist. Suc., Job, Is., 12 Proph., Jer., Lam., the bads for which they are specially valuable, En, Dan., Bel, 4 Gosp., Acts . 14 Epist. of St. some still remain to be noticed. C F Schnid,

Hist. ant. et Vindic. Can. S. Vet. et Nov. Test. Lips. 1775; [H. Corrodi], Versuch einer Beleuchtung. . . d. Bibl. Kanons, Halle, 1792: Movers, Loci quidam Hist. Can. V. T. illustrati, Breslau, 1842. The great work of Hody (De Biblior. Text., Uxon. 1705) contains a rich store of materials, though even this is not free from minor errors Stuart's Critical History and Defence of the Old Test. Canon, London, 1849 [Audover, 1845] is rather an apology than a history. [It has particu-lar reference to Mr. Norton's "Note on the Jewish Dispensation, the Pentateuch, and the other Books of the Old Testament," in vol. ii. of his Evidences of the Genuineness of the Gospels, Cambridge, 1844 (pp. xlviii.-cciv. of the 2d ed., 1848), in which the Mosaic authorship of the Pentateuch was denied. See also Palfrey, Lectures on the Jewish Scriptures, Boston, 1838, etc. i. 20-42; De Wette, Einl. in die Bücher des A. T., 6° Aufl. 1852, pp. 13-46, or Parker's (often inaccurate) translation, i. 20-119, and Appendix, pp. 412-28; Dillmann, Ueber die Bildung der Sammlung heiliger Schriften A. T. (in the Jahrb. f. deutsche Theol. 1858, iii. 419–91); Bleek, Linl. in dus A. T., Berlin, 1860, pp. 662-716, and the references ander the art. APOCRYPHA. - A.]

IV. The history of the Canon of the New Tes ument. - The history of the Canon of the N. T. presents a remarkable analogy to that of the Canon of the O. T. The beginnings of both Cauons are obscure, from the circumstances under which they arose; both grew silently under the guidance of an inward instinct rather than by the force of external authority; both were connected with other religious literature by a series of books which claimed a partial and questionable authority; both gained definiteness in times of persecution. The chief difference lies in the general consent with which all the churches of the West have joined in ratifying one Canon of the N. T., while they are divided as to the position of the O. T. Apocrypha.

The history of the N. T. Canon may be conveniently divided into three periods. The first extends to the time of Hegesippus (c. A. D. 170), and includes the era of the separate circulation and gradual collection of the Apostolic writings. The second is closed by the persecution of Diocletian (A. D. 303), and marks the separation of the sacred writings from the remaining Ecclesiastical literature. The third may be defined by the third Council of Carthage (A. D. 397), in which a catalogue of the books of Scripture was formally ratified by conciliar authority. The first is characteristically a period of tradition, the second of speculation, the third of authority; and it is not difficult to trace the features of the successive ages in the course of the history of the Canon.

1. The history of the Canon of the New Testament to 170 A. D. - The writings of the N. T. themselves contain little more than faint, and pernaps unconscious intimations of the position which hey were destined to occupy. The mission of the Apostles was essentially one of preaching and not of writing; of founding a present church and not of legislating for a future one. The "word" is essentially one of "hearing," "received," and "handed down," a "message," a "proclamation."

a The late tradition commonly quoted from Photius Bibliot4. 254) to show that St. John completed the Canon, refers only to the Gospels : rows rouous of aneer diadópois yaworais to europia rou italicized throughout, for convenience of reference

Written instruction was in each particular .see only occasional and fragmentary; and the completeness of the entire collection of the incidental records thus formed is one of the most striking proofs of the Providential power which guided the natural development of the church. The prevailing method of interpreting the O. T., and the peculiar position which the first Christians occupied, as standing upon the verge of "the coming age" (aiwr), seemed to preclude the necessity and even the use of a "New Testament." Yet even thus, though there is nothing to indicate that the Apostles regarded their written remains as likely to preserve a perfect exhibition of the sum of Christian truth coordinate with the Law and the Prophets, they claim for their writings a public use (1 Thess. v. 27; Col. iv. 16; Rev. xxii. 18), and an authoritative power (1 Tim. iv. 1 ff.; 2 Thess. iii. 6; Rev. xxii. 19); and, at the time when 2 Peter was written, which on any supposition is an extremely early writing, the Epistles of St. Paul were placed in sig-nificant connection with "the other Scriptures" a (τ as λοιπ as γραφds, not τ as aλλas γραφds). The transition from the Apostolic to the sub-

Apostolic age is essentially abrupt and striking. An age of conservatism succeeds an age of creation; but in feeling and general character the period which followed the working of the Apostles seems to have been a faithful reflection of that which they moulded. The remains of the literature to which it gave birth, which are wholly Greek, are singularly scanty and limited in range, merely a few Letters and "Apologies." As yet, writing among Christians was, as a general rule, the result of a pressing necessity and not of choice; and under such circumstances it is vain to expect e ther a distinct consciousness of the necessity of a written Canon, or any clear testimony as to its limits.

The writings of the APOSTOLIC FATHERS (c. 70-120 A. D.) are all occasional. They sprang out of peculiar circumstances, and offered little scope for quotation. At the same time the Apostolic tradition was still fresh in the memories of men, and the need of written Gospels was not yet made evident by the corruption of the oral narrative. As a consequence of this, the testimony of the Apostolic fathers is chiefly important as proving the general currency of such outlines of history and types of doctrine as are preserved in our Canon. They show in this way that the Canonical books offer an adequate explanation of the belief of the next age, and must therefore represent completely the earlier teaching on which that was based. In three places, however, in which it was natural to look for a more distinct reference, Clement (Ep. 47), Ignatius (ad Eph. 12), and Polycarp (Ep. 8) refer to Apostolic Epistles written to those whom they were themselves addressing. The casual coincidences of the writings of the Apostolic fathers with the language of the Epistles are much more extensive. With the exception of the Epistles of Jude, 2 Peter. and 2, 3 John," with which no coincidences occur, and 1, 2 Thessalonians, Colossians, Titus, and Philemon, with which the coincidences are very questionable, all the other Epistles were clearly known, and used by tkem; but still they are not quoted with the formulas which pre-

бесто́точ паву те кај вайµата кај бъба́уµата . . . вы ταξε τε καὶ συνδιήρθρωσε.... ^b The titles of the disputed books of the N. T. an

Acc citations from the O. T. ($\eta \gamma \rho a \phi^{\dagger} \lambda \delta' \gamma \epsilon$, $\gamma \epsilon'_{-}$ ence upon the form of popular quotations, and per-persurat, dc.); a nor is the famous phrase of Igna-tins (ad Philad. 5, $\pi \rho o \sigma \phi u \gamma \omega \tau \hat{\varphi}$ ebayy $\epsilon \lambda \delta' \varphi \omega s$; but where the question of authority was σποκί 'Ιησοῦ και τοῖς ἀποστόλοις ὡς πρεσβυτεoig inkanglas) sufficient to prove the existence of a collection of Apostolic records as distinct from the sum of Apostolic teaching. The coincidences with the Gospels, on the other hand, both in fact and substance are numerous and interesting, but such as cannot be referred to the exclusive use of our present written Gospels. Such a use would have been alien from the character of the age, and inconsistent with the influence of a historical tradition. The details of the life of Christ were still too fresh to be sought for only in fixed records; and even where memory was less active, long habit interposed a barrier to the recognition of new Scriptures. The sense of the infinite depth and paramount authority of the O. T. was too powerful even among Gentile converts to require or to admit of the immediate addition of supplementary books. But the sense of the peculiar position which the Apostles occupied, as the original inspired teachers of the Christian church, was already making itself felt in the sub-apostolic age; and by a remarkable agreement Clement (ad Cor. i. 7, 47) Polycarp (ad Phil. 3), Ignatius (ad Rom. 4) and Barnabas (c. 1) draw a clear line between themselves and their predecessors, from whom they were not separated by any lengthened intervals of time. As the need for a definite standard of Christian truth became more pressing, so was the character of those in whose writings it was to be sought more distinctly apprehended.

The next period (120-170 A. D.), which may be fitly termed the age of the Apologists, carries the history of the formation of the Canon one step fur-The facts of the life of Christ acquired a ther. fresh importance in controversy with Jew and Gentile. The oral tradition, which still remained in the former age, was dying away, and a variety of written documents claimed to occupy its place. Then it was that the Canonical Gospels were definitely separated from the mass of similar narratives in virtue of their outward claims, which had remained, as it were, in abeyance during the period of tradition. The need did not create, but recognized them. Without doubt and without controversy, they occupied at once the position which they have always retained as the fourfold Apostolic record of the Saviour's ministry. Other narratives remained current for some time, which were either interpolated forms of the Canonical books (The Gospel according to the Hebrews, &c.), or independent traditions (The Gospel according to the Egyptians, &c.), and exercised more or less influ-

• The exceptions to this statement which occur in be Latin versions of Polycarp (ad Phil. c. 12 "ut us Scripturis dictum est," Ps. iv. 4; Eph. iv. 26), and daruabas (c. 4 "sicut scriptum est," Matt. xx. 16), cannot be urged against the uniform practice which is observed in the original texts. Some of the most remarkable Evangelic citations are prefaced by [Kúptos] elwer, not Aryes, which seems to show that they were serived from tradition and Lot from a written narraive (Clem. Ep. 18, 46).

The correctness of the old Latin version of Barna bas in c. 4, "slout scriptum est," is now confirmed by the Order Sinaiticus, which reads is ydyparray. This is interesting as perhaps the earliest example which has come down to us of an express quotation of a book of the N. T. as Scripture. ۸.

haps in some cases upon the text of the Canonical Gospels; but where the question of authority was raised, the four Gospels were ratified by universal consent. The testimony of JUSTIN MARTYR († c. 246 A. D.) is in this respect most important.^b An impartial examination of his Evangelic references, if conducted with due reference to his general manner of quotation, to possible variations of reading, and to the nature of his subject, which excluded express citations from Christian books, shows that they were derived certainly in the main, probably exclusively, from our Synoptic Gospels, and that each Gospel is distinctly recognized by him (Dial. c. Tryph. c. 103, p. 331, D, in yao rois άπομνημονεύμασιν & φημί ύπο των άποστό λων (Matthew, John) αυτοῦ καὶ τῶν ἐκείνοις παρακολουθησάντων (Mark, Luke) συντετάχθαι . . . Comp. Diul. c. 49 with Matt. xvii. 13; Dial. c. 106 with Mark iii. 16, 17; Dial. c. 105 with Luke xxiii. 46). The references of Justin to St. John are less decided (comp. Apol. i. 61; Dial. [88,] 63, 123, 56, &c.; Otto, in Illgen's Zeitschrift, u. s. w. 1841, pp. 77 ff. 1843, pp. 84 ff.); and of the other books of the N. T. he mentions the Apocalypse only by name (Dial. c. 81), and offers some coincidences of language with the Pauline Epistles.

The evidence of PAPIAS (c. 140-150 A. D.) is nearly contemporary with that of Justin, but goes back to a still earlier generation ($\delta \pi \rho \epsilon \sigma \beta b \tau \epsilon \rho o s$ Exerce). In spite of the various questions which have been raised as to the interpretation of the fragments of his " Enarrations " preserved by Eusebius (H. E. iii. 89) it seems on every account most reasonable to conclude that Papias was acquainted with our present Gospels of St. Matthew and St. Mark, the former of which he connected with an earlier Hebrew original (houthvevoe); and probably also with the Gospel of St. John (Frag. xi. Routh; comp. Iren. v. sub fin.), the former Epistles of St. John and St. Peter (Euseb. H. E. iii. 24), and the Apocalypse (Frag. viii.).

Meanwhile the Apostolic writings were taken by various mystical teachers as the foundation of strange schemes of speculation, which are popularly confounded together under the general title of Gnosticism, whether Gentile or Jewish in their origin. In the earliest fragments of Gnostic writers which remain there are traces of the use of the Gospels of St. Matthew and St. John, and of 1 Corinthians ('Anópasis µeydan [Simon M.] ap. Hippol. adv. Har. vi. 16, 9, 13) and the Apocalypse was attributed by a confusion not difficult of explanation to Cerinthus (Epiph. Har. li. 3). In other Gnostic (Ophite) writings a little later there

b . The date 246 is doubtless a misprint for 146; but the year of Justin's death is uncertain. Mr. Hort, in an able article in the Journal of Class. and Sacred Philology for June 1856 (iii. 191), assigns it to A. D. 148; most scholars have placed it in the neighborhood of A. D. 165. On this subject, and on the date of Jus tin's writings, see Donaldson, Hist. of Christian Lif and Doctrine, il. 78 f., 82 fl., Lond. 1866. A.

• Frag. zl. of Routh above referred to has been shown to belong to another Papias, who lived in the eleventh century. See J. B. Lightfoot, St. Paul's Re to the Galatians, 2d ed., 1868, p. 285, note.

c A fragment of Papias's Commentary on the Apoc alypse is preserved in the Commentary published by Cramer, Cat. in Apoc. p. 880, which is not noticed / y Bouth.

370

are references to St. Matthew, St. Luke, St. John, | (superscript: or "which hear the mains of John Romans, 1, 2 Corinthians, Galatians, Ephesians Hebrews (Hist. of N. T. Canon, pp. 813 ff. [249 ff., 2d ed.]); and the Clementine Homilies contain clear coincidences with all the Gospels (Hom. xix. 20 St. Mark; Hom. xix. 22 St. John). It is, indeed, in the fragments of a Gnostic writer, Basilides (c. 125 A. D.), that the writings of the N. T. are found quoted for the first time in the same manner as those of the O. T. (Basil. up. Hipp. adv. Hor. p. 238, yeypawrau; 240, n ypaph, &c.). [See, however, the addition to note a, p. 369.] A Gnostic, Heracleon, was the first known commentator on the Christian Scriptures. And the history of another Gnostic, Marcion, furnishes the first distinct evidence of a Canon of the N. T.

The need of a definite Canon must have made itself felt during the course of the Gnostic controversy. The common records of the life of Christ may be supposed to have been first fixed in the discussions with external adversaries. The standard of Apostolic teaching was determined when the Church itself was rent with internal divisions. The Canon of MARCION (c. 140 A. D.) contained both elements, a Gospel ("The Gospel of Christ") which was a mutilated recension of St. Luke, and an "Apostle" or Apostolicon, which contained ten Epistles of St. Paul - the only true Apostle in Marcion's judgment --- excluding the pastoral Epistles, and that to the Hebrews (Tert. adv. Marc. v.; Epiph. adv. Har. xlii.). The narrow limits of this Canon were a necessary consequence of Marcion's belief and position, but it offers a clear witness to the fact that Apostolic writings were thus early regarded as a complete original rule of doctrine. Nor is there any evidence to show that he regarded the books which he rejected as unauthentic. The conduct of other heretical teachers who professed to admit the authority of all the Apostles proves the converse; for they generally defended their tenets by forced interpretations, and not by denying the authority of the common records. And while the first traces of the recognition of the divine inspiration and collective unity of the Canon comes from them, it cannot be supposed, without inverting the whole history of Christianity, that they gave a model to the Catholic Church, and did not themselves simply perpetuate the belief and custom which had grown up within it.

The close of this period of the history of the N. T. Canon is marked by the existence of two important testimonies to the N. T. as a whole. Hitherto the evidence has been in the main fragmentary and occasional; but the MURATORIAN CANON in the West, and the PESHITO in the East, deal with the collection of Christian Scriptures as such. The first is a fragment, apparently translated from the Greek, and yet of Roman origin, mutilated both at the beginning and the end, and written, from internal evidence, about 170 A. D. It commences with a clear reference to St. Mark's Gospel, and then passes on to St. Luke as the third, St. John, the Acts, thirteen Epistles of St. Paul. The first Epistle of St. John is quoted in the text; and then afterwards it is said that "the Epistle of Jude and two Epistles of the John mentioned above

a We have given what appears to be the meaning of the corrupt text of the passage. It would be out of place to discuss all the disputed points here; comp. Hist. of N. T. Canon, pp. 242, [184, 2d ed.] fl., and grances there given.

superscripto) are reckoned among the Catholic [Epistles] (MS. Catholica, i. e. Ecclesia?)." "We receive moreover the Apocalypses of John and Peter only, which [latter] some of our body will not have read in the Church." a Thus the catalogue omit: of the books received at present the Epistle of James, the Epistle to the Hebrews, and 2 Peter while it notices the partial reception of the Revelation of Peter. The Canon of the Peshito forms a remarkable complement to this catalogue. It includes the four Gospels and the Acts, fourteen Epistles of St. Paul, 1 John, 1 Peter, and James, omitting Jude, 2 Peter, 2, 3 John, and the Apocalypse ; and this Canon was preserved in the Syrian Churches as long as they had an independent literature (Ebed Jesu † 1318 A. D. ap. Assem. Bibl. Or. iii. pp. 3 ff.). Up to this point, therefore, 9 Peter is the only book of the N. T. which is not recognized as an Apostolic and authoritative writing; and in this result the evidence from casual quotations coincides exactly with the enumeration in the two express catalogues

2. The history of the Canon of the N. T. from 170 A. D. to 303 A. D. - The second period of the history of the Canon is marked by an entire change in the literary character of the Church. From the close of the second century Christian writers take the foremost place intellectually as well as morally; and the powerful influence of the Alexandrine Church widened the range of Catholic thought, and checked the spread of speculative heresies. From the first the common elements of the Roman and Syrian Canons, noticed in the last section, form a Canon of acknowledged books, regarded as a whole, authoritative and inspired, and coordinate with the O. T. Each of these points is proved by the testimony of contemporary fathers who represent the Churches of Asia Minor, Alexandria and North Africa. IRENAUS, who was connected by direct succession with St. John (Euseb. H. F. v. 20), speaks of the Scriptures as a whole, without distinction of the Old or New Testaments, as " perfect, inasmuch as they were uttered by the Word of God and His Spirit" (Adv. Hor. ii. 28, 2). " There could not be," he elsewhere argues, "more than four Gospels or fewer" (Adv. Har. iii. 11, 8 ff.). CLEMENT of ALEXANDRIA, again, marks " the Apostle " (& andorrohos, Strum. vii. 3, § 14; sometimes aroorohou) as a collection definite as "the Gospel," and combines them "as Scriptures of the Lord" with the Law and the Prophets (Strom. vi. 11, § 88) as "ratified by the authority of one Almighty power" (Strom. iv. 1, § 2). TERTUL LIAN notices particularly the introduction of the word Testament for the earlier word Instrument, as applied to the dispensation and the record (adv Marc. iv. 1), and appeals to the New Testament, as made up of the "Gospels" and "Apostles' (Adv. Prax. 15). This comprehensive testimony extends to the four Gospels, the Acts, 1 Peter, 1 John, thirteen Epistles of St. Paul, and the Apocolapse; and, with the exception of the Apocalypse, no one of these books was ever afterwards rejected or questioned till modern times.^b

But this important agreement as to the principal contents of the Canon left several points still und cided. The East and West, as was seen in the last

^b The Manichess offer no real exception to the truth of this runark. Comp. Beausebre, Hist d Manich., i. 297 f.

notion, severally received some books which were | as they were emphatically called, created a schis sot universally accepted. So far the error lay in in the Church. The Donatists, who maintained lefect; but in other cases apocryphal or unapostolic books obtained a partial sanction or a popular use, before they finally passed into oblivion. Both these phenomena, however, were limited in time and range, and admit of explanation from the internal character of the books in question. The examination of the claims of the separate writings belongs to special introductions; but the subjoined table (No. III.) will give a general idea of the extent and nature of the historic evidence which bears upon them.

This table might be much extended by the insertion of isolated testimonies of less considerable writers. Generally, however, it may be said that of the "disputed" books of the N. T., the Apocalupse was universally received, with the single exception of Dionysius of Alexandria, by all the writers of the period; and the *Epistle to the He*brews, by the Churches of Alexandria, Asia (?) and Syria, but not by those of Africa and Rome. The Epistles of St. James and St. Jude, on the other hand, were little used, and the Second Ep. of St. Peter was barely known.

But while the evidence for the formation of the Canon is much more copious during this period than during that which preceded, it is essentially of the same kind. It is the evidence of use and not of inquiry. The Canon was fixed in ordinary practice, and doubts were resolved by custom and not by criticism. Old feelings and beliefs were perpetuated by a living tradition; and if this habit of mind was unfavorable to the permanent solution of difficulties, it gives fresh force to the claims of the acknowledged books, which are attested by the witness of every division of the Church (ORIGEN, CYPRIAN, METHODIUS), for it is difficult to conceive how such unanimity could have arisen except from the original weight of apostolical authority. For it will be observed that the evidence in favor of the acknowledged books as a whole is at once clear and concordant from all sides as soon as the Christian literature is independent and considerable. The Canon preceded the literature and was not determined by it.

3. The history of the N. T. Canon from A. D. 303-397. - The persecution of Diocletian was directed in a great measure against the Christian writings (Lact. Instit. v. 2; de Mort. Persec. 16). The influence of the Scriptures was already so great and so notorious, that the surest method of destroying the faith seemed to be the destruction of the records on which it was supported. The plan of the emperor was in part successful. Some were found who obtained protection by the surrender of the sacred books, and at a later time the question of the readmission of these " traitors " (traditores),

³ The enumeration of the Pauline Epistles marks the doubt which had existed as to the Hebrews : Episble Pauli Apostoli xiii.; ejusdem ad Hebreeos una. n the Council of Hippo (Cas. 36) the phrase is simply "xiv. Epistles of St. Paul." Generally it may be abserved that the doubt was in many, if not in most, uses as to the authorship, and not as to the canonicity If the 1 tter. Comp. Hieron. Ep. ad Dard., 129, § 8.

• The MSS. of the Vulgate from the sixth century iswnwards wry frequently contain the apocryphal **Epistic** to the Laodiceans among the Pauline Epistics, merally after the Epistle to the Colossians, but also

the sterner judgment on their crime, may be regarded as maintaining in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture which was the occasion of the dissension; and Augustine allows that they held in common with the Catholics the same "Canonical Scriptures," and were alike "bound by the authority of both Testaments" (August. c. Cresc. i. 81, 57; Ep. 129, 3). The only doubt which can be raised as to the integrity of the Donatist Canon arises from the uncertain language which Augustine himself uses as to the Epistle to the Hebrews, which the Donatists may also have countenanced. But, however this may have been, the complete Canon of the N. T., as commonly received at present, was ratified at the third COUNCIL OF CAR-THAGE (A. D. 397)," and from that time was accepted throughout the Latin Church (JEROME, INNOCENT. RUFINUS, PHILASTRIUS), though occasional doubts as to the Epistle to the Hebrews still remained b (Isid. Hisp. *Procem.* §§ 85-109).

Meanwhile the Syrian Churches, faithful to the conservative spirit of the East, still retained the Canon of the Peshito. CHEYSOSTOM († 407 A. D.), THEODORE of MOPSUESTIA († 429 A. D.), and THEODORET, who represent the Church of Antioch, furnish no evidence in support of the Epistlee of Jude, 2 Peter, 2, 3 John, or the Apocalypse. JU-NILIUS, in his account of the public teaching at Nisibis, places the Epistles of James, Jude, 2, 3 John, 2 Peter in a second class, and mentions the doubts which existed in the East as to the Apocalypee. And though EPHREM SYRUS was acquainted with the Apocalypse (Opp. Syr. ii. p. 332 C), yet his genuine Syrian works exhibit no habitual use of the books which were not contained in the Syrian Canon, a fact which must throw some discredit upon the frequent quotations from them which occur in those writings which are only preserved in a Greek translation.^c

The Churches of Asia Minor seem to have occupied a mean position as to the Canon between the East and West. With the exception of the Apocalypse, they received generally all the books of the N. T. as contained in the African Canon, but this is definitely excluded from the Catalogue of GREG-ORY OF NAZIANZUS (†c. 389 A. D.), and pronounced "spurious" (robor), on the authority of "the majority " (of *a*lelous), in that of AMPHILO-CHIUS (c. 380 A. D.), while it is passed over in silence in the Laodicene Catalogue, which, even if it has no right to its canonical position, yet belongs to the period and country with which it is commonly connected. The same Canon, with the same omission of the Apocalypse, is given by CYRIL of JERUBALEM († 886 A. D.); though EPIPHA-

it occurs after the Apocalypee, differs in several respects from any of Anger's MSS. Comp. Anger, Der Laodice-nerbrief, Leips. 1848, pp. 142 ff. The Greek title in G (not F), most Acoustaneous experse, is apparently only a rendering of the Latin title from the form of the ording to four MSS. In the British Museum, is given by Mr. Westcott in his Hüstory of the Canon of the V. T., 2d ed., App. E.] c • On the doubtful genuineness of the Greek writ-

CANON

a: * a direct quotation : T an expression of doubt : () an uncertain reference : f a clear rejection : [] that the eridence is supplement, or Just an uncertain as to the authority avaigned to the book.

stus, who was his fellow-countryman and contemporary, confirms the Western Canon, while he no-lices the doubts which were entertained as to the Apocalypse. These doubts prevailed in the Church of Constantinople, and the Apo suggest does not seem to have been recognized mere down to a late period, though in other respects the Constantinopolitan Canon was complete and pure (NICEPHO-RUS, PHOTIUS, ŒCUMENIUS, THEOPHYLACT, t c. 1077 A. D.).

The well-known Festal Letter of ATHANASIUS († 373 A. D.) bears witness to the Alexandrine Canon. This contains a clear and positive list of the books of the N. T. as they are received at presant; and the judgment of Athanasius is confirmed by the practice of his successor CYRIL.

One important Catalogue yet remains to be mentionad. After noticing in separate places the origin and use of the Gospels and Epistles, EUSEBIUS sum up in a famous passage the results of his inqu'ry into the evidence on the Apostolic books furn shed by the writings of the three first centuries (H. E. iii. 25). His testimony is by no means free from difficulties, nor in all points obviously consistent, but his last statement must be used to fix the interpretation of the former and more cursory actices. In the first class of acknowledged bookn ($\delta\mu o\lambda o\gamma o \dot{\nu}\mu \epsilon \nu a$) he places the four Gospels, the 1 pistles of St. Paul (i. e. fourteen, H. E. iii. 3), 1 John, 1 Peter, and (et ye pavely) in case its authe sticity is admitted (such seems to be his meaning), he Apocalypse. The second class of disputed book (derikeyóµera) he subdivides into two parts, the f st consisting of such as were generally known and .ecognized (γνώριμα τοῖς πολλοῖς), including the I pistles of James, Jude, 2 Peter, 2, 3 John; and the second of those which he pronounces spurious ($\nu \delta \theta a$), that is which were either unauthentic or unspostolic, as the Acts of Paul, the Shepherd, the Apocalypse of Peter, the Apocalypse of John (if not a work of the Apostle), and according to some the Gospel according to the Hebrews. These two preat classes contain all the books which had received ecclesiastical sanction, and were in common distis guished from a third class of heretical forgeries (. g. the Gospels of Thomas, Peter, Matthias åc.).

One point in the testimony of Eusebius is particularly deserving of notice. The evidence in favor of the apostolic authority of 2 Peter which can be derivid from the existing writings of the first three conturies is extremely slender; but Eusebius, who possessed more copious materials, describes it as get erally well known;" and this circumstance alone suggests the necessity of remembering that te early Catalogues rest on evidence no longer . vailable for us. In other respects the classification of Eusebius is a fair summary of the results which follos from the examination of the extant ante-Nice of literature.

The evidence of later writers is little more than the repetition or combination of the testimonies already quoted. An examination of table No. IV., ... 1/4, which includes the most important Cacher Cachup, ly the most important omissions.

t the era of the Reformation the question of Lac N. T. Canon became again a subject of great Caistan, Prof. od Epp. ad Hebr., Jac. 2, 3 John, iss gh parfial interest. The hasty decree of the Jud.) were divided. The omission cannot have Co-acil of Trent, which affirmed the authority of

opposition of controversialists, who quoted and en forced the early doubts. ERASMUS with charac-teristic moderation denied the spostolic origin of the Epistle to the Hebrews, 2 Peter, and the Apocalypse, but left their canonical authority unquestioned (Proof. ad Antilegom.). LUTHER, on the other hand, with bold self-reliance, created a purely subjective standard for the canonicity of the Scriptures in the character of their "teaching of Christ, and while he placed the Gospel and first Epistle of St. John, the Epistles of St. Paul to the Romans, Galatians, Ephesians, and the first Epistle of St. Peter, in the first rank as containing the "kernel of Christianity," he set aside the Epistle to the Hebrews, St. Jude, St. James, and the Apocalypse at the end of his version, and spoke of them and the remaining Antilegomena with varying degrees of disrespect, though he did not separate 2 Peter and 2, 3 John from the other Epistles (comp. Landerer, Art. Kanon in Herzog's Encyklop. p. 295 ff.). The doubts which Luther rested mainly on internal evidence were variously extended by some of his followers (MELANCTHON, Centur. Magdeb., FLACIUS, GERHARD: comp. Reuss, § 334); and especially with a polemical aim against the Romish Church by CHEMNITZ (Exam. Conc. Trid. i. 73). But while the tendency of the Lutheran writers was to place the Antilegomena on a lower stage of authority, their views received no direct sanction in any of the Lutheran symbolic books, which admit the "prophetic and apostolic writings of the Old and New Testaments," as a whole, without further classification or detail. The doubts as to the Antilegomena of the N. T. were not confined to the Lutherans. CARLSTADT, who was originally a friend of Luther and afterwards professor at Zurich, endeavored to bring back the question to a critical discussion of evidence, and placed the Antilegomena in a third class "on account of the controversy as to the books, or rather (ut certius loquar) as to their authors" (De Can. Script. pp. 410-12, ed. Credn.). CALVIN, while he denied the Pauline authorship of the Epistle to the Hebrews, and at least questioned the authenticity of 2 Peter, did not set saide their canonicity (Proof. ad Hebr.; ad 2 Petr.); and he notices the doubts as to St. James and St. Jude only to dismiss them.

The language of the Articles of the Church of England with regard to the N. T. is remarkable. In the Articles of 1552 no list of the books of Scripture is given; but in the Elizabethan Articles (1562, 1571) a definition of Holy Scripture is given as "the Camunical books of the Old and New Testament, of whose authority was never any doubt in the Church" (Art. vi.). This definition is fol-lowed by an enumeration of the books of the O. T. and of the Apocrypha; and then it is said summarily, without a detailed catalogue, "all the books of the N. T., as they are commonly received, we do receive and account them for Canonical (pro Canonicis habemus)." A distinction thus remains between the "Canonical" books, and such "Canonical books as have never been doubted in the Church;" and it seems impossible to avoid the conclusion that the framers of the Articles intended to leave a freedom of judgment on a point on which the greatest of the continental reformers, and even of Romish scholars (Sixtus Sen. Biblioth. S. i. 1; arisen solely from the fact that the Article in quesis the books commonly received, called out the tion was framed with reference to the Church of

Some, with which the Church of England was agreed on the N. T. Canon; for all the other Protsstant confessions which contain any list of books, give a list of the books of the New as well as of the Old Testament (Conf. Belg. 4; Conf. Gall. 3; Conf. Füd. 1). But if this license is rightly conseded by the Anglican Articles, the great writers of the Church of England have not availed themselves of it. The early commentators on the Articles take little (Burnet) or no notice (Beveridge) of the doubts as to the Antilegomena; and the chief controversialists of the Reformation accepted the shift Canon with emphatic avowal (Whitaker, Disp. on Scripusce, cuiv. 105; Fulke's Defence of Eng. Trans. p. 8; Jewel, Defence of Apol. ii. 9, 1).

The judgment of the Greek Church in the case of the O. T. was seen to be little more than a reflection of the opinions of the West. The difference between the Roman and Reformed Churches on the N. T. was less marked; and the two conficting Greek confessions confirm in general terms, without any distinct enumeration of books, the popular Canon of the N. T. (Cyr. Luc. Conf. i. 42; Dosith. Confess. i. 467). The confession of ME-FROPHANES gives a complete list of the books; and compares their number - thirty-three - with the years of the Saviour's life, that "not even the number of the Sacred books might be devoid of a di vine mystery " (Metroph. Critop. Conf. ii. 105, Ed. Kimm et Weissenb.). At present, as was already the case at the close of the 17th century (Leo Allatius, ap. Fabric. Bibl. Greec. v. App. p. 38), the Antilegomena are reckoned by the Greek Church as equal in Canonical authority in all respects with the remaining books (Catechism, l. c. supr.).

The assaults which have been made, especially during the present century, upon the authenticity of the separate books of the Old and New Testaments belong to the special articles. The general course which they have taken is simple and natural Semler (Untersuch. d. Kan. 1771-5) first led the way towards the later subjective criticism, though he rightly connected the formation of the Canon with the formation of the Catholic Church, but without any clear recognition of the providential power which wrought in both. Next followed a series of special essays in which the several books were discussed individually with little regard to the place which they occupy in the whole collection (Schleiermacher, Bretschneider, De Wette, &c.). At last an ideal view of the early history of Chris-tianity was used as the standard by which the books were to be tried, and the books were regarded as results of typical forms of doctrine and not the sources of them (F. C. Baur, Schwegler, Zeller). All true sense of historic evidence was thus lost. The growth of the Church was left without explanation, and the original relations and organic unity of the N. T. were disregarded.

For the later period of the history of the N. T. Canon, from the close of the second century, the great work of Lardner (*Credibility of the Gospel History*, Works, i.-vi. Ed. Kippis, 1788) furnishes ample and trustworthy materials. For the earlier period his criticism is necessarily imperfect, and requires to be combined with the results of later inquiries. Kirchhofer's collection of the original passages which bear on the history of the Canon (*Quellensonmiung*, u. s. v., Zürich, 1844) is useful and fairly complete, but frequently inaccurate.

NOTES ON TABLE NO. IV.

1 The emission of the Apoenlypse is frequently explained by the expressed object of the Catalogue, as a first of books for public exclessionical use: 5 ora de Ref. Ma dreyerierneodes, compared with the former canon: for so bei iduarized walkoole Myeordas de r_{f}^{2} declaysing, e. τ , λ . Yet compare the Catalogue of Cyril.

² The Catalogue adds likewise the Apostolical Constitutions ($\delta arayai$... $\dot{e} \delta aras \beta_i \beta \lambda (asc_i)$ for excitoric use. When the Catalogue was confirmed in the Quinisextine Council (Can. 2), the Constitutions ware exaluded on the ground of corruptions; but no notice was taken of the Epistes of Clement, both of which, as is well known, are found at the end of the Cod. Alex., and are mentioned in the index before the general summary of books; which again is followed by the titlee of the Apocryphal Pasims of Solomon.

8 He adds also " the Apostolic Canons," and according to one MS. the two Epistles of Clement.

4 The other chief passinges in Rusebius are, H. S. M. S. 24; il. 23. His object in the passage quoted is invariations of a state of the second
6 At the end of the list Athanasius says (comp. abovs), mesis τούτοις ἐπιβαλλέτω, μηθὲ τούτων ἀφαιρείσθω τι. 7 Amphiloch. l. c.:

τινής δὲ φασὶ τὴν πρὸς Ἐβραίους νόθου, οὐκ σὲ λογοντος γνησία γὰρ ἡ χάρος. ϵἶθν τί λοικών ἐπιστολαιν τινής μὸν ἀπτὰ φασίν, οἱ δὲ τροῖς μόσοο χρήπα δίχεσθαι, τὴν Τ΄ Ἰωτάντου μίαν μίαν δὲ Πίτρου, τὴν τ΄ Ἰωτάντου μίαν την ὅ ᾿Αποκάλυψιν τὴν Ἰωτάντου πάλιο τινής μὰν ἐγαρίστουν, οἱ πλαίοοι δέ γο τόδο λέγουςυ. Οὐτος ἀψαυδόστατας είδου λέγουςυ. 8 This Canon of Ohrysostom, which agrees with that of the Peshito, is fully supported by the casual evidence of the quotations which occur in his works. The quotation from 2 Peter, which is found in *Hom.* is Jonns. 34 (33), tom. vili. p. 230 (ed. Par.), stands alone. Suidas' assertion (s. v. *Tasizvys*) that he received "the *Apocalypse* and *three Episites of St. John*.' is not supported by any other evidence.

9 Nicephorus adds to the disputed books " the Gospel according to the Hebrews." In one MS. the Apoc alypse of St. John is placed also among the Apocryphal books (Credner, a. 0. p. 122).

10 This Catalogue, which excludes the Epistic to the Hebrews and the Apocalyne (statutum est nihil allud legt in ecclesia debare catholica nist..., et Pauli tredcrim epistolas est septem alias...), is followed by a section in which Philastrius speaks of "other [heretics] who assert that the Epistic to the Hebrews is not Paul's "(Her. 89). And in another place (Her. 60) he rectoms it as heresy to deny the authenticity of the Gospel and Apocalynes of St. John. The differ ent statements seem to be the result of careless com pilation.

11 This catalogue is described as "secundum antiquam translationem," and stands parallel with those of Jerome and Augustine. The enumeration of the Catholic epistics is somewhat ambiguous, but I believe that it includes only three epistics. Epistols: Periad gentes, Jacobi, Johannis ad Parthos. The insert in of Jude after gentes, seems to have been a typographical error, for the present writer has not found the reading in any one of four MSS. which he has examised.

→ In another place (De Eccles. Offic. i. 12) Isidore mentions who out condemning the double which existed as to the Epistic to the Hebrows, Jones, 2, 2 John, 2 Peter, but not as to Jude.

The writings of F. C. Baur and his followers often | or been more frequently selected for separate tran contain very valuable hints as to the characteristics of the several books in relation to later teaching, however perverse their conclusions may be. In opposition to them Thiersch has vindicated, perhaps with an excess of zeal, but yet in the main rightly, the position of the Apostolic writings in relation to the first age (Versuch sur Herstellung, u. s. w., Erlangen, 1845; and Erwiederung, u. s. w., Erlang. 1846). The section of Reuss on the subject (Die Gesch. d. heil. Schriften N. T., 2te Aufl. Braunschw. 1853 [4th ed. 1864]), and the article of Landerer (Herzog's Encyclop. s. v.) contain valuable summaries of the evidence. Other references and a fuller discussion of the chief points are given by the author of this article in The History of the Canon of the N. T. (Cambr. 1855). B. F. W.

* Among the more recent writers on the subject the following may be mentioned: Kästlin (of the Tübingen school), Die pseudonyme Litteratur der ältesten Kirche, ein Beitrag zur Gesch. der Bildung des Kanons, in Baur and Zeller's Theol. Jakrb. 1851, x. 149-221; Gaussen, Le canon des Saintes Ecritures, etc., 2 vol. Lausanne, 1860, translated and abridged by Dr. E. N. Kirk, The Canon of the Holy Scriptures examined in the Light of Hissory, Boston, 1862 (Amer. Tract Soc.); Credner, Gesch. des Neutest. Kanon, herausg. von Dr. G. Volkmar, Berlin, 1860; Bleek, Einl. in das N. T., Berlin, 1862, pp. 631-678; Hilgenfeld, Der Kanon und die Kritik des N. T., Halle, 1863; Reuse, Histoire du canon des Saintes Écritures dans l'Église chrétienne, 2º éd., Strasbourg, 1864, first published in the Strasbourg Revue de Théologie, 1860-63; Westcott, The Bible in the Church London, 1864, 18mo, a popular work; and a second edition, enlarged and revised, of his History of the Canon of the N. T., London, 1866, the best treatise on the subject in English. See further the references under GOSPELS, and the names of other books of the New Testament.

CANOPY (*commeters: conopeum :* Jud. z. 21, ziii. 9, zvi. 19). The canopy of Holofernes is the only one mentioned, although, perhaps, from the " pillars " of the litter [BED] described in Cant. iii. 10, it may be argued that its equipage would include a canopy. It probably retained the mosquito nets or curtains in which the name originated, although its description (Jud. x. 21) betrays luxury and display rather than such simple usefulness. varro (P. R. ii. 10, 8) uses qua in concpeis jacent of languid women, very much as aranauoueros . er to kurunely (l. c.) describes the position of a luxurious general. (For further classical illustration, see Dict. of Ast. art. ('ONOPEUM.) It might sossibly be asked why Judith, whose business was escape without delay, should have taken the trouble to pull down the canopy on the body of Holofernes? Probably it was an instance of the Hebrew notion that blood should be instantly covered (comp. 2 Sam. xx. 12; Lev. xvii. 13) [BLOOD]; and for this purpose the light bedding of Syria was inadequate. [BED.] Tent furniture also is naturally lighter, even when most luxurious, than that of a salace; and thus a woman's hand might unfix it from the pillars without much difficulty. H. H.

CANTICLES (שיר השירים, Song of Songs, i. e. the most beautiful of songs: $d\sigma_{\mu\alpha}$ language such compositions are not unfrequently as Condress: Convicum Conticorum), entitled in the commodated to rustic ideas, and sometimes to pro V. THE SONG OF SOLOMON. No book of the vincial dialects. If, moreover, it should be urges) T. has been the subject of more varied criticism, that Chaldaisms are not provincialisms, it may be

lation than the Song of Solomon. It may be convenient to consider it under four points of view: I Author and date; II. Form; III. Meaning; 1V Cononicity.

L Author and date. - By the Hebrew title it in ascribed to Solomon; and so in all the versions, and by the majority of Jewish and Christian writers, ancient and modern. In fact, if we except a few of the Talmudical writers (Bava Bathra, R. Mosea Kimchi; see Gray's Key), who assigned it to the age of Hezekiah, there is scarcely a dissentient voice down to the close of the last century. More recent criticism, however, has called in question this deeprooted and well accredited tradition. Among English scholars Kennicott, among German Eichhorn and Rosenmüller, regard the poem as belonging to the age of Ezra and Nehemiah (Kennicott, Di i. 20-22; Eichhorn, Linleitung in das A. T., Bd. iii. § 647, p. 531 ff., 2d ed.; Rosenm. Animade. in Lowth. Proelect., Schol. in V. T.). Kennicott based his opinion upon the uniform insertion of the , in all

the copies, in the name of David (רו"ר"). The name, however, occurs only once (iv. 4); and the insertion of the letter in this solitary instance is easily accounted for by a supposed error in transscription. At any rate the insertion of the . would not bring the Canticles so far down as the time of Ezra; since we find the same peculiarity in Hos. iii. 5, and Am. vi. 5 (Gesen. Lex. s. v.). The charge of Chaldaism has been vigorously pressed by Rosenmüller, and especially by Eichhorn. But Gesenius (Heb. Gr. § 2) assigns the book to the golden age of Hebrew literature, and traces "the few solitary Chaldaisms " which occur in the writings of that age to the hands of Chaldee copyists. Gesenius has moreover suggested an important distinction between Chaldaisms and dialectic variations indigenous to N. Palestine, where he conjectures that Judges and Canticles were composed. The application of this principle is sufficient to elimi-uate most of the Chaldaisms alleged by Eichborn

(e. g. \bigcup for $\neg \bigcup \bigotimes$); while the occurrence of similar forms in Phœnician affords an indication of other intrusive forces beside the Aramsean acting upon the Biblical Hebrew. Nor is the suggestion of Gesenius that the book was written in N. Palestine, and consequently tinged with a local coloring, inconsistent with the opinion which places it among the "one thousand and five" songs of Solomon (1 K. iv. 32). Comp. 1 K. ix. 19 with 2 Chr. viii. 6, where the buildings of Lebanon are decidedly contrasted with those of Jerusalem, and are not therefore to be confounded with the " house of the forest of Lebanon " (1 K. vii. 2), which was probably in Jerusalem. By a further comparison of these passages with Robinson (Bibl. Res. iii. 441), who describes remains of massive buildings as still standing on Lebanon, it will appear probable that Solomon had at least a hunting-seat somewhere on the slopes of that mountain (comp. Cant. iv. 8). In such a retreat, and under the influence of its scenery and the language of the surrounding peasantry, he may have written Canticles. Artistically this would have been in keeping with the general conditions of pastoral poetry. In our own

-quied that Solumon could scarcely be ignorant of he Aramsen hterature of his own time, and that is may have consciously used it for the purpose of schement (tiesen. Hebr. Gr. §§ 2, 4).

The title, though it is possibly too flattering L have come from the hand of Solomon, must have existed in the copy used by the LXX., and consequently can lay claim to a respectable antiquity The moral argument put forward by the supporters of the most recent literal interpretation, and based upon the improbability of Solomon's criminating himself (see below), is not very conclusive. His conduct could easily be trace: It os a spirit of generous self-accensation; and at any rate it need not be realted above the standard which was likely to thourish in the atmosphere of a court such as his. On the whole then it seems unnecessary to depart from the plaim meaning of the Hebrew title.

Supposing the date fixed to the reign of Solomon. great ingenuity has been employed by the Kabbin-ical and some Christian writers, in determining at what period of that monarch's life the poem was written (see Pol. Syn. Proof. ad Cant.). The point at issue seems to have been whether Solomon ever repented after his fall. If he did, it was contended that the ripeness of wisdom exhibited in the Song seemed the natural growth of such an experience if he did not, it was urged that no other than a spiritually-minded man could have composed such a poem; and that therefore it must have been written while Solomon was still the cherished of God. Then again it was a moot point whether the composition was the product of Solomon's matured windom, or the fresh outburst of his warm and passionate youth; whether in fact the master element of the poem were the literal form, or the allegorical meaning. The question resolves itself into one of interpretation, and must be determined by reference to III. below.

II. Form. - This question is not determined by the Hebrew title. The rendering of שיר השירים mentioned by Simonis (Lex. Heb.), "series carminum" (comp. $\sigma_{\epsilon_i\rho d}$, chain), and adopted by Paulus, Good, and other commentators, can scarcely sompete with Gesenius's, " Song of Songs, i. e. the most beautiful of songs " (comp. Ps. xlv. 1, שיר ידירו, "a delightful song," Gesen.; " car men jucundum," Rosenm.; comp. also Theoer. Idyl. viii. προσφιλές μέλος). The non-continuity which many critics attribute to the poem is far from being a modern discovery. This is sufficiently sttested by the Lat. "Cantica canticorum," and the Chaldee paraphrase, "the songs and hymns which Solomon, the prophet, the king of Israel, uttered in the spirit of prophecy before the Lord." (mislerius (16th cent.) considered it a drama in five acts. One of the first separate translations published in England is entitled ... The Canticles, er Balades of Solomon, in Englysh metre," 1549; and in 1596 appeared Solomon's Song in 8 eclogues. by J. M. [Jervase Markham]; the number of sclogues in this latter production being the same us that of the Idyls into which the book was after wards divided by Jahn. Down to the 18th cent sowever, the Canticles were generally regarded as www.innous.

Gregory [of] Nazianzus calls it $roupourdr \delta p \partial \mu d$, posed in 1776, and since developed by Umbreit, re real $\delta \sigma_{\mu,a}$. According to Patrick, it is a "Pastoral Eclogue," or a "Dramatic poem;" according the dramatic evolution of a simple love-story, it of Lowth, "an epithalamum, or $\delta \sigma_{\mu}\sigma_{\tau}$ by many supplies that essential movement and interest, the

tialis of a pastoral kind." Michaelia and Rosen müller, while differing as to its interpretation, agree in making it continuous, "carmen amatorium" (Mich.). A modified continuity was suggested by Bossuet, who divided the Song into 7 parts, or scenes of a pastoral drama, corresponding with the 7 days of the Jewish nuptial ceremony (Lowth, Prodect. xxx.). Bossuet is followed by Calmet, Percy, Williams, and Lowth; but his division is impugned by Taylor (Fragm. Calmet), who proposes one of 6 days: and considers the drama to be post-nuptial, not ante-nuptial, as it is explained by Bossuet. The entire unptial theory has been severtly handled by J. D. Michaelis, and the literal school of interpreters in general. Michaelis attacks the first day of Bossuet, and involves in its destruction the remaining six (Not. ad Lowth. Prod. xxxi.). It should be observed that Lowth does not compromise himself to the perfectly dramatic character of the poem. He makes it a drama, but only of the minor kind, i. e. dramatic as a dialogue; and therefore not more dramatic than an Idyl of Theocritus, or a Satire of Horace. The fact is, that he was unable to discover a plot; and evidently meant a good deal more by the term "pastoral" than by the term "drama." Moreover, it seems clear, that if the only dramatic element in Cant. be the dialogue, the rich pastoral character of its scenery and allusions renders the term drama less applicable than that of idyl. Bossuet, however, claims it as a regular drama with all the proprieties of the classic model. Now the question is not so much whether the Canticles make up a drama, or a series of idyls, as which of these two Greek names the more nearly expresses its form. And if with Lowth we recognize a chorus completely sympathetic and assistant, it is difficult to see how we can avoid calling the poem a drama. But in all the translations of the allegorical school which are based upon the dramatic idea, the interference of the chorus is so infrequent or so indefinite, the absence of anyt'ing like a dramatic progress and development sufficient to enlist the sympathy of a chorus is so evident, that the strongly marked idyllic scenery could not fail to outweigh the scarcely perceptible elements of dramatic intention. Accordingly the idyllic theory, propounded by Sig. Melesegenio, confirmed by the use of a similar form among the Arabians, under the name of "Caasides" (Sir W. Jones, Poss. As. Comment. iii.), and adopted by Good, became for a time the favorite hypothesis of the allegorical school. After Markham's transla tion, however (see above), and the division of Ghislerius, we cannot consider this theory as originating either with the learned Italian translator, or, as suggested by Mr. Horne, with Sir W. Jones.

The idyllic form seems to have recommended itself to the allegorical school of translators as getting rid of that dramatic unity and plot which their system of interpretation reduced to a sucression of events without any culminating issue. In fact, it became the established method of division both with literal and allegorical translators; e. g. Herder, Pye Smith, Kleuker, Magnus; and as late as 1846 was maintained by Dr. Noyes of Harvard University, an ultra literalist. But the majority of recent translators belonging to the literal school have adopted the theory of Jacobi, originally proposed in 1776, and since developed by Umbreit, Ewald, Meier, &c. Based as this theory is upon the drymatic evolution of a simple love story, it

Digitized by

want of which was falt by Lowth; and justifies the | litury, cal services; and during the persecutions of application of the term drama to a composition of which it manifests the vital principle and organic structure

By the reactionary allegorists, of whom Rosenmüller may be considered the representative, the Song of Solomon has either been made absolutely continuous, or has been divided with reference to its spiritual meaning, rather than its external form (e. g. Hengstenberg, and Prof. Burrowes).

The supposition that the Cant. supplied a model to Theocritus seems based on merely verbal coincidences, such as could scarcely fail to occur between two writers of pastoral poetry (comp. Cant. i. 9, vi. 10, with Theocr. xviii. 30, 36; Cant. iv. 11 with Theorr. xx. 26, 27; Cant. viii. 6, 7, with Theorry xxiii. 23-26; see other passages in Pol. Syn.; Lowth, Prod. ; Gray's Key). In the essential matters of form and of ethical teaching, the resemblance does not exist.

III. Meaning. - The schools of interpretation may be divided into three : - the mystical, or typical; the allegorical; and the literal.

1. The mystical interpretation is properly an offishoot of the allegorical, and probably owes its origin to the necessity which was felt of supplying a literal basis for the speculations of the allegorists This basis is either the marriage of Solomon with Pharaoh's daughter, or his marriage with an Israelitish woman, the Shulamite. The former (taken together with Harmer's variation) was the favorite opinion of the mystical interpreters to the end of the 18th century: the latter has obtained since its introduction by Good (1803). The mystical interpretation makes its first appearance in Origen, who wrote a voluminous commentary upon the Cant. Its literal basis, minus the mystical application, is condemned by Theodoret (A. D. 420. It reappears in Abulpharagius (1226-1286), and was received by Grotius. As involving a literal basis, it was vehemently objected to by Sanctius, Durham, and Calovius; but approved of and systematized by Bossuet, endorsed by Lowth, and used for the purpose of translation by Percy and Wil-liams. The arguments of Calovius prevented its taking root in Germany: and the substitution by Good of an Israelitish for an Egyptian bride has not saved the general theory from the neglect which was inevitable after the reactionary movement of the 19th century allegorists.

2. Allegorical. - Notwithstanding the attempts which have been made to discover this principle of interpretation in the LXX. (Cant. iv. 8); Ecclus. xlvii. 14-17); Wisd. (viii. 2); and Joseph. (c. **4**pion. i. § 8); it is impossible to trace it with any sertainty further back than the Talmud (see Gins surg, Introd.). According to the Talmud the beloved is taken to be God, the loved one, or bride. is the congregation of Israel. This general relation is expanded into more particular detail by the Targum, or Chaldee Paraphrase, which treats the Song of monge as an allegorical history of the Jewish people from the Exodus to the coming of the Messiah and the building of the third temple. In order to make out the parallel, recourse was had to the most extraordinary devices: e. g. the reduction of words to their numerical value, and the free inverchanging of words similar to each other in sound. Elaborate as it was, the interpretation of the Taran was still further developed by the mediseval Tows; but generally constructed upon the same Megorical hypothesis. It was introduced into their prolific genius of medizval allegory, we have a

the middle ages, its consoling appeal to the past and future glories of Israel maintained it as the popular exposition of a national poem. It would be strange if so universal an influence as that of the scholastic philosophy had not obtained an expression in the interpretation of the Canticles. Such an expression we find in the theory of Ibn Caspi (1280-1340), which considers the book as representing the union between the active intellect (intellectus agens), and the receptive or material intellect (intellectus materialis). A new school of Jewish interpretation was originated by Mendelssohn (1729-1786); which, without actually denying the existence of an allegorical meaning, determined to keep it in abeyance, and meanwhile to devote itself to the literal interpretation. At present the most learned Rabbis, following Löwisohn, have abandoned the allegorical interpretation in toto (Herxheimer, 1848; Philippeon, 1854).

In the Christian Church, the Talmudical interpretation, imported by Origen, was all but universally received. It was impugned by Theodore of Monsuestia (360-429), but continued to hold its ground as the orthodox theory till the revival of letters; when it was called in question by Erasmus and Grotius, and was gradually superseded by the typical theory of Grotius, Hossuet, Lowth, de. This, however, was not effected without a severe struggle, in which Sanctius, Durham, and Calovius were the champions of the allegorical against the typical theory. The latter seems to have been mainly identified with Grotius (Pol. Syn.), and was stigmatized by Calovius as the heresy of Theodore Mopsuest., condemned at the 2d council of Constantinople, and revived by the Anabaptists. In the 18th century the allegorical theory was reasserted, and reconstructed by Puffendorf (1776) and the reactionary allegorists; the majority of whom. however, with Rosenmüller, return to the system of the Chaldee Paraphrase.

Some of the more remarkable variations of the allegorical school are: -(a.) The extension of the Chaldee allegory to the Christian Church, originally projected by Aponius (7th century), and more fully wrought out by De Lyra (1270-1340), Brightman (1600), and Cocceius (1603-1699). According to De Lyra, chaps. ii.-vii. describe the history of the Israelites from the Exodus to the birth of Christ; chap. vii. ad fin. the history of the Christian Church to Constantine. Brightman divides the Cant. into a history of the Legal, and a history of the Evangelical Church; his detail is highly elabo rate, e. g. in Cant. v. 8, he discovers an allusion to Peter Waldo (1160), and in verse 13 to Rober: Trench (1290). (b.) Luther's theory limits the allegorical meaning to the contemporaneous history of the Jewish people under Solomon. (c.) According to Ghislerius and Corn. a Lapide the Bride is the Virgin Mary. (d.) Puffendorf refers the spiritual sense to the circumstances of our Saviour's death and burial.

3. The literal interpretation seems to have been connected with the general movement of Theodore Mopsuest. (360-429) and his followers, in opposition to the extravagances of the early Christian allegorists. Its scheme was unptial, with Pharaoh daughter as the bride. That it was by many re garded as the only admissible interpretation appe from Theodoret, who mentions this opinion only a condemn it. Borne down and overwhelened by the

e of it in Abulpharagius (vid. supr.); and in he MS. commentary (Bodl. Oppenh. Coll. No. 325), cited by Mr. Ginsburg, and by him referred sonjecturally to a French Jew of the 12th or 13th cent. This Commentary anticipates more recent criticism by interpreting the Song as celebrating the humble love of a shepherd and shepherdess. The extreme literal view was propounded by Castellio (1544), who called the Cant. "Colloquium Salomonis cum amicâ quâdam Sulamithâ," and rejected it from the Canon. Following out this idea, Whiston (1723) recognized the book as a composition of Solomon; but denounced it as foolish, Inscivious, and idolatrous. Meanwhile the nuptial theory was adopted by Grotius as the literal basis of a secondary and spiritual interpretation; and, after its dramatical development by Bossuet, long continued to be the standard scheme of the mystical school. In 1803 it was reconstructed by Good, with a Jewish instead of an Egyptian bride. The purely literal theory, opposed on the one hand to the allegorical interpretation, and on the other to Castellio and Whiston, owes its origin to Germany. Michaelis (1770) regarded the Song as an exponent of wedded love, innocent and happy. But, while justifying its admission into the Canon, he is betrayed into a levity of remark altogether inconsistent with the supposition that the book is inspired (Not. ad Lowth, Pral.). From this time the scholarship of Germany was mainly enlisted on the side of the literalists. The literal basis became thoroughly dissociated from the mystical superstructure; and all that remained to be done was to elucidate the true scheme of the former. The most generally received interpretation of the modern literalists is that which was originally proposed by Jacobi (1771), adopted by Herder, Ammon, Umbreit, Ewald, &c.; and more recently by Prof. Meier of Tübingen (1854), and in England by Mr. Ginsburg, in his very excellent translation (1857). According to the detailed application of this view, s given by Mr. Ginsburg, the Song is intended to display the victory of humble and constant love over the temptations of wealth and royalty. The tempter is Solomon; the object of his seductive endeavors is a Shulamite shepherdess, who, surrounded by the glories of the court and the fascinations of unwonted splendor, pines for the shepherd-tover from whom she has been involuntarily separated.

The drama is divided into 5 sections, indicated by the thrice repeated formula of adjuration (ii. 7, iii. 5, viii. 4), and the use of another closing sentence (v. 1).

Section 1 (Ch. i.—ii. 7): scene — a country seat of Solomon. The shepherdess is committed to the charge of the court-indices ("daughters of Jerusalam"), who have been instructed to prepare the way for the royal approach. Solomon makes an unsuccessful attempt to win her affections.

Sect. 9 (ii. 8—iii. 5): the shepherdess explains to the court-ladies the cruelty of her brothers, which had led to the separation between herself and her eloved.

Sect. 3 (iii. 6—v. 1): entry of the royal train into Jerusalem. The shepherd follows his betrothed into the city, and proposes to rescue her. Some of her court companions are favorably impressed by her constancy.

Sect. 4 (v. 9-viii. 4): the shepherdess tells her from, and still further engages the sympathies of her companions. The king's flatteries and promess are unsvailing.

Sect. 5 (viii. 5-14): the conflict is over; virtue and truth have won the victory, and the shepherdess and her beloved return to their happy home; visiting on the way the tree beneath whose shade they first plighted their troth (viii. 5). Her brothers repeat the promises which they had once made conditionally upon her virtuous and irreproschable conduct.

Such is a brief outline of the scheme most recently projected by the literalists. It must not be supposed, however, that the supporters of the allr. gorical interpretation have been finally driven from the field. Even in Germany a strong band of re actionary allegorists have maintained their ground including such names as Hug, Kaiser, Rosenmül ler, Hahn, and Hengstenberg. On the whole, their tendency is to return to the Chaldee Paraphrase a tendency which is specially marked in Rosenmül ler. In England the battle of the literalists has been fought by Dr. Pye Smith (Congreg. Mag for 1837-38); in America by Prof. Noyes, who adopts the extreme erotic theory, and is unwilling to recognize in Cant. any moral or religious design. It should be observed that such a sentiment as this of Dr. Noyes is utterly alien to the views of Jacobi and his followers, who conceive the recommendation of virtuous love and constancy to be a portion of the very highest moral teaching, and in no way unworthy of an inspired writer.

The allegorical interpretation has been defended in America by Professors Stuart and Burrowes. The *isternal* arguments adduced by the allegorists are substantially the same which were urged by Calovins against the literal basis of the nystical interpretation. The following are specimens:—

(a.) Particulars not applicable to Solomor. (v. 2): (b.) particulars not applicable to the wife α_n Solomon (i. 6, 8; v. 7; vi. 13, cf. i. 6): (c.) Solomon addressed in the second person (viii. 12): (d.) particulars inconsistent with the ordinary conditions of decent love (v. 2): (c.) date 20 years after Solomon's marriage with Pharaoh's daughter (comp. Cant. v. 4, and 1 K. vi. 38). It will readily be observed that these arguments do not in any way affect the literal theory of Jacobi.

For external arguments the allegorists depend principally upon Jewish tradition and the analogy of Oriental poetry. The value of the former, as respects a composition of the 10th cent. B. C., is estimated by Mich. (Not. ad Lowth.) at a very low rate. For the latter, it is usual to refer to such authors as Chardin, Sir W. Jones, Herbelot, &c. (see Rosenm. Animad.). Rosenmüller gives a song of Hafiz, with a paraphrase by a Turkish commentator which unfolds the spiritual meaning. For other specimens of the same kind see Lane's Egyptians. On the other hand the objections taken by Dr. Noyes are very important (New Transl.). - Tt would seem that there is one essential difference between the Song of Solomon and the allegorical compositions of the poets in question. In the latter the allegory is more or less avowed ; and distinct reference is made to the Supreme Being: in the former there is nothing of the kind. But the most important counderation adduced by the literalists is the fact that 'he Cant. are the production of a lifferent country, and separated from the songs of the Sufis and the Hindoo mystics by an interval of nearly 2000 years. To which it may be added that the Song of Solomon springs out of a religion waich has nothing in common with the Pantheism or Persia and India. In short, the conditions of

But the literalists are not content with destroying Lieder der Liebe, &c., in vol. iii. of Herdar's works. this analogy; they proceed further to maintain that allegories do not generally occur in the sacred writings without some intimation of their secondary meaning, which intimation in the case of the Cant. is not forthcoming. They argue from the total silence of our Lord and his Apostles respecting this book, not indeed that it is uninspired, but that it was never intended to bear within its poetic envelope that mystical sense which would have rendered it a perfect treasury of reference for St. Paul, when unfolding the spiritual relation between Christ and His church (see 2 Cor. xi. 2; Rom. vii. 4; Eph. v. 23–32). Again, it is urged that if this poem be allegorically spiritual, then its spiritualism is of the very highest order, and utterly inconsistent with the opiniou which assigns it to Solomon. The philosophy of Solomon, as given in Eccl., is a philosophy of indifference, apparently suggested by the exhaustion of all sources of physical enjoyment. The religion of Solomon had but little practical influence on his life; if he wrote the glowing spiritualism of the Cant. when a young man, how can we account for his fearful degeneracy? If the poem was the production of his old age, how can we reconcile it with the last fact recorded of him that " his heart was not perfect with the Lord, his God?" For the same reason it is maintained that no other writer would have selected Solomon as a symbol of the Messiah. The excessively amative character of some passages is designated as almost blasphemous when supposed to be addressed by Christ to his church (vii. 2, 3, 7, 8); and the fact that the dramatis personas are three, is regarded as decidedly subversive of the allegorical theory.

The strongest argument on the side of the allegorists is the matrimonial metaphor so frequently employed in the Scriptures to describe the relation hetween Jehovah and Israel (Ex. xxxiv. 15, 16; Num. xv. 39; Ps. lxxiii. 27; Jer. iii. 1-11; Ez. xvi., xxiii., &c.). It is fully stated by Prof. Stuart (O. T. Canon). On the other hand the literalists deny so early a use of the metaphor. They contend that the phrase "to go whoring after other gods " describes a literal fact; and that even the metaphor as used by the prophets who lived after Solomon implies a wedded relation, and therefore cannot be compared with the ante-nuptial affection which forms the subject of Cant.

IV. Canonicity. - It has already been observed bat the book was rejected from the Canon by Casellio and Whiston; but in no case has its rejection seen defended on external grounds. It is found in he LXX., and in the translations of Aquila, Symnachus, and Theodotion. It is contained in the catalogue given in the Talmud, and in the catalogue of Melito; and in short we have the same evidence for its canonicity as that which is commonly adduced for the canonicity of any book of the Ó. T.

Ginsburg, Lond. 1857; the last mentioned is specially recommended to the English reader.)

T. E. R.

* Among the names of other writers on Canticles should be mentioned Renan (Cantique des Cantiques, translating and treating of the plan, age, and character of the poem, 2d ed., 1861); Ewald in his Dichter d. A. B. (ed. 1866-7); Delitzach (1851) who maintains the mystical theory (das Mysterium der Ehe ist das Mysterium des Hohenliedes), according to which the reader has the deeper spiritual sense brought near to him, not so much by the author as by the Spirit that guided the author; Umbreit, Hohes Lied (in Herzog's Real-Encyk. vi. 206-220), almost a treatise by itself, and occupied chiefly with a critique of the later expositions; Bleek (Einl. in das A. T. pp. 635-41) who finds in it not so much the hand as the character of Solomon; and Rev. W. Houghton (London, 1865), a Trans lation and Short Explanatory Notes: the Song viewed as secular, and the theme the fidelity of chaste love, constant and devoted. Isaac Taylor (Spirit of Hebreic Poetry, New York, 1862) has a very instructive chapter (ch. x.) on this book. He supposes Solomon to have invented the characters and incidents which form the ground-work of the poem, and not to have drawn them from his own history. He does not admit the objections to its ethical character to be well founded. "It is a divinely inspired myth, conveying the deepest and most sacred elements of the spiritual economy in the terms and under the forms of instinctive human feeling and passion. . . . It has justified its presence in the Canon by the undoubtedly religious purposes it has served, in giving animation, and depth, and intensity, and warmest tone to the devout meditations of thousands of the most devout and of the purest minds." The symbolical view in ably supported by Dr. L. Withington, Solomon's Song, Translated and Explained (Boston, 1861). The Song represents the love which exists between Christ and the church - the bride, the Lamb's wife - with special reference to the conversion of the Gentiles, when a more sublime and spiritual religion should prevail. The arguments for this position are drawn out with singular acuteness and power. The version is avowedly free, so as "to give not only the meaning, but to preserve the poetic and moral shading, and thus make it to the reader now what it was to the Hebrews." It is seldom that so many remarks profoundly suggestive beyond the direct scope of the book, and so many expressions of rare beauty are found in the pages of a Commentary. The 'ranslation, on tas whole, is less highly wrought than the other pare. Among the more recent writers who adopt the literal theory, besides Bleek and Renan, already referred to, may be mentioned Heiligstedt (1848 in Maurer's Comm. vol. iv.), Bittcher (1849) Friedrich (1855), Hitzig (1855, Exeget. Hand rvi.), Vaihinger (1858), Weissbach (1858), and Davidson (Introd. to the O. T., 1862, ii. 389-421). Ginsburg's art. Solomon's Song in the & 421). Ginsburg a art of Bibl. CAPERNAUM

CAPER'NAUM (Rec. Tert, Kawepraobµ; lachm. [Tisch. and Treg.] with B [D Z Sin. etc.] Kapapraobµ, as if כרר כרום, "village of Nathum;" Syriae Nitr. מאון באסס, Pesh.

poul : Capharnasm), a name with

which all are familiar as that of the scene of many acts and incidents in the life of Christ. There is no mention of Capernaum in the O. T. or Apocrypha, but the passage Is. ix. 1 (in Hebrew, viii. 23) is applied to it by St. Matthew. The word *Caphar* in the name perhaps indicates that the place was of late foundation. [CAPHAR.]

The few notices of its situation in the N. T. are not sufficient to enable us to determine its exact position. It was on the western shore of the Sea of Galilee (Thy mapataraoolar, Matt. iv. 13; comp. John vi. 24), and if recent discoveries are to be trusted (Cureton's Nitrian Rec. John vi. 17), was of sufficient importance to give to that Sea, in whole or in part, the name of the "lake of Capernaum." (This was the case also with Tiberias, at the other extremity of the lake. Comp. John vi. 1. "the sea of Galilee of Tiberias.") It was in the "land of Gennesaret" (Matt. xiv. 34, compared with John vi. 17, 21, 24), that is, the rich, busy plain on the west shore of the lake, which we know from the descriptions of Josephus and from other sources to have been at that time one of the most prosperous and crowded districts in all Palestine. [GENNESARET.] Being on the shore Capernaum was lower than Nazareth and Cana of Gal-Hee, from which the road to it was one of descent (John ii. 12; Luke iv. 31), a mode of speech which would apply to the general level of the spot even if our Lord's expression "exalted unto heaven' (Syuthoy, Matt. xi. 28) had any reference to height of position in the town itself. It was of sufficient size to be always called a "city" ($\pi \delta \lambda \iota s$, Matt. ix. 1; Mark i. 33); had its own synagogue, in which our Lord frequently taught (John vi. 59; Mark i. 21; Luke iv. 33, 38) - a synagogue built by the centurion of the detachment of Roman soldiers which appears to have been quartered in the place a (Luke vii. 1, comp. 8; Matt. viii. 8). But besides the garrison there was also a customs station, where the dues were gathered both by stationary (Matt. ix. 9; Mark ii. 14; Luke v. 27) and by itinerant (Matt. xvii. 24) officers. If the "way of the sea was the great road from Damascus to the south (Ritter, Jordan, p. 271), the duties may have been evied not only on the fish and other commerce of she lake, but on the caravans of merchandise pass-.ng to Galilee and Judsea

The only interest attaching to Capernaum is as the residence of our Lord and his Apostles, the

where of so many miracles and "gracious words." 't Nazareth He was "brought up," but Capernaum was emphatically his "own city;" it was when He returned thither that He is said to have been "at home" (Mark ii. 1; such is the force of *ir sixey* — A. V. "in the house"). Here he chose the Evangelist Matthew or Levi (Matt iz. 9). The wethers Simon-Peter and Andrew helonged to Casernaum (Mark i. 29), and it is perhaps allow-abe to inagine that it was on the sea-beach below the soma (is, doubtless, like true orientals, these two

4 The fact of a Roman having built the synagogue seriality means some argument against the presperity if the town

fishermen kept close to home), while lesus was " walking " there, before " great multitudes " had learned to "gather together unto Him," that they heard the quiet ca., which was to make them forsake all and follow Him (Mark i. 16, 17, comp. 28). It was here that Christ worked the miracle on the centurion's servant (Matt. viii. 5; Luke vii. 1), on Simon's wife's mother (Matt. viii. 14; Mark i. 30; Luke iv. 38), the paralytic (Matt. ix. 1; Mark ii. 1; Luke v. 18), and the man afflicted with an unclean devil (Mark i. 23; Luke iv. 33). The son of the nobleman (John iv. 46) was, though resident at Capernaum, healed by words which appear to have been spoken in Cana of Galilee. At Capernaum occurred the incident of the child (Mark ix. 33: Matt. xviii. 1; comp. xvii. 24); and in the synagogue there was spoken the wonderful discourse of John vi. (see verse 59).

The doom which our Lord pronounced against Capernaum and the other unbelieving cities of the plain of Gennesaret has been remarkably fulfilled. In the present day no ecclesiastical tradition even ventures to fix its site; and the contest between the rival claims of the two most probable spots is one of the hottest, and at the same time the most hopeless, in sacred topography. Fortunately noth-ing hangs on the decision. The spots in dispute are (1.) Khun Minych, a mound of ruins which takes its name from an old khan hard by. This mound is situated close upon the seashore at the northwestern extremity of the plain (now el-Ghuweir). It is of some extent, but consisting of heaps only with no visible ruins. These are south of the ruined khan; and north of them, close to the water-line of the lake, is a large spring surrounded by vegetation and overshadowed by a fig-tree which gives it its name - 'Ain ct-Tin (the spring of the fig-tree). Three miles south is another large spring called the "Round Fountain," which is a mile and a half from the lake, to which it sends a considerable stream with fish.

2. Three miles north of Khun Minyrk is the other claimant, Tell Hum, $--ruins^{h}$ of walls and foundations covering a space of "half a mile long by a quarter wide," on a point of the shore projecting into the lake and backed by a very gently rising ground. Rather more than three miles funther is the point at which the Jordan enters the north of the lake.

The arguments in favor of Khan Minych will be found in Robinson ii. 403-4, iii. 344-358). They are chiefly founded on Josephus's account of his visit to Cepharnome, which Dr. R. would identify with the mounds near the khan, and on the testimonies of successive travellers from Arculfus to Quaresmius, whose notices Dr. R. interprets often, it must be confessed, not without difficulty - in reference to Khan Minyeh. The fountain Capharnaum, which Josephus elsewhere mentions (B. J. iii. 10, § 8) in a very emphatic manner as a chief source of the water of the plain of Gennessret and as abounding with fish, Dr. R. helieves to be the 'Ain et-Tin. But the "Round Fountain" certainly auswers better to Josephus's account than a spring so close to the shore and so near one end of the district as is 'Ain et-Tin. The claim of Khan Minyeh is also strongly opposed by a later traveller (Bonar, pp. 437-41). Still this makes

^b Vast rains . . . no ordinary city . . . eite of e great www (Bomar, pp. 414, 415).

The arguments in favor of *Tell Ham* date from about 1675. They are urged by Dr. Wilson. The principal one is the name, which is maintained to be a relic of the Hebrew original --- Caphar having given place to Tell. Dr. Wilson also ranges Josephus on his side (Lands of the Bible, ii. 189-149. See also Ritter, Jordan, pp. 835-348, who supports I'll Hûm). Khan Minyeh, et-Tâbighah, and Tell Hum, are all, without doubt, ancient sites, but the conclusion from the whole of the evidence is irresistible: that it is impossible to say which of them represents Capernaum, which Chorazin, or which Bethsaida. Those anxious to inquire further into this subject may consult the originals, as given above. For the best general description and reproduction of the district, see Stanley, S. & P. ch. x.

* The later travellers in Palestine leave the ques tion as to the spot on which Capernaum stood hardly less perplexed than it was before. "The disputed sites of the cities of Gennesaret," says Dean Stanley, after his second visit to the Fast (Notices of Localities, etc., p. 195), "must still remain disputed." Porter (Handbook of Syria, ii. 425) accepts Dr. Robinson's conclusion in favor of Khan Minyeh, so called from an old caravansarai near a heap of ruins, on the northern edge of Gen-'Ain et-Tin is only another name for nesaret. the same place, derived from a fig-tree which overhangs a fountain in the neighborhood. Dr. Thomson (Land and Book, i. 542-548) and Mr Dixon (Holy Land, ii. 173, London, 1865) decide for Tell Hûm, at the head of the lake, about three miles northeast of Khan Minyeh. The claim of 'Ain Mudawarah, or the Round Fountain, near the south end of the plain of Gennesaret, and so named from being "enclosed by a low circular wall of mason-work," has for some time past been kept in abeyance; but Mr. Tristram (Land of Israel, p. 442, London, 1865) has brought it forward once more, and certainly with reasons for it which are not without weight. He speaks with greater authority on some branches of the argument from his character as an eminent naturalist. Josephus states $(B. J. iii. 10, \S 8)$ that the fountain of Capernaum produced the *kopaxiros*, a fish like that of the lake near Alexandria. Mr. Tristram now maintains that neither of the places except the Round Fountain furnishes this mark of identification. "The remarkable siluroid, the catfish or coracine (nopanior), abounds to a remarkable degree in the Round 'ountain to this day. . . . We obtained specimens a yard long, and some of them are deposited in the British Museum. The loose, sandy bottom of this

fountain is peculiarly adapted for this singular fish, which buries itself in the sediment, leaving only its feelers exposed. . . . Here, in the clear shallow water, it may, when disturbed, be at once detected, swimming in numbers along the bottom. . . . But it is not found at 'Ain et-Tin, where the fountain could neither supply it with cover nor food; nor could we discover it at 'Ain Tabiahah'' (the nearest fountain to Tell Hum, though distant two miles to the southward), "where the water is hot and brack-Jah." Mr. Tristram thinks it worth while to mention that fever is very prevalent at this day at 'Ain Mudawarah (the Round Fountain), whereas "the dry, elevated, rocky ground of Tell Ham" would be somparatively free from it. "Peter's wife's mother ay sick of a fever " at Capernaum (Mark i. 80). For other details of his able argument the reader a referred to his work as above. The Abbé Michon

(Vie de Jésue, i. 220-24, Paris, 1886) who a travelled in Palestine, holds in like manner that the Capharnaum of Josephus (B. J. iii. 10, § 8) is identical with the Round Fountain, and hence that the Capernaum of the New Testament must be found at that place. So Norton, Trans. of the Gospels, with Notes, ii. 55, 56. On the other hand the English explorers, Captain Wilson and his associates, are reported to have found indications which point to Tell lim as the disputed site. They regard as such the discovery of a synagogue in a state of fine preservation, remarkable for r ite elegant architecture, and belonging in all probability to an age earlier than that of Christ (Atheneus Feb. 24, 1866). It may have been one of the Galilean synagogues in which the Saviour himself taught and performed some of his mighty works It is certain that such a discovery shows that an important town must once have existed on this spot; but this of itself would not settle the question of the name of the town. Mr. Thrupp (Journ. of Class. and Sacr. Philol. ii. 290-308) also contends for Tell Hum as the site of Capernaum; Dr. Tregelles (ibid. iii. 141-154) presents a widely different view, placing Capernaum close by Bethsaida (Julias), near the mouth of the Upper Jordan, in the Bathah, which (and not the Chuweir) he regards as the plain of Gennesaret described by Josephus.

It may he added in regard to Khan Minyeh that the recent excavations of the English exploring expedition (see Athenaum, March 31, 1866) have brought to light nothing there except some fragments of "masonry and pottery of comparatively modern date." H.

CA'PHAR ("D., from a root signifying " to cover," Ges. p. 707), one of the numerous words employed in the Bible to denote a village or collection of dwellings smaller than a city (Ir). Mr. Stanley proposes to render it by "hamlet" (S. d P. App. § 85), to distinguish its occurrences from those of Chavvah, Chatzer, Benotch, and other similar words. As an appellative it is found only three times: 1 Chr. xxvii. 25; Cant. vii. 11, and 1 Sam. vi. 18 (in the last the pointing being differ-

ent, Copher, "근코); but in neither is there anything to enable us to fix any special force to the word.

In names of places it occurs in CHEPHAR-AM-MONAL CHEPHIRAH, CAPHAR-SALAMA. But the rumber of places compounded therewith mentioned in the Talmuds shows that the name became a much commoner one at a time subsequent to the Biblical history. In Arabic Kefr is in frequent use (see the lists in the Index to Robinson, ii. and iii.). To us its chief interest arises from its forming a part of the name CAPERNAUM, i. c. Caphar-G. nahum.

CA'PHAR-SAL'AMA (Xapapoaraud ; Alex. Xappapoapaµa: Capharsalama), a place $(\kappa \omega_{\mu\eta}, Joseph. Ant. xii. 10, § 4)$ at which a battle was fought between Judas Maccabaus and Nican-(1 Macc. vii. 31). From the fugitives having taken refuge in the "city of David," it would appear to have been near Jerusalem. Is it not possible that it was Siloam, the Arabic name of which is Kefrschodn ? Ewald places it north of Ramla on the Samaritan boundary (Gesch. iv. 868, note), but ne certain traces of it seem to have been yet found.

CAPHENATHA

CAPHEN'ATHA (Xapperadd: Caphersta), must rather be compared to the Coptite nome, prob-s place apparently close to and on the east side of ably in primitive ages of greater extent than under Jerusalem, which was repaired by Jonathan Macca- the Ptolemies, for the number of nomes was in the beus (1 Macc. xii. 37). The name is derived by Lightfoot from Caphnioth, the Talmudic word for unripe figs. If this be correct, there is a remarkal le correspondence between the name Caphenatha and those of Bethany (house of dates), Bethphage (house of figs), and of the Mount of Olives itself, on which the three were situated - all testifying to the ancient fruitfulness of the place.

OAPHIRA (Kapeîpa; [Vat. Пегра; Ald. Alex. Kapipa:] Enocadies), 1 Esdr. v. 19. [CHF-PHIRAH.

CAPH'TOR (CAPH'TOR (E CAPH'TOR (CAPH'TOR (CAPH'TOR) cept in Jer.]: Cappadocia): CAPH'TORIM (בְּכָה (רִים): [in Gen.,] Гафвориеlu, [Alex.] Хафθοριειμ; [in 1 Chr., Rom. Vat. omit; Alex. Χαφ-οριειμ; Comp. Ald.] Καφθοριείμ; [in Deut. Καπrádones:] Caphtorim, Cappadoces), a country thrice mentioned as the primitive seat of the Philistines (Deut. ii. 23; Jer. xlvii. 4; Am. ix. 7), who are once called Caphtorim (Deut. ii. 23), as of the same race as the Mizraite people of that name (Gen. x. 14; 1 Chr. i. 12). The position of the country, since it was peopled by Mizraites, must be supposed to be in Egypt or near to it in Africa, for the idea of the southwest of Palestine is excluded by the migration of the Philistines. In Jer. it is

spoken of as パリア いん and has therefore been

supposed to be an island. "N, however, has a wider signification; commonly it is any maritime hand, whether coast or island, as in the expression

(Gen. x. 5), by which the northern coasts and the islands of the Mediterranean seem to be intended, the former, in part at least, being certainly included. It must be remembered, how-

ever, that the Nile is spoken of as a sea (\Box_{\perp}^{n}) by Nahum in the description of No, or Thebes (iii. 8). [No.] It is also possible that the expression in Jer. merely refers to the maritime position of the Philistines (comp. Ez. xxv. 16), and that Caphtor is here poetically used for Caphtorim.

The writer (Encyclopadia Britannica, 8th ed. Egypt, p. 419) has proposed to recognize Caphtor in the ancient Egyptian name of Coptos. This name, if literally transcribed, is written in the hieroglyphics Kebtu, Kebta, and Keb-Her, probably pronounced Kubt, Kabt, and Kebt-Hor (Brugsch, Geogr. Inschr. Taf. xxxviii. no. 899, 900), whence Coptic KEGT, KENTO, KENTW,

KeBTW, Gr. Korros, Arab. Les, Kuft. The similarity of rame is so great that it alone might satisfy us, but the correspondence of Alyunros, as if Ala yurros, to אי כַכָּתּוֹר, unless אי refer to the Philistine coast, seems conclusive. We must sot suppose, however, that Caphtor was Coptos . ":

* The conquest of the Avim does not seem to have a complete when the Israelites entered the Promwel Land, for they are mentioned after the "five lords of the Philistines" in Josh. (xiii. 8). The expression therefore in Dout. ii. 28, "And the Avim who dwelt in Winges (こ)つざ口ひ, wrongly made a proper name in

the A. V., and in the LXX., where the fran. plural

course of time greatly increased. The Caphtorim stand last in the list of the Mizraite peoples in Gen. and Chr., probably as dwellers in Upper Egypt, the names next before them being of Egyptian, and the earliest names of Libyan peoples [EGVIT]. It is not necessary to discuss other identifications that have been proposed. The chief are Cappadocia. Cyprus, and Crete, of which the last alone, from the evident connection of the Philistines with Crete, would have any probability in the absence of more definite evidence. There would, however, be great difficulty in the way of the supposition that in the earliest times a nation or tribe removed from an island to the mainland.

The migration of the Philistines is mentioned or alluded to in all the passages speaking of Caphtor or the Caphtorim. It thus appears to have been an event of great importance, and this supposition receives support from the statement in Amos. In the lists of Gen. and Chr., as the text now stands, the l'hilistines are said to have come forth from the Casluhim - " the Casluhim, whence came forth the Philistines, and the Caphtorim." -- where the Hebrew forbids us to suppose that the Philistines and ('aphtorim both came from the ('asluhim. Here there seems to have been a transposition, for the other passages are as explicit, or more so, and their form does not admit of this explanation. The period of the migration must have been very remote, since the l'hilistines " were already established in Palestine in Abraham's time (Gen. xxi. 32, 34). The evidence of the Egyptian monuments, which is indirect, tends to the same conclusion, but takes us yet further back in time. It leads us to suppose that the Philistines and kindred nations were cognate to the Egyptians, but so different from them in manners that they must have separated before the character and institutions of the latter had attained that development in which they continued throughout the period to which their monuments belong. We find from the sculptures of Rameses III. at Medeenet Haboo, that the Egyptians about 1200 B. C. were at war with the Philistines, the Tok-karu, and the Shayratana of the Sea, and that other Shayratana served them as mercenaries. The Philistines and Tok-karu were physically cognate, and had the same distinctive dress; the Tok-karu and Shayratana were also physically cognate, and fought together in the same ships. There is reason to believe that the Tok-karu are the Carians, and the Shavratana cannot be doubted to be the Cherethim of the Bible and the earlier Cretans of the Greeks, inhabiting Crete, and probably the coast of Palestine also (Enc. Brit. art. Egypt, p. 462). All hear a greater resemblance to the Egyptians than does any other group of foreign peoples represented in their sculptures. This evidence points therefore to the spread of a seafaring race cognate to the Egyptians at a very remote time. Their origin is not alone spoken of in the record of the migration of the Philistines, but in the tradition of the

has become, through the previous

of "I to "I, 'Associat), even to Amah (Gam), Caphtorim who came forth from Caphtor destroyed them and dwelt in their stead," may mean that a part of the Avim alone perished.

884 CAPHTHORIM

Poznicians that they came from the Erythrean Sea [ARABIA], and we must look for the primeval sont of the whole race on the coasts of Arabia and Africa, where all ancient authorities lead us mainly to place the Cushites and the Ethiopians. [CUSH.] The difference of the Philistines from the Egyptians in dress and manners is, as we have seen, evident on the Egyptian monuments. From the Bible we learn that their laws and religion were likewise different from those of Egypt, and we may therefore consider our previous supposition as to the time of the separation of the peoples to which they belong to he positively true in their particular case. It is probable that they left ('aphtor not long after the first arrival of the Mizraite tribes, while they had not yet attained that attachment to the soil that afterwards so enquently characterized the descendants of those which formed the Egyptian nation. The words of the prophet Amos seem to indicate a deliverance of the Philistines from bondage. " [Are]

ye not as children of Ethiopians (שיים) unto me, [O] children of Israel? hath the Lord said Have not I caused Israel to go up out of the land of Egypt, and the Philistines from Caphtor, and Aram from Kir?" (Am. ix. 7). The mention of the Ethiopians is worthy of note: here they are perhaps spoken of as a degraded people. The intention appears to be to show that Israel was not the only nation which had been providentially led from one country to another where it might settle, and the interposition would seem to imply oppression preceding the migration. It may be remarked that Manetho speaks of a revolt and return to allegiance of the Libyans, probably the Lehabim. or Lubim, from whose name Libya, &c., certainly came, in the reign of the first king of the third dynasty, Necherôphês or Necherôchis, in the earliest age of Egyptian history, B. C. cir. 2600 (Cory, Anc. Frag. 2d ed. pp. 100, 101). R. S. P.

CAPHTHORIM (כפתרים: Vat. omita: Alex. Xapopieiu; [Comp. Ald. Kapbooielu :] (aphtorim). 1 Chr. i. 12. [CAPHTOR.]

CAPHTORIMS (CAPHTORIMS (CAPHTORIMS): of Karrd Bokes: Cappadoces). Deut. ii. 23. [CAPHTOR.]

CAPPADO'CIA (Kannadonia). This eastern district of Asia Minor is interesting in reference to New Testament history only from the mention of its Jewish residents among the hearers of St. Peter's first sermon (Acts ii. 9), and its Christian residents among the readers of St. Peter's first Epistle (1 Pet. i. 1). The Jewish community in this region. doubtless, formed the nucleus of the Christian : and the former may probably be traced to the first introduction of Jewish colonists into Asia Minor by Seleucus (Joseph. Ant. xii. 3, § 4). The Roman period, through the growth of large cities and the construction of roads, would afford increased facilitien for the spread both of Judaism and Christianity. t should be observed that ('appadocia was easily opproached from the direction of Palestine and Syria, by means of the pass called the Cilician Gates, which led up through the Taurus from the low coast of Cilicia, and that it was connected, at least under the later Emperors, by good roads with the district beyond the Euphrates.

The range of Mount Taurus and the upper course of the Euphrates may safely be mentioned, in general terms, as natural boundaries of Cappadocia on the south and east. Its geographical limits on the west and north were variable. In early times the other prisoners were committed at Rome (Asta

CAPIAIN OF THE GUARD

name reached as far northwards as the Euxine Sea The region of Cappadocia, viewed in this extent, constituted two satrapies under the Persians, and afterwards two independent monarchies. One was Cappadocia on the Pontus, the other Cappadocia near the Taurus. Here we have the germ of the two Roman provinces of Pontus and Cappadocia. [PONTUS.] Several of the monarchs who reigned in Cappadocia Proper bore the name of Ariarathes One of them is mentioned in 1 Macc. xv. 22. The last of these monarchs was called Archelaus (see Joseph. Ant. xvi. 4. § 6). He was treacherously treated by the Emperor Tiberius, who reduced his kingdom to a province A. D. 17. This is the position in which the country stood during the time of St. Peter's apostolic work.

Cappadocia is an elevated table-land intersected by mountain-chains. It seems always to have been deficient in wood; but it was a good grain country, and it was particularly famous for grazing. Its Roman metropolis, afterwards both the birthplace and episcopal see of St. Basil, was ('æsarea (now Knisarrych), formerly Mazaca, situated near Mount Argæus, the highest mountain in Asia Minor. Some of its other cities were equally celebrated in ecclesiastical history, especially Nyssa, Nazianzus, Samosata and Tyana. The native (appedocians seem originally to have belonged to the Syrian stock: and since Ptolemy (v. 6) places the cities of Iconium and Derbe within the limits of this region, we may possibly obtain from this circumstance some light on "the speech of Lyczonia," Acts ziv. 11. [LYCAONIA.] The best description of these parts of Asia Minor will be found in Hamilton's Researches, and Texier's Asie Mineure. J. S. H.

CAPTAIN. (1.) As a purely military title, Captain answers to TU in the Hebrew army, and χιλίαρχος (tribunus) in the Roman. [ARMT.] The "captain of the guard" (στρατοπεδάρχης' in Acts xxviii. 16, is also spoken of under ARMY

[p. 164]. (2.) 75, which is occasionally rendered captum, applies sometimes to a military (Josh x. 24; Judg. xi. 6, 11; Is. xxii. 3; Dan. xi. 18), sometimes to a civil command (e. y. ls. i. 10, iii. 6): its radical sense is division, and hence decision without reference to the means employed : the term

illustrates the double office of the DEU. (3.) The " captain of the temple " (στρατηγός τοῦ ἰεροῦ) mentioned by St. Luke (xxii, 4; Acta iv. 1, v. 24) in connection with the priests, was not a military officer, but superintended the guard of priests and Levites, who kept watch by night in the Temple. The office appears to have existed from an early date: the "priests that kept the door" (2 K. xii. 9, xxv. 18) are described by Josephus (Ant. x. 8, § 5) as robs филассонтая то lepon typemonas: 2 notice occurs in 2 Mace. iii. 4 of a mooordrns row iepov: this officer is styled $\sigma \tau pa \tau \eta \gamma \sigma s$ by Josephus (Ant. xx. 6, § 2; B. J. vi. 5, § 8); and in the

Mishus (Middoth, i. § 2) הר הבר, "the captain of the mountain of the Temple; " his duty, as described in the place last quoted, was to vistthe posts during the night, and see that the sentries were doing their duty. (4.) The term depayer, rendered " captain" (Heb. ii. 10), has no reference whatever to a military office. W. L. B.

• CAPTAIN OF THE GUARD. THE of the officer (A. V.) to whose custody Paul and

CAPTAIN OF THE GUARD

gaviii. 16), where a stricter translation would be Pretorian prefect or commander of the Prætorian samp. See Wieseler's Chronol. des apos ol. Zeitalt. p. 86. The force of the article in that place $(\tau \hat{\omega})$ στρατοπεδάρχη) opens an interesting question. The command of the prætorian guard was originally divided between two prefects, but during the reign of Clandius, Burrus or Burrhus Afranius, a distinguished Roman general, was appointed sole profectus prostorio, and retained this office as late certainly as the beginning of A. D. 62. On his death the command was committed again to two prefects, as it had been at first, and this continued to be the arrangement until a late period of the empire. The time of Paul's arrival at Rome could not have been far from A. D. 62, as admits of being shown by an independent calculation. Wieseler supposes $\tau \hat{\varphi}$ στρατοπεδάρχη to refer to this Burrus, as sole prefect at that time, and he urges the expression as a reason for assigning the apostle's arrival to A. D. 62, or the year preceding. So also Anger, De temporum in Actis Apost. ratione, p. 100, and Lewin, Fasti Sacri, p. 325. It is very possible that this view is the correct one. It would furnish a striking coincidence between Luke's narrative and the history of the times. Yet, in speaking of the prætorian prefect, the writer of the Acts may have meant the one who acted in this particular case, the one who took into his charge the prisoners whom the centurion transferred to him, whether he was sole perf ct or had a colleague with him; comp. xxiv. 23. De Wette assents to Meyer in this explanation of the article. The expression, as so understood, does not affirm that there was but one prefect, or deny it.

But if the words & exarbrap xos ... To orpaτοπεδάρχη (Acts xxviii. 16) are not genuine,^a this question concerning $\tau \hat{\varphi}$ falls away, so far as it depends on Luke's authority. At the same time the words (if added to the text) express what was unquestionably true, according to the Roman usage (see Plin. Epist. x. 65); but of course we have then the testimony only of some glossator who (if we may conjecture a motive), knowing what the rule was, apprises the reader of its observance as to the other prisorers, because he would represent Paul in being "suffered to dwell by himself" as exampted from the rule, or if at first subjected to the

Bor δ ἐκατόνταρχος . . . τῷ δὲ Παύλψ ἐπετράπη. Lachmann, Tischendorf, and Tregelles read simply everpany to Havito. The words in question, corresponding to " the centurion delivered the prisoners to the captain of the guard, but " of the A. V., were also rejected as a gloss by Mill and Bengel, and marked as very doubtful by Griesbach. Though found in a great majority of the manuscripts, they are wanting in all of the oldest and best class which contain the passage, namely, the Sinaitic, Vatican, Alexandrine, and a very valuable St. Petersburg palimpeest of the fifth century ; also in the two best cursive MSS. (loti, 18), another very good one (40), and one or two more. (The MSS. CDE are unfortunately mutilated here.) They are likewise absent from the oldest and best of the ancient versions (Peshito Syriac, Coptic, Vulgate, Armenian, and the Æthiopic in T. P. Platt's edition), and Chrysostom ignores them both in his text and commentary. The earliest witness for them appears to be the later Syriac version, as revised by Thomas of Harkel A. D. 616, which has them marked with an asterisk, indieating that they did not originally belong to it. (The Ethiopic of the Polyglott is here of no authority.) authorities : see Acts II. 30, 31 ; viil. 37 ; xiil. 12 · xv. The oldest Greak MS. which has them (L) is not earlier 18, 24, 34; xviil. 21; xxi. 8, 25; xxiil. 9; xxiv. 6-8 than the middle of the minth century; 'the oldest Greak 22, 23, 26; xxv. 16; xxviil. 29, etc. 36

same custody (which no doubt was the fact), as afterwards treated with special indulgence. - " Captain of the guard " in Gen. xxxix. 1, xl. 3, 4, &c. prcbably should be "captain" or "officer of the executioners." [JOSEPH; POTIPHAR.] H.

CAPTIVITIES OF THE JEWS. The bondage of Israel in Egypt, and their subjugation at different times by the Philistines and other nations, are sometimes included under the above title; and the Jews themselves, perhaps with reference to Daniel's vision (ch. vii.), reckon their national captivities as four --- the Babylonian, Median, Grecian, and Roman (Eisenmenger, Entdecktes Judenthum, vol. i. p. 748). But the present article is confined to the forcible deportation of the Jews from their native land, and their forcible detention, under the Assyrian or Babylonian kings.

The kingdom of Israel was invaded by three or four successive kings of Assyria. Pul or Sardanapalus, according to Rawlinson (Outline of Assyrian History, p. 14, but compare Rawl. Ilerodotus, vol. i. p. 466), imposed a tribute, B. C. 771 (or 762 Rawl.) upon Menahem (1 Chr. v. 26, and 2 K. xv. 19). Tiglath-Pileser carried away B. C. 740 the trans-Jordanic tribes (1 Chr. v. 26) and the inhab. itants of Galilee (2 K. xv. 29, compare Is. ix. 1), to Assyria. Shalmaneser twice invaded (2 K. xvii. 3, 5) the kingdom which remained to Hoshea, took Samaria B. C. 721 after a siege of three years, and carried Israel away into Assyria. In an inscription interpreted by Rawlinson (Herodotus, vol. i. p. 472), the capture of Samaria is claimed by King Sargon (Is. xx. 1) as his own achievement. The cities of Samaria were occupied by people sent from Babylon, Cuthah, Ava, Hamath, and Sepharvaim: and Halah, Habor, Hara, and the river of Gozan became the seats of the exiled Israelites.

Sennacherib B. C. 713 is stated (Rawl. Outline, p. 24, but compare Demetrius ap. Clem. Alexand. Stromata, i. 21, incorrectly quoted as confirming the statement) to have carried into Assyria 200,000 captives from the Jewish cities which he took (2 K. xviii. 13). Nebuchadnezzar, in the first half of his reign, B. C. 606-562, repeatedly invaded Judges, besieged Jerusalem, carried away the inhabitants to Babylon, and destroyed the city and Temple. Two distinct deportations are mentioned in 2 K. xxiv 14 (including 10,000 persons) and xxv. 11. One

father cited for them (Ecumenius) flourished at the end of the tenth. This concurrence of all the oldest and most independent authorities in the omission of words which might so easily creep in from a marginal gloss, seems irreconcilable with the supposition of their genuineness. They are, however, defended by Borne mann, De Wette, Meyer, and Alford, who would explain their omission by the homasteleuton in exartive ταρχος... στρατοπεδάρχη. This is unsatisfao tory, (1) because the homozotecenton is so imperfect that it was not likely to cause any error ; (2) because it would only occasion the loss of the words following exaring rapyos ; (8) because it does not appear how or why it should affect all our oldest and best authorities (including the versious used by all the principal churches) and leave hardly a trace of its influence on the great mass of modern manuscripts. Alford, it should be noticed, in his fourth edition (1861) brackets the words as doubtful. The critical scholar may find it instructive to compare other examples of glossarial widitions in the Receive. Text and the mass of inter manuscripts of the Acts, in opposition to the most ancient

886 CAPTIVITIES OF THE JEWS

in 2 Chr. xxxvi. 20. Three in Jer. lii. 28, 29, ineluding 4600 persons, and one in Dan. i. 8. The two principal deportations were, (1) that which took place B. C. 598, when Jehoiachin with all the nobles, soldiers, and artificers were carried away; and (2) that which followed the destruction of the Temple and the capture of Zedekiah B. C. 588. The three which Jeremiah mentions may have been the contributions of a particular class or district to the general captivity; or they may have taken place, under the orders of Nebuchadnezzar, before or after the two principal deportations. The captivity of certain selected children, B. C. 607, mentioned by Daniel, who was one of them, may have occurred when Nebuchadnezzar was colleague or lieutenant of his father Nabopolassar, a year before he reigned alone. The 70 years of captivity predicted by Jeremiah (xxv. 12) are dated by Prideaux from B. C. 606 (see Connection, anno 606; and comp. Davison, On Prophecy, Lect. vi. pt. 1). If a symbolical interpretation were required, it would be more difficult to regard (with Winer and Rosenmüller) these 70 years as an indefinite period designated arbitrarily by a sacred number, than to believe with St. Augustine (Enarratio in Ps. cxxvi. 1) that they are a symbol of "all time." The captivity of Ezekiel dates from B. C. 598, when that prophet, like Mordecai the uncle of Esther (ii. 6), accompanied Jehoiachin.

We know nothing, except by inference from the book of Tobit, of the religious or social state of the Israelitish exiles in Assyria. Doubtless the constant policy of 17 successive kings had effectually sstranged the people from that religion which centered in the Temple, and had reduced the number of faithful men below the 7000 who were revealed for the consolation of Elijah Some priests at least were among them (2 K. xvii. 28), though it is not certain that these were of the tribe of Levi (1 K xii. 31). The people had been nurtured for 250 years in idolatry in their own land, where they departed not (2 K. zvii. 22) from the sins of Jeroboam. notwithstanding the proximity of the Temple, and the succession of inspired prophets (2 K. xvii. 13) among them. Deprived of these checks on their natural inclinations (2 K. xvii. 15), torn from their native soil, destitute of a hereditary king, they probably became more and more closely assimilated to their heathen neighbors in Media. And when, after the lapse of more than a century, they were joined B. C. 598 by the first exiles from Jerusalem. very few families probably retained sufficient faith in the God of their fathers to appreciate and follow the instruction of Ezekiel. But whether they were many or few, their genealogies were probably lost, a fusion of them with the Jews took place, Iarael ceasing to envy Judah (Is. xi. 13); and Ezekiel may have seen his own symbolical prophecy (xxxvii. 15-19) partly fulfilled.

The captive Jews were probably prostrated at first by their great calamity, till the glorious vision of Ezekiel in the 5th year of the Captivity revived and reunited them. The wishes of their conqueror were satisfied when he had displayed his power by transporting them into another land, and gratified his pride by inscribing on the walls of the royal palace his victorious progress and the number of his captives. He could not have designed to increase the population of Babylon, for he sent Babylonian colonists into Samaria. One political end certainly

CAPTIVITIES OF THE JEWS

ations (see Gesenius on Is. xxxvi. 16, and compase Gen. xlvii. 21). It was also a great advantage ta the Assyrian king to remove from the Egyptian border of his empire a people who were notoriously well-affected towards Egypt. The captives were treated not as alaves but as colonists. There was nothing to hinder a Jew from rising to the highest eminence in the state (1)an. ii. 48), or holding the most confidential office near the person of the king (Neh. i. 11; Tob. i. 13, 22). The advice of Jerrmiah (xxix. 5, &c.) was generally followed. The exiles increased in numbers and in wealth. They observed the Mosaic law (Esth. iii. 8; Tob. xiv. 9). They kept up distinctions of rank among themselves (Fz. xx. 1). And though the assertion in the Talmud be unsupported by proof that they assigned thus early to one of their countrymen the title of Head of the Captivity (or, captain of the people, 2 Esdr. v. 16), it is certain that they at least preserved their genealogical tables, and were at no loss to tell who was the rightful heir to David's throne. They had neither place nor time of national gathering, no Temple; and they offered no sacrifice. But the rite of circumcision and their laws respecting food, &c. were observed ; their priests were with them (Jer. xxix. 1); and possibly the practice of erecting synagogues in every city (Acts xv. 21) was begun by the Jews in the Babylonian captivity.

The Captivity is not without contemporaneous literature. In the apocryphal book of Tobit, which is generally believed to be a mixture of postical fiction with historical facts recorded by a contemporary, we have a picture of the inner life of a family of the tribe of Naphtali, among the captives whom Shalmaneser brought to Nineveh. The apocryphal book of Baruch seems, in Mr. Layard's opinion, to have been written by one whose eyes, like those of Ezekiel, were familiar with the gigantic forms of Assyrian sculpture. Several of the Psalms appear to express the sentiments of Jews who were either partakers or witnesses of the Assyrian captivity. Ewald assigns to this period Ps. xlii., xliii., lxxxiv., xvii., xvi., xlix., xxii., xxv., xxxviii., lxxxviii., xl., lxix., cix., li., Ixxi., xxv., xxxiv., Ixxxii., xiv., cxx., cxxi., cxxiii., cxxx., cxxxi. And in Ps. lxxx. we seem to have the words of an Israelite, dwelling perhaps in Judzea (2 Chr. xv. 9, xxxi. 6), who had seen the departure of his countrymen to Assyria: and in Ps. exxxvii. an outpouring of the first intense feelings of a Jewish exile in Babylon. But it is from the three great prophets, Jeremiah, Fzekiel, and Daniel. that we learn most of the condition of the children of the captivity. The distant warnings of Jeremiah, advising and cheering them, followed them into Assyria. There, for a few years, they had nc prophetic guide: till suddenly the vision of Ezekia. at Chebar (in the immediate vicinity of Nineveh. according to Layard, or, according to others, near Carchemish on the Euphrates) assured them that the glory which filled the Temple at Jerusalem was not hopelessly withdrawn from the outcast people of God. As Jeremiah warned them of coming woe, so Ezekiel taught them how to bear that which was come upon them. And when he died, after passing at least 27 years (Ez. xxix. 17) in captivity, Daniel survived even beyond the Return; and though his high station and ascetic life probably secluded him from frequent familiar intercourse with his people, he filled the place of chief interpreter of was attained — the more easy government of a God's will to Israel, and gave the most conspicuous acopie separated from local traditions and associ- example of devotion and obedience to His laws.

The Babylonian captivity was brought to a close by the decree (Ezr. i. 2) of Cyrus B. C. 536, and 'ae return of a portion of the nation under Sheshbazzar or Zerubbabel B C. 535 Ezra B. C. 458, and Nehemiah B. C. 445. The number who returned apon the decree of B. ~. 536 (which was possibly framed by Daniel, Milman, Hist. of Jews, ii. 8) was 42,360, besides servants. Among them about 30,000 are specified (compare Ezr. ii. and Neh. vii.) as belonging to the tribes of Judah, Benjamin, and Levi. It has been inferred (Prideaux, anno 536) that the remaining 12,000 belonged to the tribes of Israel (compare Ezr. vi. 17). And from the fact that out of the 24 courses of priests only 4 returned (Ezr. ii. 36), it has been inferred that the whole number of exiles who chose to continue in Assyria was about six times the number of those who returned. Those who remained (Eath, viii, 9, 11), and kept up their national distinctions, were known as The Dispersion (John vii. 35; 1 Pet. i. 1: James i. 1): and, in course of time, they served a great purpose in diffusing a knowledge of the true God, and in affording a point for the commencement of the efforts of the Evangelists of the Christian faith.

Many attempts have been made to discover the ten tribes existing as a distinct community. Josephus (Ant. xi. 5, § 2) believed that in his day they dwelt in large multitudes, somewhere beyond the Euphrates, in Arsareth, according to the author of 2 Esdr. xiii. 45. Rabbinical traditions and fables, committed to writing in the middle ages, assert the same fact (Lightfoot, Hor. Hebr. in 1 Cor. xiv. Appendix), with many marvellous amplifications (Eisenmenger, Ent. Jud. vol. ii., ch. x.; Jahn, //ebrew Commonwealth, App. bk. vi.). The imagination of Christian writers has sought them in the neighborhood of their last recorded habitation: Jewish fratures have been traced in the Affghan tribes: rumors are heard to this day of a Jewish colony at the foot of the Himalayas: the Black Juws of Malabar claim affinity with them: elaborate attempts have been made to identify them recently with the Nestorians, and in the 17th century with the Indians of North America. But though history bears no witness of their present distinct existence, it enables us to track the footsteps of the departing race in four directions after the time of the Captivity. (1.) Some returned and mixed with the Jews (Luke ii. 36; Phil. iii. 5, Sc.) (2.) Some were left in Samaria, mingled with the Samaritans (Ezr. vi. 21; John iv. 12), and became bitter enemies of the Jews. (3.) Many remained in Assyria, and mixing with the Jews, formed colonies throughout the East, and were recognized as an integral part of the Dispersion (see Acts ii. 9, xxvi. 7; Buchanan's Christian Researches, p. 212), for whom, probably ever since the days of Ezra, that plaintive prayer, the tenth of the Shemoneh Eare, has been daily offered, " Sound the great trumpet for our deliverance, lift up a banner for the gathering of our exiles, and unite us all together from the four ends of the sarth." (4.) Most, probably, apostatized in Asvria, as Prideaux (anno 677) supposes, and adopted the usages and idolatry of the nations among whom they were planted, and became wholly swallowed up p them. Dissertations on the Ten Tribes have

been written by Calmet, Commentai e littérul, vol iii. and vi.; by Witsius, *Ægyptiaca*; and by J. D. Michaelis.

The Captivity was a period of change in the ver nacular language of the Jews (see Neh. viii. 8) and in the national character. The Jews who returned were remarkably free from the old sin of idolatry: a great spiritual renovation, in accordance with the divine promise (Ez. xxxi. 24-28), was wrought in them. A new and deep feeling of reverence for the letter of the law and for the person of Moses was probably a result of the religious service which was performed in the synagogues. A new impulse of commercial enterprise and activity was implanted in them, and developed in the days of the Dispersion (see James iv. 13). W. T. B.

CARABA'SION ('Paβaσίων; [Vat. Kapaβασειων; Ald.] Alex. Kapaβaσίων: Marimoth), a corrupt name to which it is difficult to find anything corresponding in the Hebrew text (1 Fadr. ix. 34).

CARBUNCLE. The representative in the A. V. of the Hebrew words 'ekdlich and bâr'kath or bâre'keth.

1. 'Ekdåsh (Π.) : λίθος κρυστάλλου; λίθος γλυφήs, Sym. Theod.; λ. τρηπτανισμού, Aq.: lapides sculpti) occurs only in Is. liv. 12 in the description of the beauties of the new Jerusalem: " I will make thy windows of agates and thy gates of carbuncles " (comp. Tob. xiii. 16, 17, and Rev. xxi. 18-21) - "general images," as Lowth (Notes on Is. l. c.) has remarked, "to express beauty, magnificence, purity, strength, and solidity, agreeably to the ideas of the Eastern nations." The translators of the A. V., having in mind the etymology of the Hebrew word, a render it " carbuncle; " but as many precious stones have the quality of "shining like fire," it is obvious that such an interpretation is very doubtful. Symmachus. referring the word to a Chaldee signification of the root, namely, "to hore," understands "sculptured stones," whence the Vulg Inputes sculpti (see Ro senmüller, Schol. ad Jes. liv. 13). Perhaps the term may be a general one to denote any bright sparkling gem, but as it occurs only once, without any collateral evidence to aid us, it is impossible to determine the real meaning of the word.

2. Barékath, bareketh (גרקר, הַרָקר, בּרָקר, בּרָקר, בּרָקר, בּרָקר, בּרָקר, בּרָקר, בּרָקר, בּרָקר, בּרָקר, בּ σμάραγδος, κεραύνιος, Sym. : smaragdus), the third stone in the first row of the sacerdotal breastplate (Ex. xxviii. 17, xxxix. 10), also one of the mineral treasures of the king of Tyre (Ez. xxviii 13). Braun (De Vestit. Šacerd. Heb. p. 652, Amst. 1680) supposes with much probability that the smaragdus or emerald is the precious stone signified. This view is supported by the LXX. (which always gives $\sigma \mu d\rho \alpha \gamma \delta \sigma s$ as the representative of the bar'kath), the Vulgate, and Josephus (Ant. iii. 7, § 5). Pliny (xxxvii. 5) speaks in terms of the warmest admiration of the smaragdus, and enumerates no fewer than twelve kinds, but it is probable some of them are malachites or glass. It is certain that the smaragdus which, according to Theophrastus (Fr. ii. 24, ed. Schneider), was sent as a present from the king of Babylon into Egypt.

" axtundere instituit ignen: ex igniario " (Freytag, Lee Arab. s. v.).

• From TTT, " to burn." Cf. + 1 Arabie _ it.

...

b From הברק, "to send forth lightning," "w

and which, as Egyptian chroniclers relate, was four subits long by three wide, must have been made of some other material than emerald; but $\sigma\mu d\rho a\gamma \delta os$ is used by Theophrastus to denote the emerald. "This gem," he says, "is very rare and of a small size . . . It has some peculiar properties, for it renders water of the same color with itself. . .

It soothes the eyes, and people wear seals of this stone in order that they may look at them." a Mr. King (Antique Gems, p. 30) is of opinion that the smaragdi of Pliny may be confined to the green ruby and the true emerald. Braun believes that the Greek $\sigma\mu d\rho\alpha\gamma\delta\sigma$, $\mu d\rho\alpha\gamma\delta\sigma$ is etymologically allied to the Hebrew term, and Kalisch (Fx. xxvii. 17) is inclined to this opinion: see also Gesenius,

Ileb. et Ch. Lex. s. v. JTJ. Some, however, believe the Greek word is a corruption of the Sanskrit smarakata, and that both the gem and its name were imported from Bactria into Europe, while others hold that the Sanskrit term came from the West. See Mr. King's valuable remarks on the Smaragdus, "Antique Gems," p. 30-37.

W. H.

CAR'CAS (D) : 'Apkeraios [this form belongs to Carshena, ver. 14; $\Theta a \rho a \beta d s$ or $-\beta d s$; Aler. $\Theta a \beta a s$; Comp. Xapa $\beta d s$:] Charchus), the seventh of the seven "chamberlains" (i. e. eunuchs,

סריסים) of king Ahasuerus (Fath. i. 10). The name has been compared with the Sanskrit karkaga = severe (see Gesenius, 713).

 CAR'CHAMIS (Χαρκαμύς; Alex. Καλχαμυς; 11 MSS. Καρχαμύς: Charcamis), a city on the Euphrates (1 Ledr. i. 23), the same as CAR-CHEMISH.

CAR'CHEMISH (בָּרָפָמִישׁ: [in Jer.,] Xapμels; [Comp. Kaoχaμhs:] Charcanuis). The Scriptural Carchemish is not, as has generally been supposed, the classical Circesium. It hay very much higher up the Euphrates, occupying nearly the site of the later Maboy, or Hierapolis. The Assyrian inscriptions show it to have been, from about B. C. 1100 to B. C. 850, a chief city of the Hittites, who were masters of the whole of Syria from the borders of Damascus to the Euphrates at Bir, or Birchjik. It seems to have commanded the ordinary passage of the Euphrates in this part of its course and thus in the contentions between Egypt and Assyria its possession was of primary consequence (comp. 2 Chr. xxxv. 20 with Jer. xlvi. 2). [Add Is. x. 9.] Carchemish appears to have been taken by Pharaoh-Necho shortly after the battle of Megiddo (ab. B. C. 608), and retaken by Nebuchadnezzar after a battle three years later, B. C. 605 (Jer. xlvi. 2). The word Carchemish would mean "the fort of Chemosh," the well-known deity of the Moabites. [In the A. V. 2 Chr. xxv. 20 it is written CHARCHEMISH; in 1 Esdr. i. 23, CAR-G. R. снамия.]

CARE'AH (כרח) [bald-head]: Kaphe; Alex. Kapns; [Ald. Kapné:] Caree), father of Johanan (2 K. xxv. 23), elsewhere in the A. V. spelt KA-REATI.

CARIA (Kaple), the southern part of the region which in the N. T. is called ASIA, and the

CARMEL

southwestern part of the peninsula of Asia Miloer In the Roman times the name of Caria was probably less used than previously. At an earlier period we find it mentioned as a separate district (1 Macc. xv. 23). At this time (n. c. 139) it was in the enjoyment of the privilege of freedom, granted by the Romans. A little before it had been assigned by them to Rhodes, and a little later it was incorporated in the province of Asia. From the context it appears that many Jews were resident in Caria. The cities where they lived were probably Halicarnassus (ib.), Unitus (ib also Acts xxii. 7), and Miletus (Acts xx. 15-38). Off the coast of Caria were the islands PATMON, COS, RHODES. J. S. H.

CARMA'NIANS (Carmonii). The inhabitants of Carmania, a province of Asia on the north side of the Persian Gulf (2 Esdr. xv. 30). They are described by Strabo (xv. p. 727) as a warlike race, worshipping Ares alone of all the gods, to whom they sacrifice an ass. None of them married till he had cut off the head of an enemy and presented it to the king, who placed it on his palace, having first cut out the tongue, which was chopped up into small pieces and mixed with meal, and in this condition, after being tasted by the king, was given to the warrior who brought it, and to his family to eat. Nearchus says that most of the customs of the Carmanians, and their language, were Persian and Median. Arrian gives the same testimony (Ind. 38), adding that they used the same order of battle as the l'ersians. W. A. W.

CAR'ME (Хариі; [Vat.] Alex. Харил; [Ald. Карић:] Caree), 1 Esdr. v. 25. [Накім.]

CAR'MEL. Nearly always with the definite article, 727, i. c. " the park," or " the wellwooded place" [garden-land, Fürst]. 1. (& Kdpunlos: Carmel [Carmelus, Charmel]. In Kings, generally " Mount C.," בהר הם: Spos to Kaput λιον: in the Prophets, "Carmel.") A mountain which forms one of the most striking and characteristic features of the country of Palestine. As if to accentuate more distinctly the bay which forms the one indentation in the coast, this noble ridge, the only headland of lower and central Palestine, forms its southern boundary, running out with a bold bluff promontory all but into the very waves of the Mediterranean. From this point it stretches in a nearly straight line, bearing about S. S. E., for a little more than twelve miles, when it terminates suddenly by a bluff somewhat corresponding to its western end, breaking down abruptly into the hills of Jenin and Samaria which form at that part the central mass of the country

Carmel thus stands as a wall between the maritime plain of Sharon on the south, and the more inland expanse of Esdraelon on the north. Towards the former the slopes or spure, by which the central ridge descends, are gradual; but on the north side the gradients are more sudden, in many places descending almost by precipices to the Kishon, which runs at the foot of the mountain in a direction generally parallel to the central axis.

The structure of Carmel is in the main the J-ra formation (apper colite), which is prevalent in the centre of Western Palestine — a soft white limestone, with nodules and veins of flint. As usual in limestone formations it abounds in caves ("more than 3000," Mislin, ii. 48), often of great length

The smaragdus of Cyprus, however, of which Theophrastus speaks, is the copper emerald, Chrysossils; which he seems himself to have suspected.

and axtremely tortuous. At the west end are found chalk and tertiary breccia formed of fragments of chalk and flint (Russegger, in Ritter, Pal. p. 712). On the northeast of the Mount, beyond the Nahr el-Mukatta, plutonic rocks appear, breaking through the deposited strata and forming the beginning of the basalt formation which runs through the Plain of Esdraelon to Tabor and the Sea of Galilee (Ritter, 712-13). The round stones known by the names of " Lapides Judaici" and " Elijah's melons," are the bodies known to geologists as "geodes." Their exterior is chert or flint of a lightish brown color; the interior hollow, and lined with crystals of quartz or chalcedony. They are of the form, and often the size, of the large water-melons of the east. Formerly they were easily obtained, but are now very rarely found (Seetzen, ii. 131-4; Parkinson's Organic Remains, i. 322, 451). The "olives " are commoner. They are the fossil spines of a kind of echinus (cirluris glundifera) frequent in these strata, and in size and shape are exactly like the fruit (l'arkinson, iii. 45). The "apples" are probably the shells of the *cidaris* itself. For the legend of the origin of these "fruits," and the position of the "field" or "garden" of Elijah in which they are found, see Mislin, ii. 64, 65.ª

In form Carmel is a tolerably continuous ridge, at the W. end about 600.^b and the E. about 1600 feet above the sea. The highest part is some four miles from the east end, at the village of Esfich, which, according to the measurements of the English engineers, is 1728 feet above the sea. In appearance Carmel still maintains the character which there is no reason to doubt was the origin of its name. It is still clothed with the same "excellency " of " wood," which supplied the prophets of Israel and Judah alike with one of their most favorite illustrations (Is. xxxiii. 9; Mic. vii. 14). Modern travellers delight to describe its "rocky dells with deep jungles of copse," - its "shrubberies thicker than any others in central Palestine " (Stanley, MS.), - its "impenetrable brushwood of oaks and other evergreens, tenanted in the wilder parts by a profusion of game and wild animals" (Porter, Mandb.), but in other places bright with "hollyhocks, jasmine, and various flowering creepers" (Van de Velde). "There is not a flower, save the last-named traveller, "that I have seen in Galilee, or on the plains along the coast, that I do not find here on Carmel . . . still the fragrant, lovely mountain that he was of old " (i. 317-18).

^a The legend is sometimes told of Lazarus (Seetsen, *R:isen*, 1854, ii. 184).

^b The cupols of the convent is 560 ft. above the sea (Admiralty Chart, 1585). For the general form of the ridge, see the section on Van de Velde's new map. c * "The Flora of Carmel," says Schubert, writing

 $c \circ "$ The Flors of Carmel," says Schubert, writing en the spot, " is one of the richest and most diversified in all Palestine, since it unites the products of the mountain with those of the valley and the ses-onsat." He enumerates forty-seven different kinds of flowers found there, without pretending to complete the list. "A botanist," he remarks, " might spend a year there, and every day be adding new specimens to his collection " (*Reise in das Morgenland*, ill. 212).

Mr. Tristeam, who wandered at leisure over the Carmel range, speaks of "the wonderful profusion of flowsring shrubs, in all their glory " (about the middle of Warch), as the grand characteristic of the " excellency of Oarmel." He mentions (giving at the same time be botanical names) the arbutus, myrite, scented bay, resider-rose, a sweet-scented evergreen like the laurustuss, sider, caroh-tree or locust, wild-olive, strebhtis "The whole mountain-side was dressed with blossoms, and flowering abrubs, and fragrant heris". (Martineau, p. 539)." Carmel fell within the lot of the tribe of Aaber

(Josh. xix. 26), which was extended as far south as Dor (Tuntura), probably to give the Asherites a share of the rich corn-growing plain of Sharon. The king of "Jokneanı of Carmel" was one of the Canaanite chiefs who fell before the arms of Joshua (xii. 22). These are the earliest notices which we possess of the name. There is not in them a hint of any sanctity as attaching to the mount. But taking into account the known propensity of the early inhabitants of Palestine to convert "high places " into sanctuaries, - the prominence of Carmel. — the fact that an altar of Jehovah did exist there before the introduction of Baal worship into the kingdom (1 K. xviii. 30), - Elijah's choice of the place for the assembly of the people, such as semblies being commonly held at holy places, -and the custom, which appears to have been prevalent, of resorting thither on new-moon and sabbath (2 K. iv. 23), - taking these into account, there seem to be grounds for believing that from very early times it was considered as a sacred spot. In later times we know that its reputation was not confined to Palestine. Pythagoras was led to it by that reputation; such is the express statement of his biographer lamblichus, who himself visited the mountain; Vespesian too came thither to consult -so we are told by Tacitus, with that mixture of fact and fable which marks all the heathen notices of Palestine - the oracle of the god, whose name was the same as that of the mountain itself; an oracle without image or temple, - "ara tantum et reverentia " (Dict. of Geogr. Carmelus).

But that which has made the name of Carmel most familiar to the modern world is its intimate connection with the history of the two great prophets of Israel — Elijah and Eliaha. The fiery zeal of the one, the healing tenderness of the other, are both inseparably connected in our minds with this mountain. Here Elijah brought back Israel to allegiance to Jehovah, and alew the prophets of the foreign and false god; here at his entresty were consumed the successive "fifties" of the royal guard; but here, on the other hand. Eliaha received the visit of the bereaved mother whose sonhe was soon to restore to her arms (2 K. iv. 25, dc.).

The first of these three events, without doubt,

tree-broom, Judas-tree (one mass of bunches of brilliant red laburnum-shaped bloom), hoary-leafed hawthorn, service-apple, and most abundant of all, the storax-tree, "one sheet of pure white blossom, rivalling the orange in its beauty and its perfume; all these in flower together wafted their fragrance in volumes through the air."

"Then the ground, wherever there was a fragment of open space, was covered with tail red hollyhocks, pink convolvalus, valerians, a beautiful large red linum, a gladiolus, a gigantic mottled arum, red tulirs, ranunculuses (large and red), pheasant's eye, of er tiese varieties, tufts of exquisite cyclamen, as mase of bloom under every tree, five species of orchis, -- the curious Ophrys airaia, with its bee-like lip, another like the spider-orchis, and a third like the man-orchis ; while four species of Onosma, and especially the brilliant yellow Onosma Syriacum, hung from every rock It was the garden of Eden run wild; yet all this beauty scarcely lasts a month" (Land of Israel, pp 406, 407, 2d ed.).

Digitized by GOOQ

box place at the eastern end of the ridge. In fact it is difficult to find another site, the actual name of which has not been preserved, in which every particular is so minutely fulfilled as in this. The tradition preserved in the convent, and among the Druses of the neighboring villages, — the names of the places, — the distance from Jezreel, — the nature of the locality, — the presence of the neverfailing spring, — all are in its favor. It is, how ever, remarkable that the identification has been made but lately, and also that it should have been made by two travellers almost at the same time — Lieut. Van de Velde in 1852, and Professor Stanley in 1853. This interesting site cannot be better described than in the words of the latter traveller.

"The tradition is unusually trustworthy; it is perhaps the only case in l'alestine in which the recollection of an alleged event has been actually retained in the native Arabic nomenclature. Many names of towns have been so preserved; but here is no town, only a shapeless ruin, yet the spot has a name, - EL Maharrakah, - 'the Burning,' or 'the Sacrifice.' The Druses come here from a distance to perform a yearly sacrifice; and, though it is possible this practice may have originated the name, it is more probable that the practice itself arose from an earlier tradition. . . . But be the tradition good or bad, the localities adapt themselves to the event in almost every particular. The summit thus marked out is the extreme eastern point of the range, commanding the last view of the sea behind, and the first view of the great plain in front. . . . There on the highest ridge of the mountain may well have stood, on its sacred 'highplace,' the altar of Jehovah which Jezebel had cast down. Close beneath, on a wide upland sweep, under the shade of ancient olives, and round a well a of water, said to be perennial, and which may therefore have escaped the general drought, and have been able to furnish water for the trenches round the altar, must have been ranged on one side the king and people with the 850 prophets of Baal and Astarte, and on the other the solitary and commanding figure of the prophet of Jehovah. Full before them opened the whole plain of Esdraelon; the city of Jezreel, with Ahab's palace and Jezebel's temple, distinctly visible; in the nearer foreground, immediately under the base of the mountain, was clearly seen the winding stream of the Kishon." To this may be added that a knoll is pointed out between the ridge and the plain, bearing the name of Tell Kasis,b "the hill of the Priests," and that the modern name of the Kishon is Nahr el-Mukatta, "the river of slaughter." "The closing scene still remains. From the slaughter by the side of the Kishon the king went up to the glades of Carmel to join in the sacrificial feast. And Elijah too ascended to the ' top of the mountain,' and there with his face on the earth renained rapt in prayer, while his servant mounted • the highest point of all, whence there is a wide iew of the blue reach of the Meditegranean, over the western shoulder of the ridge. . . . Seven times the servant climbed and looked, and seven

• Josephus distinctly says that the water was obmined from the neighboring well: ἀπὸ τῆς κρήνης (Δπ. viii. 13, § 5). There is therefore no occasion for the " somethence " discovered by Prof. Blunt, Und. Councidences (II. xxii.).

• But this knoll appears, from the description of "an de Velde (i. 830), and from his new map (Dec.

book place at the castern end of the ridge. In fact | times there was nothing. . . . At list cut of the is difficult to find another site, the actual name far horizon there rose a little cloud,^c and it grew of which has not been preserved, in which every in the deepening shades of evening till the whole particular is so minutely fulfilled as in this. The sky was overcast, and the forests of Carmel shook tradition preserved in the convent, and among the Druses of the neighboring villages, — the names of in castern regions precede a coming tempest " (Site backs, — the distance from Jzzreel, — the na- nui d Palestine, 353-6).

There is good reason to believe that a later incident in the life of the same great prophet took place on Carmel. This was when he "caused fire to come down from heaven" and consume the twe "fifties" of the guard which Ahaziah had despatched to take him prisoner, for having stopped his messengers to Baal-zebub the god of Ekron (3 K. i. 9-15). [See ELIJAH, § 3.] In this narrative our Version, as is too frequently the case, conceals the force of the original by imperfect translation. "A hill" (v. 9) should be "the mount"

(ההה), the word always used for Carmel, and, in

connection with Elijah, for Carmel only, with the exception of Sinai, which of course cannot be intended here. Josephus (Ant. ix. 2, § 1), with equal force, has $i\pi i \tau \eta s$ κορυφήs τοῦ δρουs.

The tradition in the present convent is, that Elijah and Elisha both resided on the mountain, and a cave is actually shown under the high-altar of the church as that of Elijah. There is nothing in the Scripture to sanction such a statement with regard to Elijah, but in the case of Elisha, the tradition may rest on better grounds. After the ascent of Elijah, Elisha went to Mount Carmel (2 K. ii. 25), though only for a time; but he was again there at the Shunammite's visit (iv. 25), and that at a time when no festival, no "new-moon or sabbath" (iv. 23), required his presence. (In iv. 27, there is nearly the same error as was noticed above in reference to i. 9; "the hill" should be rendered "the mount.")

This is the last mention of Carmel as the scene of any event in the sacred history. Its sanctity nc doubt remained, but it is its richness and its prominence, — "Tabor among the mountains; Carmel by the sea," — which appear to have taken hold of the poets of the nation, both of Israel and Judah, and their references to it are frequent and charaoteristic (Cant. vii. 5; Is. xxxv. 2, xxxvii. 24; Jer zlvi. 18, L 19; Am. i. 2, ix. 3; Mic. vii. 14; Nah. i. 4).

Carmel has derived its modern name from the great prophet; Mar Elyas is the common designation, Kirmel being occasionally, but only scidom, heard. It is also the usual name of the convent, though dedicated "in honorem BB. Virginia Marise."

Professor Stanley has pointed out $(S. \not P. 352)$ that it is not any connection with Elijah that gives the convent its interest to the western world, but the celebrated order of the Barefooted Carmelite Friars, that has sprung from it, and carried its name into Europe. The order is said in the traditions of the Latin Church to have originated with Elijah himself (St. John of Jerus. quoted in Mislin, 49), but the convent was founded by St. Louis, and its French origin is still shown by the practice

1858), the only one in which it is marked, to be soc far off.

^c This cloud is treated in the formularies of the Roman Ostholic Church as a type of the Virgin Mary. (See Mistin, ii. p. 45, and Brevierium Rom July 18.)

of unfurling the French flag on various :ccasions. Edward I. of England was a brother of the order, and one of its most famous generals was Simor. Stokes of Kent (see the extracts in Wilson's Lands, ii. 246. For the convent and the singular legends connecting Mount Carmel with the Virgin Mary and our Lord, see Mislin, ii. 47-50). By Napoleon it was used as a hospital during the siege of Acre, and after his retreat was destroyed by the Arabs. At the time of Irby and Mangles's visit (1817) only one friar remained there (Irby, 60).

* It is instructive, as a means of learning the relative position of places, to know what points of geographical interest can be seen from such watchtowers of the Holy Land. The best position for viewing the prospect from Carmel is that furnished from the flat roof of the convent. Standing there, with our faces toward the east, the attitude of the Hebrew in naming the points of the compass, we have behind us "the great and wide sea," as the Psalmist calls it (civ. 25), which suggested to the sacred writers so many of their grandest images for setting forth an idea of God's power. Before us lies an extensive reach of the plain of Esdraelon (Jezred), and the summits of Gilboa and the lesser Hermon. On the southeast is the mountainous tract, known as that of Ephraim or Samaria, filled up with a rolling sea of hill-tops to an indefinite extent. Looking to the south, along the coast, at the distance of ten miles, is Athlit, the site of a famous castle of the Crusaders, one of the last footholds which they relinquished to the Saracens. few miles beyond there, though not in sight, are the ruins of Cæsarea, so interesting from its connection with the fortunes of the great apostle. The line of vision on the north is bounded by the hills near Nazareth and Safed. Indeed, the path which leads up to the monastery of Carmel, indented in the white limestone, is distinctly visible, like a strip of snow, from the Wely so famous for its view of Esdraelon behind Nazareth. It would be easy, so far as the distance is concerned, to make out the position of ancient Tyre, now Sur; but the projec-tion of Rus el-Abi ud, the White Promontory. hides it from view. The graceful curve of the bay of Akka, sweeping from that city (Accho of the O. T. and Ptolemais of the N. T.) to the head of Carmel, appears from here to great advantage. Glimpees of the Kishon (el-Makatta) as its waters flash under the sun-light mark, at points here and there, the course of that stream as it winds its way from the foot of Tabor to the Mediterranean. Directly at the base of the mount is the little sea-port of Haifa, one of the harbors of Asher, but actually held by the Sidonians (Judg. i. 31). A rich landscape of olive-yards, gardens of vegetables, wheat-fields, and a few palms, fills up the narrow margin between the sea and the roots of the mountain.

For a description of the scene from other hands, see Lord Nugent's Lands, Classical and Sacrea ii. 157; Tristram's Land of Israel, p. 65; Pes sense's Land of the Gospel, p. 150 ff; and Tischen torf's Reise in den Orient, ii. 222-225. H.

Carmel [Carmelus].) A town in the mountainwas country of Judah (Josh. xv. 55), familiar to us m the residence of Nabal (1 Sam. xxv. 2, 5, 7, 40), ad the native place of David's favorite wife, "Ab-(3 + the Carmelitees " (1 Sam. xxvii. 3; 1 Chr. iii. | fortified city in the country east of Jordan - " the

set up a "place" (T), i.e. literally a "hand;" comp. 2 Sam. xviii. 18, "Absalom's place," where the same word is used) after his victory over Am alek (1 Sam. xv. 12). And this Carmel, and not the northern mount, must have been the spot at which king Uzziah had his vineyards (2 Chr. xxvi. 10). In the time of Eusebius and Jerome it was the seat of a Roman garrison (Onomusticon, Carmelus). The place appears in the wars of the Cru-sades, having been held by king Amalrich against Saladin in 1172. The ruins of the town, now Kurmul, still remain at ten miles below Hebron in a slightly S. E. direction, close to those of Main (Maon), Zif (Ziph), and other places named with Carmel in Josh. xv. 55. They are described both by Robinson (i. 494-8) and by Van de Velde (ii. 77-79), and appear to be of great extent. Conspicuous among them is a castle of great strength, in the walls of which are still to be seen the large bevelled masonry characteristic of Jewish buildings. There is also a very fine and large reservoir. This is mentioned in the account of king Amalrich's occupation of the place, and now gives the castle its name of Kasr el-Birkeh (Van de Velde, ii. 78).

CAR'MELITE (גַרָמָלָי): Καρμήλιος, Χαρ µaðat [Vat. FA. -dal] in 1 Chr. xi. 37; Alex. Kapμηλειτης in 2 Sam. ii. 2, Καρμηλι in 1 Chr. xi. 37: Carmeli, de Carmelo, Carmelites). A native of Carmel in the mountains of Judah. The term is applied to Nabal (1 Sam. xxx. 5; 2 Sam. ii. 2, iii. 3) and to Hezrai, or Hezro, one of David's guard (2 Sam. xxiii. 35; 1 Chr. xi. 37). In 2 Sam. iii. 3 the LXX. [Kaputhlia] must have read בְּרָמָלִיר, " Carmelitess." W. A. W.

CAR'MELITESS (ברקליה: Kaputhauos, Kaputhria: Carmeli, Carmelitis). A woman of Carinel in Judah: used only of Abigail, the favorite wife of David (1 Sam. xxvii. 3; 1 Chr. iii. 1). In the former passage both LXX, and Vulg. appear to

have read בָּרָמָלִי, "Carmelite." W. A. W

CAR'MI (アラ [a vine-dresser, Ges.; a distinguished one, Fürst]: Xapul [Vat. -uei]: Char. mi). 1. A man of the tribe of Judah, father of Achan, the "troubler of Israel" (Josh. vii. 1, 18; 1 Chr. ii. 7), according to the first two passages the son of Zabdi or Zimri. [ZABDI.] In 1 Chr. iv. 1 the name is given as that of a "son of Ju dah;" but the same person is probably intended; because (1) no son of Judah of that name is elsewhere mentioned; and (2) because, out of the five names who in this passage are said to be "sons' of Judah, none but Pharez are strictly in that relation to him. Hezron is the 2d generation, Her the 4th, and Shobal the 6th.

2. [Alex. Xapues in Num.; Vulg. Carmi in 1 Chr.] The 4th son of Reuben, progenitor of the family of THE CARMITES (הַכָּרָמָי) (Gen. zlvi. 9; Ex. vi. 14; Num. xxvi. 6; 1 Chr. v. 3). G.

CARMITES, THE () Xapul; 2. (Χερμέλ in Josh ; το Κάρμηλον in Sam.: [Vat. o Χαρμει:] Charmites). A branch of the tribe of Reuben, descended from CARMI 2 (Num. xxvi. 6).

CARNA'IM (Kapraty; Alex. Kapreir; [Sin. in 1 Macc. v. 28, Kaovaid:] Carnaim), a large and 1) This was doubtless the Carmel at which Saul land of Galaad ;" containing a "temple" (7) 392

rémeres dy K.). It was besieged and taken by sat the first in the kingdom " of Abasen us (Esth Tudas Maccabaus (1 Macc. v. 20, 43, 44). Under i. 14). A similar name, Carsten, is found is the name of CARNION (78 Kapploy) the same modern Persian. For other derivations from the occurrence is related in 2 Macc. xii. 21, 26, the ancient dialects of Persia, see Genenius, 717. temple being called the ATARGATEION (70 'Arapyareior). This enables us to identify it with ASHTEROTU-KARNAIM. G.

CARN'ION. [CARNAIM.]

CARPENTER. [HANDICRAFT.]

CAR'PUS (Kdonos [fruit, or wrist], on the accentuation, see Winer's Grammar, 6th ed. p. 49), a Christian at Troas, with whom St. Paul states that he left a cloak [and also his books and certain parchments] (2 Tim. iv. 13); on which of his journeys it is uncertain, but probably in passing through Asia Minor after his first captivity, for the last time before his martyrdom at Rome. According to Hippolytus, Carpus was bishop of Berytus in Thrace, called Berrhea in the Synopsis de Vita et Morte Prophetarum, which passes under the name of Dorotheus of Tyre. II. A.

CARRIAGE. This word occurs only six times in the text of the A. V., and it may be useful to remind the reader that in none of these does it bear its modern sense, but signifies what we now call " baggage." The Hebrew words so rendered are

three. 1. ישל, c'le, generally translated " stuff" or "vessels." It is like the Greek word orevos; and in its numerous applications perhaps answers most nearly to the English word "things." This word, rendered " carriage," occurs in 1 Sam. xvii. 22-"David left his 'baggage' in the hands of " also is. x. 28 the keeper of the 'baggage:' "At Michmash he hath left his 'baggage."

2. TTTTT, Cebiulah, "heavy matters," Judg. xviii. 21 only, though perhaps the word may bear a signification of "preciousness," which is sometimes attached to the root, and may allude to the newly acquired treasures of the Danites (LXX. Alex. την κτησιν την ένδοξον).

3. The word rendered "carriages" in Is. xlvi. 1 should, it would appear (ties. Thes. 917 b; Jesaia, ii. 101), be "your burdens."

4. In the N. T., Acts xxi. 15, "we took up our earriages" is the rendering of inorevardueror, and here also the meaning is simply "baggage" (Jer. præparati)."

5. But in the margin of 1 Sam. xvii, 20, and xxvi. 5, 7 - and there only - " carriage " is employed in the sense of a wagon or cart; the " place of the carriage " answering to " trench " in the text. The flebrew word is בַּעְבָּל. from גַּעַנְקָד, a wagon, and the allusion is to the circle of wagons which surrounded the encampment (Ges. Thes.

389). For carriages in the modern sense, see CART; CHARIOT.

CAR'SHENA (אָרָשָׁרָש: LXX. omits ; [rather, 'Apregaios; FA.1 Apregaos; Comp. Kaprend:] Charsena), one of the seven princes ()) of Persia and Media who " saw the king's face, and

a • The jucident referred to in Acts xxi. 15 (see .io. 4 above) shows the presence of an eye-witness. What Paul and his travelling companions did was to place their buggage, in part perhaps the aims which but otherwise seems mentioned with out any motive they were carrying up to Jerusalem (Acts xxiv. 17), Luke, who wrote the Acts, was with the aper in their beasts of burleu. The loading and unloading this journey (insite Acts xx. 6, xxi. 7 and 15).

CART (דְּבָרָה: מעמגמ: phustrum ; also ren-dered "wagon," Gen. xlv. 19, 27; Nuni. vii. 3, 7

8: from עַרָל, roll, Ges. p. 989). a vehicle drawn by cattle (2 Sam. vi. 6), to be distinguished from the chariot drawn by horses. [CHARIOT.] Carts and wagons were either open or covered (Num. vii. 3), and were used for conveyance of persons (Gen. xlv. 19), burdens (1 Sam. vi. 7, 8), or produce (Am. ii. 13). As there are no roads in Syria and Palestine and the neighboring countries, wheelcarriages for any purpose except conveyance of agricultural produce are all but unknown; and though modern usage has introduced European carriages drawn by horses into Egypt, they were un known there also in times comparatively recent. (Stanley, S. of P. 135; Porter, Damascus, i. 339; Lynch, Narratire, 75, 84; Niebuhr, Voyage, i. 123; Layard, Nin. ii. 75; Mrs. Poole, Englishwoman in $E_{1,2}$ (1997), 2d series, 77.) The only cart used in Wes tern Asia has two wheels of solid wood (Olearius, Trarels, 418; Sir R. [K.] Porter, Trarels, ii. 533). For the machine used for threshing in Egypt and Svria, see THRESHING. But in the monuments of ancient Egypt representations are found of carts

Egyptian cart with two wheels. (Wilkinson.)

with two wheels, having four or six spokes, used for carrying produce, and of one used for religious purposes having four wheels with eight spokes. A

Egyptian cart with four wheels. (Wilkinson.)

bas-relief at Nineveh represents a cart having two wheels with eight spokes, drawn by oxen, conveying female captives; and others represent carts cap tured from enemies with captives, and also some

of the camels or mules forms ever an important item in Eastern travelling. It is a circumstance that would interest the author of the narrative as one of the party

CARVING

used in carrying timber and other articles (Layard, Nin. 11. 396, Nin. of Bab. 134, 447, 583, Mon. of Bab. pt. ii. pls. 12, 17). Four-wheeled carriages are said by Pliny (N. II. vii. 56) to have been invented by the l'hrygians (Wilkinson, Anc. Lgypt. Abridgm. i. 384, 385; ii. 39, 47). The carts used

Assyrian cart drawn by oxen. (Layard, ii. 896.)

in India for conveying goods, called Suggar or Hackeri, have two wheels, in the former case of solid wood, in the latter with spokes. They are drawn by oxen harnessed to a pole (Capper, *India*, pp. 346. 352). H. W. P.

Modern Indian cart

CARVING. (1.) מְקַלַעָר, carved work in relief, from הַלַערת, carve; in pl. הִקַלָערת, carved figures. (2.) הַרָשֶׁת, from הַרָשָׁת, carve = בקרה (א.) בקרה, participle in Pual of (הקרה), participle in Pual of not used) , cut, delineate : engraved, or carved (work), 1 K. vi. 35. (4.) [7]. 9, carved work, from TDP, open, applied to wood, 1 K. vii. 36; to ems, Ex. xxviii. 9, 36; 2 Chr. ii. 7, 14; to stone,

Zoch. iii. 9: γλυφή, γλύμμα, έγκολαπτόν: cola-The arts of carving and engraving were n uch in

request in the construction both of the Tabernacle and the Temple (Ex. xxxi. 2, 5, xxxv. 33; 1 K. vi. 18, 35; Ps. Ixxiv. 6), as well as in the ornamentation of the priestly dresses (Ex. xxviii. 9-36; Zech. iii. 9; 2 Chr. ii. 7, 14). In Solomon's time Huram the Phoenician had the chief care of this as of the larger architectural works. H. W. P.

CASEMENT. [LATTICE.] W. / W.

CASIPHIA (NITO I tohite, as said of snowy sountains, Fürst]: ἐν ἀργυρίο τοῦ τόπου; [Comp.] * On the name Dietrich says (Ges. Hebr s • Raσφιέ τοῦ τόπου:] in Chambine loco), a Chald. Handao., 6te Aufl.). "The Greek name

place of uncertain site on the road between Babylon and ./erusalem (Ezr. viii. 17). Neither the Caspine Pylse nor the city Kusucin, with which some writers have attempted to identify it, are situated upon this route. (Gesen. Thes. 703.) • Fürst has a long note in his Lexicon on this

enigmatical word. He supposes it to denote "the snowy-mountainous Caucasian region." It is not said that Ezra himself came to this place on his journey from Babylonia to Jerusalem; but only that the river Ahava (Ez. viii. 15), from the banks of which he sent messengers to the Jewish exiles in Casiphia, lay on his route. This stream (mentioned only in Ezra) may have been in the extreme north of Babylonia; and the caravan in this instance, taking a more northern track than usual, may have passed so near this point as to render it practicable while they halted there, to send the messengers to Casiphia and await their return. Kitto suggests on Ahava (Cycl. of Bibl. Lit., 3d ed.) that in this instance a more circuitous route may have been a safer one for the wayfarers, and was chosen on that account. Fürst, guided by an ancient Jewish tradition, would identify the "large country" (Is. xxii. 18) to which Shebna, the treasurer of Hezekiah, was to be driven, with this same Caspiana or Casiphia. H.

CAS'LEU (Xarelev: Casleu), 1 Macc. i. 54. iv. 52, 59; 2 Macc. i. 9, 18, x. 5. [CHISLEU: MONTHS.]

CAS'LUHIM (פָּלָקים: Хаσμωνιείμ; [in 1 Chr., Rom. Vat. omit, Alex. Comp. Xao Awrielu:] Chasluim, [Casluim]), a Mizraite people or tribe (Gen. x. 14; 1 Chr. i. 12). In both passages in which this word occurs, it would appear, as the text now stands, as if the Philistines came forth from the Casluhim, and not from the Caphtorim, as is elsewhere expressly stated : here therefore there would seem to be a transposition [CAPHTOR]. The only clew we have as yet to the position of the Casluhim is their place in the list of the sons of Mizraim between the Pathrusim and the Caphtorim, whence it is probable that they were seated in Upper Egypt [PATHROS; CAPHTOR]. The LXX. seem

to identify them with the ロロロロ of I's. inviti.

31 (A. V. "princes"), which some, though not the LXX. in that place, take to be a proper name, and compare with the native civil name of Hermopolis Magna. This would place the Casluhim in the Heptanomis [HASHMANNIM]. Bochart (Phaleg, ir. 31) suggests the identity of the Casluhim and the Colchians, who are said to have been an Egyptian colony (Herod. ii. 104; Diod. Sic. i. 28), but this story and the similarity of name (Les. Thes. s. v.) do not seem sufficient to render the supposition a probable one. Gesenius, however, gives it his support (Thes. l. c.). Forster conjectures the Casluhim to be the inhabitants of Cassiotis, the tract in which is the slight elevation called Mount Casius (Epp. al Michaelis, p. 16 ff.). Bunsen assumes this to be proved (Bibelwerk, p. 26). There is, however, a smious difficulty in the way of this supposition the nature of the ground, a low littoral tract of rock, covered with shifting and even quick sand, like the neighboring "Serbonian bog," and which we cannot suppose ever to have supported much animal or vegetable life, far less a whole people or tribe.

Kényes can have arisen out of the old Kasluch-im, not the reverse: for no sure example of the insertion of an s can be adduced in the Semitic languages." H.

CAS'I HON (Xaoqúr; Alex. Xaoquel [Crobon]), 1 Macc. v. 36. [Asphor.]

CASPHOR (Xaspáp: [Alex. Kaspap; Sin. Kaspa:] Casphor), one of the fortified cities in the ' land of Galaad" (1 Macc. v. 26), in which the Jews took refuge from the Ammonites under Timotheus (comp. ver. 6), and which with other cities was taken by Judas Maccabseus (v. 36). In the latter passage the name is given as CASPHON, and in 2 Macc. xii. 13 as CASPIS, if indeed the same place is referred to, which is not quite clear (see Ewald, iv. 359, note). G.

CASPIS (Kdoniv; [Alex. Kaoneiv:] Casphin), a strong fortified city - whether east or west of Jordan is not plain - having near it a lake $(\lambda (\mu \nu \eta)$ two stadia in breadth. It was taken by Judas Maccabæus with great slaughter (2 Macc. xii. 13, 16). The parallel history of the 1st Book of Maccabees mentions a city named CASPHOR or CASPHON, with which Caspis may be identical but the narratives differ materially. G.

CAS'SIA. The representative in the A. V. of the Hebrew words kiddah and ketzi'oth.

1. Kiddah (TTT:" lols: casia, stacte) occurs in Ex. xxx. 24, as one of the ingredients in the composition of the "oil of holy ointment;" and in Ez. xxvii. 19, where "bright iron, cassia, and calamus" are mentioned as articles of merchandise brought by Dan and Javan to the market of Tyre. There can be no doubt that the A. V. is correct in the translation of the Hebrew word, though there is considerable variety of reading in the old versions. The LXX. and Josephus (Ant. iii. 8, § 3) have iris, i. e. some species of flug, perhaps the Iris florenting, which has an aromatic root-stock. Symmachus and the Vulg. (in F.z. I. c.) read stacte, " liquid myrrh." The Arabic versions of Saadias and Erpenius conjecture costus, which Dr. Royle (Kitto's ('yc. art. ' Ketzioth ') identifies with Aucklandia Costus, to which he refers not the kiddah, but the ketzi'oth of the Hebrew Scriptures (see below). The Chaldee and Syriac, with most of the European versions, understand case by kiddáh : they are followed by Gesenius, Simonis, Fürst, Lee. and all the lexicographers. The accounts of cassia as given by ancient authors are confused; and the investigation of the subject is a difficult one. It is slear that the Latin writers by the term casia understood both the Oriental product now under consideration, as well as some low sweet herbaceous plant, perhaps the Daphne gnidium, Linn. (see Fée, Flore de Virgile, p. 32, and Du Molin, Flor. Poet. Ancienne, 277): but the Greek word, which is first and by Herodotus (ii. 86), who says (iii. 110) the

" to cleave," قدل or قدل Arab. جرجة to cleave, ' to tear lengthwise ; " so called from the splitting of he bark.

b The country of the Mosvili was in the Cinnamo nophora regio, and not far from Aromata Emporium, and the author of the Periplus particularizes case emought the exports of the same coast (Tennent, Ceylon,

600, note). As to ")"ND, see Bochart, Geog. Sac. p. 1. Mb. H. & 21, and Rosenmüller, Schol. ad Ez. l. c., who, however, identify it with Sanaa, in Arabia.

Arabians procured it from a shallow lake in their country, is limited to the Eastern product. Dicecorides mentions several kinds of cassia, and says they are produced in Spicy Arabia (i. 12). One kind is known by the name of mosyletis, or according to Galen (De Therinc. ad Pis. p. 108), of musulus, from the ancient city and promontory Mosyllon, on the coast of Africa and the sea of Babel Mandeb, not far from the modern Cape Guardafui (Sprengel, Annot. ad Duscor. i. 12). Will not this throw some light on Ez. xxvii. 19. where it will be observed that, instead of the rendering "going to and fro" in the text of the A. V. the margin has Meuzall "Dan and Javan and Meuzal traded in thy markets with cassia, calamus." &c. The causia would be brought from India to Meuzal, and from thence exported to Tyre and other countries under the name of Meuzalitis, or Meuzal cassia.h

Dioscorides speaks of another kind of cassia called Kitto, which has been supposed by some to be substantially the same as the Hebrew word Kiddah, to which it certainly bears a strong resemblance. If the words are identical, they must denote cassia of different qualities, for the kitto of Dioscorides was very inferior, while we cannot doubt that the cassia used in the composition of the holy ointment would be of the best kind.

Cassia is not produced by any trees which are now found growing in Arabia. It is probable there-fore that the Greek authors were mistaken on this subject, and that they occasionally have regarded products imported into Arabia, and thence exported northwards to other countries, as the natural productions of that country. The cassia-bark of commerce is yielded by various kinds of Cinnumomum, which grow in different parts of India, and is not the product of only one species of tree. Cimnamomum malabathricum of S. India supplies much of the cassia-bark of commerce. Dr. Hooker says that cassia is an inferior cinnamon in one sense, though, as it never comes from the same species as the true cinnamon, the statement is ambiguous.

2. Ketzi oth (קציעה: " Kaola: casin), only in Ps. xlv. 8, " All thy garments smell of myrrh, aloes, and cassia." This word is generally supposed to be another term for cassia: the old versions are in favor of this interpretation, as well as the etymology of the Hebrew word. The Arabic rads Salicha, which, from its description by Alul Fadli and Avicenna (Celsius, Hierob. ii. 364-5), evidently denotes some cassia-yielding tree. Dr. Royle suggests (see above) that ketzi'oth is identical in meaning and in form with the Arabic Loth, koost, or [Syriac] kooshta, whence is probably derived the costus of the Greeks and Romans. Dioscorides (i. 15) enumerates three kinds of costus, an Arabian Indian, and Syrian sort : the first two are by Sprengel referred to Costus arabicus, Linn. (Zir

· forma costus, i. e. radicis aromation Indian · Arabica species, Kam. Dj. See Freytag

CASTLE

-iberuces). The loost of India, called by Euroreans Indian orris, is the root of what Royle has samed Aucklandia costus. There is no reason, however, why we should abandon the explanation of the old versions, and depart from the satisfactory stymological evidence afforded by the Hebrew term to the doubtful question of identity between it and the Arabic koost. W. H.

CASTLE. [FORTIFICATIONS.]

CASTOR AND POL'LUX, the Dioscur (Διόσκουροι, Acts xxviii. 11). For the mythology of these two heroes, the twin-sons of Jupiter and Leda, we must refer to the Dict. of Biog. and Mythol. We have here to do with them only so far as they were connected with seafaring life. They were regarded as the tutelary divinities (θ_{eol} $\sigma = \tau \eta \rho(s)$ of sailors. They appeared in heaven as the constellation of Gemini. Immediately on shipboard they were recognized in the phosphoric lights, called by modern Italian sailors the fires of St. Elmo, which play about the masts and the sails (" In magua tempestate apparent quasi stellæ velo Insidentes : adjuvari se tunc periclitantes existimant Pollucis et Castoris numine," Senec. Nut. Quast. i. 1; comp. Plin. ii. 37). Hence the frequent allusions of Roman poets to these divinities in connection with navigation (see especially Hor. Carm. i. 3. 2, "fratres Helense, lucida sidera," and iv. 8. 31). As the ship mentioned here by St. Luke was from Alexandria, it may be worth while to notice that Castor and Pollux were specially honored in the neighboring district of Cyrenaica (Schol. Pind. Lyth. v. 6). In Catull. iv. 27, we have distinct mention of a boat dedicated to them. See also hviii. 65. In art these divinities were sometimes represented simply as stars hovering over a ship, but more frequently, as young men on horseback with conical caps, and stars above them (see the coins of Rhegium, a city of Bruttii, at which St.

Surver coin of Bruttii. Obv.: Heads of Castor and Pollux to right. Rev.: Castor and Pollux mounted, advancing to right. In the exergue BPETTION.

^aaul touched on the voyage in question, ver. 13). Juch figures were probably painted or sculptured at the bow of the ship (hence $mapdom\mu or$; see *lict.* of Antiq. art. Insigne). This custom was very frequent in ancient shipbuilding. Herodotus suys (iii. 37) that the Phœnicians used to place the figares of deties at the bow of their ressels. Virgil (Æn. x. 209) and Ovid (*Trist.* i. 10. 2) supply us with illustrations of the practice; and Cyril of Alexandria (Cramer's *Catena*, ad I. c.) says that such was always the Alexandrian method of ornamenting each side of the prov. [SHIP.] J. S. H.

5. n.

CATS (of alloupor: cuttor a) occurs only in Baruch vi. 22 [Epist. of Jer. 22], in the pass which sets forth the vanity of the Babylonish idols: "Upon their bodies and heads sit hats, swallows, and birds, and the cats also." The Greek at Aovpos, as used by Aristotle, has more particular reference to the wild cat (Felis catus, &c.). Herodotus, in the well-known passage (ii. 66) which treats of the cats of Egypt, uses alloupos to denote the domestic animal; similarly Cicero (Tusc. v. 27, 78) employs felis; but both Greek and Latin words are used to denote other animals, apparently some kinds of marten (Martes). The context of the passage in Baruch appears to point to the domesticated animal. Perhaps the people of Babylon originally procured the cat from Egypt.

The domestic cat of the ancient Egyptians is supposed by some to be identical with the *Felis* maniculata, Rüppell, of Nubia, and with our own domestic animal, but there is considerable doubt on this matter. The Egyptians, it is well known, paid an absurd reverence to the cat; it accompanied them in their fowling expeditions; it was deemed a capital offense to kill one; when a cat died, it was

Felis maniculata.

embalmed and buried at Bubastis, the city swcred to the moon, of which divinity the cat was reckoned a symbol (Herod. ii. 66; Wilkinson, Anc. Egypt. i. 246, Lond. 1854; Jablonski, Panth. Ægypt. ii. 66, dc.; Diod. Sic. i. 83). It is generally believed that the cat was employed by the ancient Egyptians as a retriever to bring them the game they killed in their fowling expeditions; we cannot credit anything of the kind: that the cat, as a great favorite, was allowed to accompany the fowler, is beyond dispute, but it was doubtless for the sake of a share in the booty, and not for the benefit of the fowler. Without laying much stress on the want of sufficient sagacity for retrieving purposes, we cannot believe that the cat could ever have been trained to go into the water, to which it has a very strong aversion.^b See the wood-cuts in Wilkinson. where the fowler is in a boat accompanied by his

cat. As to Dis which Bochart takes to mean wild cats, see BEAST. The cat belongs to the family Felide, order Carnivora.

CATERPILLAR. The representative in the A. V. of the Hebrew words child and yelck. 1. Chill (יליל) apis, βροῦχοs, ἰρυσίβη:

b Even to a proverb : -

- "Catus amat pieces, sed non vult tingere plantam." "Letting I dare not wait upon I would,
 - Like the poor cat i' the adage." Shakep. MartetA

See Trench's Lessons in Proverts, p. 149

a The word Cauta occurs once only in classical Latin, samely, in Martial, Eng. xill. 68; but that some bird is intended is beyond a doubt. The anchent Greeks and Romans do not appear to have kept domestic cats. We have sought in vain for the slightest alluvion to *White domesticsus in classical subtors*.

rubigo, bruchus, ærugo). The Hebrew word occare | ornan uits worn by Arab women al out their nocha m 1 K. viii. 37; 2 Chr. vi. 28; Ps. Ixxviii. 46; Is. | But to this Gesenius very properly objects (Jes. i xxxiii. 4; Joel i. 4. It is evident from the inconsistency of the two most important old versions in their renderings of this word, that nothing is to be learnt from them. Bochart has endeavored to show that there are nine or ten Hebrew names to denote different species of locusts; it has been shown [LOCUST] that this cannot really be the case, that the destructive kinds of locust which at times visit the Bible lands must be limited to two or three species, the most destructive being the Acridium peregrinum and the (Edipod., migratoria; conse quently some of these names must stand either for different conditions in the life of the locust, or they may be synonyms, or else they may denote other insect devourers. The term now under notice seems to be applied to a locust, perhaps in its larva state. The indefinite rendering of the A. V. may well, we think, be retained to express the Chdsil, or the consumer.

2. Yelek. [See LOCUST, 8.] W. H.

CATHU'A (Kabová; [Vat. Kova:] Canna), 1 Esdr. v. 30. Apparently answers to GIDDEL in Hebrew text. [Fritzsche (*Exeg. Handb.* in loc.) makes ressoup the representative of Giddel, and finds no Hebrew correspondent of Kalová. A.]

CATTLE. [BULL.]

CAULS (שביקים: לאבאאא torques). The margin of the A. V. gives "net-works." The Old English word "caul" denoted a netted cap worn by women. Compare Chaucer (Wyf of Bathes Tale, C. T. 1. 6599):

> " Let se, which is the proudest of hem alle, That werith on a coverchief or a calle."

. The Hebrew word shebisim thus rendered in Is. iii. 18, is, like many others which occur in the same passage, the subject of much dispute. It occurs but once, and its root is not elsewhere found in Hebrew. The Rabbinical commentators connect t with 강고…, shibbets, rendered "embroider " in Ex. xxviii. 39, but properly "to work in squares, make checker-work." So Kimchi (*Lex.* s. v.) explains shebisim as "the name of garments wrought in checker-work." Rashi says they are "a kind of net-work to adorn the head." Abarbanel is more full: he describes them as "head-dresses, made of

silk or gold thread, with which the women bound their heads about, and they were of checker-work." The word occurs again in the Mishna (Celim xxviii. 10), but nothing can possibly be inferred from the passage itself, and the explanations of the commentators do not throw much light upon it. It there appears to be used as part of a net-work worr as a head-dress by women. Bartenors says it was "a figure which they made upon the net-work "or ornament, standing in front of it and going round from one ear to the other." Beyond the fact that the shebisim were head-dresses or ornaments of the head-dress of Hebrew ladies, nothing an by said to be known about them.

Schreder (De Vest. Mul., cap. ii.) conjectured that they were medallions worn on the necklace,

8 - 0 - , and identified shebisim with the Arab Kungan,

8.4

209), as well as to the explanation of Jahn (Arokaul i. 2, 139), who renders the word "gauze veils."

The Versions give but little assistance. The LXX. render $\ell_{\mu}x/\delta\kappa a$, "plaited work," to which $\kappa \sigma \sigma \dot{\nu}_{\mu}\beta \sigma \sigma s$, "fringes," appears to have been added originally as a gloss, and afterwards to have crept into the text. Aquila has redauseras, "belts." The Targum merely adopts the Hebrew word without translating it, and the Syriac and Arabic vaguely render .t "their ornaments."

H.

* CAUSEY (French chaussee), a raised or paved way (77202), in 1 Chr. xxvi. 16, 18, and Prov. xv. 19 (margin), in the A. V. ed. 1611, but afterwards changed to causeway, a corruption for causey. "Causesony," however, is found in the

margin of Is. vii. 3 in A. V. ed. 1611. See Worcester's and Webster's Dictionaries, and Eastwood and Wright's Bible Word-Book, p. 90.

• CAUSEWAY. [CAUSEY.]

CAVE (TJYD: onitator: speluner : in A. V. Is. ii. 19, hole ; [Is. xxxii. 14;] Jer. vii. 11, den ; Josh. xiii. 4, literatim, Mearah; Maara, Vulg.). I. The chalky limestone of which the rocks of Syria and Palestine chiefly consist presents, as is the case in all limestone formations, a vast number of caverns and natural fissures, many of which have also been artificially enlarged and adapted to various purposes both of shelter and defense. (Page, Text-Book of Geology, p. 141; Kitto, Phys. Geogr. of Pal. p. 72.) This circumstance has also given occasion to the use of so large a number of words as are employed in the Scriptures to denote caves, holes, and fissures, some of them giving names to the towns and places in their neighborhood. Out of them, besides No I., may be selected the following:-

II. הור סר (Ges. p. 458), a hole ; usually $\tau \rho \omega \gamma \lambda \eta$, and caverna. From this come (a.

היר, dweller in caves, the name of the Horites of Mount Seir, Wady Ghoeyer, expelled by the Edomites, probably alluded to by Job, a Troglodyte race spoken of by Strabo. (Gen. xiv. 6, xxxvi. 21; Deut. ii. 12; Job xxx. 6; Strab. i. p. 42, xvi. pp 775-776; Burckhardt, Syria, p. 410; Robinson, ii. 69, 157; Stanley, S. & P. §§ 68-71.) [HORITES.] (b.) [1], land of caverns (Ez. zlvii. 16, 18; Burckhardt, Syria, pp. 110, 286): Aupaveris, LXX.: Awron, Vulg. [HAUBAN.] (c.) デリア , house of caverns, the two towns of Bethhoron (Josh. xvi. 8, 5). [BETH-HOBON.] (d.) הרכים, too caverns, the town Horonaim (Is. xv. 5). [HOBONAIM.]

III. בוברים, places of refuge in rocks (Ges. p 445) for birds, Cant. ii. 14: ordern: foramina [Jer. xlix. 16, - puparial: covernos;] Obad. 3 onal: scissures: A. V. clefts.

IV. קנהרה: τρυμαλία: antrum : A. V. den a ravine through which water flows (Ges. p. 858) Judg. vi. 2.

The caves of Syria and Palestine arc still used shomakek, the diminutive of the sun-shaped as at *Aubitic are stall* used as at *Aubitic are stall* used as at *Aubitic are stall* as at *Aubitic are stall* as at *Aubitic are stall*. The caves of Syria and Palestine are stall used as at *Aubitic are stall* as at *Aubitic are stall*.

aam, Travels is Syria, p. 62). The shepherds near Hebron leave their villages in the summer to dwell in caves and ruins, in order to be nearer to their flocks and fields (Robinson, i. 212). Almost all the habitations at Om-keis, Gadara, are caves (Burckhardt, p. 273). An extensive system of caves exists at Beit Jibrin, Eleutheropolis, in Judah, which has served for residence or concealment, though now disused (Robinson, ii. 53); and another between Bethlehem and Hebron (Irby and Mangles, p. 103).

The most remarkable caves noticed in Scripture are: - 1. That in which Lot dwelt after the destruction of Sodom (Gen. xix. 30). 2. The cave of Machpelah (xxiii. 17). 3. Cave of Makkedah (Josh. x. 16). 4. Cave of Adullam (1 Sam. xxii. 1). 5. Cave of En-gedi (xxiv. 3). 6. Obadiah's cave (1 K. xviii. 4). 7. Elijah's cave in Horeb (xix. 9). 8, 9. The rock sepulchres of Lazarus, and of our Lord (John xi. 38; Matt. xxvii. 60). Some of these may be identified, and to others approximate, if not absolutely identical, sites may be seigned. Thus the existing caverns near the S. E. end of the Dead Sea serve fully to justify the mention of a cave as the place of Lot's retirement; as those on the W. side agree both in situation and in name with the caves of En-gedi (Lynch, Narrative, p. 234; Robinson, i. 500; Stanley, p. 296). The cave of Machpelah undoubtedly lies beneath the anonque at Hebron (Robinson, ii. 79; Stanley, p. 149; Benj. of Tudela, Early Trav. p. 86). The cave of Makkedah can hardly be the one to which tradition has assigned the name (Irby and Mangles, p. 93); for though it is not necessary to suppose that the cave was close to the town of Makkedah, yet the situation of the great caverns both at Beil Jibrin and at Deir Dubbin in neither case agrees with that of Makkedah as given by Eusebius, eight miles from Eleutheropolis (Reland, p. 885; Robinson, ii. 23, 53; Stanley, p. 211). The site assigned by the same ancient authority to Adullam, 10 m. E. of Eleutheropolis, agrees as little with that of the cave believed by tradition to have been David's hidingplace, namely, in the Wady Khureitan at the S. E. of Bethlehem, which in some respects agrees with the Scripture narrative better than the neighborbood of Deir Dubban, assigned to it by Mr. Stanley. (See 1 Sam. xx. 6, and particularly xxii. 3, 4; Joseph. Ant. vi. 12, § 8; Reland, p. 549; Irby and Mangles, p. 103; Robinson, i. 482; Stanley, p. 259.) [See ODOLLAN.]

The cave in which Obadiah concealed the prophets cannot now be identified, but it was probably in the northern part of the country, in which abundant instances of caves fit for such a purpose might be pointed out.

The sites of the cave of Elijah, as well as of the "eleft" of Moses on Mount Horeb (Ex. xxxiii. 92) are also obviously indeterminate; for though tradition has not only assigned a place for the former on Jebel Müss, and consecrated the spot by a chapel, there are caves on the competing summit of Serbål, to one or other of which it might with squal probability be transferred. (Stanley, p. 49; Robinson, i. 103; Burckhardt, p. 608.)

Besides these special caves there is frequent mention in O. T. of caves as places of refuge. Thus the israelites are said to have taken refuge from the Philistines in "holes" (1 Sam. xiv. 11): to which the name of the scene of Jonathan's conflict, *Math.* ads (Michmash), sufficiently answers. (Scanley, , 204: Rob. I. 440: Irby, p. 89.) So also in the From of (idean that had taken perform from the Mid. ianites in dens and caves and stronglok, such as abound in the mountain region of Manaseh. (Judges vi. 2; Stanley, p. 841.)

Not only have the caves of Palestine afforded refuge from enemies, but during the earthquakes also, by which the country has been so often visited, the inhabitants have found in them a safe retreat. This was the case in the great convulsion of 1837, when Safed was destroyed; and to this mode of retreat the prophet Isaiah probably alludes (Is. ii. 10, 19, 21; Robinson, ii. 422; Stanley, p. 151).

But Adullam is not the only cave, nor were its tenants the only instances of banditti making the caves of Palestine their accustomed haunt. Josephus (Ant. xiv. 15, § 5) relates the manner in which, by order of Herod, a cave occupied by robbers, or rather insurgents, was attacked by soldiers let down from above in chests and baskets, from which they dragged forth the inmates with hooks and killed or thrust them down the precipices; or, setting fire to their stores of fuel, destroyed them by suffocation. These caves are said to have been in Galilee, not far from Sepphoris; and are probably the same as those which Josephus himself, in providing for the defense of Galilee, fortified near Gennesaret, which elsewhere he calls the caves of Arbela (B. J. i. 16, § 2-4, ii. 20, § 6, Vit. § 37). Bacchides, the general of Demetrius, in his expedition against Judsea, encamped at Messaloth, near Arbela, and reduced to submission the occupants of the caves (Ant. xii. 11, § 1; 1 Macc. ix. 2).

Messaloth is probably $\neg \neg \neg \neg \neg$, steps, or terraces (comp. 2 Chr. ix. 11; Ges. p. 957). The Messaloth of the book of Maccabees and the robber-ownes of Arbela are thus probably identical, and are the same as the fortified cavern near Medjudel (Magdala), called Kalaut 10n Mann, or Pigeon's Castle, mentioned by several travellers. They are said by Burckhardt to be capable of containing 600 men. (Reland, pp. 358, 575; Burckhardt, Syria, p. 331; Irby and Mangles, p. 91; Lightfoot, Cent. Chorogr. ii. 231; Robinson, ii. 398; Raumer, p. 108: comp also Hos. x. 14.) [BETH-ARBEL]

Josephus also speaks of the robber inhabitants of Trachonitis, who lived in large caverns, presenting no prominence above ground, but widely extended below (Ant. zv. 10, § 1). These banditti annoyed much the trade with Damascus, but were put down by Herod. Strabo alludes very distinctly to this in his description of Trachonitis, and describes one of the caverns as capable of holding 4000 men (Strabo, zvi. p. 756; Raumer, p. 68; Jolliffa, Travels in Pal. i. 197).

Lastly, it was the caves which lie beneath and around so many of the Jewish icities that formed the last hiding-places of the Jewish leaders in the war with the Romans. Josephus himself relates the story of his own concealment in the caves of Jotapata; and after the capture of Jerusalem, John of Gischala, Simon, and many other Jews endasored to conceal themselves in the caverne beneath the city; whilst in some of them great spoil and vast numbers of dead bodies were found of those who had periahed during the siege by hunger or from wounds (Joseph. B. J. iii. 8, § 1, vi. 9, § 4). The rock dwellings and tamples of Petra are de-

scribed in a separate article. Natural cavities in the rock were and are fre-

4. Solar manuff, sufficiently answers. (Soumey, Astural cavitaes in the rock were and are no., 904: Nob. 1: 440; Irby, p. 89.) So also in the quently used as cisterns for water, and as places of times of (ideon they had taken refuge from the Mid-1 imprisonment (Is. xxiv. 99; Es. vxxii 98; Zech

Digitized by Google

br. 11) [CISTERN; PRISON]; also as stalls for horses and for granaries (Irby and Mangles, p. 146). No use, however, of rock caverns more strikingly connects the modern usages of Palestine and the adjacent regions with their ancient history than the employment of them as burial-places. The rocky soil of so large a portion of the Holy Land almost forbids interment, excepting in cavities either natural or hewu from the rock. The dwelling of the demoniac among the tombs is thus explained by the rock caverns abounding near the Sea of Galilee (Jolliffe, i. 36). Accordingly numerous sites are shown in Palestine and adjacent lands of (so-called) sepulchres of saints and heroes of Old and New Test., venerated both by Christians and Mohammedans (Early Travels, p. 36; Stanley, p. 148). Among these may be mentioned the cave of Machnelah, the tomb of Aaron on Mount Hor, of Joseph. and of Rachel, as those for which every probability ct identity in site at least may be claimed (Irby and Mangles, p. 134; Robinson, i. 218, 219, ii. 275-287). More questionable are the sites of the tombs of Elisha, Obadiah, and John the Baptist, at Samaria; of Habakkuk at Jebâtha (Gabatha), Micah near Keila, and of Deborah, Rebekah's nurse, at Bethel (Stanley, pp. 143, 149; Keland, pp. 772, 698, 981; Rob. ii. 304). The questions so much debated relating to the tombs in and near Jerusalem and Bethany will be found treated under those heads. But whatever value may belong to the connection of the names of judges, kings, or prophets, with the very remarkable rock-tombs near Jerusalem. there can be no doubt that the caves bearing these names are sepulchral caverns enlarged and embellished by art. The sides of the valley of Jehoshanhat are studded with caves, many of which are inhabited by Arab families. (Sandys, p. 188; Maundrell, p. 446; Robinson, i. 241, 349, 364; Bartlett, Walks about Jerusalem, p. 117). It is no doubt the vast number of caves throughout the country to gether with, perhaps, as Maundrell remarks the taste for hermit life which prevailed in the 5th and 6th centuries of the Christian era, which has placed the sites of so many important events in caves and grottoes; e. y. the birth of the Virgin, the Annuncistion, the Salutation, the birth of the Baptist and of our Lord, the scene of the Agony, of St. Peter's denial, the composition of the Apostles' Creed, the Transfiguration (Shaw, pt. ii. c. 1; Maundrell, E. T. p. 479): and the like causes have created a tralitionary cave-site for the altar of Elijah on Mount Carmel, and peopled its sides, as well as those of Mount Tabor, with hermit inhabitants. (1 K. tviii. 19; Irby and Mangles, p. 60; Reland, p. 329; Winer, s. v. Carmel; Am. ix. 3; Sir J. Maundesille, Travels, p. 31; Sandys, p. 203; Maundrell, E. T. p. 478; Jahn, Arch. Bibl. p. 9; Stanley, p. \$53; Kitto, Phys. Geogr. pp. 30, 31; Van Egmont. H. W. P. Travels, ii. 5-7.)

CEDAR (TTN: redpos: cedrus: from TTN,

soot of MAR, coiled or compressed, Gesen. p. 148). The term is expressive of a mighty and deeply rooted tree, and is usually understood to apply here to one of the conferous kind, but not always to that which is commonly known as the Cedar of Lebanon.

The conditions to be fulfilled in order to answer

all the descriptions in the Bible of a cedar-to that it should be tall (Is. ii. 13), spreading (Es. xxxi. 3), abundant (1 K. v. 6, 10), fit for beams, pillars, and boards (1 K. vi. 10, 15, vii. 2), masta of ships (Ez. xxvii. 5), and for carved work as images (Is. xliv. 14). To these may be added qualities ascribed to cedar-wood by profane writers Pliny speaks of the cedar of Crete, Africa, and Syria as being most esteemed and imperishable. The same quality is ascribed also to juniper. In Egypt and Syria ships were built of cedar, and in Cyprus a tree was cut down 120 feet long and proportionately thick. The durability of cedar was proved, he says, by the duration of the cedar roof of the temple of Diana at Ephesus, which had lasted 400 years. At Utica the beams, made of Numidian cedar, of a temple of Apollo had lasted 1170 years! Vitruvius speaks of the antiseptic properties of the oil of cedar and also of juniper (Plin. H. N. xiii. 5, xvi. 40; Vitruv. ii. 9; Joseph. Ast. viii 5, § 2; Sandys, Trovels, pp. 166, 167).

Not only was cedar timber used by David and Solomon in their buildings (2) Sam. v. 11; 1 K. v. 6, vi. 15, vii. 2), but also in the second Temple rebuilt under Zerubsbel, the timber employed was cedar from Lebanon (Exr. iii. 7; 1 Eddr. iv. 48, v. 55). Cedar is also said by Josephus to have been used by Herod in the roof of his temple (B. J. v. 5, § 2). The roof of the Rotunda of the Church of the Holy Sepulchre at Jerusalem is said to have been of cedar, and that of the Church of the Virgin at Bethlehem to have been of cedar or cypress. (Williams, Holy City, ii. 202; Quaresmius, Eluc. Terr. Sanct. vi. 12; Per. p. 2; Tobler, Bethlehem, pp. 110, 112.)

Now in some important respects no tree but the cedar (Pinus cedrus), or its almost equivalent, the Pinus Deodara, a can answer the above conditions. The characteristics of these two trees, of which great numbers are found from Mount Taurus to the Himalayas, are so often interchanged that they are scarcely to be distinguished the one from the other. No tree is at once so lofty, spreading, and umbrageous, and the wood of the Deodara at least is extremely durable. The difficulties which are found in reconciling the ancient descriptions with the modern specimens of cedar wood lie, (1) in the fitness of cedar trees for masts of ships (Ez. xxvii. 5); (2) still more in the very general agreement as to the inferior quality of the timber, which is usually described as less valuable than the worst sorts of deal. Of authorities quoted by Dr. Royle in his article on the subject in Dr. Kitto's Cyclopedia (art. Eres), two only ascribe serviceable qualities to the cedar-wood, whether grown in England or in specimens brought from the ancient cedar grove on Mount Lebanon. Accordingly, Colsius in his Hieroboton icon has endeavored to prove that by the cedar of Scripture is meant the Pinns sylvestris or Scotch fir, and that by "fir" is intended the cypress. Others have supposed that the Sandarac tre e, the citrus of Pliny, Callitris quadrivalvis, or 2'huja articulata, represents the cedar. The timber of this tree is extremely hard and durable; the roof of the mosque of Cordova, built in the 9th century is constructed of it, which was formerly supposed from the Spanish name alerce to have been made of larch (Cook, Sketches in Spain, p. 5, and note

also are longer and more distinctly S-sided. The word of both is extremely resincts.

⁶ The difference between the Lebanon cedar and the Deodara consists chiefly in the cones, which in the latter grow in pairs, and upon stalks ; the leaves

trees, the Cephalonian pine, the common yew, Taxus the opinion of Celsius; Winer, s. v.). baccuta, and the juniper cedar, Cedrus baccifera, or respectives, each of them possesses qualities which answer to some at least of those ascribed to the cedar. The opinion of Celsius is founded in great measure on the use by the Arabs and Arabic writers

of the word j, arz, evidently the equivalent of

TR, eres, to express the cedar of Lebanon, and also at Aleppo the Pinus sylvestris, which is abundant both near that city and on Lebanon. A similar argument will apply also to the Thuja articulata of Mount Atlas, which is called by the Arabs elarz, a name which led to the mistake as to the material of the Cordova roof from its similarity to the Spanish alerce (Niebuhr, Descr. de l'Arabie, p. 131. &c., and Questions, xc. p. 169, &c.; Pliny, 11 N. xiii. 11, 15; Kitto, Eres, Thuja; Hay, erty of durability, said to be wanting in the Leb-

Forgusson, Handb. of Arch 1, 456). Besides these (West. Barb. c. iv. 49; Gesen. p. 148, who rejects

It may be observed. (1.) That unsuccessful experiments on English-grown cedar, or on wood derived from the trees of the ancient cedar grove of Lelanon, do not as yet invalidate all claim of the cedar. whether Lebanon or Deodara cedar, to share in the qualities anciently ascribed to it. Besides the trees which belong to the one grove known by the name of "the Cedars," groves and green woods of cedar are found in other parts of the range (Buckingham, Trarels among Arabs, p. 468; Eng. Cycl. s. v. Syria; Robinson, iii. 593; Burckhardt, Syria, p. 19; Loudon, Arboretum, vol. iv. pp. 2406, 2407; Celsius, Hierobotanicon, i. 83; Belon, Obs. de Arboribus coniferis. ii. 162, 163, 166). (2.) That it has been already shown that the Deodara cedar certainly possesses in a remarkable degree the prop-

Calars of Libsnon. (From a Photograph.)

in the Nineveh palaces were supposed by Layard to he cedar, a supposition confirmed by the inscripions, which show that the Assyrian kings imported eclar from Lebanon. This wood is now proved by microscopic examination to be yew (Layard, N. and B. pp. 356, 357; Loudon, u. s. p. 2431).

In speaking, therefore, of cedar of Lahanon used in building for beams, pillars, or ceiling boards, it is probable that the wood of more than one tree was employed, but under the one name of cedar, and that the trees which furnished the material vere, besides the Pinus cedrus, the Cedrus Deodant, he yew, (Taxus baccata), and also the Scotc' pine (Pinus sylvestris). The Sandarac tree (Thujn articulata) is said by Van Egmont (Travels, ii. 280) to have been found on Lebanon, but no hint of importation of foreign timber is anywhere given in the uncommon (Shaw, Travels, p. 464; Burck-Scripture, or by Josephus, whilst each of the aboveamed trees grows there in greater or less abun-

on codar. But (3.) The remains of wood used | kiel; and it may be added, that the LXX. render "masts" in that passage by iorous charirous, mule of fir, or like fir.

But there is another use of cedar wood men tioned in Scripture, namely, in purification (Lev x.v. 4; Num. xix. 6). The term cedar is applied by Pliny to the lesser cedar, oxycedrus, a Phoenician juniper, which is still common on the Lebanon. and whose wood is aromatic. The wood or fruit of this tree was anciently burnt by way of putfume, especially at funerals (Plin. H. N. xiii. 1, 5; Ov. Fast. ii. 558; Hom. Od. v. 60). The tree is common in Egypt and Nubia, and also in Arabia in the Wady Mousa, where the greater cedar is not found. It is obvious'y likely that the use of the more common tree should be enjoined while the people were still in the wilderness, rather than of hardt, Syria, p. 430; Russell, Nubia, p. 425).

The grove of trees known as the Cedars of Lebince. The Pinus sylcestris may have furnished anon consists of about 400 trees, standing quite he material of the ship-maste mentioned by Eze- slone in a depression of the mountain with no trees

400

mear, about 6400 feet above the sea, and 3000 beow the summit. About 11 or 12 are very large and old, 25 large, 50 of middle size, and more than 800 younger and smaller ones." The older trees have each several trunks and spread themselves widely round, but most of the others are of cone like form and do not send out wide lateral branches.⁶ In 1550 there were 28 old trees, in 1739 Pococke counted 15, but the number of trunks makes the operation of counting uncertain. They are re garded with much reverence by the native inhabitants as living records of Solomon's power, and the Maronite patriarch was formerly accustomed to celebrate there the festival of the Transfiguration at an altar of rough stones. Within the last 10 years a chapel has been erected (Robinson, iii. 590, H. W. P. 591; Stanley, S. & P. p. 140).

There can, we think, be little doubt that the Hebrew word eres (TN), invariably rendered "cedar" by the A. V., does stand for that tree in most of the passages where the word occurs. The erez, or "firmly rooted and strong tree," from an Arabic root which has this signification," is particularly the name of the cedar of Lebanon (Cedrus Libani); but that the word is used in a wider sense to denote other trees of the Conifern, is clear from some Scriptural passages where it occurs. For instance, the "cedar wood" mentioned in Lev. xiv. 6 can hardly be the wood of the Lebanon cedars, seeing that the Cedrus Libani could never have grown in the peninsula of Sinai, where the Israelites were at the time the law for the cleansing of the leper was given; nor in Egypt, whence they had departed. "Cedars," says Dr. Hooker, "are found on the mountains of Algeria, on the whole range of Taurus, and in the Kedisha valley of Lebanon: they have also been observed by Ehrenberg in forests of oak between Baherre and Bahinnate." There is another passage (Ez. xxvii. 5) where the Tyrians are said to have made use of "cedars of Lebanon' for masts of ships, in which perhaps erez denotes some fir; in all probability, as Dr. Hooker conjectures, the Pinus Halepensis, which grows in Lebanon, and is better fitted for furnishing shipmasts than the wood of the Cedrus Libani. With regard to the objection that has been made to the wood of the Cedrus Libani - (see Dr. Lindley's remark in the Gardener's Chron. i. 699, "the worthless though magnificent cedar of Mount Lebanon ") --- that its inferior quality could 1 ever have allowed it to form the "cedar pillars," de. of Solomon's temple, it may be observed that this inferiority applies only to English grown trees, and not to Lebanon specimens. At the same time it must be admitted that, though the wood is of close grain, it has no particular quality to recommend it for building purposes; it was probably, therefore, lot very extensively used in the construction of the Temple.

The Cedrus Libani, Pinus Halepensis, and Ju-

siperus excelsa, were robably all included under the term erez; though there can be no doubt that by this name is more esp cially denoted the codar of Lebanon, as being Rar' ifoxin the firmest and grandest of the conifers.

The Pinus sylvestris is by old writers often mentioned as one of the pines of Lebanon; but Dr Hooker says he has little doubt that the P. Halepensis must he the true meant, for the P. sylvestris ("Scotch fir ") is not found in Lebauon or Syria.

The claim of the Deodar to represent a Bible Conifer may be dismissed at once. Deodars ar. not found nearer to the Lebanon than within a distance of several hundred miles. As to the "cedar wood " used in purifications, it is probable that one of the smaller junipers is intended (J. sabina 1), for it is doubtful whether the Juniperus excelses exists at all in Arabia. [JUNIPER.]

Dr. Hooker has favored us with the following valuable communication relative to the true cedars of Lebanon: "As far as is at present known, the cedar of Lebanon is confined in Syria to one valley of the Lebanon range, namely, that of the Kedisha river, which flows from near the highest point of the range westward to the Mediterranean, and enters the sea at the port of Tripoli. The grove is at the very upper part of the valley, about 15 miles from the sea, 6000 feet above that level, and their position is moreover above that of all other arboreous vegetation. The valley here is very broad, open, and shallow, and the grove forms a mere speck on its flat floor. The mountains rise above them on the N. E. and S. in steep stony slopes, without precipices, gorges, ravines, or any other picturesque features whatever. Nothing can be more dreary than the whole surrounding landscape. To the W. the scenery abruptly changes, the valley suddenly contracts to a gorge, and becomes a rocky ravine of the most picturesque description, with villages, groves, and convents perched on its flaaks, base, and summits, recalling Switzerland vivialy and accurately. At the time of my visit (Octobe 1860) the flanks of the valley about the cedars wei : perfectly arid, and of a pule yellow red; and the view of this great red area, perhaps two or three miles across, with the minute patch of cedar grove, seen from above and at a distance of ten miles or so, was most singular. I can give you no idea of what a speck the grove is in the yawning hollow. I have said the floor of the valley is flat and broad : but, on nearer inspection, the cedars are found to he confined to a small portion of a range of low stony hills of rounded outlines, and perhaps 60 to 100 feet above the plain, which sweep across the valley. These hills are, I believe, old moraines, deposited by glaciers that once debouched on to the plain from the surrounding tops of Lebanon. - 1 have many reasons for believing this, as also for supposing that their formation dates from the glac'al epoch. The restriction of the cedars to these moraines is absolute, and not without analogy in re-

to the minutest twigs, and even the arrangement of the clustered leaves has the same general tendency. Climb into one, and you are delighted with a succe sion of verdant floors spread around the trunk, and gradually narrowing as you ascend. The beautiful cones seem to stand upon, or rise out of this grees flooring." A.

gard to other coniferous trees in Swiss and Himalayan valleys." | It contains about 300 trees, the largest measuring over 30 feet in circumference. "Perhaps 20 of

Dr. Hooker draws attention to the unfortunate disregard shown with wapeet to the seedlings annually produced from he old cedar-trees in Lebanon. It is a remarkable but lamentable fact that no trees are seen much less than 50 years old! The browsing goats and the drought destroy all the young seedlings; and it is a sad pity that no means are adopted to encourage their growth, which might easily be done by fencing and watering.^a

W. H.

• It has been popularly supposed and often asserted (even by Stanley, S. σP . p. 140, 3d ed.) that the B'sherreh grove above described was the only remaining representative of the ancient "cedars of Lehanon," though Sectzen found cedars to the number of several thousands at Etnüb, north of Ehden, and speaks of two other groves which he did not personally visit (Rob. Later Bibl. Res. iii. 593). Ehrenberg also in 1823 found the cedar growing abundantly on those parts of the Lebanon range which lie north of the road between Ba'albek and Tripoli (Rob. ibid.). More recently, other large groves were described by Berggren and the botanist Bové (Ritter, Erdk. xvii. 638). But we are indebted for the fullest information on this subject to the Rev. Henry H. Jessup, an American missionary in Syria, who has visited and described no less than "eleven distinct groves of cedars in Mount Lebanon, two of them of great size and numbering thousands of trees. Five of these groves are in Northern and six in Southern Lebanon, and their situation and relative altitude above the sea," Mr. Jessup remarks, "are such as to indicate that at some time in the past, the whole Lebanon range, at an average height of from 3000 to 7000 feet above the sea, was covered with forests of this imperial tree." (See his article on the "Cedar Forests in Mount Lebanon" in Hours at Home for March and April, 1867; iv. 405 ff., 499 ff.)

Of the groves in Northern Lebanon the most remarkable, besides the famous B'sherreh grove, is one at el-Hadith, first visited by Mr. Jessup in 1866, in which, as he says, "the trees are literally innumerable, extending for a mile along the range, and containing cedars enough to build a city of temples" (*Hours at Home*, iv. 409). Mr. Tristram visited the same place in 1864, and describes the largest of the trees as "fifteen or eighteen feet in circumference," but he found "none that approached the patriarchs of the grove either in size or magnificence" (*Land of Israel*, p. 634, 2d ed.).

In Southern Lebanon there was a forest of cedars a few years ago near 'Ain Zehalteh, containing "more than 10,000 trees, many of them of immense size;" but "the Vandal of a Sheik," as Mr. Tristram calls him, "sold them to a native speculator, who cut them down for pitch." The stumps, however, remain, and luxuriant young plants are springing up on every side. Mr. Jessup visited the place, and measured one stump "nearly 15 feet in diameter" (*Hours at Home*, iv. 499). Among the more remarkable groves now flourishing in Southern Lebauon is one near Maasir, "not inferior in interest to the 'Cedars of the Lord' themselves."

over 30 feet in circumference. "Perhaps 20 of them," says Mr. Jessup, " will measure from 20 to 25 feet in circumference, and almost all of them There is are large and venerable in appearance. not an insignificant tree in the grove." Near el-Barûk there is a much larger grove or rather forest, containing thousands of trees. They cover an area of nearly one hundred acres along the mountain side, and up and down a gradually sloping ravine. . . . The largest of the trees measure in girth about 20 feet, and they vary in size down to a foot in diameter." Below this, at about fifteen minutes' ride, lies the northeastern grove of el-Barûk, on the southern side of a deep ravine, containing about 200 noble trees, the largest 24 feet in circum ference

Mr. Jessup in his visits to these groves was accompanied by Dr. Post, an experienced lutanist, who pronounces the trees to be the genuine *Pinus cedrus*. A.

CEDRON (Kedpar; Alex. [1 Macc. xv. 39, Kaidpor; 41,] Kedpu: [1 Macc. xv. 39, 41,] Gedor [but Cedron, ed. 1590, as in xvi. 9]). 1 A place fortified by Cendebæus under the orders of king Antiochus (Sidetes), as a station from which to command the roads of Judzea (1 Macc. xv. 39, 41, xvi. 9). It was not far from Jamnia (Jabue), or from Azotus (Ashdod), and had a winter-torrent or wady (xeiudopous), on the eastward of it, which the army of the Maccabees had to cross before Cendebaus could be attacked (xv¹, 5). These conditions are well fulfilled in the modern place Katra or Kütrah, which lies on the maritime plain below the river Rubin, and three miles sort, west of Akir (Ekron). Schwarz (p. 119) gives the modern name as Kadrán, but this wants confirmation. Ewald (Gesch. iv. 390, note) suggests Tell el-Turmus, five or six miles further south.

CEI'LAN (KiAdy; [Ald. KeiAdy:] Ciaso). Sons of Ceilan and Azetas, according to 1 Eatr. v. 15, returned with Zorobabel from Babylon. There are no names corresponding to these in the lists of Ezra or Nehemiah.

[•] See Dr. Hooker's paper "On the Cetars of Lebanon, Taurus, &c." in the Nat Hist. Review, No. v p. 11.

[.] Dean Stanley has a beautarul paragraph (four and

on a visit to the cedars) in which he brings together in a striking picture all the Scripture allusions to this celebrated forest (*Notices of Localities*, p. 216 C.).

ure (1 K. vi. 9, 15, vii. 3; 2 Chr. iii. 5, 9, Jer. | the Alhambra Court of the Crystal Passe. xxii. 14; Hag. i. 4), and of Josephus (Ant. viii. 3, ancient Egyptians used colored tiles in their build \$§ 9-9, xv. 11, § 5), show that the ceilings of the ings (Athen. v. 206; Wilkinson, ii. 287). Temple and the palaces of the Jewish kings were formed of cedar planks applied to the beams or joints crossing from wall to wall, probably with sunk panels (paryouara), edged and crnamented with gold, and carved with incised or other patterns (βαθυξύλοιs γλυφαίs), sometimes painted (Jer. xxii. 14).

It is probable that both Egyptian and Assyrian models were, in this as in other branches of architectural construction, followed before the Roman period. [ARCHITECTURE.] The construction and designs of Assyrian ceilings in the more important buildings can only be conjectured (Layard, Nineveh, ii. 265, 289), but the proportions in the walls themselves answer in a great degree to those mentioned in Scripture (Nin. and Bab. p. 642; Fergusson, Handbook of Architecture, i. 201). Fxamples, however, are extant of Egyptian ceilings in stucco painted with devices of a date much earlier than that of Solomon's Temple. Of these devices the principal are the guilloche, the chevron, and the scroll. Some are painted in blue with stars, and others bear representations of birds and other emblems (Wilkinson, Anc. Egypt. ii. 290). The excessive use of vermilion and other glaring colors in Roman house-painting, of which Vitruvius at a later date complains (vii. 5), may have been introduced from Egypt, whence also came in all probability the taste for vermilion painting shown in Jehoiakim's palace (Jer. xxii. 14; Am. iii. 15; Wilkinson, i. 19). See also the descriptions given by Athenaus (v. p. 196) of the tent of Ptolemy Philadelphus, and the ship of Philopator (ib. p. 206), and of the socalled sepulchres of the kings of Syria near Tyre (Hasselquist, p. 165).

The panel work in ceilings, which has been described, is found in Oriental and North African dwellings of late and modern times. Shaw describes the ceilings of Moorish houses in Barbary as of wainscot, either "very artfully painted, or

Panelled celling from house in Cairo. (Lane, Modern Egyptians.)

else thrown into a variety of panels, with gilded mouldings and scrolls of the Korân intermixed ' (Travels, p. 208). Mr. Porter describes the ceil-.ngs of houses at Damascus as delicately painted, and in the more ancient houses with "arabesques encompassing panels of blue, on which are inscribed verses and chapters of the Koran in Arabic. Also

tomb at l'almyra, with a stone ceiling heautifully panelled and painted (Damascus, i. 34, 37, 57, 60, 232; cf. Deut. vi. 9; also Lane's Mod. Egypt. i. 27, 38). Many of the rooms in the Palace of the Moors at the Alhambra were ceiled and ornamented with the richest geometrical patterns. These still remain, and restorations of them may be seen at as does also the hay (ROAROS) into which the river

like taste is observed by Chardin to have prevailed in Persia, and he mentions beautiful specimens of mosaic, arabesque, and inlaid wood-work in ceilings at Ispahân, at Koom in the mosque of Fatima, and at Ardevil. These ceilings were constructed on the ground and hoisted to their position by machinery (Chardin, Voyage, ii. 434, iv. 126, vii. 387, viii. 40, plate 39; Olearius, p. 241). H. W. P.

* CELLARS. [JOASH, No. 7.] CELOSYR'IA. [COLLESYRIA.]

CEN'CHREA (accurately CEN'CHREA, Keyspeal: [Cenchra]), the eastern harbor of Corinth (i. e. its harbor on the Saronic Gulf) and the emporium of its trade with the Asiatic shores of the Mediterranean, as Lechaeum (Lautraki) on the Corinthian Gulf connected it with Italy and the west. A line of walls extended from the citadel of Corinth to Lechæum, and thus the pass of Cenchrese was of peculiar military importance in reference to the approach along the Isthmus from Northern Greece to the Morea. [CORINTH.]

St. Paul sailed from Cenchrese (Acts xviii. 18) on his return to Syria from his second missionary journey; and when he wrote his epistle to the Romans in the course of the third journey, an organized church seems to have been formed here (Rom. xvi. 1. See PHGEBE). The first bishop of this church is said (Amat. Const. vii. 46) to have been named Lucius, and to have been appointed by St. Paul.

The distance of Cenchrese from Corinth was 70 stadia or about nine miles. Pausanias (ii. 3) describes the road as having tombs and a grove of cypresses by the wayside. The modern village of Kikries retains the ancient name, which is conjectured by Dr. Sibthorpe to be derived from the millet (*kéykpi*), which still grows there (Walpole's Trarels, p. 41). Some traces of the moles of the port are still visible (see Leake's Morea, iii. pp. 233-235). The following coin exhibits the port exactly as it is described by Pausanias, with a tem ple at the extremity of each mole, and a statue of J. S. H. Neptune on a rock between them.

* Kenxpiés is the vulgar form, but in modera Greek the educated still write Keyxpeal (Rangahas TR EAAppind, ii. 318). It is situated near the mouth of a little river which lears the same name.

CENDEBEUS

enstern station of the steamers, and therefore under the traveller's eye who crosses the isthinus. When Paul was there he saw the place full of the monu-

Colonial Coin of Corinth. On the obverse the head of Antoninus Plus; on the reverse the port of Cenchrome, with C. L. I. C., that is, COLONIA LAVS IVILA CORDITIEOS.

ments of idolatry. On the road thither from Corinth he passed a temple and statue of Minerva. In the harbor itself was a shrine, and a figure of Aphrodite in marble, a brazen image of Neptune holding a trident in one hand and a dolphin in the other, and temples of Asclepius and Isis. The Greek mythology made Cenchrius, a son of Neptune, founder of Cenchrese, but in that may only have ennobled some trivial name already in use H. (Rangabes, as above).

CENDEBE'US (accurately CENDEBÆ' US, KerdeBalos; [Sin. in 1 Macc. xvi. 1, 8, Ae-Baios, DaiBeos: Cendebæus]), a general left by Antiochus VII. in command of the sea-board of Palestine (1 Macc. xv. 38 ff.) after the defeat of Tryphon, B. c. 138. He fortified Kedron and harassed the Jews for some time, but was afterwards defeated by Judas and John, the sons of Simon Maccabseus, with great loss (1 Macc. xvi. 1-B. F. W. 10). [ANTIOCHUS VII.]

in LXX. מקמרת הם מתופה) CENSER (מתופה מתופה) mostly rupeior, but also butorn and buuarhpior: thuribuhum). The former of the Hebrew words

(from Thin, to seize or lay hold of, especially of fire) seems used generally for any instrument to seize or hold burning coals, or to receive ashes, &c., such as the appendages of the brazen altar and golden candlestick mentioned in Ex. xxv. 38, xxxvii. 23, in which senses it seems rendered by the LXX. by imaguarple, imaguarthe, or perhaps wide us. It, however, generally bears the limited meaning which properly belongs to the second word, bund only in the later books (e. g. 2 Chr. xxvi. 19;

Ez. vil. 11), (der. יוֹהָה, incense), that, namely, of a small portable vessel of metal fitted to receive burning roals from the altar, and on which the incense for borning was sprinkled by the priest to whose office this exclusively belonged, who bore it in his hand, and with whose personal share in the most solemn ritual duties it was thus in close and vivid connection (2 Chr. xxvi. 18; Luke i. 9). Thus "Korah and his company" were bidder to

a Gesenius s. v. TATA seems to prefer the genaral maning of a fire-shovel in this passage ; but, from Num. xvi. 17, it was probably the same fashion of thing as that used by Aaron in the priestly function for, as the rebellion was evidently a deliberately conerted movement, is there any difficulty in suppring as amount of preparation suggested in the text.

empties. It is a little south of Kulumaki, the | take "censers," with which in emulation of Asron and his sons they had perhaps provided themselves a (comp. Ez. viii. 11); and Moses tells Aaron to take "the censer" (not a as in A. V.), i. e. that of the sanctuary, or that of the high-priest, to stay the plague by atonement. The only distinct precepts regarding the use of the censer are found in Num. iv. 14, where among the vessels of the golden alta., i. c. of incense, "censers" are reckoned; and in Lev. xvi. 12, where we find that the high-priest was to carry it (here also it is "the" not "a censer" that he is ordered to "take") into the most holy place within the vail, where the "incense" was to be "put on the fire," i. e. on the coals in the censer, "before the Lord." This must have been on the Day of Atonement, for then only was that place entered. Solomon prepared "censers of pure gold " as part of the same furniture (1 K. vii. 50; 2 Chr. iv. 22). Possibly their general use may be explained by the imagery of Rev. viii. 3, 4, b and may have been to take up coals from the brazen altar, and convey the incense while burning to the "golden altar," or "altar of incense," on which it was to be offered morning and evening (Ex. xxx. 7, 8). So Uzziah, when he was intending "to burn incense upon the altar of incense," took "a censer in his hand" (2 Chr. xxvi. 16, 19). The Mishna (Joma, iv. 4) mentions a silver censer which had a handle, and was fetched from some chamber where such utensils were kept (ib. v. 1, and Bartenora's comment); and was used to gather the coals from the altar, which were then transferred to a golden censer. On the great Day of Atonement, however, a golden one of finer standard (Tamid, v. 5) was used throughout. The word bumarhpion, rendered "censer" in Heb. ix. 4, probably means the "altar of incense." c [AL-TAR.] (In Ugolini, vol. xi. a copious collection of authorities on the subject will be found; Sonneschmid de Thym. Sanct. is referred to by Winer п. н. s. v. Rauchfass.)

CENSUS (אָפּרָדָה, or פְּרָדָה, numbering

combined with lustration, from TRD, survey in order to purge, Gesen. 1120: LXX. doi0465; N. T., ànoypaph: dinumeratio, descriptio). I. Muses laid down the law (Ex. xxx. 12, 13) that whenever the people were numbered, an offering of 1 a shekel should be made by every man above 20 years of age by way of atonement or propitiation. A previous law had also ordered that the firstborn of man and of beast should be set apart, as well as the first fruits of agricultural produce; the first to be redeemed, and the rest with one exception offered to God (Ex. xiii. 12, 13, xxii. 29). The idea of lustration in connection with numbering predominated also in the Roman census (Dict. of Antiq. s. v. Lustrum), and among Mohammedan nations at the present day a prejudice exists against numbering their possessions, especially the fruits of the field (Hay, Western Barbary, p. 15; Crichton, Arubia, ii. 180; see also Lane, Mod. Egypt. ii. 72,

λίβανος of Matt. ii. 11; in Rev. v. 8, φιάλη is used apparently to mean the same vessel.

c This word undeniably bears this sense in Joseph. Ant. iii. 8, § 8, who gives it similarly the epithet xpuroviv; as also in Philo, De Vit. Mos. p. 688, ed. Paris. It thus becomes = ovoraorriptov ovulauaror, the expression or the same thing in LXX., Ex. xxx. 1, but its simpler meaning is merely that of an "imis amount of preparation suggested in the text. The word for censor here is $\lambda_1\beta_{anwriv}$, from the censor, or incense altar. See also 1 Mace. 1. 21. 23

78). The instances of numbering recorded in the the numbers of Israel 1,100,000, and of Jud O. T are as follows:

1. Under the express direction of God (Ex. xxxviii. 26), in the 3d or 4th month after the Exedus, during the encampment at Sinai, chiefly for the purpose of raising money for the Tabernacle. The numbers then taken amounted to 603,550 men, which may be presumed to express with greater precision the round numbers of 600,000 who are said to have left Egypt at first (Ex. xii. 87).

2. Again, in the 2d month of the 2d year after the Exodus (Num. i. 2, 3). This census was taken for a double purpose, (a.) to ascertain the number of fighting men from the age of 20 to 50 (Joseph. Ant. iii. 12, § 4). The total number on this occasion, exclusive of the Levites, amounted at this time also to 603,550 (Num. ii. 32). Josephus says 603,-650; each tribe was numbered, and placed under a special leader, the head of the tribe. (b.) To ascertain the amount of the redemption offering due on account of all the first-born both of persons and cattle. Accordingly the numbers were taken of all the first-born male persons of the whole nation above one month old, including all of the tribe of Levi of the same age. The Levites, whose numbers amounted to 22,000, were taken in lieu of the firstborn males of the rest of Israel, whose numbers were 22,273, and for the surplus of 273 a money payment of 1365 shekels, or 5 shekels each, was made to Aaron and his sons (Num. iii. 39, 51). If the numbers in our present copies, from which hose given by Josephus do not materially differ. be correct, it seems likely that these two numberings were in fact one, but applied to different puroses. We can hardly otherwise account for the identity of numbers even within the few months of interval (Calmet on Num. i. Pictorial Bible, ibid.). It may be remarked that the system of appointing head men in each tribe as leaders, as well as the care taken in preserving the pedigrees of the families corresponds with the practice of the Arab tribes at the present day (Crichton, Arabia, ii. 185, 186; Niebuhr, Descr. de l'Arabie, 14: Buckingham, Arab Tribes, 88; Jahn, Hist. Book ii. 8, 11; Malcolm, Sketches of Persia, xiv. 157, 159).

3. Another numbering took place 88 years after rards, previous to the entrance into Canaan, when the total number, excepting the Levites, amounted o 601,730 males, showing a decrease of 1,870. All tribes presented an increase except the following: Reuben, [showing a decrease] of 2,770; Simeon, 37,100; Gad, 5,150; Ephraim and Naphtali, 8,000 each. The tribe of Levi had increased by 727 (Num. xxvi.). The great diminution which took place in the tribe of Simeon may probably be assigned to the plague consequent on the misconduct of Zimri (Calmet, on Num. xxv. 9). On the other hand, the chief instances of increase are found in danasseh, of 20,500; Benjamin, 10,200; Asher, .1,900, and Issochar, 9,900. None were numbered at this census who had been above 20 years of age at the previous one in the 2d year, excepting Caleb and Joshua (Num. xxvi. 63-65).

4. The next formal numbering of the whole people was in the reign of David, who in a moment of presumption, contrary to the advice of Joab, gave orders to number the people without requiring the statutable offering of 1 a shekel. The men of Israel for. The purpose of this census, which does not above 20 years of age were 800,000, and of Judah 50G 000, total 1.300 000 The book of Chron. gives (Neh. vii.), was to settle with reference to the year

470,000, total 1,570,000; but informs us that Leve and Benjamin were not numbered (1 Chr. xxi. 6 xxvii. 24). Josephus gives the numbers of Israe and Judah respectively 900,000 and 400,000 (S Sam. xxiv. 1, 9, and Calmet, ad loc. ; 1 Chr. xxi 1, 5, xxvii. 24; Joseph. Ast. vii. 13, § 1.)

5. The census of David was completed by Sole mon, by causing the foreigners and remnants of the conquered nations resident within l'alestine to be numbered. Their number amounted to 153,-600, and they were employed in forced labor on his great architectural works (Josh ix. 27; 1 K. v. 15, ix. 20, 21; 1 Chr. xxii. 2; 2 Chr. ii. 17, 18).

Between this time and the Captivity, mention is made of the numbers of armies under successive kings of Israel and Judah, from which may be gathered with more or less probability, and with due consideration of the circumstances of the times as influencing the numbers of the levies, estimates of the population at the various times mentioned.

6. Rehoboam (B. C. 975-958) collected from Judah and Benjamin 180,000 men to fight against Jeroboam (1 K. xii. 21).

7. Abijam (958-955), with 400,000 men, made war on Jeroboam with 800,000, of whom 500,000 were slain (2 Chr. xiii. 3, 17).

8. Ass (955-914) had an army of 300,000 men from Judah, and 280,000 (Josephus says 250,000) from Benjamin, with which he defeated Zerah the Ethiopian, with an army of 1,000,000 (2 Chr. xiv. 8, 9; Joseph. Ant. viii. 12, § 1).

9. Jehoshaphat (914-891), besides men in garrisons, had under arms 1,160,000 men, including perhaps subject foreigners (2 Chr. xvii. 14-19; Jahn, Hist. v. 87).

10. Amaziah (838-811) had from Judah and Benjamin 300,000, besides 100,000 mercenaries from Israel (2 Chr. xxv. 5, 6).

11. Uzziah (811-759) could bring into the field 307,500 men (307,000, Josephus), well armed, under 2600 officers (2 Chr. xxvi. 11-15; Joseph. And. ix. 10, § 3).

Besides these more general statements, we have other and partial notices of numbers indicating Thus, (a.) Gideon from 4 tribes colpopulation. lected 32,000 men (Judg. vi. 35, vii. 3). (b.) Jephthah put to death 42,000 Ephraimites (Judg. xii. 6). The numbers of Ephraim 300 years before were 32,500 (Num. xxvi. 37). (c.) Of Benjamin 25,000 were slain at the battle of Gibeah, by which slaughter, and that of the inhabitants of its cities, the tribe was reduced to 600 men. Its numbers in the wilderness were 45,600 (Num. xxvi. 41; Judg. xx. 35, 46). (d.) The number of those who joined David after Saul's death, besides the tribe of Iseachar, was 340,922 (1 Chr. xii. 23-38). (e.) At the time when Jehoshaphat could muster 1,160,000 men, Ahab in Israel could only bring 7000 against the Syrians (1 K. xx. 15). (f.) The numbers carried cantive to Babylon B. C. 599 from Judah, are said (2 K. xxiv. 14, 16) to have been from 8000 to 10,000, by Jeremiah 4600 (Jer. lii. 30).

12. The number of those who returned with Zerubbabel in the first caravan is reckoned at 42,-360 (Ezr. ii. 64); but of these perhaps 12,542 belonged to other tribes than Judah and Benjamir. It is thus that the difference between the tota. (ver. 64) and the several details is to the accounted materially differ from the statement in Nebemiat

x Jubilee the mheritances in the Holy Land, which | tains about 166 eq. miles, and in 1850 contained and been disturbed by the Captivity, and also to ascertain the family genealogies, and ensure, as far as possible, the purity of the Jewish race (Ezr. ii. 59, x. 9, 8, 18, 44; Lev. xxv. 10).

in the second caravan, B. C. 458, the number was 1,496. Women and children are in neither case included (Ezr. viii. 1-14).

It was probably for kindred objects that the pedigrees and enumerations which occupy the first 9 chapters of the 1st book of Chronicles were either composed before the Captivity, or compiled afterwards from existing records by Ezra and others (1 ('hr. iv. 38, 32, 39. v. 9, vi. 57, 81, vii. 28, ix. 2). In the course of these we meet with notices of the numbers of the tribes, but at what periods is uncertain. Thus Reuben, Gad, and half the tribe of Manasseh are set down at 44,760 (v. 18), issachar at 87,000 (vii. 5), Benjamin 59,434 (vii. 7, 9, 11), Asher 26,000 (vii. 40). Besides there are to be reckoned priests, Levites, and residents at Jerusalem from the tribes of Benjamin, Ephraim, and Manasseh (ix. 3).

Throughout all these accounts two points are clear. 1. That great pains were taken to ascertain and register the numbers of the Jewish people at various times for the reasons mentioned above. That the numbers given in some cases can with difficulty be reconciled with other numbers of no very distant date, as well as with the presumed capacity of the country for supporting population. Thus the entire male population above 20 years of age, excepting Levi and Benjamin, at David's census, is given as 1,300,000 or 1,570,000 (2 Sam. xxiv. 1; 1 Chr. xxi.), strangers 153,600, total 1,453,600 or 1,723,000. These numbers (the excepted tribes being borne in mind) represent a population of not less than 4 times this amount, or at least 5,814,000, of whom not less than 2,000,000 belonged to Judah alone (2 Sam. xxiv. 9). About 100 years after Jehoshaphat was able to gather from Judah and Benjamin (including subject foreigners) an army of 1,160,000 besides garrisons, representing a population of 4,640,000. Fifty years later, Amaziah could only raise 300,000 from the same I tribes, and 27 years after this, Uzziah had 307,-500 men and 2,600 officers. Whether the number of the foreigners subject to Jehoshaphat constitutes the difference at these periods must remain uncertain.

To compare these estimates with the probable capacity of the country, the whole area of Palestine. including the trans-Jordanic tribes, so far as it is possible to ascertain their limits, may be set down as not exceeding 11,000 square miles; Judah and Benjamin at 3,135, and Galilee at 930 sq. miles. The population, making allowance for the excepted tribes, would thus be not less than 530 to the square mile. Now the population of Belgium in 1850 was 4,426,202, or at the rate of 388 to the q. mile, the area being about 11,400 sq. miles. lxix. 14). . he area of the kingdom of Saxony is 5,752 sq. Lastly. miles, and its population in 1852 was 1,987,832, or an average of 3451, but in some districts 500, to the sq. mile. The counties of Yorkshire, Westmoreland (the least populous county in England), und Lancashire, whose united area is 8,642 sq. miles, contained in 1852 a population of 3,850,215, w rather more than 445 to the sq. mile; while the tounty of Lancashire alone gave 1,064 persons, the of pcpulation (Tac. Hist. v. 6; Amm. Marc. xiv

a population of 145,000, or 873 to the sq. mile. The population of Malta in 1849 was 115,864, or 1,182 to the sq. mile. The two last instances, therefore, alone supply an average superior to tha ascribed to Palestine in the time of David, while the average of Judah and Benjamin in the time of Jehoshaphat, would seem, with the exception mentioned above, to give 1,480 to the sq. mile, a population exceeded only, in England, by the county of Middlesex (6,683), and approached by that of Lancashire (1,064).

But while, on the one hand, great doubt rests on the genuineness of numerical expressions in O. T. it must be considered on the other, that the readings on which our version is founded give, with trifling variations, the same results as those pre-sented by the LXX. and by Josephus (Jahn, v. 36; Winer, Zahlen; Glasse, Phil. Sacr. de caussis corruptionis, i. § 23, vol. ii. p. 189).

In the list of cities occupied by the tribe of Judah, including Simeon, are found 123 "with their villages," and by Benjamin 26. Of one city, Ai, situate in Benjamin, which like many, if not all the others, was walled, we know that the population, probably exclusive of children, was 12,000, whilst of Gibeon it is said that it was larger than Ai (Josh. viii. 25, 29, x. 2, xv. 21-62, xviii. 21-28, xix. 1-9). If these "cities" may be taken as samples of the rest, it is clear that Southern Palestine, at least, was very populous before the entrance of the people of Israel.

But Josephus, in his accounts (1) of the population of Galilee in his own time, and (2) of the numbers congregated at Jerusalem at the time of the Passover, shows a large population inhabiting Palestine. He says there were many cities in Galilee, besides villages, of which the least, whether cities or villages is not quite certain, had not less than 15,000 inhabitants (B. J. iii. 3, § 2, 4; comp. Tac. Hist. v. 8). After the defeat of Cestius, A. D. 66, before the formal outbreak of the war, a census taken at Jerusalem by the priests, of the numbers assembled there for the Passover, founded on the number of lambs sacrificed, compared with the probable number of persons partaking, gave 2,700,000 persons, besides foreigners and those who were excluded by ceremonial defilement (see Tac. Hist. v. 12). In the siege itself 1,100,000 perished, and during the war 97,000 were made captives. Besides these many deserted to the Romans, and were dismissed by them (B. J. vi. 8, 9, 3). These numbers, on any supposition of foreign influx (δμόφυλον άλλ' our emix copior) imply a large native population; and 63 years later, in the insurrection of Barchochebas, Dion Cassius says that 50 fortified towns and 980 villages were destroyed, and 580,000 persons were slain in war, besides a countless multitude who perished by famine, fire, and disease, so that Palestine became almost depopulated (Dion Case

Lastly, there are abundant traces throughout the whole of Palestine of a much higher rate of fertility in former as compared with present times, a fertility remarked by profane writers, and of which the present neglected state of cultivation affords no test. This, combined with the positive divine promises of populousness, increases the probability of at least approximate correctness in the foregoing estimates West Riding of Yorkahire 496, and Warwickshire 8; Joseph. Before he had any knowledge of Baumer, Paldsting, pp. 8, 80, 83, App. ix. Comp. the Gospel he had renounced idolatry and become Gen. xiii. 16, xxii. 17; Num. xxiii. 10; 1 K. iv. 90; Acts xii. 20).

II. In N. T., St. Luke, in his account of the "taxing," says a decree went out from Augustus απογράφεσθαι πάσαν την οίκουμένην αύτη ή άπο γραφή πρώτη έγένετο ήγεμονεύοντος τής Σuplas Kupyviou, and in the Acts alludes to a disturbance raised by Judas of Galilee in the days of the "taxing" (Luke ii. 1; Acts v. 37).

The Roman census under the Republic consisted, so far as the present purpose is concerned, in an enrolment of persons and property by tribes and households. Every paterfamilias was required to appear before the Censors, and give his own name and his father's; if married, that of his wife, and the number and ages of his children: after this an account and valuation of his property, on which a tax was then imposed. By the lists thus obtained every man's position in the state was regulated. After these duties had been performed, a lustrum, or solemn purification of the people followed, but not always immediately (Dict. of Antiq. arts. Census, Lustrum; Dionys. iv. 15, 22; Cic. de Legg. iii. 3; Dig. 50, tit. 15; Cod. 11, tit. 48; Clinton, Fast. Hell. iii. p. 457, c. 10).

The census was taken, more or less regularly, in the provinces, under the Republic, by provincial censors, and the tribute regulated at their discretion (Cic. Verr. ii. lib. ii. 53, 56), but no complete census was made before the time of Augustus, who carried out 3 general inspections of this kind, namely, (1) B. C. 28; (2) B. C. 8; (3) A. D. 14; and a partial one, A. D. 4. The reason of the partial extent of this last was that he feared disturbances out of Italy, and also that he might not appear as an exactor. Of the returns made, Augustus himself kept an accurate account (breviarium), like a private man of his property (Dion Cass. liv. 35, lv. 13; Suet. Aug. 27, 101; Tac. Ann. i. 11; Tab. Ancyr. ap. Tac. ii. 188, Ernesti).

A special assessment of Gaul under commissioners sent for the purpose is mentioned in the time of Tiberius (Tac. Ann. i. 31, ii. 6; Liv. Ep. 134, 136).

The difficulties which arise in the passage from St. Luke are discussed under CYRENIUS.

H. W. P.

CENTURION. [As a military title, see Акмч, р. 164.]

* It is worth notice that all the centurions mendoned in the N. T. of whom we learn any thing beyond the strict line of their office, appear in a To the one of whom we read in avorable light. Matt. viii. 5 ff. the Jews bure testimony that "he oved their nation and had built them a synagogue." His faith and humility were so great that when Christ proposed to come and heal his servant, he replied, " Lord, I am not worthy that thou shouldest some under my roof; but speak the word only and my servant shall be healed." He had been born a heathen, but Christ declared of him, "I have not found so great faith, no, not in Israel." The senturion who was on guard at the time of the crucifixion, saw the portentous character of the events which accompanied the Saviour's death (Mark ev. 39; Luke xxiii. 47), acknowledged the right-

iquist, Travels, pp. 120, 127, 130; Stanley, S. & (Acts z. 1 ff.) marks a distinct period in the history a worshipper of Jehovah (ebore Bhs). He "feared God with all his house," abounded in alms-giving, and had a "good repute among all the nation of the Jews." His prayers for light and guidance were heard and answered. By a remarkable adjustment of visions and providences he was at length honored as the first Gentile convert who was received into the church under such circumstances as to settle the question of the universality of Christ's religion and its independence of the rites of Judaism. It is not certain that Julius, Paul's keeper on the journey to Rome (Acts xxvii. 1 ff.), became a Christian; but he is described as a model of courtesy and kindness, and, as may be inferred from the ascendency which the apostle gained over him during the voyage, was capable of appreciating the noble character and rare endowments of his prisoner.

CERAS (Knpds: Carias), 1 Endr. v. 29. [Keros.]

• CE'SAR, A. V. ed. 1611, etc. [CABAR.]

* CESARE'A, A. V. ed. 1611, etc. [Cam-AREA.]

CETAB (Kyrdß: Cetha), 1 Eadr. v. 30. There is no name corresponding with this in the lists of Ezra and Nehemiah.

CHABRIS ('ABpls, [XaBpls; Vat. Sin.] Alex. XaBpeis: Vulg. omits [exc. Jud. viii. 10 (9) Chubri]), the son of Gothoniel (& rou r.), one of the three "rulers" ($\delta \rho \chi or res$), or "ancients" ($\pi \rho e \sigma \beta (\sigma r e \rho o)$ of Bethulia, in the time of Judith (Jud. vi. 15, viii. 10, x. 6).

CHADIAS. "They of Chadias (of Xadiaoul [Alex. Ouxadiasai; Ald. of Xadias]), and Ammidioi," according to 1 Eadr. v. 20, returned from Babylon with Zorobabel. There are no corresponding names in Ezra and Nehemiah. * Fritzsche (Exeg. Handb. in loc.) identifies

Chadias with Kedesh, Josh. xv. 23. A.

· CHÆREAS, the proper orthography for CHERKAS, 2 Macc. x. 32, 37.

CHAFF (ער קר, אָרָאָ, הַשָּׁשׁ: Chald. ער פאר. χνοῦς, ἄχυρον: stipula, pukis, favilla). The Heb. words rendered chaff in A. V. do not seem to have precisely the same meaning: $\mathcal{W}\mathcal{W}\Pi = dry$ grass, hay; and occurs twice only in O. T., namely, Is. v. 24, xxxiii. 11. The root UUUU is not used. Probably the Sanskrit kakach = hay, is the same word (Bopp, Gloss. p. 41).

VID or VD is chaff separated by winnowing from the grain - the husk of the wheat. The car rving away of chaff by the wind is an ordinary Scriptural image of the destruction of the wicked, and of their powerlessness to resist God's judgments (Is. xvii. 13; Hos. xiii. 3; Zeph. ii. 2 [Job xxi 18; Ps. i. 4, xxxv. 5; Is. xxix. 5]). The root of the word is VID, to press out, as of milk ; wheneve its second meaning, to separate.

7⊒. is rendered straw in Ex. v. 7, 10, 11, &c., and stubble in Job xxi. 18. In Ex. v. 12, we read takness of his claims, and confessed. " Truly this 1202 Wi?, stubble for straw; so that it is not

portions, in which state it was mixed with the mud of which bricks were made to give it consistency. In 1 K. iv. 28, mention is made of a mixed fodder for horses and camels of barley and 72. such as the Arabs call tion to this day. The derivation of the word is doubtful. Gesenius was of opinion that אי העבוד was for הבוח, from root הבב, to build, in reference to edifices of bricks made with straw. Roediger prefers to connect it with 72, which properly implies a separation and division of parts and is thence transferred to the mental power of discernment; so that]] ignifies properly anything cut into small parts (Ges. Thes. 1492).

The Chaldaic word 749 occurs but once, in Dan. ii. 35. It is connected with the Syr. Job,

and Arab. عبوار, i. e. a straw or small bit of chaff

flying into and injuring the eye. W. D.

CHAIN. Chains were used, (1) as badges of office; (2) for ornament; (3) for confining prisoners. (1.) The gold chain (T_T) placed about Joseph's neck (Gen. xli. 42), and that promised to Daniel

(Dan. v. 7, named דָּמָנִין:), are instances of the first use. In Egypt it was one of the insignia of a judge, who wore an image of truth attached to it (Wilkinson's Anc. Egypt. ii. 26); it was also worn by the prime minister. In Persia it was considered not only as a mark of royal favor (Xen. Anab. i. 2, § 27), but a tok n of investiture (Dan. I. c. ; Morier's Second Journey. p. 93). In Ez. zvi. 11, the chain is mentioned as the symbol of sovereignty. (2.) Chains for ornamental purposes were worn by men as well as women in many countries both of Europe and Asia (Wilkinson, iii. 375), and probably this was the case among the Hebrews (Prov. i. 9). The necklace (עַבָּק) consisted of pearls, corals, &c. threaded on a string; the beads were called , from דרהים, to perforate (Cant. i. 10, A. V. "chains," where "of gold " are interpolated). Besides the necklace, other chains were worn (Jud. z. 4) hanging down as far as the waist, or even lower. Some were adorned with pieces of metal, shaped in the form of the moon, named שהרכים (utpriorioi, LXX.; lumilo, Vulg.; round tires like the moon, A. V.; Is. iii. 18); a similar ornament, the hillil, still exists in Egypt (Lane's Modern Egyptians, App. A.). The Midianites adorned the weeks of their camels with it (Judg. viii. 21, 26); he Arabs still use a similar ornament (Wellsted, i. 301). To other chains were suspended various trinkets - as scent-bottles, WEDT VOD (Lublets or houses of the soul, A. V., Is. iii. 20), and mirrors, בלירנים (Is. iii. 23). Step-chains, דור, דור יייי דור (tinkling ornaments, A. V.), were attached to the ankle-rings, which shortened the step and produced a mincing gait (Is. iii. 16, 18). (3.) The means

" " Our calcedony being often opalescent ---- i. e. havng something of Pliny's "Carbunculorum ignes" in - got confounded with the Carchedonius or Punic e of a pale color, and this again with his green denins. Kapysioner and Kalysioner are con-

the same as stubble. It means straw cut into short | adopted for confining prisoners among the Jews were fetters similar to our hand-cuffs (lit. two brusses, as though made in halves), fastened on the wrists and ankles, and attached to each other by a chain (Judg. xvi. 21; 2 Sam. iii. 34, 2 K. xxv. 7; Jer. xxxix. 7). Among the Romans, the prisoner was hand-cuffed to one, and occasionally to two guards - the hand-cuff on the one being attached to that on the other by a chain (Acts xii. 6, 7, xxi. 33 [xxviii. 16, 20; Eph. vi. 20; 2 Tim. i. 16]; Dict. of Ant., art. Catena). W. L. B. • The "chains" (A. V.) with which the Gad-W. L. B.

arene maniac was bound (Mark v. 3, 4) were ap parently ropes or withes, which he pulled apart in his phrensy (diegrandgene), while he crushed or shivered to pieces the iron fetters (ourrerplobau) See FETTERS.

CHALCEDONY (xarnody : chalcedonius), only in Kev. xxi. 19, where it is mentioned as being the stone which garnished the third foundation of the heavenly Jerusalem. The name is applied in modern mineralogy to one of the varieties of agate: specimens of this sub-species of quartz, when of a pearly or wax-like lustre and of great translucency, are known by the name of chalcedony, sometimes popularly called "white carnelian." a There is also a stalactitic form found occasionally in cavities. There can, however, be little doubt that the stone to which Theophrastus (De Lapid. § 25) refers, as being found in the island opposite Chalcedon and used as a solder, must have been the green transparent carbonate of copper, or our copper emerald. It is by no means easy to determine the mineral indicated by Pliny (N. H. xxxvii. 5); the white agate is mentioned by him (N. H. xxxvii. 10) as one of the numerous varieties of Achates (Agate), under the names Cerachutes and Leucachates. The Chalcedonius was so called from Chalcedon, and was obtained from the copper-mines there. It was a small stone and of no great value; it is described by Pliny as resembling the green and blue tints which are seen on a peacock's tail, or on a pigeon's neck. Mr. King (Antique Gems, p. 8) says it was a kind of inferior emerald, as Pliny understood it. W. B

* Thomson (Land and Book, i. 437) speaks of this mineral as not uncommon in Syria. In one of the valleys of Galilee (3) hours on the way from Safed to Acre) " are beautiful geodes of chalcedony. which I have spent days, first and last, in gathering In the spring of 1838 I sent four donkey-loads to Beirût, and from there they have been dispersed by friends to almost every part of the world. Some five years ago I discovered a new locality of it extending from Jiar Kuraone, below Mushgarah, quite up to the south end of the Buk'ah, at Jub Jennin. The whole country there for many miles is literally covered with these geodes, from the size of a walnut to that of a large melon. I have discovered jasper and agate in great variety and very beautiful, along the southern and eastern base of Mount Casius, and in a few other places. Of the twelve manner of stones in the breast-plate of the high-priest (Ex. xxviii. 17-20) there are native to this country the jasper, the agate, the beryl, and the sardius. If

tinually inte-hanged in MS Marbodus already under stood it of our Calcedony as shown by his "Pal-leasque Chascedonius spus habet sfligtan." -C. W Kine.

the sapphire is the lapis lazuli, it is also met with | what ill-defined, and in fact would vary according in certain parts of Syria."

It is surprising to notice with what familiarity the sacred writers refer to the names and qualities of precious stones. This is specially true of John in the Apocalypse (xxi. 18-21), who exhibits a knowledge of such matters which an expert only in this species of learning among us would be expected to possess. But in the East, where such stones abound and are applied to so many uses, persons of the most ordinary intelligence in other respects show themselves almost the equals of artisans and scholars. "I venture to say" (says the writer just quoted), "that this donkey-boy coming to meet us could confound nine-tenths of Bible-readers in America by his familiar acquaintance with the names, appearance, and relative value of the precious stones mentioned in the Word of God. We used not be surprised, therefore, at the constant mention of them by plain and unlettered prophets and apostles. John was not a scholar nor a lapidary, and yet he is perfectly at home among precious stones, and without effort gives a list which has puzzled and does still puzzle our wisest scholars even to understand, nor are they yet agreed in regard to them. In our translation, and in every other with which I am acquainted, the same Hebrew word is made to stand for entirely different gems, and lexicographers, commentators, and critics are H. equally uncertain."

CHAL'COL, 1 K. iv. 31. [CALCOL]

CHALDE'A, more correctly CHALDÆ'A

(ם אושים: א Xardala: Chakken) is properly only the most southern portion of Babylonia. It is used, however, in our version, for the Hebrew ethnic appellative Cascim (or " Chaldmans "), under which term the inhabitants of the entire country are designated; and it will therefore here be taken in this extended sense. The origin of the term is very doubtful. Casdim has been derived by some

from Chesed (TWR), the son of Nahor (Gen. xxii. 22); but if Ur was already a city "of the Cusdim' before Abraham quitted it (Gen. xi. 28), the name of (asdim cannot possibly have been derived from his nephew. On the other hand the term Chaldeea has been connected with the city Kalwadha (Chilmad of Ezekiel, xxvii. 23). This is possibly correct. At any rate, in searching for an etymology it should be borne in mind that Kaldi or Kaldai. not Caudim, is the native form.

1. Extent and boundaries. -- The tract of country viewed in Scripture as the land of the Chaldman is that vast alluvial plain which has been formed by the deposits of the Euphrates and the Tigris at least so far as it lies to the west of the latter stream. The country to the east is Elam or Susiana; but the entire tract between the rivers, as well as the low country on the Arabian side of the Euphrates, which is cultivable by irrigation from that stream, must be considered as comprised within the Chaldses of which Nebuchadnezzar was ting. This extraordinary flat, unbroken except by the works of man, extends, in a direction nearly N. W. and S. E., a distance of 400 miles along the sourse of the rivers, and is on the average about 100 miles in width. A line drawn from Hit on he Euphrates to Tekrit on the Tigris, may be considered to mark its northern limits; the eastern boundary is the Tigris itself; the southern the raphers a distinct region, being the most southern

to the degree of skill and industry devoted to the regulation of the waters and the extension of works for irrigation. In the most flourishing times of the Chaldseau empire the water seems to have been brought to the extreme limit of the alluvium, a canal having been cut along the edge of the tertiary formation on the Arabian side throughout its entire extent, running at an average distance from the Euphrates of about 30 miles.

2. General character of the country. - The general aspect of the country is thus described by a modern traveller, who well contrasts its condition now with the appearance which it must have presented in ancient times. "In former days," he says, "the vast plains of Babylon were nourished by a complicated system of canals and water-courses, which spread over the surface of the country like a net-work. The wants of a teeming population were supplied by a rich soil, not less bountiful than that on the banks of the Egyptian Nile. Like islands rising from a golden sea of waving corn, stood frequent groves of palm-trees and pleasant gardens, affording to the idler or traveller their grateful and highly-valued shade. Crowds of passengers hurried along the dusty roads to and from the busy city. The land was rich in corn and wine. How changed is the aspect of that region at the present day! Long lines of mounds, it is true, mark the course of those main arteries which formerly diffused life and vegetation along their banks, but their channels are now bereft of moisture and choked with drifted sand ; the smaller offshoots are wholly effaced. 'A drought is upon her waters,' says the prophet, 'and they shall be dried up!' All that remains of that ancient civilization - that 'glory of kingdoms,' -- ' the praise of the whole earth,' is recognizable in the numerous mouldering heaps of brick and rubbish which overspread the surface of the plain. Instead of the luxurious fields, the groves and gardens, nothing now meets the eye but an arid waste - the deuse population of former times is vanished, and no man dwells there." (Loftus's Chalden, pp. 14, 15.) The cause of the change is to be found in the neglect of man. "There is no physical reason," the same writer observes, "why Rabylonia should not be as beautaful and as thickly inhabited as in days of yore; a little care and labor bestowed on the ancient canals would again restore the fertility and population which it originally possessed." The prosperity and fertility of the country depend entirely on the regulation of the waters. Carefully and properly applied and husbanded, they are sufficient to make the entire plain a garden. Left to themselves, they desert the river courses to accumulate in lakes and marshes, leaving large districts waterless, and others most scantily supplied, while they overwhelm tracts formerly under cultivation, which become covered with a forest of reeds, and during the summer heats breed a pestilential miasma. This is the present condition of the greater part of Babylonia under Turkish rule; the evil is said to be advancing; and the whole country threatens to become within a short time either marsh or desert.

3. Divisions. - In a country so uniform and so devoid of natural features as this, political divisions could be only accidental or arbitrary. Few are found of any importance. The true Chaldses, as has been already noticed, is always in the geog-Persian Gulf; on the west its boundary is some portion of Babylonia, lying chiefly (if not solely) or

Digitized by Google

the right bank of the Euphrates (Strab. xvi. $1, \S 6$: direction a distance of 40 miles, from about lat. 31° Ptol. v. 20). Babylonia above this is separated into two districts, called respectively *Amorducin* and *Aurantits*. The former is the name of the central territory round Babylon itself; the latter is applied to the regions towards the north, where Babylonia borders on Assyria (Ptol. v. 20).

4. Citics. - Babylonia was celebrated at all times for the number and antiquity of its cities. "Babel, and Erech, and Accad, and Calneh in the land of Shinar," are the first towns mentioned in Scripture (Gen. x. 10). The "vast number of great cities" which the country possessed, was noted by Herodotns (i. 178), and the whole region is in fact studded with huge mounds, each mound marking beyond a doubt the site of a considerable town. The most important of those which have been identified are Borsippa (Birs-Nimmul), Sippara or Sepharvaim (Mosnib), Cutha (Ibruhim), Calneh (Niffer), Frech (Warka), Ur (Mugheir), Chilmad (Kaloadha), Larancha (Senkereh), Is (Hit), Duraha (Akkerkuf); but besides these there were a multitude of others, the sites of which have not been determined, as the Accad of Genesis (x. 10); the Teredon of Abydenus (Fr. 8); Asbi, Rubesi, &c., towns mentioned in the inscriptions. Two of these places - Ur and Borsippa - are particularly noticed in the following article [CHALDEANS]. Of the rest Erech, Larancha, and Calneh, were in early times of the most consequence; while Cutha, Sippara, and Teredon attained their celebrity at a comparatively recent epoch.

5. Canals. - One of the most remarkable feat ares of ancient Babylonia was, as has been already olserved, its net-work of canals. A more particular account will now be given of the chief of these Three principal canals carried off the waters of the Euphrates towards the Tigris above Babylon. These were, (1.) The original "Royal River," or Ar-Malcha of Berosus, which left the Euphrates at Perisabor or Anbur, and followed the line of the modern Sakluryeh canal, passing by Akkerkuf and entering the Tigris a little below Baghdad (2.) The Nahr Mulcha of the Arabs, which branched off at Ridhivaniyeh, and ran across to the site of Seleucia; and (3.) The Nuhr Kuthn, which starting from the Euphrates about 12 miles above Musnib, passed through Cutha, and fell into the Tigris 20 miles below the site of Seleucia. On the other side of the stream, a large canal, perhaps the most important of all, leaving the Euphrates at Hit. where the alluvial plain commences, skirted the deposit on the west along its entire extent, and fell into the Persian Gulf at the head of the Bubian sreek, about 20 miles west of the Shat-el-Arab while a second main artery (the Pallacopas of Arrian) branched from the Euphrates nearly at Mosub, and ran into a great lake in the neighborhood of Borsipps, whence the lands to the southwest of Babylon were irrigated. From these and other similar channels, numerous branches were carried out, from which further cross cuts were made, until at length every field was duly supplied with the precious fluid.

6. Sea of Nedjef, Chekke in marshes, & C --Chaldea contains one natural feature deserving of pecial description -- the "great inland freshwater was of Nedjef" (Loftus, p. 45). This sheet of water, which does not owe its origin to the inundajons, but is a permanent lake of considerable lepth, surrounded by cliffs of a reddish sandstone w bases 40 feat high erts nds in a south-casterle

greatest width is 35 miles. It lies thus on the right bank of the Euphrates, from which it is dis tant (at the nearest point) about 20 miles, and receives from it a certain quantity of water at the time of the inundation, which flows through it, and is carried back to the Euphrates at Samava, by a natural river course known as the Shat-el-Atchan. Above and below the Sea of Nedjef, from the Birs-Nimrud to Kufa, and from the south-eastern extremity of the Sea to Samava, extend the famous Chaldson marshes (Strab. xvi. 1, § 12; Arrian, Exp. Al. vii. 22), where Alexander was nearly lost, but these are entirely distinct from the sea itself, depending on the state of the Hindiyeh canal, and disappearing altogether when that is effectually closed.

7. Productions. - The extraordinary fertility of the Chaldsean soil has been noticed by various writers. It is said to be the only country in the world where wheat grows wild. Berosus noticed this production (Fr. 1, § 2), and also the spontaneous growth of harley, sesame, ochrys, palms, apples, and many kinds of shelled fruit. Herodotus declared (i. 193) that grain commonly returned 200-fold to the sower, and occasionally 300-fold. Strabo made nearly the same assertion (xvi. 1, § 14); and Pliny said (II. N. xviii. 17), that the wheat was cut twice, and afterwards was good keep for beasts. The palm was undoubtedly one of the principal objects of cultivation. According to Strabo it furnished the natives with bread, wine, vinegar, honey, porridge, and ropes; with a fuel equal to charcoal, and with a means of fattening cattle and sheep. A Persian poem celebrated its 360 uses (Strab. xvi. 1, 14). Herodotus says (i. 193) that the whole of the flat country was planted with palms, and Ammianus Marcellinus (xxiv. 3) observes that from the point reached by Julian's army to the shores of the Persian Gulf was one continuous forest of verdure. At present palms are almost confined to the vicinity of the rivers, and even there do not grow thickly, except about the villages on their banks. The soil is rich, but there is little cultivation, the inhabitants subsisting chiefly upon dates. More than half the country is left dry and waste from the want of a proper system of irrigation; while the remaining half is to a great extent covered with marshes, owing to the same neglect. Thus it is at once true that "the sea has come up upon Babylon and she is covered with the waves thereof" (Jer. li. 42); that she is made "a possession for the bittern, and pools of water " (Is. xiv. 23); and also that "a drought is upon her waters, and they are dried up" (Jer. l. 38), that she is "wholly desolate" --- "the hindermost of the nations, a wilderness, a dry land, and a desert " (ib. 12, 13). (See Loftus's Chalden and Susiana; Layard's Ninerch and Bab. chs. xxi.-xxiv.; Rawlinson's Herodotus, vol. i. Essay ix.; and Mr. Taylor's Paper in the Journal of the Asiatic Society, vol. xv. [Also: - Rawlinson, Five Great Monarchies of the Ancient Heathen World, voi. i. Lond. 1862; and Oppert. Histoire des empires de Chaklée et d'Assyrie d'après les monuments, Versailles, 1866 (from the Annales de philos chretiense, 1865). A.]). G. R.

CHALDE'ANS, or CHAL'DEES

Septh, surrounded by cliffs of a reddish sandstone (D'T(D): Xaldaios: Chaldes), appear in Script a places 40 feet high, ext ads in a south-casterly ure until the time of the Cantivity, as the people

410 CHALDEANS

of the country which has Babylon for its capital, | Hence all who studied it, whatever the r origin os

and which is itself termed Shinar (); but a the book of Daniel, while this meaning is still found (v. 30, and ix. 1), a new sense shows itself. The Chaldseans are classed with the magicians and astronomers; and evidently form a sort of priest class, who have a peculiar "tongue" and "learn-ing" (ii. 4), and are consulted by the king on religious subjects. The same variety appears in profane writers. Berosus, the native historian, himself a Chaldsean in the narrower sense (Tatian, Or. adv. Gr. 58), uses the term only in the wider; while Herodotus, Diodorus, Strabo, and the later writers almost universally employ it to signify a sect or portion of the people, whom they regard either as priests or as philosophers. With this view, however, is joined another, which but ill harmonizes with it; namely, that the Chaldmans are the inhabitants of a particular part of Babylonia, viz., the country bordering on the Persian Gulf and on Arabia (Strab. xvi. 1, § 6; Ptol. v. 20). By help of the inscriptions recently discovered in the country, these discrepancies and apparent contradictions are explicable.

It appears that the Chaldseans (Kuldui or Kaldi) were in the earliest times merely one out of the many Cushite tribes inhabiting the great alluvial plain known afterwards as Chaldzea or Babylonia. I'heir special seat was probably that southern portion of the country which is found to have so late retained the name of Chaldsea. Here was Ur "of the Chaldees," the modern Mugheir, which lies south of the Euphrates, near its junction with the Shat-el-Ilie. Hence would readily come those "three bands of Chaldseans" who were instruments, simultaneously with the Sabaans, in the affliction of Job (Job. i. 15-17). In process of time, as the Kaldi grew in power, their name gradually prevailed over that of the other tribes inhabiting the country; and by the era of the Jewish Captivity it had begun to be used generally for all the inhabitants of Babylonia. We may suspect that when the name is applied by Berosus to the dynasties which preceded the Assyrian, it is by way of prolepsis. The dynasty of Nabopolassar, however, was (it is probable) really ('haldsean, and this greatly helped to establish the wider use of the appellation. It had thus come by this time to have two senses, hoth ethnic: in the one it was the special appellative of a particular race to whom it had belonged from the remotest times, in the other it lesignated the nation at large in which this race vas predominant. We have still to trace its transference from an ethnic to a mere class sense - from the name of a people to that of a priest caste or sect of philosophers.

It has been observed above that the Kaldi proper were a Cuahite race. This is proved by the renains of their language, which closely resembles . Le Gulk or ancient language of Ethiopia. Now it appears by the inscriptions, that while both in Assyria and in later Babylonia the Semitic type of speech prevailed for civil purposes, the ancient Cushite dialect was retained, as a learned language, for scientific and religious literature. This is no doubt the "learning" and the "tongue" to which reference is made in the book of Daniel (i. 4). It became gradually inaccessible to the great mass of be people, who were Semitized, by means (chiefly) if Assyrian influence. But it was the Chaldeean earning, in the old Chaldeean or Cushite language.

race were, on account of their knowledge, termed Chaldseans. In this sense Daniel himself, the "master of the Chaldseans" (Dan. v. 11), would no doubt have been reckoned among them; and sc ve find Seleucus, a Greek, called a Chaldsean by Strabo (xvi. 1, § 6). It may be doubted whether the Chaldmans at any time were all priests, though no doubt priests were required to be Chaldsenns. They were really the learned class, who by their acquaintance with the language of science had bycome its depositaries. They were priests, magicians, or astronomers, as their preference for one or other of those occupations inclined them; and in the last of the three capacities they probably effected discoveries of great importance

According to Strabo, who well distinguishes (xvi. 1, § 6) between the learned Chaldseans and the mere race descended from the ancient Kaldi, which continued to predominate in the country bordering upon Arabia and the Gulf, there were two chief seats of Chaldsean learning, Borsipps, and Ur or Orchoë. To these we may add from Pliny (II. N. vi. 26) two others, Babylon, and Sippara or Sepharvaim. The Chaldaans (it would appear) congregated into hodies, forming what we may perhaps call universities, and pursning the studies, in which they engaged, together. They probably mixed up to some extent astrology with their astronomy, even in the earlier times, but they certainly made great advances in astronomical science, to which their serene sky, transparent atmosphere, and regular horizon specially invited them. The observations, covering a space of 1903 years, which ('allisthenes sent to Aristotle from Babylon (Simplic. ad Arist. de Cæl. ii. 123), indicate at once the antiquity of such knowledge in the country, and the care with which it had been preserved by the learned class. In later times they seem certainly to have degenerated into mere fortune-tellers (Cic. de Div. i. 1; Aul. Gell. i. 9; Juv. vi. 552, x. 94, &c.); but this reproach is not justly levelled against the Chaldzeans of the empire, and indeed it was but partially deserved so late as the reign of Augustus (see Strab. xvi. 1, § 6). CHAMBERLAIN (oleoropos: arcurius). Erastus, " the chamberlain " of the city of Corinth, was one of those whose salutations to the Roman Christians are given at the end of the Ep. addressed to them (Rom. xvi. 23). The office which he held was apparently that of public treasurer or arcarius, as the Vulgate renders his title. These arcarii were inferior magistrates, who had the charge of the public chest (area publica), and were under the authority of the senate. They kept the accounts of the public revenues. In the Glossary of Philoxenus the word oir or ϕ is explained $\delta \ end{angle} \tau \eta$ s δημοσίas τραπέζης, and in the Pandects the term arcarius is applied to any one who attends to public or private money. It is, as Grotius remarks, une of those words which have been transferred from the house to the state. In old glosses quoted by Suicer (Thesaur.) we find arcarius explained ports this interpretation. by imobierrys xpuroi, and in accordance with this the translators of the Geneva Version have placed " receiver " in the margin. Erasmus interpreted the word questor ararii. St. Ambrose thought that the office of the coconomus principally consisted in regulating the prices of the markets, and hence Pancirollus was erroneously led to interpret the term of the sedile. Theophylact rendered it διοικητής, δ προνοητής της πόλεως Koplutou, and is followed by Beza, who gives procurator.

In an inscription in the Marm. O.con. (p. 85, ed. 1732) we find Nelley our or $\Delta \sigma las$; and in another, mention is made of Miletus, who was ceconomus of Smyrna (Ins. xxx. 26; see Prideaux's note, p. 477). Another in Gruter (p. mxci. 7, ed. Scaliger, 1616) contains the name of "Secundus Arkarius Reipublica Amerinorum;" but the one which bears most upon our point is given by Orellius (No. 2821), and mentions the "arcarius provincise Achaise.

For further information see Reinesius, Syntaym. Inser. p. 431; La Cerda, Advers. Sacr. cap. 56; Elsner, Obs. Sucr. ii. 68; and a note by Reinesius to the Marmora Oxoniensia, p. 515, ed. 1732.

Our translators had good reason for rendering oikovoµos by "chamberlain." In Stow's Survey of London (b. v. p. 162, ed. Strype) it is said of the Chamberlain of the city of London: "Ilis office may be termed a publick treasury, collecting the customs, monies, and yearly revenues, and all other payments belonging to the corporation of the city.'

The office held by Blastus, " the king's chambertrin (τον έπι τοῦ κοιτώνος τοῦ βασιλέως)," was entirely different from that above mentioned (Acts xii. 20). It was a post of honor which involved great intimacy and influence with the king. The margin of our version gives "that was over the king's bed-chamber," the office thus corresponding to that of the proefectus cubiculo (Suet. Dom. 16). For CHAMBERLAIN as used in the O. T., see EUNUCH, ad fin.

W. A. W.

CHAMELEON (DD, coach: χαμαιλέων: shamaleon). The Hebrew word which signifies "strength" occurs in the sense of some kind of unclean animal in Lev. xi. 30; the A. V. follows she LXX. and Vulg. Various other interpreta-ions of the word have been given, for which see Bochart (*Hieroz*, il. 493). It is not possible to intended, and figures the Kebsch (Annotrague he LXX. and Vulg. Various other interpretasome to any salisfactory conclusion on the subject if the identity of this word; Bochart accepts the Arabic reading of el-warlo, i. e. the lizart, known | Mr. Tristram, in Zool. Proc. for 1859

by the name of the "Monitor of the Nile" (Moni an Niloticus, Grey), a large stroi g reptile common Arabian writin Egypt and other parts of Africa. ers have recorded many wonderful things of this creature, and speak especially of its power in fighting with snakes, and with the dabb, a closely allied species [TORTOISE]. No doubt much they relate is fabulous, and it seems that there is some confusion between the dubb a (Uromastix spinipes) and the crocodile, whose eggs the "Nilotic Monitor' devours. Forskál (Descr. Anim. p. 13) speaks of this last-named lizard under the Arabic name of Waran. See also Hasselquist (Trov. p. 221). The Hebrew root of coach has reference to strength, and as the Arabic verb, of almost sin. lar form, means " to conquer any one in fighting." Bochart has been led to identify the lizard named above with the Heb. couch. It is needless to add how far from conclusive is the evidence which sup-

CHAMOIS (τρι, zemer: καμηλοπάρδαλις: camelopardatus). In the list of animals allowed for food (Deut. xiv. 5) mention is made of the zemer ; the I.XX., Vulg., and some other versions, give "camelopard" or "girafle" as the rendering of this term; it is improbable that this animal is intended, for although it might have been known to the ancient Jews from specimens brought into Egypt as tributes to the Pharaohs from Ethiopia, where the giraffe is found, it is in the highest degree improbable that it should ever have been named as an article of food in the Levitical law, the animals mentioned therein being doubtless all of them such as were well known and readily procured. The "chamois" of the A. V. can hardly be allowed to represent the zemer; for although, as Col. H. Smith asserts, this antelope is still found in Central Asia, there is no evidence that it has ever been seen in Palestine or the Lebanon. The etymology points to some "springing" or "leaping" animal, a definition which would suit any of the Antelopea

Aoudad Sheep.

a See some interesting observations on the Daib, by

W. H.

mys, in the Mokattam rocks near Cairo, and found of the temple it is translated "top," as 1 K. vii also in Sinai; it is not improbable that this is the 16, &c. animal denoted, for the names of the other ruminants mentioned in the catalogue of beasts allowed for food, are, for the most part, identifiable with other wild animals of the Bible lands, and there can be no doubt that the Kebsch or Acadad was known to the Israelites; again, Col. Smith's suggestion has partly the sanction of the Syriac version, which reads as the equivalent of the Heb. word, "a mountain goat," the Aoudud, although really a sheep, being in general form more like a goat. This animal occurs not unfrequently figured on the monuments of Egypt; it is a native of N. Africa, and an inhabitant of high and inaccessible places. W. H.

• CHA'NOCH, Gen. iv. 17, marg. A form of ENOCH, more nearly representing the Hebrew.

* CHAPEL occurs in Am. vii. 13 as the trans-

lation of V 377 (Sept. aylaoµa, and Vulg. sanctificatio regis), i. e. sanctuary or place of worship, and is applied there not to any single shrine or temple, but Bethel itself, which in the time of Jeroboam II. was crowded with altars (Am. iii. 14) which that king had erected to Baal. The rendering is as old certainly as the Bishops' Bible, and perhaps arose from an idea that the king had a private place of worship at Bethel. The term "chapel" is also applied in the A. V. to places for idol-worship (eiowheia, reperg) 1 Macc. i. 47; 2 Macc. x. 2, xi. 3.

כהרות האפהרות, in pl. להֶרֶה (1.) פּהֶרוֹת, in pl.

rom]], to surround : επιθέμα : capitellum

2) 75%, from 75%, to draw out (Ges. 912-)14): al reparal: capita. The upper member of a pillar - the same word which is now in use in the slightly different form of "capital;" also possi bly a roll moulding at the top of a building or work of art, as in the case (a) of the pillars of the Tabernacle and Temple, and of the two pillars called sepecially Jachin and Boaz; and (b) of the lavers belonging to the Temple (Ex. xxxviii. 17; 1 K. vii. 37, 31, 38). As to the form and dimensions of the former, see TABERNACLE, TEMPLE, BOAZ, und of the latter, LAVER. (3.) The word "N". rosh == head, is also occasionally rendered "Chapter," as in the description of the Tabernacle, Ex. their reading of the name. [Evidently from the

Fragelaphus), a wild sheep not uncommon, he | xxxvi. 38, xxxviii. 17, 19, 28; but in the according to the second state of the H. W. P.

> CHARAATH'ALAR (Yapaabadar; Alm Xapa aθaλap: Carmellam et Jareth), 1 Eadr. v The names "Cherub, Addan, and Immer,' 36. in the lists of Ezra and Nehemiah, are here changed to "Charaathalar leading them, and Aalar."

> CHAR'ACA (els ror Xápana (? Xápaž): [in] Characa), a place mentioned only in 2 Mace. xii. 17, and there so obscurely that nothing can be certainly inferred as to its position. It was on the east of Jordan, being inhabited by the Jews called "Tubieni," or of "Tobie" [ToB], who were in Gilead (comp. 1 Macc. v. 9, 13); and it was 750 stadia from the city Caspin; but where the latter place was situated, or in which direction Charax was with regard to it, there is no clew. Ewald (iv 359, note) places it to the extreme east, and identifies it with RAPHON. The only name now known on the east of Jordan which recalls Charax is Kerak, the ancient Kir-Moab, on the S. E. of the Dead Sea, which in post-biblical times was called Xaodaμωβα, and Μωβουχάραξ (see the quotations in Reland, 705). The Syriac Peshito has Lata Carca, which suggests KARKOR (Judg. viii. 10).

> CHAR'ASHIM, THE VALLEY OF (D'U'TO N'2, "ravine of craftsmen;" 'Aves δatp [Vat. -eip]; Alex. Γησρασείμ, δτι τέκτονες hoar; [Comp. Γηχαρασίμ:] vallis artificum), a place mentioned twice; - 1 Chr. iv. 14, as having been founded or settled by Josb, a man of the tribe of Judah and family of Othniel; and Neh. xi. 35, as being reinhabited by Benjamites after the Captivity. In this [the latter] passage it is rendered "valley of craftsmen" [Alex. $\gamma\eta$ Apa $\sigma_{i\mu}$]. Its mention by Nehemiah with Lod (Lydda), Neballat, etc., fixes its position as in the swelling ground at the back of the plain of Sharon, east of Jaffa. The Talmud (as quoted by Schwarz, p. 135) reports the valley of Charashim to consist of Lod and Ono, which lay therein. Whether Joab the son of Seraiah is the same person as the son of Zeruiah will be best examined under the name JOAB.

> Dr. Robinson argues that the value (N°?) of Charashim may have been a side valley opening into the plain of Beil Nuba near Lod (Lydda), which latter he supposes to be the plain or valley

> (エデジア) of Ono (Neh. xi. 35), and a different one therefore, from that of Lod and Ono. See his Phys. Geogr. p. 113. H.

> CHAR'CHAMIS (Xaprauús; Alex. Kalxa uvs: Charcumis), 1 Esdr. i. 25. [CARCHEMISH.] * The A. V. ed. 1611, and apparently in most sditions, if not all, reads CARCHAMIS.

CHA'REA (Xapéa; [Vat. omits:] Caree), 1 Fadr. v. 82. [HARSHA.]

CHARGER (1. TTTT, from a root signifying hollowness: τρύβλιον, κοτύλη: acetabulum. 2. אַבָרְטָל: tourthp: phiala ; only found Hzr. i. 9), a shallow vessel for receiving water or blood, also for presenting offerings of fine flour with oil (Num. vii. 79; Ges. Thes. 22). The "chargers mentioned in Numbers are said to have been of silver, and to have weighed each 130 shekels, or 85 oz. (Hussey, Anc. Weights, c. ix. p. 190).

2. The daughter of Herodias brought the head of St. John Baptist "in a charger," in miran (Matt. xiv. 8 [11; Mark vi. 25, 28]; probably a trencher or platter, as Hom. Od. i. 141:-

δαιτρός δε κρειών πίνακας παρέθηκεν άείρας TONTOINE

Comp. [mirat, Luke xi. 39, A. V. "platter," and] Luke i. 63, *miran(810r*, a writing-tablet. [BASIN.] II. W. P.

• The English "charger" as "that on which anything is Lid, a dish," comes from the French charger, and the old English charge, i. e. "to lowd." The A. V. renders קערה dish in Ex. xxv. 2., xvxvii. 16, and Num. iv. 7. 11.

* CHARGES. "Be at charges with them . V. Acts xxi. 24, or rather for them " (dardwysur is aurois), means "pay the expense of their A. offerings,"

CHARIOT. (1.) , from 227, to ride: Loua: currus: sometimes including the horses (2 Sam. viii. 4, x. 18). (2.) 2727, a chariot or horse (Ps. civ. 8). (3.) 그곳기, m. from same root as (1), a chariot, litter, or seat (Lev. xv. 9, Cant. iii. (4.) עַרַל , f. (5.) עַרָלָדו (5.), קַרְבָּבְדוּ (4.) rull (Ps. xivi. 9, Bupeos: acutum). (6.) 717. Cant. iii. 9: popeior: ferculum. (7.) Ez. xxvii. 20; Ges., Ewald, riding; Vulg., ad sedondum. (8.) 127, Ez. xxiii. 24, a difficult word : Ges., arms; Fürst, battle-aze; Hitzig, by altering the points, and etymological conjecture, rultling. A.] (Between 1-4 no difference of signifiration). A vehicle used either for warlike or peaceful purposes, but most commonly the former. Of the latter use the following only are probable instances: as regards the Jews, 1 K. xviii. 44; and as regards other nations, Gen. xli. 43, xlvi. 29; 2 K. v. 9; Acts viii. 29.

The earliest mention of chariots in Scripture is In Egypt, where Joseph, as a mark of distinction. was placed in Pharaoh's second chariot (Gen. xli. 43), and later when he went in his own chariot to meet his father on his entrance into Egypt from Canaan (xivi. 29). In the funeral procession of Jacob chariots also formed a part, possibly by way of escort or as a guard of honor (1. 9). The next mention of Egyptian chariots is for a warlike pursome (Ex. xiv. 7). In this point of view chario's among some nations of antiquity, as elephants smong others, may be regarded as filling the place of beavy artillery in modern times, so that the mil-

In the edition of 1611 it is | number of its chariots. Thus Pharaoh in pursuing Israel took with him 600 chariots. The Canaan ites of the valleys of Palestine were enabled to resist the Israelites successfully in consequence of the number of their chariots of iron, i. e. perhaps armed with iron scythes (Ges. s. v.; Josh. xvii. 18; Judg. i. 19). Jabin, king of Canaan, had 900 chariots (Judg. iv. 3). The Philistines in Saul's time had 30,000, a number which seems excessive (1 Sam. xiii. 5; but comp. LXX. and Joseph. Ast. vi. 6, § 1). David took from Hadadezer king of Zolah 1000 chariots (2 Sam. viii. 4), and from the Syrians a little later 700 (x. 18), who in order to recover their ground collected 32,000 character 'l Chr. xix. 7). Up to this time the Israelites puesessed few or no chariots, partly no doubt in consequence of the theocratic prohibition against multiplying horses, for fear of intercourse with Egypt, and the regal despotism implied in the possession of them (Deut. xvii. 16; 1 Sam. viii. 11, 12). But to some extent David (2 Sam. viii. 4), and in a much greater degree Solomon, broke through the prohibition from seeing the necessity of planing his kingdom, under its altered c.rcumstances, on a footing of military equality or superiority towards other nations. He raised, therefore, and maintained a force of 1400 chariots (1 K. x. 25) by taxation on certain cities agreeably to Eastern cus tom in such matters (1 K. ix. 19, x. 25; Xen. An (b. i. 4, 9). The chariots themselves and also the horses were imported chiefly from Egypt, and the cost of each chariot was 600 shekels of silver, and of each horse 150 (1 K. x. 29). [SHEKEL] From this time chariots were regarded as among the most important arms of war, though the supplies of them and of horses appear to have been still mainly drawn from Egypt (1 K. xxii. 34; 2 K. ix. 16, 21, xiii. 7, 14, xviii. 24, xxiii. 30; Is. xxxi. 1). The prophets also allude frequently to chariots as typical of power, I's. xx. 7, civ. 3; Jer. li. 21; Zech. vi. 1.

Chariots also of other nations are mentioned, as of Assyria (2 K. xix. 23; Ez. xxiii. 24), Syria (2 Sam. viii. and 2 K. vi. 14, 15), Persia (Is. xxii. 6), and lastly Antiochus Eupator is said to have had 300 chariots armed with scythes (2 Macc. xiii. 2).

In the N. T., the only mention made of a chariot except in Rev. ix. 9, is in the case of the Ethiopian or Abyssinian eunuch of Queen Candace, who is de scribed as sitting in his chariot reading (Acts viii 28, 29, 38).

Jewish chariots were no doubt imitated from Egyptian models, if not actually imported from Egypt. The following description of Egyptian chariots is taken from Sir G. Wilkinson. They appear to have come into use not earlier than the 18th dynasty (B. C. 1530). The war chariot, from which the chariot used in peace did not essentially differ, was extremely simple in its construction. It consisted, as appears both from Egyptian paintings and reliefs, as well as from an actual specimen preserved at Florence, of a nearly semicircular wooden frame with straightened sides, resting posteriorly on the axle-tree of a pair of wheels, and supporting a rail of wood or ivory attached to the frame by leathern thongs and one wooden upright The floor of the car was made of rope in front net-wors, intended to give a more springy footing to the occupants. The car was mounted from the back, which was open, and the sides were strengthtary power of a nation might be estimated by the energiand ornamented with leather and metal bind-

An Egyptian war-chariot, with bow-cases and complete furniture. (Wilkinson.)

by a thong. There were no traces; but the horses, which were often of different colors, wore only a breast-band and girths which were attached to the saddle, together with head furniture consisting of cheek pieces, throat-lash, head stall and straps across the forehead and nose. A bearing-rein was fastened to a ring or hook in front of the saddle, and the driving-reins passed through other rings on each side of both horses. From the central point of the saddle rose a short stem of metal, end- the front of the car to which the quiver was re

ing. Attached to the off or right-hand side, and ing in a knob, whether for use or mere ornamest is crossing each other diagonally, were the bow-case, not certain. The driver stood on the off-side, and and inclining backwards, the quiver and spear-case. in discharging his arrow hung his whip from the If two persons were in the chariot, a second bow- wrist. In some instances the king is represented case was added. The wheels, of which there were 2, alone in his chariot with the reins fastened round

> at liberty. Most commonly 2 persons, and sometimes 3 rode in the chariot, of whom the third was employed to carry the state umbrella (2 K. ix. 20, 24; 1 K. xxii. 34; Acts viii. 38). A second chariot usually accompanied the king to battle to be used in case of necessity (2 Chr. xxxv. 34).

> On peaceable occasions the Egyptian gentleman sometimes drove alone in his chariot attended by servants on foot. The horses wore housings to protect them from heat and insects. For royal personages and women of rank an umbrella was carried by a bearer, or fixed upright in the chariot. Sometimes mules were driven instead of horses, and in travelling sometimes oxen, but for travelling purposes the sides of the chariot appear to have been closed. One instance occurs of a 4-wheeled car, which, like the TETPAKUKLOS auata (Herod. ii. 63), was used for religious purposes. [CART.] The processes of manufacture of chariots and harness are fully illustrated by existing sculptures, in which also are represented the chariots used by neighboring nations (Wilkinson, Anc. Egypt. i. 368, 386; ii. 75, 76, 2d ed.).

> The earlier Assyrian war chariot and harness did not differ essentially from the Egyptian. Two or three persons stood in the car, but the driver is sometimes represented as standing on the near side

times 4, fastened to the axle by a linchpin secured | whilst a third warrior in the chariot held a shield to protect the archer in discharging his arrow. The car appears to have had closed sides. The war chariot wheels had 6 spokes; the state or peace chariot 8 or more, and a third person in state processions carried the royal umbrella. A third horse like the Greek maphopos, was generally attached (Layard, Nineveh, ii. 350).

In later times the third horse was laid aside, the wheels were made higher, and had 8 spokes; and

Egyptian princes in their charlot. (Wilkinson.)

CHARIOT

noved from its former side p-sition, was made quare instead of round. The cars was more highly ornamented, panelled, and inlaid with valuable woods and metals, and painted. The embroidered housings in which in earlier times the

borses were clothed, were laid aside, and plumes and tassels used to decorate their necks and forebeads. (Layard, Ninerch, ii. 353, 356; Ninerch and Babylon, pp. 341, 587, 603, 618; Mon. of Nin. 2d series, pl. 24; Ez. xxvii. 20.)

The Persian art, as appears from the sculptures at l'ersepolis, and also at Kouvunjik, shows great similarity to the Assyrian; but the procession represented at the former place contains a chariot or car with wheels of 12 spokes, while from the sculptures at the latter, it appears that the Elamites, or Fersians, besides chariots containing 2 persons which were sometimes drawn by 4 horses, used a kind of cart drawn by a single mule or more, consisting of a stage on high wheels capable of holding 5 or 6 persens, of whom the driver sat on a low stool, with his legs hanging on each side of the pole. (Xenoph. Cyrop. iv. 3, 1, and 2, § 22; Is. axii. 6; Ez. axiii. 24; Niebuhr. Voyage, ii. 105; Chardin, Voyage, viii. 25", pt. lix.; Layard, Nin. and Bab. pp. 447-449; Olearius, Travels, [309.]

Amyrian charlot.

Chariots armed with scythes ($\delta \mu \mu \sigma \tau a \ \delta \rho e \pi a \tau \eta$, $\phi \phi \rho a$, Xen. Anab. i. 7, § 10; may perhaps be intended by the "chariots of iron" of the Camaanice; they are mentioned as part of the equipment of Antiochus (2 Macc. xiii. 2), and of Darius (Diod. Sic. xvii. 53; Appian. Syr. c. 32, Xenophon mentions a Persian chariot with 4 poles and 3 horses (Lyrop. vi. 4).

Among the parts of wheeled-carriages mentioned in A. V. are, (1.) the Wheels, באוֹכַנּיא: מַיָּמּיָר: אוֹכַנּיָים slao בּיָרָנָיָים דירָרָגעוֹ: דָרָרָגעוֹ: דָרָרָגעוֹ: דָרָרָגעוֹ: דירָגעוֹ: דירָגעוֹי: דירָגעוֹ: דירָגעוֹ: דירָגעוֹ: דירָגעוֹ: דירָגעוֹ: דירָגעוֹ: דירָגעוֹ: דירָגעווין געווין געווי CHEBAR

The Persian custom of sacrificing horses to the Sun (Xen. Cyrop. viii. 3, 12), seems to have led to offerings of chariots and horses for the same object among the Jewish monarchs who fell into idolatry (Ez. viii. 16; 2 K. xxiii. 11; P. della Valle, xv. ii. 255; Winer, Wagen). H. W. P.

CHE'BAR ($\neg \neg \neg$: $x \circ \beta d \rho$; [Vat. M. Ez. x 22, $x \circ \rho a \beta$:] Chobar), a river in the "land of the Chaldeans" (Ez. i. 3), on the banks of which some of the Jews were located at the time of the Captivity, and where Ezekiel saw his earlier visions (Ez. i. 1, iii. 15, 23, &c.). It is commonly regarded as

identical with the Habor (קוביל), or river of Go zan, to which some portion of the Israelites were removed by the Assyrians (2 K. xvii. 6). But this is a mere conjecture, resting wholly upon the aimilarity of name; which after all is not very close It is perhaps better to suppose the two streams dis tinct, more especially if we regard the Habor as the ancient ' $A\beta dj \beta a$ (modern *Khabour*), which fell into the Euphrates at Circesium; for in the Old Testament the name of Chaldes is never extended so fu northwards. The Chebar of Ezekiel must be looked for in Babylonia. It is a name which might properly

have been given to any great stream (comp. $\neg \neg \neg \neg$, great). Perhaps the view, which finds some support in Pliny (*H. N. vi. 26*), and is adopted by Bochart (*Phalleg*, i. 8) and Cellarius (*Geograph.* c. 22), that the (helar of Ezekiel is the *Nahr Malcha* or Royal Canal of Nebuchadnezzar — the greatest of all the cuttings in Mesopotamia — may be regarded as best deserving acceptance. In that caw we may suppose the Jewish captives to have lowen employed in the excavation of the channel.

denoted by קארים, the sares by האלולים, and the

[•] The writer has here followed the erroneous renbering of the A. V. in 1 K. vii. 38. According to the fellows by المراجع (fellows by) المراجع

scene of Ezekiel's preaching, is indicated by the tradition which places his tomb at Keffil (Loftus's () R. Chaldaea, p. 35).

CHE'BEL (תקל), one of the singular topographical terms in which the ancient Hebrew language abounded, and which give so much force and precision to its records. The ordinary meaning of the word Chebel is a "rope" or "cord;" and in this sense it frequently occurs both literally (as Josh. ii. 15, "cord;" 1 K. xx. 31, "ropes;" Is. xxxiii. 23, "tacklings;" Am. vii. 17, "line") and metaphorically (as Lecl. xii. 6; Is. v. 18; Hos. xi. From this it has passed --- with a curious cor-4). respondence to our own modes of speech - to denote a body of men, a " band " (as in Ps. cxix. 61). In 1 Sam. x. 5, 10, our word "string" would not be inappropriate to the circumstances - a "string or prophets coming down from the high place." Further it is found in other metaphorical senses. arising out of its original meaning (as Job xviii. 10; Ps. xviii. 4; Jer. xiii. 21). From the idea of a measuring-line (Mic. ii. 5), it has come to mean a "portion" or "allotment" (as 1 Chr. xvi. 18; Ps. cv. 11; Ez. xlvii. 13). It is the word used in the familiar passage "the lines a are fallen unto me in pleasant places" (Ps. xvi. 6). But in its topographical sense, as meaning a "tract" or "district," we find it always attached to the region of Argob, which is invariably designated by this, and by no other term (Deut. iii. 4, 13, 14; 1 K. iv. 13). It has been already shown how exactly applicable it is to the circumstances of the case. [ARGOB.] But in addition to the observations there made, the reader should be referred to the report of the latest traveller in those interesting regions, who abundantly confirms the statements of his predecessors as to the abrupt definiteness of the boundary of the district. (Mr. C. C. Graham, in Cambridge Essays, 1858.) No clew is afforded us to the reason of this definite localization of the term Chebel; but a comparison of the fact that Argob was taken possession of by Manasseh - a part of the great tribe of Josph-with the use of this word by that tribe and by Joshua in his retort, in the very early and characteristic fragment, Josh. xvii. 5, 14 (A. V. "portion "), prompts the suggestion that it may have been a provincialism in use amongst that large and independent part of Israel. Should this be thought untenable, its application to the "rocky shore" of Argob may be illustrated and justified by its use (Zeph. ii. 5-7; A. V. " coast ") for the " coast line " of the Mediterranean along Philistia. In connection with the sea-shore it is also employed in Josh. xix. 29.

The words used for Chebel in the older versions are σχοίνισμα, περίμετρον, περίχωρον: regio, funiculus. [See Arcans, and the addition to BASHAN in Amer. ed.]

CHEDORLAO'MER (דָרָלָעֹמֶר) איז יפּדָרָלָעמֶר): א₀ δολλογομόρ: Chodor Inhomor), a king of Elam, in the time of Abraham, who with three other chiefs made war upon the kings of Sodom, Gomorrah, Admah, Zeboim, and Zoar, and reduced them to servitude. For twelve years he retained his hold over them; in the thirteenth they rebelled; in the

UHEESE

That Chaldsea, not upper Mesopotamia, was the | nixt year, however, he and his allies marched upo their country, and after defeating many neighboring tribes, encountered the five kings of the plain in the vale of Siddim. He completely routed them slew the kings of Sodom and Gomorrah, and carried away much spoil, together with the family of Lot. Chedorlaomer seems to have perished in the rescue which was effected by Abraham upon hearing of the captivity of his nephew (Gen. xiv. 17). According to Gesenius the meaning of the word

may be " handful of sheaves, from 5, W, handful

and Thy, sheaf ; " but this is unsatisfactory. The name of a king is found upon the bricks recently discovered in Chaldsea, which is read Kudur-ma pula. This man has been supposed to be identical with Chedorlaomer, and the opinion is confirmed by the fact that he is further distinguished by a title which may be translated "Ravager of the west." " As however one type alone of his legends has been discovered," says Col. Rawlinson, "it is impossible to pronounce at present on the identification. The second element in the name " Chedor-laomer " is of course distinct from that in " Kudurmapula." Its substitution may be thus accounted for. In the names of Babylonian kings the latter portion is often dropped. Thus Shelmaneser becomes Shalman in Hoshes; Merodach-bal-adan, becomes Mardocempal. &c. Kudur-mapula might therefore become known as Kuchur simply. The

epithet "el-Ahmar," , which means the

Red, may afterwards have been added to the name, and may have been corrupted into Laomer, which, as the orthography now stands, has no apparent meaning. Kedur-el-Ahmar, or "Kedar the Red." is in fact a famous hero in Arabian tradition, and his history bears no inconsiderable resemblance to the Scripture narrative of ('hedor-laomer. It is also very possible that the second element in the name of Chedor-laomer, whatever be its true form, may be a Semitic translation of the original Hamite term mapula." "('hedorlaomer may have been the leader of certain immigrant Chaldsean Elamites who founded the great Chaldsean empire of Berosus in the early part of the 20th century B. C., while Aniraphel and Arioch, the Hanite kings of Shinar and Ellasar, who fought under his banner in the Syrian war as subordinate chiefs, and Tidal, who led a contingent of Median Scyths belonging to the old population, may have been the local governora who had submitted to his power when he invaded Chaldea " (Rawlinson's Herord, i. 436, 446).

Ś. 1.

CHEESE is mentioned only three times in the Bible, and on each occasion under a different name in the Hebrew: (1) נְרַיָר, from נְרַשָ, to curdle (Job x. 10), referred to, not historically, but by way of illustration: (2) YTT, from YTT, 4 cut (τρυφαλίδες τοῦ γάλακτος, l.XX.; formelle ensei, Vulg., 1 Sam. xvii. 18); the Chaldee and Syriac give []]: Hesychius explains Trupaliles from TIT, to scrape (Japie Boir, LXX.

[&]quot;chain," and also " rood " as applied in the prove and colonies, to solid measure of wood, &c., are sh vious.

a The use of the word in this sense in our own idiomatic expression - "hard lines" will not be formitten. Other sorrespondences between Chebel as aptied to measurement, and our own words " rod " and

cheese of kine, A. V. 2 Sam. xvii. 29: the Vul- who obeyed the summons of Nabuchodonosor to gate, following Theodotion's rendering, yaladyrd his war with Arphaxad (Jud. i. 6). The word is use representation of the words after "sheep": the Targum and other Jewish authorities, however, identify the substance with those mentioned above). It is difficult to decide how far these terms correspond with our notion of cheese, for they simply express various degrees of coagulation. It may be observed that cheese is not at the present day common among the Bedouin Arabs, butter being decidedly preferred; but there is a substance, closely corresponding to those mentioned in 1 Sam. xvii., 2 Sam. xvii., consisting of coagulated butter-milk, which is dried antil it becomes quite hard, and is then ground: the Arabs eat it mixed with butter (Burckhardt, Notes on the Bedouins, i. 60). In reference to this subject, it is noticeable that the ancients seem generally to have used either butter or cheese, but not both: thus the Greeks had in reality but one expression for the two, for $\beta o \hat{v} \tau v \rho o v = \beta o \hat{v} s$, $\tau v \rho \delta s$, "cheese of kine:" the Romans used cheese exclusively, while all nomad tribes preferred butter. The distinction between cheese proper, and coagula ted milk, seems to be referred to in Pliny, xi. 96. w L.B.

OHELAL (יָלָל) [perfection] : Χαλήλ; [Vat. Nexana, Ne- belonging to the preceding word:] Chalal), Ezr. x. 30 [where he is mentioned as one of the eight sous of Pahath-Moab who had all taken " strange wives "].

CHELCI'AS (Xernias: Helcins). 1. Ancestor of Baruch (Bar. i. 1).

2. Hilkiah the high-priest in the time of Isaiah W. A. W. (Bar. i. 7).

CHELCI'AS (Xerkias, i. e. הולקבה, the portion of the Lord, HILKIAH: Helcias), the father Tradition of Susanna (Hist. of Sus. 2, 29, 63). (Hippol. in Susann. i. 689, ed. Migne) represents him as the brother of Jeremiah, and identical with the priest who found the copy of the law in the time of Josiah (2 K. xxii. 8). B. F. W.

CHEL/LIANS, THE (Jud. ii. 23). [CHEL-LUS.]

CHEL/LUH (כָּלְהָהַי), כלודת , Keri [strength, Fürst]: Xehrla; [Vat. FA. Xehreia; Ald. Alex. XeAla:] Cheliau), Fzr. x. 35 [one of the sons of Bani, who had foreign wives].

CHEL'LUS (XENNoús; [Sin. Xeonous; Vat.] Alex. Xehous: Vulg. omits), named amongst the laces beyond (i.e. on the west of) Jordan to which Nabuchodonosor sent his summons (Jud. i. 9). Except its mention with "Kades" there is no clew to its situation. Reland (Pal. p. 717) conjectures

that it may be Chalutza, הללצה, a place which, under the altered form of Elusa, was well known to the Roman and Greek geographers. With this agrees the subsequent mention of the "land of the Chellians" (The Xerralwr [Vat. M. Xardawr; Sin. Alex. XeAcor, terra Cellon), "by the wilder-ness," to the south of whom were the children of Ishmael (Jud. ii. 23). G.

* Volkmar (Einl. in die Apolr. i. 191) adopts the reading Xaldalar, which is supported by the Syriac.

CHETOD (Χελεούλ; Alex. Χελεουτ [Sin. Χελαιουδ; Ald. Χελόδ:] Vulg. omits. Many nations of the sons of Chelod " were are g those 27

apparently corrupt. Simonis suggests X drev, perh. Ctesiphon. Ewald conjectures it to be a nickname for the Syrians, "sons of the moles" The Gesch. iv. 543).

· Volkmar gives the same interpretation, only applying the term, in accordance with his theory of the book, to the Roman armies as a Schanzyraber-Heer, famous for intrenching. See his Einl. in die Apokr. i. 31 f., 153. A.

CHELUB (בלוב) [bird-cage]). 1. A man among the descendants of Judah, described [1 Chr. iv. 11] as the brother of Shuah and the father of Mechir [1 Chr. iv. 11]. (In the LXX. the name is given as Caleb, $X_{\alpha\lambda}\epsilon_{\beta}$, the father of Ascha; the daughter of the well-known Caleb was Achsah; Vulg. Caleb.)

2. (& Xehouß; [Vat. XoBoud:] Chelub). Ezri the son of Chelub was the overseer of those who " did the work of the field for tillage of the ground," one of David's officers (1 Chr. xxvii. 26).

CHELU'BAI [3 syl.] (לובָ') [herous, Fürst]: & Xaléß; [Vat. M. Oxaßel, i. e. & Xa- $\beta i \lambda$:] Calubi), the son of Hezron, of one of the chief families of Judah. The name occurs in 1 Chr. ii. 9 only, and from a comparison of this passage with ii. 18 and 42, it would appear to be but another form of the name Caleb. It is worth noting that, while in this passage Jerahmeel is stated to be a brother of Chelubai, it appears from 1 Sam. xxvii. 10 that the Jerahmeelites were placed on the "south of Judah," where also were the pos-sessions of the house of Caleb (Judg. i. 15; 1 Sam. xxv. 3, xxx. 14). In the Syriac Vers. the name is

. Salci ; probably a transcriber's error for

(Burrington, i. 209). G.

CHEM'ARIMS, THE (הַכְּמָרִים: (in 9 K. xxiii. 5] of Xapaplu; [Vat.] Alex. or Xapaperu: aruspices, aditui). This word only occurs in the text of the A. V. in Zeph. i. 4. In 2 K. xxiii. 5 it is rendered "idolatrous priests," and in Hos. x. 5 "priests," and in both cases "chemarim" is given in the margin. So far as regards the Hebrew usage of the word it is exclusively applied to the priests of the false worship, and was in all probability a term of foreign origin. In Syriac the

word J. Cumro, is found without the same restriction of meaning, being used in Judg. xvii. 5, 12, of the priest of Micah, while in Is. lxi. 6 it denotes the priests of the true God, and in Heb. it 17 is applied to Christ himself. The root in Syriac signifies" " to be sad," and hence cumro is supposed to denote a mournful, ascetic person, and hence a

priest or monk (compare Arab. I., abil, and

Syr. J. abilo, in the same sense). Kissel derived it from a root signifying "to be black,' because the idolatrous priests wore black garments; but this is without foundation. [IDOLATRY, II.] In the Peshito-Syriac of Acts xix. 35 the feminine form of the word is used to render the Greek rewnopor. "a temple keeper." Compare the Vulg coditui, which is the translation of ('hemarin in W A. W. two passages.

OHE MOSH (מושה) [perh. subduer. Ge .

Digitized by Google

418 CHENAANAH

fire, hearth, i.e. god of fire, Fürst]: Xauds; [Vat. | Beeroth, and Mizpeh (xviii. 26). The men of In Judg. Auss:] Chamos), the national deity of the Moabites (Num. xxi. 29; Jer. xlviii. 7, 13, 46). In Judg. xi. 24, he also appears as the god of the Ammonites: he rust not, however, be identified with Molech. Solomon introduced, and Josiah abolished, the worship of Chemosh at Jerusalem (1 K. xi. 7; 2 K. xxiii. 13). With regard to the meaning of the name, and the position which Chemosh held in mythology, we have nothing to record beyond doubtful and discordant conjectures Jerome (Comm. in Is. xv. 2) identifies him with Baal-Peor; others with Baal-Zebub, on etymological grounds; others, as Gesenius (Thesaur. 693) with Mars, or the god of war, on similar grounds; and others (Beyer ud Selden, p. 323) with Saturn, as the star of ill omen, Chemosh having been worshipped, according to a Jewish tradition, under the form of a black star. Jerome (on Is. xv.) notices Dibon as the chief seat of his worship.

W. L. B.

CHENA'ANAH (TJJJ): Xarard [Vat. Xavaav; Alex. Xavavav:] Chanana; according to Gesen. fem. of CANAAN). 1. Son of Bilhan, son of Jediael, son of Benjamin, head of a Benjamite house (1 Chr. vii. 10), probably of the family of the Belaites. [BELA.]

2. [Xaradr; Vat. M. 1 K. xxii. 11, Xaara; Alex. Xavava, Xavaav, Xavaava: Chanaana.] Father, or ancestor, of Zedekiah, the false prophet who made him horns of iron, and encouraged Ahab to go up against Ramoth-Gilead, and smote Micaiah on the cheek (1 K. xxii. 11, 24; 2 Chr. xviii. 10, 23). He may be the same as the preceding.

A. Č. H.

CHENA'NI (יכָבָר [Jehovah appointed or made]: Xarer(; FA³. Alex. Xararı; FA¹. Vat. omit:] et Chanani), one of the Levites who assisted at the solemn purification of the people under Esra (Neh. ix. 4 only). By the LXX. the word Baui

(こ) preceding is read as if meaning "sons" "sons of Chenani." The Vulgate and A. V. adhering to the Masoretic pointing, insert " and."

CHENANI'AH (בְּכָרָדָה) [as above]: Xar verla, Xorerlas; [Vat. Koreria, Xorereia; Alex. Korevia, Xorevias; in 1 Chr. xv. 27, Alex. Xeverias; Vat. Iexorias; FA. Elexorias:] Chonenias), chief of the Levites, when David carried the ark to Jerusalem (1 Chr. xv. 22, xxvi. 29). In 1 Chr. xv.

27, his name is written _____.

CHE'PHAR-HAAMMO'NAI בפר)

העמוני, " Hamlet of the Ammonites; " Kapapa каl Кефіра каl Movi [Vat. -феi- and -vei]; Alex. Кафпрации»; [Comp. Кафарацишva:] Villa Emona), a place mentioned among the towns of Benjamin (Josh. xviii. 24). No trace of it has yet been discovered, but in its name is doubtless preserved the memory of an incursion of the Ammonites up the long ravines which lead from the Jordan valley to the highlands of Benjamin.

CHEPHI'RAH (הַכְּכִירָה, with the definite wrick, except in the later books, -- " the hamlet: " [Rom.] Keoppá, [etc.; Vat. Keopespa, Despa, Kaopespa; FA. in Neh. Kaopespa; Alex.] Xeopespa, [etc.:] Cuphira, Caphara), one of the four cities of the Gibeonites (Josh. ix. 17), and named after- during the early part of the three years' drought wards among the towns of Benjamin, with Ramah, (1 K. xvii. 3, 5). No further mention of 16 a

CHEMITH

Chephirah returned with Zerubbabel from Babylos (Ezr. ii. 25; Neh. vii. 29). The Samaritan Version, at Gen. xiii. 3, renders Hai (Ai) by Cephran,

DD: but this cannot be Chephirah since both Ai and it are mentioned together in Josh. iz. (comp. 8 with 17), and in the lists of Ezra and Nehemiah already quoted. And indeed Dr. Robinson seems to have discovered it under the scarcely altered name of Kefir, in the mountain-country on the western confines of Benjamin, about 2 miles cast of Valu (Ajalon) (Rob. iii. 146). [CAPHIRA.]

CHE'RAN (777: Xappdu: Charum), one of the sons of Dishon (so A. V., but Hebrew is Dishan), the Horite "duke" (Gen. xxxvi. 26; 1 Chr. i. 41). No name corresponding with this has yet been discovered amongst the tribes of Arabia.

CHE'REAS (Xaipéas; [Alex. Xepeas:] Chareas), a brother of Timotheus, the leader of the Ammonites against Judas Maccabæus (1 Macc. v. 6), who held Gazara (Jazar, 1 Macc. v. 8), where he was slain on the capture of the fortress by the Jews (2 Macc. x. 32, 37). B.F.W.

CHER'ETHIMS [properly Cherethim] (כָּרָתִים), F.z. xxv. 16. The plural form of the word elsewhere rendered CHERETHITES; which see. The Hebrew word occurs again in Zeph. ii. 5; A. V. "Cherethites." In these passages the LXX. render Cretans, and the Vulgate by Palestini and Philistines (Konres: Alex. [in Ez.] spires oidowos: Palestini, Philisthini).

CHER/ETHITES AND PEL/ETHITES

(ידוי לָתַפָּלָתי : אַ Xepen) אמן א אנאנא (תופי געי) א גערוי (דופי געי: א גערוי גע σωματοφύλακες, Joseph. Ant. vii. 5, § 4: Cerethi et Phelethi), the life-guards of King David (2 Sam. viii. 18, xv. 18, xx. 7, 23; 1 K. i. 38, 44; 1 Chr. xviii. 17). These titles are commonly said to signify "executioners and couriers" (ayyapos) from דרה, to sluy, and דלת, to run. It is plain that these royal guards were employed as executioners (2 K. xi. 4), and as couriers (1 K. xiv. 27). Similarly Potiphar was captain of the guard of Pharaoh and also chief of the executioners (Gen. xxxvii. 36), as was Arioch, Nebuchadneszar's officer (Dan. ii. 14). In the latter part of David's reign the Cherethites and Pelethites were commanded by Benaiah (2 Sam. viii. 18, xx. 23, xxiii. 23). But it has been conjectured that the royal body-guards may have been foreign mercenaries, like the Pope's Swiss guarda. They are connected with the Gittites, a foreign tribe (2 Sam. xv. 18); and the Cherethites are mentioned as a nation (1 Sam. xxx. 14), dwelling apparently on the coast, and therefore probably Philistines, of which name Pelethitas may be only another form. R. W. B. another form.

CHE'RITH, THE BROOK (נחל פרית) [torrent of the cut or gorge]: xeiudopous Xopode: torrens Carith), the torrent bed or wordy - to use the modern Arabic word which exactly answers to the Hebrew Nachal - in (not "by," as the translators of the A. V. were driven to say by their use of the word "brook") which Elijah hid himself

found in the Bible, and by Josephus (Ant. viii 13, | the frightful gorge opens suddenly upon us at a § 2) it is spoken of merely as Xeiµdopous 715. | bend of the road, about two miles from the Plain: The position of the Charith has been much dis- | there "the traveller finds himself in front of a

The position of the Cherith has been much disputed. The words of the passage unfortunately give no clew to it: — "get thes hence (i. e. apparently from the spot where the interview with Ahab had taken place, and which may or may not

be Samaria), and turn thy face eastward (元章), and hide thee in the torrent Crith, which is facing

(22) the Jordan." The expression "facing the Jordan," which occurs also in verse 5, seems simply to indicate that the stream in question ran into that river and not into either the Mediterranean or the Dead Sea. Josephus, as we have seen, does not name the torrent, and he says that Elijah want, not "eastward," but towards the south — els $\tau\lambda$ mpbs vbrow µépn. Eusebius and Jerome on the other hand (*Onomasticon*, Chorath) place the Cherith beyond Jordan, where also Schwarz (51) would identify it in a Wody Alica, opposite Bethahean. This is the Wady el. Ydbis (Jabeah), which Benj. Tudela says is a corruption

of DN'N TN' (ii. 408; Asher). The only tradition on the subject is one mentioned by Marinus Sanutus in 1321; that it ran by Phasselus, Herod's city in the Jordan valley. This would make it the 'Aim Fuschil which falls from the mountains of Ephraim into the Ghôr, south of Kurn Surtabeh, and about 15 miles above Jericho. This view is supported by Bachiene, and in our own time by Van de Velde (ii. 310). The spring of the brook is concealed under high cliffs and under the shade of a dense jungle (V. de Velde, Memoir, 339). Dr. Robinson on the other hand would find the name

in the Wady Kelt ($(\Box \cup \Box)$), behind Jericho. The two names are however so essentially unlike, — not so much in the change of the Caph to Kaph, and Resk to Lam, both of which are conceivable, as in the removal of the accent from the end in C+th to the beginning in Kell, — that this identification is difficult to receive, especially in the absence of any topographical grounds. (See the same doubt expressed by Winer, Chrith.)

The argument from probability is in favor of the ('herith being on the east of Jordan, of which **Elijah was a native**, and where he would be more at of Ahab's reach than in any of the recesses of he mountains of Ephraim or Benjamin. With increases knowledge of that part of the country, the name may possibly be discovered there. (i.

• Dr. Robinson reatfirms the identity of Cherith and Kelt in his Phys. Geog. p. 94, f. Wilson (Lands of the Bible, ii. 5) holds the same view. t is impossible to press the argument from any supposed affinity in the names. Dr. Van Dyck, one of the best living authorities, says: " I do not see how Kelt can be derived from Cherith, except on principles of etymology which make no account of vowels and consonants."^a Hence in this respect. Kelt may have no advantage over 'Ala Fusáil, or any other place put forward for this identification. But it must be owned that a brook or ravine better suited to have been the asylum of the prophet could hardly be found anywhere. Mr. Tristrun (Land of Israel, p. 202, 2d ed.) mentions some traits of the beality which accord remarkably with the Scripture secount. In going down from Jerusalem to Jericho

the ingului gorge opens suddenly upon up as a bend of the road, about two miles from the Plain: there "the traveller finds himself in front of a precipice, perhaps 500 feet high, pierced by many inaccessible anchorite caverns, and with a steep, rugged hill above. We gaze down into the steep ravine, and see the ravens, eagles, and griffon-vultures sailing beneath us. These are now the sole inhabitants of these caves, the monarchs of the waste." It will be seen how well this description answers to the import of the ancient name. In a retreat like this, too, the prophet could easily have hid himself from the knowledge and pursuit of Ahab, and the birds of prey, which must have haunted the place of old as now, could have brought the

for the preservation of als servant. There is a treatise "Elias corvorum convictor" in the Critici Sacri. Gumpach's "Elias und die Raben" in his Altestumentliche Studien, p. 200 ff. (Heidelberg, 1852), is an attempt to remove from the narrative all traces of a miraculous intervention. We have the various opinions on the subject canvassed, and the obvious meaning of the history vindicated, in Deyling's Observationes Sacra, Pars i., No. xxv. H.

CHE'RUB ($\Box i \uparrow i \uparrow i : X \epsilon \rho o \ell \beta$, Xapo β ; [Vst. in Ezr. corrupt:] Cherub), apparently a place in Babylonia from which some persons of doubtful extraction returned to Judzea with Zerubbabel (Exr. ii. 59; Neh. vii. 61). In the parallel list of 1 Esdr. v. this name, with the next, Addan, seems to be corrupted to CHARAATH-ALAR.

CHER'UB, CHER'UBIM (כדרבים, phar. קריבים, or, as mostly in Pentatouch, בררבים $\chi \epsilon \rho o i \beta$, $\chi \epsilon \rho o v \beta i \mu$ [Vat. Alex. - $\beta \epsilon i \mu$ or - $\beta \epsilon i \nu$]). The symbolical figure so called was a composite creature-form, which finds a parallel in the religious insignia of Assyria, Egypt, and Persia, c. g. the sphinx, the winged bulls and lions of Nicoveh. dec.

Fig. 1. The winged female-sphinz. (Wilkinson.)

a general prevalence which prevents the necessity of our regarding it as a mere adoption from the Egyptian ritual. In such forms (comp. the Chimaera of Greek and the Griffin of northeatare

Fig. 2. An Bgyptian winged animal (Wilkinson

holes) every imaginative people has sought to em- jordinate, file the supporters to a shield, and are body its notions either of the attributes of Divine repeated, as it were the distinctive bearings of disesence, or of the vast powers of nature which vine heraldry, - the mark, carved or wrought transcend that of man. In the various legends of Hercules the bull and the lion constantly appear as forms of hostile and evil power; and some of the Persian sculptures apparently represent evil genii under similar quasi-cherubic forms. The Hebrew idea seems to limit the number of the cherubim.

Fig. 8. Assyrian Gryphon. (Layard, il. 459.)

A pair (Ex. xxv. 18, &c.) were placed on the mercy seat of the ark; a pair of colossal size " overshad owed it in Solomon's Temple with the canopy of their contiguously extended wings. Ezekiel, i. 4-14, speaks of four,^b and similarly the apocalyptic (Rev. iv. 6) are four. So at the front or easy of Eden were posted "the cherubim," as though the whole of some recognized number. They utter no voice, though one is " heard from above them." nor have dealings with men save to awe and repel. A "man clothed in linen" is introduced as a medium of communication between them and the prophet, whereas for a similar office one of the seraphim personally officiates; and these latter also "cry one to another." The cherubim are placed beneath the actual presence of Jehovah, whose moving throne they appear to draw (Gen. iii. 24; Ez. i. 5, 25, 26, x. 1, 2, 6, 7: Is. vi. 2, 3, 6). The

expression, however, "the chariot (מִרְפָּבָה) of the cherubim " (1 Chr. xxviii. 18), does not imply wheels, but the whole apparatus of ark and cherubim is probably so called in reference to its being carried on staves, and the words "chariot" and "cherubim" are in apposition. So a sedan might

be called a "carriage," and בֶּרָבָב is used for the body of a litter. See, however, Dorjen, De Cherub. Sanct. (ap. Ugolini, vol. viii.), where the opposite opinion is ably supported. The glory symbolizing that presence which eye cannot see, rests or rides on them, or one of them, thence dismounts to the temple threshold, and then departs and mounts again (Ez. x. 4, 18; comp. ix. 3; Ps. xviii. 10). There is in them an entire absence of human sympathy, and even on the mercy-seat they probably appeared not merely as admiring and wondering (1 Pet. i. 12), but as guardians of the covenant and avengers of its breach. A single figure there would have suggested an idol, which two, especially when represented regarding something greater than themselves, could not do. They thus became sub-

CHERUB

everywhere on the house and furniture of God (Fr xxv. 20; 1 K. vi. 29, 35, vii. 29, 36).

Those on the ark were to be placed with wings stretched forth, one at each end of the mercy-seat. and to be made "of the mercy-seat," which Abarbenel (Spencer, De Leg. Heb. ritual. iii., Diss. v.) and others interpret of the same mass of gold with it, namely, wrought by hammering, not cast and then joined on. This seems doubtful, but from the

word TTTPC, the solidity of the metal may perhaps be inferred. They are called $\chi \epsilon \rho o \nu \beta \mu \delta o \xi \hat{\eta} s$ (Heb. ix. 5), as on them the glory, when visible. rested ; but, whether thus visibly symbolized or not, a perpetual presence of God is attributed to the Holy of Holies. They were anointed with the holy oil, like the ark itself, and the other sacred furniture. Their wings were to be stretched upwards, and their faces "towards each other and towards the mercy-seat." It is remarkable that with such precise directions as to their position, attitude, and material, nothing, save that they were winged, is said concerning their shape.

Fig. 4. Assyrian winged bull. (Layard, Nis. and Bat 276.)

Was this shape already familiar, or kept designedly mysterious? From the fact that cheruhiru were blazoned on the doors, walls, curtains, &c., of the house, and from the detailed description of shapes by Ezekiel, the latter notion might be thought absurd. But if the text of Ezekiel, and

J It is perhaps questionable whether the smaller merubim on the mercy-seat were there in Solomon's emple, as well as the colossal overshadowing ones. That they were on the ark when brought from Shiloh to the battle seems most likely; and it is hardly condetent with the reverential awe shown in the treatmust of the ark, even by the enemy, to suppose that De Symbol.). [NUMBER.]

they could have been lost in the course of its wanderings [see ARE OF COVENANT] ; still, the presence of the two pairs together seems hardly consistent and appropriate.

b The number four was one of those which were macred among the Jews, like seven, and forty (Bills.

CHERUL

the earvings, &c., of the temple had made them | and omniscience, not as representations of actua popular, Josephus could not possibly have said (Ant. viii. 8, § 8) τας δά χερουβείς ούδεις όποιαί τινες ήσαν είπειν ούδ' είκασαι δύναται. It is also remarkable that Es. i. speaks of them as "living

ereatures " (חיורת, (ŵa), under mere animal forms. Into which description in ch. x. 14, the remarkable expression, "the face of a cherub," is introduced, and the prophet concludes by a reference to his former vision, and an identification of those creatures with the cherubim - (v. 20) "I knew that they were cherubin." On the whole it seems likely that the word "cherub" meant not only the composite creature-form, of which the man, lion, ox, and eagle were the elements, but, further, some peculiar and mystical form, which Ezekiel, being a priest, would know and recognize as "the face of a CHERUB," Kar' deoxfu; but which was kept secret from all others; and such probably were those on the ark, which, when it was moved, was always covered [ARK OF COVENANT], though those on the hangings and panels might be of the popular device.^a What this peculiar cherubic form was is perhaps an impenetrable mystery. It was

probably believed popularly to be something of the bovine type (though in Ps. cvi. 20 the notion appears to be marked as degraded): so Spencer (De Leg. Hebr. rit. iii. Diss. 5, 4, 2 thinks that the ox was the forms procipua, and quotes Grotius on Ex. xxv. 18; Bochart, Hierozoic. p. 87 ed. 1690. Hence the "golden calf." The symbolism of the visions of Ezekiel is more complex than that of the earlier Scriptures, and he certainly means that each composite creature form had four faces so as to look four ways at once, was four-sided b and four-winged, so as to move with instant rapidity in every direction without turning, whereas the Mosaic idea was probably single-faced, c and with but one pair of wings. Ezekiel adds also the imagery of the wheels - s mechanical to the previous animal forms. This might typify inanimate

sature revolving in a fixed course, informed by the | construed, e. g. as the four evangelists, four archpiritual power of God. The additional symbol of angels, &c. being "full of eyes" is one of obvious meaning.

This mysterious form might well be the symbol of Him whom none could behold and live. For as symbols of Divine attributes, e. g. omnipotence

• The "cherubim, lions, and oxen," which ornamented certain utensils in the temple (1 K. vii. 29), are probably all to be viewed as cherubic insignia, the former of composite form, the two latter of simple.

^b Schoettgen, Hor. Hebr. ad Apoc. iv. 8, quotes Pirke Rab. E'iszer, "Ad quatuor pedes (throni) sunt gustuor animalia quorum unumquodque quatuor facies tot alas habet. Quando Deus loquitur ab oriente, une id fit inter duos cherubinos facie hominis ; quando a meridie, tune id fit inter duos cherubinos facie leo-14," &c.

· Bähr, Symbolik, vol. 1. pp. 318-14 (* Lose enture marks on this subject are valuable an, often probund), inclines to think that the precise form varied within certain limits; e. g. the cherubic figure might bave on ', two, or four faces, two or four feet, one or .we pair of wings, and might have the bovine or leoaims type as its baris; the imagery being modified t. with their wings. So wit the prominently intended attribute, and the high guardian of the law.

beings (Clem. Alex. Strom. v. p. 241), the cherubia should be regarded.d Philo indeed assigns a varied signification to the cherubim : in one place he makes them allegories of the beneficent and avenging energies of God; in another, of the two hemispheres of the then astronomical system, one of which supported the planets and the other the fixed stars; elsewhere, of power and goodness simply. They are symbolical in Gen. iii. 24, just as the serpent is a symbol in iii. 1-14, though functions and actions are attributed to each. When such symbolical forms have become conventional, the next step is to literalize them as concrete shapes of real beings. The Gua of Rev. iv. 6-8 are related both to the cherubim and to the seraphim of prophecy, combining the symbols of both. They are not stern and unsympathizing like the former, but invite the seer to "come and see;" nor like the latter do they cover their face (Is. vi. 2) from the presence of deity, or use their wings to speed on his errands, but, in a state of rest and praise, act as the choregi of the heavenly host. And here, too, symbolism ever aliding into realism, these have been diversely

Fig. 5. Assyrian sphinx. (Layard, ii. 840.,

Many etymological sources for the word ITT have been proposed. The two best worth noticing and between which it is difficult to choose are, (1)

est forms of creature-being expressing best the highest attributes of the Creator. Thus he thinks the human form might indicate spirituality (p. 840). (Comp. Grot. on Exod. xxv. 18, and Heb. ix. 5.) Some useful hints as to the connection of cherubic with other mythological forms may be found in Creuzer, Symbol. i. 441, 540.

d In Es. xxviii. 14, 16, the Tyrian king is addressed as the " anointing cherub that covereth." This seems a mistake in the A. V., arising from a confusion of

"2"""", which means " stretched out " (Vulg. cherus

extensus), from TWD, Aram. to extend, with some

word from TWD, to anoint. The notion is barrowed no doubt from the "extended " attitude of the cherubim of the sanctuary, " covering " the ark, &c., with their wings. So the king should have been the CHERUB

Fig. 6. A Grecian griffin.

he Syriac . . . , great, strong (Gesen. s. v. ; somp. Philo de Profugis, p. 465). The fact that all the symbols embody various forms of strength, the lion among wild, and the ox among tame beasts, the eagle among birds, the man as supreme over all

nature, is in favor of this; (2) the Syriac and,

to plough, i. e. to cut into; hence Arab. ()

sculpsit; and here a doubt occurs whether in the active or passive sense, "that which ploughs" ==

the ox (comp. 77,2, "ox," from same word in Arab. "to plough"), which brings us to the formas procepus of Spencer; or, that which is carved == an image. In favor of the latter is the fact that

217D is rabbinical for "image" generically (Simonis, Bouget, and Pagninus, Lexx. s. v.), perhaps as the only image known to the law, all others being deemed forbidden, but possibly also as containling the true germ of meaning.^a Besides these two wisdom or intelligence has been given by high authority as the true meaning of the name (Jerome em Is. vi. 2); so Philo de Vit. Mos. 668 – &s 8 &s"Extrapes expressions scal $\&sicrth\mu\eta$ work hf_1 (Opp. ii. 150 ed. Mang.); and Clem. Alex. Strom. v. c. 6, p. 240 [667 ed. Potter] – &theta&theta $\delta sochar two <math>\chi epough\mu$ $& bho \hat{v} a \ alforharis$ roakhfr.

Though the exact form of the cherubim is uncertain, they must have borne a general resemblance to the composite religious figures found upon the monuments of Egypt, Assyria, Babylonia, and Persia. The first two figures are winged creatures from the Egyptian monuments. The next three

are taken from Assyrian sculptures. No. 6 represents the griffin of Northern fable, as we see from the griffin found as an ornament in Scythian tombs, but drawn by Greciau artists. In the sacred boats or arks of the Egyptians, there are sometimes found

Fig. 7. A secred Egyptian best or ark, with two, figures perhaps resembling cherabim. (Wilkinson.)

two figures with extended wings, which remind us of the description of the cherubin "covering the mercy-seat with their wings, and their faces [looking] one to another" (Ex. xx. S)). H. H.

• Were the cherubim merely ideal symbols, having no objective personal reality, or were they actual beings represented under these ideal symbols? In support of the former view, it is alleged, (1) that we meet with these ideal forms only in poetic description, or prophetic vision, or symbolic worship

too between the names $\gamma_{\rho\bar{\nu}\pi^{-}}$ (with s afformative) and

בארוב; and possibly an affinity between אָשָּׁיד- and the Greek forms אַאָדאָש, אַאאָשָא, אָאאָשָא, אָאאָשָטאָ (כג Ger

man graden), all related to carving, as between and the Syriac and Arab. words signifying ararit, κιμρ sit, δ..., as shows. We have another form of the same root probably in scippic, the block or tablet on which the laws were regressed.

a The griffin of Northern fable watching the gold in the wilderness has (see above) been compared with the cherub, both as regards his composite form, and als function as the guardian of a treasure. The "watchful dragon" of the Hesperides seems perhaps a fabelous reflex of the same, where possibly the "serpent" (dpárew) may, by a change not uncommon in syth, have taken the place of the "cherubim." The bregon and the buil have their place also in the legend at the gol ion flowce. There is a very usar resemblance

a symbolic character; and (3) that they correspond pale horse, to the service assigned to each. with similar symbolic representations, of Egyptian, Amyrian, and Indian antiquity. So Hengstenberg (Die Bücher Moses, p. 157 ff., Keil (Archäol. § 19), Hävernick (Comm. über Esech. ; Vorles. über d. Theol. des A. T. pp. 79, 80), Neumann (Zeitschr. f. luth. Theol. 1853, i. 137 ff.), Lange (Bibelwerk, Gen. iii. 23, 24).

In favor of the other view, it is muintained, that the representation of these beings under symbolic forms, for purposes of poetical description, &c., does not exclude their objective reality; that similar representations among ancient heathen nations are only relics of early tradition, or of a primitive revelation; furthermore, that in the Scriptures (e. g. Ps. xviii. 10, compared with Ps. civ. 3, 4) angels and cherubim are placed in the same category, and hence the real existence of both must stand or fall together: and finally, that the mention of them in a narration of actual facts, in the third chapter of Genesis, is decisive of the question, if we hold to the historical reality of what is there related. So Kurtz (Gesch. des Alten Bundes, p. 63 ff.; art. Cherubim, in Herzog's Real-Encyklop.), Delitzsch (Genesis, 3te Aufl. p. 196), Hofmann (Schriftbeweis, i. 179 ff., 317 ff.), Nägelsbach (Der Gottrensch, i. 324).

On the reasons for the first view, it may be remarked, that the symbolic character of the forms certainly does not exclude an objective reality; but on the other hand, it may be said, that the symbol is sufficient in itself for any purpose that can fairly be claimed in the connection, and requires no corresponding personality.

In the reasons given for the other view, it is plainly a false inference from the comparison of Ps. xviii. 10 with Ps. civ. 3, 4, that angels and cherubim stand in the same category in the repre-sentations of the Scriptures. The personal existence of the former is attested by their frequent appearance on earth; while to the existence of the latter there is no similar attestation, unless it be found in the third chapter of Genesis. But the historical reality of the facts there narrated is not impaired by regarding the cherubim, spoken of in v. 24, as symbolic representations of the divine majesty and power, in whatever way these were manifested.

In the Hebrew text of this passage we have the lefinite form, "the cherubim and the flaming sword;" not "as though the whole of some recognized number" (as stated in the first paragraph of the preceding article) but denoting well known and familiar objects or conceptions.

One of the statements in the last paragraph but two of the preceding article is founded on a very njurious perversion of the Greek text in Rev. vi. 1. \$, 5, 7. It is one of the instances in which Erasmus bilowed the later corrupted copies of the Latin Vul-(translating from it into Greek) instead of the Freek manuscript which was before him, as show. by Prof. Delitzsch in his collation of it with Erasaus's printed Greek text (Handschriftl. Funde, 1861). Instead of the false reading of the current text, the true reading is "Come!" Instead of 'inviting the seer to . come and see,' " it is an auhoritative summons, calling forth the several per-

· Possibly referring to the village now Beit Iksa men Jerusalem and Nebi Samwil, and therefore in Section in

and the like; (2) that the forms are manifestly of | sonages, on the white, the red, the black, and the

CHES'ALON (בְּקַליֹן Dietr., strength, firmness; Fürst, fatness, fertility] Xaoxwy; [Alex. Xagalaw:] Cheslon), a place named as one of the landmarks on the west part of the nortu boundary of Judah, apparently situated on the shoulder (A. V. "side") of Mount Jearim (Josh. xv. 10). The name does not, however, reappear in the list of towns of Judah later in the same chapter. Mount Jearim, the "Mount of Forests," has not nece rily any connection with Kirjath Jearim, though the two were evidently, from their proximity in this statement of the boundary, not far apart. Chesalon was the next landmark to Beth-shemesh, and it is quite in accordance with this that Dr. Robinson has observed a modern village named Kesla, about six miles to the N. E. of 'Ain Shems, on the western mountains of Judah (Rob. ii. 30, note; iii. 154). Eusebius and Jerome, in the Onomasticon, mention a Chaslon, but they differ as to its situation, the former placing it in Benjamin,^a the latter in Judah: both agree that it was a very large vil-lage in the neighborhood of Jerusalem. The meaning of the name is thought by Professor Stanley. like Chesulloth, to have reference to its situation G. on the "loins" of the mountain.

CHE'SED (TWD: Xa(do; [Alex. Xao(ao:] Cused), fourth son of Nahor (Gen. xxii. 22). [CHALDEN, p. 408.]

CHE'SIL (CHE'SIL (CHE'SIL (つつ) [a fool or impious]: Basθήλ; Alex. Xareio; [Ald. Xerld:] Cesil), a town in the extreme south of Palestine, named with Hormah and Ziklag (Josh. xv. 30). The name does not occur again, but in the list of towns given out of Judah to Simeon, the name BETHUL occurs in place of it (xix. 4), as if the one were identical with, or a corruption of, the other. This is confirmed by the reading of 1 Chr. iv. 30, BETHUEL; by that of the LXX. as given above, and by the mention in 1 Sam. xxx. 27 of a Bethel among the cities of the extreme south. In this case we can only conclude that この COr was an early variation of

בתול G.

CHEST. By this word are translated in the

A. V. two distinct Hebrew terms: (1.) 778 or ארק, from ארדה, to gather: הואשדלs: mazophyl acium. This is invariably used for the Ark of the Covenant, and with two exceptions, for that only. It is instructive to be reminded that there is no

Egyptian cnest or box from Thebes. (Wilkinson.)

424 CHESTNUT-TREE

sonnection whatever between this word and that for the "ark" of Noah, and for the "ark" in which

Moses was hid among the flags (both T2D, Tebdb). The two exceptions alluded to are (a) the " cotfin " in which the bones of Joseph were carried from Egypt (Gen. l. 26; rendered in the Targ. Ps. Jon. by γλωσσόκομον - comp. John xii. 6 - in Hebrew letters: the reading of the whole passage is very singular); and (b) the "chest" in which Jehoiada the priest collected the alms for the repairs of the Temple (2 K. xii. 9, 10; 2 Chr. xxiv. 8-11). Of the former the following wood-cut is probably a

near representation. (2.) D'122, "chests," from

122, to hoard (Ez. xxvii. 24 only): A. V. "chests." G.

CHESTNUT-TREE (עַרְמוֹן), 'årmón adrasos, endry: planas). Mention is made of the 'armin in Gen. xxx. 37, as one of the trees from which Jacob took rods in which "he pilled white strakes," to set them before Laban's flocks when they came to drink (see on this subject SHEEP); in Ez. xxxi. 8, the 'dimin is spoken of as one of the glories of Assyria. The balance of authority is certainly in favor of the "plane-tree" being the tree denoted by 'armon, for so read the LXX. (in Gen. l. c.), the Vulg., the Chaldee, with the Syriac and Arabic versions (Celsius, Hierob. i. 513). The A. V., which follows the Rabbins, is certainly to be rejected, for the context of the passages where the word occurs indicates some tree which thrives best in low and moist situations, whereas the chestnut-tree is rather a tree which prefers dry and hilly ground. Dr. Kitto (Cyc. art. Armon), in illustration of Ez. (l. c.) says that "the planes of Assyria are of extraordinary size and heauty, in both respects exceeding even those of Palestine; it consists with our own experience, that one may travel far in Western Asia without meeting such trees, and so many together, as occur in the Chenar (plane) groves of Assyria and Media." The plane-trees of Persia are now and have been long held in the greatest veneration; with the Greeks also these trees were great favorites; Herodotus (vii. 31) tells a story of how Xerxes on his way to Sardis met with a plane-tree of exceeding beauty, to which he made an offering of golden ornaments. A fine specimen of the plane-tree was growing a few years ago (1844) at Vostitza, on the Gulf of Lepauto; it measured 46 feet in circumference, acsording to the Rev. S. Clark of Battersea, who has given an interesting account of it in John's Forest Trees of Britain (ii. 203). The plane-trees of Palswine in ancient days were probably more numerous than they are now; though modern travellers occasionally refer to them. Belon (Obs. ii. 105) speaks of very high plane-trees near Antioch; De la Roque (Voyag. de Syrie et du M. Liban, p. 197) mentions entire forests of planes which line the margin of the Orontes; and in another place (p. 76) he speaks of having passed the night under planes of great beauty in a valley near Lebanon.

In Ecclus. xxiv. 14, Wisdom is compared to "a plane-tree by the water." W. H.

CHESUL'LOTH (with the definite article, דבְּסָלוֹר : Xagaλáð: Casaloth), one of the towns of Issachar, meaning in Hebrew "the loins," and therefore, perhaps, deriving its name from its are the Arabic Bent, sons, in the sense of decreend

CHILDREN

Joshua, p. 338). From its position in the lists it appears to be between Jezreel and Shunem (So-Lim), and, therefore, not far enough north to be the Ikwil mentioned by Robinson (ii. 332) or the place noted by Eusebius and Jerome under Ac chaseluth, 'Aχεσέλωθ, in the Onomasticon. G.

CHETTI'IM or CHET'TIIM (Xerreiela Alex. [Sin. Ald.] Xerrielu: (cthim), 1 Macc. i 1. [CHITTIM.] W. A. W. 1. [Снгттім.]

CHE'ZIB (I'D [lying, Ges.; lying break,

Fürst]; Sam. Cod. 7272; Sam. Vers. 7212. XaoBi: Vulg. translating quo nato parere silve cessaril, and comp. a similar translation by Aquila, in Jer. Qu. Hebr.), a name which occurs but once (Gen. xxxviii. 5). Judah was at Chezib when the Canaanitess Bath shua bore his third son Shelah. The other places named in this remarkable narrative are all in the low country of Judah, and therefore in the absence of any specification of the position of Chezib, we may adopt the opinion of the interpreters, ancient and modern, who identify it

with ACHZIR (コパンド). It is also probably identical with CHOZEBA. G.

CHIDON (ליד"): LXX. Vat. omita: Alex. Xeidow: Chidon), the name which in 1 Chr. ziii. 9 is given to the threshing-floor at which the accident to the ark, on its transport from Kirjath-jearim to Jerusalem, took place, and the death of Uzzah. In the parallel account in 2 Sam. vi. the name is given as Nachon. The word Chidon signifies a "javelin; " Nachon, " prepared " or " firm." Whether there were really two distinct names for the same spot, or whether the one is simply a corruption or alteration of the other is quite uncertain (see Ges. Thes. 683; Simonis, Onom. 339, 340). Josephus (Ant. vii. 4, § 2) has Xeidov. The Jewish tradition (Jerome, Quast. Heb. on 1 Chr. xi. 9) was that Chidon acquired its name from being the spot on which Joshua stood when he stretched out the weapon of that name (A. V. "spear") towards Ai (Josh. viii. 18). But this is irreconcilable with all our ideas of the topography of the locality. G.

* Words so obscure justify other conjectures. It is more satisfactory to regard the terms as commemorative of events rather than names of the own-

ers: (1) the threshing-floor of smiting (from 72, to smite), because Jehovah smote Uzzah there; and (2) threshing-floor of the blow or (figurative) jave lin with which Uzzah was there smittten. PEREZ-UZZAII (2 Sam. vi. 8) seems to have been the personal designation under which the fatal spot was known to subsequent times. See Movers, Krit. Untersuch. üb. die bibl. Chronik, p. 166; Keil, Books of Samuel, p. 332 (Clark's Library); and Wordsworth, Holy Bible with Notes, ii. 82. 11.

CHILDREN (DY) [sons]: Tékva, maidía: liberi, filii. From the root 122, to build, are derived both 7고, son, as in Ben-hanan, &c., and 기고 daughter, as in Bath-sheba. The Chald. also 72. son, occurs in O. T., and oppears in N. T. in such words as Barnabas, but which in plur. 72, Ear

vi. 16, resembles more the Hebrew. Cognate words stuation on the slope of some mountain (Josh. xix. ants, and Benât, daughters, Ges. pp. 218, 398 18. See the guotation from Jarchi in Keil's Shaw, Travels, Pr. p. 8). The blessing of eff

spring, bat especially, and sometimes exclusively, of the male sex, is highly valued among all Eastern nations, while the absence is regarded as one of the severest punishments (Her i. 136; Strab. xv. 733: Gen. xvi. 2, xxix. 31, xxx. 1, 14; Deut. vii. 14; 1 Sam. i. 6, ii. 5, iv. 20; 2 Sam. vi. 23, xviii. 18; 2 K. iv. 14; Is. xlvii. 9; Jer. xx. 15; Ilos. ix. 14; Esth. v. 11; Ps. exxvii. 3, 5; Eccl. vi. 3; Drusius, Prov. Ben-Sirve, ap. Crit. Sacr. viii. 1887; Lane, Mod. Egypt. i. 208, 240; Mrs. Poole, Englishe. in Egypt, iii. 163; Niebuhr, Descr. de l'Arab. 67: Chardin, Voyage, vii. 446; Russell, Nubia, 343). Childbirth is in the East usually, but not always, attended with little difficulty, and accomplished with little or no assistance (Gen. xxxv. 17, xxxvii. 98, Ex. i. 19; 1 Sam. iv. 19, 20; Burckhardt, Notes on Bedouins, i. 96; Harmer, Obs. iv. 425; Lady M. W. Montagu, Letters, ii. 217, 219, 222). As soon as the child was born, and the umbilical cord cut, it was washed in a bath, rubbed with salt, and wrapped in swaddling clothes. Arab mothers sometimes rub their children with earth or sand (Ez. xvi. 4; Job xxxviii. 9; Luke ii. 7; Burckhardt, l. c.). On the 8th day the rite of circumcision in the case of a boy, was performed, and a name given, sometimes, but not usually, the same as that of the Sther, and generally conveying some special meaning. Among Mohammedans, circumcision is most commonly delayed till the 5th, 6th, or even the 14th year (Gen. xxi. 4, xxix. 32, 35, xxx. 6, 24; Lev. xii. 3; Is. vii. 14, viii. 3; Luke i. 59, ii. 21, and Lightfoot, ad loc.; Spencer, de Legg. Hebr. v. 62; Strab. xvf. 824; Her. ii. 36, 104; Burckhardt, ibid. i. 96; Lane, Mod. Egypt. i. 87; Mrs. Poole, Englishw. in Egypt, iii. 158; Niebuhr, Descr. p. 70). [CIRCUMCISION.] After the birth of a male child, the mother was considered unclean for 7 + 33 days; if the child were a female, for double that period 14 + 66 days. At the end of the time she was to make an offering of purification of a lamb as a burnt-offering, and a pigeon or turtledove as a sin-offering, or in case of poverty, two doves or pigeons, one as a burnt-offering, the other as a sin offering (Lev. xii. 1-8; Luke ii. 22). The period of nursing appears to have been sometimes prolonged to 3 years (Is. xlix. 15; 2 Macc. vii. 27; comp. Livingstone, Travels, c. vi. p. 126; but Burckhardt leads to a different conclusion). The Mohammedan law enjoins mothers to suckle their shildren for 2 full years if possible (Lane, Mod. Egypt. i. 83; Mrs. Poole, Englished. in Egypt, iii. 161). Nurses were employed in cases of necessity (Ex. il. 9; Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4 9 K. xi. 2; 2 Chr. xxii. 11). The time of weaning was an occasion of rejoicing (Gen. xxi. 8). Arab children wear little or no clothing for 4 or 5 years; the young of both sexes are usually carried by the mothers on the hip or the shoulder, a custom to which allusion is made by Isaiah (Is. xlix. 22, lxvi. 12; Lane, Mod. Egypt. i. 83). Both boys and girls in their early years, boys probably till their 5th year, were under the care of the women (Prov. xxxi. 1; Herod. i. 136; Strab. xv. p. 733; Niebuhr, Descr. p. 24). Afterwards the boys were taken by the father under his charge. Those in wealthy

Samilies had tutors or governors (2772, masda-

yeryoi) who were sometimes cunuchs (Num. xi. 12; tuted for other original names, after their death, in K. x. 1, 5; Is. xlix. 23; Gal. iii. 24; Esth. ii. the family traditions. Considering how readily the orientals change the names of persons both living and dead, the latter supposition is by no means imsents till marriag, or, among the poorer classes, possibl. See Bertheau (Richter s. Ruda, p. 239:

were employed in household work (Lev. xxi. 9; Num. xii. 14; 1 Sam. ix. 11; Prov. xxxi. 19, 93; Ecclus. vii. 26, xlii. 9; 2 Macc. iii. 19). The example, however, and authority of the mother were carefully upheld to children of both sexes (Deut xxi. 20; Prov. x. 1, xv. 20; 1 K. ii. 19).

The first-born male children were regarded as devoted to God, and were to be redeemed by an offering (Ex. xiii. 13; Num. xviii. 15; Luke ii. 22). Children devoted by special vow, as Samuel was, appear to have been brought up from very early years in a school or place of education near the tabernacle or temple (1 Sam. i. 24, 28). [EDUCA-TION.]

The authority of parents, especially the father, over children was very great, as was also the rev erence enjoined by the law to be paid to parents. The disobedient child, the striker or reviler of a parent, was liable to capital punishment, though not at the independent will of the parent. Children were liable to be taken as slaves in case of non-payment of debt, and were expected to perform menial offices for them, such as washing the feet, and to maintain them in poverty and old age. How this last obligation was evaded, see CORBAN. The like obedience is enjoined by the Gospel (Gen. xxxviii. 24; Lev. xxi. 9; Num. xii. 14; Deut. xxiv. 16; 1 K. ii. 19; 2 K. xiv. 6, iv. 1; Is. l. 1; Neh. v. 5; Job xxiv. 9; Prov. x. 1, xv. 20, xxix. 3; Drusius, Quest. Hebr. ii. 63, ap. Crit. Sacr. viii. 1547; Col. iii. 20; Eph. vi. 1; 1 Tim. i. 9; comp. Virg. En. vi. 609; and Servius, ad loc.; Aristoph. Ran. 146; Plato, Phado, 144; de Legg. ix.).

The legal age was 12, or even earlier in the case of a female, and 13 for a male (Maimon. de Pros. c. v.; Grotius and Calmet on John ix. 21).

The inheritance was divided equally between all the sons except the eldest, who received a double portion (Deut. xxi. 17; Gen. xxv. 31, xlix. 3; 1 Chr. v. 1, 2; Judg. xi. 2, 7). Daughters had by right no portion in the inheritance; but if a man had no son, his inheritance passed to his daughters, but they were forbidden to marry out of their father's tribe (Num. xxvii. 1, 8, xxxvi. 2, 8).

The term some was applied also to the disciples and followers of the teachers of the various sects which arose after the Captivity [EDUCATION; SCRIBE3]. (Lightfoot, *Hor. Hebr.* on John xiii. 33, Luke xi. 45, John xvi. [xv.?] 16.) [Comp. Matt. xii. 27; Luke xi. 19. See also 1 Cor. iv. 14, 15, 17; 1 Tim. i. 2; 2 Tim. i. 2; Philem. 10; 3 John 4. A.] H. W. F.

CHIL'EAB. [ABIGAIL; DANIEL.]

CHILION [properly Chilyon] (ζήτ). Xελαιών; [Vat. Ruth i. 2, Kελ.;] Alex. Xελεων; [Xaιλεων:] Chelion), the son of Elimelech and Naomi, and husband of Orpah (Ruth i. 2-5, iv. 6). He is described as "an Ephrathite (? Fohraimite) of Bethlehem-judah."

• The etymology usually assigned for the names of the brothers (Ruth i. 2) is $\overrightarrow{}$ for Chilion, sickly, and $\overrightarrow{}$ for Mahlon, pining; either given to them at first from prognostics of their early fate, which, as they died young, were fulfilled, or substituted for other original names, after their death, in the family traditions. Considering how readily the orientals change the names of persons both living and dead, the latter supposition is by no means im-

as Cassel (Richter u. Ruth, p. 205) refers Chilion to , i. e. the former, orna ment, and the latter, joy : so that the names could have been given to them at their birth as terms of parental fondness. Mr. Wright (Ruth in Hebrew und Chaldee, p. 2) conjectures that the children were so named (sickness; destruction) on account of the sad condition of the land at the time. That the land was specially afflicted at the time they were born we do not know. The famine which drove the family to Moab was later. The names in whatever way explained, afford but a slight foothold for assailing the historical claims of the book. н

CHIL/MAD (לְכֵּד: Xapudu; [Ald. Xaxμdr; Comp. Χαλμdβ:] (helmad), a place or country mentioned in conjunction with Sheba and Asshur (Ez. xxvii. 23). The only name bearing any similarity to it is Charmande, a town near the Euphrates between the Mascas and the Babylonian frontier (Xen. Anab. i. 5, § 10). As however no other writer notices this place, it is highly improbable that it was of sufficient importance to rank with Sheha and Asshur. Hitzig (Comment. on Es. l. c.) proposes to alter the punctuation to דלמר, with the sense, "Asshur was as thy pupil

in commerce. W. L. B. * Rawlinson identifies Chilmad with Kalsoadha. [CHALDEA, § 4.] Α.

CHIM'HAM (こつつう [pining, longing] but see below: Xanadu: Nex. Xaraar; [Comp. Xi-nadr, 'Axina fr; LXX. in Jer. sorrupt;] Joseph. Aximaros: Chuman), a follower, and probably a son (Joseph. Aut. vii. 11, § 4; and comp. 1 K. ii. 7) of Barzillai the Gileadite, who returned from beyoud Jordan with David (2 Sam. xix. 37, 38, 40). David appears to have bestowed on him a possession at Bethlehem, on which, in later times, an inn

or Khan (ברהר.) was standing, well known as the starting-point for travellers from Jerusalem to Egypt (Jer. xli. 17).ª There is some uncertainty about the name, possibly from its not being that of a Hebrew. In 2 Sam. xix. 40, it is in the He-

brew text Chimhan, 7007, and in the Chetib of

G.

Jer. xli. 17, Chemôham, במרחם.

CHIN'NERETH [Heb. Cinne'reth or Kinne'reth] (accurately [?] Cinnareth, [?] [? in

pause ????]: Kerepée; Alex. Xerepoe; [Ald. **Xerepé** θ :] Cenereth), a fortified city in the tribe of Naphtali (Josh. xix. 35 only), of which no trace is found in later writers, and no remains by travellers. Whether it gave its name to, or received it from, the lake, which was possibly adjacent, is quite uncertain. By St. Jerome Chinnereth was identified with the later Tiberias. This may have been from some tradition then existing; the only corrobwation which we can find for it is the mention in . oshua of Hammath as near it, which was possibly the Hümmâm or Emmaus, near the shore of the take a little south of Tiberias. This is Jenied by

a . We see from Jer. xli. 17 that this Khan bore "himham's name for at least 4 centuries, and (as the ges of the lisst are so unchanging) may have been When (nardhune which almost 6 ~ utur'ye later Invish Church, 11. 201).

But the derivation is uncertain. So good a scholar | Reland (161), on the ground that Capernaum is said by St. Matt. (iv. 13) to have been on the vary borders of Zebulun and Naphtali, and that Zebu lun was to the south of Naphtali. But St. Matthew's expression will hardly bear this strict interpretation. The town, or the lake, appears to have given its name (slightly altered) to a district - "all CINNEROTH " (1 K. xv. 20). G.

* The name (Josh. xix. 35) is spelt "Cinnereth" in the A. V. ed. 1611, and other sarly editions. According to Fürst, the city "in ater times was

called محاجة Genuar (Megila 6ª). . . . At the time of Farchi (at the beginning of the 14th century) it was still in existence, lying, without doubt, one hour northwest of Tabariyya [Tiberias], where the ruins of Gansur are still found at the present day" (Heb. Lex. s. v., Davidson's transl.). A.

ים כנרה CHIN'NERETH, SEA OF ή θάλασσα Χενερέθ [etc.:] mare Cenereth. Num. xxxiv. 11; Josh. xiii. 27), the inland sea which is most familiarly known to us as the "lake of Gennesaret." This is evident from the mode in which it is mentioned in various passages in the Pentateuch and Joshua - as being at the end of Jordan opposite to the "Sea of the Arabah," i. e. the Dead Sea; as having the Arahah or Ghor below it, &c. (Deut. iii. 17; Josh. xi. 2, xii. 8). In the two former of these passages the word "sea" is omitted; in the two latter it is in a plural form --

Chinneroth " (acc. Cinnaroth, , , , , and

, Cinnroth, [Vulg. Ceneroth]). The word is by some derived from Cinnoor (nevrópa, cithara, a "harp"), as if in allusion to the oval shape of the lake. But this, to say the least, is doubtful. It seems more likely that Cinnereth was an ancient Canaanite name existing long prior to the Israelite conquest, and, like other names, adopted by the Is-raelites into their language. The subsequent name " Gennesar " was derived from " Cinnereth " by a change of letters of a kind frequent enough in the East. [GENNESARET.] G.

CHIN'NEROTH (""", """; Ker epúθ, Xerepéθ: Alex. Xerepeθθι, Xerrepeθ: Ceneroth), Josh. xi. 2, xii. 3. [CHINNERETH.] W. A. W.

* In A. V. ed. 1611, and other early editions the word is spelt "Cinneroth," as in 1 K. xv. 90 See CINNEROTH. A.

CHI'OS (Xlos: [Chius]). The position of this island in reference to the neighboring islands and coasts could hardly be better described than in the detailed account of St. Paul's return voyage from Troas to ('a sarea (Acts xx., xxi.). Having come from Assos to Mitvlene in Lesbos (xx. 14), he arrived the next day over against Chios (v. 15), the next day at Samos and tarried at Trogyllium (ib.); and the following day at Miletus (ib.); then ce he went by Cos and Rhodes to Patara (xxi. 1). [MITYLENE; SAMOS.] With this it is worth while to compare the account of Herod's voyage to join Marcus Agrippa in the Black Sea. We are told (Joseph. Ant. xvi. 2, § 2) that after passing by Rhodes and Cos, he was detained some time by north winds at Chios, and sailed on to Mitylens,

"furnished shelter for two travellers with their infina child when ' there was no room in the inn,' and when they too from that spot fied into Fgypt" (Stanley

Digitized by Google

wight the winds became more favorause. It appears | advance to the south to meet the king of the south: hat during this stay at Chios Herod gave very libstal sums towards the restoration of some public works which had suffered in the Mithridatic war. This island does not appear to have any other asso-rink), and Perseus as $K_{1716}\omega r \beta a\sigma \lambda \epsilon us$ [Ceteorum ciation with the Jews; nor is it specially mentioned [rez] (1 Macc- viii. 5; A. V. CITINS). Josephus in connection with the first spread of Christianity by the Apostles. When St. Paul was there on the occasion referred to, he did not land, but only passed the night at anchor. At that time Chios enjoyed the privilege of freedom (Plin. v. 38), and it is not certain that it ever was politically a part of the province of Asia, though it is separated from the mainland only by a strait of 5 miles. Its length is about 32 miles, and in breadth it varies from 8 to 18. Its outline is mountainous and bold; and it has always been celebrated for its beauty and fruitfulness. In recent times it has been too well known, under its modern name of Scio, for the dreadful sufferings of its inhabitants in the Greek war of independence. Chius is described by the older travellers, Thevenot, Tourne fort, and Chandler. J. S. H.

CHISLEU. [MONTHS.]

CHIS'LON (דְבָרֹן [hope, confidence]: Xao Adv: Chaselon), father of Elidad, the prince of the tribe of Benjamin, chosen to assist in the division of the land of Canaan among the tribes (Num. xxxiv. 21).

כל ה הַבֹר (CHIS LOTH - TA BOR loins of Tabor: Xasehwbald; Alex. Xasahwb βαθωρ; [Ald. 'Αχασαλώθ Θαβώρ; Comp. Χασελhabbaßap:] Ceseleththabor), a place to the bor der $(\neg \downarrow \downarrow \downarrow)$ of which reached the border of Zebukun (Josh. xix. 12). It may be the village of Ikail which is now standing about two miles and a half to the west of Mount Tabor. Josephus names a village Xaloth as in the great plain, i. c. of Esdraeion, and as one of the landmarks of lower Galilee, (B. J. iii. 3, § 1; and see Vita, § 44), but it is impossible to say if this was identical with Chisloth-Takor or with Chesulloth. [See TABOR.] G.

פתיים פתי⊂ (כתי⊂) CHITTIM. KITTIM XATION, KITION, KATICIA, XETTICIA, [etc. :] Cetthim, Cethim), a family or race descended from Javan (Gen. x. 4; 1 Chr. i. 7; A. V. KITTIM), closely related to the Dodanim, and remotely (as we may conclude from the absence of the conjunction before it) to the other descendants of Javan. Chittim is frequently noticed in Scripture: Balaam predicts that a fleet should thence proceed for the destruc-

tion of Assyria (Num. xxiv. 94, ביה המים; " enient in trieribus de Italia, Vulg.): in Is. xxiii. 1, 12, it appears as the resort of the fleets of Tyre: in Jer. ii. 10, the "isles of Chittim" ("", i. e. maritime districts) are to the far west, as Kedar to the east of Palestine: the Tyrians procured thence the cedar or box-wood, which they inlaid with ivory

E'T'N, A. V. "the company of the Asnurites," but rather [ivory] the daughter of cedae i. e. intim " (nai heovor Popaior: Trieres of Romani)

at a later period we find Alexander the Great described as coming in this yhs [Rom. Xerteielu, Alex. Sin.] Xettieu (1 Macc. i. 1; A. V. CHETconsidered Cyprus as the original seat of the Chittim, adducing as evidence the name of its principal town, Citium (Xeθιμos δè Xéθιμα την νησον έσχεν Κύπρος αύτη νῦν καλείται, Ant. i. 6, § 1). Citium was without doubt a Phœnician town, and the name, as it appears in Phœnician inscriptions, exactly accords with the Hebrew (Gesen. Thes. 726). From the town the name extended to the whole island of Cyprus, which was occupied by Phœnician colonies, and remained under Tyre certainly until about B. C. 720 (Joseph. Ant. ix. 14, § 2). With the decay of the Phœnician power (circ. B. C. 600) the Greeks began to found flourishing settlements on its coasts, as they had also done in Crete, Rhodes, and the islands of the Ægaan Sea. The name Chittim, which in the first instance had applied to

Phoenicians only (for L'AI = L'AT, Hittites, a branch of the Canaanitish race), passed over to the islands which they had occupied, and thence to the people who succeeded the Phœnicians in the occupation of them (an' airns, sc. Kumpov, vnool τε πασαι, και τα πλείω των παρα θάλασσαν, Xe θιμ ύπο Έβραίων δνομάζεται, Joseph. Ant. i. 6, § 1). Thus in Macc., Chittim evidently = Macodonia, and was perhaps more especially applied to that country from the apparent similarity of the name in the form Makeria, which they supposed = Ma and Kérioi, the kind of the Cetii. The use of the term was extended yet further so as to embrace Italy according to the LXX. (Dan.), and the Vulgate (Num. and Dan.), to which we may add the rendering of the Chaldee Targum, which gives

ון (Italia) in I Chr. i. 7, and אפוליא אפוליא (Apulia) in Ez. xxvii. 6. The "ships of Chittim" in Dan. have been explained as Macedonian, which Popillius Leenas may have seized at Delos after the defeat of Perseus, and taken on his expedition to Egypt against Antiochus; but the assumption on which this interpretation rests is not borne out by the narrative (Liv. xliv. 29, xlv. 10), nor does there appear any difficulty in extending the term to Italy, as one of the lands in the far west with which the Hebrews were but little acquainted. In an ethnological point of view, Chittim, associated as the name is with Javan and Elishah, must be regarded as applying, not to the original Phœnician settlers of Cyprus, but to the race which succeeded them; namely, the Carians, who were widely dispersed over the Mediterranean coasts, and were settled in the Cyclades (Thucyd. i. 8), Crete (Herod. i. 171) and in the islands called Macarise Insulse, perhaps as being the residence of the Carians. From these islands they were displaced by the Dorians and Ionians (Herod. L c.), and emigrated to the main land, where they occupied the district named after them. for the decks of their vessels (Es. xxvii. 6, "The Carians were connected with the Leleges, and | must be considered as related to the Pelaegic family, though quite distinct from the Hellenic brane (Knobe, Völkertafel, p. 95 ff.). W. L. B.

CHI'UN (77.). [REMPHAN.]

CHLO'E (XAón) [tender shoot or herbage]. a Bengstenberg (Hist. of Bal.) explains this expres- woman mentioned in 1 Cor. i. 11, some of whose m as = from the side of Cyprus, i. e. from that isi- 'ousehold [$\delta \pi \delta \tau \bar{w} \pi X \lambda \delta \eta s$, comp. et as a replesvous.

supposed by Theophylact and others to have been an inhabitant of Corinth; by Estins, some Christian woman known to the Corinthians elsewhere; w Michaelis and Meyer, an Ephesian, having friends at ('orinth. It is impossible to decide. [See AR-ISTOBULUS, Amer. ed.] H. A

CHO'BA (XwBá; [Sin. XaBa]: Vulg. omits), a place mentioned in Jud. iv. 4, apparently situated in the central part of Palestine. It is probably the same place as

CHO'BAI [2 syl.] $(X\omega\beta at;$ [Sin. $X\omega\beta a:$ Vulg. omits]), which occurs in Jud. xv. 4, 5; in the latter verse the Greek is $X \omega \beta d$. The name suggests Hobah (T, which is the reading of the Syriac), especially in connection with the mention of Damascus in v. 5, if the distance from the probable site of BETHULIA were not too great.

* CHCENIX (xoirit), Rev. vi. 6, marg. See WEIGHTS AND MEASURES, II. § 2, near the end.

CHOR-A'SHAN () I furnace of smoke]: Bypraßee; Alex. Buparas: in lucu Asan), one of the places in which "David and his men were wont to haunt," and to his friends in which he sent presents of the plunder taken from the Amalekites (1 Sam. xxx. 30). The towns named in this catalogue are all south of Hebron, and Chorashan may, therefore, be identical with ASHAN of This is, however, quite uncertain, and Simeon. the name has not been discovered.

CHORA'ZIN (Xopaçiv [text. rec.], Xopaçeiv [Tisch., Treg.], Xopa (atv [D]; Coroznin), one of the cities in which our Lord's mighty works were done, but named only in His denunciation (Matt. xi. 21; Luke x. 13). It was known to St. Jerome, who describes it (Comm. in Esai. ix. 1) as on the shore of the lake, two miles from Capernaum. St. Willibald (about A. D. 750) visited the various places along the lake in the following order - Tibeias, Magdalum, Capernaum, Bethsaida, Chorazin. Dr. Robinson's conclusion is that Khan Minuch being Capernaum, et-Tabighah is Bethsaida, and Tell Hum Chorazin, but the question is enveloped in great obscurity. The origin of the name is also very uncertain. Origen writes the name as Xúpa Ziv, i. e. the district of Zin; but this appears to be only conjecture, and has no support from MSS. A place of this name is mentioned in the Talmud (see Reland, p. 722) as famous for wheat, which is still grown in large quantities in this neighborhood.

* Dr. Thomson (Land and Book, ii. 8) found a heap of shapeless ruins about 2 miles north of Tell Hûm, known among the natives as Chorazy "The name is nearly the Arabic for Chorazin, and the situation just where we might expect to find Cho-Discoveries more recently made have mzin.'' strengthened this presumption from the name and position of Chorazy. Mr. Grove, speaking of the excavations by Messrs. Wilson and Anderson, says: "The ruins of Chorazin at Kernzeh" (so he writes the word), "turn out to be far more important than was previously suspected; they cover • much larger extent of ground than Tell Hum, and many of the private houses are almost perfect, with the exception of the roofs; the openings for doors and windows remaining in some cases. All the buildings, including a synagogue or church [?], are of hesalt, and it is not till one is right in suong them that one sees clearly what they are; commonly applied to our Lord in the Epistics

ware divisions in the Corinthian church. She is | 50 or 100 yards off they look nothing more than the rough heaps of basaltic stones so common in this country " (Athenanum, Feb. 24, 1866, p. 278). H.

 CHOSAME/US. [See Simon Chusa M.EUS.]

CHOZE'BA (NDT [lying, false]: Xw(nBd [Vat $\Sigma_{\omega\chi\eta\theta}$:] viri mendacii). The "men of ('hozeba'' are named (1 Chr. iv. 22) amongst the descendants of Shelah the son of Judah. 111 name does not reappear, but it is sufficiently like CILEZIB (and especially the reading of the Samaritan Codex of that name) to suggest that the two refer to the same place, that, namely, elsewhere called ACHZIB, at which place Shelah was born. (The Vulgate version of this passage is worth notice). G.

CHRIST. [JESUS.]

CHRISTIAN (Xourtavos : Christianus). The disciples, we are told (Acts xi. 26), were first called Christians at Antioch on the Orontes, somewhere about A. D. 43. The name, and the place where it was conferred, are both significant. It in clear that the appellation "Christian" was one which, though eagerly adopted and gloried in by the early followers of Christ, could not have been imposed by themselves. They were known to each other as brethren of one family, as disciples of the same Master, as believers in the same faith, and as distinguished by the same endeavors after heliness and consecration of life; and so were called brethren (Acts xv. 1, 23; 1 Cor. vii. 12), disciples (Acts ix. 26, xi. 29), believers (Acts v. 14), s rints (liom. viii. 27, xv. 25). But the outer world could know nothing of the true force and significance of these terms, which were in a manner esoteric; it was necessary therefore that the followers of the new religion should have some distinctive title. To the contemptuous Jew they were Nazarenes and Galileans, names which carried with them the infamy and turbulence of the places whence they sprung, and from whence nothing good and no prophet might come. The Jews could add nothing to the scorn which these names expressed, and had they endeavored to do so they would not have defiled the glory of their Messiah by applying his title to those whom they could not but regard as the followers of a pretender. The name "('hristian," then, which, in the only other cases where it ap pears in the N. T. (Acts xxvi. 28; 1 Pet. iv. 16: comp. Tac. Ann. xv. 44), is used contemptuously, could not have been applied by the early disciples to themselves, nor could it have come to them from their own nation the Jews; it must, therefore, have been imposed upon them by the Gentile world, and no place could have so appropriately given rise to it as Antioch, where the first Church was planted among the heathen. It was manifest by the preaching of the new teachers that they were distinct from the Jews, so distinct as to be remarked by the heathen themselves; and as no name was so frequently in their mouths as that of ('hrist." the Messiah, the Auointed, the people of Antioch, ever on the alert for a gibe or mocking taunt, and taking Christ to be a proper name and not a title of honor, called his followers Xpioriavel, Christians the partisans of Christ, just as in the early struggles for the Empire we meet with the Casariani Pompeiani, and Octaviani. The Latin form of the

a "Christ," and not "Jesus," is the term mos

same is what would be expected, for Antioch had long been a Roman city. Its inhabitants were relebrated for their wit and a propensity for conferring nicknames (Procop. Pers. ii. 8, p. 105). The Emperor Julian himself was not secure from their jests (Amm. Marc. xxii. 14). Apollonius of Tyana was driven from the city by the insults of the inhabitants (Philostr. Vit. Apoll. iii. 16). Their wit however, was often harmless enough (Lucian, De Saltat. 76), and there is no reason to suppose that the name "Christian" of itself was intended as a term of scurrility or abuse, though it would naturally be used with contempt.

Suidas (s. v. Xριστιανοί) says the name was given in the reign of Claudius, when Peter appointed Evodius bishop of Antioch, and they who were formerly called Nazarenes and Galileans had their name changed to Christians. According to Malalas (*Chronog.* x.) it was changed by Evodius himself, and William of Tyre (iv. 9) has a story that a synod was held at Antioch for the purpose. Ignatius, or the author of the Epistle to the Magnesians (c. x.), regards the prophecy of Isaiah (lxii. 2, 12) as first fulfilled in Syria, when Peter and Paul founded the Church at Antioch. But reasons have already been given why the name did not originate within the Church.

Another form of the name is $\chi_{\rho\eta\sigma\tau\mu\nu\sigma\ell}$, arising from a false etymology (Lact. iv. 7; Tertullian, Apol. c. 3; Suet. Claud. 25), by which it was derived from $\chi_{\rho\eta\sigma\tau\delta s}$. W. A. W.

CHRONICLES, First and Second Books of

(in Heb. בְרָרֶי הַיָּמִים: verba dierum, as Jerome translates it, and sermones dierum, as Hilar. Pictav. in Wolf, but rather acta dierum ; journals, or dia ries, i. e. the record of the daily occurrences), the name originally given to the record made by the appointed historiographers in the kingdoms of Israel and Judah. In the LXX, these books are called Παραλειπομένων πρώτον and δεύτερον, which is understood, after Jerome's explanation, as meaning that they are supplementary to the books of Kings. The Vulgate retains both the Hebrew and Greek name in Latin characters, Dabre jamim, or hajumin, and Paralipomenon. Jerome tells us (ad Domnion. et Rogatian.) that in his time they formed only one book in the Hebrew MSS., but had been divided by the Christian churches using the LXX. for convenience, on account of their length. In his Ep. to Paulinus, he thus further explains the name Paralipomenon, and eulogizes the book. " Paralipomenon liber, id est Instrum. Vet. spitome, tantus ac talis est, ut abeque illo si quis scientiam Scripturarum sibi voluerit arrogare, seipsum irrideat. Per singula quippe nomina juncturaque verborum, et prætermissæ in Regum libris tanguntur historise, et innumerabiles explicantur Evangelii questiones." The name Chronica, or Chronicorum liber, which is given in some copies of the Vulgate, and from whence we derive our English name of "Chronicles," seems to be taken from Jerome's saying in his Prologus galeatus, "Dibre hajamin, i. e. verba dierum: quod signifisantius Chronicon totius divina historia possumus

his having translated the Chronica of Eusebius into Latin. Later Latin writers have given them the name of Ephemeridum libri. The constant tradition of the Jews, in which they have been followed by the great mass of Christian commentators, is that these books were for the most part compiled by Ezra; and the one genealogy, that of Zerubbabel, which comes down to a later time,^b is no objection to this statement, without recurring to the strange notion broached by the old commentators, and even sanctioned by Dr. Davidson (in Kitto's Cycl. of Bibl. Ltt., art. Chronicles), that the knowledge of these generations was communicated to Exra by inspiration. In fact, the internal evidence as to the time when the book of Chronicles was compiled, seems to tally remarkably with the tradition concerning its authorship. Notwithstanding this agreement, however, the authenticity of Chronicles has been vehemently impugned by De Wette and other German critics,^c whose arguments have been successfully refuted by Dahler, Keil, Movers, and others. It has been clearly shown that the attack was grounded not upon any real marks of spuriousness in the books themselves, but solely upon the desire of the critics in question to remove a witness whose evidence was fatal to their favorite theory as to the post-Babylonian origin of the books of Moses. If the accounts in the books of Chronicles of the courses of priests and Levites, and the ordinances of divine service as arranged by David, and restored by Hezekiah and Josiah, are genuine, it necessarily follows that the Levitical law, as set forth in the Pentateuch, was not invented after the return from the Captivity. Hence the successful vindication of the authenticity of Chronicles has a very important bearing upon many of the very gravest theological questions. As regards the plan of the book, of which the book of Ezra is a continustion, forming one work, it becomes apparent immediately [as soon as] we consider it as the compilation of Ezra, or some one nearly contemporary with him. One of the greatest difficulties connected with the Captivity and the return must have been the maintenance of that genealogical distribution of the lands which yet was a vital point of the Jewish economy. Accordingly it appears to have been one to which both Ezra and Nehemiah gave their earnest attention, as David, Hezekiah, and other kings, had done before them. Another difficulty intimately connected with the former was the maintenance of the temple services at Jerusalem. This could only be effected by the residence of the priests and Levites in Jerusalem in the order of their courses: and this residence was only practicable in case of the payment of the appointed tithes, first-fruits, and other offerings. Immediately [as soon as] these ceased the priests and Levites were obliged to disperse to their own villages to obtain a livelihood, and the temple services were neglected. But then again the registers of the Levitical genealogies were necessary, in order that it might be known who were entitled to such and such allowances, as porters, as singers, as priests, and so on; because all these offices went by fami-

box an explanation of Zerubbabel's genealogy in Chr. ill. see Geneal. of our Lord, by Lord A. Herrey,
 97 fl. But even if this explanation is not ac-

cepted, there is no difficulty. The hand which added Neh. xii. 10, 11, 21, 28, might equally have added 1 Chr. iii. 22-24.

< Xell says that Spinosa led the way, by suggesting that they were compiled after Judes Mac about (p. 9)

430 CHRONICLES

lies; and again the payment of the tithes, firstfruits, &c., was dependent upon the different families of Israel being established each in his inheritance. Obviously therefore one of the most pressing sants of the Jewish community after their return from Babylon would be trusty genealogical records, and if there were any such in existence, the arrangement and publication of them would be one of the greatest services a person in Ezra's situation could confer. But further, not only had Zerubbabel (Ezr. iii., v., vi.), and after him Ezra and Nehemiah (Ezr. ii., viii.; Neh. vii., viii.) labored most earnestly, in the teeth of immense difficulties, to restore the temple and the public worship of God there to the condition it had been in under the kings of Judah; but it appears clearly from their policy, and from the language of the contemporary prophets, Haggai and Zechariah, that they had it much at heart to re-infuse something of national life and spirit into the heart of the people, and to make then feel that they were still the inheritors of God's covenanted mercies, and that the Captivity had only temporarily interrupted, not dried up, the stream of God's favor to their nation. Now nothing could more effectually aid these pious and patriotic designs than setting before the people a compendious history of the kingdom of David, which should embrace a full account of its prosperity, should trace the sins which led to its overthrow, but should carry the thread through the period of the Captivity, and continue it as it were unbroken on the other side; and those passages in their former history would be especially important which exhibited their greatest and best kings as engaged in building or restoring the temple, in reforming all corruptions in religion, and zealously regulating the services of the house of God. As regards the kingdom of Israel or Samaria, seeing it had utterly and hopelessly passed away, and that the existing inhabitants were among the bitterest "adversaries of Judah and Benjamin," it would naturally engage very little of the compiler's attention. These considerations explain exactly the plan and scope of that historical work which consists of the two books of Chronscles and the book of Ezra. For after having in the first eight chapters given the genealogical divisions and settlements of the various tribes, the compiler marks distinctly his own age and his own purpose, by informing us in ch. ix. 1 of the disturbance of those settlements by the Babylonish Captivity, and, in the following verses, of the partial estoration of them at the return from Babylon 2-24); and that this list refers to the families who had returned from Babylon is clear, not only from the context, but from its re-insertion, Neh. xi. 3-22.ª with additional matter evidently extracted from the public archives, and relating to times subsequent to the return from Babylon, extending to Neh. xii. 27, where Nehemiah's narrative is again resumed in continuance with Neh. xi. 2. Having thus shown the reëstablishment of the returned families, each in their own inheritance according to the houses of their fathers, the compiler proceeds to the other part of his plan, which is to give a continuous history of the kingdom of Judah from David to his own times, introduced by the closing scene of Saul's life (ch. x.), which introduction is itself prefaced by a genealogy of the house of Saul (iz. 85-44), extracted from the genealogical tables

CHRONICLES

drawn up in the reign of king Hesekiah, as is at once manifest by counting the 13 or 14 generations, from Jonathan to the sons of Azel inclusive, exactly corresponding to the 14 from David to Hesekiah inclusive. This part of the plan extends from 1 Chr. ix. 35 to the end of the book of Exra 1 Chr. xv-xvii., xxii.-xxix.; 2 Chr. xiii.-xv., xxiv. xxvi., xxix.-xxxi. and xxv., are among the passages wholly or in part peculiar to the books of Chronicles, which mark the purpose of the compiler, and are especially suited to the age and the work of Ezra. Many Chaldaisnus in the language of these books, the resemblance of the style of Chron. to that of Ezra, which is, in parts, avowedly Ezra's composition, the reckoning by Darics (1 Chr. xxix.

7), as most explain **C**, as well as the breaking off of the narrative in the lifetime of Ezra, are among other valid arguments by which the authorship, or rather compilation of 1 and 2 Chr. and Ezr. is vindicated to Ezra. As regards the materials used by him, and the sources of his information, they are not difficult to discover. The genealogies are obviously transcribed from some register, in which were preserved the genealogies of the tribes and families drawn up at different times. This appears from the very different ages at which different genealogies terminate, indicating of course the particular reign when each was drawn up. Thus e. g. the genealogy of the descendants of Sheshan (1 Chr. ii. 34-41) was drawn up in Hezekiah's reign, since, including Zabad, who lived in David's time, and Azariah in the time of Joash, it ends with a generation contemporary with Hezekiah [AZARIAH, No. 5]. The line of the highpriests (1 Chr. vi. 1-15) must have been drawn up during the Captivity; that in 50-53, in the time of David or Solomon; those of Heman and Asaph in the same chapter in the time of David : that of the sons of Azel (1 Chr. viii. 38) in the time of Herekiah; that of the sons of Zerubbabel (1 Chr. iii. 19-24) in the time of Ezra, and so on.

The same wide divergence in the age of other materials embodied in the books of Chronicles is also apparent. Thus the information in 1 Chr. i. concerning the kings of Edom before the reign of Saul, was obviously compiled from very ancient sources. The same may be said of the incident of the slaughter of the sons of Ephraim by the Gittites, 1 Chr. vii. 21, viii. 13, and of the account of the sons of Shela, and their dominion in Mosh, 1 Chr. iv. 21, 22. The curious details concerning the Reubenites and Gadites in 1 Chr. v. must have heen drawn from contemporary documents, embodied probably in the genealogical records of Jotham and Jeroboam, while other records used by the compiler are as late as after the return from Babylon, such as 1 Chr. ix. 2 ff.; 2 Chr. xxxvi. 20 ff.; and others, as Ezr. ii. and iv. 6-23, are as late as the time of Artaxerxes and Nehemiah. Hence it is further manifest that the books of Chronicles and Ezra, though put into their present form by one hand, contain in fact extracts from the writing of many different writers, which were extant at the time the compilation was made. For the full as count of the reign of David, he made copious ex tracts from the books of Samuel the seer, Nathan the prophet, and Gad the seer (1 Chr. xxix. 29). For the reign of Solomon he copied from "the book of Nathan," from "the prophecy of Ahijak the Shilonite," and from "the visions of Iddo the seer" (2 Chr. iz. 29). Another work of idde

Digitized by Google

miled "the story (or interpretation, Milrush, | piors details, not likely to be known except to one מדרש) of the prophet Iddo," supplied an account of the acts, and the ways, and sayings of king Abijah (xiii. 22); while yet another book of Id.lo concerning genealogies, with the book of the prophet Shemaiah, contained the acts of king Rehoboam (xii. 15). For later times the "Book of the kings of Israel and Judah" is repeatedly cited (2 Chr. xxv. 26, xxvii. 7, xxxii. 32, xxxiii. 18, &c.), and "the sayings of the seers," or rather of Chozai (xxxiii. 19); and for the reigns of Uzziah and Hezskiah "the vision of the prophet Isaiah" (xxvi. 22, xxxii. 32). In other cases where no reference is made to any book as containing further information, it is probable that the whole account of such reign is transcribed. Besides the above-named works, there was also the public national record called כָרָר הָברֵי הַיָּבִיָר, mentioned in Neh. xii. 23, from which doubtless the present books took their name, and from which the genealogies and other matters in them were probably derived, and which are alluded to as having existed as early as the reign of David, 1 Chr. xxvii. 24. These "Chronicles of David," דְּבְרֵי הַיָּמִים לַמָּלָד דָוִיד, are probably the same as the דְרָוֹיך, above referred to, as written by Samuel, Nathan, and Gad. From this time the affairs of each king's reign were regularly recorded in a book called at first הבר דברי ייזל כ⊂, "the book of the acta of Solomon" (1 K. xi. 41), by the name of the king, as before of David, but afterwards in both kingdoms by the general name of コンプブ "フ "つ, as in the constantly recurring formula, - " Now the rest of the acta (コユコ) of Rehoboam, Abijam, &c.; Jeroboam, Nadab, &c., are they not written in the book of the Chronicles of the kings of Judah " or " of Israel" (1 K. xiv. 29, xv. 7, &c.)? And this continues to the end of Jehoiakim's reign, as appears by 2 K. xxiv. 5; 2 Chr. xxxvi. 8. And it was doubtless from this common source that the pasmages in the books of Samuel and Kings identical with the books of Chronicles were derived. All these several works have perished, but the most important matters in them have been providentially preserved to us in the Chronicles. As regards the closing chapter of 2 Chr. subse-

quent to v. 8, and the 1st ch. of Ezra, a comparion of them with the narrative of 2 K. xxiv., xxv. will lead to the conclusion that, while the writer of the narrative in Kings lived in Judah, and died inder the dynasty of Nebuchadnezzar, the writer of the chapter in Chronicles lived at Babylon, and survived till the commencement at least of the Persian dynasty. For this last writer gives no details of the reigns of Jehoiachin or Zedekish, or the events in Judah subsequent to the burning of the temple; but only dwelling on the moral lessons connected with the destruction of Jerusalem, passes an quickly to retain the return from captivity Moreover, he seems to speak as one who had long een a subject of Nebuchaduezzar, calling him simply "King Nebuchadnezzar;" and by the reted use of the expression "brought him, or these to Babylon," rather encourages the idea that the writer was there bimself. The first chapter of Ears strongly confirms this view, for we have co- tation.

at Babylon, of the decree, the presents made to the captives, the bringing out of the sacred vessels, the very name of the Chaldee treasurer, the number and weight of the vessels, and the Chaldee name of Zerubbabel, and in this chapter the writer speaks throughout of the captives going up to Jerusalem,

and Sheshbazzar taking them up (T, 27, as op-

posed to N'27). But with this clew we may ad-

vance a little further, and ask, who was there at Babylon, a prophet, as the writer of sacred annals must be, an author, a subject of Nebuchadnezzar and his sons, and yet who survived to see the Persian dynasty, to whom we can with probability assign this narrative? Surely the answer will be Daniel. Who so likely to dwell on the sacred vessels taken by Nebuchaduezzar (Dan. v. 2, 23); who so likely to refer to the prophecy of Jeremiah (Dan. ix.2); who so likely to bewail the stubbornness of the people, and their rejection of the prophets (Dan. ix. 5-8); who so likely to possess the text of Cy rus's decree, to know and record the name of the treasurer (Dan. i. 3, 11); and to name Zerubbabel by his Chaldee name (Dan. i. 7)? Add to this, that Ezr. i. exactly supplies the unaccountable gap between Dan. iz. and z. [EZRA], and we may comclude with some confidence that as Jeremiah wrote the closing portion of the book of Kings, so did Daniel write the corresponding portion in Chronicles, and down to the end of Ezr. i. Ezra perhaps brought this with him from Babylon, and made use of it to carry on the Jewish history from the point where the old Chronicles failed him. As regards the TEXT of the Chronicles, it is in parts very corrupt, and has the appearance of having been copied from MSS. which were partly effaced by age or in-Jerome (Proof. ad Paral.) speaks of the jury. Greek text as being hopelessly confused in his days, and assigns this as a reason why he made a new translation from the Hebrew. However, in several of the differences between the text of Chronicles and the parallel passages in the other books," the Chronicles preserve the purest and truest reading, as c. g. 2 Chr. ix. 25, compared with 1 K. iv. 26; 1 Chr. xi. 11 compared with 2 Sam. xxiii. 8; xxi. 12 comp. with 2 Sam. xxiv. 13; 2 Chr. xxvi. 1, 3, 8, &c., comp. with 2 K. xv. 1, 6, &c. As regards the LANGUAGE of these books, as of Ezra, Nehe mish, Esther, and the later prophets, it has a marked Chaldee coloring, and Gesenius says of them, that "as literary works they are decidedly inferior to those of older date" (Introd. to Heb. Gram.). The chief Chaldaisms are the use of certain words not found in old Hebrew, as 2000

121, 510, do., or of words in a different sense, as.

ראָרָר, אָרָד, &c., or of a different orthography, as

for דוק for דוק, בור for בי, dc., and the inter-

change of N and 11 at the end and at the begianing of words, and other peculiaritaes pointed out by Ge-senius and others. For further information see C. F. Keil, Apologet. Versuch üb. d. Bücher d. Chronik; F. C. Movers, Kritische Untersuchungen ib. d. Bibl. Chronik; Wolf's Biblioth. Hebr.; Kitto's

 Additional Literature. — It would be unjust to withhold from the reader Dean Stanley's representation (as he understands it) of the compilation and quirit of the book of Chronicles. "Though the latest of all the canonical writings, it represents the workmanship of many generations. It resembles the structure of an ancient cathedral, with fragments of every style worked into the building as it proceeded, - here a piece of the most hoary antiquity, there a precious relic of a lost hymn or genealogy of some renowned psalmist or warrior, - but all preserved, and wrought together, as by the workmen of medizeval times, under the guidance of the same sacerdotal mind, with the spirit of the same priestly order. Far below the prophetic books of the Kings in interest and solidity, it yet furnishes a useful counterpart by filling up the voids with materials which none but the peculiar traditions and feelings of the Levitical caste could have supplied. It is the culminating point of the purely Levitical system, both in what it relates, in what it omits, and the manner of its relations and omissions" (History of the Jewish Church, ii. 461-2).

Dillmann has an article on the Chronicles in Herzog's Real-Encykl. ii. 690-95. Hävernick (Handb. der Einl. in das Alte Test. ii. 264 ff.); Scholz (Einl. in die h. Schriften, ii. 391-460); Welte (in Herbst's Einleitung, ii. 162-231); and Keil (Einl. in das Alte Test. pp. 473-520) furnish valuable summaries of the results of their respective investigations. See also De Wette, EinL, 7. Ausg. 1852, pp. 237-257; Ewald, Gesch. d. Volkes Isr. i. 244-285, 3º Aufl., 1864; Bleek, Einl. in das A. T. 1860, pp. 391-401; Davidson, Introd. to the Old Test. ii. 47-120, Lond. 1862; Graf, Die geschichtl. Bücher des A. T. Leipz., 1866, pp. 114-247, comp. the notice by Bertheau in the Jakrb. f. deutsche Theol. 1836, xi. 150 ff.; and Kuenen, list. crit. des livres de l'Ancien Test., trad. par Pierson, i. 442-495, Paris, 1866. Of commentaries may be mentioned Bertheau's Die Bücher der Chronik (1854), vol. xv. of the Except. Handb. um A. T.; Maurer's Comment. in Vet. Test. i. 232 ff. (the notes very meagre); and Wordsworth's Holy Bible, with Notes, iii. 167 ff. (1866). The relation of the books of Chronicles to those of 1 and 2 Kings and 1 and 2 Samuel, both as to the parts common to both as well as those peculiar to sach, is well illustrated by this last writer in his ⁴ Introduction to the Books of Kings and to the books of Chronicles," pp. vii.-xxv. Keil (Einleitmg, p. 473) refers to the Tübingen Theol. Quaralachrift, 1931, ii. 201-282, as treating ably of the credibility and time of the composition of these witings Against the objections raised by De Wette, Gramberg and others, the replies of Koppen and of his editor, Scheibel (Die Bibel, ein Werk ster göttl. Weisheit, ii. 548 ff), are concise and to he point. H. and A.

CHRONOLOGY. I. INTRODUCTION. the object of this article is to indicate the present state of Biblical chronology. By this term we understand the technical and historical chronology :f the lews and their ancestors from the earliest time to the close of the New Testament Canon. The technical division must be discussed in some setail, the historical only as far as the return from

articles

The character of the inquiry may be made clearer by some remarks on the general nature of the sub ject. Formerly too great an exactness was hoped for in the determination of Hebrew chronology. Where the materials were not definite enough to fix a date within a few years, it was expected that the very day could be ascertained. Hence arose great unsoundness and variety of results, which ultimately produced a general feeling of distrust. At present critics are rather prone to run into this latter extreme and to treat this subject as altogether vague and uncertain. The truth, as might be expected, lies between these two extreme judgments. The character of the records whence we draw our information forbids us to hope for a complete system. The Bible does not give a complete his-tory of the times to which it refers: in its historical portions it deals with special and detached periods. The chronological information is, therefore, not absolutely continuous, although often, with the evident purpose of forming a kind of connection between these different portions, it has a more continuous character than might have been expected. It is rather historical than strictly chronological in its character, and thus the technical part of the subject depends, so far as the Bible is concerned, almost wholly upon inference. It might be supposed that the accuracy of the information would compensate in some degree for its scantiness and occasional want of continuity. This was, doubtless, originally the case, but it has suffered by designed alteration and by the carelessness of copyists. It is, therefore, of the highest moment to ascertain, as far as possible, what are the indications of alterations by design, and the character of the data in which they occur, and also what class of data has been shown to have suffered through the carelessness of copyists. Designed alteration of numbers has only been detected in the two genealogical lists of Abraham's ancestors in Genesis, in which the character of the differences of the Hebrew text, the Septuagint, and the Samaritan l'entateuch, is such as to indicate separate alteration by design of two out of the three records. The object of these alterations may have been either to shorten or to lengther the chronology. With the same purpose alterations may may have been made in the prominent detached large numbers in the Old Testament, and even in the smaller numbers, when forming part of a series, or, in either case, in the accompanying words determining the historical place of these numbers. Hence there is great value in independent evidence in the New Testament and in incidental evidence in the Old. Of the former class are St. Paul's mentions of the period of the Judges, and of that from the promise to Abraham until the Exodus, especially considered in connection with his speaking of the duration of Saul's reign, as to which the Hebrew Scriptures are silent. Of the latter class are such statements as Jephthah's of the .00 years that the Israclites had held the country of the Amorites before his days and the indications of time afforded by the growth of a tribe or family, and changes in national character and habits, which indications, from their requiring careful study and acute criticism, have been greatly neglected. The evidence of the genealogies without numbers is weakened not so much by designed alteration, of which the presence of the second Cainan in two lists affords the only positive in Babylon, the disputed matters of the period fol- stances, but by the abundant indications they abou

of the carelessness of copyists. Their very nature tion at any period of their history. In these paralso renders them guides to which we cannot trust, since it appears that they may be in any case broken without being technically imperfect. Even were this not the case, it must be proved before they can be made the grounds of chronological calculation, that the length of man's life and the time of manhood were always what they now are, and even then the result could only be approximative, and when the steps were few, very uncertain. This inquiry therefore demands the greatest caution and judgment.

II. TECHNICAL CHRONOLOGY. - The technical part of Hebrew chronology presents great difficultics. The Biblical information is almost wholly inferential, although in many cases the inferences to be drawn are of a very positive nature, not always absolutely, but in their historical application. For instance, although the particular nature of each year of the common kind — for there appear to have been two years -- cannot be fixed, yet the general or average character of all can be determined with a great approach to exactness. In this part we may use with more than ordinary confidence the evidence of the earlier Rabbinical commentators, who, in such matters, could scarcely be ill-informed. They lived near to the times at which all the Jewish observances connected with the calendar were strictly kept in the country for which they were framed, and it has not been shown that they had any motive for misrepresentation. We can, however, make no good use of our materials if we do not ascertain what character to expect in Hebrew technical chronology. There is no reason to look for any great change, sither in the way of advance or decline, although it seems probable that the patriarchal division of time was somewhat ruder than that established in connection with the Law, and that, after the time of Moses until the establishment of the kingdom, but little attention was paid to science. In our endeavor to ascertain how much scientific knowledge the patriarchs and Israelites are likely to have had, we must not expect either the accuracy of modern science or the inaccuracy of modern ignorance. As to scientific knowledge connected with chronology, particularly that of astronomy, the cases of the Egyptians and the Chaldees will assist us to form a judgment with respect to the Hebrews. These last, however, we must remember, had not the same advantage of being wholly settled, nor the same inducements of national religions connected with the heavenly bodies. The Arabs of the desert, from somewhat before the time of Mohammed that is, as far as our knowledge of them in this respect extends - to the present day, afford the best parallel. We do not find them to have been a mathematical people or one given to chronological computation depending on astronomy, but to have regulated their calendars by observation alone. It .night have been expected that their observations would, from their constant recurrence, have acquired an extraordinary delicacy and gradually given place to computations; but such we do not find to have been the case, and these observations are not now more accurate than would be the earlier ones of any series of the kind. The same characteristics appear to have been those of the scientific knowledge and practice of the Hebrews. We have no reason for supposing that they had attained, either average length of each generation. by discovery or by the instruction of foreigners. Chronology.) Ideler remarks that Moses, like seen in individual cases, to a high knowledge of [Herodota, reckons by generations. (Handbuck, L mathematics or accuracy of chronological computa- 1506.) Certainly in the Pentateuch generatives are

ticulars it is probable that they were always far below the Egyptians and the Cha'dees. But there is sufficient evidence that they were not inattentive observers of the heavens in the allusions to stars and constellations as well-known objects. We may therefore expect, in the case of the Hebrews, that wherever observation could take the place of computation it would be employed, and that its accuracy would not be of more than a moderate degree. If, for instance, a new moon were to be observed at any town, it would be known within two days when it might be first seen, and one of the clearest-sighted men of the place would ascend to an eminence to look for it. This would be done throughout a period of centuries without any close average for computation being obtained, since the observations would not be kept on record. So also of the rising of stars and of the times of the equinoxes. These probable conclusions as to the importance of observation and its degree of accuracy must be kept in view in examining this section.

Before noticing the divisions of time we must speak of genealogics and generations.

It is commonly supposed that the genealogies given in the Bible are mostly continuous. When, however, we come to examine them closely, we find that many are broken without being in consequence technically defective as Hebrew genealogies. A modern pedigree thus broken would be defective, but the principle of these genealogies must have been different. A notable instance is that of the genealogy of our Saviour given by St. Matthew. In this genealogy Joram is immediately followed by Ozias, as if his son — Ahaziah, Joash, and Amaziah being omitted (Matt. i. 8). That this is not an accidental omission of a copyist is evident from the specification of the number of generations from Abraham to David, from David to the Babylonish Captivity, and from the Babylonish Captivity to Christ, in each case fourteen generation .. Probably these missing names were purposely left out to make the number for the interval equal to that of the other intervals, such an omission being obvious and not liable to cause error. In Ezra's gen ealogy (Ezr. vii. 1-5) there is a similar omission which in so famous a line can scarcely be attributed to the carelessness of a copyist. There are also examples of a man being called the son of a remote ancestor in a statement of a genealogical form, as the following: "Shebuel the son of Gershon [Gershom], the son of Moses " (1 Chr. xxvi. 24), where a contemporary of David is placed in the same relation to Gershom the son of Moses, as the latter is to Moses himself. That these are not exceptional instances is evident from the occurrence of examples of the same kind in historical narratives. Thus Jehu is called "the son of Nimshi" (1 K. xix. 16, 2 K. ix. 20; 2 Chr. xxii. 7) as well as "the son of Jehoshaphat the son of Nimshi" (2 K. ix. 2, 14) In the same manner Laban is called "the son of Nahor" (Gen. xxix. 5), whereas he was his grand son, being the son of Bethuel (xxviii. 2, 5, comp xxii. 20-23). We cannot, therefore, venture to use the Hebrew genealogical lists to compute intervals of time except where we can prove each descent to be immediate. But even if we can do this we have still to be sure that we can determine the (Historical

488

sourceted with chronology by the length of each in | the daily evening sacrifice (Ex. xii. 6; Num in a a series being indicated, but this is not the manner of Herodotus, who reckons by generations, assuming an average of three to a century (ii. 142). There is no use of a generation as a division of time in the Pentateuch, unless, with some, we sup-

pose that Those in Gen. xv. 16 is so used. Those however, who hold this opinion make it an interval of a hundred years, since it would, if a period of time, seem to be the fourth part of the 400 years of verse 13: most probably, however, the meaning is that some of the fourth generation should come forth from Egypt. [GENEALOGY; GENERATION.]

We have now to speak of the divisions of time, commencing with the least. There is no evidence that the ancient Hebrews had any such division smaller than an hour.

Hour. - The hour is supposed to be mentioned in Daniel (iii. 6, 15, iv. 16, 30, A. V. 19, 33, v. 5), but in no one of these cases is a definite period of time clearly intended by TVT, NTVT,

NOV", Chald., the word employed. The Egyptians divided the day and night into hours like our selves from at least B. C. cir. 1200. (See Lensius. Chronologie der Æg. i. 130.) It is therefore not improbable that the Israelites were acquainted with the hour from an early period. The "sun-dial of Ahaz," whatever instrument, fixed or movable, it may have been, implies a division of the kind. In the N. T. we find the same system as the modern. the hours being reckoned from the beginning of the Jewish night and day. [HOURS.]

Day. - For the civil day of 24 hours we find in one place (Dan. viii. 14) the term יהרב בהר "evening-morning," LXX. rux thuepor (also in 2 Cor. xi. 25 A. V. "a night and a day"). Whatever may be the proper meaning of this Hebrew term, it cannot be doubted here to signify "nights and days." The common word for day as distinguished from night is also used for the civil day, or else both day and night are mentioned to avoid vagueness, as in the case of Jonah's "three days and three nights" (Jon. ii. 1, A. V. i. 17; conp. Matt. xii. 40). The civil day was divided into night and natural day, the periods of darkness and light (Gen. i. 5). It commenced with night, which stands first in the special term given above. The

night, ליל, and therefore the civil day, is generally held to have begun at sunset. Ideler, however while admitting that this point of time was that of the commencement of the civil day among all other sations known to us, which followed a lunar reckning, objects to the opinion that this was the case with the Jews. He argues in favor of the beginning of deep night, reasoning that, for instance, in the ordaining of the Day of Atouement, on the 10th of the 7th month, it is said "in the ninth [day] of the month at even, from even unto even, shall ye celebrate (lit. rest) your Sabbath "- (Lev. xxiii. 32), where, if the civil day began at sunset, it would have been said that they should commence the observance on the evening of the 10th day, or merely on the 10th day, supposing the word even-

ing, \Box , to mean the later part of our afternoon.

He cites, as probably supporting this view, the expression """, "between the two even

xxviii. 4); for the Pharisees, whom the present Jews follow, took it to be the time between the 9th and 11th hours of the day, or our 3 and 5 P. M., although the Samaritans and Karaites supposed it to be the time between sunset and full darkness

perticularly on account of the phrase NII

שיבי יייייי, "when the sun is setting," used in a parallel passage (Deut. xvi. 6) (see Hundbuch, i. 482-484). These passages and expressions may, however, be not unreasonably held to support the common opinion that the civil day began at sunset. The term "between the two evenings" can scarcely be supposed to have originally indicated a long period : a special short period, though scarcely a point, the time of sunset, is shown to correspond to it. This is a natural division between the late afternoon when the sun is low, and the evening when his light has not wholly disappeared, - the two evenings into which the natural evening would be cut by the commencement of the civil day if it began at sunset. There is no difficulty in the command that the observance of so solemn a day as that of atons ment should commence a little before the true beginning of the civil day, that due preparation might be made for the sacrifices. In Judsea, where the duration of twilight is very short at all times, the most natural division would be at sunset. The

natural day, L'", probably was held to commence at sunrise, morning-twilight being included in the last watch of the night, according to the old as well as the later division; some, however, made the morning-watch part of the day. Four natural pe-riods, smaller than the civil day, are mentioned. These are 2,, evening, and 2, morning, of which there is frequent mention, and the less usual mini, "the two lights," as though "double light," noon, and הזילה, or - הזילי, or - הזילי "half the night," midnight. No one of these with a people not given to astronomy seems to indicate a point of time, but all to designate periods, evening and morning being, however, much longer that noon and midnight. The night was divided into noon and midnight. expressly mentioned, and we have to infer the existence of a third, the first watch of the night. The middle watch (דָּר כוֹנָה) occure in Judg. vii. 19, where the connection of watches with military affairs is evident - " And Gideon and the hundred men that [were] with him went down unto the extremity of the camp at the beginning of the middle watch; [and] they had but set the watchmen こったい可;" and the morning-watch (איז גרה דברר) is mentioned in Ex. xiv. 94

and 1 Sam. zi. 11; in the former case in the ac count of the passage of the Red Sea, in the latter, in that of Saul's surprise of the Amaionites when he relieved Jabesh-gilead. Some Rabbins hold that there were four watches (Handbuch, i. 486). In the N. T. four night-watches are mentioned, which were probably adopted from the Romans as a modification of the old system. All four occur together

a In Lam. H. 19, דרור איז אייזרו אל cf course re men " used of the time of offering the passover and firs to, without absolutely designating, the first watch

in Mark xill. 35, but, the late watch ; perorferior, midnight, alerropopuria, the cock-crowing; and rpst, the carly watch. [DAY, NIGHT, WATCHES OF NIGHT.]

Week (VI2m, a hebdomad). - The Hebrew week was a period of seven days ending with the Sabbath : therefore it could not have been a division of the month, which was lunar, without intercalation. But there was no such intercalation, since the Sabbath was to be every seventh day, its name is used for week,^a and weeks are counted on without any additional day or days. The mention together of Sabbaths and new moons proves nothing but that the two observances were similar, the one closing the week, the other commencing the month. The week, whether a period of seven days, or a quarter of the month, was of common use in antiquity. The Egyptians, however, were without it,^b dividing their month of thirty days into decade as did the Athenians. The Hebrew week therefore cannot have been adopted from Fgypt; probably both it and the Sabbath were used and observed by the patriarchs. [WEEK; SABBATH.]

Month (רביש ימים, הבש, יבר). - The months by which the time is measured in the account of the Flood would seem to be of 30 days each, probably forming a year of 360 days, for the 1st. 2d, 7th, and 10th months are mentioned (Gen. viii. 13, vii. 11, viii. 14, 4, 5). Ideler contests this, arguing that as the water first began to sink after 150 days (and then had been 15 cubits above all high mountains), it must have sunk for some days ere the Ark could have rested on Ararat, so that the second date must be more than 150 days later than the first (Handbuch, i. 69, 70, 478, 479). This argument depends upon the meaning of " high mountains," and upon the height of those -- " the mountains of Ararat" (viii. 4), on which the Ark rested, questions connected with that of the universality of the Flood. [NOAH.] On the other hand it must be urged that the exact correspondence of the interval to five months of 30 days each, and the use of a year of 360 days, a fact strangely ignored by Ideler, in prophetic passages of both Testaments, are of no slight weight. That the months from the giving of the Law until the time of the Second Temple, when we have certain knowledge of their character, were always lunar, appears from the command to keep new-moons, and from the unlikelihood of a change in the calendar. These lunar months have been supposed to have been always alternately of 29 and 30 days. Their average length would of course be a lunation, or a little (44') above 291 days, and therefore they would in general be alternately of 23 and 30 days, but it is outible that occasionally months might occur of 98 and 31 days, if, as is highly probable, the commencement of each was strictly determined by observation: that observation was employed for this purpose is distinctly affirmed in the Babylonian Talmud of the practice of the time at which it was written, when, however, a month was not allowed to be less than 29, or more than 30 days in length.

The first day of the month is called 2777, " new

mood;" LXX. reounvia, from the root WII "it was new" (as to the primary sense of which see MONTH); and in speaking of the first day of the month this word was sometimes used with the addition of a number for the whole expression, "in such a month on the first day," as 四丁门卫 דַמִילִי אַי בַּיּרָם דַהָּד. "On the third new moon on that day," badly rendered by the LXX. Tou de unvos rou rpirou . . τη ήμέρα ταύτη (Ex. xix. 1); hence the word came to signify month, though then it was sometimes qualified as [", The new moon was kept as a sacred festival. [FESTIVALS.] In the Pentateuch, and Josh., Judg., and Ruth, we find but one month mentioned by a special name, the rest being called according to their order. The month with a special name is the first, which is called בואביב שלקו (LXX. μην των νέων), "the month of ears of coru," or "Abib," that is, the month in which the ears of corn became full or ripe, and on the 16th day of which, the second day of the feast of unleavened bread, ripe ears, אביב, were to be offered (Lev. ii. 14; comp. xxiii. 10, 11, 14). This undoubted derivation shows how monstrous is the idea that Abib comes from the Egyptian Epiphi. In 1 K. three other names of months occur, Zif, W, or 127, the second, Ethanim, אירָכים, the seventh, and Bul, אירָכים, the eighth. These names appear, like that of Abib, to be connected with the phenomena of a tropical year. No other names are found in any book prior to the Captivity, but in the books written after the return the later nomenclature still in use appears. This

rear (TIDY). - It has been supposed, on account of the dates in the narrative of the Flood, as already mentioned, that in Noah's time there was a year of 360 days. These dates might indeed be explained in accordance with a year of 365 days. The evidence of the prophetic Scriptures is, however, conclusive as to the knowledge of a year of the former length. The time, times and an half of Dan. (vii. 25, xii. 7), where time means year (see xi. 13). cannot be doubted to be equivalent expressions to the 42 months and 1260 days of Kev. (xi. 2, 3, xii. 6) for $360 \times 3\frac{1}{2} = 1260$; and $30 \times 42 = 1260$. We have also the testimony of ancient writers that such a year was known to some nations, so that it is almost certain that the year of Noah was of this length. The characteristics of the year instituted at the Exodus can be clearly determined, though we cannot absolutely fix those of any single year. There can be no doubt that it was essentially tropical, since certain observances connected with the produce of the land were fixed to particular days. It is equally clear that the months were lunar, each commencing with a new moon. It would appear therefore that there must have been some mode of adiustment. To ascertain what this was, it is no-

is evidently of Babylonian origin, as the Jews them-

selves affirm. [MONTHS.]

e Ideler corrects Gesenius (Handuvert. s. v. المع المان المعاد) 481, note 1). for affirming that the usual meaning, "abbath," is b the nessage of Dion Cassius (xxxvii. 19), in itself missistery in Lev. xxiii. 15. In the Thes. (s. v.), ambiguous, is of no value against the strong negative Bödiger, possibly on the authority of Gesenius, admits | evidence of the monuments. (See Lepsius. Chromete hat the signification is perhaps "week." Ideler's 'vie der My. i. 181-188.)

argument seems however unanswerable (Hanabuch, i

ary first to decide when the year commenced. | month, the Day of Atonement standing in the On the 16th day of the month Abib, as already mentioned, ripe ears of corn were to be offered as first-fruits of the harvest (Lev. ii. 14, xxiii. 10, 11). The reaping of the barley commenced the harvest (2 Sam. xxi. 9), the wheat following (Ruth ii. 23) Josephus expressly says that the offering was of barley (Ant. iii. 10, § 5). It is therefore necessary to find when the barley becomes ripe in Palestine. According to the observation of travellers the barley is ripe, in the warmest parts of the country, in the first days of April. The barley-harvest therefore commences about half a month after the vernal equinor, so that the year would begin at about that tropical point were it not divided into lunar months. We may conclude that the nearest new moon about or after the equinox, but not much before, was chosen as the commencement of the year. Ideler, whom we have thus far followed, as to this vear, concludes that the right new moon was shosen through observation of the forwardness of the barley-crops in the warmer districts of the country (Handbuch, i. 490). There is, however, this difficulty, that the different times of barley harvest in various parts would have been liable to cause confusion. It seems, therefore, not unlikely that the Hebrews adopted the surer means of determining their new year's day by observations of heliacal risings or similar stellar phenomena known to mark the right time before the barley-harvest. Certainly the ancient Egyptians and the Arabs made use of such means. The method of intercalation can only have been that which obtained after the Captivity - the addition of a thirteenth month. whenever the twelfth ended too long before the equinox for the first-fruits of the harvest to be offered in the middle of the month following, and the similar offerings at the times appointed. This method would be in accordance with the permission granted to postpone the celebration of the Passover, in the case of any one who was either legally unclean or journeying at a distance, for a whole month to the 14th day of the second month (Num. ix. 9-13), of which permission we find Hezekiah to have availed himself for both the reasons allowed, because the priests were not sufficiently sanctified, and the people were not collected (2 Chr. xxx. 1-3, 15). The later Jews had two beginnings to the year, or, as it is commonly but somewhat inaccurately said. two years. At the time of the Second Temple (as Ideler admits) these two beginnings obtained, the seventh month of the civil reckoning being Abib, the first of the sacred. Hence it has been held that the institution at the time of the Exodus was merely a change of commencement, and not the introduction of a new year; and also that from this time there were the two beginnings. The former opinion is at present purely hypothetical, and has been too much mixed up with the latter, for which in the contrary, there is some evidence. The strongest point in this evidence, although strangely innoticed by Ideler as such, is the circumstance that the sabbatical and jubilee years commenced in the seventh month, and doubtless on its first day. That the jubilee year commenced in this month is distinctly stated, since its solemn proclamation was an the 10th day of the seventh month, the Day of Atomement (Lev. xxv. 9, 10); and as this year immediately followed a sabbatical year, the latter must have commenced in the same manner. As bowever three were whole years, it must be sup- are therefore rather summer and autumn than sum-

CHRONOLOGY

same relation to their beginning, and perhaps to the civil beginning of the year, as did the Passover to the sacred beginning. It is perfectly clear that this would be the most convenient, if not the uccessary, commencement of single years of total cessa tion from the labors of the field, since each year so commencing would comprise the whole round of these occupations in a regular order from seed-time to harvest, and from harvest to vintage and gathering of fruit. This is indeed plain from the injunction as to both Sabbatical and Jubilee years apart from the mention of the Day of Atonement, unless we suppose, and this would be very unwarrantable, that the injunction follows the order of the seasons of agriculture, but that the observance did not. It might seem, at first sight, that the seventh month was chosen, as itself of a kind of sabbatical character: but this does not explain the fact that Sabbatical and Jubilee years were natural years, nor would the seventh of twelve months be analogous to every seventh year. We can therefore come to no other conclusion but that for the purposes of agriculture the year was held to begin with the seventh month, while the months were still reckoned from the sacred commencement in Abib. There are two expressions used with respect to the time of the celebration of the Feast of Ingathering on the 15th day of the seventh month, one of which leads to the conclusion at which we have just arrived, while the other is in accordance with it. The first of these

speaks of this feast as TIMT INT, "in the going out " or end " of the year " (Ex. xxiii. 16), and the second, as הַמִינָה הַיּתינָה, "[st] the change of the year" (Ex. xxxiv. 22), a vague expression, as far as we can understand it, but one fully consistent with the idea of the turning-point

of a natural year. By the term TIT the Rabbins denote the commencement of each of the four seasons into which their year is divided (Handbuch, i. 550, 551). Evidence corroborative of our conclusion is also afforded by the similar distinct's. character of the first and seventh months in the calendar with respect to their observances. The one was distinguished by the Feast of Unleavened Bread from the 15th to the 21st inclusive; the other by that of Tabernacles, from the 15th to the 22d. There is besides this some evidence in the special sanctification, above that of the ordinary new moon, of the first day of the seventh month, which in the blowing of trumpets bears a resemblance to the celebration of the commencement of the jubilee year on the Day of Atonement. On these grounds we hold that there were two beginnings to the year from the time of the Exodus. YEAR.]

Seasons. - The ancient Hebrews do not appear to have divided their year into fixed seasons. We find mention of the natural seasons, $V \sum_{i=1}^{n}$, "summer," and 门门 "winter," which are used for the whole year in the expression Pill Y ... (Ps lxxiv. 17; Zech. xiv. 8; and perhaps Gen. viii. 22) The former of these properly means the time of cutting fruits, and the latter, that of gathering fruits; the one referring to the early fruit season. the other to the late one. Their true significations good that they began on the first day of the mer and winter. There can be no doubt, however

Digitized by Google

that they came to signify the two grand divisions of the year, both from their use together as the two seasons, and from the mention of "the winter

bouse," אַיר די די א and "the summer house,"

Y ביה הבי (Am. iii. 15). The latter evidence is the stronger, since the winter is the time in Palestine when a palace or house of different construction would be needed to the light summer pavilion, and in the only passage besides that referred to in which the winter-house is mentioned. we read that Jehoiakim "sat in the winter-house in the ninth month : " that is, almost at mid-winter : "and [there was a fire] on the hearth burning before him " (Jer. xxxvi. 22). It is probable, how-

ever, that 5,277, when used without reference to the year, as in Job xxix. 4, has its original significa-

tion. The phrase Di, "cold and heat," in Gen. viii. 22, is still more general, and cannot be held to indicate more than the great alternations of temperature, which, like those of day and night, were promised not to cease. (Comp. Ideler, Handbuch, i. p. 494). There are two agricultural seasons of a more special character than the preceding in

their ordinary use. These are 977, "seed-time,"

and "", "harvest." Ideler (loc. cit.) makes these equal to the foregoing seasons when similarly used together; but he has not proved this, and the passage he quotes (Gen. I. c.) cannot be held to afford any evidence of the kind, until some other two terms in it are proved to be strictly correspondent. [SKASONS.]

Festivals and holy days. - Besides the sabbaths and new moons, there were four great festivals and a fast in the ancient Hebrew year, the Feast of the Passover, that of Weeks, that of Trumpets, the Day of Atonement, and the Feast of Tabernacles.

Feast of the Passover, TD, was properly only the time of the sacrifice and eating of the paschal lamb, that is, the evening, בין הַנֶרבָי, "between the two evenings " (Lev. xxiii. 5) - a phrase previously considered - of the 14th day of the first month, and the night following, -- the Feast of Unleavened Bread הוביזיוה, commencing on the morning of the 15th day of the month, and lasting seven days until the 21st inclusive. The 15th and 21st days of the month were sabbaths, that is, holy days. [PASSOVER.] The Feast of Weeks, ", cr Pentecost, was kept at the close of seven weeks, counted from the day inslusive following the 16th of the 1st month. Hence its name means the feast of seven weeks, as indeed It is called in Tob. (άγία ἐπτὰ ἐβδομάδων, ii. 1). As the ears of barley as first-fruits of the harvest were offered on the 16th day of the 1st month, so on this day thanksgiving was paid for the blessing of the harvest, and first-fruits of wheat offered as well as of fruits: hence the names הקציר בקציר, Feast of Harvest, and הים התפורים Day of First-fruits. - The Feast of Trumpets (lit. of the sound of the trumpet), also אום איט ברון הרוסה "a great aabath of celebration by the sound of the trumpet," was the 1st day of the 7th month, the eivil com- After the lapse of seven subbatical periods, or forty

437

mencement of the year. The Day of Atouement יוֹם הַכַּפָּרִים, was the 10th day of the 7th

month. It was a sabbath, that is a holy day, and also a fast, the only one in the Hebrew year before the Babylonish Captivity. Upon this day the high priest made an offering of atonement for the nation This annual solemn rite seems more appropriate to the commencement than to the middle of the year, and the time of its celebration thus affords some evidence in favor of the theory of a double begin-

ning. - The Feast of Tabernacles, הוב הסבור,

was kept in the 7th month, from the 15th to the 22d days inclusive. Its chief days were the first and last, which were sabbaths. Its name was taken from the people dwelling in tabernacles, to commemorate the Exodus. It was otherwise called

わつとつ コワ, "the Feast of Gathering," because it was also instituted as a time of thanksgiving for the end of the gathering of fruit and of the vintage. The small number and simplicity of these primitive Hebrew festivals and holy days is especially worthy of note. It is also observable that they are not of an astronomical character; and that when they are connected with nature, it is as directing the gratitude of the people to Ilini who, in giving good things, leaves not Himself without witness. - În later times many holy days were added. Of these the most worthy of remark are the Feast of Purim. or "Lots," commemorating the deliverance of the Jews from Haman's plot, the Feast of the Dedication, recording the cleansing and re-dedication of the Temple by Judas Maccabacus, and fasts on the anniversaries of great national misfortunes con-nected with the Babylonish Captivity. These last were doubtless instituted during that period (comp. Zech. vii. 1-5). [FESTIVALS, &c.]

Sabbatical and Jubilee Years. - The sabbatical

year, שממול , "the fallow year " or nos

sibly "year of remission," or TODT alone, also called a "sabbath," and a "great sabbath," was au institution of strictly the same character as the sabbath, - a year of rest, like the day of rest. It has not been sufficiently noticed that as the day has a side of physical necessity with reference to man, so the year has a side of physical necessity with reference to the earth. Every seventh year appears to be a very suitable time for the recurrence of a fallow year, on agricultural grounds. Besides the rest from the labors of the field and vineyard, there was in this year to be remission, temporary or absolute, of debts and obligations among the people. The sabbatical year must have commenced at the civil beginning of the year, with the 7th month, as we have already shown. Although doubtless held to commence with the 1st of the month, its beginning appears to have been kept at the Feast of Tabernacles (Deut. xxxi. 10), while that of the jubilee year was kept on the Day of Atonement. This institution seems to have been greatly neglected. This was prophesied by Moses, who speaks of the desolation of the land as an enjoying the sabbaths which had not been kept (Lev. xxvi. 84, 35, 43). The seventy years' captivity is also spoken of in 2 Chr. (xxxvi. 21) as an enjoying subbath; Lut this may be on account of the number being aubbatical, as ten times seven which indeed seems to be indicated in the passage

nine years, a year of jubilee was to be kept. immedistely following the last subbatical year. This was salled "בָר הַיּרָבָל", " the year of the trumpet," were current B. c. 163, 185, and 187, and therefore

or יובל alone, the latter word meaning either the sound of the trumpet or the instrument itself, because the commencement of the year was announced on the Day of Atonement by sound of trumpet. It was similar to the sabbatical year in its character, although doubtless yet more important. In the jubilee year debts were to be remitted, and lands were to be restored to their former owners. It is obvious from the words of the law (Lev. xxv. 8-11) that this year followed every seventh sabbatical ycar, so that the opinion that it was always identi-cal with a sabbatical year is untenable. There is a further question as to the length of each jubilee period, if we may use the term, some holding that it had a duration of 50, but others of 49 years. The latter opinion does not depend upon the supposition that the seventh subbatical year was the jubilee, since the jubilee might be the first year of the next seven years after. That such was the case is rendered most probable by the analogy of the weekly sabbath, and the custom of the Jews in the first and second centuries B. C.; although it must be noted that, according to Maimonides, the jubilee period was of 50 years, the 51st year commencing a new period, and that the same writer mentions that the Jews had a tradition that after the destruction of the first Temple only subbatical years, and no jubilee years, were observed. (Ideler, Handbuch, i. pp. 503, 504.) The testimony of Josephus does not seem to us at all conclusive, although Ideler (L. c.) holds it to be so; for the expression raira πεντήκοντα μέν έστιν έτη τα πάντα (Ant. iii. 12, § 3) cannot be held to prove absolutely that the jubilee year was not the first year of a subbatical period instead of standing between two such periods. It is important to ascertain when the first sabbatical year ought to have been kept; whether the sabbatical and jubilee periods seem to have been continuous; what positive record there is of any sabbatical or jubilee years having been kept; and what indications there are of a reckoning by such years of either kind. 1. It can scarcely be contested that the first sabbatical year to be kept after the Israelites had entered Canaan would be about the fourtainth. (Jennings, Jewish Antiquities, bk. iii. cap. 9: and infr. Historical Chronology.) It is possible that it might have been somewhat earlier or later; but the narrative will not admit of much latitude. 2. It is clear that any sabbatical and jubilee years kept from the time of Joshua until the destruction of the first Temple, would have been reckoned from the first one, but it may be questioned if any kept after the return would be counted in the same nanner: from the nature of the institutions, it is ather to be supposed that the reckoning, in the second case, would be from the first cultivation of he country after its re-occupation. The recorded sabhatical years do not enable us to test this supposition, because we do not know exactly the year f return, or that of the first cultivation of the

If return, or that of the inst cultivation of the inst hours, by the king to the whole people is solemn would make that next after the return to commence would make that next after the return to commence is and in Kings, "Surely there was not holden such availed make the first year of the period B. C. 534-3, which would not improbably be the first year of sultivation: but in the case of so short a period is in a substrate in the days of the kings of Israel, nor of the kings of Judah" (2 K. xxiii. \$2); and, it his cannot be regarded as evidence of much weight.

subbatical years have, however, been preserved. These were current B. C. 168, 185, and 187, and therefore commenced in each case about three months earlier than the beginning of these Julian years. (Joseph And. xii. 9, § 5; xiii. 8, § 1; xiv. 16, § 2; xv 1, § 2; B. J. i. 2, § 4; and 1 Macc. vi. 49, 53.) 4 There are some chronological indications in the O. T. that may not unreasonably be supposed to be connected with the sabbatical system. The prophet Ezekiel dates his first prophecy of those in the book "in the thirtieth year," &c., "which [was] the fifth year of king Jehoiachin's captivity" (i. 2); thus apparently dating in the former case from a better known era than that of Jehojachin's captivity, which he employs in later places, without, however, in general again describing it. This date of the 30th year has been variously explained: some, with Ussher, suppose that the era is the 18th year of Josiah, when the book of the Law was found, and a great passover celebrated. (See Häver-nick, Commentar über Ezech. pp. 12, 13). This year of Josiah would certainly be the first of the reckoning, and might be used as a kind of reformationera, not unlike the era of Simon the Maccabee. [Eras.] Others suppose that the thirtieth year of the prophet's life is meant; but this seems very unlikely. Others again, including Scaliger (De Emendatione Temporum, pp. 79, 218, ed. 1583) and Rosenmüller (Schol. ad loc.), hold that the date is from the commencement of the reign of Nabopolassar. There is no record of an era of Nabopolassar; that king had been dead some years; and we have no instance in the O. T. of the use of a foreign era. The evidence therefore is in favor of Josiah's 18th year. There seems to be another reference to this date in the same book, where the time of the iniquity of Judah is said to be 40 years, for the final captivity of Judah (Jer. lii. 30) was in the 40th year of this reckoning. In the same place the time of the iniquity of Israel is said to ... 390 years, which sum, added to the date of the captivity of this part of the nation in the A. V. B. C. 721, goes back to B. C. 1111 (Ez. iv. 5, 6). This result leads to the indication of possible jubilee dates, for the interval between B. C. 1111 and B. C. 623-2 is 488-9 years, within two years of ten jubilee periods; and it must be remembered that the seventy weeks of the prophet Daniel seem to indicate the use of such a great cycle. In the latter case, however, as in that of the seventy years' captivity, it is probable that the year of 360 days is used, so that the agreement is not absolute. ()'ear.) It remains to be asked whether the accounts of Josiah's reformation present any indications of celebrations connected with the sabbatical system. The finding of the book of the Law might seem to point to its being specially required for some public service. Such a service was the great reading of the Law to the whole congregation at the Feast of Tabernacles in every sabbatical year (Deut. xxxi. 10-13). The finding of the book was certainly followed by a public reading, apparently in the first month, by the king to the whole people of Judah and Jerusalem, and afterwards a solemu passover was kept. Of the latter celebration is it said in Kings, " Surely there was not holden such a passover from the days of the Judges that judged Israel, nor in all the days of the kings of Israel, nor of the kings of Judah" (2 K. xxiii. 22); and, it Chronicles, "There was no passover like to that

adther did all the kings of Israel keep such a pass- | year was current B. O. 596, commeucing in the over as Josiah kept' (2 Chr. xxxv. 18). The mention of Samuel is remarkable, since in his time the sarlier supposed date falls. It may be objected that the passover is nowhere connected with the sabbatical reckoning, but these passovers can scarcely have been greater in sacrifices than at least one in Solomon's reign, nor is it likely that they are mentioned as characterized by greater zeal than any others whatever; so that we are almost driven to the idea of some relation to chronology. This result would place the Exodus in the middle of the 17th century s. c., a time for which we believe there is a preponderance of evidence (Historical Chronology). [SABBATICAL YEAR; JUBILEE.] Eras. — There are indications of several histor-

ical eras having been used by the ancient Hebrews. but our information is so scanty that we are generally unable to come to positive conclusions. Some of these possible eras may be no more than dates employed by writers, and not national eras; others, however, can scarcely have been used in this special or individual manner from their referring to events of the highest importance to the whole people.

1. The Exodus is used as an era in 1 K. vi. 1. in giving the date of the foundation of Solomon's Temple. This is the only positive instance of the occurrence of this era, for we cannot agree with Ideler that it is certainly employed in the Pentateuch. He refers to Ex. xix. 1, and Num. xxxiii. 38 (Handbuch, i. 507). Here, as elsewhere in the same part of the Bible, the beginning of the Exodus-year - not, of course, the actual date of the Exodus (Regnal years, &c.) is used as the point whence time is counted; but during the interval of which it formed the natural commencement it cannot be shown to be an era, though it may have been, any more than the beginning of a sovereign's reign is one.

2. The foundation of Solomon's temple is conjectured by Ideler to have been an era. The pas-ages to which he refers (1 K. ix. 10; 2 Chr. viii. 1), merely speak of occurrences subsequent to the interval of 20 years occupied in the building of the temple and the king's house, both being distinctly specified; so that his reading - "Zwanzig Jahre nachdem Salomo das Haus des Herrn erbaute " leaves out half the statement and so makes it insorrect (II indb. l. c.). It is elsewhere stated that the building of the temple occupied 7 years (1 K. vi. 37, 38), and that of Solomon's house 13 (vii. 1), making up the interval of 20 years.

8. The era once used by Ezekiel, and commencing in Josiah's 18th year, we have previously dissed, concluding that it was most probably connected with the subbatical system (Subbutical and Jubiles Years).

4. The era of Jehoiachin's captivity is constantly used by Ezekiel. The earliest date is the 5th year (i. 2) and the latest, the 27th (xxix. 17). The prophet generally gives the date without applying any distinctive term to the era. He speaks, howsver, of "the fifth year of king Jehoiachin's captivity " (i. 2), and " the twelfth year of our captivity " (xxxiii. 21), the latter of which expressions may uplain his constant use of the era. The same era a necessarily employed, though not as such where the advancement of Jehoischin in the 37th year of ais captivity is mentioned (2 K. xxv. 27; Jer. lii. **91**). We have no proof that it was used except oy those to whose captivity it referred. Its 1st

spring of that year.

5. The beginning of the seventy years' captivity does not appear to have been used as an era (IIiswritcal Chronology).

6. The return from Babylon does not appear to be employed as an era: it is, however, reckoned from in Ezra (iii. 1, 8), as is the Exodus in the Pentateuch.

7. The era of the Seleucidæ is used in the first and second books of Maccabees.

8. The liberation of the Jews from the Syrian yoke in the 1st year of Simon the Maccabee is stated to have been commemorated by an era used in contracts and agreements (1 Macc. xiii. 41). The years 1, 2, and 3 on the coins ascribed to Simon [MONEY, SHEKEL] are probably of this era, although it is related that the right of coining money with his own stamp was not conceded to him until somewhat later than its beginning (xy. 6); for it may be reasonably supposed, either that Antiochus VII. confirmed privileges before granted by his brother Demetrius II. (comp. xv. 5), or that he gave his sanction to money already issued (Em-

Bru., 8th ed., Numismatics, pp. 379, 380). Regnal Years. — By the Hebrews regnal years appear to have been counted from the beginning of the year, not from the day of the king's accession. Thus, if a king came to the throne in the last month of one year, reigned for the whole of the next year, and died in the 1st wonth of the 3d year, we might have dates in his 1st, 2d and 3d years, although he governed for no more than 18 or 14 mrnths. Any dates in the year of his accession, before that event, or in the year of his death, after it, would be assigned to the last year of his predecessor, and the 1st of his successor. The same principle would apply to reckoning from eras or important events, but the whole stated lengths of reigns or intervals would not be affected by it.

III. HISTORICAL CHRONOLOGY. - The historical part of Hebrew Chronology is not less difficult than the technical. The information in the Bible is indeed direct rather than inferential, although there is very important evidence of the latter kind; but the present state of the numbers makes absolute certainty in many cases impossible. If, for instance, the Hebrew and LXX. differ as to a particular number, we cannot in general positively determine that the original form of the number has been preserved, when we have decided, and this we are not always able to do, which of the present forms has a preponderance of evidence in its favor. In addition to this difficulty there are several gaps in the series of smaller numbers which we have no means of supplying with exactness. When, therefore, we can compare several of these smaller numbers with a larger number, or with independent evidence, we are frequently prevented from putting a conclusive test by the deficiencies in the first se ries. The frequent occurrence of round numbers is a matter of minor importance, for, although when we have no other evidence it manifestly precludes our arriving at positive accuracy, the variation of a few years is not to be balanced against great differences apparently not to be positively resolved. as those of the primeval numbers in the Hebrew, LXX and Samaritan Pentateuch. Lately some have laid great stress upon the frequent occurrence of the number 40, alleging that it and 70 are vague terms equivalent to "many," so that "40 years," or "70 years 'would mean no more than ' many years '

Primá facie, this idea would seem reasonable, but | in historical chronology they could hardly be en an a further examination it will be seen that the pected to be right, having a very small knowledge details of some periods of 40 years are given, and of foreign sources. In fact, by comparing their show that the number is not indefinite where it later dates with the chronology of the time astrowould at first especially seem to be so. Thus the 40 years in the wilderness can be divided into three periods: (1.) from the Exodus to the sending out of the spies was about one year and a quarter (1 year 1 + x(2?) months, Num. ix. 1, x. 11; comp. ver. 29, showing it was this year, and xiii. 20 proving that the search ended somewhat after midsummer): (2.) the time of search, 40 days (Num. xiii. 25): (8.) the time of the wandering until the brook Zered was crossed, 38 years (Deut. ii. 14): making altogether almost 391 years. This perfectly accords with the date (yr. 40, m. 11, d. 1) of the address of Moses after the conquest of Sihon and Og (Deut. i. 3, 4), which was subsequent to the crossing of the brook Zered. So again David's reign of 40 years is divided into 7 years 6 m. in Hebron, and 33 in Jerusalem (2 Sam. ii. 11, v. 5; 1 Chr. iii. 4, but 1 K. ii. 11, 7 years, omitting the months, and 33). This therefore cannot be an indefinite number, as some might conjecture from its following Saul's 40 years and preceding Solomon's. The last two reigns again could not have been much more or less from the circumstances of the history. The occurrence of some round numbers therefore does not warrant our supposing the constant use of vague ones. In discussing the technical part of the subject we have laid some stress upon the opinions of the earlier Rabbinical commentators: in this part we place no reliance upon them. As to divisions of time connected with re-

nomically fixed, we find so extraordinary a departure from correctness that we must abandon the idea of their having held any additional facts handed down by tradition, and scrving to guide them to a There are, however, true system of chronology. important foreign materials to aid us in the determination of Hebrew chronology. In addition to the literary evidence that has been long used by chronologers, the comparatively recent decipherment of the Egyptian and Assyrian inscriptions has afforded us valuable additional evidence from contemporary monuments.

Biblical data. - It will be best to examine the Biblical information under the main periods into which it may be separated, beginning with the earliest.

A. First Period, from Adam to Abram's departure from Haran. - All the numerical data in the Bible for the chronology of this interval are comprised in two genealogical lists in Genesis, the first from Adam to Noah and his sons (Gen. v. 3 ad firs, and the second from Shem to Abram (xi. 10-26), and in certain passages in the same book (vii. 6, 11. viii. 13, ix. 28, 29, xi. 32, xii. 4). The Masoretic Hebrew text, the LXX., and the Samaritan Pentateuch greatly differ, as may be seen by the following table, which we take from the Genesis of the Earth and of Man (p. 90), adding nothing essential but a various reading, and the age of Abram when he left Haran, but also inclosing in ligious observances they could scarcely be far wrong; parentheses numbers not stated but obtained by

	Age of each when the next was born.			of each after ext was born.		Total length of the life of each.

computation from others, and making some alterstions consequently necessary. The advantage of the system of this table is the clear manner in which it snows the differences and agreements of the three versions of the data. The dots indicate cambers agreeing with the LXX.

The number of generations in the LXX. is one in excess of the Heb. and Sam. on account of the "second Cainan," whom the best chronologers are agreed in rejecting as spurious. He is found is the present text of the LXX. in both Gen. and . Chr., and in the present text of St. Luke's Gospa.

forethus, Philo, and the earlier Christian writes | see there is some ground in the similar case of cer appear however to have known nothing of him, and it is therefore probable either that he was first introduced by a copyist into the Gospel and thence into the LXX., or else that he was found in some codd, of the LXX, and thence introduced into the Gospel, and afterwards into all other copics of the LXX. [CAINAN.] Before considering the varia tions of the numbers it is important to notice that "as two of the three sources must have been corrupted, we may reasonably doubt whether any one of them be preserved in its genuine state " (Genesis of the Earth, dc., p. 92) - a check upon our con fidence that has strangely escaped chronologers in general. The variations are the result of design, not accident, as is evident from the years before the birth of a son and the residues agreeing in their sums in almost all cases in the antediluvian generations, the exceptions, save one, being apparently the result of necessity that lives should not overlap the date of the Flood (comp. Clinton, Fasti Hellen i. 285). We have no clew to the date or dates of the alterations beyond that we can trace the LXX. form to the first century of the Christian era, if not higher," and the Heb. to the fourth century: if the Sam. numbers be as old as the text, we can assign them a higher antiquity than what is known as to the Heb. The little acquaintance most of the early Christian writers had with Hebrew makes it impossible to decide, on their evidence, that the variation did not exist when they wrote: the testimony of Josephus is here of more weight, but in his present text it shows contradiction. though preponderating in favor of the LXX. num bers. A comparison of the lists would lead us to suppose, on internal evidence, that they had first two forms, and that the third version of them originated from these two. This supposed later version of the lists would seem to be the Sam., which certainly is less internally consistent, on the supposition of the original correctness of the numbers, than the other two. The cause of the alterations is most uncertain. It has indeed been conectured that the Jews shortened the chronology in rder that an ancient prophecy that the Messiah should come in the sixth millenary of the world's age might not be known to be fulfilled in the advent of our Lord. The reason may be sufficient in itself, out it does not rest upon sufficient evidence. It is, sowever, worthy of remark, that in the apostolic ge there were hot discussions respecting genealogies (Tit. iii. 9), which would seem to indicate that great importance was attached to them, perhaps also that the differences or some difference then existed. The different proportions of the generations and lives in the LXX. and Heb. have been asserted to afford an argument in favor of the former. At a later period, however, when we find instances of longevity recorded in all versions, the time of marriage is not different from what it is at the present day, although there are some long generations. stronger argument for the LXX., if the unity of the human race be admitted, is found in the long period required from the Flood to the Dispersion and the establishment of kingdoms: this supposition would, however, require that the patriarchal genvations should be either exceptional or represent uniods: for the former of these hypotheses we shall

" The earliest supposed indication of the LXX makers is in the passage of Polyhistor (ap. Buse'). Free ix 21 p. 122, giving the same as the computa-

tain generations, just alluded to, from Abraham downwards. With respect to probability of accuracy arising from the state of the text, the Heb certainly has the advantage. There is every reason to think that the Rabbins have been scrupulous in the extreme in making alterations: the LXX., on the other hand, shows signs of a carelessness that would almost permit change, and we have the probable interpolation of the second Cainan. If, however, we consider the Sam. form of the lists as sprung from the other two, the LXX. would seem to be earlier than the Heb., since it is more probable that the antediluvian generations would have been shortened to a general agreement with the Heb., than that the postdiluvian would have been lengthened to suit the LXX.; for it is obviously most likely that a sufficient number of years having been deducted from the earlier generations, the operation was not carried on with the later. It is noticeable that the stated sums in the postdiluvian generations in the Sam. generally agree with the computed sums of the Heb. and not with those of the LXX., which would be explained by the theory of an adaptation of one of these two to the other, although it would not give us reason for supposing either form to be the earlier. It is an ancient conjecture that the term year was of old applied to periods short of true years. There is some plausibility in this theory, at first sight, but the account of the Deluge seems fatal to its adoption. The only passage that might be alleged in its support is that in which 120 years is mentioned as if the term of man's life after the great increase of wickedness before the Deluge, compared with the lives assigned to the antediluvian patriarchs, but this from the context seems rather to mean a period of probation before the catastrophe (Gen. vi. 3). A question has been raised whether the generations and numpers may not be independent, the original generations in Gen. having been, as those in 1 Chr., simply names, and the numbers having been added, perhaps on traditional authority, by the Jews (or ap. Genesis of the Earth, dc., pp. 92-94). If we suppose that a period was thus portioned out, then the character of Hebrew genealogies as not of necessity absolutely continuous might somewhat lessen the numbers assigned to individuals. Some have supposed that the numbers were originally cyclical, an idea perhaps originating in the notion of the distribution of a space of time to a certain number of generations. This particular theory can however scarcely be reconciled with the historical character of the names. Turning to the evidence of ancient history and tradition, we find the numbers of the LXX. confirmed rather than those of the Heb. The history and civilization of Egypt and Assyria with Babylonia reach to a time earlier than, in the first case, and about as early as, in the second, the Heb. date of the Flood. Moreover the concurrent evidence of antiquity carries the origin of gentile civilization to the Noachian races. The question of the unity of the species does not therefore affect this argument (MAN), whence the numbers of the LXX. up to the Deluge would seem to be correct, for an accidental agreement can scarcely be admitted. If correct, are we therefore to suppose them original, that is, of the original text whence the

tion of Demetrius; but we cannot place reliance on ine correctness or a single fragmentary text.

Digitized by Google

accessary consequence of their correctness, since the translators were probably not sufficiently acquainted with external sources to obtain numbers either actually or approximatively true, even if they externally existed, and had they had this knowledge, it is scarcely likely that they would have used it in the manner supposed. On the whole, therefore, we are inclined to prefer the LXX. numbers after the Deluge, and, as consistent with them, and probably of the same authority, those before the Deluge also. It remains for us to ascertain what appears to be the best form of each of the three versions, and to state the intervals thus obtained. In the LXX. antediluvian generations, that of Methuselah is 187 or 167 years: the former seems to be undoubtedly the true number, since the latter would make this patriarch, if the subsequent generations be correct, to survive the Flood 14 years. In the postdiluvian numbers of the LXX. we must, as previously shown, reject the second Cainan, from the preponderance of evidence against his genuineness. [CAINAN.] Of the two forms of Nahor's generation in the LXX. we must prefer 79, as more consistent with the numbers near it, and as also found in the Sam. An important correction of the next generation has been suggested in all the lists. According to them it would appear that Terah was 70 years old at Abram's birth. "Terah lived seventy years, and begat Abram, Nahor, and Haran" (Gen. xi. 26). It is afterwards said that Terah went from Ur of the Chaldees to Haran and died there at the age of 205 years (145 Sam.) (vv. 31, 32), and the departure of Abram from Haran to Canaan is then narrated (comp. Acts vii. 4), his age being stated to have been at that time 75 years (xii. 1-5). Usher therefore conjectures that Terah was 130 years old at Abram's birth (205 - 75 = 130), and supposed the latter not to have been the eldest son but mentioned first on account of his eminence, as is Shem in several places (v. 32, vi. 10, vii. 13, ix. 18, x. 1), who yet appears to have been the third son of Noah and certainly not the eldest (x. 21, and arrangement of chap.). There is, however, a serious objection in the way of this supposition. It seems scarcely probable that if Abram had been born to his father at the age of 130 years, he should have asked in wonder "Shall [a child] be born unto him that is an hundred years old? and shall Sarah, that is ninety years old, bear?" (Gen. xvii. 17.) Thus to suit a single number, that of Terah's age at his death, where the Sam. does not agree with the Heb. and LXX., a hypothesis is adopted that at least strains the consistency of the narrative. We should rather suppose the number might have een changed by a copyist, and take the 145 years of the Sam. - It has been generally supposed that the Dispersion took place in the days of Peleg, on account of what is said in Gen. x. as to him: [of the two sons of Eber] "the name of one [was] Peleg (), division), for in his days was the

arth divided " ((7), 25), 25). It cannot be positively affirmed that the "Dispersion" spoken of in Gen. xi. is here meant, since a physical catastrophe might be intended, although the former is perhaps "he more natural inference. The event, whatever the more natural inference. The event, whatever than, as some have supposed, at a later time in his ifs, for the easterns have always given names to shildren at birth, as may be noticed in the cases of Jecob and his scos. — We should therefore con-

LXX. version was made? This appears to be a sider the following as the best forms of the manhers account of the in according to the three sources.

Creation	LXX. 0	Heb. 0	Sem.		
Creation	401 616 5279	1636 101 205 2038	401 616 9894		

B. Second Period, from Abram's departure from Haran to the Exodus. — The length of this period is stated by St. Paul as 430 years from the promise to Abraham to the giving of the Law (Gal. iii. 17), the first event being held to be that recorded in Gen. xii. 1-5. The same number of years is given in Ex., where the Hebrew reads - " Now the sojourning of the children of Israel who dwelt in Egypt [was] four hundred and thirty years. And it came to pass at the end of the four hundred and thirty years, even the selfsame day it came to pass. that all the hosts of the Lord went out from the land of Egypt" (xii. 40, 41). Here the LXX. and Sam. add after "in Egypt" the words "and in Canaan," while the Alex. and other MSS. of the former also add after "the children of Israel" the words "and their fathers." It seems most reasonable to regard both these additions as glosses; if they are excluded, the passage appears to make the duration of the sojourn in Egypt 430 years, but this is not an absolutely certain conclusion. The "sojourning" might well include the period after the promise to Abraham while that patriarch and his descendants "sojourned in the land of promise as [in] a strange country" (Heb. xi. 9), for it is not positively said "the sojourning of the children of Israel in Egypt," but we may read "who dwelt in Egypt." As for the very day of close being that of commencement, it might refer either to Abraham's entrance, or to the time of the promise. A third passage, occurring in the same essential form in both Testaments, and therefore especially satisfactory as to its textual accuracy, throws light upon the explanation we have offered of this last, since it is impossible to understand it except upon analogical principles. It is the divine declaration to Abraham of the future history of his children: "Know of a surety that thy seed shall be a stranger in a land [that is] not theirs, and shall serve them; and they shall afflict them four hundred years; and also that nation whom they shall serve, will I judge; and afterward shall they come out with great substance" (Gen. xv. 13, 14; comp. Acts vii. 6, 7). The four hundred years cannot he held to be the period of oppression without a denial of the historical character of the narrative of that time, but can only be supposed to mean the time from this declaration to the Exodus. This reading, which in the A. V. requires no more than a slight change in the punctuation, if it suppose an unusual construction in Hel rew, is perfectly admissible according to the principles of Semitic grammar, and might be used in Arabic. It is also noticeable that after the citation given above, the events of the whole sojourn are repeated, showing that this was the period spoken of, and perhaps, therefore, the period defined (15, 16). The meaning of the "fourth generation" here mentioned has been previously considered. It cannot, there-fore, be held that the statement of St. Paul the from the promise to Abraham until the Exodus was 430 years is irreconcilable with the two other

Digitized by Google

as certain a conclusion as may be attainable, we had the good fortune to discover some independen must examine the evidence we have for the details of this interval. First, however, it will be necessary to form a distinct opinion as to the length of life of the patriarchs of this age. The Biblical narrative plainly ascribes to them lives far longer than what is held to be the present extreme limit, and we must therefore carefully consider the evidence upon which the general correctness of the numbers rests, and any independent evidence as to the length of life at this time. The statements in the Bible regarding longevity may be separated into two classes, those given in genealogical lists, and those interwoven with the relation of events. То the former class virtually belong all the statements relating to the longevity of the patriarchs before Abraham, to the latter nearly all relating to that of Abraham and his descendants. In the case of the one we cannot arrive at certainty as to the original form of the text, as already shown, but the other rests upon a very different kind of evidence. The statements as to the length of the lives of Abraham and his nearer descendants, and some of his later, are so closely interwoven with the historical narrative, not alone in form, but in sense, that their general truth and its cannot be separated. Abraham's age at the birth of Isaac is a great fact in his history, equally attested in the Old Testament and in the New. Again, the longevity ascribed to Jacob is confirmed by the question of Pharaoh, and the patriarch's remarkable answer, in which he makes his then age of 130 years less than the years of his ancestors (Gen. xlvii. 9), a minute point of agreement with the other chronological statements to be especially noted. At a later time the age of Moses is attested by various statements in 'he Pentateuch, and in the N. T. on St. Stephen's authority, though it is to be observed that the mention of his having retained his strength to the end of his 120 years (Deut. xxxiv. 7), is perhaps indicative of an unusual longevity. In the earlier part of the period following, we notice similar instances in the case of Joshua, and, inferentially, in that of Othniel. Nothing in the Bible could be cited against this evidence, except it be the common explanation of Ps. xc. (esp. ver. 10) combined with its ascription to Moses (title). The title cannot, analogically, be considered a very sure guide, but the style and contents seem to us to support it. It may be questioned, however, whether the general shortness of man's life forms the subject of this psalm. A shortness of life is lamented as the result of God's anger, the people are described as under his wrath, and prayer is made for a happier condition. Nothing could be more applicable to the shortening of life in the desert in order that none who were twenty years old and upwards at the Exodus should enter the Land of Promise. With these the ordinary term of life would be threescore years and ten, or fourscore years. If, therefore, we ascribe the psalm to Moses, we cannot be certain that it gives the average of long life at his time independently of the peculiar circumstances of the wandering in the desert. Thus it is evident that the two classes of statements in the Bible bearing on longevity stand upon a very different basis. It must be observed that all the supposed famous modern instances of great longevity, as those of Parr, Jackson, and the old Countess of Desmond neve utterly broken down on examination, and that the registers of this country prove no greater extreme than about 110 years We have recently 1; as 25, and makes the sum of this interval from the

contemporary evidence bearing upon this matter. There is an Egyptian hieratic papyrus in the Bibliothèque at Paris bearing a moral discourse by one Ptah-hotp, apparently eldest son of Assa (B. C. cir. 1910-1860), the fifth king of the Fifteenth Dynasty, which was of Shepherds [EGY17]. At the conclusion Ptah-hotp thus spenas of himself : "I have become an elder on the earth (or in the land); I have traversed a hundred and ten years of life by the gift of the king and the approval of the eldera, fulfilling my duty towards the king in the place of favor (or blossing)." (*Facsimile d'un Papyrus Egyptien*, par E. Prisse d'Avennes, pl. xix., lines 7, 8). The natural inferences from this passage are that Ptah-hotp wrote in the full possession of his mental faculties at the age of 110 years, and that his father was still reigning at the time, and, therefore, had attained the age of about 130 years, or more. The analogy of all other documents of the kind known to us does not permit a different conclusion. That Ptah-hotp was the son of Assa is probable from inscriptions in tombs at Memphis; that he was a king's eldest son is expressly stated by himself (Facsimile, &c., pl. v., lines 6, 7). Yet he had not succeeded his father at the time of his writing, nor does he mention that sovereign as dead. The reigns assigned by Manetho to the Shepherd-Kings of this dynasty seem indicative of a greater age than that of the Egyptian sovereigns (Cory's Ancient Fragments, 2d ed., pp. 114, 136). It has been suggested to us by Mr. Goodwin that 110 years may be a vague term, meaning "a very long life; " it seems to be so used in papyri of a later time (B. C. cir. 1200). We rarely thus employ the term centenarian, more commonly employing sexagenarian and octogenarian, and this term is therefore indicative of a greater longevity than ours among the Egyptians. If the 110 years of Ptah-hotp be vague, we must still suppose him to have attained to an extreme old age during his father's lifetime, so that we can scarcely reduce the numbers 110 and about 130 more than ten years respectively. This Egyptian document is of the time of the Fifteenth Dynasty, and of so realistic and circumstantial a character in its historical bearings that the facts it states admit of no dispute. Other records tend to confirm the inferences we have here drawn. It seems, however, probable that such instances of longevity were exceptional, and perhaps more usual among the foreign settlers in Egypt than the natives, and we have no ground for considering that the rength of generations was then generally different from what it now is. For these reasons we find no difficulty in accepting the state. ments as to the longevity of Abraham and certain of his descendants, and can go on to examine the details of the period under consideration as made out from evidence requiring this admission. The narrative affords the following data which we place under two periods - (1) that from Abram's leaving Haran to Jacob's entering Egypt; and (2) that from Jacob's entering Egypt to the Exodus.

1. Age of Abram on leaving Haran 75 YES - at Issac's birth . 100 Age of Isaac at Jacob's birth . Age of Jacob on entering Egypt . 180

These data make up about 387 or 388 years, to which it is reasonable to make some addition, since it appears that all Joseph's generation died before the oppression commenced, and it is probable that it had begun some time before the birth of Moses. The sum we thus obtain cannot be far different from 430 years, a period for the whole sojourn that these data must thus be held to confirm. The genealogies relating to the time of the dwelling in Egypt, if continuous, which there is much reason to suppose some to be, are not repugnant to this scheme; but on the other hand, one alone of them, that of Joshua, in 1 Chr. (vii. 23, 25, 26, 27) if a succession, can be reconciled with the opinion that lates the 430 years from Jacob's entering into Fgypt. The historical evidence should be carefully weighed. Its chief point is the increase of the Is raelites from the few souls who went with Jacob into Egypt, and Joseph and his sons, to the six hundred thousand men who came out at the Exodus. At the former date the following are enumerated — " besides Jacob's sons' wives," Jacob, his twelve sons and one daughter (13), his fifty-one grandsons and one granddaughter (52), and his four great-grandsons, making, with the patriarch himself, seventy souls (Gen. xlvi. 8-27). The genhimself, seventy souls (Gen. xlvi. 8-27). eration to which children would be born about this date may thus be held to have been of at least 51 pairs.a since all are males except one, who most probably married a cousin. This computation takes no account of polygamy, which was certainly practised at the time by the Hebrews. This first generation must, except there were at the time other female grandchildren of Jacob besides the one mentioned (comp. Gen. xlvi. 7), have taken foreign wives, and it is reasonable to suppose the same to have been constantly done afterwards, though probably in a less degree. We cannot therefore found our calculation solely on these 51 pairs, but must allow for polygamy and foreign marriages. These admissions being made, and the especial blessing which attended the people borne in mind, the inserval of about 215 years does not seem too short for the increase. On the whole, we have no hesitation in accepting the 430 years as the length of the interval from Abram's leaving Haran to the Sto ins.

C. Third Period, from the Exodus to the Founstation of Solomon's Temple. — There is but one passage from which we obtain the length of this period as a whole. It is that in which the Foundation of the Temple is dated in the 480th (Heb.), or 440th (LXX.) year after the Exodus, in the 4th yr. 2d m. of Solomon's reign (1 K. vi. 1). Subtracting

sumbers 215 (Egypt's Place, i. 180). This is inaccuute, since if 75 = 1, then 100 = 26, and the interval s 216.

"Bunsen ridicules Dr. Baumgarten of Kiel for supposing a residue of 56 pairs from 70 sonis. "This re- only three wives to 67 men.

CHRONOLOGY

i from 480 or 440 yrs. the first three yrs. of Sole and the 40 of David, we obtain (480 - 48 =) 487 or (440 - 43 =) 397 yrs. These results we have first to compare with the detached numbers. These are as follows: -- (a.) From Exodus to death of Moses, 40 yrs. (b.) Leadership of Joshus, 7 + 2yrs. (c.) Interval between Joshua's death and the First Servitude x yrs. (d.) Servitudes and rule of Judges until Eli's death, 430 yrs. (e.) Period from Eli's death to Saul's accession, 20 + x yrs. (f.) Saul's reign, 40 yrs. (g.) David's reign, 40 yrs. (k.) Solomon's reign to Foundation of Temple, 3 yrs. Sum, 8x + 580 yrs. It is possible to obtain approximatively the length of the three wanting numbers. Joshua's age at the Exodus was 20 or 20 + x yrs. (Num. xiv. 29, 30), and at his death, 110: therefore the utmost length of his rule must be (110 - 20 + 40 =) 50 yrs. After Joshus there is the time of the Elders who overlived him, then a period of disobedience and idolatry, a servitude of 8 yrs., deliverance by Othniel the son of Kenaz the nephew of Caleb, and rest for 40 yrs. until Othniel's death. The duration of Joshua's government is limited by the circumstance that Caleb's lot was apportioned to him in the 7th year of the occupation, and therefore of Joshua's rule, when he was 85 yrs. old, and that he conquered the lot after Joshua's death. Caleb cannot be supposed to have been a very old man on taking his portion, and it is unlikely that he would have waited long before attacking the heathen who held it, to say nothing of the portion being his claimed reward for not having feared the Anakim who dwelt there, a reward promised him of the Lord by Moses and claimed of Joshua, who alone of his fellow-spies had shown the same faith and courage (Num. xiv. 24; Deut. i. 36; Josh. xiv. 6 ad fin., xv. 13-19; Judg. i. 9-15, 20). If we suppose that Caleb set out to conquer his lot about 7 years after its apportionment, then Joshua's rule would be about 13 yrs., and he would have been a little older than Caleb. The interval between Joshua's death and the First Servitude is limited by the history of Othniel. He was already a warrior when Caleb conquered his lot; he lived to deliver Israel from the Mesopotamian oppressor, and died at the end of the subsequent 40 yrs. of rest. Supposing Othniel to have been 30 yrs. old when Caleb set out, and 110 yrs. at his death, 32 yrs. would remain for the interval in question. The rule of Joshus may be therefore reckoned to have been about 18 yrs., and the subsequent interval to the First Servitude about 32 yrs., altogether 47 yrs. These numbers cannot be considered exact; but they can hardly be far wrong, more especially the sum. The residue of Samuel's judgeship after the 20 yrs. from Eli's death until the solemn fast and victory at Mizpeh, can scarcely have much exceeded 20 yrs. Samuel must have been still young at the time of Eli's death, and he died very near the close of Saul's reign (1 Sam. xxv. 1, xxviii. 8). If he were 10 yrs. old at the former date, and judged for 20 yrs. after the victory at Mizpeh, he would have been near 90 yrs. old (10?+20+20?+38?) at his death, which appears to have been a long period of life at that time. If we thus suppose the three uncertain intervals,

mainder of 56 pair out of 70 souls puts us very nuce, in mind of Falstaff's mode of reckoning." (Kyypt's Place, i. 178). Had the critic read Gen. xivi. he would not have made this extraordinary mistake, and allowed only three wives to 67 men.

Digitized by Google

e residue of Joshus's rule, the time after his reached a period in which the differences of chrodeath to the First Servitude, and Sau lea's rule after the victory at Mizpeh to have been respectively 8, 32, and 20 yrs., the sum of the whole period will be (580 + 58 =) 638 yrs. Two independent large numbers seem to confirm this result. One is in St. Paul's address at Antioch of Pisidia, where, after speaking of the Exodus and the 40 yrs. in the desert, he adds: "And when he had destroyed seven nations in the land of Chanaan, he divided their land unto them by lot. And after that he gave [unto them] judges about the space of four hundred and fifty years, until Samuel the prophet. And afterward they desired a king" (Acts xiii. 19, 20, 21). This interval of 450 yrs. may be variously explained, as commencing with Othniel's deliverance and ending with Eli's death, a period which the numbers of the earlier books of the Bible, if added together, make 422 yrs., or as commencing with the First Servitude, 8 yrs. more, 430 yrs., or with Joshua's death, which would raise these numbers by about 30 yrs., or again it may be held to end at Saul's accession, which would raise the numbers given respectively by about 40 yrs. However explained, this sum of 450 yrs. supports the authority of the smaller numbers as forming an essentially correct measure of the period. The other large number occurs in Jephthah's message to the king of the Children of Ammon, where the period during which Israel had held the land of the Amorites from the first conquest either up to the beginning of the Servitude from which they were about to be freed, or up to the very time, is given as 300 yrs. (Judg. xi. 26). The smaller numbers, with the addition of 38 yrs. for two uncertain periods, would make these intervals respectively 346 and 364 VTS. Here, therefore, there appears to be another agreement with the smaller numbers, although it does not amount to a positive agreement, since the meaning might be either three centuries, as a vague sum, or about 300 yrs. So far as the evidence of the numbers goes, we must decide in favor of the longer interval from the Exodus to the building of the First Temple, in preference to the period of 480 or 440 yrs. The evidence of the genealogies has been held by some to sustain a different conclusion. These lists, as they now stand, would, if of continuous generations, be decidedly in favor of an interval of about 300, 400, or even 500 years, some being much shorter than others. It is, however, impossible to reduce them to consistency with each sther without arbitrarily altering some, and the result with those who have followed them as the safest guides has been the adoption of the shortest of the numbers just given, about 300 yrs.ª The evidence of the genealogies may therefore be considered as probably leading to the rejection of all numerical statements, but as perhaps less inconsisten: with that of 480 or 440 yrs. than with the rest. We have already shown (Technical Chrovology) what strong reasons there are against using the llebrew genealogies to measure time. We preber to hold to the evidence of the numbers, and to ske as the most satisfactory the interval of about 138 yrs. from the Exodus to the Foundation of tolomon's Temple.

D. Fourth Period, from the Foundation of Solsmon's Temple to its Destruction. - We have now

CHRONOLOGY

nologers are no longer to be measured by centuries but by tens of years and even single years, and towards the close of which accuracy is attainable The most important numbers in the Bible are generally stated more than once, and several means are afforded by which their accuracy can be tested. The principal of these tests are the statements of kings' ages at their accessions, the double dating of the accessions of kings of Judah in the reigns of kings of Israel and the converse, and the double reckoning by the years of kings of Judah and of Nebuchadnezzar. Of these tests the most valuable is the second, which extends through the greater part of the period under consideration, and prevents our making any very serious error in computing its length. The mentions of kings of Egypt and Assyria contemporary with Hebrew sovereigns are also of importance, and are likely to be more so, when, as we may expect, the chronological places of all these contemporaries are more nearly determined. All records therefore tending to fix the chronologies of Egypt and Assyria, as well as of Babylonia, are of great value from their bearing on Hebrew chro nology. At present the most important of such records is Ptolemy's Canon, from which no sound chronologer will venture to deviate. If all the Biblical evidence is carefully collected and compared, it will be found that some small and great inconsistencies necessitate certain changes of the numbers. The amount of the former class has, however been much exaggerated, since several supposed inconsistencies depend upon the non-recognition of the mode of reckoning regnal years, from the commencement of the year and not from the day of the king's accession. The greater difficulties and some of the smaller cannot be resolved without the supposition that numbers have been altered by copyists. In these cases our only resource is to propose an emendation. We must never take refuge in the idea of an interregnum, since it is a much more violent hypothesis, considering the facts of the history, than the conjectural change of a number. Two interregnums have however been supposed, one of 11 yrs. between Jeroboam II. and Zachariah. and the other, of 9 yrs. between Pekah and Hoshea The former supposition might seem to receive some support from the words of the prophet Hos-m (x. 3, 7, and perhaps 15), which, however, may as well imply a lax government, and the great power of the Israelite princes and captains, as an absolute anarchy, and we must remember the improbability of a powerful sovereign not having been at once succeeded by his son, and of the people having been content to remain for some years without a king. It is still more unlikely that in Hoshea's case king's murderer should have been able to take his place after an interval of 9 yrs. We prefer in both cases to suppose a longer reign of the earlier of the two kings between whom the interregnums are con jectured. With the exception of these two inter regnums, we would accept the computation of the interval we are now considering given in the margin of the A. V. It must be added, that the date of the conclusion of this period there given B. C. 588 must be carrected to 586. The received chronology as to its intervals cannot indeed be held to be beyond question in the time before Josiah's acces

comp. 83-88) to be that of Saul the king of Isravi, as almost unaccountable mistake.

[·] B.th Bunsen (Egyp''s Place, i. 176-77) and Lepsius chron. d. Hg. 1. 889) suppose the genesiogy of thank the son of Uzziah the Levite (1 Chr. vi. 22-34.

skin up to the Foundation of the Temple, but we sannot at present attain any better positive result than that we have accepted. The whole period may therefore be held to be of about 425 yrs., that of the undivided kingdom 120 yrs., that of the kingdom of Judah about 388 yrs., and that of the kingdom of Israel about 255 yrs. It is scarcely possible that these numbers can be more than a very few years wrong, if at all. (For a fuller treatment of the chronology of the kings, see ISBAEL, KINGDOM OF, and JUDAH, KINGDOM OF.)

E. Fifth Period, from the Destruction of Solomon's Temple to the Return from the Babylonish Captivity. - The determination of the length of this period depends upon the date of the return to Palestine The decree of Cyrus leading to that event was made in the 1st year of his reign, doubtless at Babylon (Ezr. i. 1), B. C. 538, but it does not seem certain that the Jews at once returned. So great a migration must have occupied much time, and about two or three yrs. would not seem too long .un interval for its complete accomplishment after the promulgation of the decree. Two numbers, held by some to be identical, must here be considered. One is the period of 70 yrs., during which the tyranny of Babylon over Palestine and the East generally was to last, prophesied by Jeremiah (xxv.), and the other, the 70 yrs. Captivity (xxix. 10; 2 Chr. xxxvi. 21; Dan. ix. 2). The commencement of the former period is plainly the 1st year of Nebuchadnezzar and 4th of Jehoiakim (Jer. xxv. 1), when the successes of the king of Babylon began (xlvi. 2), and the miseries of Jerusalem (xxv. 29)," and the conclusion, the fall of Babylon (ver. 26). Ptolemy's Canon counts from the accession of Nebuchadnezzar to that of Cyrus 66 yrs., a number sufficiently near to the round sum of 70, which may indeed, if the yrs. be of 360 days (Year) represent at the utmost no more than about 69 tropical years. The famous 70 years of captivity would seem to be the same period as this, since it was to terminate with the return of the captives (Jer. xxix. 10). The two passages in Zech., which speak of such an interval as one of desolation (i. 12), and during which fasts connected with the last captivity had been kept (vii. 5), are not irreconcilable with this explanation: a famous past period might be spoken of, as the moderns speak of the Thirty Years' War. These two passages are, it must be noticed, of different dates, the first of the 2d year of Darius Hystaspis, the second of the 4th year. — This period we consider to be of 48 + xyrs., the doubtful number being the time of the reign of Cyrus before the return to Jerusalem, probably a space of about two or three years.

Principal Systems of Biblical Chronology. — Upon the data we have considered three principal systems of Biblical Chronology have been founded, which may be termed the Long System, the Short, such the Rabbinical. There is a fourth, which, although an offshoot in part of the last, can scarcely

but repugnant to the Bible: this last is at present peculiar to Baron Bunsen. Before noticing thest systems it is desirable to point out some characteristics of those who have supported them, which may serve to aid our judgment in seeing how far they are trustworthy guides. All, or almost all have erred on the side of claiming for their results a greater accuracy than the nature of the evidence upon which they rested rendered possible. Another failing of these chronologers is a tendency to accept, through a kind of false analogy, long or short numbers and computations for intervals, rather according as they have adopted the long or the short reckoning of the patriarchal genealogies than on a consideration of special evidence. It is as though they were resolved to make the sum as great or as small as possible. The Rabbins have in their chronology afforded the strongest example of this error, having so shortened the intervals as even egre giously to throw out the dates of the time of the Persian rule. The German school is here an exception, for it has generally fallen into an opposite extreme and required a far greater time than any derivable from the Biblical numbers for the earlier ages, while taking the Rabbinical date of the Exodus, and so has put two portions of its chronology in violent contrast. We do not lay much stress upon the opinions of the early Christian writers, or even Josephus: their method was uncritical, and they accepted the numbers best known to them without any feeling of doubt. We shall therefore confine ourselves to the moderns.

The principal advocates of the Long Chronology are Jackson, Hales, and Des-Vignoles. They take the LXX. for the patriarchal generations, and adopt the long interval from the Exodus to the Foundation of Solomon's Temple. The Short Chronology has had a multitude of illustrious supporters owing to its having been from Jerome's time the recognized system of the West. Ussher may be conaidered as its most able advocate. He follows the Hebrew in the patriarchal generations, and takes the 480 years from the Exodus to the Foundation of Solomon's Temple. The Rabbinical Chronology has lately come into much notice from its partial reception, chiefly by the German school. It accepts the Biblical numbers, but makes the most arbitrary corrections. For the date of the Exodus it has been virtually accepted by Bunsen, Lepsius, and Lord A. Hervey. The system of Bunsen we have been compelled to constitute a fourth class of itself. For the time before the Exodus he discards all Biblical chronological data, and reasons altogether, as it appears to us, on philological considerations. The following table exhibits the principal dates according to five writers.

The principal disagreements of these chronologers, besides those already indicated, must be noticed. In the post-diluvian period Hales rejects the

³⁷th year of Jehoiachin's captivity, 12m. 25d. (Jer.), or 27. (2 K.), failing according to the rendering of the A. V. in the 1st year of Evil-Merodach (Jer. iii. 31; 2 K. xxv. 27). may be explained, as Dr. Hincks suggests, either by supporing the Heb., "in the year when he was king," to mean that he reigned but one year instead of two, as in the canon, or that Evil-Merodach is not the lluarodamus of the canon (Journ. Sor I iv Oct. 1868).

u in the book of Daniel (i. 1) the 3d year of teholskim is given instead of the 4th, which may be seconnted for by the circumstance that the Babylonian year commenced earlier than the Hebrew, so that Nebuchadnessar's lat would commence in Jenolakim's 3d, and be current in his 4th. In other books of the Bible the years of Babylonian kings seem to be generally Hebrew current years. Two other difficulties may ye noticed. The 18th year of Nebuchadnessar in Jer. **31. 39** seems to be for the 19th. The difficulty of the

second Cainan and reckons Terah's age at Abram's birth 130 instead of 70 years; Jackson accepts the second Cainan and does not make any change in the second case; Ussher and Petavius follow the Hebrew, but the former alters the generation of Terah, while the latter does not. Bunsen requires " for the Noachian period about ten millennia before our era. and for the beginning of our race another ten thousand years, or very little more " (Outlines, vol. ii. p. 12). These conclusions necessitate the abandon ment of all belief in the historical character of the Biblical account of the times before Abraham. We cannot here discuss the grounds upon which they seem to be founded: it may be stated, however, that those grounds may be considered to be wholly philological. The writer does indeed speak of "facts and traditions:" his facts, however, as far as we can perceive, are the results of a theory of language, and tradition is, from its nature, no guide in chronology. How far language can be taken as a guide is a very hard question. It is, however, certain that no Semitic scholar has accepted Bunsen's theory. For the time from the Exodus to the Foundation of Solomon's Temple, Ussher alone takes the 480 years; the rest, except Bunsen, adopt longer periods according to their explanations of the other numbers of this interval; but Bunsen calculates by generations. We have already seen the great risk that is run in adopting Hebrew genealogies for the measure of time, both generally and in this case. The period of the kings, from the foundation of Solomon's Temple, 's very nearly the same in the computations of Jackson, Ussher, and Petavius: Hales lengthens it by supposing an interregnum of 11 years after the ath of Amaziah; Bunsen shortens it by reducing the reign of Manasseh from 55 to 45 years. The former theory is improbable and uncritical; the fatter is merely the result of a supposed necessity, which we shall see has not been proved to exist; it a thus needless, and in its form as uncritical as the sther.

Probable determination of dates and intervals. — Having thus gone over the Biblical data, it only remains for us to state what we believe to be the most satisfactory scheme of chronology, derived from a comparison of these with foreign data. We shall endeavor to establish on independent evidence, either exactly or approximatively, certain main dates, and shall be content if the numbers we have previously obtained for the intervals between them do not greatly disagree with those thus wiftrded.

1. Date of the Destruction of Solomon's Temple. - The Temple was destroyed in the 19th year of Nebuchadnezzar, in the 5th month of the Jewish year (Jer. Ili. 19, 13; 2 K. xxv. 8, 9). In Ptol way's Canon, this year is current in the proleptic by the formation of the second seco

2. Synchronism of Josiah and Pharaoh Necho. The death of Josiah can be clearly shown on Biblical evidence to have taken place in the 22d year before that in which the Temple was destroyed, that is, in the Jewish year from the spring of B. C. 608 to the spring of 607. Necho's 1st year is proved by the Anis-tablets to have been most probably the Egyptian vague year, Jan. B. C. 609-8, but possibly B. C. 610-9. The expedition in opposing which Josiah fell, cannot be reasonably dated earlier than Necho's 2d year, B. C. 609-8 or 608-7. It is important to notice that no earlier date of the destruction of the Temple than B. C. 586 can be reconciled with the chronology of Necho's reign. We have thus B. C. 608-7 for the last year of Josiah, and 638-7 for that of his accession, the former date falling within the time indicated by the chronology of Necho's reign.

3. Synchronism of Hezekiah and Tirhakah. -Tirhakah is mentioned as an opponent of Sennacherib shortly before the miraculous destruction of his army in, according to the present text, the 14th year of Hezekiah. It has been lately proved from the Apis-tablets that the 1st year of Tirhakah's reign over Egypt was the vague year current in B. c. 689. The 14th year of Hezekiah, according to the received chronology, is B. C. 713, and, if we correct it two years on account of the lowering of the date of the destruction of the Temple, B. C. 711. If (Rawlinson's Herod. vol. i. p. 479, n. 1) we hold that the expedition dated in Hezekiah's 14th year was different from that which ended in the destruction of the Assyrian army, we must still place the latter event before B. C. 695. There is, therefore, a prima facie discrepancy of at least 6 years. Bunsen (Bibelwerk, i. p. cccvi.) unhesitatingly reduces the reign of Manasseh from 55 to 45 years. Lepsius (Königsbuch, p. 104) more critically takes the 35 years of the LXX. as the true duration. Were an alteration demanded, it would seem best to make Manasseh's computation of his reign commence with his father's illness in prefer. ence to taking the conjectural number 45 or the very short one 35. The evidence of the chronology of the Assyrian and Babylonian kings is, how ever, we think, conclusive in favor of the sum of 55. In the Bible we are told that Shalmaneser laid siege to Samaria in the 4th year of Hezekiah, and that it was taken in the 6th year of that king (2 K. xviii. 9, 10). The Assyrian inscriptions indicate the taking of the city by Sargon in his 1st or 2d year, whence we must suppose either that he completed the enterprise of Shalmaneser, to whom the capture is not expressly ascribed in the Scriptures, or that he took the credit of an event which happened just before his accession. The 1st year of Sargon 's shown by the inscriptions to have been exactly Jace Hezekiah's accession B. C. 726, 725, or 794.

give Again, Merodach-Baladan sent messengers to Hezekiah immediately after his sickness, and herefore in about his 15th year, B. C. 710. According to Ptolemy's Canon, Mardocempadus reigned 721-710, and, according to Berosus, seized the regal power for 6 months before Elibus, the Belibus of the Canon, and therefore in about 703, this being, no doubt, a second reign. Here the preponderance of evidence is in favor of the earlier dates of Hezekiah. Thus far the chronological data of Egypt and Assyria appear to clash in s manner that seems at first sight to present a hopeless knot, but not on this account to be rashly cut. An examination of the facts of the history has afforded Dr. Hincks what we believe to be the true explanation. Tirhakah, he observes, is not explicitly termed Pharaoh or king of Egypt in the Bible, but king of ('ush or Ethiopia, from which it might be inferred that at the time of Sennachsrib's disastrous invasion he had not assumed the srown of Egypt. The Assyrian inscriptions of Sennacherib mention kings of Egypt and a contemporary king of Ethiopia in alliance with them. The history of Egypt at the time, obtained by a comparison of the evidence of Herodotus and others with that of Manetho's lists, would lead to the same or a similar conclusion, which appears to be remarkably confirmed by the prophecies of Isaiah. We hold, therefore, as most probable, that at the time of Sennacherib's disastrous expedition, Tirhakah was king of Ethiopia in alliance with the king or kings of Egypt. It only remains to ascertain what evidence there is for the date of this expedition. First, it must be noted that the warlike operations of Sennacherib recorded in the Bible have been conjectured, as already mentioned, to be those of two expeditions. The fine paid by Hezekiah is recorded in the inscriptions as a result of an expedition of Sennacherib's 3d year, which, by a comparison of Ptolenty's Canon with Berosus, must be dated B. C. 700, which would fall so near the close of the reign of the king of Judah, if no alteration be made, that the supposed second expedition, of which there would naturally be no coord in the Assyrian annals on account of its calamitous end, could not be placed much later. The Biblical account would, however, be most reasonably explained by the supposition that the two expeditions were but two campaigns of the same war, a war but temporarily interrupted by Hezekiah's submission. Since the first expedition fell in B. C. 700, we have not to suppose that the reign of Tirhakah in Ethiopia commenced more than 11 years at the utmost before his accession in Egypt, a supposition vhich, on the whole, is far preferable to the dis-eign of Hezekiah. This would. bowever, necessitate a substitution of a later date in the place of the 14th year of Hezekiah for the first expedition. (See especially Dr. Hincks's paper "On the Rectifications of Sacred and Profane Chronology, which the newly-discovered Apis-steles render necessary. in the Journal of Sacred Literature, Oct. 1858; and Rawlinson's Herod. i. 478-480). The synshronisms of Hoshea and Shalmaneser, Pekah and Figlath-Pileser, Menahem and Pul, have not yet been approximatively determined on double evidence

4. Synchronism of Rehoboam and Shishak. - The Biblical evidence for this synchronism is as follows: vague year commencing about the autumnal equi-

CHRONOLOGY

the 3d leing the very date the Hebrew numbers | about 249 years before the accession of Heaskinh and therefore B. C. cir. 973. The invasion of Shi shak took place in his 5th year, by this computation, 969. Shishak was already on the throne when Jeroboum fled to him from Solomon. This event happened during the building of Millo, &c. when Jeroboam was head of the workmen of the house of Joseph (1 K. xi. 26-40, see esp. ver. 29). The building of Millo and repairing of the breaches of the city of David was after the building of the house of Pharaoh's daughter, that was constructed about the same time as Solomon's house, the completion of which is dated in his 23d year (1 K. vi. 1, 37, 38, vii. 1; 2 Chr. viii. 1). This building is recorded after the occurrences of the 24th year of Solomon, for Pharaoh's daughter remained in Jerusalem until the king had ended building his own house, and the temple, and the wall of Jerusalem round about (1 K. iii. 1), and Millo was built after the removal of the queen (ix. 24); therefore, as Jeroboam was concerned in this building of Millo and repairing the breaches, and was met "at that time" (xi. 29) by Ahijah, and in consequence had to flee from the country, the 24th or 25th year is the most probable date. Thus Shishak appears to have come to the throne at least 21 or 22 years before his expedition against Rehoboam. An inscription at the quarries of Silsilis in Upper Egypt records the cutting of stone in the 22d year of Sheshonk I., or Shishak, for constructions in the chief temple of Thebes, where we now find a record of his conquest of Judah (Champollion, Lettres, pp. 190, 191). On these grounds we may place the accession of Shishak B. C. cir. 990. The evidence of Manetho's lists, compared with the monuments, would place this event within a few years of this date, for they do not allow us to put it much before or after 3. C. 1000, an approach to correctness which at this period is very valuable. It is not possible here to discuss this evidence in detail.

5. Exotus. — Arguments founded on independent evidence afford the best means of deciding which is the most probable computation from Biblical evidence of the date of the Exodus. A comparison of the Hebrew calendar with the Egyptian has led the writer to the following result: The civil commencement of the Hebrew year was with the new moon nearest to the autumnal equinox; and at the approximative date of the Exolus obtained by the long reckoning, we find that the Egyptian vague vear commenced at or about that point of time. This approximative date, therefore, falls about the time at which the vague year and the Hebrew year, as dated from the autumnal equinox, nearly or exactly coincided in their commencements. It may be reasonably supposed that the Israelites in the time of the oppression had made use of the vague year as the common year of the country, which indeed is rendered highly probable by the circumstance that they had mostly adopted the Egyptian religion (Josh. xxiv. 14; Ez. xx. 7, 8), the celebrations of which were kept according to this year. When, therefore, the festivals of the Law rendered a year virtually tropical necessary, of the kind either restored or instituted at the Exodus, it seems most probable that the current vague year was fixed uder Moses. If this supposition be correct, we should expect to find that the 14th day of Abih, on which fell the full moon of the Passover of the Exocus corresponded to the 14th day of a Phamenoth, in a Rehobeam appears to have come to the throne nox. It has been ascertained by computation that

a full moon fell on the 14th day of Phamenoth, on Thursday, April 21st, in the year B. C. 1652.ª A full moon would not fall on the same day of the vague year at a shorter interval than 25 years before or after this date, while the triple coincidence of the new moon, vague year, and autumnal equinox could not report in less than 1500 vague years (Enc. Brit. 8th ed. Egypt, p. 458). The date thus obtained is but 4 years earlier than Hales's, and the interval from it to that of the Foundation of Solomon's Temple, B. C. cir. 1010, would be about 642 years, or 4 years in excess of that previously obtained from the numerical statements in the Bible. It must be borne in mind that the inferences from the celebration of great passovers also led us to about the same time. In later articles we shall show the manner in which the history of Egypt agrees with this conclusion. [EGYPT; EXODUS, THR.] Setting aside Ussher's preference for the 480 years, as resting upon evidence far less strong than the longer computation, we must mention the nrincipal reasons urged by Bunsen and Lepsius in support of the Rabbinical date. The reckoning by the genealogies, upon which this date rests, we have already shown to be unsafe. Several points of historical evidence are, however, brought forward by these writers as leading to or confirming this date. Of these the most important is the supposed account of the Exodus given by Manetho, the Egyptian historian, placing the event at about the same time as the Rabbinical date. This narrative, however, is, on the testimony of Josephus, who has preserved it to us, wholly devoid of authority, being, according to Manetho's own showing, a record of uncertain antiquity, and of an unknown writer, and not part of the Egyptian annals. An indication of date has also been supposed in the mention that the name of one of the treasure-cities built for Pharaoh by the Israelites during the oppression was Raamses (Ex. i. 11), probably the same place as the Rameses elsewhere mentioned, the chief town of a tract so called. [RAMESES.] This name is the same as that of certain well-known kings of Egypt of the period to which by this scheme the Exodus would be referred. If the story given by Manetho be founded on a true tradition, the great oppressor would have been Rameses II., second king of the 19th dynasty, whose reign is variously assigned to the 14th and 13th centuries B. C. It is further urged that the first king Rameses of the Egyptian monuments and Manetho's lists is the gnuulfather of this king, Rameses I., who was the last sovereign of the 18th dynasty, and reigned at the utmost about 60 years before his grandson. It must, however, be observed, that there is great reason for taking the lower dates of both kings, which would make the roign of the second after the Rabbinical date of the Exodus, and that in this case both Manetho's statement must be of course set aside, as placing the Exodus in the reign of this king's son, and the order of the Biblical narrative must be transposed that the building of Raamses should not fall before the accession of Rameses I. The argument that there was no king Rameses before Rameses I. is obviously weak as a negative one, more especially as the names of very many

kings of Fgypt, particularly those of the period to which we assign the Exodus, are wanting. It loses almost all its force when we find that a son of Aahmes, Amosis, the head of the 18th dynasty, variously assigned to the 17th and 16th centuries B. C. bore the name of Rameses, which name from its meaning (son of Ra or the sun, the god of Heliopolis, one of the eight great gods of Egypt) would almost necessarily be a not very uncommon one, and Raamses might therefore have been named from an earlier king or prince bearing the name long before Rameses I. The history of Egypt presents great difficulties to the reception of the theory together with the Biblical narrative, difficulties so great that we think they could only be removed by abandoning a belief in the historical character of that narrative: if so, it is obviously futile to found an argument upon a minute point, the occurrence of a single name. The historical difficulties on the Hebrew side in the period after the Exodus are not less serious, and have induced Bunsen to antedate Moses' war beyond Jordan, and to compress Joshua's rule into the 40 years in the wilderness (Bibelwerk, i. pp. ccxxviii.-ix.), and so, we venture to think, to forfeit his right to reason on the details of the narrative relating to the earlier period. This compression arises from the want of space for the Judges. The chronology of events so obtained is also open to the objection brought against the longer schemes, that the Israelites could not have been in Palestine during the campaigns in the East of the Pharaohs of the 18th, 19th, and 20th dynasties, since it does not seem possible to throw those of Rameses III. earlier than Bunsen's date of the beginning of the conquest of western Palestine by the Hebrews. This question, involving that of the policies and relation of Egypt and the Hebrews, will be discussed in later articles. [EGYPT; EXODUS, THE.] We therefore take B. C. 1652 as the most satisfactory date of the Exodus (see Duke of Northumberland's paper in Wilkinson's Anc. Eg. i. 77-81; Bunsen, Bibelwerk, i. pp. cexi.-cexiu., cexxiii. ff.; Lepsius, Chronologie der Ægypter, i. 814 ff.).

6. Dute of the Commencement of the 430 years of Sojourn. — We have already given our reasons for holding the 430 years of Sojourn to have commenced when Abraham entered Palestine, and that it does not seem certain that the Exodus was the anniversary of the day of arrival. It is reasonable, however, to hold that the interval was of 430 complete years or a little more, commencing about the time of the vernal equinox, B. C. 2082, or nearer the beginning of that proleptic Julian year. Before this date we cannot attempt to obtain anything be yond an approximative chronology.

7. Date of the Dispersion. — Taking the LXX. numbers as most probable, the Dispersion, if coincident with the birth of Peleg, must be placed B. C. cir. 2698, or, if we accept Ussher's correction of the age of Terah at the birth of Abraham, cir. 2758.⁵ We do not give round numbers, since doing so might needlessly enlarge the limits of error.

8. Date of the Flood. — The Flood, as ending about 401 years before the birth of Peleg, would be placed B. c. cir. 3099 or 3159. The year preseding, or the 402d, was that mainly occupied by the

sarily imply that he had done more than enter upon his 75th year. (Comp. the case of Noah, vii. 6, 11, 18.) All the dates, therefore, before a. c. 2082, might have to be lowered one year.

a This was calculated for the writer at the Royal Observatory, through the kindness of the Astronomer-Beyal. — Hows Eg. p. 217.
b Abraham is axid to have been 75 years old when

[•] Abraham is said to have been 75 years old when he left Hazan (Ben. xii. 4), but this does not neces-

450 CHRONOLOGY

tastrophe. It is most reasonable to suppose the contrast to the repeated guaranty of the land of Nonchian colonists to have begun to spread about three centuries after the Flood. If the Division at Peleg's birth he really the same as the Dispersion after the building of the Tower, this supposed interval would not be necessarily to be lengthened, for the text of the account of the building of the Tower does not absolutely prove that all Noah's descendants were concerned in it, and therefore some may have previously taken their departure from the primeval settlement. The chronology of Egypt, derived from the monuments and Manetho, is held by some to indicate for the foundation of its first kingdom a much earlier period than would he consistent with this scheme of approximative Biblical dates. The evidence of the monuments, however, does not seem to us to carry back this event earlier than the latter part of the 28th century B. C. The Assyrians and Babylonians have not been proved, on satisfactory grounds, to have reckoned back to so remote a time; but the evidence of their monuments, and the fragments of their history preserved by ancient writers, as in the case of the Egyptians, cannot be reconciled with the short interval preferred by Ussher. As far as we can learn, no independent historical evidence points to an earlier period than the middle of the 29th century B. C. as the time of the foundation of kingdoms, although the chronology of Egypt reaches to about this period, while that of Babylon and other states does not greatly fall short of the same antiquity.

9. Dute of the Creation of Adam. - The numhers given by the LXX. for the antediluvian patriarchs would place the creation of Adam 2262 years before the end of the Flood, or B. C. cir. 5361 or R. S. P. 5421.

* The assignment of only 215 years to the sojourn in Egypt (see No. 6 above) is far from meeting with general acceptance. It has indeed come down from the Septuagint as the traditional theory, but in modern times has been strongly opposed. (If those who dissent from that view are Rosenmüller, Hofmann, Jahn, Ewald, Gesenius, Winer, Tuch, Kurtz, Delitzsch, Keil, Knobel, Kalisch, and many others of similar rank as scholars. On this question the reader may consult especially, Knobel on Ex. xii. 40 (Exeget. Handb. xii. 121), and Kurtz (History of the Old Covenant, ii. 135 ff., Eng. tr.). There are two texts that seem quite distinct and unequivocal. F.x. xii. 40 asserts that the abode in Equpt was 430 years - even though we translate "who abode in Fgypt." And here is found no manuscript variation in the Hebrew text. It is supported by Targum Onkelos, the Syriac, and Vulgate. The Septuagint (Codex Vatican.), however, has introduced the words " and in the land of Canaan," while the Alexandrian Codex adds also, "they and their fathers." This change, though found in the Targum Jonathan and the Samaritan version, at once suggests, by its two-fold explanaion, the suspicion of an artificial emendation to neet a difficulty. That these words, once in the text, should have been omitted, is hardly probable: that they should have crept in to solve various difficulties, is quite natural. Again, Gen. xv. 13 deelares the future servitude and affliction, not of Abraham, but of his "seed" "in a land not theirs," to be "400 years," in round numbers. The suggestion that this was to be partly in Caname, is cut off by the statement that it should be a a land not theirs - one land too - in strong sage Num. xxvi. 59 certainly presents a difficulty

CHRONOLOGY

Canaan (vs. 7, 8, 18) to Abraham and his seed as their own. The inclusion of any part of Abra-ham's own history in this period of servitude and affliction seems forbidden by the positive assurance (ver. 15) that he should go to his grave in peace. and the manifest assignment of this servitude (as Tuch remarks) to the distant future. Besides, Abraham's residence in Egypt had taken place hefore the prophecy was uttered. The statement of Stephen (Acts vii. 6, 7) accords with this interprotation. Paul, however (Gal. iii. 17), reckons 4:) years between the promise to Abraham and the giving of the law; but it is remarked by Kartz Keil, and others, that he simply conforms to the traditional view of the synagogue and the phrase ology of the Septuagint, which alone was in the hands of his Gentile readers, and because the pre cise length of time did not affect his argument It was, on any view, 430 years. (It should be mentioned in passing that Josephus gives 400 years, Ant. ii. 9, §1; B. J. v. 9, §4; and 215 years, Ant. ii. 15, § 2; comp. c. Apion. i. 33.)

It is alleged against the 430 years that the time was but four generations (Gen. xv. 16). But the reply is obvious that verses 13 and 15 cannot conflict, and the generation is therefore "the sum total of the lives of all the men living at the same time " (Ilofmann), or, in the time of the patriarchs, a hundred years (Gesenius). But it is still affirmed that but four generations are commonly mentioned in the genealogy of individuals. To which it is answered, the specification of four main links (per haps in conformity to the very language of prophecy) does not exclude others; and we actually find six generations mentioned from Joseph to Zelophehad (Num. xxvi. 29 ff.), seven from Judah to Bezaleel (1 Chr. ii. 3 ff.), and ten or eleven from Ephraim to Joshua (1 Chr. vii. 22 ff.). And . comparison of the two genealogies of Levi in Ex vi. and 1 Chr. vi., shows that there are names omitted in the former which have been procured from other sources for the latter.

The one real difficulty is found in the parentage of Moses. If Amram his father (Ex. vi. 20) was the same with Amram the grandson of Levi (Ex. vi. 18), and if Jochebed his mother was strictly Levi's daughter (Ex. vi. 20; Num. xxvi. 59), it is a fatal objection. But that Moses' father could not be the tribe or family-father Amram, has been, we think, shown from Num. iii. 27, 28, where it appears that in Moses' time the Amramites, Izeharites, Hebronites, and Uzzielites (the four affiliated branches of Kohath's descendants), numbered 8,600 males. Allowing one-fourth of these to the Amramites would give them over two thousand males; and as Moses had but two sons to be included with himself in this number, it follows that if this Amram, the head of this family, were the father of Moses, then Moses must have had over 2,000 brothers and brothers' sons - the women and girls of the family not being reckoned. The tribe-father must therefore have been a different man from the father of Moses But was Jochebed Levi's daughter? In Ex. ii. 1 she is called "a daughter of Levi;" but the connection admits the same general sense as the phrase "a daughter of Abraham " (Luke xiii. 16). That she was her husband's auni (Ex. vi. 20), even if we interpret the expression rigidly, will decide nothing as to her parentage except in connection with his parentage. The pas

version, "a daughter of Levi, whon one bore [who was born] to him in Egypt." Here the LXX. read thus: Ouydryp Acul, & Freke Tobrous To Acul in Aiyorry, - the robrous evidently referring to Moses, Aaron, and Miriam. One Hebrew

manuscript has a similar reading, D, N instead of

Find, Kurtz does not hesitate, under the circunstances (including this diversity between the Gr. and Heb.), to regard the whole clause after

א בהיקן as a gloss, appended by some one who understood the phrase "daughter of Levi" in a strict sense, and endeavored to soften down the improbability by explaining that the daughter was torn in Egypt. Without going this length, we venture to regard the verse in the original as not absolutely decisive, - although its first aspect seems to be so. But when we consider the vagueness of the expression used; when we remember that Levi must have been at least 135 years old at her birth if Jochebed were his daughter; when we recall the ten or eleven generations from Ephraim to Joshua when we observe the distinctness of the declarations in Ex. xii. 40 and Gen. xv. 13, as to the time spent in Egypt; when we remember the increase from 70 souls to 600,000 fighting men; - we seem to encounter far less difficulty in fixing the time of sojourn in Egypt at 430 than at 215 years.

> CHRYSOLITE (Xpurdhidos: chrysolithus), one of the precious stones in the foundation of the heavenly Jerusalem (Rev. xxi. 20). It has been already stated [BERYL] that the chrysolite of the ancients is identical with the modern Oriental to paz, the tarshish of the Hebrew Bible.ª There is much reason for believing that the topaz is the stone indicated by the xpurchillos of St. John's vision. See BERYL. W. H.

> CHRYSOPRASE (xpusonpass: chrysoprasus) occurs only in Rev. xxi. 20 [in A. V. there "chrysoprasus"], as one of the precious stones mentioned in St. John's vision. The chrysoprase of the ancients b is by some supposed to be identical with the stone now so called, namely, the apple or leek-green variety of agate, which owes its color to oxide of nickel; this stone at present is found only in Silesia; but Mr. King (Antique Gems, p. 59 note) says that the true chrysoprase is sometimes found in antique Egyptian jewelry set alternately with bits of lapis-lazuli; it is not improbable therefore that this is the stone which was the tenth in the walls of the heavenly Jerusalem. W. H.

> * The Anglicized form "chrysoprase" occurs in the margin of Ez. xxvii. 16, and xxviii. 13 (A. V.) where it stands for "agate" and "emerald" in the text, which represent different Hebrew words. See CHALCEDONY. H.

CHUB (27D: Algues: Chub), a word occur ring only once in the Heb., the name of a people in alliance with Egypt in the time of Nebuchadnezzar (Ez. xxx. 5). "Cush, and Phut, and Lud, and all the mingled people $(\supseteq \supseteq \bigtriangledown)$, and Chub, and the children of the land of the covenant, shall fall by the sword with them " (i. e. no doubt the Egyptians: see ver. 4). The first three of these names or designations are of African peoples, unless, but this is improbable, the Shemite Lud be intended by the third (see however, xxvii. 10, xxxviii. 5; Is. lxvi. 19; Jer. xlvi. 9); the fourth is of a people on the Egyptian frontier; and the sixth probably ap plies to the remnant of the Jews who had fled into Egypt (comp. Dan. xi. 28, 30, 32, especially the last, where the covenant is not qualified as " holy "), which was prophesied to perish for the most part by the sword and otherwise in that country (Jer. xlii. 16, 17, 22, xliv. 12, 13, 14, 27, 28). Thia fifth name is therefore that of a country or people in alliance with Egypt, and probably of parthern Africa, or of the lands near Egypt to the south. Some have proposed to recognize Chub in the names of various African places — Ko β h, a port on the Indian Ocean (Ptol. iv. 7, § 10), X $\omega\beta$ $d\pi$ or X $\omega\beta$ $d\theta$ in Mauritania (iv. 2, § 9), and KaBiov or KaBiov in the Marcotic nome in Egypt (iv. 5) - conjectures which are of no value except as showing the existence of similar names where we might expect this to have had its place. Others, however, think

[·] Bpiphanius, in his Twelve Stones of the Rationale has got " Chrysolite, by some called curysophyllus, of s golden solor, and found close to the walls of Baby-" Pliny makes several varieties of this _an ais first is doubtless the Oriental topas. - C W. King.

^b Tha. of Solinus (lv.) exactly agrees with our In dian chrysolite : " Chrysoprasos quoque ex auro el porraceo mixtam lucem trahentes seque berylicrum generi adjudicaverunt."

been therefore proposed to read 270 for Nubia, as the Arab. vers. has "the people the Noobeh," whence it might be supposed that at least one copy of the LXX. had y as the first letter: one Heb.

MS. indeed reads 2122 (Cod. 409, ap. de Rossi). The Arab. vers. is, however, of very slight weight,

and although 2000 might be the ancient Egyptian

form or pronunciation of 213, as Winer observes (s. v.), yet we have no authority of this kind for applying it to Nubia, or rather the Nubæ, the countries held by whom from Strabo's time to our own are by the Egyptian inscriptions included in Keesh or Kesh, that is, Cush: the Nubee, however, may not in the prophet's days have been settled in any part of the territory which has taken from them its name. Far better, on the score of probability,

is the emendation which Hitzig proposes, 27 (Begriff der Kritik, p. 129). The Lubim, doubtless the Mizraite Lehabim of Gen. x. 13; 1 Chr. i. 11, are mentioned as serving with Cushim in the army of Shishak (2 Chr. xii. 2, 3), and in that of Zerah (xvi. 8; comp. xiv. 9), who was most probably also a king of Egypt, and certainly the leader of an Egyptian army [CUSH: ZERAH]. Nahum speaks of them as helpers of Thebes, together with Put (Phut), while Cush and Egypt were her strength (iii. 8, 9); and Daniel mentions the Lubim and Cushim as submitting to or courting a conqueror of Egypt (xi. 43). The Lubim might therefore well occur among the peoples suffering in the fall of Egypt. There is, however, this objection, that we have no instance of the supposed form

בו", the noun being always given in the plural LUBIM. In the absence of better evidence we profer the reading of the present Heb. text, against which little can be urged but that the word occurs nowhere else, although we should rather expect well-known name in such a passage. R. S. P.

CHUN (13): לה דשי להאפהדשי הלאפשי coseph. Maxwel: Chun. The words of the LXX. look as if they had read Berothai, a word very like

which - דָרָרָ - they frequently render by לגאנאrós), 1 Chr. zviii. 8. [BEROTHAH.]

CHURCH ('Errange a). — I. The derivation of the word Church is uncertain. It is found in the Teutonic and Slavonian languages (Anglo-Saxon, Sirc, Circe, Cyric, Cyricea; English, Church; Scottish, Kirk; German, Kirche; Swedish, Kyrka; Danish, Kyrke; Dutch, Karke; Swiss, Kilche; Frisian, Tzierk; Bohemian, Cyrkew; Polish, Cersiew; Russian, Zerkow), and answers to the derivstives of errange a, which are naturally found in the Romance languages (French, Eglise; Italian, Chiesa ; old Vaudois, Gleisa ; Spanish, Iylesia), and by foreign importation elsewhere (Gothic, Aikklesjo ; Gaelic, Eaglais ; Welsh, Eglwys ; Cornish, Eglus). The word is generally said to be derived from the Greek Ruplands (Walafrid Strabo, De Rebus Ecclesiast. c. 7; Suicer, s. v. rupuardy; Glossurium, s. v. "Dominicum;" Cassubon, Exercit. Baron. xiii. § xviii.; Hooker, Eccl. Pol. v. ziii. 1; Pearson, On the Creed, Art. ix.; Beveridge, Un the Thirty-Nine Articles, Art. xix.; Wordsworth, Theophilus Anglicanus, c. 1; Gieseler, Eccles. History, c. 1; Trench, Study of Words, p. 75). It introduced the Greek word for Church into the But the derivation has been too hastily assumed. Latin tongue; but this word was not cyriacuse

the present Heb. text corrupt in this word. It has | The arguments in its favor are the following: (1. A similarity of sound. (2.) The statement of Wals frid Strabo. (3.) The fact that the word auplantos was undoubtedly used by Greek ecclesiastics in the sense of "a church," as proved by a reference ta the Canons of the Council of Ancyra (Can. xiv.) of Neoccessares (Can. v., xiii.), of Laodicea (Can xxviii.), and of the Council in Trullo (Can. lxxiv.) to Maximin's Edict (in Euseb. H. E. ix. 10), to Eusebius' Oration in praise of Constantine (c. xviii.), to the Apostolical Constitutions (ii. 59), to Cyril of Jerusalem (Catech. xviii.), and to a similar use of "Dominicum" by Cyprian, Jerome, Rufinus. dr. (4.) The possibility of its having passed as a theological term from the Greek into the Teutonic and Slavonian languages. (5.) The analogous meaning and derivation of the Ethiopic word for Church, which signifies "the house of Christ." On the other hand it requires little acquaintance with philology to know that (1.) similarity of sound proves nothing, and is capable of raising only the barest presumption. (2.) A medizeval writer's guess at an etymology is probably founded wholly on similarity of sound, and is as worthless as the derivations with which St. Augustine's works are disfigured (Moroni derives Chiesa from Kupiakór in his Dizionario Storico-ecclesiastico, and Walafrid Strabo derives the words vater, mutter, from the Greek through the Latin, herr from heros, moner and monath from $\mu \eta \nu \eta$, in the same breath as kirche from $\kappa \nu \rho \iota a \kappa \delta \nu$. (3.) Although $\kappa \nu \rho \iota a \kappa \delta \nu$ kirche from Kuplando). (3.) Although Kuplando is found, signifying "a church," it is no more the common term used by Greeks, than Dominicum is the common term used by Latins. It is therefore very unlikely that it should have been adopted by the Greek missionaries and teachers, and adopted by them so decidedly as to be thrust into a foreign language. (4.) Nor is there any probable way pointed out by which the importation was effected. Walafrid Strabo, indeed (loc. cit.), attributes it, not obscurely, so far as the Teutonic tongues are concerned, to Ulfilas; and following him, Trench says (loc. cit.), "These Goths, the first converted to the Christian faith, the first therefore that had a Christian vocabulary, lent the word in their turn to the other German tribes, among others to our Anglo-Saxon forefathers." Had it been so introduced, Ulfilas's "peaceful and populous colony of shepherds and herdsmen on the partures below Mount Hsemus" (Milman, i. 272), could neves have affected the language of the whole Teutonic race in all its dialects. But in matter of fact we find that the word employed by Ulfilas in his version of the Scriptures is not any derivative of Kupiakóv but, as we should have expected, aikklesjo (Rom xvi. 23; 1 Cor. xvi. 19 et passim). This theory therefore falls to the ground, and with it any attempt at showing the way in which the word passed across into the Teutonic languages. No special hypothesis has been brought forward to account for its admis sion into the Slavonic tongues, and it is enough to say that, unless we have evidence to the contrary, we are justified in assuming that the Greek missionaries in the 9th century did not adopt a term in their intercourse with strangers, which they hardly, if at all, used in ordinary conversation amongst themselves. (5.) Further, there is no reason why the word should have passed into these two languages rather than into Latin. The Roman Church was in its origin a Greek community, and it introduced the Greek word for Church into the

\$ was ecclesia; and the same influence would no doubt have introduced the same word into the sorthern languages, had it introduced any word at all. (6.) Finally, it is hard to find examples of a Greek word being adopted into the Teutonic dialects, except through the medium of Latin. On the whole, this etymology must be abandoned. It is strange that Strabo should have imposed it on the world so long. It is difficult to say what is to be substituted. There was probably some word which, in the language from which the Teutonic and Slavonic are descended, designated the old heathen places of religious assembly, and this word, having taken different forms in different dialects, was adopted by the Christian missionaries. It was probably connected with the Latin circus, circulus, and with the Grook Runhos, possibly also with the Welsh sylch, cys, cynchle, or caer. Lipsius, who was the first to reject the received tradition, was probably right in his suggestion, "Credo et a circo Kirck nostrum esse, quia veterum templa instar Circi rotunda" (*Epist. ad Belgas*, Cent. iii. Ep. 44).

II. The word errange is no doubt derived from exacteir, and in accordance with its derivation it originally meant an assembly called out by the magistrate, or hy legitimate authority. This is the ordinary classical sense of the word. But it throws no light on the nature of the institution so designated in the New Testament. For to the writers of the N. T. the word had now lost its primary signification, and was either used generally for any meeting (Acts xix. 32), or more particularly, it denoted (1) the religious assemblies of the Jews (Deut. iv. 10, xviii. 16, ap. LXX.); (2) the whole assembly or congregation of the Israelitish people (Acts vii 88; Heb. ii. 12; Ps. xxii. 22; Deut. xxxi. 80, ap. LXX.). It was in this last sense, in which it

answered to קדל ישראל, that the word was adopted and applied by the writers of the N. T. to the Christian congregation. The word $\ell\kappa\kappa\lambda\eta\sigma/a$, therefore, does not carry us back further than the Jewish Church. It implies a resemblance and correspondence between the old Jewish Church and the recently established Christian Church, but nothing more. Its etymological sense having been already tost when adopted by and for Christians, is only misleading if pressed too far. The chief difference between the words "ecclesia" and "church," would probably consist in this, that "ecclesia" primarily signified the Christian body, and secondarily the place of assembly; while the first signification of "church" was the place of assembly, which imparted its name to the body of worshippers.

III. The Church as described in the Gospels. The word occurs only twice, each time in St. Matthew (Matt. xvi. 18, "On this rock will I build my Church;" xviii. 17, "Tell it unto the Church"). It every other case it is spoken of as the kingdom of heaven by St. Matthew, and as the kingdom of God by St. Mark and St. Luke. St. Mark, St. Lake, and St. John, never use the expression kingdom of heaven. St. John once uses the phrase singdom of God (iii. 3). St. Matthew occasionally peaks of the kingdom of God (vi. 33, xxi. 31, 43). and sometimes simply of the kingdom (iv. 23, xiii. 19, xxiv. 14). In xiii. 41 and xvi. 28, it is the Son of Man's kingdom. In xx. 21, thy kingdom, Le. Christ's. In the one Gospel of St. Matthew be Church is spoken of no less than thirty-six imes as the Kingdom. Other descript ins or titler them as they never had before been combined, by we hardly found in the Evangelists. It is Christ's 'an internal and spiritual bond of cohesion. Before

bousehold (Matt. x. 25), the salt and light of the world (v. 13, 15), Christ's flock (Matt. xxvi. 31; John x. 1), its members are the branches growing on Christ the Vine (John xv.): but the general description of it, not metaphorically but directly, is that it is a kingdom. In Matt. xvi. 19, the kingdom of heaven is formally, as elsewhere virtually identified with ERRAnoia. From the Gospel then, we learn that Christ was about to establish his heavenly kingdom on earth, which was to be the substitute for the Jewish Church and kingdom, now doomed to destruction (Matt. xxi. 43). Some of the qualities of this kingdom are illustrated by the parables of the tares, the mustard seed, the leaven, the hid treasure, the pearl, the draw-net the spiritual laws and principles by which it is to be governed, by the parables of the talents, the husbandmen, the wedding feast, and the ten virgins. It is not of this world though in it (John xviii. 36). It is to embrace all the nations of the earth (Matt. xxviii. 19). The means of entrance into it is Baptism (Matt. xxviii. 19). The conditions of belonging to it are faith (Mark xvi. 16) and obedience (Matt. xxviii. 20). Participation in the Holy Supper is its perpetual token of membership, and the means of supporting the life of its members (Matt. xxvi. 26; John vi. 51; 1 Cor. xi. 26). Ita members are given to Christ by the Father out of the world, and sent by Christ into the world; they are sanctified by the truth (John xvii. 19); and they are to live in love and unity, cognizable by the external world (John xiii. 34, xvii. 23). It is to be established on the Rock of Christ's Divinity, as confessed by Peter, the representative (for the moment) of the Apostles (Matt. xvi. 18). It is to have authority in spiritual cases (Matt. xviii. 17). It is to be never deprived of Christ's presence and protection (xxviii. 20), and to be never overthrown by the power of hell (xvi. 18).

IV. The Church as described in the Acts and in the Epistles - its Origin, Nature, Constitution, and Growth. - From the Gospels we learn little in the way of detail as to the kingdom which was to be established. It was in the great forty days which intervened between the Resurrection and the Ascension that our Lord explained specifically to his Apostles "the things pertaining to the kingdom of God " (Acts i. 3), that is, his future Church.

Its Origin. - The removal of Christ from the earth had left his followers a shattered company with no bond of external or internal cohesion, except the memory of the Master whom they had lost, and the recollection of his injunctions to unity and love, together with the occasional glimpses of his presence which were vouchsafed them. They continued together, meeting for prayer and supplication, and waiting for Christ's promise of the gift of the Holy Ghost. They numbered in all some 140 persons, namely, the eleven, the faithful women, the Lord's mother, his brethren, and 120 disciples They had faith to believe that there was a work before them which they were about to be called to perform; and that they might be ready to do it, they filled up the number of the Twelve by the appointment of Matthias "to be a true witness with the eleven "of the Resurrection." The Day of Pentecost is the birth-day of the Christian Church. The Spirit, who was then sent by the Son from the Father, and rest of on each of the Disciples, combined them once more into a whole - combined

458

they became his mystical body, animated by his and the household of God (Eph. ii. 19). But the Spirit. The nucleus was formed. Agglomeration and development would do the rest.

Its Nature. - St. Luke explains its nature by describing in narrative form the characteristics of the society formed by the union of the original 140 Disciples with the 3000 souls who were converted on the Day of Pentecost. "Then they that gladly received his word were baptized. . . . And they continued steadfastly in the Apostles' doctrine and fellowship, and in breaking of bread and in prayers" (Acts ii. 41). Here we have indirectly exhibited the essential conditions of Church Communion. They are (1) Baptism, Baptism implying on the part of the recipient repentance and faith; (2) Apostolic Doctrine; (3) Fellowship with the Apostles; (4) the Lord's Supper; (5) Public Worship. Every requisite for church-membership is here enumerated not only for the Apostolic days, but for future ages. The conditions are exclusive as well as inclusive, negative as well as positive. St. Luke's definition of the Church, then, would be the con-gregation of the baptized, in which the faith of the Apostles is maintained, connection with the Apostles is preserved, the Sacraments are duly administered, and public worship is kept up. The earliest definition (virtually) given of the Church is likewise the best. To this body St. Luke applies the name of "The Church" (the first time that the word is used as denoting an existing thing), and to it, constituted as it was, he states that there were daily added of ow (our evor (ii. 47). By this expression he probably means those who were "saving themselves from their untoward generation" (ii. 40), "added," however, "to the Church" not by their own mere volition, but "by the Lord," and so become the elect people of God, sanctified by his Spirit, and described by St. Paul as "delivered from the power of darkness and translated into the kingdom of his dear Son" (Col. i. 13). St. Luke's treatise being historical, not dogmatical, he does not directly enter further into the essential nature of the Church. The community of goods, which he describes as being universal amongst the members of the infant society (ii. 44, iv. 32), is specially declared to be a voluntary practice (v. 4), not a necessary duty of Christians as such (comp. Acts ix. 36, 39, xi. 29).

From the illustrations adopted by St. Paul in his Epistles, we have additional light thrown upon the nature of the Church. Thus (Rom. xi. 17), the Christian Church is described as being a branch grafted on the already existing olive-tree, showing that it was no new creation, but a development of that spiritual life which had flourished in the Patriarchal and in the Jewish Church. It is lescribed (Rom. xii. 4; 1 Cor. xii. 12) as one body made up of many members with different offices. to exhibit the close cohesion which ought to exist between Christian and Christian; still more it is described as the body, of which Christ is the Head (Eph. i. 22), so that members of his Church are nembers of Christ's body, of his flesh, of his bones (Eph. v. 23, 30; Col. i. 18, ii. 19), to show the slose union between Christ and his people: again, as the temple of God built upon the foundationstone of Jesus Christ (1 Cor. iii. 11), and, by a slight change of metaphor, as the temple in which God dwells by his Spirit, the Apostles and prophets orning the foundation, and Jesus Christ the chief

they had been individual followers of Jesus, now stone (Eph. ii. 22). It is also the city of the mints passage which is most illustrative of our subject in the Epistles is Eph. iv. 8, 6. "Endeavoring to keep the unity of the Spirit in the bond of peace. There is one body, and one Spirit, even as ye are called in one hope of your calling; one Lord, one faith, one baptism, one God and Father of all, who is above all, and through all, and in you all." Here we see what it is that constitutes the unity of the Church in the mind of the Apostle: (1) unity of Headship, "one Lord;" (2) unity of belief, "one faith;" (3) unity of Sacraments, "one baptisn;" (4) unity of hope of eternal life, "one hope of your calling" (comp. Tit. i. 2); (5) unity of love, " unity of the Spirit in the bond of peace;" (6) unity of organization, "one body." The Church, then, at this period was a body of baptized men and women who believed in Jesus as the Christ, and in the revelation made by Him, who were united by having the same faith, hope, and animating Spirit of love, the same Sacraments, and the same spiritual invisible Head.

What was the Constitution of this body ! -On the evening of the Day of Pentecost, the 3,140 members of which it consisted were (1) Apostles, (2) previous disciples, (3) converts. We never afterwards find any distinction drawn between the previous disciples and the later converts; but the Apostles throughout stand apart. Here, then, we find two classes, Apostles and converts - teachers and taught. At this time the Church was not only morally but actually one congregation. Soon, however, its numbers grew so considerably that it was a physical impossibility that all its members should come together in one spot. It became, therefore, an aggregate of congregations. But its essential unity was not affected by the accidental necessity of meeting in separate rooms for public worship; the bond of cohesion was still the same. The Apostles, who had been closest to the Lord Jesus in his life on earth, would doubtless have formed the centres of the several congregations of listening believers, and besides attending at the Temple for the national Jewish prayer (Acts iii. 1), and for the purpose of preaching Christ (ii. 42), they would have gone round to "every house" where their converts assembled "teaching and preaching," and "breaking bread," and "distributing " the common goods "as each had need " (ii. 46, iv. 35, v. 42). Thus the Church continued for apparently some seven years, but at the end of that time "the number of disciples was" so greatly "multiplied" (Acts vi. 1) that the Twelve Apostles found themselves to be too few to carry out these works unaided. They thereupon for the first time exercised the powers of mission intrusted to them (John xx. 21), and by laying their hands ou the Seven who were recommended to them by the general body of Christians, they appointed them to fulfill the secular task of distributing the common stock, which they had themselves hitherto performed, retaining the functions of praying, and preaching, and administering the sacraments in their own hands. It is a question which cannot le certainly answered whether the office of these Seven is to be identified with that of the Sidnoroi elsewhere found. They are not called deacons in Scripture, and it has been supposed by some that they were extraordinary officers appointed for the occasion to see that the Hellenistic widows had their porner-stone, i. e. probably the foundation corner- fair share of the goods distributed amongst the

Digitized by Google

your believery and that they had no successors in | death of James, the son of Zebelev, and the im their office. If this be so, we have no account given as of the institution of the Diaconate: the Deacons, like the Presbyters, are found existing, but the circumstances under which they were brought into existence are not related. We incline, however, to the other hypothesis, which makes the Seven the originals of the Deacons. Being found apt to teach, they were likewise invested, almost immediately after their appointment, with the power of preaching to the unconverted (vi. 10) and of baptizing (viii. 38). From this time, therefore, or from about this time there existed in the Church -(1) the Apostles; (2) the Deacons and Evangelists; (3) the multitude of the faithful. We hear of no other Church-officer till the year 44, seven years after the appointment of the deacons. We find that there were then in the Church of Jerusalem officers named Presbyters (xi. 30) who were the assistants of James, the chief administrator of that Church (xii. 17). The circumstances of their first appointment are not recounted. No doubt they were similar to those under which the Deacons were appointed. As in the year 37 the Apostles found that the whole work of the ministry was too great for them, and they therefore placed a portion of it, namely, distributing alms to the brethren and preaching Christ to the heathen, on the deacons, so a few years later they would have found that what they still retained was yet growing too burdensome, and consequently they devolved another portion of their ministerial authority on another order of men. The name of Presbyter or Elder implies that the men selected were of mature age. We gather incidentally that they were ordained by Apostolic or other authority (xiv. 23, Tit. i. 5). We find them associated with the Apostles as distinguished from the main body of the Church (Acts xv. 2, 4), and again as standing between the Apostles and the brethren (xv. 23). Their office was to pasture the Church of God (xx. 28), to rule (1 Tim. v. 17) the flocks over which the Holy Ghost had made them overseers or bishops (Acts xx. 28; 'hil. i. 1; 1 Tim. iii. 1, 2; Tit. i. 7), and to pray with and for the members of their congregations James v. 14). Thus the Apostles would seem to have invested these Presbyters with the full powers which they themselves exercised, excepting only in respect to those functions which they discharged in relation to the general regimen of the whole Church as distinct from the several congregations which formed the whole body. These functions they still reserved to themselves. By the year 44, therefore, there were in the Church of Jerusalem -(1) the Apostles holding the government of the whole body in their own hands; (2) Presbyters invested by the Apostles with authority for conducting public worship in each congregation; (3) Deacons or Evangelists similarly invested with the lesser power of preaching and of baptizing unbeiseers, and of distributing the common goods unong the brethren. The same order was estabished in the Gentile Churches founded by St. Paul. the only difference being that those who were called Presbyters in Jerusalem bore indifferently the name M Bishops (Phil i. 1; 1 Tim. iii. 1, 2; Tit. i. 7) x of Presbyters (1 Tim. v. 17; Tit. i. 5) elsewhere.

It was in the Church of Jerusaienr 'hat another rder of the ministry found its exemplar. The Apostles, we find, remained in Jerusalem (Acts viii. t) or in the neighborhood (viii. 14) till the perse-backward by early ecclesiastical history shows us setion of Herod Agripps in the year 44. The to have been the titles of those who exercised fund

prisonment and flight of Peter, were the signal for the dispersion of the Apostles. One remained behind - James the brother of the Lord, whom we identify with the Apostle, James the son of Alphaus [JAMES]. He had not the same cause of dread as the rest. His Judaical asceticism and general character would have made him an object of popularity with his countrymen, and even with the Pharisaical Herod. He remained unmolested, and from this time he is the acknowledged head of the Church of Jerusalem. A consideration of Acts xii. 17, xv. 13, 19, xxi. 18; Gal. ii. 2, 9, 12; will remove all doubt on this head. Indeed, four years before Herod's persecution he had stood, it would seem, on a level with Peter (Gal. i. 18, 19; Acts ix. 27), and it has been thought that he received special instructions for the functions which he had to fulfill from the Lord himself (1 Cor. xv. 7; Acts i. 3). Whatever his preëminence was, he appears to have borne no special title indicating it. The example of the Mother Church of Jerusalem was again followed by the Pauline Churches. Timothy and Titus had probably no distinctive title, but it is impossible to read the Epistles addressed to them without seeing that they had an authority superior to that of the ordinary bishops or priests with regard to whose conduct and ordination St. Paul gives them instruction (1 Tim. iii., v. 17, 19; Tit. i. 5). Thus, then, we see that where the Apostles were themselves able to superintend the Churches that they had founded, the Church-officers consisted of -(1) Apostles; (2) Bishops or Priests; (3) Deacons and Evangelists. When the Apostles were unable to give personal superintendence, they delegated that power which they had in common to one of themselves, as in Jerusalem, or to one in whom they had confidence, as at Ephesus and in Crete. As the Apostles died off, these Apostolic Delegates necessarily multiplied. By the end of the first century, when St. John was the only Apostle that now survived, they would have been established in every country, as Crete, and in every large town where there were several bishops or priests, such as the seven towns of Asia mentioned in the book of Revelation. These superintendents appear to be addressed by St. John under the name of Angels. With St. John's death the Apostolic College was extinguished, and the Apostolic Delegates or Angels were left to fill their places in the government of the Church, not with the full unrestricted power of the Apostles, but with authority only to be exercised in limited districts. In the next century we find that these officers bore the name of Bishops, while those who in the first century were called indifferently Presbyters or Bishops had now only the title of Presbyters. We conclude, therefore, that the title bishop was gradually dropped by the second order of the ministry, and applied specifically to those who represented what James, Timothy, and Titus had been in the Apostolic age. Theodoret says expressly, "The same persons were anciently called promiscuously both bishops and presbyters, whilst those who are now called bishops were called apostles, but shortly after the name of apostle was appropriated to such as were apostles indeed, and then the name bishop was given to those before called apostles " (Com. in 1 Tim. iii. 1). There are other names found in the Acts and in the Epistles which the light thrown backward by early ecclesiastical history shows us

Church, but only belonging to it while it was being brought into being by help of miraculous agency. Such are prophets (Acts xiii. 1; Rom. xii. 6; 1 Cor. xii. 28; Eph. iv. 11), whose function was to proclaim and expound the Christian revelation, and to interpret God's will, especially as veiled in the Old Testament; teachers (Acts xiii. 1; Rom. xii. 7; 1 Cor. xii. 28; Eph. iv. 11) and pastors (Eph. iv. 11) whose special work was to instruct those already admitted into the fold, as contrasted with the evangelists (ibid.) who had primarily to instruct the heathen. Prophecy is one of the extraordinary xaplo uara which were vouchsafed, and is to be classed with the gifts of healing, of speaking ecstatically with tongues, of interpretation of tongues, i. e. explanation of those ecstatic utterances, and discernment of spirits, i. e. a power of distinguishing between the real and supposed possessors of spiritual gifts (1 Cor. xii.). Teaching (χάρισμα διδασκαλίας, Rom. xii. 7; 1 Cor. xii. 28) is one of the ordinary gifts, and is to be classed with the word of wisdom and the word of knowledge (1 Cor. xii. 8), perhaps with "faith" (ib. 9), with the gift of government (Xdpioua KuBepvhgeas, ib. 28), and with the gift of ministrat (χάρισμα διaκονίas or ἀντιλήψεωs, Rom. xii. 7; 1 Cor. xii. 28). These xaplo µara, whether extraordinary or ordinary, were "divided to every man as the Spirit willed," according to the individual character of each, and not officially. Those to whom the gifts of prophecy, teaching, and government were vouchsafed were doubtless selected for the office of Presbyter, those who had the gift of ministration for the office of Deacon. In the Apostles they all alike resided.

Its external Growth. - The 3000 souls that were added to the Apostles and to the 120 brethren on the day of Pentecost were increased daily by new converts (Acts ii. 47, v. 14). These converts were without exception Jews residing in Jerusalem, whether speaking Greek or Hebrew (vi. 1). After seven or eight years a step was made outwards. The persecution which followed the martyrdom of Stephen drove away the adherents of the new doctrines, with the exception of the Apostles, and "they that were scattered abroad went everywhere preaching the word " to the Jews of the Dispersion. Philip, in his capacity of Evangelist, preached Christ to the Samaritans, and admitted them into the Church by baptism. In Philistia he made the first Gentile convert, but this act did not raise the question of the admission of the Gentiles, because the Ethiopian eunuch was already a proselyte (viii. 27), and probably a proselyte of Righteousness. Cornelius was a proselyte of the Gate (x. 2). The first purely Gentile convert that we hear of by name is Sergius Paulus (xiii. 7), but we are told that Cornelius's companions were Gentiles, and by heir baptism the admission of the Gentiles was deided by the agency of St. Peter, approved by the Aportles and Jewish Church (xi. 18), not, as might have been expected, by the agency of St. Paul. This great event took place after the peace caused by Caligula's persecution of the Jews, which occurred A. D. 40 (ix. 31), and more than a year before the famine in the time of Claudius, A. D. 44 (xi. 28, 29). Galilee had already been evangelized m we'l as Judzea and Samaria, though the special

sgent in the work is not declared (ix. 31).

tions which were not destined to continue in the | of St. Paul. In his three journeys he carried Christianity through the chief cities of Asia Minor and Greece. His method appears almost invariably to have been this: he presented himself on the Sabbath at the Jewish synagogue, and having first preached the doctrine of a suffering Messiah, he next identified Jesus with the Messiah (xvii. 3). His arguments on the first head were listened to with patience by all; those on the second point wrought conviction in some (xvii. 4), but roused the rest to persecute him (xvii. 5). On finding his words rejected by the Jews, he turned from them to the Gentiles (xviii. 6, xxviii. 28). His captivity in Rome, A. D. 63-65, had the effect of forming a Church out of the Jewish and Greek residents in the imperial city, who seem to have been joined by a few Italians. His last journey may have spread the Gospel westward as far as Spain (Rom. xv. 28; Clemens, Eusebius, Jerome, Chrysostom). The death of James at Jerusalem and of Peter and Paul at Rome, A. D. 67, leaves one only of the Apostles presented distinctly to our view. In the year 7C Jerusalem was captured, and hefore St. John fell asleep in 98, the Petrine and Pauline converts, the Churches of the circumcision and of the uncircumcision, had melted into one harmonious and accordant body, spreading in scattered congregations at the least from Babylon to Spain, and from Macedonia to Africa. How far Christian doctrine may have penetrated beyond these limits we do not know.

> Its further Growth. - As this is not an ecclesiastical history, we can but glance at it. There were three great impulses which enlarged the bor-ders of the Church. The first is that which began on the day of Pentecost, and continued down to the conversion of Constantine. By this the Roman Empire was converted to Christ, and the Church was, speaking roughly, made conterminous with the civilized world. The second impulse gathered within her borders the hitherto barbarous nations formed by the Teutonic and Celtic tribes, thus winning, or in spite of the overthrow of the Empire, retaining the countries of France, Scotland, Ireland, England, Lombardy, Germany, Denmark, Sweden, Norway. The third impulse gathered in the Slavonian nations. The first of these impulses lasted to the fourth century; the second to the ninth century; the third (beginning before the second had ceased) to the tenth and eleventh centuries. We do not reckon the Nestorian missionary efforts in the seventh century in Syria, Persia, India, and China, nor the post-Reformation exertions of the Jesuits in the East and West Indies, for these attempts have produced no permanent results. Nor, again, do we speak of the efforts now being made in Africa, India, Australia, New Zealand, be cause it has not yet been proved, except perhaps in the case of New Zealand, whether they will be successful in bringing these countries within the fold of Christ.

V. Alterations in its Constitution .--- We have said that ecclesiastical authority resided (1) in the Apostles; (2) in the Apostles and the Deacons; (3) in the Apostles, the Presbyters, and the Deacens; (4) in the Apostolic Delegates, the Presbyters, and the Deacons; (5) in those who succeeded the Apos tolic Delegates, the Presbyters, and the Deacons And to these successors of the Apostolic Delegates came to be appropriated the title of Bishop, which was originally applied to Presbyters. At the com-The history of the growth of the Gentile (hurch, mencement of the second century and thencefor to far as we know it, is identical with the history wards Rishops, Presbyters, and Descons are the

sflicers of the Church wherever the Church existed. Ignatius's Epistles (in their unadulterated form), and the otler records which are preserved to us, are on this point decisive. (See Pearson's Vindiicis Ignatianc, pars ii. c. xiii. p. 534, ed. Churton.) Bishops were looked upon as Christ's Vicegerents (Cyprian, .Ep. 55 (or 59) with Rigaltius's notes), and as having succeeded to the Apostles (id. Ep.69 (or 66) and 42 (or 45), Firmilian, Jerome), svery bishop's see being entitled a "sedes apostolica." They retained in their own hands authority with respect to each other they were equals, whether with respect to each other they were equals, whether with respect to each other they were equals, whether their see was "at Rome or at Engubium."

Within this equal college of bishops there soon arose difference of rank though not of order. Below the city-bishops there sprang up a class of country-bishops (chorepiscopi) answering to the archdeacons of the English Church, except that they had received episcopal consecration (Hammond, Beveridge, Cave, Bingham), and were enabled to perform some episcopal acts with the sanction of the city-bishops. Their position was ambiguous, and in the fifth century they began to decay and gradually died out. a Above the citybishops there were, in the second century apparently, Metropolitans, and in the third, Patriarchs or Exarchs. The metropolitan was the chief bishop in the civil division of the empire which was called a province ($\epsilon \pi a \rho \chi(a)$). His see was at the metropolis of the province, and he presided over his suffragans with authority similar to, but greater than, that which is exercised in their respective provinces by the two archbishops in England. The authority of the patriarch or exarch extended over the still larger division of the civil empire which was called a diocese. The ecclesiastical was framed in accord ance with the exigencies and after the model of the civil polity. When Constantine, therefore, divided the empire into 13 dioceses, "each of which equalled the just measure of a powerful kingdom " (Gibbon, c. xviii.), the Church came to be distributed into 13 (including the city and neighborhood of Rome, 14) diocesan, or, as we should say, national churches. There was no external bond of government to hold these churches together. They were independent self-ruled wholes, combined together into one greater whole by having one invisible Head and one animating Spirit, by maintaining each the same faith and exercising each the same discipline. The only authority which they recognized as canable of controlling their separate action, was that of an Œcumenical Council composed of delegates from each; and these Councils samed canon after canon forbidding the interference If the bishop of any one diocese, that is, district, n country, with the bishop of any other diocese. "Bishops outside a 'diocese' are not to invade the Churches across the borders, nor bring confusion into the Churches," says the second canon of the Council of Constantinople, "lest," says the eighth canon of the Council of Ephesus, "the pride of worldly power be introduced under cover of the priestly function, and by little and little we be deprived of the liberty which our Lord Jesus Christ, the deliverer of all men, has given us by his own

than any which could be controlled by canona. Rome and Constantinople were each the seats of imperial power, and symptoms soon began to appear that the patriarchs of the imperial cities were rival claimants of imperial power in the Church. Rome was in a better position for the struggle than Constantinople, for, besides having the prestige of being Old Rome, she was also of Apostolic foundation. Constantinople could not boast an Apostle as her founder, and she was but New Rome. Still the imperial power was strong in the East when it had fallen in the West, and furthermore the Council of Chalcedon had so far dispensed with the canons and with precedent in respect to Constantinople as to grant the patriarch jurisdiction over three dioceses, to establish a right of appeal to Constantinople from any part of the Church, and to confirm the decree of the second Council, which elevated the see of Constantinople above that of Alexandria and of Antioch. It was by the Pope of Constantinople that the first overt attempt at erecting a Papal Monarchy was made; and by the Pope of Rome, in consequence, it was fiercely and indignantly denounced. John of Constantinople, said Gregory the Great, was destroying the patriarchal system of government (lib. v. 43; ix. 68); by assuming the profane appellation of Universal Bishop he was anticipating Antichrist (lib. vii. 27, 33), invading the rights of Christ, and initating the Devil (lib. v. 18). John of Constantinople failed. The successors of Gregory adopted as their own the claims which John had not been able to assert, and on the basis of the False Decretals of Isidore, and of Gratian's Decretum, Nicholas I., Gregory VII., and Innocent III. reared the structure of the Roman in place of the Constantinopolitan Papal Monarchy. From this time the federal character of the constitution of the Church was overthrown. In the West it became wholly despotic, and in the East, though the theory of aristocratical government was and is maintained, the still-cherished title of (Ecumenical Patriarch indicates that it is weakness which has prevented (Constantinople from erecting at least an Eastern if she could not an Universal Monarchy. In the sixteenth century a further change of constitution occurred. A great part of Europe revolted from the Western despotism. The Churches of England and Sweden returned to, or rather retained, the episcopal form of government after the model of the first centuries. In parts of Germany, of France, of Switzerland, and of Great Britain. a Presbyterian, or still less defined form was adopted, while Rome tightened her hold on her yet remaining subjects, and by destroying all peculiarities of national liturgy and custom, and by depressing the order of bishops except as interpreters of her decrees, con verted that part of the Church over which she had sway into a jealous centralized absolutism.

VI. The existing Church. — Its members fall into three broadly-marked groups, the Greek Churches, the Latin Churches, the Teutonic Churches. The orthodox Greek Chusch consists of the Patriarchate of Constantinople with 135 sees, of Alexandria with 4 sees, of Antioch with 16 sees,

• An attempt was made to resuscitate this class in **Impiand**, under the title of suffragan bishops, by the **still unrepealed** 26th Henry VIII. o 14, by which weaky-six towns were manued as the wates of "bishops,

who were to act under the bishops of the discess in which they were satuated.

of Jerusalem with 13 sees, of the Russian Church with 65 sees; besides which, there are in Cyprus \$ sees, in Austria 11 sees, in Mount Sinai 1 see, in Montenegro 1 see, in Greece 24 sees. To these must be added, (1.) the Nestorian or Chaldsean Church, once spread from China to the Tigris, and from Lake Baikal to Cape Comorin, and ruled by twenty-five Metropolitans and a Patriarch posse ing a plenitude of power equal to that of Innocent III. (Neale, Eastern Church, i. 143), but now shrunk to 16 sees. (2.) The Christians of St. Thomas under the Bishop of Malabar. (3.) The Syrian Jacobites under the Patriarch of Antioch resident at Caramit or Diarbekir. (4.) The Maronites with 9 sees. (5.) The Copts with 13 sees. (6.) The savage, but yet Christian Abyssinians, and (7.) the Armenians, the most intelligent and active minded, but at the same time the most distracted body of Eastern believers.

The Latin Churches are those of Italy with 262 sees, of Spain with 54, of France with 81, of Portugal with 17, of Belgium and Holland with 11, of Austria with 64, of Germany with 24, of Switzerland with 5. Besides these, the authority of the Roman See is acknowledged by 63 Asiatic bishops, 10 African, 136 American, 43 British, and 36 Prelates scattered through the countries where the Church of Greece is predominant.

The Teutonic Churches consist of the Anglican communion with 48 sees in Europe, 51 in Canada, America, and the West Indies, 8 in Asia, 8 in Africa, and 15 in Australia and Oceanica; of the Church of Norway and Sweden, with 17 sees; of the Churches of Denmark, Prussia, Holland, Scotlaud, and scattered congregations elsewhere. The members of the Greek Churches are supposed to sumber 80,000,000; of the Teutonic and Protestant Churches 90,000,000; of the Latin Churches 170,-000.000; making a total of 25 per cent. of the population of the globe.

VII. Definitions of the Church. - The Greek Church gives the following: "The Church is a divinely instituted community of men, united by the orthodox faith, the law of God, the hierarchy, and the Sacraments" (Full Catechism of the Orthodox, Catholic, Eastern Church, Moscow, 1839) The Latin Church defines it "the company of Christians knit together by the profession of the same faith and the communion of the same sacraments, under the government of lawful pastors, and especially of the Roman bishop as the only Vicar of Christ upon earth " (Bellarm. De Eccl. Mil. iii. 3; see also Devoti Inst. Canon. 1, § iv., Romæ, 1818). The Church of England, "a congregation of faithful men in which the pure word of God is preached, and the Sacraments be duly ministered according to Christ's ordinance in all those things that of necessity are requisite to the same " (Art. siz.). The Lutheran Church, "a congregation of mints in which the Gospel is rightly taught and the sacraments rightly administered " (Confessio August ma, 1631, Art. vii.). The Confessio Helretica, 'a congregation of faithful men called, or vollected out of the world, the communion of all aints" (Art. xvii.). The Confessio Saxonica. "a songregation of men embracing the Gospel of Christ, and rightly using the Sucraments" (Art. 111.). The Confessio Belgica, "a true congregation, or assembly of all faithful Christians who look for the whole of their salvation from Jesus Christ alone, av being washed by his blood, and sanctified and scaled by his Spirit " (Art. xxvii.).

CHURCH

These definitions show the difficulty in which the different sections of the divided Church find themselves in framing a definition which will at once accord with the statements of Holy Scripture, and be applicable to the present state of the Christian world. We have seen that according to the Scriptural view the Church is a holy kingdom, established by God on earth, of which Christ is the invisible King --- it is a divinely organized body, the members of which are knit together amongst themselves, and joined to Christ their Head, by the Holy Spirit, who dwells in and animates it; it is a spiritual but visible society of men united by constant succession to those who were personally united to the Apostles, holding the same faith that the Apostles held, administering the same sacraments, and like them forming separate, but only locally separate, assemblies, for the public worship of God. This is the Church according to the Divine intention. But as God permits men to mar the perfection of his designs in their behalf, and as men have both corrupted the doctrines and broken the unity of the Church, we must not expect to see the Church of Holy Scripture actually existing in its perfection on earth. It is not to be found, thus perfect, either in the collected fragments of Christendom, or still less in any one of these fragments ; though it is possible that one of those fragments more than another may approach the Scriptural and Apostolic ideal which existed only until sin, heresy, and schism, had time sufficiently to develop themselves to do their work. It has been questioned by some whether Hooker, in his anxious desire after charity and liberality, has not founded his definition of the Church upon too wide a basis; but it is certain that he has pointed out the true principle on which the definition must be framed (Eccl. Pol. v. 68, 6). As in defining a man, he says, we pass by those qualities wherein one man excels another, and take only those essential properties whereby a man differs from creatures of other kinds, so in defining the Church, which is a technical name for the professors of the Christian religion, we must fix our attention solely on that which makes the Christian religion differ from the religions which are not Christian. This difference is constituted by the Christian religion having Jesus Christ, his revelation, and his precepts for the object of its contemplations and the motive of its actions. The Church, therefore, consists of all who acknowledge the Lord Jesus Christ the blessed Saviour of mankind, who give credit to his Gospel and who hold his sacraments, the seals of eterna life, in honor. To go further, would be not tu define the Church by that which makes it to be what it is, i. e. to declare the being of the Church, but to define it by accidents, which may conduce to its well being, but do not touch its innermost nature. From this view of the Church the important consequence follows, that all the baptized belong to the visible Church, whatever be their divisions, crimes, misbeliefs, provided only they are not plain apostates, and directly deny and utterly reject the Christian faith, as far as the same is professedly different from infidelity. "Heretics as touching those points of doctrine in which they fail; schismatics as touching the quarrels for which. or the duties in which they divide themselves from their brethren; loose, licentious, and wicked persons, as touching their several offences or crimes have all forsaken the true Church of God - the Church which is sound and sincere in the doctrine

which they corrupt, the Church that scepeth the bond of unity which they violate, the Unurch that walketh in the laws of righteousness which they transgress, this very true Church of Christ they have left - howbeit, not altogether left nor forsaken simply the Church, upon the foundation of which they continue built, notwithstanding these breaches whereby they are rent at the top asunder" (v.

88, 7). VIII. The Faith, Attributes, and Notes of the Church. - The Nicene Creed is the especial and authoritative exponent of the Church's faith, having been adopted as such by the Œcumenical Councils of Nicsea and Constantinople, and ever afterwards regarded as the sacred summary of Christian doctrine. We have the Western form of the same Creed in that which is called the Creed of the Apostles - a name probably derived from its having been the local Creed of Rome, which was the chief Apostolic see of the West. An expansion of the same Creed, made in order to meet the Arian errors, is found in the Creed of St. Athanasius. The Confessions of Faith of the Synod of Bethlehem (A. D. 1672), of the Council of Trent (commonly known as Pope Pius' Creed, A. D. 1564), of the Synod of London (A. D. 1562), of Augsburg, Switzerland, Saxony, &c., stand on a lower level, as binding on the members of certain portions of the Church, but not being the Church's Creeds. The attributes of the Church are drawn from the expressions of the Creeds. The Church is described as One, Holy, Catholic, Apostolic. Its Unity consists in having one object of worship (Eph. iv. 6), one Head (Eph. iv. 15), one body (Rom. xii. 5), one Spirit (Eph. iv. 4), one faith (ib. 13), hope (ib. 4), love (1 Cor. xiii. 13), the same sacraments (ib. x. 17), discipline and worship (Acts ii. 42). Its Holiness depends on its Head and Spirit, the means of grace which it offers, and the holiness that it demands of its members (Eph. iv. 24). Its Catholicity consists in its being composed of many national Churches, not confined as the Jewish Church to one country (Mark xvi. 15); in its enduring to the end of time (Matt. xxviii. 20): in its teaching the whole truth, and having at its disposal all the means of grace vouchsafed to man. Its Apostolicity in being built on the foundation of the Apostles (Eph. ii. 90), and continuing in their doctrine and fellowship (Acts ii. 42). The notes of the Church are given by Bellarmine and theologians of his school, as being the title " Catholic," antiquity, succession, extent, papal succession, primitive doctrine, unity, sanctity, efficacy of doctrine, holiness of its authors, mirucles, prophecy, confession of foes, unhappy end of opponents, temporal good-fortune (Bellarm. Contr. tom. ii. lib. iv. p. 12.13, Ingoldst, 1580): by Dean Field as (1) the complete profession of the Christian faith; (2) the uae of certain appointed ceremonies and sacraments; (3) the union of men in their profession and in the use of these sacraments under lawful pastors (Of the Church, bk. ii. c. ii. p. 65). It is evident that the notes by which the Church is supposed to be distinguished must differ according to the definition of the Church accepted by the theologian who autigue them, because the true notes of a thing must necessarily be the essential properties of that thing. But each theologian is likely to assume those particulars in which he believes his own branch or part of the Church to excel others as the totes of the Church Universal.

serving the differences first between the Church of God mystical and visible, then between the visible sound and corrupted, sometimes more, sometimes less, the oversights are neither few nor light that have been committed " (Hooker, Eccl. Pol. iii. 1, 9). The word Church is employed to designate (1) the place in which Christians assemble to worship (possibly 1 Cor. xiv. 19); (2) a household of Christians (Col. iv. 15); (8) a congregation of Christians assembling from time to time for worship, but generally living apart from each other (Rom. xvi. 1); (4) a body of Christians living in one city assembling for worship in different congregations and at different times (1 Cor. i. 2); (5) a body of Christians residing in a district or country (2 Cor. i.); (6) the whole visible Church, including sound and unsound members, that is, all the baptized professors of Christianity, orthodox, heretical, and schismatical, moral or immoral; (7) the visible Church exclusive of the manifestly unsound members, that is, consisting of those who appear to be orthodox and pious; (8) the mystical or invisible Church, that is, the body of the elect known to God alone who are in very deed justified and sanctified, and never to be plucked out of their Saviour's hands, composed of the Church Triumphant and of some members of the Church Militant (John x. 28; Heb. xii. 22); (9) the Church Militant, that is, the Church in its warfare on earth - identical therefore with the Church visible; (10) the Church Triumphant, consisting of those who have passed from this world, expectant of glory now in paradise, and to be glorified hereafter in heaven. The word may be fairly used in any of these senses, but it is plain that if it is employed by controversialiste without a clear understanding in which sense it is used, inextricable confusion must arise. And such in fact has been the case. F. M.

* The list of works relating to the Church, subjoined to this article in the English edition, has here been greatly enlarged and more strictly classified by Professor H. B. Smith, D. D., of the Union Theological Seminary, N. Y. The literature of the different religious confessions is more equally н represented.

*CHURCHES, ROBBERS OF, is the translation (A. V.) of *lepoσύλous* (Acts xix. 37) which should be "robbers of temples" or "sacrilegious." The Ephesian town-clerk declared that no accusation like this could be brought against Paul's companions, Gaius and Aristarchus. The temples of the heathen contained images of gold and silver, votive offerings and other gifts, which were often plundered. "Churches," when our version was made, denoted places of pagan as well as of Christian worship, and hence this latter application of the term, which is now so incongruous, was not iniproper then. For examples of this wider usage in the older writers, see Trench, Authorized Version, &c., p. 42 (ed. 1859). H.

CHU'SHAN - RISHATHA'IM (フビマニ

בשערים: Χουσαρσαβαίμ; [Comp. Χουσαν peradalu:] Chusan Rasathaim), the king of Mesopotamia who oppressed Israel during eight years in the generation immediately following Joshua (Judg. iii. 8). The seat of his dominion was probably the region between the Euphrates and the Khabour, to which the name of Mesopotamia always attached a a special way. In the early cuneiform inscripions this country appears to be quite distinct from Assyria; it is inhabited by a people called Nairi, who are divided into a vast number of petty tribes and offer but little resistance to the Assyrian armies. No centralized monarchy is found, but as none of the Assyrian historical inscriptions date earlier than about B. C. 1100, which is some centuries later than the time of Chushan, it is of course quite possible that a very different condition of things may have existed in his day. In the weak and livided state of Western Asia at this time, it was easy for a brave and skillful chief to build up rapidly a vast power, which was apt to crumble away almost as quickly. The case of Solomon is an instance. Ohushan-Rishathaim's yoke was broken from the seck of the people of Israel at the end of eight Gal. i. 21.

aggressive power. The rise of the Assyrian empire, about B. C. 1270, would naturally reduce the bordering nations to insignificance. G. R.

CHU'SI (Xous, Alex. Xourer; [Ald. Comp. Xovoi:] Vulg. omits), a place named only in Judith vii. 18, as near Ekrebel, and upon the brook Mochmur. It was doubtless in central Palestine, but all the names appear to be very corrupt, and are not recognizable.

CHU'ZA (properly CHUZAS; Xougds: [Chusas or -sa]), exirponos, or house-steward of Herod (Antipas), whose wife Joanna ('Iadarra, רוֹחַפָּרֹז'), having been healed by our Lord either of possession by an evil spirit or of a disease, became attached to that body of women who accompanied Him on his journeyings (Luke viii. 3); and, together with Mary Magdalen and Mary the mother [?] of James, having come early to the sepulchre on the morning of the resurrection, to bring spices and ointments to complete the burial, brought word to the Apostles that the Lord was risen (Luke xxiv. 10).

H. A

CIC'CAR (つうう). [JORDAN; TOPOGRAPH-ICAL TERMS.]

CILICIA (Kilikia), a maritime province in the S. E. of Asia Minor, bordering on Pamphylia in the W., Lycaonia and Cappadocia in the N., and Syria in the E. Lofty mountain chains separate it from these provinces, Mons Amanus from Syria, and Antitaurus from Cappadocia : these barriers can be surmounted only by a few difficult passes; the former by the Portse Amanides at the head of the valley of the Pinarus, the latter by the Porte Cilicise near the sources of the Cydnus; towards the S., however, an outlet was afforded between the Sinus Issicus and the spurs of Amanus for a road, which afterwards crossed the Portse Syrise in the direction of Antioch.ª The sea-coast is rock-bound in the W., low and shelving in the E.; the chief rivers, Sarus, Cydnus, and Calycadnus, were insocessible to vessels of any size from sand-bars formed at their mouths. The western portion of the province is intersected with the ridges of Antitaurus, and was denominated Traches, rough, in contradistinction to Pedias, the level district in the E. The latter portion was remarkable for its beauty and fertility, as well as for its luxurious climate: hence it became a favorite residence of the Greeks after its incorporation into the Macedonian empire, and its capital TARSUS was elevated into the seat of a celebrated school of philosophy. The connection between the Jews and Cilicia dates from the time when it became part of the Syrian kingdom. Antiochus the Great is said to have introduced 2000 families of the Jews into Asia Minor, many of whom probably settled in Cilicia (Joseph. And xii. 3, § 4). In the Apostolic age they were still there in considerable numbers (Acts vi. 9). Cilician mercenaries, probably from Trachea, served in the body-guard of Alexander Jannaeus (Joseph. Ant. xiii. 13, § 5; B. J. i. 4, § 8). Josephus identified Cilicia with the Tarshish of Gen. z. 4; Gaogos of Oapseis, οῦτως γὰρ ἐκαλείτο τ' παλαιόν ἡ Κιλικία (Ant. i. 6, § 1). Cilicia was trum its geographica.

a Hence the close connection which exister bet Syria and Cilicia, as indicated in Acts xv. 22, 41

ition the high road between Syris and the West; | of this substance possessed by the Western natio a & was also the native country of St. Paul; hence it | was derived from China, and that it first reach d was visited by him, first, soon after his conversion | India and Phœnicia overland by way of Persia; at (Gal. i. 21; Acts ix. 30), on which occasion he probably founded the church there; and again in his second apostolical journey, when he entered it on the side of Syria, and crossed Antitaurus by the Pylæ Ciliciæ into Lycaonia (Acta xv. 41).

CINNAMON (קברך, הבכרך הגשעוש) : הנשעליי unnamomum), a well-known aromatic substance, the rind of the Laurus cinnamomum, called Korunda-yauhah in Ceylon. It is mentioned in Ex. xxx. 23 as one of the component parts of the holy anointing oil, which Moses was commanded to prepare; in Prov. vii. 17 as a perfume for the bed; and in Cant. iv. 14 as one of the plants of the garden which is the image of the spouse. In Rev. xviii. 13 it is enumerated among the merchandise of the great Babylon. "It was imported into Judsea by the Phoenicians or by the Arabians, and is now found in Sumatra, Borneo, China, &c., but shiefly, and of the best quality, in the S. W. part of Ceylon, where the soil is light and sandy, and the atmosphere moist with the prevalent southern winds. The stem and boughs of the cinnamon-tree are surrounded by a double rind, the exterior being whitish or gray, and almost inodorous and tasteless; but the inner one, which consists properly of two closely connected rinds, furnishes, if dried in the sun, that much-valued brown cinnamon which is imported to us in the shape of fine thin barks, sight or ten of which, rolled one into the other, form sometimes a quill. It is this inner rind which is

ealled in Ex. xxx. 23, במקר במוקר, " spicy cinnamon" (Kalisch ad loc.). From the coarser pieces oil of cinnamon is obtained, and a finer kind of oil is also got by boiling the ripe fruit of the tree. This last is used in the composition of incense, and diffuses a most delightful scent when burning.

Herodotus (iii. 111) ascribes to the Greek word киνа́динов a Phœnician, i. e. a Semitic origin. His words are : δρυιθας δε λέγουσι μεγάλας φορέειν ταῦτα τὰ κάρφεα, τὰ ἡμεῖς ἀπὸ Φοινίκων μαθόντες κιννάμωμον καλέομεν.

The meaning of the Heb. root Di is doubtful. The Arab. قنم to smell offensively like rancid nut-oil. Gesenius suggests that the word might have had the notion of lifting up or standing upright, like הובך, הורך, הברה, and so be identical with 727, canna, calamus, which the cinnamonrind resembles in form when prepared for the n.arket, and has hence been called in the later Latin cannella, in Italian canella, and in French canelle. Gesenius (Thes. 1223) corrects his former derivation of the word (in Lex. Man.) from 727, s being contrary to grammatical analogy. W. D. The reader is reterred to Sir E. Tennent's Ceylow (1. 599) for much interesting information on the 'where for Heb. מהיותרים, " became Jews," the

'his writer believes that "the earliest knowledge

a later period when the Arabs, 'the merchants of Sheba,' competed for the trade of Tyre, and carried to her the chief of all spices ' (Ez. xxvii. 22), their supplies were drawn from their African possessions, and the cassia of the Troglodytic coast supplanted the cinnamon of the far East, and to a great extent excluded it from the market."

With regard to the origin of the word, it is probable that it is derived from the Persian " Cinnamon," i. e. "Chinese amomum" (see Tenneut in L c.). Dr. Royle, however, conjectures that it is allied to the Cingalese Cacynnama, " sweet wood," or the Malagan Kaimanis. The brothers C. G and Th. F. L. Nees von Esenbeck have published valuable essay, " De Cinnamomo Disputatio" (Amamitates botan. Bonnenses, Fasc. i. Bonnes, 1823, 4to), to which the reader is referred for W.H additional information.

CIN'NEROTH, ALL (הליפנרות) : #מססד The Xerrepée; [Vat. Xegpae; Alex. Xerepee:] universam Ceneroth), a district named with the "land of Naphtali" and other northern places as having been laid waste by Benhadad king of Damascus, the ally of Asa king of Judah (1 K. xv. 20) It probably took its name from the adjacent city or lake of the same name (in other passages of the A. V. [in modern editions] spelt CHINNEROTH), and was possibly the small enclosed district [3 miles long and 1 wide] north of Tiberias, and by the side of the lake, afterwards known as "the plain of Gennesaret." The expression "All Cinner th" is unusual and may be compared with "All Bithron," - probably, like this, a district and not a town.

CIRA'MA. The people of Cirama (in Kupamin; [Vat. Keipau; Alex. Kipaua:] Gramas) and Gab des came up with Zorobabel from Babylon (1 Esdr. v. 20). [RAMAH.]

CIRCUMCISION (T) : repitout : oircumcisio) was peculiarly, though not exclusively, a Jewish rite. It was enjoined upon Abraham, the father of the nation, by God, at the institution, and as the token, of the Covenant, which assured to him and his descendants the promise of the Messiah (Gen. xvii.). It was thus made a neces sary condition of Jewish nationality. Every male child was to be circumcised when eight days old (Lev. xii. 8) on pain of death; a penalty which, in the case of Moses, appears to have been demanded of the father, when the Lord "sought to kill him ' because his son was uncircumcised (Ex. iv. 24-26) If the eighth day were a Sabbath the rite was not postponed (John vii. 22, 23). Slaves, whether home-born or purchased, were circumcised (Gen xvii. 12, 13); and foreigners must have their males circumcised before they could be allowed to partake of the passover (Ex. xii. 48), or become Jewish citizens (Jud. xiv. 10. See also Esth. viii. 17

subject of the early history of the cinnamon plan': LXX. have repier fuorro kal 'louddi(or). The operation, which was performed with a sharp instrument (Ex. iv. 25; Josh. v. 2 [KNIFE]), was a painful one, at least to grown persons (Gen. xxxiv 25; Josh. v. 8). It seems to have been customary to name a child when it was circun cised (Luke L 5.91.

Digitized by GOOG

^{• •} Probably "churches," for the plural (Acts xv. (1) manurally refers to churches in each of the two growinces, not to one church in each of the two.

164 CIRCUMCISION

Various explanations have been given of the fact, that, though the Israelites practised circumcision in Egypt, they neglected it entirely during their burneying in the wilderness (Josh. v. 5). The most satisfactory account of the matter appears to be, that the nation, while bearing the punishment of disobedience in its forty years' wandering, was regarded as under a temporary rejection by God, and was therefore prohibited from using the sign of the Covenant. This agrees with the mention of their disobedience and its punishment, which immediately follows in the passage in Joshua (v. 6), and with the words (v. 9), "This day have I rolled away the reproach of Egypt from off you." The " reproach of Egypt " was the threatened taunt of their former masters that God had brought them into the wilderness to slay them (Ex. xxxii. 12; Num. xiv. 13-16; Deut. ix. 28), which, so long as they remained uncircumcised and wanderers in the desert for their sin, was in danger of falling upon them. (Other views of the passage are given and discussed in Keil's Commentary on Joshua, in Clark's Theol. Libr., p. 129, &c.)

The use of circumcision by other nations beside the Jews is to be gathered almost entirely from sources extraneous to the Bible. The rite has been found to prevail extensively both in ancient and modern times; and among some nations, as, for instance, the Abyssinians, Nubians, modern Egyptians, and Hottentots, a similar custom is said to be practiced by both sexes (see the Penny Cyclopadia, article Circumcision). The Biblical notice of the rite describes it as distinctively Jewish; so that in the N. T. "the circumcision " (1 περιτομή) and the uncircumcision ($\dot{\eta}$ à $\kappa \rho o \beta v \sigma \tau (a)$ are frequently used as synonyms for the Jews and the Gentiles. Circumcision certainly belonged to the Jews as it did to no other people, by virtue of its divine institution, of the religious privileges which were attached to it, and of the strict regulations which enforced its observance. Moreover, the O. T. history incidentally discloses the fact that many, if not all, of the nations with whom they came in contact were uncircumcised. One tribe of the Canaanites, the Hivites, were so, as appears from the story of Hamor and Shechem (Gen. xxxiv.). To the Philistines the epithet "uncircumcised " is constantly applied (Judg. xiv. 3, &c. Hence the force of the narrative, 1 Sam. xviii. 25-27). From the great unwillingness of Zipporah to allow her son to be circumcised (Ex. iv. 25), it would seem that the Midianites, though descended from Abraham by Keturah (Gen. xxv. 2), did not practice the rite. The expression "lying uncircumcised," or "lying with the uncircumcised," as used by Ezekiel (c. xxxii.) of the Egyptians, Assyrians, and others, does not necessarily affirm any thing either way, as 'o the actual practice of circumcision by those na-Las. The origin of the custom amongst one large section of those Gentiles who follow it, is to be found in the Biblical record of the circumcision of Ishmael (Gen. 1vii. 25). Josephus relates that the Arabians circumcise after the thirteenth year, besause Ishmael, the founder of their nation, was cir-"uncised at that age (Ant. i. 12, § 2; see Lane's Mod. Egypt. ch. ii.). Though Mohammed did not enjoin circumeision in the Koran, he was circumsized himself, according to the custom of his country; and circumcision is now as common amongst e Mohammedans as amongst the Jews.

Another passage in the Bible has been thought

k

cumcised. In Jer. ix. 25, 26 (Heb. 24, 25) the expression (דְּעָרָלָה), ver. 24) which is translated in the A. V. "all them which are circumcised with the uncircumcised," is rendered by Michaelis and Ewald "all the uncircumcised circumcised ones," and the passage understood to de scribe the Egyptians, Jews, Edomites, Ammonites, and Moabites, as alike circumcised in flesh and uncircumcised in heart. But, whatever meaning be assigned to the particular expression (Rosenmüller agrees with the A. V.; Maurer suggests "circumcised in foreskin "), the next verse makes a plain distinction between two classes, of which all the Gentiles (בל-דונויב), including surely the Egyptians and others just named, was one, and the house of Israel the other; the former being uncircumcised both in flesh and heart, the latter, though possessing the outward rite, yet destitute of the corresponding state of heart, and therefore to be vis-ited as though uncircumcised. The difficulty that then arises, namely, that the Egyptians are called uncircumcised, whereas Herodotus and others state that they were circumcised, has been obviated by supposing those statements to refer only to the priests and those initiated into the mysteries, so that the nation generally might still be spoken of as uncircumcised (Herod. ii. 36, 37, 104; and Wesseling and Bähr in loc.). The testimony of Herodotus must be received with caution, especially as he asserts (ii. 104) that the Syrians in Palestine confessed to having received circumcision from the Egyptians. If he means the Jews, the assertion, though it has been ably defended (see Spencer, de Leg. *llebr.* i. 5, § 4) cannot be reconciled with Gen. xvii.; John vii. 22. If other Syrian tribes are intended, we have the contradiction of Josephus, who writes, "It is evident that no other of the Syrians that live in Palestine besides us alone are circumcised " (Ant. viii. 10, § 3. See Whiston's note there). Of the other nations mentioned by Jeremiah, the Moabites and Ammonites were descended from Lot, who had left Abraham before he received the rite of circumcision; and the Edomites cannot be shown to have been circumcised until they were compelled to be so by Hyrcanus (Joseph. Ant. xiii. 9, § 1). The subject is fully discussed by Michaelis (Commenturies on the Laws of Moses, iv. 3, claxaiv.-claxavi.).

The process of restoring a circumcised person to his natural condition by a surgical operation was sometimes undergone (Celsus, de Re Medica, vil. 25). 'Some of the Jews in the time of Antiochus Epiphanes, wishing to assimilate themselves to the heathen around them, built a gymnasium (yuurd- $\sigma(ov)$ at Jerusalem, and that they might not be known to be Jews when they sppeared naked in the games, "made themselves uncircumcised" (1 Maco. i. 15, inolygar iautois appobustlas: fecerunt sibi proputiu; Joseph. Ant. xii. § 5, 1, The τών αίδοίων περιτομήν επικαλύπτειν, κ. τ. λ.). Against having recourse to this practice, from an excessive anti-Judaistic tendency, St. Paul cautions the Corinthians in the words "Was any one called leing circumcised, let him not become uncircumcised " (μ) επισπάσθω, 1 ('or. vii. 18). See the Essay of Groddeck, De Judavis proeputium, &c., in Schittgen's Hor. Hebr. ii.

The attitude which Christianity, at its introduction, assumed towards circumcision was one of absolute hostility, so far as the necessity of the rite by some to speak of certain Gentile nations as cir- to ralvation, or its possession of any religious or

mora, worth were concerned (Acts xv.; Gal. v. 2). | along the high roads, for the sustenance of the But while the Apostles resolutely forbade its imposition by authority on the Sentiles, they made no objection to its practice, as a mere matter of feeling or expediency. St. Paul, who would by no means consent to the demand for Titus, who was a Greek, to be circumcised (Gal. ii. 3-5), on another occasion had Timothy circumcised to conciliate the Jews, and that he might preach to them with more effect as being one of themselves (Acts xvi. 8). The Abyssinian Christians still practice circumcision as a national custom. In accordance with the spirit of Christianity, those who ascribed effiency to the mere outward rite, are spoken of in the N. T. almost with contempt as "the concision " 07 "amputation" (The Ratatoute); while the claim to be the true circumcision is vindicated for Christians themselves (Phil. iii. 2, 8). An ethical idea is attached to circumcision even in the O. T., where uncircumcised lips (Ex. vi. 12, 30), or ears (Jer. vi. 10), or hearts (Lev. xxvi. 41) are spoken of, i. e., either stammering or dull, closed as it were with a

foreskin (Genen. Heb. Lex. s. v. ערל), or rather rebellious and unholy (Deut. xxx. 6; Jer. iv. 4), because circumcision was the symbol of purity (see Is. lii. 1). Thus the fruit of a tree is called uncircumcised, or in other words unclean (Lev. xix. 23). In the N. T. the ethical and spiritual idea of purity and holiness is fully developed (Col. ii. 11, 13; Rom. ii. 28, 29). T. T. P.

CIS (Rec. T. Kis [and so written because the Greek alphabet did not express sh]; Lachm. [Tisch. Treg.] with [Sin.] A B C D, Kels: Cis), Acts **х**ій. 21. [Кіян, 1.]

CI'SAI [2 syl.] (Kiraîos; [Vat. Alex. FA Keisaios:] Cis), Esth. xi. 2. [KISH, 2.]

CISTERN (בוֹר, from אָם, dig or bore, Gesen. 176: usually Adamos: cisterna or lucus), a receptacle for water, either conducted from an external spring, or proceeding from rain-fall.

The dryness of the summer months between May and September. in Syria, and the scarcity of springs in many parts of the country, make it necessary to collect in reservoirs and cisterns the rain-water, of which abundance falls in the intermediate period (Shaw, Travels, 335; S. Jerome, quoted by Harmer, i. 148; Robinson, i. 430; Kitto, Phys. Geogr. of H. L. 302, 303). Thus the cistern is essentially

distinguished from the living spring]??, 'Ain ;

but from the well ND, Beer, only in the fact that Beer is almost always used to denote a place ordinarily containing water rising on the spot, while

T.I., Bor, is often used for a dry pit, or one that may be left dry at pleasure (Stanley, S. of P. 512, 514). [AIN; WELL.] The larger sort of public tanks or reservoirs, in Arabic, Birkeh, Hebrew Berecah, are usually called in A. V. "pool," while for the smaller and more private it is convenient to reserve the name cistern

Both birkehs and cisterns are frequent throughout the whole of Syria and Palestine, and for the construction of them the rocky nature of the ground affords peculiar facilities either in original excavation, or by enlargement of natural cavities. Dr. Robinson remarks that the inhabitants of all the all country of Judah and Benjamin are in the bahit of collecting water during the rainy season m haks and cisterns, in the cities and fields, and Hableh, some were covered with flat stones resting

selves and their flocks, and for the comfort of the passing traveller. Many of these are obviously antique, and exist along ancient roads now deserted. On the long forgotten way from Jericho to Bethel, "broken cisterns" of high antiquity are found at regular intervals. Jerusalem, described by Strabo as well supplied with water, in a dry neighborhood (xvi. 760), depends mainly for this upon its cisterns, of which almost every private house possesses one or more, excavated in the rock on which the city is built. The following are the dimensions of 4, belonging to the house in which Dr. Robinson resided. (1.) 15 ft. ×8×12 deep. (2.) 8×4 (3.) $10 \times 10 \times 15$. (4.) $30 \times 30 \times 20$. X 15. The cisterns have usually a round opening at the top, sometimes built up with stonework above, and furnished with a curb and a wheel for the bucket (Eccl. xii. 6), so that they have externally much the appearance of an ordinary well. The water is conducted into them from the roofs of the houses during the rainy season, and with care remains sweet during the whole summer and autumn. In this manner most of the larger houses and public buildings are supplied (Robinson, i. 324-5). Josephus (B, J, iv. 4, § 4) describes the abundant provision for water supply in the towers and fortres of Jerusalem, a supply which has contributed greatly to its capacity for defense, while the dryness of the neighborhood, verifying Strabo's expression την κύκλω χώραν έχον λυπράν και άνυδρον, has in all cases hindered the operations of besiegers. Thus Hezekiah stopped the supply of water outside the city in anticipation of the attack of Sennacherib (2 Chr. xxxii. 3, 4). The progress of Antiochus Sidetes, B. C. 134, was at first retarded by want of water, though this want was afterwards unexpectedly relieved (Joseph. Ant. xiii. 8, § 2; Clinton, iii. 331). Josephus also imputes to divine interposition the supply of water with which the army of Titus was furnished after suffering from want of it (B. J. v. 9, § 4). The crusaders also, during the siege A. D. 1099, were harassed by extreme want of water while the besieged were fully supplied (Matth. Paris, Ilist. pp. 46, 49, ed. Wat.) The defense of Masada by Joseph, brother of Herod, against Antigonus, was enabled to be prolonged, owing to an unexpected replenishing of the cisterns by a shower of rain (Joseph. Ant. xiv. 15, § 2), and in a subsequent passage he describes the cisterns and reservoirs, by which that fortress was plentifully supplied with water, as he had previously done in the case of Jerusalem and Machaerus (B. J. iv. 4, § 4, iv. 6, § 2, vii. 8, § 3). Benjamin of Tudela says very little water is found at Jerusalem, but the inhabitants drink rain-water, which they collect in their houses (Early Trav. p. 84).

Burckhardt mentious cisterns belonging to private houses, among other places, at Sermein, near Aleppo (Syrin, p. 121), El Bara, in the Orontes valley (p. 132), Dhami and Missema in the Lejah (pp. 110, 112, 118), Tiberias (p. 331), Kerek in Moab (p. 377), Mount Tabor (p. 334). Of some at Hableh, near Gilgal, the dimensions are given by Robinson: -(1.) 7 ft. $\times 5 \times 3$ deep. (2.) Nearly the same as (1). (3.) $12 \times 9 \times 8$. They have one or two steps to descend into them, as in the case with one near Gaza, now disused, described by Sandys as "a mighty cistern, filled only by the rain-water, and descended into by stairs of stone" (Sandys, p. 150; Robinson, ii. 39). Of those at an arches, some entirely open, and all evidently aneient (Robinson, iii. 137).

Empty cisterns were sometimes used as prisons and places of confinement. Joseph was cast into a "pit," "II (Gen. xxxvii. 22), and his "dungeon" in Egypt is called by the same name (xli, 14). Jeremiah was thrown into a miry though empty cistern, whose depth is indicated by the cords used to let him down (Jer. xxxviii. 6). To this prison tradition has assigned a locality near the gate called Herod's gate (Hasselquist, p. 140; Maundrell, Early Trav. p. 448). Vitruvius (viii. 7) describes the method in use in his day for constructing water tanks, but the native rock of Palestine usually superseded the necessity of more art in this work than is sufficient to excavate a basin of the required dimensions.

The city of Alexandria is supplied with water contained in arched cisterns supported by pillars, extending under a great part of the old city (Van Egmont, Travels, ii. 134). [POOL; WELL] H. W. P.

CITHERN (= cithara, Kildopa, 1 Macc. iv. 54), a musical instrument most probably of Greek origin, employed by the Chaldeans at balls and routs, and introduced by the Hebrews into Palestine on their return thither after the Babylonian Captivity. The cithern was of the guitar species. and was known at a later period as the Cittern, under which name it is mentioned by the old dramatists as having constituted part of the furniture of a barher's shop. Of the same species is the Cither or Zither of Southern Germany, Tyrol, and Switzerland.

With respect to the shape of the Cithern or Cithara mentioned in the Apocrypha, the opinion of the learned is divided: according to some it resembled in form the Greek Delta (Δ), others represent it as a half-moon, and others again like the modern guitar. In many eastern countries it is still in use, with strings varying in number from three to twenty-four. Under the name of Koothir, the traveller Niebuhr describes it as a wooden plate

or dish, with a hole beneath and a piece of skin stretched above like a drum. Two sticks, joined after the manner of, a fan, pass through the skin at the end, and where the two sticks stand apart they are connected by a transversal piece of wood. From the upper end of this wooden triangle to the point below are fastened five chords, which at a little distance above their junction, pass over a bridge, like the strings of a violin. The chords

Cithern.

re made to vibrate by means of a leather thong fastened to one of the lateral sticks of the triangle. n Mendelssohn's edition of the Psalms represenations are given of the several musical instruments met with in the sacred books, and Koothir or Kothros is described by the accompanying figure.

The Cithara, if it be not the same with, resembles very closely, the instruments mentioned in the book of Psalms under the denominations of TIDE 그렇곳, respectively rendered in the A. V. harp," "pealtery," "organ." In Chaldee, Cithara (Dan. iii. 5). In the A. V. הרוס is rendered "harp," and the same word is employed instead of Cithern (1 Macc. iv. 54) in Robert Barker's edition of the English Bible, London, 1615. Gesenius considers Cithara as the same with harp; but Luther translates *kildqais* by mit Pfeifen, "with pipes." (See Biour to Mendelssohn's Psalms, 2d Pref.; Niebuhr, Travels; Fürst's Concordance; D. W. M.

CITIES. (1.) עַרִים, plur. of both יאַר, יאר אין, יאר and also "Ir, from "IV, to keep watch - Gen p. 1004, 5; once (Judg. x. 4) in plur. "", for the sake of a play with the same word, plur. of , a young ass: πbheis: civilates, or urbes. (2.) קרירגים, Kirjath; once in dual, קרירגים, Kirjathaim (Num. xxxii. 37), from , approach as an enemy, prefixed as a name to many names of towns on both sides of the Jordan existing before the conquest, as Kirjath-Arba, probably the most ancient name for city, but seldom used in prose as a general name for town (Ges. p. 1236; Stanley, S. & P. App. § 80).

The classification of the human race into dwellers in towns and nomad wanderers (Gen. iv. 20, 22) seems to be intimated by the etymological sense of both words, 'Ar, or '/r, and Kirjath, namely, as places of security against an enemy, distinguished from the unwalled village or hamlet, whose resistance is more easily overcome by the marauding tribes of the desert. This distinction is found actually existing in countries, as Persia and Arabia, in which the tent-dwellers are found, like the Rechabites, almost side by side with the dwellers in cities, sometimes even sojourning within them, but not amalgamated with the inhabitants, and in general making the desert their home, and, unlike the Rechabites, robbery their undissembled occupation (Judg. v. 7; Jer. xxxv. 9, 11; Fraser, Persia, 366, 380: Malcolm, Sketches of Persia, 147-156; Burckhardt, Notes on Bedowins, i. 157; Wellsted, Travels in Arabia, i. 835; Porter, Damascus, ii. 96, 181, 188; Vaux, Nineveh and Persepolis, c. ii. note A; Layard, Nineveh, ii. 272; Nin. & Bab. 141). [VILLAGES.]

The earliest notice in Scripture of city-building is of Enoch by Cain, in the land of his "exile

(T), Nod, Gen. iv. 17). After the confusion of tongues, the descendants of Nimrod founded Babel. Erech, Accad, and Calneh, in the land of Shinar. and Asshur, a branch from the same stock, built Nineveh, Rehoboth-by-the-river, Calab, and Resen, the last being "a great city." A subsequent passage mentions Sidon, Gaza, Sodom, Gomorrah, Admah, Zeboim, and Lasha, as cities of the Canaanites, but without implying for them antiquity equal to that of Nineveh and the rest (Gen. x. 10-12, 19, xi. 8, 9, xxxvi. 37). Sir H. Rawlinson supposes, (1) that the expedition of Chedorlaomer (Gen. xiv.) was prior to the building of Babylon or Nineveh, indicating a migration or conquest from Persia or Assyria; (2) that by Nimrod is to be understood not an individual, but a name denoting the "acttlers" in the Assyrian plain; and (3) that the names Rehoboth, Calah, &c., when first mentionen only denoted sites of buildings afterwards erected. e translated קרורוס, the Keri for וקיתרוס He supposes that Nineveh was built about 1954

ylon appears to have existed in the 15th century B. C. If this be correct, we must infer that the places then attacked, Sodom, Gomorrah, &c., were sities of higher antiquity than Nineveh or Babylon, inasmuch as when they were destroyed a few years later, they were cities in every sense of the term. The name Kirjathaim, "double-city" (Ges. p. 1236), indicates an existing city, and not only a site It may be added that the remains of civic buildings existing in Moab are evidently very ancient, if not, in some cases, the same as those erected by the aboriginal Emims and Rephaims. (See also the name Avith, ' ruins," Ges. p. 1000; Gen. xix. 1, 29, xxxvi. 35; Is xxiii. 13; Wilkinson, Anc. Egypt. i. 308; Layard, Nin. of Bab. p. 532; Porter. Damascus, i. 309, ii. 196; Rawlinson, Outlines of Assyr. Hist. 4, 5.) But though it appears probable that, whatever dates may be assigned to the building of Babylon or Nineveh in their later condition, they were in fact rebuilt at those epochs, and not founded for the first time, and that towns in some form or other may have occupied the sites of the later Nineveh or Calah; it is quite clear that cities existed in Syria prior to the time of Abraham, who himself came from "Ur," the "city" of the Chaldmans (Ges. p. 55; Rawlinson, p. 4).

The earliest description of a city, properly so called, is that of Sodom (Gen. xix. 1-32); but it is certain that from very early times cities existed on the sites of Jerusalem, Hebron, and Damascus. The last, said to be the oldest city in the world, must from its unrivalled situation have always commanded a congregated population; Hebron is said to have been built seven years before Zoan (Tanis) in Egypt, and is thus the only Syrian town which presents the elements of a date for its foundation (Num. xiii. 22; Stanley, S. & P. p. 409; Joseph. Ant. i. 6, § 4; Conybeare and Howson, Life and Eg. of St. Paud, i. 94, 96).

But there can be no doubt that, whatever date may be given to Egyptian civilization, there were inhabited cities in Egypt long before this (Gen. xii. 14, 15; Martineau, East. Life. i. 151; Wilkinson, i. 307; Dict. of Geogr. art. Tanis). The name. however, of Hebron, Kirjath-Arba, indicates its existence at least as early as the time of Abraham as the city, or fortified place of Arba, an aboriginal province of southern Palestine (Gen. xxiii. 2; Josh. siv. 15). The "tower of Edar," near Bethlehem, or " of flocks " קנדל עוד, indicates a position fortified against marauders (Gen. xxxv. 21) Whether "the city of Shalem" be a site or an existing town cannot be determined, but there can be no doubt that the situation of Shechem is as well identified in the present day, as its importance as a fortified place is plain from the Scripture nar-rative (Gen. xxxiii. 18, xxxiv. 20, 26; Robinson, 1. 287). On the whole it seems plain that the Camanite, who was " in the land " before the coming f Abraham, had already built cities of more or less , nportance, which had been largely increased by the time of the return from Egypt.

Even before the time of Abraham there were cities in Egypt (Gen. xii. 14, 15; Num. xiii. 32; Wilkinson, i. 4, 5). The Israelites, during their sojourn there, were employed in building or fortitying the "treasure cities" of Pithom (*Abbasich*) and Raamses (Ex. i. 11; Hered. ii. 158; Winer, Genenius, s. ev.; Robinson, i. 54, 55). but their sentored habits nake it unlikely that they should

B. C., and Calah about a century later, while Bab-| build, still less fortify, cities of their own in Goshen rion appears to have existed in the 15th century (Gen. xlvi. 84, xlvii. 1-11).

Meanwhile the settled inhabitants of Syria on both sides of the Jordan had grown in power and in number of "fenced cities." In the kingdom of Sihon are many names of cities preserved to the present day; and in the kingdom of Og, in Bashan, were 60 "great cities with walls and brazen bars." besides unwalled villages; and also 23 cities in Gilead, which were occupied and perhaps partly rebuilt or fortified by the tribes on the cast of Jordan (Num. xxi. 21, 32, 33, 35, xxxii. 1-3, 34, 42; Deut. iii. 4, 5, 14; Joeh. xi., xiii.; 1 K. iv. 13; 1 Chr. ii. 22; Burckhardt, Syria, pp. 311, 457. Porter, Damascue, ii. 195, 196, 206, 259, 275).

On the west of Jordan, whilst 31 "royal" cities are enumerated (Josh. xii.), in the district assigned to Judah 125 "cities" with villages are reckoned (Josh. xv.); in Benjamin 26; to Simeon 17; Zabulun 12; Issachar 16; Aaher 22; Naphtali 19; Dan 17 (Josh. xviii., xix.). But from some of these the possessors were not expelled till a late period, and Jerusalem itself was not captured till the time of David (2 Sam. v. 6-9).

From this time the Hebrews became a citydwelling and agricultural rather than a pastoral people. David enlarged Jerusalem, and Solomon, besides embellishing his capital, also built or rebuilt Tadmor, Palmyra, Gezer, Beth-horon, Hazor, and Megiddo, besides store-cities (2 Sam. v. 7, 9, 10; 1 K. iz. 15–18; 2 Chr. viii. 6). To Solomon also is ascribed by eastern tradition the building of Persepolis (Chardin, *Voyage*, viii. 390; Mandelslo, i. 4; Kurän, ch. xxxviii.).

The works of Jeroboam at Shechem (1 K. xii. 25; Judg. iz. 45), of Rehoboam (2 Chr. xi. 5-10) of Basaha at Rama, interrupted by Asa (1 K. xv. 17, 32), of Omri at Samaria (xvi. 24), the rebuilding of Jericho in the time of Ahab (xvi. 34), the works of Jehoshaphat (2 Chr. xvii. 12), of Jotham (2 Chr. xxvii. 4), the rebuilding of Jerusalem, and later still, the works of Herod and his family, belong to their respective articles.

Collections of houses in Syria for social habitation may be classed under three heads: -(1) cities; (2) towns with citadels or towers for resort and defence; (3) unwalled villages. The cities may be assumed to have been in almost all cases "fenced cities," *i. e.* possessing a wall with towers and gates (Lev. xxv. 29; Deut. ix. 1; Josh. ii. 15, vii. 30; 1 Sam. xxiii. 7; 1 K. iv. 13; 2 K. vi. 366, vii. 3, xviii. 8, 13; Acts ix. 25); and as a mark of the city wall of the captured place, so the first care of the defenders, as of the Jews after their return from captivity, was to rebuild the fortifications (2 K. xiv. 13, 22; 2 Chr. xxvi. 2, 6, xxxiii 14; Neh. iii., iv., vii.; 1 Macc. iv. 60, 61, x. 45, Xen. Hell. ii. 2, § 16).

But around the city, especially in peaceable times,

lay undefended suburbs $(\Box^{(1)} Q^{(2)} Q^{(2)})$, $\pi e \rho_i \sigma \pi \delta \rho_i a$, suburbana. 1 Chr. vi. 57 ff.; Num. xxxv. 1-5, Josh. xxi.), to which the privileges of the city extended. The city thus became the citadel, while the population overflowed into the suburbs (1 Macc. xi. 61). The absence of walls as indicating security in peaceable times, combined with populousness, as was the case in the flurishing period of Egypt, is illustrated by the prophet Zechariah (ii. 4; 1 K. iv. 25; Martineau, *East. Life*, 1. 306).

According to Eastern custom, special cities were

appointed to furnish special supplies for the service | seph. Ast. xvi. 5, § 2, 3, xx. 9, § 7). The Straight of the state; cities of store, for chariots, for horsemen, for building purposes, for provision for the royal table. Special governors for these and their surrounding districts were appointed by David and by Solomon (1 K. iv. 7, ix. 19; 1 Chr. xxvii. 25; 9 Chr. xvii. 12, xxi. 3; 1 Macc. x. 39; Xen. Anab. i. 4, § 10). To this practice our Lord alludes in his parable of the pounds, and it agrees with the theory of Hindoo government, which was to be conducted by lords of single townships, of 10, 100, or 1000 towns (Luke xix. 17, 19; Elphinstone, India, ch. ii., i. 89, and App. v. p. 485).

To the Levites 48 cities were assigned, distributed throughout the country, together with a certain amount of suburban ground, and out of these 48, 13 were specially reserved for the family of Aaron. 9 in Judah and 4 in Benjamin, and 6 as refuge cities (Josh. xxi. 13, 42), but after the division of the kingdoms the Levites in Israel left their cities and resorted to Judah and Jerusalem (2 Chr. xi. 13. 14).

The internal government of Jewish cities was vested before the Captivity in a council of elders with judges, who were required to be priests: Josephus says seven judges with two Levites as officers, Sanoérai (Deut. xxi. 5, 19, xvi. 18, xix. 17; Ruth iv. 2; Joseph. Ant. iv. 8, § 14). Under the kings a president or governor appears to have been appointed (1 K. xxii. 26; 2 Chr. xviii. 25); and judges were sent out on circuit, who referred matters of doubt to a council composed of priests, Levites, and elders, at Jerusalem (1 Chr. xxiii. 4, xxvi. 29; 2 Chr. xix, 5, 8, 10, 11). After the Captivity Ezra made similar arrangements for the appointment of judges (Ezr. vii. 25). In the time of Josephus there appear to have been councils in the provincial towns, with presidents in each, under the directions of the great council at Jerusalem (Joseph. Ant. xiv. 9, § 4; B. J. ii. 21, § 3; Vit. 12, 13, 27, 34, 57, 61, 68, 74). [SANHEDRIM.]

In many Eastern cities much space is occupied by gardens, and thus the size of the city is much increased (Niebuhr, Voyage, ii. 172, 239; Conybeare and Howson, i. 96; Eöthen, p. 240). The rast extent of Nineveh and of Babylon may thus we in part accounted for (Diod. ii. 70; Quint. Curt. 1. i. 26; Jon. iv. 11; Chardin, Voy. vii. 273, 284; Porter, Damascus, i. 153; P. della Valle, ii. 83). in most Oriental cities the streets are extremely narrow, seldom allowing more than two loaded samels, or one camel and two foot passengers, to pass each other, though it is clear that some of the streets of Nineveh must have been wide enough for shariots to pass each other (Nah. ii. 5; Olearius, Trav. pp. 294, 309; Burckhardt, Trav. in Arabia, 1. 188; Buckingham, Arab Tribes, p. 330; Mrs. Poole. Englishic. in Egypt, i. 141). The word for Poole, Englishie. in Egypt, i. 141). streets used by Nahum - , from , from , broad, mhareias - is used also of streets or broad places in Jerusalem (Prov. i. 20; Jer. v. 1, xxii. 4; 287, 288). (3.) HEBRON, in Judah, el-A hutil Cant. iii. 2); and it may be remarked that the Thateias into which the sick were brought to receive the shadow of St. Peter (Acts v. 15) were more likely to be the ordinary streets than the special purzze of the city. It seems likely that the immense concourse which resorted to Jerusalem at the feasts would induce wider streets than in other cities. Herod built in Antioch a wide street paved with stone, and having covered ways on each side. Agrippa II. paved Jerusalem with white stone (Jo- iv. 7, § 4; Reland, p. 662). (5.) RAMOTH GIL

street of Damascus is still clearly defined and recog nizable (Irby and Mangles, v. 86, Robinson, iii 454, 455).

In building Casarea, Josephus says that Herod was careful to carry out the drainage effectually (Joseph. Ant. xv. 19, § 6); we cannot determine whether the internal commerce of Jewish cities was carried on as now by means of bazaars, but we read of the bakers' street (Jer. xxxvii. 21), and Josephus speaks of the wool market, the hardware market, a place of blacksmiths' shops, and the clothes market, at Jerusalem (B. J. v. 8, § 1).

The open spaces $(\pi\lambda_{\alpha\tau}\epsilon_{i\alpha\prime})$ near the gates of towns were in ancient times, as they are still, used as places of assembly by the eldera, of holding courts by kings and judges, and of general resort by citizens (Gen. xxiii. 10; Ruth iv. 1; 2 Sam. xv. 2, xviii. 24; 2 K. vii. 1, 3, 20; 2 Chr. xviii. 9, xxxii. 6; Neh. viii. 13; Job xxix. 7; Jer. xvii. 19; Matt. vi. 5; Luke xiii. 26). They were also used as places of public exposure by way of punishment (Jer. xx. 2; Am. v. 10).

Prisons were under the kingly government, within the royal precinct (Gen. xxxix. 20; 1 K. xxii. 27; Jer. xxxii. 2; Neh. iii. 25; Acts xxi. 34, xxiii. 35).

Great pains were taken to supply both Jerusalem and other cities with water, both by tanks and cisterns for rain-water, and by reservoirs supplied by aqueducts from distant springs. Such was the fountain of Gibon, the aqueduct of Hezekiah (2 K. xx. 20; 2 Chr. xxxii. 30; Is. xxii. 9), and of Solomon (Eccl. ii. 6), of which last water is still conveyed from near Bethlehem to Jerusalem (Maundrell, Early Trav. p. 457; Robinson, i. 347, 348) Josephus also mentions an attempt made by Pilate to bring water to Jerusalem (Ant. xviii, 8, 2). [CONDUIT.]

Burial-places, except in special cases, were outside the city (Num. xix. 11, 16; Matt. viii. 28, Luke vii. 12; John xix. 41; Heb. xiii. 12).

H. W. P.

CITIES OF REFUGE (ערי המקלט,

from 27, to contract [take in, i. e. a fugitive, hence, cities of reception], Gesen. p. 1216: moheus τών φυγαδευτηρίων, φυγαδευτήρια, φυγαδεία oppida in fugitivorum auxilia, præsidia, separata, urbes fugitivorum). Six Levitical cities specially chosen for refuge to the involuntary homicide unti. released from banishment by the death of the highpriest (Num. xxxv. 6, 13, 15; Josh. xx. 2, 7, 9). [BLOOD, REVENGER OF.] There were three on each side of Jordan. (1.) KEDESH, in Nauhtali, Kedes, about twenty miles E. S. E. from Tyre twelve S. S. W. from Banias (1 Chr. vi. 76; Rob inson, ii. 439; Benj. of Tudela, Early Trar. p. 89) (2.) SHECHEM, in Mount Ephraim, Nobulus (Josh. xxi. 21; 1 Chr. vi. 67; 2 Chr. x. 1; Robinson, ii The two last were royal cities, and the latter sacerdotal also, inhabited by David, and fortified by Rehoboam (Josh. xxi. 18; 2 Sam. v. 5; 1 Chr. vi. 55 xxix. 27; 2 Chr. xi. 10; Robinson, i. 213, ii. 89). (4.) On the E. side of Jordan - BEZER, in the tribe of Reuben, in the plains of Moab, said in the Gemara to he opposite to Hebron, perhaps Bosor but the site has not yet been found (Deut. iv. 43 Josh. xx. 8, xxi. 86; 1 Macc. v. 26; Joseph. Ans

EAD, in the tribe of Gad, supposed to be on or | in that of the congregation, to which every Hebrew near the site of es-Szalt (Deut. iv. 43; Josh. xxi. and even strangers under certain restrictions, were 38; 1 K. xxii. 3; Reland, iii. 966). (6.) GULAN, in Bashan, in the half-tribe of Manasseh, a town whose site has not been ascertained, but which doubtless gave its name to the district of Gaulonitis, Jaulin (Deut. iv. 43; Josh xxi. 27; 1 Chr. vi. 71; Joseph. Ant. iv. 7, § 4; Reland, p. 815; Porter. Damascus, ii. 251, 254; Burckhardt, Syria, p. 286).

The Gemara notices that the cities on each side of the Jordan were nearly opposite each other, in accordance with the direction to divide the land in'o three parts (Deut. xix. 2; Reland, iii. 662). Maimonides says all the 48 Levitical cities had the privilege of asylum, but that the six refuge-cities were required to receive and lodge the homicide gratuitously (Calmet, On Num. xxxv.).

Most of the Rabbinical refinements on the Law are stated under BLOOD, REVENGER OF. To them may be added the following. If the homicide committed a fresh act of manslaughter, he was to flee to another city; but if he were a Levite, to wander from city to city. An idea prevailed that when the Messiah came three more cities would be added; a misinterpretation, as it seems, of Deut. xix. 8, 9 (Lightfoot, Cent. Chor. clii. 208). The altar at Jerusalem, and, to some extent also, the city itself, possessed the privilege of asylum under similar restrictions; a privilege claimed, as regards the former, successfully by Adonijah and in vain by Joab; accorded, as regards the city, to Shimei, but forfeited by him (1 K. i. 53, ii. 28, 33, 36, 46).

The directions respecting the refuge-cities present some difficulties in interpretation. The Levit-Ical cities were to have a space of 1000 cubits (about 583 yards) beyond the city wall for pasture and other purposes. Presently after, 2000 cubits are ordered to be the suburb limit (Num. xxxv. 4, 5). The solution of the difficulty may be, either the 2000 cubits are to be added to the 1000 as "fields of the suburbs" (Lev. xxv. 34) as appears to have been the case in the gift to Caleb, which excluded the city of Hebron, but included the "fields and villages of the city" (Josh. xxi. 11, 12, Patrick), or that the additional 2000 cubits were a special gift to the refuge-cities, whilst the other Levitical cities had only 1000 cubits for suburb. Calmet supposes the line of 2000 cubits to be measured parallel, and the 1000 perpendicular to the city wall; an explanation, however, which supposes all the cities to be of the same size (Calmet, On Num. XXXV.).

The right of asylum possessed by many Greek and Roman towns, especially Ephesus, was in process of time much abused, and was curtailed by Tiberius (Tac. Ann. iii. 60, 63). It was granted, under certain limitations, to churches by Christian superors (Cod. i. tit. 12; Gibbon, ch. xx. iii, 35, Snith). Hence came the right of sanctuary posessed by so many churches in the middle ages (Hallam, Middle Ayes, ch. ix. pt. 1, vol. iii. r. 302, H. W. 5. ith ed.).

CITIMS (Kiriéos [rather Kir eis]; A.ex. eriaioi: Cetei), 1 Maco. viii. 5. [CHITTIM.]

CITIZENSHIP (modirela: civins). The use of this term in Scripture has exclusive reference to the usages of the Roman empire; in the Hebrew unmonwealth, which was framed on a basis of reagious rather than of political privileges and distinc- mentioned in 2 Tim. iv. 21, as saluting Timotheus.

The admitted. [CONGREGATION; STRANGERS.] privilege of Roman citizenship was widely extended

under the emperors; it was originally acquired iz various ways, as by purchase (Acts xxii. 28; Cic ad Fam. xiii. 36; Dion Cass. 1x. 17), by military services (Cic. pro Balb. 22; Suet. Aug. 47), by favor (Tac. Hist. iii. 47), or by manumission. The right once obtained descended to a man's children (Acts xxii. 28). The Jews had rendered signal services to Julius Casar in the Egyptian war (Joseph. Ant. xiv. 8, § 1, 2), and it is not improhible that many obtained the freedom of the city on that ground: certain it is that great numbers of Jews, who were Roman citizens, were scattered over Greece and Asia Minor (Ant. xiv. 10, § 13, 14). Among the privileges attached to citizenship, we may note that a man could not be bound or imprisoned without a formal trial (Acts xxii. 29), still less be scourged (Acts xvi. 37; Cic. in Verr. v. 63) 66); the simple assertion of citizenship was sufficient to deter a magistrate from such a step (Acts xxii. 25; Cic. in Verr. v. 62), as any infringement of the privilege was visited with severe punishment. A Jew could only plead exemption from such treatment before a Roman magistrate; he was still liable to it from Jewish authorities (2 Cor. xi. 24; Seld. de Syn. ii. 15, § 11). Another privilege attaching to citizenship was the appeal from a provincial tribunal to the emperor at Rome (Acts xxv. 11). [See the addition to APPEAL, Amer. ed.] W. L. B.

CITRON. [APPLE-TREE.]

CLAU'DA (Κλαύδη, Acts xxvii. 16; called Gaudos by Mela and Pliny, KAavoos by Ptolemy, and Khavola in the Stadiasmus Maris Mayni: it is still called Clauda-nesa, or Gaudonesi, by the Greeks, which the Italians have corrupted into Gozzo). This small island, unimportant in itself and in its history, is of very great geographical imortance in reference to the removal of some of the difficulties connected with St. Paul's shipwreck at Melita. The position of Clauda is nearly due W. of Cape Matala on the S. coast of Crete [FAIB HAVENS], and nearly due S. of PHOENICE. (See Ptol. iii. 17, § 1; Studiasm. p. 496, ed. Gail.) The ship was seized by the gale a little after passing Cape Matala, when on her way from Fair Havens to Phoenice (Acts xxvii. 12-17). The storm came down from the island (war' aut ns, v. 14) [? see under CRETE], and there was danger lest the ship should be driven into the African Syrtis (v. 17). It is added that she was driven to Clauda and ran under the lee of it (v. 16). We see at once that this is in harmony with, and confirmatory of, the arguments derivable from all the other geographical circumstances of the case (as well as from the stymology of the word Euroclydon or Euro-Aquilo), which lead us to the conclusion that the gale came from the N. E., or rather E. N. E. Under the lee of Clauda there would be smooth water, advantage of which was taken for the purpose of getting the boat on board and making preparations for riding out the gale. [SHIP.] (Smith, Voy. and Shipporeck of St. Paul, 2d ed pp. 92, 98, 253.) [3d ed. 1948, pp. 94, 100, 250.] J. S. H.

CLAUDIA (Klaudía), a Christian female sions, the ides of the commonwealth was merged There is reason for supposing that this Claudis

was a British maiden, daughter of king Cogidub- |ological difficulty. "Paul's Pudens and Claudia nus, an ally of Rome (Tacit. Agricol. 14), who | if husband and wife, must have been married be took the name of his imperial patron, Tiberius Claudius. She appears to have become the wife of Pudens, who is mentioned in the same verse. (See Martial, lib. iv. Epigr. 18.) This Pudens, we gather from an inscription found at Chichester, and now in the gardens at Goodwood, was at one time in close connection with king Cogidubnus, and gave an area for a temple of Neptune and Minerva which was built by that king's authority. And Claudia is said in Martial (xi. 53) to have been cæruleis Britannis edita. Moreover, she is there also called Rufina. Now Pomponia, wife of the late commander in Britain, Aulus Plautius, under whom Claudia's father was received into alliance, belonged to a house of which the Rufi were one of the chief branches. If she herself were a Rufa. and Claudia her protegée, the latter might well be called Rufina; and we know that Pomponia was tried as superstitionis externas rea in the year 57, Tacit. Ann. xii. 32; so that there are many circumstances concurrent, tending to give verisimilitude to the conjecture. See Archdeacon Williams's pamphlet, "On Pudens and Claudia;" - an article in the Quarterly Review for July, 1858, entitled "The Romans at Colchester;" — and an Excursus in Alford's Greek Testament, vol. iii. Prolegg. p. 104. in which the contents of the two works first mentioned are embodied in a summary form.

H.A.

* Conybeare and Howson also are disposed to adopt the foregoing view of the personal and historical relations of Pudens and Claudia (Life and Epistles of Paul, ii. 594, Amer. ed.). One obvious exegetical difficulty is that Linus stands nearer than Pudens to Claudia in the order of the names (2 Tim. iv. 21), and if Claudia was the wife of either, it is arbitrary to make her the wife of the latter rather than of the former. The reply made to this is that the amanuensis, confused by Paul's rapid dictation, may have written down the names incorrectly. The German critics, as De Wette, Matthies, Huther (in Meyer's Comm. ub. das N. Test.), Wiesinger, find no such point of contact here between secular and sacred history, but pass over the name simply with the remark that Claudia is otherwise unknown. Winer and Herzog have no articles on the name. The combinations which the writers assume who maintain that Claudia was a British princess, are strained and hypothetical. Pudens and Claudia were, confessedly, everyday names among the Romans, and therefore prove nothing as to the identity of the persons. The character of Martial forbids the idea that he could have had intimate friends among the friends of St. Paul; and still more, his invoking on them the favor of heathen gods on the occasion of their marriage (iv. 13) shows that they were still addicted to idolatry and not worshippers of the true God. The "inscription found at Chichester" also (see above) represents Pudens as a pagan. To meet these points, we are required to "suppose either that Pudens concealed his faith, or that his relstives, in their anxiety to shield him, did idolatrous acts in his name" (Life and Epistles of Paul, ii. 595). North of the Tweed this ingenious theory of the British origin of Claudia has found nuch less favor. See the objections to it forcibly stated in Dr. Kitto's Cycl. of Bibl. Lit. i. 529, 3d know was, as it still is, carried on in the country ed., 1862. The writer of the article there points (Jer. xviii. 2, 6), but our knowledge on the subject nut a near approach, at least, to a serious chron- is no small as to afford little or no means of deter

if husband and wife, must have been married be fore A. D. 67, the latest date that can be assigned to Paul's writing. But Martial's epigram must have been written after this, perhaps several years after, for he came to Rome only in A. D. 66; at that if they were married persons in 67, it is not likely Martial would celebrate their nuptials years after this."

CLAU'DIUS (Kravoios; in full, Tiberius Claudius Nero Drusus Germanicus), fourth Koman emperor, successor of Caius Caliguía, reigned from 41 to 54 A. D. He was son of Nero Drusus, was born in Lyons, Aug. 1, B. C. 9 or 10, and lived private and unknown till the day of his being called to the throne, January 24, A. D. 41. He was nominated to the supreme power mainly through he influence of Herod Agrippa the First (Joseph. Ant. xix. 2, §§ 1, 3, 4; Suet. Claud. p. 10); and when on the throne he proved himself not ungrateful to him, for he enlarged the territory of Agrippa by adding to it Judsea, Samaria, and some districts of Lebanon, and appointed his brother Herod to the kingdom of Chalcis, (Joseph. Ant. xix. 5, § 6; Dion Cass. lx. 8), giving to this latter also, after his brother's death, the presidency over the Temple at Jerusalem (Joseph. Ant. xx. 1, § 3). In Claudius's reign there were several famines, arising from unfavorable harvests (Dion Cass. lx. 11; Euseb. Chron. Armen. i. 269, 271; Tacit. Ann. xii. 18), and one such occurred in Palestine and Syria (Acts xi. 28-30) under the procurators Cuspius Fadua and Tiberius Alexander (Joseph. Ant. xx. 2, § 6, and 5, § 2), which perhaps lasted some years. Claudius was induced by a tumult of the Jews in Rome, to expel them from the city (Suet. Claud. p. 25, "Judgeos impulsore Chresto assidue tumultuantes Roma expulit; " cf. Acts xviii. 2). It is probable that Suctonius here refers to some open dissension between Jews and Christians, but when it, and the consequent edict, took place, is very uncertain. Orosius (Hist. vii. 6) fixes it in the 9th year of Claudius, A. D. 49 or 50; referring to Josephus, who, however, says nothing about it. Pearson (Annal. Paul. p. 22) thinks the 12th year more probable (A. D. 52 or 53). As Anger remarks (De temporum in Actis App. ratione, p. 117), the edict of expulsion would hardly be published as long as Herod Agrippa was at Rome, i. c. before the year 49. Claudius, after a weak and foolish reign ("non principem se, sed ministrum egit," Suet. p. 2.1) was poisoned by his fourth wife Agrippins, the mother of Nero, (Tac. Ann. xii. 66, 7; Suet. Cloud. pp. 44, 45; Joseph. Ant. xx. 9, § 1; B. J ii. 12, § 8), October 13, A. D. 54. H. A.

CLAUDIUS LYSTAS. [LYSTAS.]

CLAY (D'D: myx6s: humus or lutum), a sedimentary earth, tough and plastic, arising from the disintegration of feldspar and similar minerals, and always containing silica and alumina combined in variable proportions. As the sediment of water remaining in pits or in streets, the word is used frequently in O. T. (e. g. Is. lvii. 20; Jer. xxxviii. 6; Ps. xviii. 42), and in N. T. (#1716, John ix. 6) a mixture of sand or dust with spittle. It is also found in the sense of potter's clay (Is. xli. 25) The alluvial soils of l'alestine would no doubt supply material for pottery, a manufacture which we

Egypt, is probably more loam than clay (Birch, try, it is probable that he himself was dead before Hist. of Pottery, i. 55, 152). [POTTERY.] The word most commonly used for "potter's clay" is

ריי (Ex. i. 14; Job iv. 19; Is. xxix. 16; Jer. zviii. 4, &c.). Bituminous shale, convertible into elay, is said to exist largely at the source of the Jordan, and near the Dead Sea. The great seat of the pottery of the present day in Palestine is Gaza, where are made the vessels in dark blue clay so frequently met with.

The use of clay in brick-making is described elsewhere. [BRICK.]

Another use of clay was in sealing (Job xxxviii. 14). The bricks of Assyria and Egypt are most commonly found stamped either with a die or with marks made by the fingers of the maker. Wine jars in Egypt were sometimes sealed with clay; mummy pits were sealed with the same substance. and remains of clay are still found adhering to the stone door-jambs. Our Lord's tomb may have been thus sealed (Matt. xxvii. 66), as also the carthen vessel containing the evidences of Jeremiah's purchase (Jer. xxxii. 14). So also in Assyria at Kouyunjik pieces of fine clay have been found bearing impressions of seals with Assyrian, Egyptian, and Phœnician devices. The seal used for public documents was rolled on the moist clay, and the tablet was then placed in the fire and baked. The practice of sealing doors with clay to facilitate detection in case of malpractice is still common in the East (Wilkinson, Anc. Egypt. i. 15, 48, ii. 364; Layard, Nin. & Bub. pp. 153, 158, 608; Herod. ii. 38; Harmer, Obs. iv. 376). [BRICK; POTTERY; SEALS.] H. W. P.

* CLEAN. [UNCLEAN MEATS; UNCLEAN-NE88.]

CLEM'ENT (Kahuns: [Clemens; clement] Phil. iv. 3), a fellow-laborer of St. Paul, when he was at Philippi (for so the text implies). It was generally believed in the ancient church, that this Clement was identical with the Bishop of Rome, who afterwards became so celebrated. Whether this was so, it is impossible to say. The practice of supposing N. T. characters to be identical with persons who were afterwards known by the same names, was too frequent, and the name Clemens too common, for us to be able to pronounce on the question. The identity is asserted in Euseb. H. E. iii. 4; Origen, vol. i. p. 262, ed. Lommatzsch; and Jerome, Scriptor. Eccl. p. 176 a. Chrysostom does not mention it. Ĥ. A.

CLE'OPAS (KAcówas), one of the two disuples who were going to Emmaus on the day of the resurrection, when Jesus himself drew near and alked with them (Luke xxiv. 18). Eusebius in his **Onomisticon** makes him a native of Eminaus. It to a question whether this Cleopas is to be considered as identical with CLEOPHAS (accur. Clopas) or Alpheus in John xix. 25. [ALPH.EUS.] Their identity was assumed by the later fathers and thurch historians. But Eusebius (II. E. iii. 11) writes the name of Alphseus, Joseph's brother, Clopas, not Cleopas. And Chrysostom and Theodoret, on the Epistle to the Galatians, call James the Just the son of Clopas. Besides which, Clopas, or Al-The solution of contrast matrix of the solution of the soluti

mining, and the clay of Palestine, like that of family of Joseph at the time of our Lord's minis that time. On the whole, then, it seems safer to doubt the identity of Cleopes with Clopes. Of the further history of Cleopas nothing is known. H. A.

> CLEOPATRA (KAcord rpa), the name of numerous Egyptian princesses derived from the daughter of Antiochus III., who married Ptolemy V. Ēpiphanes, B. C. 198.

> 1. "The wife of Ptolemy" (Esth. xi. 1) was probably the granddaughter of Antiochus, and wife of Ptol. VI. Philometor. [PTOL. PHILOMETOR.]

> 2. A daughter of Ptol. VI. Philometor and Cleopatra (1), who was married first to Alexander Balas, B. C. 150 (1 Macc. x. 58), and afterwards given by her father to Demetrius Nicator when he invaded Syria (1 Macc. xi. 12; Joseph. Ant. xiii. 4, §7). During the captivity of Demetrius in Parthia [DEMETRIUS] Cleopatra married his brother Antiochus VII. Sidetes, and was probably privy to the murder of Demetrius on his return to Syria B. C. 125 (App. Syr. c. 68: yet see Joseph. Ant. xiii. 9, § 3; Just. xxxix. 1). She afterwards murdered Seleucus, her eldest son by Demetrius (App. Syr. c. 69); and at length was herself poisoned B. C. 120 by a draught which she had prepared for her second son Antiochus VIII., because he was unwilling to gratify the ambitious designs which she formed when she raised him to the throne (Justin. xxxix 2). B. F. W.

CLE'OPHAS. [CLEOPAS; ALPH.EUS.] * CLERK. [Town CLERK.]

• OLIFT, an old form of cleft, Ex. xxxiii. 22 (cf. Is. ii. 21); Is. lvii. 5. So in Job xxx. 6, A. V. ed. 1611, where cliff has been injudiciously substituted in modern editions. Clift, however, appears to be used for *cliff* in the margin of the Å. V., Is. xxxii. 14, as it is elsewhere in old English writers.

• CLOAK. [DRESS.]

* CLO'PAS (Κλωπâs: Cleophas), John xix. 25, marg., the correct form for Cleophas in the text of the A. V. See ALPHAEUS. A

CLOTHING. [DRESS.]

CLOUD (ענון). The word אים, so ren. dered in a few places, properly means "vapors," the less dense form of cloud which rises higher, and is often absorbed without falling in rain; Arab. 6 11 6

and نشاء. The word ⊐¥, sometimes rendered "cloud," means merely "darkness," and is applied also to "a thicket" (Jer. iv. 29). The shelter given, and refreshment of rain promised, by clouds, give them their peculiar prominence in Oriental imagery, and the individual cloud in that ordinarily cloudless region becomes well defined and is dwelt upon like the individual tree in the bare landscape (Stanley, S. & P. p. 140). Similarly, when a cloud a pears, rain is ordinarily apprehended, and thus the "cloud without rain " becomes a proverb for the man of promise without performance (Prov. xvi. 15; Is. xviii. 4, xxv. 5; Jude 12; comp. Prov. xxv. 14). The cloud is of course a figure of transitoriness (Job xxx. 15; Hos. vi. 4),

472 CLOUD

being. Hence it is, so to speak, the recognized nachinery by which supernatural appearances are introduced (Is. xix. 1; Ez. i. 4; Rev. i. 7, and pression), or the veil between things visible and invisible; but, more especially, a mysterious or supernatural cloud is the symbolical seat of the Divine presence itself - the phenomenon of deity vouchsafed by Jehovah to the prophet, the priest, the king, or the people. Sometimes thick darkness, sometimes intense luminousness, often, apparently, and especially by night, an actual fire (as in the descent of Jehovah on Sinai, Ex. xix. 18), is attributed to this glory-cloud (Deut. iv. 11; Ex. xl. 35, xxxiii. 22, 28; 2 Sam. xxii. 12, 13). Such a bright cloud, at any rate at times, visited and rested on the Mercy Seat (Ex. xxix. 42, 43; 1 K. viii. 11; 2 Chr. v. 14; Ez. xliii. 4) and was by later writers named Shekinah. For the curious questions which the Rabbins and others have raised concerning it, e. g. whether its light was created or not, whether the actual "light" created on the "first day" (Gen. i. 3), or an emanation therefrom, Buxtorf's history of the Ark, ch. xi.-xiv. (Ugolini, vol. vii.), may be consulted. Н. Н.

CLOUD, PILLAR OF (עַמּוּד הֵעָכָן). This was the active form of the symbolical glorycloud, betokening God's presence to lead his chosen host, or to inquire and visit offenses, as the luminous cloud of the sanctuary exhibited the same under an aspect of repose. The cloud, which besame a pillar when the host moved, seems to have between the islands of Cos and Rhodes (see A ts

material things which suggests most easily spiritual | rested at other times on the tabernacle, whence God is said to have "come down in the pillar" (Num xii. 5; so Ex. xxxiii. 9, 10). It preceded the host, apparently resting on the ark which led the way (Ex. xiii. 21, xl. 36, &c.; Num. ix. 15-23, x. 34). So by night the cloud on the tabernacle became fire, and the guiding pillar a pillar of fire. A remarkable passage in Curtius (v. 2, § 7), descriptive of Alexander's army on the march, mentions a beacon hoisted on a pole from head-quarters as the signal for marching; "observabatur ignis noctu, fumus interdiu." This was probably an adoption of an eastern custom. Similarly the Persians used as a conspicuous signal, an image of the sun inclosed in crystal (ib. iii. 3, § 9). Caravans are still known to use such beacons of fire and smoke; the cloudlessness and often stillness of the sky giving the smoke great density of volume, and boldness of outline. H. H.

> * CLOUTED, Josh. ix. 5, "old shoes and clouted," i. e. patched; compare clouts, Jer. xxxviii. 11, 12.

> CNIDUS (Kridos) is mentioned in 1 Macc. xv. 23, as one of the Greek cities which contained Jewish residents in the second century before the ('hristian era, and in Acts xxvii. 7, as a harbor which was passed by St. Paul after leaving Myra, and before running under the lee of Crete. It was a city of great consequence, situated at the extreme S. W. of the peninsula of Asia Minor [CARIA], on a promontory now called Cape Crio, which projects

Plan of Cnidus and Chart of the adjoining coast.

by an artificial causeway to the mainland, as to orm two harbors, one on the N., the other on the 8. The latter was the larger, and its moles were noble constructions. All the remains of Cnidus show that it must have been a city of great magnificence. Few ancient cities have received such umple illustration from travels and engravings. We may refer to Beaufort's Karamania, Hamilson's Researches, and Texier's Asie Mineure, also inborde, Leake, and Clarke, with the drawings in e Ionian Antiquities, published by the Dilettanti Society, and the English Admiralty Charts, Nos. In 2 Sam. xxii. 9, 13, "coals of fire" are pe

and 1). Cape Crio is in fact an island, so joined 1533, 1604. [Newton, C. T., Discoveries at Halicarnasus, Cnidus, and Branchide, Lond. 1869] J. S. II.

> COAL. In A. V. this word represents no less than five different Hebrew words. (1.) The first and most frequently used is Gackeleth, nhm (aropat, aropanid: pruna, carbo), a live ember. burning fuel, as distinguished from ETP (Prov. xxvi. 21). It is written more fully in Ez. x. 2 בחלי אש בערור, and in Ez. i. 18, בחלי אש

> > Digitized by Google

astaphorically for the lightnings proceeding from God (Ps. xviii. 8, 12, 13, cxl. 10).

In Prov. xxv. 22 we have the proverbial expression, " Thou shalt heap coals of fire upon his head,' which has been adopted by St. Paul in Rom. xii 20, and by which is metaphorically expressed the burning shame and confusion which men must feel when their evil is requited by good. In Ps. cxx. 4, "coals" = burning brands of wood (not "juniper," but broom), to which the false tongue is compared (James iii. 6).

In 2 Sam. xiv. 7 the quenching of the live coal is used to indicate the threatened destruction of the single remaining branch of the family of the widow of Tekoah suborned by Joab; just as Lucian (Tim. § 3) uses the word (demupor in the same connection.

The root of הַהָל is הַחָל, which is possibly

the same in meaning as the Arab. , to light

1 fire, with the change of \supset into \square .

2. Pechâm, CTS (ioxdpa, tropat : carbo, pruna). In Prov. xxvi. 21, this word clearly signifies fuel not yet lighted, as contrasted with the burning fuel to which it is to be added; but in Is. xliv. 12, and liv. 16, it means fuel lighted, having reference in both cases to smiths work. It is

derived from DTD: Arab. is be very black.

. .

The fuel meant in the above passages is probably charcoal, and not coal in our sense of the word.

3. Retseph, or Ritspath, 키옷그, ゴラジラ (aropat

calculus in Is. vi. 6; but in 1 K. xix. 6, Tay

D'D', is rendered by the LXX. dyapuplas drupirns, and by the Vulg. panis subcinericius) In the narrative of Elijah's miraculous meal the word is used to describe the mode in which the cake was baked, namely, on a hot stone, as is still

usual in the East. Comp. the Arab. رضف, a bot stone on which flesh is laid. TPT, in Is vi. 6, is rendered in A. V. "a live coal," but prop-

erly means "a hot stone." The root is 키꼬그, to lay stones together as a pavement.

4. Phin. in Hab. iii. 5, is rendered in A. V. "burning coals," and in the margin "burning disases." The former meaning is supported by Cant. viii. 6, the latter by Deut. xxxii. 24. According to the Rabbinical writers, $\overline{\eta}$, $\overline{\gamma}$, $\overline{\gamma}$, pruna. 5. Skechor. - In Lam. iv. 8, קשידור קשידויר קשידויר DIN is rendered in A. V. "their visage is blacker than a coal," or in the marg. " darker than blackness." ""I'l' is found but this once, and dgnifies to be black, from root TTT. The LXX. sunder it by $\delta\sigma\beta\delta\lambda\eta$, the Vulg. by carbones. In other forms the word is frequent, and Shihor is a mal name for the Nile. [SHIHOR.] ₩. D.

There can we think, be no doubt that the fuel isnoted by the Heb. words gacheleth (בַּהֵלֶה)

coal. There is no evidence to show that the ancient Hebrews were acquainted with the substance we now denominate "coul;" indeed it seems pretty clear that the ancients generally used charcoal for their fuel; and although there is a passage in The-ophrastus (Fr. ii. 61, ed. Schneider) from which we learn that fossil coal was found in Liguria and Elis, and used by "the smiths," yet its use must have been very limited. The houses of the ancient Greeks and Romans were without chimneys in our sense of the word (see this subject admirably discussed by Beckmann, Hist. Invent. i. 295). As the houses had merely an opening in the centre of the roof, the burning of " coal " would have made even their kitchens intolerable. Little as has been done for the zoölogy and botany of Palestine, still less has been done for its geology. "Indications of coal are exhibited," says Kitto (Phys. Hist. Pal. p. 67), "in various parts of the Lebanon mountains; here and there a narrow seam of this mineral protrudes through the superincumbent strate to the surface; and we learn from Mr. Elliot (ii. 257) that the enterprise of Mohammed Ali has not suffered even this source of national wealth to escape his notice." At Cornale, 8 miles from Beirût, and 2500 feet above the level of the sea, where the coal-seams are 3 feet in thickness, good coal is obtained, whence it was transported on muses to the coast.

The following works contain all that is at present known respecting the geology of Syria: -Lynch's United States Exploring Expedition to the Dead Sea and the River Jordan; Russegger's Geognostiche Karte des Libanon und Antilibanon; Kitto's Physical History of Palestine ; Dr. Brwring's Report on the Commercial Statistics of Syria. W. H.

• The Greek words in the N. T. for "coals" (Rom. xii. 20) and " fire of coals " (John xviii. 18, and xxi. 9) are are pakes and areparid, i. e. charcoal or coal made of wood. The incident of Peter's warming himself at such a fire on the night of the crucifizion, tallies both with the climate of the country at the end of March or beginning of April, and with the present customs of the people. The nights at Jerusalem, at that season of the year, are cool, though the days may be warm. The air, after sundown, becomes chilly, and, under the open sky, a person needs to increase his raiment or have recourse to a fire. Coal is one of the articles of fuel which the inhabitants of Jerusalem burn at the present day. Much of the wood which they consume, says Tobler (Denkblätter aus Jerusniem, p. 180), and probably much of that out of which the coal is made, is procured from the region of Hebron. This writer mentions also that the coal fire is often built, especially in houses of the better class, in a vessel like a brazier, around which the family gather, and, with out-stretched hands, stand and warm themselves. It is a custom, as he remarks (Denkblätter, p. 181), that vividly recalls the ancient scene in the court of the high-priest (scal έθερμαίνοντο, John xviii. 18).

Dr. Robinson furnishes an outline of the results of the observations of such professional explorers as Sectzen, Russegger, Schubert, Anderson, and others, in relation to the "Geological Features " of Palestine (chapter iv. Phys. Geogr. p. 311 ff.), which the general reader will find convenient and interesting. Mr. Gage has inserted in his Ritter's Geography of Pulstine, iii. 351 ff. ad prisham (CTD) is charcoal, and not minera. (Appendix) the elaborate articles on the "Forma-

ion of the Basin of the Dead Sea," and other related topics by M. Louis Lartet, etc., etc., translated by Mr. Grove from the French. Mr. Grove deals largely with questions of this nature in his article on SEA, THE SALT, in this Dictionary. (See additions in Amer. ed.) On that particular subject, and on the geology of the country generally, we have much valuable information in Mr. Tristram's Land of Israel (scattered through the work, but especially in chapter xv.). H.

• COAST (derived through the French coste, from the Latin costa, "a rib," "side"), stands often in the A. V. for "border" (Judg. xi. 20; 1 Sam. v. 6; Matt. viii. 34, &c.). The present usage restricts the term to the sea-shore. H.

COAT. [DRESS.]

* COAT OF MAIL, 1 Sam. xvii. 5, 88. See ARMS, II. § 1, p. 161.

COCK (atérrop: gallus). There appears to be no mention of domestic poultry in the O. T., the passages where the LXX. and Vulg. (as in Prov. xxx. 31; Is. xxii. 17) a read at error and gallus having no reference to that bird. In the N. T. the "cock" is mentioned in reference to St. Peter's denial of our Lord, and indirectly in the word arentopoporla (Matt. xxvi. 34; Mark xiv. 30, xiii. 35, &c.). The origin of the numerous varieties of our domestic poultry is undoubtedly Asiatic, but there is considerable doubt as to the precise breed whence they were sprung, as well as to the locality where they were found. Temminck is of opinion that we are chiefly indebted to the Malay Gallus Giganteus and the Indian G. Bankiva for our domestic birds. We know that the domestic cock and hen were early known to the ancient Greeks and Romans. Pisthetærus (Aristoph. Aves, 483) calls the cock the Persian bird ($\Pi e \rho \sigma t$ -Rds Soris). It is not at all improbable that the Greeks obtained domestic birds from Persia. As no mention is made in the O. T. of these birds, and as no figures of them occur on the Egyptian monuments (Wilkinson, Anc. Egypt. i. 234, ed. 1854), we are inclined to think that they came into Judges with the Romans, who, as is well known, prized these birds both as articles of food and for cock-fighting. The Mishna (Baba Kama, vii. 7) says "they do not rear cocks at Jerusalem on account of the holy things; "b and this assertion has by some been quoted as an objection to the evangelical history. On this subject a writer in Harris (Dict. of Nat. Hist. of Bib. p. 72, ed. 1883), very properly remarks, " If there was any restraint in the use or domestication of this bird it must have been an arbitrary practice of the Jews, but could not have been binding on foreigners, of whom many resided at Jerusalem as officers or traders." Thomson (Land and Book, p. 672) says the fowls are now common in Jerusalem, "that they swarm round every door, share in the food of their possessors, are at home among the children in every room, roost over head at night, and with their wekle and crowing are the town clock and the morning hell to call up sleepers at early dawn." As to the cock-crowing see TIME. W. H.

COCKATRICE. A not very happy renderng by the A. V. of the Hebrew words teiph'oni

COCKLE ('T', Nº, boshah: Bdros: spina) occurs only in Job xxxi. 40: "Let thistles grow instead of wheat, and cockle instead of barley."

The plural form of a Heb. noun, namely, CNP ND (beushim), is found in Is. v. 2, 4, A. V. "wild grapes." It is uncertain whether these two words denote " noxious weeds " generally, or some particular plant. Celsius has argued in favor of the aconite, the Aconitum Napellus, which however is quite a mountain - never a field - plant. He traces the Hebrew name to a Persian word (Bisk) of somewhat similar form. The beushim of Isaiah (I. c.), which the LXX. render "thorns" (Exarbas), the Vulg. labrusca, are by some thought to be the fruit of the Vitis Inbrusca of Linnaeus, a N. American plant! Hasselquist thought he had discovered the beushim in the berries of the hoary nightshade, which the Arabs call anib-ed-dib, i. e. "wolf's grape." He says (Trav. p. 290), "the prophet could not have found a plant more opposite to the vine than this, for it grows much in the vineyards, and is very pernicious to them." Some, as Parkhurst (Lex. Heb. s. v.), believe some "stinking wood" is intended by boshth, in Job I. c., from the

root "ND, "to smell as carrion." If the word denotes a plant in so limited a sense, we would suggest the hound's tongue (Cynoglossum), which has literally a carrion smell. But we are inclined to believe that the boshah and beushim denote any bad weeds or fruit: the beushim of the prophet's vineyard may thus be understood to represent "sour or bad grapes; " with which view accord the gampial of Aquila and the dreaf of Symmachus (see also Hiller, Hierophyt. i. 293), and the boshah of Job (l. c.) may denote bad or smutted barley. The bunt or stinking rust (Uredo fatida) which sometimes attacks the ears of wheat and barley is characterized by its disgusting odor, which property would suit the etymology of the Hebrew name; or the word may probably denote some of the usele grasses which have somewhat the appearance of barley, such as Hordeum murinum, &c. W. H.

CCELESYR'IA (Kol $\lambda\eta$ $\Sigma upla: Calesyria$), "the hollow Syria," was (strictly speaking) the name given by the Greeks, after the time of Alexander, to the remarkable valley or hollow ($\kappa oi\lambda ia$) which intervenes between Libanus and Anti-Libanus, stretching from lat. 33° 20' to 34° 40', a distance of nearly a hundred miles. As applied to this region the word is strikingly descriptive. Dionysius the geographer well observes upon this, in the line —

[•]Ην Κοίλην ἐνέπουσιν ἐπώνυμον, σῦνκε' ὅρ' αὐτην Μέσσην καὶ χθαμαλην ὀρέων δύο πρώνες ἔχουσιν. Pirieg. 899, 900

A modern traveller says, more particularly — "We finally looked down on the vast green and red valley — green from its yet unripe corn, red from its vineyards not yet verdant — which divides the range of Lebanon and Anti-Lebanon; the former reaching its highest point in the snowy creat

sistent with itself on this point (Hor. Hebr. on Matt xxvi. 84). See also l'riedlieb's Arciaci. der Leidens geschichte, p. 88

[•] So the Vulg. in Is. xxii. 17, but not the LXX. To have adartyouir, gailus, in 8 Macc. v. 23. H.

^{• •} Lightfoot has shown that the Talmud is not cor geschichte, p. 88

• the north, behind which lie the Cedars, the lat- in Gen. 1 20, the body of Joseph, after being ember, in the still more snowy crest of Hermon - the sulmination of the range being thus in the one at the northern, in the other at the soutnern extremity of the valley which they bound. The view of this great valley is chiefly remarkable as being exactly to the eye what it is on maps - the 'hollow' between the two mountain ranges of Syria. A screen through which the Leontes (Litany) breaks out, closes the south end of the plain. There is a similar screen at the north end, but too remote to be visible" (Stanley's Sin. of Pal. p. 407). The plain gradually rises towards its centre, near which, but a little on the southern declivity, stand the ruins of Ba ilbek or Heliopolis. In the immediate neighborhood of Baalbek rise the two streams of the Orontes (Nahr-el-Asy) and the Litany, which flowing in opposite directions, to the N. W. and the S. E., give freshness and fertility to the tract inclosed between the mountain ranges

The term Coele-Syria was also used in a much wider sense. In the first place it was extended so as to include the inhabited tract to the east of the Anti-Libanus range, between it and the desert, in which stood the great city of Damascus; and then it was further carried on upon that side of Jordan. through Trachonitis and Persea, to Idumsea and the borders of Egypt (Strab. xvi. § 21; Polyb. v. 80, § 3; Joseph. Ant. i. 11, § 5). Ptolemy (v. 15) and Josephus (Ant. xiii. 13, § 2) even place Scythopolis in Cœle-Syria, though it was upon the west side of Jordan; but they seem to limit its extent southwards to about lat. 31º 30', or the country of the Ammonites (Ptol. v. 15; Joseph. i. 11). Ptolemy distinctly includes in it the Damascus country.

None of the divisions of Syria (Aram) in the Jewish Scriptures appear to correspond with the Coele-Syria of the Greeks; for there are no grounds for supposing, with Calmet (Dict. of the Bible, art. Calesyria), that "Syria of Zobah" is Coele-Syria. Coele-Syria seems to have been included under the name of " Syria of Damascus "

(ארמדבישה), and to have formed a portion of that kingdom. [ARAM.] The only distinct reference to the region, as a separate tract of country which the Jewish Scriptures contain, is probably that in Amos (i. 5), where "the inhabitants of the

plain of Aven " (דְרָעָרוֹ אָלָן, Bikath-Aven) are threatened, in conjunction with those of Damascus. Bikath is exactly such a plain as Coele-Syria (Stanley's Palestine, Append. p. 484), and the expression Bikath-Aven, "the plain of Idols," would be well applied to the tract immediately around the great sanctuary of Baalbek. [AVKN.] In the Apocryphal Books there is frequent mention of Coele-Syria in a somewhat vague sense, nearly as an equivalent :or Syria (1 Eadr. ii. 17, 24, 27, iv. 48, vi. 29, vii. 1, viii. 67; 1 Macc. x. 69; 2 Macc. iii. 5, 8, iv. 4, vili. 8, x. 11). In all these cases the word is given m A. V. as CKLOSYRIA. G. R. A. V. as CELOSYRIA.

COFFER ("] ">, probably from "!". to be roved : 04µa : capsella), a movable box hanging "rom the side of a cart (1 Sam. vi. 8, 11, 15) This word is found nowhere else, and in each of the above examples has the definite article, as if of some special significance. H. W. P.

COFFIN. [BURIAL.]

• A few points require notice under this head,

balmed, is said to have been put into a " coffin ' (A. V.) or wooden chest (1, `_). Objectors have urged from this expression that the writer of Genesis was ignorant of Egyptian customs, and hence could not have been Moses, if Moses was born and brought up in Egypt. But this objection misstates the usage in such cases. Basaltic sarcophagi were very uncommon, and, as the general rule, the mummy was placed in a wooden coffin. Herodotus says expressly (ii. 86) that the body, after being duly prepared, was "given back to the relatives, who inclosed it in a wooden case which they made for the purpose, shaped into the figure of a man." See Rawlinson's Herodotus, ii. 143, and Hengstenberg's Die Bücher Mose's und Ægypten, p. 71 (Robbins's trans. p. 76). "If a massive tomb or lofty pyramid had been erected to his memory, and if his mortal remains had been deposited there like those of the princes of Egypt, it would have been supposed that his body would remain in Fgypt till the day of doom. But he would not permit this to be done; he 'took an oath of the children of Israel that they should carry up his bones' from Egypt to Canaan; and he was content with a simple coffin of wood." (Wordsworth, Genesis, p. 197.)

"Coffin," the marg. rendering of the A. V. for oropos in Luke vii. 14, is probably more correct than "bier" in the text. The proper Greek for "bier" is φέρετρον, κλίνη, λέχος (in modern Greek ξυλο κρέβατον). With this stricter meaning we must infer that the coffin was an open one, since otherwise the young man whom the Saviour restored to life could not have "sat up" at once, as he did in obedience to our Lord's command. But if goods refers to the bier or litter on which the body was carried, it must be from an accommodated sense of the word, corresponding perhaps to the Hebrew

리철말, as in 2 Sam. iii. 81. (Comp. Lightfoot,

Hor. Hebr. on Luke vii. 12, 14.) This latter explanation is not necessary Nearly all admit that the coffin was not only sometimes used among the Hebrews, but was occasionally at least, if not as a general rule, so made as to be open at the top. See Winer, Realw. ii. 16; Herzog, Real-Encykl. i 773; Paulus, Comm. üb. das N. Test. i. 824.

The present customs of Palestine are not inconsistent with either view. We are permitted to lay before the reader the following statement of Dr. Van Dyck. "At present coffins are used only in the cities, and even there they have been in use for only a comparatively short period. The general way of burial is to array the corpse in its best dress, as if it were living, and lay it on a bier with no covering at all, or with a cloak thrown over the body, leaving the face exposed. The shroud, a long piece of white cotton stuff, is wrapped around the body at the grave. The grave has at the bottom, on all four sides, a ledge of stones built up against its sides high enough to allow the body to be deposited in the niche thus made, and be covered with boards, the ends of which rest on this ledge and prevent the earth from actually touching the body I have attended scores of funerals on Lebanon, and I never saw a corpse carried that could not have sat up at once had it been restored to life. In Beirut coffins have more recently come into use, which may be left uncovered until the grave is reached, or, as is often the case with shich are not found under BURILL. One is that Christians, they are closed at the house or church

Mohammedans in Beirût carry the dead to the that is, from the king, the position of Huldah's grave on a bier, as above mentioned, al. then sometimes put the body into a rude coffin at the grave." H.

CO'LA (Xwhd; Alex. Kwha: [Sin. Vulg. omit]), a place named with Chobai (Jud. xv. 4, only), the position or real name of which has not been ascertained. Simonis (Onom. N. T. 170) suggests Abel-mecholah.

COLHO ZEH (קל-הזהה [all-seeing] : [in Neh. iii. 15,] Χολεζέ; [Vat. omits; in xi. 5, Xα-λαζά, Vat. FA. Χαλεα:] Cholhoza), a man of the tribe of Judah in the time of Nehemiah (Neh. iii. 15, xi. 5).

CO'LIUS (Kolos: [Vat. Koros; Ald.] Alex. Kahios: Colnis), 1 Eadr. ix. 23. [KELAIAH.]

COLLAR. For the proper sense of this term, as it occurs in Judg. viii. 26, see EARRINGS. The

expression 2 2 (as the collar) in Job. xxx. 18, is

better read as 727 (comp. Job xxxiii. 6), in which case the sense would be "it bindeth me as my cost," referring to the close fit of the cethoneth.

The "P, literally the "mouth," as a part of a garment, refers to the orifice for the head and neck, but we question whether it would be applied to any other robe than the sacerdotal ephod (Ex. xxxis 23; Ps. cxxxiii. 2). The authority of the LXX (Somep to replotopular), of the Vulg. (quasi capitio), and of Gesenius (Thes. p. 1088), must however be cited in favor of the ordinary rendering.

W. L. B.

COLLEGE, THE (הקשורה: א paserd Secunda). In 2 K. xxii, 14 it is said in the A. V that Huldah the prophetess "dwelt in Jerusalem in the college," or, as the margin has it, "in the second part." The same part of the city is undoubtedly alluded to in Zeph. i. 10 (A. V. "the second "). Our translators derived their rendering "the college" from the Targuni of Jonathan, which has "house of instruction," a school-house supposed to have been in the neighborhood of the Temple. This translation must have been based upon the meaning of the Hebrew mishneh, " repetition," which has been adopted by the Peshito-Syriac, and the word was thus taken to denote a place for the repetition of the law, or perhaps a place where copies of the law were made (comp. Deut. xvii. 18; Josh. viii. 32). Rashi, after quoting the rendering of the Targum, says, "there is a gate in the [Temple] court, the name of which is the gate of Huldah in the treatise Middoth [i.

8], and some translate $\overline{\cap}$ $\mathbb{C}^{n} \succeq \overline{\mathbb{C}}$ without the wall, setween the two walls, which was a second part (mishneh) to the city." The latter is substantially the opinion of the author of Quest. in Libr. Reg. attributed to Jerome. Keil's explanation (Comm in loc.) is probably the true one, that the Mishneh was the "lower city," called by Josephus ή Ελλη $\pi \delta \lambda_{15}$ (Ant. xv. 11, § 5), and built on the hill Akra. Ewald (on Zeph. i. 10) renders it Neutadt, that is, Beeztha, or New Town.

Others have explained the word as denoting the juarter of the city allotted to the Levites, who were a second or inferior order as compared with the priests, or to the priests who were second in rank as compared with the high-priest. Junius and Tremellius render " in parte secunda ab co,'

house, next the king's palace, accounting for the fact that she was first appealed to. Of conjectures like these there is no end. W. A. W.

• In Neh. xi. 9, the A. V. has the erroneous construction, "was second over the city." The

Hebrew, הַשָּׁרָה, means the city second in order = the second city, i. e. the second part of it (Rödiger, Ges. Thes. iii. 1451, pars urbis secunda ria), which Josephus (Ant. xv. 11, § 5) calls the other city, την άλλην πόλιν, namely, the lower city, or Akra (Robinson, Bibl. Res. i. 412). The Syriac version follows the true construction, and translates, "was governor over the second city,"

خيب کر منظر باديد.

In the same sense the word Third alone is used in 2 K. xxii. 14, and 2 Chr. xxxiv. 22 (A. V. in both passages, "college"), and in Zeph. i. 10 (A. V. "second"). The Latin Vulgate, in 2 K. and 2 Chr., translates, "que habitabat in Jerusalem in Secunda;" and in Zeph., "et ululatus e Secunda," as in the A. V.

The absurd idea of a "college" was received by the first Christian Hebraists, at the time of the Reformation, from their Jewish teachers. The Targum of Jonathan, 2 K. xxii. 14, acting the interpreter here as elsewhere (Herzog's Real-Encykl. xv. 678) has אַרְלְיַרֵאָ house of instruction, school, and is followed in the Syriac ver-

sion of the parallel passage in 2 Chr. xxriv. 22. Accordingly, Sebastian Münster (Hebrew Bible, with Latin translation and notes, Basle, 1546) translates, in 2 K. "in domo doctring;" with the aunotation: "Exponunt hic communiter He-

breei משנה pro משנה; vel, ut Chal.

interpres vertit, אולפנא, id est, domus doctringe seu studii legis divinge." He adds, from the Rabbinic writers : "Eratque certus quidam locus juxta templum, in quo docti quique conveniebant, et conferebant de lege et vaticiniis prophetarum." Having no Targum on the parallel passage in 2 Chr., he there retained the rendering of the Latin Vulgate.

This Rabbinic notion thus became current among Christian scholars, and was at length incorporated in our authorized English version.

It is interesting to trace this rendering of the A. V. in the earlier stages of our vernacular Bible. Coverdale's Bible (first published in 1535) has in 2 K. xxii. 14, "she dwelt in Jerusalem in the second porte " (probably a misprint for " parte," which appears in his version of the parallel passage in 2 ('hr.). Matthew's Bible, so called (1537), generally understood to be essentially Tyndale's version of the Old Testament, has in both passages, "dwelt in Jerusalem in the second ward." Cranmer's Bible (1540) has in 2 K., "in the house of the doctrine," but in 2 Chr. "within the second wall; " followed in both passages by the Bishops' Bible (1568). The Geneva version (1560) has in 2 K., "in the college," 2 Chr. "within the college (with the marginal note on the former passage or, the house of doctrine, which was near to the temple," &c., as in the Rabbinic commentaries referred to above), and in both passages was followed by King James's revisers. T. J. C.

• COLLOPS stands in Job xv. 27 for コンマ

which means simply "fat" or "fatness." It is which he could have introduced it with propriety. said to be a Yorkshire word, still used, signifying sumps or slices of meat (Eastwood and Wright's Bible Word-Book, p. 114). As "fatness" occurs just before, the translators may have wished to vary the expression, or may have been guided by saprice. Dr. Conant (Translation of the Book of Job, p. 54) renders "fatness" in one line of the parallelism, and "fat " in the other. H.

COLONY, a designation of Philippi, the celsbrated city of Macedonia, in Acts xvi. 12. After the battle of Actium, Augustus assigned to his veterans those parts of Italy which had espoused the cause of Antony, and transported many of the expelled inhabitants to Philippi, Dyrrachium, and other cities (Dion Cass. li. 4). In this way Philippi was made a Roman colony with the "Jus Itslicum " (comp. 1)ig. 50, tit. 15, s. 8), and accordingly we find it described as a "colonia" both in inscriptions and upon the coins of Augustus. (Orelli, Inscr. 512, 3658, 3746, 4064; Rasche, vol. iii. pt. 2, p. 1120.) On the "Jus Italicum," see Dict. of Ant., arts. Colonia and Latinitas.

* Traces of this colonial rank of Philippi appear at the present time among the ruins on the ground. The traveller even at Neapolis (Kavalla), the seaport of the ancient city, sees around him Latin inscriptions on sarcophagi, tablets, and fallen columns. Two of the epitaphs there contain the name of Claudius, the emperor who was on the throne when Paul passed through Neapolis to the colony where he gathered his first church in Europe. At the distance of half an hour before coming to the ancient site, stands a massive block of marble which no doubt once supported a statue or some monumental column, on which the names of " Caius Vibius et Cornelius Quartus " are distinctly legible, with other Roman letters not easily deciphered. Near them are also Turkish cemeteries with fragments of marble at the head of the graves, obtained evidently from Philippi, on which Latin letters and occasionally entire words are found. On some of the stones among the ruins at Philippi are Greek inscriptions; but those in Latin are far more numerous. Many of the seats of the theatre, or amphitheatre, which rise in tiers, one above another, on the sides of the hill, are marked with what seem to be the names of the owners, nearly all of which are in Latin. The remarkable tomb, monolithic, except the lid or roof, 12 feet long, 84 high, and 6 wide, situated near one of the roads which intersect the plain, was a Roman sepulchre, as the mutilated epitaph on it shows beyond a doubt. We evidently have before us there the ruins of a Roman city on Greek soil.

Nothing can be more unstudied than the way in which this Roman relationship of Philippi shows steelf in the text of Luke. After speaking of the seizing of Paul and Silas by a mob, and their being tragged before the rulers (apxortes) of the city Acts xvi. 19), Luke suddenly drops that term, and in the next verse, speaks of officers, whom he denominates "commanders" (*πτρατηγοί*). The fact now was that in a Roman colony the chief magistrates, instead of being called dummoiri or ywituorviri (the number was not always the same), requently took the name of prostores as one of greater honor, and that in Greek was organnyoi. This is the only occasion in the book of Acts on

It occurs five times in this brief recital, and shown that the government of this particular city $(\pi \delta \lambda)$ κολωνία) was modelled after the Roman form. It is also at Philippi only that the "rod-bearers" or "lictors" (baßdouxor), holding one of the most distinctive of all the Roman insignia, make their appearance. (See Pauly's Real-Encykl. ii. 507, 1st ed.; Wetstein, Nov. Test. ii. 556; Kninoel, Acta Apost. p. 543; Lechler's Apostelgesch. p. 231, and Schaff's Am. ed. p. 306; Conybeare & Howsen's Life and Letters of Paul, i. 345. Amer. ed.; and Bibl. Sacra, Oct. 1860, pp. 866-898.) H.

COLORS. The terms relative to color, occurring in the Bible, may be arranged in two classes, the first including those applied to the descript.on of natural objects, the second those artificial mixtures which were employed in dveing or painting. In an advanced state of art, such a distinction can hardly be said to exist; all the hues of nature have been successfully imitated by the artist; but among the Jews, who fell even below their contemporaries in the cultivation of the fine arts, and to whom painting was unknown until a late period, the knowledge of artificial colors was very restricted. Dyeing was the object to which the colors known to them were applied. So exclusively indeed were the ideas of the Jews limited to this application of color, that the name of the dye was transferred without any addition to the material to which it was applied. The Jews were not however by any means insensible to the influence of color: they attached definite ideas to the various tints, according to the use made of them in robes and vestments: and the subject exercises an important influence on the interpretation of certain portions of Scripture.

1. The natural colors noticed in the Bible are white, black, red, yellow, and green. It will be observed that only three of the prismatic colors are represented in this list; blue, indigo, violet, and orange are omitted. Of the three, yellow is very seldom noticed; it was apparently regarded as a shade of green, for the same term greenish (רָקָרָק) is applied to gold (Ps. lxviii. 13), and to the leprous spot (Lev. xiii. 49), and very probably the golden (27) or yellow hue of the leprous hair (Lev. xiii. 30-32) differed little from the greenish spot on the garments (Lev. xiii. 49). Green is frequently noticed, but an examination of the pas-

sages in which it occurs, will show that the reference is seldom to color. The Hebrew terms arr raanan (רַעָרָן) and ydrak (רַעָרָן); the first of these applies to what is rigorous and flourishing, hence it is metaphorically employed as an imagy of prosperity (Job xv. 32; Ps. xxxvii. 35, lii. 8, xcii. 14; Jer. xi. 16, xvii. 8; Dan. iv. 4; Hos. xiv. S); it is invariably employed wherever the expression "green tree" is used in connection with idolatrous sacrifices, as though with the view of con veying the idea of the *musmrending* branches which served as a canopy to the worshippers (Deut. xii. 2; 2 K. xvi. 4,; elsewhere it is used of that which is freel, as oil (Ps. xcii. 10), and newly plucked

a • Walch in his Dissertationes in Acta Apostoloru which Luke has made use of this peculiar designa-tion: and it is the only occasion, as far as appears, on this municipal peculiarity of Philippi.

Digitized by

boughs (Cant. i. 16). The other term, yarak, has

aprouting (Gesen. Thes. p. 682): it is used indisximinately for all productions of the earth fit for food (Gen. i. 30, ix. 8; Ex. x. 15; Num. xxii. 4; Is. xv. 6; cf. xhapos, Rev. viii. 7, ix. 4), and again for all kinds of garden herbs (Deut. xi. 10; 1 K. xxi. 2; 2 K. xix. 26; Prov. xv. 17; Is. xxxvii. 27; contrast the restricted application of our greens); when applied to grass, it means specifically the

young, fresh grass (NUT, Ps. xxxvii. 2), which springs up in the desert (Job xxxix. 8). Elsewhere it describes the sickly yellowish hue of mildewed corn (Deut. xxviii. 22; 1 K. viii. 37; 2 Chr. vi. 98; Am. iv. 9; Hag. ii. 17); and lastly, it is used for the entire absence of color produced by fear (Jer. XXI. 6; compare $\chi\lambda\omega\rho\delta$ s, *ll.* X. 376); hence $\chi\lambda\omega\rho\delta$ s (Rev. vi. 8) describes the ghastly, livid hue of denth. In other passages "green" is erroneously used in the A. V. for white (Gen. xxx. 37; Esth. i. 6), young (Lev. ii. 14, xxiii. 14), moist (Judg. xvi. 7, 8), suppy (Job. viii. 16), and unripe (Cant. ii. 13). Thus it may be said that green is never used in the Bible to convey the impression of proper color.

The only fundamental color of which the Hebrews appear to have had a clear conception was red; and even this is not very often noticed. They had therefore no scientific knowledge of colors, and we cannot but think that the attempt to explain such passages as Rev. iv. 3 by the rules of philosophical truth, must fail (see Hengstenberg, Comm. in loc.). Instead of assuming that the emerald represents green, the jasper yellow, and the sardine red, the idea intended to be conveyed by these images may be simply that of pure, brilliant, transparent light. The emerald, for instance, was chiefly prized by the ancients for its glittering, scintillating qualities (alysheis, Orpheus de lip. p. 608), whence perhaps it derived its name ($\sigma\mu d\rho a\gamma$ -80s, from μαρμαίρειν). The jasper is character-ized by St. John himself (Rev. xxi. 11) as being crystal-clear (κρυσταλλίζων), and not as having a certain hue. The sardine may be compared with the amber of Ez. i. 4, 27, or the burnished brass of Dan. x. 6, or again the fine brass, "as if burning in a furnace," of Rev. i. 15, each conveying the impression of the color of fire in a state of pure incandescence. Similarly the beryl, or rather the chrusolite (the Hebrew Tharsis), may be selected by Daniel (x. 6) on account of its transparency. An exception may be made perhaps in regard to the sapphire, in as far as its hue answers to the deep blue of the firmament (Ex. xxiv. 10; cf. Ez. i. 26, x. 1), but even in this case the pellucidity (רְבְכָה), omitted in A. V., Ex. xxiv. 10) or polish

of the stone (comp. Lam. iv. 7) forms an important, if not the main, element in the comparison. The highest development of color in the mind of the Llebrew evidently was light, and hence the predominance given to white as its representative (comp. the connection between $\lambda even \delta s$ and lux). This feeling appears both in the more numerous allusions to it than to any other color - in the variety of terms by which they discriminated the shades from • pule, dull tint (TTD, bluckish, Lev. xiii. 21 ff.) ap to the most brilliant splendor ("T, Ez. viii.

3; Dan. xii. 3) - and in the comparisons by which they sought to heighten their ideas of it, an instance of which occurs in the three accounts of the (Dan. vii. 9 only), and to the paleness of shame (Is

the radical signification of *putting forth leaves*, Transfiguration, where the countenance and roles are described as like "the sun" and "the light." (Matt. xvii. 2), "shining, exceeding white as snow" (Mark ix. 3), "glistening" (Luke ix. 29). Snow is used eleven times in a similar way; the sun five times; wool four times; milk once. In some instances the point of the comparison is not so obvious, e. g. in Job xxxviii. 14, "they stand as a garment" in reference to the white color of the Hebrew dress, and in Ps. lxviii. 13, where the glancing hues of the dove's plumage suggested an image of the brilliant effect of the while holyday costume. Next to white, black, or rather dark, holds the most prominent place, not only as its opposite, but also as representing the complexion of the Orientals. There were various shades of it, including the brown of the Nile water (whence its name Sihor) - the reddish tint of early dawn, to which the complexion of the bride is likened (Cant. vi. 10), as well as the *lurid* hue produced by a flight of locusts (Joel ii. 2) - and the darkness of blackness itself (Lam. iv. 8). As before, we have various heightening images, such as the tents of Kedar, a flock of goats, the raven (Cant. i. 5, iv. 1, v. 11) and sackcloth (Rev. vi. 12). Red was also a color of which the Hebrews had a vivid conception; this may be attributed partly to the prevalence of that color in the outward aspect of the countries and peoples with which they were famil-iar, as attested by the name Edom, and by the words adamah (earth), and adam (man), so termed either as being formed out of the red earth, or as being red in comparison with the fair color of the Assyrians, and the black of the Æthiopians. Red was regarded as an element of personal beauty; comp. I Sam. xvi. 12; Cant. ii. 1, where the lily is the red one for which Syria was famed (Plin. xxi. 11); Cant. iv. 3, vi. 7, where the complexion is compared to the red fruit of the pomegranate; and Lam. iv. 7, where the hue of the skin is redder than coral (A. V. "rubies") contrasting with the white of the *garments* before noticed. The three white of the garments before noticed. colors, white, black, and red, were sometimes intermixed in animals, and gave rise to the terms, אר (A. V. "white"), probably

> white and red (Judg. v. 10); TTY, "ringstraked," either with white bands on the legs, or white-footed; קר "spotted," and אין טָלָ, "spotted," white

> and black; and lastly ブラ, "piebald" (A. V. "grisled"), the spots being larger than in the two former (Gen. xxx. 32, 35, xxxi. 10); the latter ter.r. is used of a horse (Zech. vi. 3, 6) with a symbolical meaning: Hengstenberg (Christol. in loc.) considers the color itself to be unmeaning, and that the prophet has added the term strong (A. V. "bay") by way of explanation; Hitzig (Comm. in loc.) explains it, in a peculiar manner, of the complexion of the Egyptians. It remains for us now to notice the various terms applied to these three colors.

> 1. WHITE. The most common term is 727. which is applied to such objects as milk (Gen. xnx. 12), manna (Ex. xvi. 31), snow (Is. i. 18), horse (Zech. i. 8), raiment (Eccl. ix. 8); and a cognate word expresses the color of the moon (Is. xxiv. 23) TN, dazzling white, is applied to the complexion

> (Cant. v. 10); "PIT, a term of a later age, to snow

15), and DDD (κάρπασος; A. V. "green," Esth. i. 6), also cescriptive of white textures.

White was symbolical of innocence: hence the raiment of angels (Mark xvi. 5; John xx. 12), and of glorified saints (Rev. xiz. 8, 14), is so described. It was also symbolical of joy (Eecl. iz. 8); and, lastly, of victory (Zech. vi. 3; Rev. vi. 2). In the Rerelation the term $\lambda euco's$ is applied exclusively to what belongs to Jesus Christ (Wordsworth's Apoc. p. 105).

xxx. 30); horses (Zech. vi. 2, 6): DNT, literally scorched (qau65; A. V. "brown," Gen. xxx. 32), applied to sheep; the word expresses the color pro-

duced by influence of the sun's rays: \neg , literally to be dirty, applied to a complexion blackened by sorrow or disease (Job xxx. 30); mourner's robes (Jer. viii. 21, xiv. 2; compare sordidos restes); a clouded sky (1 K. xviii. 45); night (Mic. iii. 6; Jer. iv. 28; Joel ii. 10, iii. 15); a turbid brook (whence possibly KEDRON), particularly when rendered so by melted snow (Job vi. 16). Black, as being the opposite to white, is symbolical of evil (Zech. vi. 2, 6; Rev. vi. 5).

3. RED. DTN is applied to blood (2 K. iii. **33**); a garment sprinkled with blood (Is. lxiii. 2); a heifer (Num. xix. 3); pottage made of lentiles (Gen. xxv. 30); a horse (Zech. i. 8, vi. 2); wine (Prov. xxiii. 31); the complexion (Gen. xxv. 25; Cant. v. 10; Lam. iv. 7). DTPTN is a slight segree of red, reddish, and is applied to a leprous spot (Lev. xiii. 19, xiv. 87). DTP, literally faccolored, bay, is applied to a horse (A. V. "speckled;" Zech. i. 8), and to a species of vine bearing a purple grape (Is. v. 2, xvi. 8): the translation "bay" in Zech. vi. 3, A. V. is incorrect. The corresponding term in Greek is $\pi u \beta \beta \delta_s$, literally red as free. This color was symbolical of bloodabed (Zech. vi. 2; Rev. vi. 4, xii. 3).

II. ARTIFICIAL COLORS. The art of extracting dyes, and of applying them to various textures, appears to have been known at a very early period. We read of scarlet thread at the time of Zarah's birth (Gen. xxxviii. 28); of blue and purple at the time of the Exodus (Ex. xxvi. 1). There is howwer no evidence to show that the Jews themselves

were at that period acquainted with the art: the profession of the dyer is not noticed in the Bible, though it is referred to in the Talmud. They were probably indebted both to the Egyptians and the Phoenicians; to the latter for the dyes, and to the former for the mode of applying them. The purple dyes which they chiefly used were extracted by the Phoenicians (Ez. xxvii. 16; Plin. ix. 60), and in certain districts of Asia Minor (Hom. II. iv. 141) especially Thyatira (Acts xvi. 14). It does no. appear that those particular colors were used in Egypt, the Egyptian colors being produced from various metallic and earthy substances (Wilkinson, Anc. Egypt. iii. 301). On the other hand, three was a remarkable similarity in the mode of dyeing in Egypt and Palestine, inasmuch as the color was applied to the raw material, previous to the processes of spinning and weaving (Ex. xxxv. 26, xxxix. 3; Wilkinson, iii. 125). The dyes consisted of purples, light and dark (the latter being the "blue" of the A. V.), and crimson (scartet, A V.): vermilion was introduced at a late period.

1. PURPLE () Chaldaic form,) I - N Dan. v. 7, 16: πορφόρα: purpura). This color was obtained from the secretion of a species of shellfish (Plin. ix. 60), the Murex trunculus of Linnzeus, which was found in various parts of the Mediterranean Sea (hence called πορφόρα θαλασσία, 1 Macc. iv. 23), particularly on the coasts of l'henicia (Strab. xvi. p. 757), Africa (Strab. xvii. p. 835), Laconia (Hor. Od. ii. 18, 7), and Asia Minor. [ELISHAT.] The derivation of the Hebrew name is uncertain: it has been connected with the Sanskrit rdgaman, "tinged with red;" and again with arghandana, "costly" (Hitzig, Comment. in Dan. v. 7). Gesenius, however (Thesaur. p. 1263), considers it highly improbable that a color so peculiar to the shores of the Mediterranean should be described by a word of any other than Semitic origin.

and connects it with the root DD, to heap up or

overlay with color. The coloring matter was contained in a small vessel in the throat of the fish; and as the quantity amounted to only a single drop in each animal, the value of the dye was proportionately high: sometimes, however, the whole fish was crushed (Plin. ix. 60). It is difficult to state with precision the tint described under the Hebrew name. The Greek equivalent was, we know, applied with great latitude, not only to all colors extracted from the shell-fish, but even to other brilliant colors: thus in John xix. 2, indrior moppe ούι = χλαμύς κοκκίνη, in Matt. xxvii. 28 (cf. Plin. ix. 62). The same may be said of the Latin purpureus. The Hebrew term seems to be applied in a similarly broad sense in Cant. vii. 5, where it either = black (comp. v. 11), or, still better, shining with oil. Generally speaking, however, the tint must be considered as having been defined by the distinction between the purple proper, and the other purple dye (A. V. "blue"). which was produced from another species of shell-fish. The latter was undoubtedly a dark violet tint, while the former has a light reddish tinge. Robes of a purple color were worn by kings (Judg. viii. 28), and by the highest officers, civil and religious; thus Mordecai (Esth. viii. 15), Daniel (A. V. "scarlet," Dan. v. 7, 16, 29), and Andronicus, the deputy of Antiochus (2 Macc. iv. 38), were invested with purple in token of the offices they held (cf. Xen.

Digitized by Google

(1 Macc. x. 90, 64, xi. 58). They were also worn ; by the wealthy and luxurious (Jer. x. 9; Ez. xxvii. 7; Luke xvi. 19; Rev. xvii. 4, xviii. 16). A simiiar value was attached to purple robes both by the Greeks (Hom. Od. xix. 225; Herod. ix. 22; Strab. xiv. 648), and by the Romans (Virg. Georg. ii. 495; Hor. Ep. 12, 21; Suet. Cas. 48; Nerv, 32). Of the use of this and the other dyes in the textures of the tabernacle, we shall presently speak.

2. BLUE (הְכֵלֵה: δάκινθος, δακίνθινος, δλο-

ropoupos, Num. iv. 7: hyacinthus, hyacinthinus) This dye was procured from a species of shell-fish found on the coast of Phœnicia, and called by the Hebrews Chilzon (Targ. Pseudo-Jon., in Deut. xxxiii. 19), and by modern naturalists Helix Ianthina. The Hebrew name is derived, according to Gesenius (Thesaur. p. 1502), from a root signifying to unshell; but according to Hitzig (Com-

ment. in Ez. xxiii. 6), from בָלַל, in the sense of dulled, blunted, as opposed to the brilliant hue of the proper purple. The tint is best explained by the statements of Josephus (Ant. iii. 7, § 7) and Philo that it was emblematic of the sky, in which case it represents not the light blue of our northern climate, but the deep dark hue of the eastern sky (δέρος δε σόμβολον ύάκινθος, μέλας γαρ ούτος obores, Phil. Opp. i. 536). The term adopted by the LXX. is applied by classical writers to a color approaching to black (Hom. Od. vi. 231, xxiii. 158; Theor. 1d. 10, 28); the flower, whence the name was borrowed, being, as is well known, not the modern hyacinth, but of a dusky red color (ferrugineus, Virg. Geory. iv. 183; calestis luminis hyacinthus, Colum. ix. 4, 4). The A. V. has rightly described the tint in Esth. i. 6 (margin) as violet; the ordinary term blue is incorrect; the Lutheran translation is still more incorrect in giving it gelbe Seide (yellow silk). and occasionally simply Seide (Ez. xxiii, 6). This color was used in the same way as purple. Princes and nobles (Fz. xxiii. 6; Ecclus. xl. 4), and the idols of Babylon (Jer. x. 9), were clothed in robes of this tint: the riband and the fringe of the Hebrew dress was ordered to he of this color (Num. xv. 38): it was used in the tapestries of the Persians (Esth. i. 6). The effect of the color is well described in Ez. xxiii. 12, where

such robes are termed אָבָשִׁי מָכָלוֹל, robes יf perfection, i. e. gorgeous robes. We may remark, in conclusion, that the LXX. treats the term WITP (A. V. "badger") as indicative of color, and has translated it basisfueros, ianthinus (F.x. xxv. 5).

3. SCARLET (CRIMSON, Is. i. 18; Jer. iv. 80). The terms by which this color is expressed in Hebrew vary; sometimes '322' simply is used, as in Gen. xxxviii. 28–30; sometimes הּוֹלַעַת יֹשָׁנִי,

as in Ex. xxv. 4; and sometimes wind simply,

as io Is. i. 18. The word בָּרְמִיל (A. V. " crimson; "2 Chr. ii. 7, 14, iii. 14) was introduced at a late period, probably from Armenia, to express the The first of these terms (derived from same color.

TQU, to shine) expresses the brilliancy of the color;

the second, הולערה, the worm, or grub, whence he dye was procured, and which gave name to the) for occasionally without any addition, just as the coats, mitres, bonnets, and breeches of the

generally renders it KóKKIPOF, occasionally with the addition of such terms as KERAwoutvor (Ex. XXVI. 1), or diarernoméror (Ex. xxviii. 8); the Vulgate has it generally coccinum, occasionally coccus bis tinctus (Ex. xxviii. 8), apparently following the erroneous interpretation of Aquila and Symmachus who render it disapos, double-dyed (Ex. xxv. 4)

as though from T, T, to repeat. The process of double-dyeing was however peculiar to the Tyrian purples (Plin. ix. 39). The dye was produced from an insect, somewhat resembling the cochineal, which is found in considerable quantities in Armenia and other eastern countries. The Arabian name of the insect is kermez (whence crimson): the Linnsean name is Coccus / licis. It frequents the boughs of a species of *ilex* : on these it lays its eggs in groups which become covered with a kind of down, so that they present the appearance of vegetable galls or excrescences from the tree itself, and are described as such by Pliny, xvi. 12. The dye is procured from the female grub alone, which, when alive, is about the size of a kernel of a cherry and of a dark amaranth color, but when dead shrivels up to the size of a grain of wheat, and is covered with a bluish mould (Parrot's Journey to Ararat, p. 114). The general character of the color is expressed by the

Hebrew term VIDI (Is. lxiii. 1), lit. sharp, and

hence dazzling (compare the expression χρώμα ὀξύ), and in the Greek Aaumpd (Luke xxiii. 11), compared with KOKKINN (Matt. XXVII. 28). The tint produced was crimson rather than scarlet. The only natural object to which it is applied in Scripture is the lips, which are compared to a scarlet thread (Cant. iv. 3). Josephus considered it as symbolical of fire (Ant. iii. 7, § 7; cf. Phil. i. 536). Scarlet threads were selected as distinguishing marks from their brilliancy (Gen. xxxviii. 28; Josh. ii. 18, 21); and hence the color is expressive of what is excessive or ylaring (Is. i. 18). Scarlet robes were worn by the luxurious (2 Sam. i. 24; Prov. xxxi. 21; Jer. iv. 30; Lam. iv. 5; Rev. xvii. 4, xviii. 12, 16); it was also the appropriate hue of a warrior's dress from its similarity to blood (Nah. ii. 3; cf. Is. ix. 5), and was especially worn by officers in the Roman army (Plin. xxii. 3; Matt. xxvii. 28).

The three colors above described, purple, blue, and scarlet, together with white, were employed in the textures used for the curtains of the tabernacle and for the sacred vestments of the priests. The four were used in combination in the outer curtains, the vail, the entrance curtain (Ex. xxvi. 1, 31, 36). and the gate of the court (Ex. xxvii. 16): as also in the high-priest's ephod, girdle, and breastplate (Ex. xxviii. 5, 6, 8, 15). The three first, to the exclusion of white, were used in the pomegranates about the hem of the high-priest's robe (Ex. xxviii. 33). The loops of the curtains (Ex. xxvi. 4), the lace of the high-priest's breastplate, the robe of the ephod, and the lace on his mitre were exclusively of blue (Ex. xxviii. 28, 31, 37). Cloths for wranping the sacred utensils were either blue (Num. iv. 6), scarlet (8), or purple (13). Scarlet thread was specified in connection with the rites of cleansing the leper (Lev. xiv. 4, 6, 51), and of burning the red heifer (Num. xix. 6), apparently for the purpose of binding the hyssop to the cedar wood. The hangings for the court (F.s. xxvii. 9, xxxviii. 9), r. silion is derived from vermiculus. The LXX priests, were white (Ex. xxxix. 27, 28). The appli

COLORS

ention of these colors to the service of the tabernacle a led writers both in ancient and modern times to attach some symbolical meaning to them: reference has already been made to the statements of Philo and Josephus on this subject: the words of the latter are as follow: & Burros the yar aroon ualver toixe, dià to de autis àreiovai to Alvor η τε πορφύρα την θάλασσαν, τφ πεφοινίχθαι τοῦ κόχλου τῷ αίματι τον δε δέρα βρύλεται δηλούν δ δάκινθος· καl δ φοΐνιξ δ' αν είη τεκμήριον τοῦ πυρός, Ant. iii. 7, § 7. The subject has been fullowed up with a great variety of interpretations, more or less probable. Without entering into a and Khorsabad (Layard, ii. 303). disquisition on these, we will remark that it is unnecessary to assume that the colors were originally selected with such a view; their beauty and costlin so is a sufficient explanation of the selection.

COLOSSE

4. VERMILION (This: µiAros: sinopis). This was a pigment used in fresco paintings, either for drawing figures of idols on the walls of temples (Es. xxiii. 14), for coloring the idols themselves (Wisd xiii. 14), or for decorating the walls and beams of houses (Jer. xxii. 14). The Greek term µlaros is applied both to minium, red lead, and rubric i, red ochre; the Latin sinopis describes the best kind of ochre, which came from Sinope. Vermilion was s favorite color among the Assyrians (Ez. xxiii. 14,, as is still attested by the sculptures of Nimroud W. L. B.

COLOS'SE (more properly COLOS'SAE, Ko-Apogal, Col. i. 2; but the prepowlerance of MS. authority is in favor of Kohaggal, Colasso, a for-

Col

represents the provincial mode of pronouncing the esus, which immediately followed. The most comname. On coins and inscriptions, and in classical writers, we find Kohoral. See Ellicott, al loc.). A city in the upper part of the basin of the Mæander, on one of its affluents named the Lycus. Hierapolis and Laodicea were in its immediate neighborhood (Col. ii. 1, iv. 13, 15, 16; see Rev. 1. 11, iii. 14). Colossæ fell, as these other two cities rose, in importance. Herodotus (vii. 30) and Xenophon (Anab. i. 2, § 6) speak of it as a city of considerable consequence. Strabo (xii. p. 576) describes it as only a $\pi \delta \lambda_{1\sigma} \mu \alpha$, not a $\pi \delta$ - λ_{13} ; yet elsewhere (p. 578) he implies that it had some mercantile importance ; and Pliny, in St. Paul's time, describes it (v. 41) as one of the "celeberrima oppida " of its district. Colossee was situated close to the great road which led from Hence our impulse Ephesus to the Euphrates would be to conclude that St. Paul passed this Alford's Prolegoment to Gr. Test. vol. iii. p. 35) way, and founded or confirmed the Colossian [EPAPHRAS.] The worship of angels mentioned Claurch on his third missionary journey (Acts by the Apostle (Col. ii. 18) curiously reappears in srill. 95, xix. 1). He might and easily have Christian times in connection with one of the topo 31

used by the Byzantine writers, and which perhaps | visited Colossae during the prolonged stay at Ephpetent commentators, however, agree in thinking that Col. ii. 1 proves that St. Paul had never been there, when the Epistle was written. Theodoret's argument that he must have visited Colossæ on the journey just referred to, because he is said to have gone through the whole region of Phrygia, may be proved fallacious from geographical considerations: Colossæ, though ethnologically in Phrygia (Herod. l. c., Xen. l. c.), was at this period politically in the province of Asia (see Rev. l. c.). That the Apostle hoped to visit the place on being delivered from his Roman imprisonment is clear from Philemon 22 (compare Phil. ii. 24). Philemon and his slave Onesimus were dwellers in Colossæ. So also were Archippus and Epaphras. From Col. i. 7, iv. 12 it has been naturally concluded that the latter Chris tian was the founder of the Colossian Church (see

graphical features of the place. A church is bonot ! of the archangel Michael was erected at the entrance of a chasm in consequence of a legend connected with an inundation (Hartley's Resourches in Greece. p. 52), and there is good reason for identifying this chasm with one which is mentioned by Herodotus. This kind of superstition is mentioned by Theodoret as subsisting in his time; also by the Byzantine writer Nicetas Choniates, who was a native of this place, and who says that Colosse and Chonse were the same. The neighborhood (visited by Pococke) was explored by Mr. Arundell (Seren Churches, p. 158; Asia Minor, ii. 160); but Mr. Hamilton was the first to determine the actual site of the ancient city, which appears to be at some little distance from the modern village of Chonas (Researches in A. M. i. 508). J. S. H.

COLOSSIANS. THE EPISTLE TO THE, was written by the Apostle St. Paul during his first captivity at Rome (Acts xxviii. 16), and apparently in that portion of it (Col. iv. 3, 4) when the Apostle's imprisonment had not assumed the more severe character which seems to be reflected in the Epistle to the Philippians (ch. i. 20, 21, 30, ii. 27), and which not improbably succeeded the death of Burrus in A. D. 62 (Clinton, Fasti Rom. i. 44), and the decline of the influence of Seneca.

This important and profound epistle was addressed to the Christians of the once large and influential, but now smaller and declining, city of Colosse, and was delivered to them by Tychicus, whom the Apostle had sent both to them (ch. iv. 7, 8) and to the church of Ephesus (Eph. vi. 21), to inquire into their state and to administer exhortation and comfort. The epistle seems to have been called forth by the information St. Paul had received from Epaphras (ch. iv. 12; Philem. 23) and from Onesimus, both of whom appear to have been natives of Colosse, and the former of whom was, if not the special founder, yet certainly one of the very earliest preachers of the gospel in that city. The main object of the epistle is not merely, as in the case of the Epistle to the Philippians, to exhort and to confirm, nor, as in that to the Ephesians, to set forth the great features of the church of the chosen in Christ, but is especially designed to warn the Colossians against a spirit of semi-Judaistic and semi-Oriental philosophy which was corrupting the simplicity of their belief, and was coviceably tending to obscure the eternal glory and dignity of Christ.

This main design is thus carried out in detail.

After his usual salutation (ch. i. 1, 2) the Apostle returns thanks to God for the faith of the Colossians, the spirit of love they had shown, and the progress which the Gospel had made among them. as preached by Epaphras (ch. i. 3-8). This leads him to pray without ceasing that they may be fruitful in good works, and especially thankful to the Father, who gave them an inheritance with His mints, and translated them into the kingdom of His Son - His Son, the image of the invisible God, the first-born before every creature, the Creator of all things earthly and heavenly, the Head of the shurch, He in whom all things consist, and by wnom all things have been reconciled to the eternal Father (ch. i. 9-20). This reconciliation, the Apostle reminds them, was exemplified in their own eases: they were once alienated, but now so reconrikd as to be presented holy and blameless before

and were not moved from the hope of which the Gospel was the source and origin (ch. i. 21-24) Of this Gospel the Apostle declares himself the minister; the mystery of salvation was that for which he toiled and for which he suffered (ch i. 24-29). And his sufferings were not only for the church at large, but for them and others whom he had not personally visited, - even that they might come to the full knowledge of Christ, and might not fall victims to plausible sophistries: they were to walk in Christ and to be built on Him (ch. ii. 1-7). Especially were they to be careful that no philosophy was to lead them from Him in whom dwelt all the fullness of the Godhead, who was the head of all spiritual provers, and who had quickened them, forgiven them, and in His death had triumphed over all the hosts of darkness (ch. ii. 8-15). Surely with such spiritual privileges they were not to be judged in the matter of mere ceremonial observances, or beguiled into creature-worship. Christ was the head of the body; if they were truly united to Him, to what need were bodily austerities (ch. ii. 16-23). They were, then, to mind things above - spiritual things, not carnal ordinances, for their life was hidden with Christ (ch. iii. 1-4): they were to mortify their members and the evil principles in which they once walked the old man was to be put off, and the new man put on, in which all are one in Christ (ch. iii. 5-12). Furthermore, they were to give heed to special duties; they were to be forgiving and loving, as was Christ. In the consciousness of His abiding word were they to sing; in His name were they to be thankful (ch. iii. 13-17). Wives and husbands, children and parents, were all to perform their duties; servants were to be faithful, masters to be just (ch. iii. 18-iv. 1).

In the last chapter the Apostle gives further special precepts, strikingly similar to those given to his Ephesian converts. They were to pray for the Apostle and for his success in preaching the Gospel, they were to walk circumspectly, and to be ready to give a seasonable answer to all who questioned them (ch. iv. 2-7). Tychicus, the bearer of the letter, and Onesimus, would tell them all the state of the Apostle (ch. iv. 7-9): Aristarchus and others sent them friendly greetings (ch. iv. 10-14). With an injunction to interchange this letter with that sent to the neighboring church of Laodicea (ch. iv. 16), a special message to Archippus (ch. iv. 17), and an autograph salutation, this short but striking epistle comes to its close.

With regard to its genuineness and authenticity, it is satisfactory to be able to say with distinctness that there are no grounds for doubt. The external testimonies (Just. M. Trypho, [c. 85,] p. 811 b; Theophil. ad Autol. ii. [c. 22,] p. 100, ed. Ccl. 1686; Irenseus, Har. iii. 14, 1; Clem. Alex. Strom. i. [c. 1,] p. 325, iv. [c. 7,] p. 588, al., ed. Potter; Tertull. de Præcr. c. 7; de Resurr. c. 23; Origen, contra Cels. v. 8) are explicit, and the internal arguments, founded on the style, balance of sentences, positions of adverbs, uses of the relative pronoun. participial anacolutha, --- unusually strong and welldefined. It is not right to suppress the fact that Mayerhoff (Der Brief an die Kol. Berl. 1838) and Baur (Der Apostel Paulus, p. 417) have deliberately rejected this epistle as ciaiming to be a production of St. Paul. The first of these critics, however has been briefly, but, as it would seem, completely answered, by Meyer (Comment. p. 7); and to the Fod, if only they continued firm in the faith, second, in his subjective and anti-historical attemns

to make individual writings of the N. T. mere the- i by the high probability that in two cities of Asia scophistic productions of a later Gnosticism, the intelligent and critical reader will naturally yield but little credence. It is indeed remarkable that the strongly marked peculiarity of style, the nerve and force of the arguments, and the originality that appears in every paragraph should not have made both these writers pause in their ill-considered attack on this epistle.

A few special points demand from us a brief notice.

1. The opinion that this epistle and those to the Ephesians and to Philemon were written during the Apostle's imprisonment at Cæsarea (Acts xxi. 27-xxvi. 32), i. e. between Pentecost A. D. 58 and the autumn of A. D. 60, has been recently advocated by several writers of ability, and stated with such cogency and clearness by Meyer (Ei sleit. z. Ephes. p. 15 ff.), as to deserve some consideration. It will be found, however, to rest on ingeniously urged plausibilities; whereas, to go no further than the present epistle, the notices of the Apostle's imprisonment in ch. iv. 3, 4, 10, certainly seem historically inconsistent with the nature of the imprisonment at Caesarea. The permission of Felix (Acts xxiv. 23) can scarcely be strained into any degree of liberty to teach or preach the Gospel, while the facts recorded of St. Paul's imprisonment at Rome (Acts xxviii. 23, 31) are such as to harmonize admirably with the freedom in this respect which our present epistle represents to have been accorded both to the Apostle and his companions: see ch. iv. 11, and comp. De Wette, Einleit. z. Coloss. pp. 12, 13: Wieseler, Chronol. p. 420.

2. The nature of the erroneous teaching condemned in this epistle has been very differently estimated. Three opinions only seem to deserve any serious consideration; (a) that these erroneous teachers were adherents of Neo-Platonism, or of some forms of Occidental philosophy; (b) that they leaned to Essene doctrines and practices; (c) that they advocated that admixture of Christianity, Judaism, and Oriental philosophy which afterwards became consolidated into Gnosticism. Of these (a) has but little in its favor, except the somewhat vague term pilosopla (ch. ii. 8), which, however, it seems arbitrary to restrict to Grecian philosophy; (b) is much more plausible as far as the use alluded to, but seems inconsistent both with the exclusive nature and circumscribed localities of **Essene** teaching; (c) on the contrary is in accordance with the Gentile nature of the church of Colossse (ch. i. 21), with its very locality - speculative and superstitious Phrygia - and with that tendency to associate Judaical observances (ch. ii. 16) with more purely theosophistic speculations (ch. ii. 18), which became afterwards so conspicuous in developed Gnosticism. The portions in our analysis of the epistle marked in italics serve to show how deeply these perverted opinions were felt by the Apostle to strike at the doctrine of the eternal Godhead of Christ.

3. The striking similarity between many portions of this epistle and of that to the Ephesians as given rise to much speculation, both as to the eason of this studied similarity, and as to the priority of order in respect to composition. These soints cannot here be discussed at length, but must se somewhat briefly dismissed with the simple expression of an opinion that the similarity may reasonably be accounted for, (1) by the proximity in epistle to Cassares (Hist. des trois premiers Siècles,

within a moderate distance from one another, there would be many doctrinal prejudices, and many social relations, that would call forth and need precisely the same language of warning and exhortation. The priority in composition must remain a matter for a reasonable difference of opinion. Tc us the shorter and perhaps more vividly expressed Epistle to the Colossians seems to have been first written, and to have suggested the more comprehensive, more systematic, but less individualizing epistle to the church of Ephesus.

For further information the student is directed to Davidson's Introduction, ii. 394 ff.; Alford, Prolegom. to N. T. iii. 83 ff.; and the introduction to the excellent Commentary of Meyer.

The editions of this epistle are very numerous. Of the older commentaries those of Davenant, Expos. Ep. Pauli ad Col., ed. 8; Suicer, in Ep. Paula ad Col. Comment., Tig. 1699, may be specified; and of modern commentaries, those of Bähr (Bas. 1838), Olshausen (Königsb. 1840), Huther (Hamb. 1841, a very good exegetical commentary), De Wette (Leips. 1847), Meyer (Gött. 1848); and in our own country those of Eadle (Glasg. [also New York] 1856), Alford (Lond. 1857), and Ellicott (Lond. 1858). C. J. E.

* Later editions of Commentaries - Meyer, 1865; Alford, 1865; Ellicott, 1865, and Amer. reprint, 1865. Other recent works - Ewald, Sendschreiben des Apostels Paulus, 1857; Schenkel, Briefe an die Ephes., Philipp. u. Kolosser, 1862; Dr. Karl Braune, Die Brr. an die Epheser, Kolosser, Philipper, 1867 (intended as a substitute for Schenkel on these epistles in Lange's Bibelwerk); Bleek, Vorlesungen üb. die Briefe an die Kolosser. u. s. w., 1865, and Einl. in das N. Test., 1862, p. 484 ff.; Wordsworth, Greek Testament, 1866 (4th ed.); and J. Llewelyn Davies, The Epistles of St. Paul to the Ephesians, the Colossians. and Philemon, with Introductions and Notes, London, 1866. There are many good thoughts on this epistle, exegetical and practical, though quaintly expressed, in Trapp's Commentary on the New Testament, pp. 613-21 (Webster's ed., London, 1865).

For a vindication of the genuineness of the epistle in opposition to the Tübingen critics, see Klöpper. De Origine Epp. ad Ephesius et Colosse Gryph. 1853, and Räbiger, De Christologia Paul ina contra Baurium Commentatio, Vratisl. 1852. Prof. Weiss also defends the genuineness of the epistle against Baur's assumptions (Herzog's Real-Encykl. xix. 717-723). But as to the place where it was written, he sides with those who maintain that Paul was imprisoned at the time at Caesarea and not at Rome. He insists with special earnest ness on the fact that in Philem. ver. 22 the Apostle intimates that he might be expected soon at Colossæ; whereas he appears from Phil. ii. 24 to be meditating a journey to Macedonia and not to Asia Minor. on regaining his liberty. But the implication here that Paul could not have taken Colossæ and Macedonia in his way on the same journey (provided he was at Rome), seems not well founded. For, crossing from Italy to Dyrrachium, he could traverse the Egnatian Way through Macedonia to Philippi, and then embarking at Neapolis (Kavalla), the port of Philippi, proceed to Tross or the mouth of the Cay-ster, and thence to Ephesus or Colosse as his plan might require. Pressensé also assigns the Colo time at which the two epistles were written: (2 ii. 55 ff.); but natural as it may seem that Paul

the two years that he was kept at Causarea, that ornsideration (on which Pressensé mainly relies) can hardly have more weight than the opposite consideration that Paul might be expected also to write to the Colossians while he was at Rome. The fuller doctrinal development in the letters to the Colossians and the Ephesians favors a later rather than an earlier period in the history of these churches. The same writer's allegation that Paul must have written this group of letters (Colossians, Ephesians, Philemon) it ('æsarea, because a slave like Onesimus could not have been the apostle's fellow-prisoner at Rome, where his captivity was less rigorous than at Caesarea, is inconclusive; for in fact there is no evidence at all that Onesimus was a prisoner anywhere.

Yet it should be stated there is a strong current of opinion. among critics at present in favor of Caesarea. In support of that view, see especially Reuss, Geschichte der heil. Schriften, p. 100 ff. (3te Aufl.). Böttger, Meyer, Thiersch, Schenkel, Laurent (Neutest. Studien, p. 100 ff.), and others, advocate the same opinion. On the other hand, Hemsen, Credner, Guericke, Ewald, Neander, Lange, Bleek, Braune (in Lange's Bibelwerk), and nearly all the English critics, refer the epistle to Paul's first Roman captivity. Bleek in his Vorlesungen and Einleitung, mentioned above, states very fully and forcibly the grounds for this conclusion. н.

From the time that men began to live in cities, trade, in some shape, must have been carried on to supply the town-dwellers with necessaries (see Heeren, Afr. Nat. i. 469), but it is also clear that international trade must have existed and affected to some extent even the pastoral nomad races, for we find that Abraham was rich, not only in cattle, hut in silver, gold, and gold and silver plate and ornaments (Gen. xiii. 2, xxiv. 22, 53); and further, that gold and silver in a manufactured state, and silver, not improbably in coin, were in use both among the settled inhabitants of Palestine and the nastoral tribes of Syria at that date (Gen. xx. 16, xxiii. 16, xxxviii. 18; Job xlii. 11), to whom those metals must in all probability have been imported from other countries (Hussey, Anc. Weights, c. xii. 3. p. 193; Kitto, Phys. Hist of Pal., p. 109, 110; Herod. i. 215).

Among trading nations mentioned in Scripture, Egypt holds in very early times a prominent position, though her external trade was carried on, not by her own citizens, but by foreigners, chiefly of the nomad races (Heeren, Afr. Nat. i. 468, ii. 371, 172). It was an Ishmaelite caravan, laden with spices, which carried Joseph into Egypt, and the built, or more probably fortified, Baalbee and Pal

should have written to the Asiatic churches during | of the merchandise imported (Gen. xxxvii. Sh xxxix. 1; Job vi. 19). From Egypt it is likely that at all times, but especially in times of general scarcity, corn would be exported, which was paid for by the non-exporting nations in silver, which was always weighed (Gen. xli. 57, xlii. 3, 25, 35, xliii. 11, 12, 21). These caravans also brought the precious stones as well as the spices of India into Egypt (Ex. xxv. 3, 7: Wilkinson, Anc. Fg. ii. 235, 237). Intercourse with Tyre does not appear to have taken place till a later period, and thus, though it cannot be determined whether the purple in which the Egyptian woolen and linen cloths were dyed was brought by land from Phœnicia, it is certain that colored cloths had long been made and dyed in Egypt, and the use, at least, of them. adopted by the Hebrews for the tabernacle as early as the time of Moses (Ex. xxv. 4, 5; Heeren, Asial Nat. i. 352; Herod. i. 1). The pasture-ground of Shechem appears from the story of Joseph to have lain in the way of these caravan journeys (Gen. xxxvii. 14, 25; Saalschütz, Arch. Hebr. 15. 1 159).

> At the same period it is clear that trade was carried on between Babylon and the Syrian cities, and also that gold and silver ornaments were com mon among the Syrian and Arabian races; a trade which was obviously carried on by land-carriage (Num. xxxi. 50; Josh. vii. 21; Judg. v. 30, viii. 24; Job vi. 19).

Until the time of Solomon the Hebrew nation may be said to have had no foreign trade. Foreign trade was indeed contemplated by the Law, and strict rules for morality in commercial dealings were laid down by it (Deut. xxviii. 12, xxv. 13-16; Lev. xix. 35, 36), and the tribes near the sea and the Phœnician territory appear to have engaged to some extent in maritime affairs (Gen. xlix. 13; Deut. xxxiii. 18; Judg. v. 17), but the spirit of the Law was more in favor of agriculture and against foreign trade (Deut. xvii. 16, 17; Lev. xxv.; Joseph. c. Apion. i. 12). Solomon, however, organized an extensive trade with foreign countries, but chiefly, at least so far as the more distant nations were concerned, of an import character. He imported linen yarn, horses, and chariots from Egypt. Of the horses some appear to have been resold to Syrian and Canaanite princes. For all these he paid in gold, which was imported by sea from India and Arabia by his fleets in conjunction with the Phoenicians (Heeren, As. Nat. i. 334; 1 K. x. 29-29; Ges. p. 1202). It was by Phoenicians also that the cedar and other timber for his great architectural works was brought by sea to Joppa, whilst Solomon found the provisions necessary for the workmen in Mount Lebanon (1 K. v. 6, 9; 2 Chr. ii. 16).

The united fleets used to sail into the Indian Ocean every three years from Elath and Ezicngeber, ports on the Ælanitic gulf of the Red Sea, which David had prohably gained from Edom, and brought back gold, silver, ivory, sandal-wood, ebony, precious stones, apes, and peacocks. Some of these may have come from India and Ceylon, and some from the coasts of the Persian Gulf and the E. coast of Africa (2 Sam. viii. 14; 1 K. ix. 26, x. 11, 22; 2 Chr. viii. 17; Her. iii. 114; Livingstone, Travels, pp. 637, 662).

But the trade which Solomon took so much pains to encourage was not a maritime trade only. He account shows that slaves formed sometimes a part myra; the latter at least expressly as a carevan

summers for the hand-commerce with eastern and 1807 4to; F. M. Hubbard, Commerce of Ancien south-eastern Asia (1 K. iz. 18). Egyps, in the Bibl. Repos. for April 1838, vil. 384-

After his death the maritime trade declined, and an attempt made by Jehoshaphat to revive it proved unsuccessful (1 K. xxii. 48, 49) [TARSHISH, OFHIR]. We know, however, that Phomicia was supplied from Judzea with wheat, honey, oil, and balm (1 K. v. 11; Ez. xxvii. 17; Acta xii. 90; Joseph. B. J. ii. 21, § 2; Vit. 13), whilst Tyrian dealers brought fish and other merchandise to Jerusalem at the time of the return from captivity (Nel. xiii. 16), as well as timber for the rebuilding of the temple, which then, as in Solomon's time, was brought by sea to Joppa (Ezr. iii. 7). Oil was exprited to Egypt (Hos. xii. 1), and fine linen and arramental girdles of domestic manufacture were sol's to the merchants (Irvor. xxii. 24).

The successive invasions to which Palestine was subjected, involving both large abstraction of treasure by invaders and heavy imposts on the inhabitants to purchase immunity or to satisfy demands for tribute, must have impoverished the country from time to time (under Rehoboam, 1 K. xiv. 26; Asa, xv. 18; Joash, 2 K. xii. 18; Amaziah, xiv. 13; Ahaz, xvi. 8; Hezekiah, xviii. 15, 16; Jehoahaz and Jehoiakim, xxiii. 33, 35; Jehoiachin, xxiv. 13). but it is also clear, as the denunciations of the prophets bear witness, that much wealth must somewhere have existed in the country, and much foreign merchandise have been imported; so much so that, in the language of Ezekiel, Jerusalem appears as the rival of Tyre, and through its port, Joppa, to have carried on trade with foreign countries (Is. ii. 6, 16, iii. 21-23; Hos. xii. 7; Fz. xxvi. 2; Jonah i. 3; Heeren, As. Nat. i. p. 328).

Under the Maccabees Joppa was fortified (1 Mace. xiv. 34), and later still Casarea was built and made a port by Herod (Joseph. Ant. xv. 9, § 6; Acts xxvii. 2). Joppa became afterwards a haunt for pirates, and was taken by Cestius; afterwards by Vespasian, and destroyed by him (Strab. xvi. p. 759; Joseph. B. J. ii. 18, § 10, iii. 9, § 1).

The internal trade of the Jews, as well as the external, was much promoted, as was the case also in Egypt, by the festivals, which brought large numbers of persons to Jerusalem, and caused great outlay in victims for sacrifices and in incense (1 K. viii. 63; Heeren, Afr. Nat. ii. 363).

The places of public market were, then as now, chiefly the open spaces near the gates, to which goods were brought for sale by those who came from the outside (Neh. xiii. 15, 16; Zeph. 1. 10).

The traders in later times were allowed to intrude into the temple, in the outer courts of which victims were publicly sold for the sacrifices (Zech. xiv. 21; Matt. xi. 12; John ii. 14).

In the matter of buying and selling great stress is taid by the Law on fairness in dealing. Just weights and balances are stringently ordered (Lev. siz. 35, 36; Deut. xxv. 13-16). Kidnapping alaves is farbidden under the severest penalty (Ex. xxi. 16: Deut. xxiv. 7). Trade in swine was forbidden sy the Jewish doctors (Surenhus. *Mishra. de damas.* v. 7, vol. iv. p. 60; Lightfoot, *H. H. on Matth.* rili. 38; Winer, *Handel*; Saalschütz, *Arch. Hebr.* s. 15, 16). if. W. P.

CONANI'AH (17) [Keri, whom Jeho-

vuh creates]: Xorrerlas; Alex. Xorrerlas: Chonenias), one of the chiefs (")) of the Levites in the time of Josiah (2 Chr. xxxv. 9). The same name is elsewhere given in the A. V. [as] CON, NIAH.

* CONCISION. So Paul, by the use of an abstruct term for the concrete (Phil. iii. 2), denominates the Judaizers who insisted on circumcision as necessary for Gentile converts. They carried their zeal so far, and so monstrously perverted the real character of the rite, that instead of a name which perhaps they were disposed to think honorable to them - ή περιτομή, "the circumcision," - they might more justly be called & sararout, " the concision " or "mutilation." The article before the names points out the persons as well known. This is the more approved explanation (Bengel, Meyer, Weiss, Wiesinger, Ellicott, Wordsworth, Alford). For Paul's use of such paronomastic expressions, see Wilke's Neutest. Rhetor. p. 413, and Winer's Neutest. Grumm. § 68, 2 (6te Aufl.). H.

CONCUBINE. פּילֶגְשׁ appears to have been included under the general conjugal sense of the

word TWN, which in its limited sense is rendered "wife." The positions of these two among the early Jews cannot be referred to the standard of our own age and country; that of concubine being less degraded, as that of wife was, especially owing to the sauction of polygamy, less honorable than among ourselves. The natural desire of offspring was, in the Jew, consecrated into a religious hope which tended to redeem concubinage from the debasement into which the grosser motives for its adoption might have brought it. The whole question must be viewed from the point which touches the interests of propagation, in virtue of which even a slave concubine who had many children would become a most important person in a family, especially where a wife was barren. Such was the true source of the concubinage of Nachor, Abraham, and Jacob, which indeed, in the two latter cases, lost the nature which it has in our eyes, through the process, analogous to adoption, by which the offspring was regarded as that of the wife herself. From all this it follows that, save in so far as the latter was generally a slave, the difference between wife and concubine was less marked, owing to the absence of moral stigma, than among us. We must therefore beware of regarding as essential to the relation of concubinage, what really pertained to that of bondage.

The concubine's condition was a definite one, and

guite independent of the fact of there being another woman having the rights of wife towards the same man. The difference probably lay in the absence of the right of the libellus divortii, without which the wife could not be repudiated, and in some particulars of treatment and consideration of which we are ignorant; also in her condition and rights on the death of her lord, rather than in the absence of nuptial ceremonies and dowry, which were nonessential; yet it is so probable that these last did not pertain to the concubine, that the assertion of the Gemara (*Hierosol. Chetwloth*, v.) to that effect, though controverted, may be received. The doctrine that a concubine also could not be dismissed without a formal divorce is of later origin - not that such dismissals were more frequent, probably, than those of wives - and negatived by the silence of Ex. xxi. and Deut. xxi. regarding it. From this it seems to follow that a concubine could not become a wife to the same man, nor rice versel, unless in the improbable case of a wife divorced returning as a concubine. With regard to the children of wife and concubine, there was no such difference as our illegitimacy implies; the latter were a supplementary family to the former, their names occur in the patriarchal genealogies (Gen. xxii. 24; 1 Chr. i. 32), and their position and provision, save in the case of defect of those former (in which case they might probably succeed to landed estate or other chief hostage), would depend on the father's will (Gen. xxv. 6). The state of concubinage is assumed and provided for by the law of Moses. A concubine would generally be either (1) a Hebrew girl bought of her father, i. e. a slave, which alone the Rabbins regard as a lawful connection (Maimon. Halach-Melakim, iv.), at least for a private person; (2) a Gentile captive taken in war; (3) a foreign slave bought, or (4) a Canaanitish woman, bond or free. The rights of (1) and (2) were protected by law (Ex. xxi. 7: l'eut. xxi. 10), but (3) was unrecognized, and (4) prohibited. Free Hebrew women also might become concubines. So Gideon's concubine seems to have been of a family of rank and influence in Shechem, and such was probably the state of the Levite's concubine (Judg. xx.). The ravages of war among the male sex, or the impoverishment of families, night often induce this condition. The case (1) was not a hard lot. The passage in Ex. xxi. is somewhat obscure, and seems to mean, in brief, as follows: - A man who sought a Hebrew girl as concubine for himself unight not treat her as a mere Hebrew slave, to be sent "out" (i. e. in the seventh, v. 2), but might, if she displeased him, dismiss her to her father on redemption, i. e. repayment probably of a part of what he paid for her. If he had taken her for a concubine for his son, and the son then married another woman, the concubine's position and rights were secured, or, if she were refused these, she became free without redemption. Further, from the provision in the case of such a concubine given by a man to his son, that she should be dealt with 'after the manner of daughters," we see that the servile merged in the connubial relation, and that her children must have been free. Yet some degree of contempt attached to the "handmaid's son"

(TIDN 2), used reproachfully to the son of a con-

evbine merely in Judg. ix. 18; see also Ps. cxvi. 16. The provisions relating to (2) are merciful and considerate to a rare degree, but overlaid by the Babbie with distorting convents.

In the books of Samuel and Kings the consubin mentioned belong to the king, and their condition and number cease to be a guide to the genera. practice. A new king stepped into the rights of his predecessor, and by Solomon's time the custom had approximated to that of a Persian harem (S Sam. xii. 8, xvi. 21; 1 K. ii. 22). To seize on royal concubines for his use was thus an usurper's first act. Such was probably the intent of Abner's act (2 Sam. iii. 7), and similarly the request on behalf of Adonijah was construed (1 K. ii. 21-94). For fuller information Selden's treatises de Uxore Hebrasá and de Jure Natur. et Gent. v. 7, 8, and especially that de Successionibus, cap. iii , may with some caution (since he leans somewha' casily to rabbinical tradition) be consulted; also the treatises Sotah, Kiddushin, and Chetuboth in the General Hierosol., and that entitled Sanhedrin in the Gemara Babyl. The essential portions of all these are collected in Ugolini, vol. xxx. de Uzors Hebrand. н. н.

CONDUIT (אַרָרָה: uspayaryos: aquaduo-

tus; a trench or water-course, from גְּלֶה, to ascend, Gesen. p. 1022).

1. Although no notice is given either by Scripture or by Josephus of any connection between the pools of Solomon beyond Bethlehem and a supply of water for Jerusalem, it seems unlikely that so large a work as the pools should be constructed merely for irrigating his gardens (Eccl. ii. 6), and tradition, both oral and as represented by Talmudical writers, ascribes to Solomon the formation of the original aqueduct by which water was brought to Jerusalem (Maundrell, Early Trav. p. 458; Hasselquist, Trav. 146; Lightfoot, Descr. Templ. c. xxiii. vol. i. p. 612; Robinson, i. 265). Pontius Pilate applied the sacred treasure of the Corban to the work of bringing water by an aqueduct from a distance, Josephus says of 300 or 400 stadia (B. J. ii. 9, § 4), but elsewhere 200 stadia, a distance which would fairly correspond with the length of the existing aqueduct with all its turns and windings (Ast. xviii. 3, § 2; Williams, Holy City, ii. 501). His application of the money in this manner gave rise to a serious disturbance. Whether his work was a new one or a reparation of Solomon's original aqueduct cannot be determined, but it seems more than probable that the ancient work would have been destroyed in some of the various sieges since Solomon's time. The aqueduct, though much injured, and not serviceable for water beyond Bethlehem, still exists: the water is conveyed from the fountains which supply the pools about two miles S. of Bethlehem. The water-course then passes from the pools in a N. E. direction, and winding round the hill of Bethlehem on the S. side, is carried sometimes above and sometimes below the surface of the ground, partly in earthen pipes and partly in a channel about one foot square of rough stones laid in cement, till it approaches Jerusalem. There it crosses the valley of Hinnom at the S. W. side of the city on a bridge of nine arches at a point above the pool called Birket-es-Sultan, ther returns S. E. and E. along the side of the valley and under the wall, and continuing its course along the east side is finally conducted to the Haram. It was repaired by Sultan Mohammad Ibn-Kalaûn o' Egypt about A. D. 1300 (Williams, Holy City, ii 498; Raumer, Pal. p. 280; Robinson, i. 985-967 847, 476, iii. 947).

CONEY

2. Among the works of Hezekish he is said to | Lands of the Bible, ii. 28 ff.). The Arabs call the save stopped the "upper water-course of Gibon, and brought it down straight to the W. side of the city of David (2 Chr. xxxii. 30). The direction of this water-course of course depends on the site of Gihon. Dr. Robinson identifies this with the large pool called Burket-es-Mamilla at the head of the valley of Hinnom on the S. W. side of Jerusalem, and considers the lately discovered subterranean conduit within the city to be a branch from Hezekian's water-course (Rob. iii. 243-4, i. 327; Ges. pp. 616, 1395). Mr. Williams, on the other hand aces Gihon on the N. side, not far from the tombs of the kings, and supposes the water-course to have brought water in a S. direction to the temple, whence it flowed ultimately into the l'ool of Siloam or Lower Pool. One argument which recommends this view is found in the account of the interview between the emissaries of Sennacherib and the officers of Hezekiah, which took place " by the conduit of the upper pool in the highway of the fuller's field" (2 K. xviii. 17), whose site seems to be indicated by the "fuller's monument" mentioned by Josephus as at the N. E. side of the city, and by the once well-known site called the Camp of the Assyrians (Joseph. B. J. v. 4, § 2, 7, § 3, and 12, H. W. P. § 2). [GIHON; JERUSALEM.]

CONEY () 2 : δασύπους, χοιρογρύλλιος, v. l. Laruds : charogryllus, herinaceus, lepus culus), a gregarious animal of the class Pachydermata, which is found in Palestine, living in the caves and clefts of the rocks, and has been erroneously identified with the Rabbit or Coney. Its

scientific name is Hyraz Syriacus. The 1900 is mentioned four times in the O. T. In Lev. xi. 5 and in Deut. xiv. 7 it is declared to be unclean, because it chews the cud, but does not divide the hoof. In Ps. civ. 18 we are told "the rocks are a refuge for the coneys," and in Prov. xxx. 26 that "the coneys are but a feeble folk, yet make they their houses in the rocks." The Hyrax satisfies

Hyrax Syriacus. (From a specimen in the British Museum.)

exactly the expressions in the two last passages; and its being reckoned among the ruminating animals is no difficulty, the hare being also erroneously placed by the sacred writers in the same class, because the action of its jaws resembles that of the ruminating animals. Its color is gray or brown on the back, white on the belly; it is like the alpinmarmot, scarcely of the size of the domestic car. having long hair, a very short tail, and round ears. It is very common in Syria, especially on the ridges of Lebanon, and is found also in Arabia Petrea, Upper Egypt, Abyssinia, and Palestine (Wilson,

رَبَر عَلَيْهُ, wabr; but among the southern Arabs

the find the term ثغري, the fun == shaphan (Fresnel

in Asiatic Journ. June, 1858, p. 514). The Amharic name is ashkoko, under which name the hyrax is described by Bruce, who also gives a figure of it, and mentions the fact that the Arabs also called it بنی اسرایل, "sheep of the

children of Israel." The hyrax is mentioned by Robinson (iii. 387), as occurring in the sides of the chasm of the Litany opposite to Belat. He says that it is seen coming out of the clefts of the rocks in winter at midday; in summer only towards

evening. The derivation of 320 from the unused

root, 792, to hide, chiefly in the earth is obv ms. W 1.

The Hyraz Syriacus is now universally allowed to be the shaphdn of the Bible, and the point may fairly be considered satisfactorily settled. The "coney" or rabbit of the A. V., although it suits the Scriptural allusions in every particular, except in the matter of its ruminating, is to be rejected, as the rabbit is nowhere found in the Bible lands; there are several species or varieties of hare, but the rabbit is not known to exist there in a wild state.^a The Jerboa (Dipus Ægyptius) which Bochart (Hieroz. ii. 409), Rosenmüller (Schol. in Lev. xi. 5), and others have sought to identify with the shaphan, must also be rejected, for it is the nature of the jerboas to inhabit sandy places and not stony rocks. It is curious to find Bochart quoting Arabian writers, in order to prove that the scubr denotes the jerboa, whereas the description of this animal as given by Damir, Giauhari, and others, exactly suits the hyrax.

"The wabr," says Giauhari, "is an arimal less than a cat, of a brown color, without a tail," upon which Damir correctly remarks, "when he says it has no tail, he means that it has a very short one." Now this description entirely puts the jerboa out of the question, for all the species of jerboa are remarkable for their long tails.

With regard to the localities of the avrax, it does not appear that it is now very common in Palestine, though it is occusionally seen in the hilly parts of that country. Schubert says "of the Wober (Hyrax Syriacus), we could discover no trace in either Palestine or Syria;" upon this Dr Wilson (Lands of the Bible, ii. 28) remarks, "We were, we believe, the first European travellers who actually noticed this animal within the proper bounds of the Holy Land," this was amongst the rocks at Mar Saba. Bruce, however, noticed these animals plentifully in Lebanon, and among the rocks at the Pharan Promontorium or Cape Mohammed, near the Gulf of Suez; and Shaw (Trav. ii. 160, Svo ed.) also saw the hyrax on Lebanon, and says "it is common in other places of this country." Dr. Hooker in his recent journey to the Lebanon and Palestine saw no hyrax anywhere, and says he

cient Hebrews had over seen imported specimens of the rabbit, there can be no doubt that it would have been included under the Hebrew term a web, which to the Arabic name at Aleppo both of title animal and

a Bussell (Aleppo, ii. 159, 2d ed.) mentions rabbits to being occasionally bred in houses, " for the use of the Franks" at Aleppo; and adds that the fur of the hite and black rabbit is much worn, and that the the Arabit the kind is imported from Europe. Even if the an-

was told it is confined to the sterile hills of the Jorfan and Dead Sea valleys only; Thomson (*Land* and Book, p. 298) speaks only of one individual among the ruins of the Castle of Kurein.«

Hemprich (Symbolas Phys. p. i.) enumerates three species of hyrax, and gives the localities as follows: 11. Syriacus, Mount Sinai; H. habessisious, mountains on the coast of Abyssinia; - this is the Ashkowo of Bruce - and II. ruficeps, Dongala. The Amharic name of Ashkoko is, according to Bruce, derived from "the long herinaceous hairs which like small thorns grow about his back, and which in Amhara are called Ashok." A tame hyrax was kept by Bruce, who from the action of the animal's jaws was led into the error of supposing that "it chewed the cud;" it is worthy or remark that the poet Cowper made the same mistake with respect to his tame hares. The flesh of the byrax is said to resemble the rabbit in flavor; the Arabs of Mount Sinal esteem it a delicacy; the Christians of Abyssinia do not eat its flesh, nor do the Mohammedans: see Oedmann (Vermisch. Samm. pt. v. ch. ii.). Hemprich states that the urine of the Cape hyrax (H. capensis), as well as that of the Asiatic species, is regarded as medicinal. See also Sparman (Trav. p. 324) and Thunberg (Trav. i. 190). This is confirmatory of the remarks of an Arabic writer cited by Bochart (Hieroz. ii. 418).

The hyrax is zoologically a very interesting animal, for although in some respects it resembles the Rodentia, in which order this genus was originally placed, its true affinities are with the rhinoceros its molar teeth differ only in size from those of that great pachyderm. Accordingly Dr. Gray places the hyrax in his sub-family Rhinocerina, family Elephantidos; it is about the size of a rabbit, which in some of its habits it much resembles; the animals are generally seen to congregate in groups amongst the rocks, in the cavities of which they hide themselves when alarmed; they are herbivorous as to diet, feeding on grass and the young shoots of shruls. Some observers have remarked that an old male is set as a sentry in the vicinity of their holes. and that he utters a sound like a whistle to apprise his companions when danger threatens; if this is a fact, it forcibly illustrates Prov. xxx. 24, 26, where the shaphan is named as one of the four things upon earth which, though little, "are exseeding wise." W. H.

* CONFECTION (Ex. xxx. 35) stands for compound or mixture, a Latin sense of the word.

н.

* CONFIRMATION. [Вартиям, р. 244.] CONGREGATION (קָהָל, לֶכָה, from

7177, to call = consocation: $\sigma uva\gamma w \gamma h$; $d\kappa \lambda \eta$ ofa, in Deut. xviii. 16, xxiii. 1: congregatio, ecclesia, catas). This term describes the Hebrew people in its collective capacity under its peculiar aspect as a holy community, held together by religious rather than political bonds. Sometimes it is used in a broad sense as inclusive of foreign settlers (Ex. xii. 19); but more properly, as exclusively apvopriate to the Hebrew element of the population Num. xv. 15); in each case it expresses the idea of the Roman Civitas or the Greek $\pi o \lambda train$

set in the set of t

gation or collection of tribes. Strangers (273) settled in the land, if circumcised, were with certain exceptions (Deut. xxiii. 1 ff.) admitted to the privilege of citizenship, and are spoken of as mombers of the congregation in its more extended application (Ex. xii. 19; Num. ix. 14, xv. 15); it appears doubtful, however, whether they were reprosented in the congregation in its corporate capacity as a deliberative body, as they were not, strictly speaking, members of any house; their position probably resembled that of the $\pi\rho\delta\xi\epsilon\nu\sigma\iota$ at Athens. The congregation occupied an important position under the Theocracy, as the comitia or national parliament, invested with legislative and judicial powers. In this capacity it acted through a system of patriarchal representation, each house, family, and tribe being represented by its Lead or

father. These delegates were named 777 These

(πρεσβύτεροι: seniores; "elders"); Curico (Loxorres: principes; "princes"); and sometimes

קריאים (enintantos: qui vocabantur, Num. xvi. 2;

A. V. "renowned," "famous"). The number of these representatives being inconveniently large for ordinary business, a further selection was made by Moses of 70, who formed a species of standing committee (Num. zi. 16). Occasionally indeed the whole body of the people was assembled, the mode of summoning being by the sound of the two silver trumpets, and the place of meeting the door of the tabernacle, hence usually called the taber-

nacle of the congregation (7272), hit. place of meeting) (Num. x. 3): the occasions of such general assemblies were solemn religious services (Ex. xii. 47; Num. xxv. 6; Joel ii. 15), or to receive new commandments (Ex. xix. 7, 8; Lev. viii. 4). The elders were summoned by the call of one trumpet (Num. x. 4), at the command of the supreme governor or the high-priest; they represented the whole congregation on various occasions of public interest (F.x. iii. 16, xii. 21, xvii. 5, xxiv. 1); they acted as a court of judicature in capital offenses (Num. xv. 33, xxxv. 12), and were charged with the execution of the sentence (l.ev. xxiv. 14; Num. xv. 35); they joined in certain of the sacrifices (Lev. iv. 14, 15); and they exercised the usual rights of sovereignty, such as declaring war, making peace, and concluding treaties (Josh. ix. 15). The people were strictly bound by the acts of their representatives, even in cases where they disapproved of them (Josh. ix. 18). After the occupation of

sworing perfectly to what is said in Prov. xxx 24, 32, both as to its feebleness and its singular cunning and power of self-preservation. See his Land of Iwasi, 37 ed. p. 258 (London, 1866).

he land of Canaan, the congregation was assembled i acter, in contradistinction to comgregation, in which mly on matters of the highest importance. The delegates were summoned by messengers (2 Chr. xxx. 6) to such places as might be appointed, most frequently to Mizpeh (Judg. x. 17, xi. 11, xx. 1; 1 Sam. vii. 5, x. 17; 1 Macc. iii. 46); they came attended each with his band of retainers, so that the number assembled was very considerable (Judg. xx. 2 ff.). On one occasion we hear of the congre gation being assembled for judicial purposes (Judg. xx.); on other occasions for religious festivals (2 Chr. xxx. 5, xxxiv. 29); on others for the election of kings, as Saul (1 Sam. x. 17), David (2 Sam. v. 1), Jeroboam (1 K. xii. 20), Joash (2 K. xi. 19), Josiah (2 K. xxi. 24), Jehoahaz (2 K. xxiii. 30), and Uzziah (2 Chr. xxvi. 1). In the later periods of Jewish history the congregation was represented by the Sanhedrim; and the term ouraywyh, which in the LXX. is applied exclusively to the congre-

gation itself (for the place of meeting אהל מוֹעֵד is invariably rendered ή σκηνή τοῦ μαρτυρίου, tab-

ernaculum testimonii, the word TYID being con-

sidered = 1717 (Was transferred to the places of worship established by the Jews, wherever a certain number of families were collected. W. L. B.

• "Congregation," assembly of the people, is the proper rendering of $i\kappa\lambda\eta\sigma la$ in Acts vii. 38, instead of "church" (A. V.). That is the rendering in the older English versions (Tyndale's, Cranmer's, the Genevan). Stephen evidently refers in that passage to the congregation of the Hebrews assembled at Sinai, at the time of the promulgation of the law. So nearly all the best critics (Bengel, Kuinoel, Olshausen, De Wette, Meyer, Lechler, H. Alford).

CONI'AH. [JECONIAH.]

CONONI'AH (יובר נרבר whom Jehovah estublishes]: Xwvevlas; [Vat. in ver. 12 Xwµevlas;]

Alex. Xaxerias: Chonenias), a Levite, ruler (T)) of the offerings and tithes in the time of Hezekiah (2 Chr. xxxi. 12, 13). [See CONANIAH.]

CONSECRATION. [PRIEST.]

* CONVENIENT signifies "becoming, fitting, appropriate " in several passages, e. g. Prov. xxx. 8; Jer. xl. 4; Rom. i. 28; Eph. v. 4; Philem. ver. 8. It occurs once in the dedication of James's translators. It is the rendering of drykor and rafficer in the N. T., and was an ancient Latin sense of the word. It belongs to the class of terms of which Archbishop Whately remarks that "they are much more likely to perplex and bewilder the reader, than those entirely out of use. The latter only leave him in darkness; the others mislead him by a false light." See his Bacon's Essays . with Annotations (Essay xxiv. p. 259, 5th ed. Boston, Ħ. 1863).

* CONVERSATION is never used in the A. V. in its ordinary sense, but always denotes "course of life," "conduct." In the N. T. 1, commonly represents the Greek avacrooph; once rpó-**\pios.** In Phil. iii. 20, "our conversation is in beaven," it is the rendering of $\pi o \lambda i \tau e \nu \mu a$ The wobable meaning is well expressed by Wakefield's translation, "we are citizens of heaven." A.

CONVOCATION (בְּהָרָא, from הַיָּהָא, from הַיָּהָא sare; comp. Num. x. 2; Is. i. 13). This term is the culinary operations of the Hebrews and Egyptusplied invariably to meetings of a religious char- ians (Wilkmon's Anc. Egypt. ii. 374 ff.).

political and legal matters were occasionally settled

Hence it is connected with WT, holy, and is ap plied only to the Sabbath and the great annual festivals of the Jews (Ex. xii. 16; Lev. xxiii. 2 ff.; Num. xxviii. 18 ff., xxix. 1 ff.). With one exception (Is. i. 13), the word is peculiar to the Pentateuch. The LXX. treats it as an adjective == κλητόs, erikλητοs; but there can be no doubt that the A. V. is correct in its rendering.

Ŵ. L. B.

COOKING. As meat did not form an article of ordinary diet among the Jews, the art of cooking was not carried to any perfection. The difficulty of preserving it from putrefaction necessitated the immediate consumption of an animal and hence few were slaughtered except for purposes of hospitality or festivity. The proceedings on such occasions appear to have been as follows: On the arrival of a guest the animal, either a kid, lamb, or calf, was killed (Gen. xviii. 7; Luke xv. 23), its throat being cut so that the blood might be poured out (Lev. vii. 26); it was then flayed

and was ready either for roasting (コンジ), or boil-

ing (ガロコ): in the former case the animal was preserved entire (Ex. xii. 46), and roasted either over a fire (Ex. xii. 8) of wood (Is. xliv. 16), or perhaps, as the mention of fire implies another method, in an oven, consisting simply of a hole dug in the earth, well heated, and covered up (Burckhardt, Notes on Bedouins, i. 240); the Paschal lamb was roasted by the first of these methods (Ex. xii. 8, 9; 2 Chr. xxxv. 13). Boiling, however, was the more usual method of cooking, both in the case of sacrifices, other than the Paschal lamb (Lev. viii. 31), and for domestic use (Ex. xvi. 23), so much

so that ジョー to cook generally, including even roasting (Deut. xvi. 7). In this case the animal was cut up, the right shoulder being first taken off (hence the priest's joint, Lev. vii. 32), and the other joints in succession; the flesh was separated from the bones and minced, and the bones themselves were broken up (Mic. iii. 3); the whole mass was then thrown into a caldron (Ez. xxiv. 4, 5) filled with water (Ex. xii. 9), or, as we may infer from Ex. xxiii. 19, occasionally with milk, as is still usual among the Arabs (Burckhardt, Notes, i. 63), the prohibition "not to see the a kid in his mother's milk" having reference apparently to some heathen practice connected with the offering of the first-fruits (Ex. L c. ; xxxiv. 26), which rendered the kid so prepared unclean food (Deut. xiv. 21). The caldron was boiled over a wood fire (Ez. xxiv. 10); the scum which rose to the surface was from time to time removed, otherwise the meat would turn out loathsome (6); salt or spices were thrown in to season it (10); and when sufficiently

boiled, the mest and the broth (770: Courds, LXX .: jus, Vulg.), were served up separately (Judg. vi. 19), the broth being used with unleavened bread, and butter (Gen. xviii. 8), as a sauce for dipping morsels of bread into (Burckhardt's Notes, i. 63). Sometimes the meat was so highly spiced that its flavor could hardly be distinguished;

such dishes were called שמעמים (Gen. xxvii. 4; Prov. xxiii. 3). There is a striking similarity in

stables were usually boiled, and served up as pottage | ten secret for rendering the metal hardes and more (Gen. xxv. 29; 2 K. iv. 38). Fish was also cooked (lχθύοs δητοῦ μέρος: piecis assi; Luke xxiv. 42), probably broiled. The cooking was in early times performed by the mistress of the household (Gen.

zviii. 6); professional cooks (ロロコン) were afterwards employed (1 Sam. viii. 13, ix. 23). The

utensils required were — δδ (χυτρόποδες: chytropodes), a cooking range, having places for two or more pots, probably of earthenware (Lev. xi 35);

קיר (λέβηs: lebes), a caldron (1 Sam. ii. 14);

1712 (npedypa: fuscinula), a large fork or flesh-

hook; $\neg \neg \supset$ ($\lambda \in \beta ns$: olla), a wide, open, metal vessel, resembling a fish-kettle, adapted to be used as a wash-pot (Ps. lx. 8), or to eat from (Ex. xvi. 3);

קלהר, דהד, פרהר pots probably of earthenware and high, but how differing from each other does not appear; and, lastly, געלוחית, or צלוחית, lishes (2 K. ii. 20, xxi. 18; Prov. xix. 24, A. V. " bosom "). W. L. B.

CO'OS (Rec. Text, els Thy Kŵr; Lachm. [and Tisch.] with ABC [DE Sin.], K@), Acts xxi. 1. [Cos.]

COPPER (העליה). This word in the A. V. is always rendered "brass," except in Ezr. viii. 27. See BRASS). This metal is usually found as pyrites (sulphuret of copper and iron), malachite (carb. of conver), or in the state of oxide, and occasionally in a native state, principally in the New World. It was almost exclusively used by the ancients for common purposes; for which its elastic and ductile nature rendered it practically available. It is a question whether in the earliest times iron was known (μέλας δ' οὐκ ἔσκε σίδηρος, Hes. Opp. et Dies, 149; Lucr. v. 1285 ff.). In India, however, its manufacture has been practiced from a very ancient date by a process exceedingly simple, and possibly a similar one was employed by the aneient Egyptians (Napier, Anc. Workers in Metul, p. 137). There is no certain mention of iron in the Scriptures; and, from the allusion to it as known to Tubalcain (Gen. iv. 22), some have ven-

tured to doubt whether in that place בְרָזֶל means iron (Wilkinson, Anc. Egypt. iii. 242).

We read in the Bible of copper, possessed in countless abundance (2 Chr. iv. 18), and used for every kind of instrument; as chains (Judg. xvi. 21), pillars (1 K. vii. 15-21), lavers, the great one being called "the copper sea" (2 K. xxv. 13; 1 Chr. xviii. 8), and the other temple vessels. These were made in the foundry, with the assistance of Hiram, a Phœnician (1 K. vii. 18), although the Jews were not ignorant of metallurgy (Ez. xxii. 18; Deut. iv. 20, &c.), and appear to have worked their own mines (Deut. viii. 9; Is. li. 1). We read also of copper mirrors (Ex. xxxviii. 8; Job xxxvii. 18), since the metal is susceptible of brilliant polish (2 Chr. iv. 16); and even of copper arms, as helmets, spears, &c. (1 Sam. xvii. 5, 6, 38; 2 Sam. xxi. 16). The expression "bow of steel," in Job xx. 24, I's. aviii. 34, should be rendered "bow of copper," since שָרַדָּה be term for steel is פַּלְדָּה or בַּרָזֵל מָצּכּוֹן (northern iron). They could hardly have applied sopper to these purpo es without presessing some "udicious system of alloys, or perhaps some forgot-

elastic than we can make it.

It has been maintained that the cutting-tools of the Egyptians, with which they worked the granits and porphyry of their monuments, were made on bronze, in which copper was a chief ingredient The arguments on this point are found in Wilkinson, iii. 249, &c., but they are not conclusive. There seems no reason why the art of making iror and excellent steel, which has been for ages practiced in India, may not have been equally known to the Egyptians. The quickness with which iron decomposes will fully account for the non-discovery of any remains of steel or iron implements. For analyses of the bronze tools and articles found in Egypt and Assyria, see Napier, p. 88.

The only place in the A. V. where "copper" is mentioned is Ezr. viii. 27, "two vessels of fine cop per, precious as gold " (cf. 1 Esdr. viii. 57; σκ-ύη χαλκοῦ στίλβοντος, διάφορα, ἐπιθυμητά ἐν χρυ-σίφ; æris fulgentis; "vases of Corinthian brash," Syr.; "ex orichalco," Jun.), perhaps similar to those of "bright brass" in 1 K. vii. 45; Dan. x. 6. They may have been of orichalcum, like the Persian or Indian vases found among the treasures of Darius (Aristot. de Mirab. Auscult.). There were two kinds of this metal, one nutural (Serv. ad An. xii. 87), which Pliny (II. N. xxxiv. 2, 2) mays had long been extinct in his time, but which Chardin alludes to as found in Sumatra under the name Calmbac (Rosenm. I. c.); the other artificial (identified by some with hAerroor, whence the mistaken spelling auri-chalcum), which Bochart (Hieroz. vi. ch. 16, p. 871 ff.) considers to be the Hebrew

בְּדָשׁל, a word compounded (he says) of בָּדָשׁל

(copper) and Chald. ドナウ (? gold, Ez. i. 4, 97, viii. 2); ήλεκτρον, LXX.; electrum, Vulg (αλλό-τυπον χρυσίον, Hesych.; to which Suid. adda, μεμεγμένον ύάλφ καl λιθίφ). On this substance see Pausan. v. 12; Plin. xxxiii. 4, § 23. Gesenius considers the Xalkoli Barov of Kev. i. 15 to be xaλxds λιπapos = יביל ד ; he differs from Bochart, and argues that it means merely "smooth or

polished brass." In F.z. xxvii. 13, the importation of copper vessels to the markets of Tyre by merchants of Javan, Tubal, and Meshech, is alluded to. Probably these were the Moschi, &c., who worked the cop per mines in the neighborhood of Mount Caucasus.

In 2 Tim. iv. 14, xalkevs is rendered "coppersmith," but the term is perfectly general, and is used even for workers in iron (Od. ix. 391); xaxκεύς, πῶς τεχνίτης, και δ ἀργυροκόπος και δ χρυσοχόοs (llesych.).

"Copper" is used for money, Ez. xvi. 36 (A. V. "filthiness); effexeas tor xarkor oou, LXX.; "effusuu est as tuum," Vulg.; and in N. T. (xarκοῦς, τοῦτο ἐπὶ χρυσοῦ καὶ τοῦ ἀργύοου ἕλεγον, Heaven Hesych.).

* COPTIC VERSION. [VERSIONS, AM-CIENT (EGYPTIAN).]

* COR (75: nopos: corus) a measure of capacity, the same as the homer (Ez. xlv. 14; 1 K iv. 22 and v. 11, marg.; Ezr. vii. 22, marg). See WEIGHTS AND MEASURES, II. § 2.

CORAL (, , Amoth : per topa; Symm it ndd; 'P wide: sericum, excelse) occurs only, a

490

be somewhat doubtful rendering of the Hebrew | but, with certain limitations, they were redeemable rdmóth, in Job xxviii. 18, "No mention shall be made of coral (ramoth, margin) or of pearls, for he price of wisdom is above rubies;" and in Ez. xxvii. 16, where coral is enumerated amongst the wares which Syria brought to the markets of Tyre. The old versions fail to afford us any clew; the LXX. gives merely the etymological meaning of the Hebrew term "lofty things;" the Vulg. in Fz. (L. c.) reads "silk." Some have conjectured " rhinoceros skins," deriving the original word from reem (the uniccrn of the A. V.), which word, however, has nothing to do with this animal. [UNI-CORN.] Schultens (Comment. in Jubum, l. c.) gives up the matter in despair, and leaves the word untranslated. Many of the Jewish rabbis understand "red coral" by ramoth. Gesenius (Thes. s. v.) conjectures "black coral" (?), assigning the red kind to penfnim ("rubies," A. V.): see RUBY. Michaelis (Suppl. Lex. Hebr. p. 2218) translates ramoth by Lapides gazellarum, i. e. L. bezonrdici, as if from rim, an Arabic name for some species of gazelle. The Lapis bezo rdicus of Linnæus denotes the calcareous concretions sometimes found in the stomach of the Indian gazelle, the Sasin (Anti-lope cerricopro, Pallas). This stone, which possessed a strong aromatic odor, was formerly held in high repute as a talisman. The Arabian physicians attributed valuable medicinal properties to these concretions. The opinion of Michaelis, that râmôth denotes these stones, is little else than conjecture. On the whole, we see no reason to be dissatisfied with the rendering of the A. V. "Coral" has decidedly the best claim of any other substances to represent the râmôth. The natural upward form of growth of the Corallium rubrum is well suited to the etymology of the word. The word rendered "price" in Job xxviii. 18, more properly denotes "a drawing out;" and appears to have reference to the manner in which coral and pearls were obtained from the sea, either by diving or dredging. At present, Mediterranean corals, which constitute an important article of commerce, are broken off from the rocks to which they adhere by long booked poles, and thus "drawn out." With regard to the estimation in which coral was held by the Jews and other Orientals, it must be remembered that coral varies in price with us. Fine compact specimens of the best tints may be worth as much as £10 per oz., while inferior ones are perhaps not worth much more than a shilling per b. Pliny says (N. H. xxxii. 2) that the Indians valued coral as the Romans valued pearls. It is possible that the Syrian traders, who as Jerome renarks (Rosenmüller, Schol. in Ez. xxvii. 16), would 'n his day run all over the world " lucri cupiditate," may have visited the Indian seas, and brought home thence rich coral treasures; though they would also readily procure coral either from the Red Sea or the Mediterranean, where it is abundantly found. Coral, Mr. King informs us, often occurs in ancient Egyptian jewelry as beads, and rut into charms. W. H.

CORBAN (إَجْ [(fering]: Super: oblatio 'n N T. κορβάν expl. by δώρον, and in Vulg. do-war used only in Lev. and Num., except in Ez. zz. 28, zi. 43), an offering to God of any sort, sloody or bloodless, but particularly ir fulfillment Ma vow The law laid down rules for vows, (1) uffirmative; (2) negative. By the former, persons, wimais, and property might be devoted to God, of in Judg. xvi. 7 (הרים לחים), A. V. " green

by money payments. By the latter, persons inter dicted themselves, or were interdicted by their parents from the use of certain things lawful in themselves, as wine, either for a limited or an unlimited period (Lev. xxvii.; Num. xxx.; Judg. xiii. 7; Jer. xxxv.; Joseph. Ant. iv. 4, § 4; B. J. ii. 15, § 1; Acts xviii. 18, xxi. 23, 24). Upon these rules the traditionists enlarged, and laid down that a man might interdict himself by vow, not only fron using for himself, but from giving to another, or receiving from him some particular object whether of food or any other kind whatsoever. The thing thus interdicted was considered as Corban, and the form of interdiction was virtually to this effect: "I forbid myself to touch or be concerned in any way with the thing forbidden, as if it were devoted by law," i. e. "let it be Corban." So far did they carry the principle that they even held as binding the incomplete exclunations of anger, and called

them I', handles. A person might thus exempt himself from assisting or receiving assistance from some particular person or persons, as parents in distress; and in short from any inconvenient obligation under plea of corban, though by a legal fiction he was allowed to suspend the restriction in certain cases. It was with practices of this sort that our Lord found fault (Matt. xv. 5; Mark vii. 11), as annulling the spirit of the law.

Theophrastus, quoted by Josephus, notices the system, miscalling it a Phœnician custom, but in naming the word corban identifies it with Judaism. Josephus calls the treasury in which offerings for the temple or its services were deposited, *kopBavas*, as in Matt. xxvii. 6. Origen's account of the corban-system is that children sometimes refused ansistance to parents on the ground that they had already contributed to the poor fund, from which they alleged their parents might be relieved (Joseph. B. J. ii. 9, § 4: Ap. i. 22; Mishna, [ed.] Surenhus., de Votis, i. 4, ii. 2; Cappellus, Grotius, Hammond, Lightfoot, Hor. Hebr. on Matt. xv. 6; Jahn, Arch. Bibl. v. § 392, 394). [ALM8; VOW8; OFFERINGS.] H. W. P.

COR'BE (XopBé; [Ald. KopBé:] Choraba), 1 Esdr. v. 12. This name apparently ans ZACCAI in the lists of Ezra and Nehemiah. This name apparently answers to

CORD (עַבֹת, הֵהֶר, הֵבֶל). סאס). סי the various purposes to which cord, including under that term rope and twisted thongs, was applied, the following are specially worthy of notice. (1.) For fastening a tent, in which sense "" is more particularly used (e. g. Ex. XXXV. 18, XXXIX. 40; In. liv. 2). As the tent supplied a favorite image of the human hody, the cords which held it in its place represented the principle of life (Job iv. 21, "Are not their tent-cords (A. V. "excellency") torn away?"; Eccl. xii. 6). (2.) For leading or binding animals, as a halter or rein (Ps. cxviii. 27; Hos. xi. 4), whence to "loosen the cord" (Job xxx 11) = to free from authority. (3.) For yoking them either to a cart (Is. v. 18) or a plough (Job axxix. 10). (4.) For binding prisoners, more particularly 727 (Judg. xv. 13; Ps. ii. 3, exxix. 4, Ez. iii. 25), whence the metaphorical expression "bands of love" (Hos. xi. 4). (5.) For bowstrings (Ps. xi. 2), made of catgut; such are spoken

withs;" but more properly reupal irpai, fresh or moist bow-strings). (6.) For the ropes or "tack-ings" of a vessel (Is. xxxiii. 23). (7.) For meas-הֵבֶל uring ground, the full expression being

(2 Sam. viii. 2; Ps. lxxviii. 55; Am. vii. 17; Zech. ii. 1): hence to "cast a cord "= to assign a property (Mic. ii. 5), and cord or line became an expression for an inheritance (Josh. xvii. 14, xix. 9; Ps. xvi. 6; Ez. xlvii. 13), and even for any defined district (e. g. the line, or tract, of Argob, Deut. iii. 4). [CHEBEL.] (8.) For fishing and suaring [FISHING; FOWLING; HUNTING]. (9.) For attaching articles of dress; as the wreathen chains

(NLY), which were rather twisted cords, worn by the high-priests (Ex. xxviii. 14, 22, 24, xxxix. 15, 17). (10.) For fastening awnings (Esth. i. 6). (11.) For attaching to a plummet. The line and plummet are emblematic of a regular rule (2 K. xxi. 13; Is. xxviii. 17); hence to destroy by line and plummet (Is. xxxiv. 11; Lam. ii. 8; Am. vii. 7) has been understood as = regular, systematic destruction (ad normam et libellum, Gesen. Thes. p. 125): it may however be referred to the carpenter's level, which can only be used on a flat surface (comp. Thenius, Comm. in 2 K. xxi. 13). (12.) For drawing water out of a well, or raising heavy weights (Josh. ii. 15; Jer. xxxviii. 6, 13). To place a rope on the head (1 K. xx. 31) in place of the ordinary head-dress was a sign of abject submission. The materials of which cord was made varied according to the strength required; the strongest rope was probably made of strips of camel hide, as still used by the Bedouins for drawing water (Burckhardt's Notes, i. 46); the Egyptians twisted these strips together into thongs for sandals and other purposes (Wilkinson, Anc. Egypt. iii. 145). The finer sorts were made of flax (is. xix. 9). The fibre of the date-palm was also used (Wilkinson, iii. 210); and probably reeds and rushes of various kinds, as implied in the origin of the word oxourlor (Plin. xix. 9), which is generally used by the LXX. as $= \Box$, and more particu

larly in the word 77028 (Job. xli. 2), which primarily means a reed; in the Talmud (Erubhin, fol. 58) bulrushes, osier, and flax are enumerated as the materials of which rope was made; in the Mishna

(Sotah, i. § 6) the הבל מצרי is explained as funis vimineus seu salignus. In the N. T. the term $\sigma_{\chi ourla}$ is applied to the whip which our Saviour made (John ii. 15), and to the ropes of a ship (Acts xxvii. 32). Alford understands it in the former passage of the rushes on which the cattle were littered; but the ordinary rendering cords seems more consistent with the use of the term W. L. B. elsewhere.

• CORDS OF SHEOL. SNARES OF DEATH, Amer. ed.]

CO'RE (Kopé, N. T. & K.: Core), Ecclus. xlv. 13; Jude 11. [KORAH, 1.]

CORIANDER (71: Kópiov: coriandrum). The plant called Coriandrum sativum is found in Egypt, Persia, and India (Plin. xx. 82), and has a round tall stalk; it bears umbelliferous white or reddish flowers, from which arise globular, grayish, spicy seed-corns, marked with fine strise. It is much cultivated in the south of Europe, as its seeds ony. The distinction between the two must be

thaginians called it yold = T2 (Dioscorid. iii. 64) The etymology is uncertain, though it is not impossible that the striated appearance of the seed ves

sels may have suggested a name derived from TT2 to cut (Gesen.). It is mentioned twice in the Bible (Ex. xvi. 31; Num. xi. 7). In both passages the manna is likened to coriander-seed as to form, and in the former passage as to color also. W. D.

CORINTH (Kopwoos: [Corinthus]). This city is alike remarkable for its distinctive geographical position, its eminence in Greek and Roman history, and its close connection with the early spread of Christianity.

Geographically its situation was so marked, that the name of its Isthmus has been given to every narrow neck of land between two seas. Thus it was "the bridge of the sea" (Pind. Nem. vi. 44) and "the gate of the Peloponnesus" (Xen. Ages. 2). No invading army could enter the Morea by land except by this way, and without forcing some of the defenses which have been raised from one sea to the other at various intervals between the great Persian war and the recent struggles of the Turks with the modern Greeks, or with the Venetians. But, besides this, the site of ('orinth is distinguished by another conspicuous physical feature --namely, the Acrocorinthus, a vast citadel of rock, which rises abruptly to the height of 2000 feet above the level of the sea, and the summit of which is so extensive that it once contained a whole town. The view from this eminence is one of the most celebrated in the world. Besides the mountains of the Morea, it embraces those on the northern shore of the Corinthian gulf, with the snowy heights of Parnassus conspicuous above the rest. To the east is the Saronic gulf, with its islands, and the hills round Athens, the Acropolis itself being distinctly visible at a distance of 45 miles. Immediately below the Acrocorinthus, to the north, was the city of Corinth, on a table-land descending in terraces to the low plain, which lies between Cenchreee, the harbor on the Saronic, and Lechseum, the harbor on the Corinthian gulf.

The situation of Corinth, and the possession of these eastern and western harbors, are the secrets of her history. The earliest passage in her progress to eminence was probably Phoenician. But at the most remote period of which we have any sure record we find the Greeks established here in a position of wealth (Hom. Il. ii. 570; Pind. Ol. xiii. 4), and military strength (Thucyd. i. 13). Some of the earliest efforts of Greek ship-building are connected with Corinth; and her colonies to the westward were among the first and most flourishing sent out from Greece. So too in the latest nassages of Greek history, in the struggles with Macedonia and Rome, Corinth held a conspicuous place. After the battle of Chæronea (B. c. 338) the Macedonian kings placed a garrison in the Acrocorinthus. After the battle of Cynoscephalse (B. C. 197) it was occupied by a Roman garrison Corinth, however, was constituted the head of the Achsean league. Here the Roman ambassadors were maltreated: and the consequence was the utter ruin and destruction of the city.

It is not the true Greek Corinth with which we have to do in the life of St. Paul, but the Corinth which was rebuilt and established as a Roman colure used by confectioners and druggists. The Car- carefully remembered. A period of a hundred

CORINTH

years intervened, during which the place was almost utterly desolate. The merchants of the Isthmus retired to Delos. The presidency of the Isthmian games was given to the people of Sicyon. Corinth seemed blotted from the map; till Julius Cæsar refounded the city, which thenceforth was called *Colonis Juliu Corinthus*. The new city was hardly less distinguished than the old, and it acquired a fresh importance as the metropolis of the Roman province of ACHAIA. We find GALLIO, brother of the philosopher Seneca, exercising the functions of proconsul here (Achaia was a senatorial province) during St. Paul's first residence at Corinth, in the reign of Claudius.

This residence continued for a year and six two epistles to the Corinthians, which were writta: months, and the circumstances, which occurred during the course of it, are related at some length (Acts xviii. 1-18). St. Paul had recently passed through Macedonia. He came to Corinth from 3 to have lasted three months. During this visit Alterns; shortly after his arrival Silas and Timo- (probably A. D. 58) the epistle to the Romans was

theus came from Macedonia and rejoined him: and about this time the two epistles to the Thessalonians were written (probably A. D. 52 or 53). It was at Corinth that the apostle first became acquainted with Aquila and Princilla; and shortly after his departure Apollos came to this city from Ephesus (Acts xviii. 27).

Corinth was a place of great mental activity, as well as of commercial and manufacturing enterprise. Its wealth was so celebrated as to be proverbial; so were the vice and profigacy of its inhabitants. The worship of Venus here was at tended with shameful licentiousness. All these points are indirectly illustrated by passages in the two epistles to the Corinthians, which were writts: (probably A. D. 57) the first from Epiesus, the second from Macedonia, shortly before the second visit to Corinth, which is briefly stated (A.ts xz. 3) to have lasted three months. During this visit (probably A. D. 58) the epistle to the Romans was

Corinth.

written. From the three epistles last mentioned, | being used as the watchwords of restless factiona. compared with Acts xxiv. 17, we gather that St. | Among the eminent Christians who lived at Cor-Paul was much occupied at this time with a collecin the were Stephanas (1 Cor. i. 16, xvi. 15, 17), Crispus (Acts xvii. 8; 1 Cor. i. 14), Caius (Rom.

There are good reasons for believing that when St. Paul was at Ephesus (A. D. 57) he wrote to the Corinthians an epistle which has not been preserved (see below, p. 495); and it is almost certain that about the same time a short visit was paid to Corinth, of which no account is given in the Acts.

It has been well observed that the great number of Latin names of persons mentioned in the epistle to the Romans is in harmony with what we know of the colonial origin of a large part of the population of Corinth. From Acts xviii. we may conclude that there were many Jewish converts in the Corinthian church, though it would appear (1 Cor. ui. 3) that the Gentiles predominated. On the scher hand it is evident from the whole tence of 5th epistles that the Judaizing element was very strong at Corinth. Party-spirit also was extr nely greatent, the ames of Paul, Peter, and Apollos

being used as the watchwords of restless factions. Among the eminent Christians who lived at Corinth were Stephanas (1 Cor. i. 16, xvi. 15, 17), Crispus (Acts xvii. 8; 1 Cor. i. 14), Caius (Rom. xvi. 23; 1 Cor. i. 14), and Erastus (Rom. xvi. 23; 2 Tim. iv. 20). The epistles of Clement to the Corinthians are among the most interesting of the post-apostolic writing.^a Corinth is still an episcopal see. The cathedral church of St. Nicolas, "a very mean place for such an ecclesiatical dignity," used in Turkish times to be in the Acrocorinthus. The city has now shrunk to a wretched village, on the old site, and bearing the old name, which, however, is often corrupted into Gortho.

Pausanias, in describing the antiquities of Corinth as they existed in his day, distinguishes clearly between those which belonged to the old Greek city, and those which were of Roman origin. Two

both epistles that the Judaizing element was very $| a \circ Of$ the two epistles to the Corinthians arrived trong at Corinth. Party-spirit also was extra nely to Germent of Rome, only the first is now regarded as grevalent, the names of Paul, Peter, and Apollos, grouns by respectable scholars Δ .

relics of Roman work are still to be seen, one a heap of brick-work which may have been part of the baths crected by Hadrian, the other the remains of an amphitheatre with subterranean arrangements for gladiators. Far more interesting are the ruins of the ancient Greek temple - the "old columns, which have looked down on the rise, the prosperity, and the desolation of two [in fact, three] successive Corinths." At the time of Wheler's visit in 1676 twelve columns were standing: before 1795 they were reduced to five; and further injury has very recently been inflicted by an earthquake. It is believed that this temple is the oldest of which any remains are left in Greece. The fountain of Peirene. "full of sweet and clear water." as it is described by Strabo, is still to be seen in the Acrocorinthus, as well as the fountains in the lower city, of which it was supposed by him and Pausanias to be the source. The walls on the Acrocorinthus were in part erected by the Venetians, who held Corinth for twenty five years in the 17th century. This city and its neighborhood have been described by many travellers, but we must especially refer to Leake's Morea, iii. 229-804 (London. 1830), and his Peloponnesiaca, p. 392 (London. 1846), Curtius, Peloponnesos, ii. 514 (Gotha, 1851-52); Clark, Peloponnesus, pp. 42-61 (London 1858). There are four German monographs on the subject, Wilckens, Rerum Corinthiacarum specimen ad illustrationem utriusque Epistola Paulina Bremen, 1747; Walch, Antiquitates Corinthiaca, Jens, 1761; Wagner, Rerum Corinthiacarum anerimen, Darmstadt, 1824; Barth, Corinthiorum (um mercii et Mercatura Historia Particula, Berlin, 1844. [The eminent archaeologist, Rangabes, has a sketch of Corinth, its earlier and later history and its antiquities, in his 'EAAnvird, ii. 287-314. – H.)

This article would be incomplete without some notice of the Posidonium, or sanctuary of Neptune the scene of the Isthmian games, from which St. Paul borrows some of his most striking imagery in 1 Cor. and other epistles. [See GAMES, Amer. ed.] This sanctuary was a short distance to the N. E. of Corinth, at the narrowest part of the Isthmus, near the harbor of Scheenus (now Kalamaki) on the Saronic gulf. The wall of the inclosure can still be traced. It is of an irregular shape, determined by the form of a natural platform at the edge of a ravine. The fortifications of the Isthmus followed this ravine and abutted at the east upon the inclosure of the sanctuary, which thus served a military as well as a religious purpose. The exact site of the temple is doubtful, and none of the objects of interest remain, which l'ausanias describes as seen by him within the inclosure: but to the south are the remains of the stadium where the foot-races were run (1 Cor. ix. 24); to the east are those of the theatre, which was probably the scene of the pugilistic contests (ib. 23); and abundant on the shore are the small green pine-trees (reugal) which gave the fading wreath (ib. 25) to the victors in the games. An inscription found here in 1676 (now removed to Verona) affords a valuable illustration of the interest taken in these games in Roman times (Bosekh, No. 1104). The French map of the Morea does not include the Isthmus; so that, till recently, Col. Leake's sketch (reproduced by Curtius) has neen the only trustworthy representation of the of litigation before heathen tribunals (ch. vi. 1-5).

gives us a more exact plan. In the unmedia neighborhood of this sanctuary are the traces of the canal, which was begun and discontinued by Nero about the time of St. Paul's first visit t Corinth. J.S.H.

Didrachm of Corinth (Attic talent). Obv., Head of Minerva, to right. Rev., Pegasus, to right; below,

CORINTHIANS, FIRST EPISTLE TO THE, was written by the Apostle St. Paul toward the close of his nearly three-year stay at Ephesus (Acts xix. 10, xx. 31; see the subscription in B and in Copt. Vers.), which we learn from 1 Cor. xvi. 8, probably terminated with the Pentecost of A. D. 57 or 58. Some supposed allusions to the assover in ch. v. 7, 8, have led recent critics (see Meyer in loc.), not without a show of probability, to fix upon Easter as the exact time of composition. The bearers were probably (according to the common subscription) Stephanas, Fortunatus, and Achaicus, who had been recently sent to the Apostle, and who, in the conclusion of this epistle (ch. xvi. 17), are especially commended to the honorable regard of the church of Corinth.

This varied and highly characteristic letter was addressed not to any party, but to the whole body of the large (Acts xviii. 8, 10) Judgeo-Gentile (Acts xviii. 4) church of Corinth, and appears to have been called forth, 1st, by the information the Apostle had received from members of the household of Chloe (ch. i. 11) of the divisions that were existing among them, which were of so grave a nature as to have already induced the Apostle to desire Timothy to visit Corinth (ch. iv. 17) after his journey to Macedonia (Acts xix. 22); 2dly, by the information he had received of a grievous case of incest (ch. v. 1), and of the defective state of the Corinthian converts, not only in regard of general habits (ch. vi. 1 ff.) and church discipline (ch. xi. 20 ff.), but, as it would also seem, of doctrine (ch. xv.); 3dly, by the inquiries that had been specially addressed to St. Paul by the church of Corinth on several matters relating to Christian practice.

The contents of this epistle are thus extremely varied, and in the present article almost preclude a more specific analysis than we here subjoin. The Apostle opens with his usual salutation and with an expression of thankfulness for their general state of Christian progress (ch. i. 1-9). He then at once passes on to the lamentable divisions there were among them, and incidentally justifies his own conduct and mode of preaching (ch. i. 10-iv. 16), concluding with a notice of the mission of Timothy, and of an intended authoritative visit on his own part (ch. iv. 17-21). The Apostle next deals with the case of incest that had taken place among them and had provoked no censure (ch. v. 1-8), noticing as he passes, some previous remarks he had made upon not keeping company with fornicators (ch. v 9-13). He then comments on their evil practice some of the Isthmian games. But the ground has and again reverts to the plague-spot in Corinthian been more minutely examined by Mr. Clark, who life, fornication and uncleanness (ch. vi. 9-30)

vers to their inquiries about marriage (ch. vii. 1-94), and about the celibacy of virgins and widows (ch. vii. 25-40). The Apostle next makes a transition to the subject of the lawfulness of eating things sacrificed to idols, and Christian freedom generally (ch. viii.), which leads, not unnaturally, to a digression on the manner in which he waived his apostolic privileges, and performed his apostolic duties (ch. ix.). He then reverts to and concludes the subject of the use of things offered to idols (ch. x -xi. 1), and passes onward to reprove his converts for their behavior in the assemblies of the church, both in respect to women prophesying and praying with uncovered heads (ch. xi. 2-16), and also their great irregularities in the celebration of the Lord's Supper (ch. xi. 17-34). Then follow full and minute instructions on the exercise of spiritual gifts (ch. xii.-xiv.), in which is included the noble panegyric of charity (ch. xiii.), and further a defense of the doctrine of the resurrection of the dead, about which doubts and difficulties appear to have arisen in this unhappily divided church (ch. xv.). The epistle closes with some directions concorning the contributions for the saints at Jerusa lem (ch. xvi. 1-4), brief notices of his own intended movements (ch. xvi. 5-9), commendation to them of Timothy and others (ch. xvi. 10-18), greetings from the churches (ch. xvi. 19, 20), and an autograph salutation and benediction (ch. xvi. 21-24).

With regard to the genuineness and authenticity of this epistle no doubt has ever been entertained. The external evidences (Clem. Rom. ad Cor. cc. 47, 49; Polycarp, ad Phil. c. 11; Ignat. ad Eph. c. 2; Irenseus, Hor. iii. 11, 9; iv. 27, 3; Athenag. de Resurr. [c. 18,] p. 61, ed. Col.; Clem. Alex. Padag. i. 83 [?c. 6, p. 42 f. or 117 f. ed. Potter]; Fertull. de Præscr. c. 33) are extremely distinct, and the character of the composition such, that if any critic should hereafter be bold enough to question the correctness of the ascription, he must be prepared to extend it to all the epistles that hear the name of the great Apostle. The baseless assumption of Bolten and Bertholdt that this epistle is a translation of an Aramaic original requires no confutation. See further testimonies in Lardner, Credibility, ii. 36 ff., 8vo, and Davidson, Introduction, ii. 253 ff.

Two special points deserve separate consideration : 1. The state of parties at Corinth at the time of the Apostle's writing. On this much has been written, and, it does not seem too much to say, more ingenuity displayed than sound and sober criticism. The few facts supplied to us by the Acts of the Apostles, and the notices in the epistle, appear to he as follows : - The Corinthian church was planted by the Apostle himself (1 Cor. iii. 6), in his second missionary journey, after his departure from Athens (Acts xviii. 1 ff.). He abode in the city a year and a half (ch. xviii. 11), at first in the house of Aquila and Priscilla (ch. xviii. 3), and afterwards, apparently to mark emphatically the factious nature of the conduct of the Jews, in the house of the proselyte Justus. A short time after the Apostle had left the city, the eloquent Jew of Alexandria, Apollos uter having received, when at Ephesus, more exact matruction in the Gospel from Aquila and Priscilla,

of these discussions.a 2. The number of epistles written by St. Paul to

the Corinthian church. This will probably remain a subject of controversy to the end of time. On the one side we have the à priori objection that an epistle of St. Paul should have ever leen lost to the church of Christ; on the other we have certain expressions which seem inexplicable on any other hypothesis. As it seems our duty here to express an opinion, we may briefly say that the well-known words, ξγραψα ύμιν έν τῆ ἐπιστολῆ, μὴ συναια-μίγνυσθαι πόρνοις (ch. v. 9), do certainly seem to point to some former spistolary communication to the church of Corinth - not from linguistic, but

hardly worth while to refer more fully to the copious literature on this very uncertain subject. For a brief review of the various hypotheses, see Holtsmann is ۸.

The last subject naturally paves the way for his an- | went to Corinth (Acts xix. 1), where he preached, as we may perhaps infer from St. Paul's commente on his own mode of preaching, in a manner market by unusual eloquence and persuasiveness (comp. ch. ii. 1, 4). There is, however, no reason for concluding that the substance of the teaching was in any respect different from that of St. Paul; for see ch. i. 18, xvi. 12. This circumstance of the visit of Apollos, owing to the sensuous and carnal spirit which marked the church of Corinth, appears to have formed the commencement of a gradual division into two parties, the followers of St. l'aul, and the followers of Apollos (comp. ch. iv. 6). These divisions, however, were to be multiplied; for, as it would seem, shortly after the departure of Apollos Judaizing teachers, supplied probably with letters of commendation (2 Cor. iii. 1) from the church of Jerusalem, appear to have come to Corinth and to have preached the Gospel in a spirit of direct antagonism to St. Paul personally, in every way seeking to depress his claims to be considered an Apostle (1 Cor. xi. 2), and to exalt those of the Twelve, and perhaps especially of St. l'eter (ch. i. 12). To this third party, which appears to have been characterized by a spirit of excessive bitterness and faction, we may perhaps add a fourth, that, under the name of "the followers of Christ" (ch. i. 12), sought at first to separate themselves from the factious adherence to particular teachers, but eventually were driven by antagonism into positions equally sectarian and inimical to the unity of the church. At this momentous period, before parties had become consolidated, and had distinctly withdrawn from communion with one another, the Apostle writes; and in the outset of the epistle (ch. i.-iv. 21) we have his noble and impassioned protest against this fourfold rending of the robe of Christ. This spirit of division appears, by the good providence of Gul, to have eventually yielded to his Apostle's rebuke, as it is noticeable that Clement of Rome in his epistle to this church (ch. 47), alludes to these evils as long past, and as but slight compared to those which existed in his own time. For further information, beside that contained in the writings of Neander, Davidson, Conybeare and Howson, and others, the student may be referred to the special treatises of Schenkel, de Eccl. Cor. (Basel, 1838), Kniewel, Eccl. Cor. Dissensiones (Gedan. 1841), Becker, Partheiungen in die Gemeinde s. Kor. (Altona, 1841), Räbiger, Krit. Untersuch. (Breal. 1847); but he cannot be too emphatically warned against that tendency to construct a definite history out of the fewest possible facts, that marks most

a . See also Hilgenfeld, Die Christus-Leute in Korstà, in nis Zeitschr. f. wiss. Theol. 1865, vill. 241-268, and Bayeshlag, Ueber die Christuspartei zu Korinth, revies of the various hypotheses, ese a the Theol. Stud. u. Krit. 1865, pp. 217-276. It is Bunsen's Provinces, vill. 484 ff. (1966).

seem impossible either to refer the definite $\mu\eta$ $\sigma u \nu a \nu a \mu i \gamma r$, κ , τ , λ , to what has preceded in ver. 2 or ver. 6, or to conceive that the words refer to the command which the Apostle is now giving for the first time. The whole context seems in favor of a former command given to the Corinthians, but interpreted by them so literally as here to require further explanation. It is not right to suppress the fact that the Greek commentators are of the contrary opinion, nor must we overlook the objection that no notice has been taken of the lost epistle by any writers of antiquity. Against this last objection it may perhaps be urged that the letter might have been so short, and so distinctly occupied with specific directions to this particular church, as never to have gained circulation beyond it. Our present epistles, it should be remembered, are not addressed exclusively to the Christians at Corinth (see 1 Cor. i. 2; 2 Cor. i. 1). A special treatise on this subject (in opposition, however, to the view here taken), and the number of St. Paul's journeys to Corinth, has been written by Müller, De Tribus Pauli Itin., fc. (Basil, 1831).ª

The apocryphal letter of the church of Corinth to St. Paul, and St. Paul's answer, existing in Armenian, are worthless productions that deserve no consideration, but may be alluded to only as perhaps affording some slight evidence of an early belief that the Apostle had written to his converts more than twice. The original Armenian, with a . translation, will be found in Aucher, Arm. Grammar, p. 143-161.

The editions of [commentaries on] these epistles have been somewhat numerous. Among the best are those of Billroth (Leipz. 1833 [trans. in Edin. Cab. Libr.]), Rückert (Leipz. 1836-37), Olshausen (Königsb. 1840), De Wette (Leipz. 1845 [3d Aufl. by Messner, 1855]), Osiander (Stuttg. 1847 [2d Ep. 1858]), Meyer (1845 [4th Aufl. 1861, 2d Ep 1862]), and in our own country, Peile (Lond. 1848), Alford (Lond. 1856 [4th ed. 1865]), and Stanley (Lond. 1858 [3d ed. 1865]). C. J. E.

The following works should be added: Adalb Maier (Cath.), Comm. üb. den ersten Brief Pauli an die Korinther, 1857; Comm. üb. d. zweiten Brief, 1865; Ewald, Die Sendschreiben des Ap. Paulus, 1857; Neander, Auslegung der beiden Briefe an die Corinther (a posthumous work edited by Beyschlag), 1859; Chr. Fr. Kling, Die Korintherbriefe, in Lange's Bibelicerk, 1861; Charles Hodge, Exposition of the First Epistle to he Corinthians, New York, 1857, 12mo, and Exposition of the Second Epistle, ditto; Chr. Wordsworth, in his Greek Testament, with Introduction and Notes, 4th ed., 1866; W. F. Besser, St. Pauli erster Brief on die Corinther (1862), and Zweiter Brief (1863), in Bibelstunden für die Gemeinde usgelegt, regarded in Germany as one of the best specimens of a happy union of accurate exegesis and practical exposition; and J. C. K. von Hofmann, Erster Brief an die Korinther (1864), Zweiter Brief (1866), in his Die heilige Schrift Neuen Testaments zusammenhängend untersucht, with special reference to the development of the doctrinal ideas. The article by Holtzmann (in Herzog's Real-Encykl. xix. 730-41) on the relation of the

a * Bleek also maintains the view that Paul wrote an epistle to the Corinthians, which has been lost, between his 1st and 2d epistles now extant. He states his reasons at length for so thinking in his Einl. in having previously declared himself against it

from simple exceptical considerations: for it does | two Corinthian epistles to each other and on the course of thought pursued in them is very good On the internal condition of the church at Corinth. when Paul wrote his epistles to the Corinthians see Lechler's Das apost. u. das nachapost. Zeitalter p. 385 ff. H.

> CORINTHIANS, SECOND EPISTLE TO THE, was written a few months subsequently to the first, in the same year, - and thus, if the dates assigned to the former epistle be correct, about the autumn of A. D. 57 or 58, a short time previous to the Apostle's three months' stay in Achaia (Actxx. 3). The place whence it was written was clearly not Ephesus (see ch. i. 8), but Macedoni: (ch. vii. 5, viii. 1, ix. 2), whither the Apostle wont by way of Troas (ch. ii. 12), after waiting a short time in the latter place for the return of Titus (ch. ii. 13). The Vatican MS., the bulk of later MSS., and the old Syr. version, assign Philippi as the exact place whence it was written; but for this assertion we have no certain grounds to rely on: that the bearers, however, were Titus and his associates (Luke?) is apparently substantiated by ch viii. 23, ix. 3, 5.

> The epistle was occasioned by the information which the Apostle had received from Titus, and also, as it would certainly seem probable, from Timothy, of the reception of the first epistle. It has indeed recently been doubted by Neander, De Wette, and others, whether Timothy, who had been definitely sent to Corinth (1 Cor. iv. 17) by way of Macedonia (Acts xix. 22), really reached his destination (comp. 1 Cor. xvi. 10); and it has been urged that the mission of Timothy would hardly have been left minoticed in 2 Cor. xii. 17, 18 (see Rückert, Comm. p. 409). To this, however, it has been replied, apparently convincingly, that as Timothy is an associate in writing the epistle, any notice of his own mission in the third person would have seemed inappropriate. His visit was assumed as a fact, and as one that naturally made him an associate with the Apostle in writing to the church he had so lately visited.

> It is more difficult to assign the precise reason for the mission of Titus. That he brought back tidings of the reception which St. Paul's first epistle had met with seems perfectly clear (ch. vii. 6 ff.), but whether he was specially sent to ascertain this, or whether to convey fresh directions, cannot be ascertained. There is a show of plausibility in the supposition of Bleek (Stud. u. Kiit. for 1830, p. 625), followed more recently by Neunder (Pflanz. u. Leit. p. 437), that the Apostle had made Titus the hearer of a letter couched in terms of decided severity, now lost, to which he is to be supposed to refer in ch. ii. 3 (compared with ver. 4. 9), vii. 6, 11 ff.; but, as has been justly urged (see Meyer, Einleit. p. 3), there is quite enough of severity in the first epistle (consider ch. iv. 16-21, v. 2 ff., vi. 5-8, xi. 17) to call forth the Apostle's affectionate anxiety. If it be desirable to hazard a conjecture on tris mission of Titus, it would seem most natural to suppose that the return of Timothy and the intelligence he conveyed might have been such as to make the Apostle feel the necessity of at once despatching to the contentious church one of his immediate followers, with instructions to support

das N. Test. p. 402 ff. Neander also adopts the same opinion in the 4th ed. of his Gesch. der Pflanzung (1847) and in his Ausleg. der Ber an die Cor. (p. 345), afte H

and strengthen the effect of the epistle, and to bring however, only mentions one visit prior to that the back the most recent tidings of the spirit that was (Acts xviii. 1 ff.); for the visit recorded in Act prevailing at Corinth.

These tidings, as it would seem from our present epistle, were mainly favorable: the better part of the church were returning back to their spiritual allegiance to their founder (ch. i. 13, 14, vii. 9, 15, 16), but there was still a faction, possibly of the Judaizing members (comp. ch. xi. 22), that were sharpened into even a more keen animosity against the Apostle personally (ch. x. 1, 10), and more strenuously denied his claim to Apostleship.

The contents of this epistle are thus very varied. but may perhaps be roughly divided into three parts : - 1st, the Apostle's account of the character of his spiritual labors, accompanied with notices of his affectionate feelings towards his converts (ch. i .-. vii.); 2dly, directions about the collections (ch. viii., ix.); 3dly, defense of his own apostolical character (ch. x.-xiii. 10). A close analysis is scarcely compatible with the limits of the present article, as in no one of the Apostle's epistles are the changes more rapid and frequent. Now he thanks God for their general state (ch. i. 3 ff.); now be glances to his purposed visit (ch. i. 15 ff.); now he alludes to the special directions in the first letter (ch. ii. 3 ff.); again he returns to his own plans (ch. ii. 12 ff.), pleads his own apostolic dignity (ch. iii. 1 ff.), dwells long upon the spirit and nature of his own labors (ch. iv. 1 ff.), his own hopes (ch. v. 1 ff.), and his own sufferings (ch. vi. 1 ff.), returning again to more specific declarations of his love towards his children in the faith (ch. vi. 11 ff.), and a yet further declaration of his views and feelings with regard to them (ch. vii.). Then again, in the matter of the alms, he stirs up their liberality by alluding to the conduct of the churches of Macedonia (ch. viii. 1 ff.), their spiritual progress (ver. 7), the example of Christ (ver. 9), and passe on to speak more fully of the present mission of Titus and his associates (ver. 18 ff.), and to reiterate his exhortations to liberality (ch. ix. 1 ff.). In the third portion he passes into language of severity and reproof; he gravely warns those who presume to hold lightly his apostolical authority (ch. x. 1 ff.); he puts strongly forward his apostolical dignity (ch. xi. 5 ff.); he illustrates his forbearance (ver. 8 ff.); he makes honest boast of his labors (ver. 23 ff.); he declares the revelations vouchsafed to him (ch. xii, 1 ff.); he again returns to the nature of his dealings with his converts (ver. 12 ff.), and concludes with grave and reiterated warning (ch. xiii. 1 ff.), brief greetings, and a doxology (ver. 11-14).

The genuineness and authenticity is supported by the most decided external testimony (Ireneus, Her. iii. 7, 1, iv. 28, 3; Athenagoras, de Resurr. [c. 18,] p. 61, ed. Col.; (Iem. Alex. Strom. iii. 94, iv. 101; [iii. c 11, iv. c. 16, pp. 544, 608, ed. Potter;] Tertull. de Pudicit. c. 13), and by internal evidence of such a kind that what has been said on this point in respect of the first epistle is here even still more applicable. The ouly doubts that modern pseud c-criticism has been able to bring forward relate to the unity of the epistle, but are not such as seem to deserve serious consideration (see Meyer, Vinleit. p. 7).

The principal historical difficulty connected with the epistle relates to the number of visits made by the Apostle to the church of Corinth. The words of this epistle (ch. xii. 14, xiii. 1, 2) seem distinctly to imply that St. Paul had visited Corinth torice before the time at which he now writes St. Luke, whose habit of rising high into the air, and par-

497

(Acts xviii. 1 ff.); for the visit recorded in Acts xx. 2, 3, is confessedly subsequent. If with Grotius and others we assume that in ch. xii. 14 TolTON belongs to evolutes Exes, and not to experie mpds jugs, we still have in ch. xiii. 1, the definite words τρίτον τοῦτο ἔρχομαι, which seem totally to preclude any other meaning than this - that the Apostle had visited them twice before, and was now on the eve of going a third time. The ordinary subterfuge that Ipxouau is here equivalent to έτοίμως έχω έλθειν (so actually A, the Arabic [Erp.], and the Coptic versions) is grammatically indefensible, and would never have been thought of if the narrative of the Acts had not seemed to require it. We must assume then that the Apostle made a visit to Corinth which St. Luke was not moved to record, and which, from its probably short duration, might easily have been omitted in a narrative that is more a general history of the church in the lives of its chief teachers, than a chronicle of annalistic detail. So Chrysostom and his followers, Œcumenius and Theophylact, and in recent times, Müiler (De Tribus Pauli Itin. Basil. 1831). Anger (Rat. Temp. p. 70 ff.), Wieseler (Chronol. p. 239), and the majority of modern critics. It has formed a further subject of question whether, on this supposition, the visit to Corinth is to be re garded only as the return there from a somewhat lengthened excursion during the 18 months' stay at that city (Anger), or whether it is to be referred to the period of the 3 years' residence at Enhesus. The latter has most supporters, and seems certainly most natural; see Wieseler, Chronol. 1. c., and Meyer Einleit. p. 6.

The commentaries on this epistle are somewhat numerous, and the same as those mentioned in the article on the former epistle. [See the addition on that epistle.] No portion of the Apostle's writings deserves more careful study, as placing before us the striking power of ('hristian rhetoric, which dis tinguished its great and inspired author.

C. J. E.

• CORINTHUS. This Latin form occurs (for CORINTH) in the A. V. in the subscription to the Epistle to the Romans. A.

CORMORANT. The representative in the A. V. of the Hebrew words kdath (기학) and

shalac (] tri). As to the former, see PELICAN.

Shålåc (karapdarns: mergulus; nycticoraz?) occurs only as the name of an unclean bird in Lev xi. 17; Deut. xiv. 17. The word has been variously rendered (see Bochart, Hieroz. iii. 24), but some sea bird is generally understood to be denoted by it. There is some difficulty in identifying the raraparty of the LXX.; nor can we be quite satisfied with Oedmann (Verm. Samml. iii. c. vii p. 68), Michaelis, Rosenmüller, and others, that the Solan goose, or gannet (Sula alba), is the bird mentioned by Aristotle (Hist. An. ii. 12, § 15; ix. 18, § 1) and the author of the Ixentics (Oppian, ii. 2). Col. H. Smith (Kitto's Cyc. art. Salach) has noticed that this bird (karappdkrys) is described as being of the size of a hawk or one of the smaller gulls (as of the Adows endorsones), whereas the gannet is as large as a goose. The account given in the *Izeutics* (*l. c.*) of this bird is the fullest we possess; and certainly the description, with the exception above noted, is well suited to the gannet,

tially closing its wings, and then falling straight as | Chr. xxxii. 28 as built by Hezekiah, were, perhaps an arrow on its prey, emerging again in a few sec-onds, is graphically described in the passage alluded to. It is probable that the ancients sometimes confused this bird with some species of tern; hence the difficulty as to size. (cl. H. Smith suggests the Caspian tern (Sterner Caspia) as the representative of the *karappakrys*; which opinion is however inadmissible, for the terns are known never to dive, whereas the diving habits of the Karappakrys are expressly mentioned (καταδύεται μέχρις δργυιας ή scal #Xéor). Modern arnithologists apply the term cataractes to the different species of skuas (lestris), birds of northern regions, to which the description of the karadoákrns is wholly inapplicable. But though the gannet may be the karadoakrns of Aristotle and the /xcutics, it is doubtful whether this bird is found in the Bible-lands, although it has a wide range, being seen northward in Newfoundland and in the Hebrides, and southward at the Cape of Good Hope. The etymology of the Hebrew word points to some plunging bird: the common cormorant (Phalacrocorax carbo), which some writers have identified with the shalac, is unknown in the eastern Mediterranean; another species is found S. of the Red Sea, but none on the W. coast of Palestine. W. H.

CORN (נְזָבָן"). The most common kinds were wheat, הפוח; barley, אערה; spelt (A. V., Ez. ix. 32, and is. xxviii. 25, "rie;" Ez. iv. 9, "fitch-רא (פָסָר (or in plur. form בּיָּסָאָת (י' and millet, 777: oats are mentioned only by rabbinical writers. The doubtful word T, 20, rendered "principal," as an epithet of wheat, in the A. V. of Is. xxviii. 25, is probably not distinctive of any species of grain (see Gesen. sub voc.). Corn crops are still reckoned at twentyfold what was sown, and were anciently much more. "Seven cars on one stalk" (Gen. xli. 22) is no unusual phenomenon in Egypt at this day. The many-eared stalk is also common in the wheat of Palestine, and it is of course of the bearded kind. The "heap of wheat set about with lilies " (which probably grew in the field together with it) may allude to a custom of so decorating the sheaves (Cant. vii. 2). Wheat (see 2 Sam. iv. 6) was stored in the house for domestic purposes - the "midst of the house" meaning the part more retired than the common chamber where the guests were accommodated. It is at present often kept in a dry well, and perhaps the "ground corn " of 2 Sam. xvii. 19 was meant to imply that the well was so used. From Solomon's time (2 Chr. ii. 10, 15), i. e. as agriculture became developed under a settled government, Palestine was a corn-exporting country, and her grains were largely taken by her commercial neighbor Tyre (Ez. xxvii. 17; comp. Amos viii. 5). " Plenty of corn " was part of Jacob's blessing (Gen. xxvii. 28; comp. Ps. lxv. 13). The "store-houses" mentioned 2

a This seems the general word for corn as it grows. An ear is הַכָּרה; standing corn is הַכָּרה; the word for grain in its final state as fit for food is T? apparently from the same word, "D, pure ; comp.

CORNELIUS

the consequence of the havoc made by the Assyr ian armies (comp. 2 K. xix. 29); without such protection the country in its exhausted state would have been at the mercy of the desert marauders.

Grain crops were liable to יְרֵקוֹן, "mildew,"

and] DJU, "blasting" (see 1 K. viii. 37), as well as of course to fire by accident or malice (Fx. xxii. 6; Judg. xv. 5); see further under AGRICUL-TURE. Some good general remarks will be found in Saalschutz, Archäol. der Hebr. H. II.

CORNELIUS (Koprhalos), a Roman cruturion of the Italian cohort stationed in Casares (Acts x. 1, &c.), a man full of good works and alma deeds, who was admonished in a vision by an angel to send for St. Peter from Joppa, to tell him words whereby he and his house should be saved. Meantime the Apostle had himself been prepared by a symbolical vision for the admission of the Gentiles into the Church of Christ. On his arriving at the house of Cornelius, and while he was explaining to them the vision which he had seen in reference to this mission, the Holy Ghost fell on the Gentilés present, and thus anticipated the reply to the question, which might still have proved a difficult one for the Apostle, whether they were to be baptized as Gentiles into the Christian Church. They were so baptized, and thus Cornelius became the firstfruit of the Gentile world to Christ. Tradition has been busy with his life and acts. According to Jerome (Adv. Jovin. i. 301), he built a Christian Church at Cæsarea; but later tradition makes him Bishop of Scamandios (-ria?), and ascribes to him the working of a great miracle (Menolog. Gree. i 129). H. A.

* We need not infer from Acts xv. 7 that Cornelius was actually the first Gentile convert who believed the Gospel and was brought into the church; for at the time of his conversion and baptism, Paul, the Apostle of the Gentiles, had been laboring several years, preaching, in all probability, to some extent, in Arabia, and certainly in Syria and Cilicia. It is sufficient to understand that it was so ordered of God, that Cornelius, when he embraced the Gospel, should be received into the church under such circumstances as to settle authoritatively the question of circumcision in opposition to the Jewish claim that the rite was to be imposed on all Gentile converts. The position of Cornelius in this respect was one of great interest. and the fullness of the account of his reception into the church shows the importance which the first Christians attached to it. The precise relation of Cornelius to Judaism before he adopted the Christian faith is not perfectly clear. He had certainly embraced the pure theism of the O. T. (evoeBha καl φοβούμενος τον Θεόν), but was uncircunscised and may not openly have professed the Jewish telief. Nounder thinks that he belonged at least to the class of proselytes of the gate. It appears that the Jews regarded him as belonging at this time,

ייָזְבֶר (from ייָזְבָר, to break) means " grist." "Parched corn." useful for provisions, as not need ing cookery, is יָזְלָי, and אָזָלָי; comp. the Arab , to fry. " Pounded wheat," , T' Ban

r. 28; xi. 1 ff.; xv. 7). Neander unfolds the instructive history in a very interesting manner (Pflanzung, u. s. w. i. 118-131, 4e Aufl.; Robinson's revised trans., pp. 69-77). H.

CORNER. The TND, or "corner," i. c. of the field, was not allowed (Lev. xix. 9) to be wholly reaped. It formed a right of the poor to carry off what was so left, and this was a part of the maintenance from the soil to which that class were entitled. Similarly the gleaning of fields and fruit trees [GLEANING], and the taking a sheaf accidentally left on the ground, were secured to the poor and the stranger by law (xxiii. 22; Deut. xxiv. 19-21). These seem to us, amidst the sharply defined legal rights of which alone civilization is cognizant, loose and inadequate provisions for the relief of the poor. But custom and common law had probably insured their observance (Job xxiv. 10) previously to the Mosaic enactment, and continued for a long but indefinite time to give practical force to the statute. Nor were the "poor," to whom appertained the right, the vague class of sufferers whom we understand by the term. On the principles of the Mosaic polity every Hebrew family had a hold on a certain fixed estate, and could by no ordinary and casual calamity be wholly beggared. Hence its indigent members had the claims of kindred on the "corners," &c., of the field which their landed brethren reaped. Similarly the "stranger" was a recognized dependent; "within thy gates" being his expressive description, as sharing, though not by any tie of blood, the domestic claim. There was thus a further se curity for the maintenance of the right in its definite and ascertainable character. Neither do we in the earlier period of the Hebrew polity, closely detailed as its social features are, discover any general traces of agrarian distress and the unsafe condition of the country which results from it - such for instance, as is proved by the banditti of the Herodian period. David, a popular leader (1 Sam. xviii. 80, xxi. 11), could only muster from four to six hundred men out of all Judah, though "every one that was in distress, in debt, and every one that was discontented" came unto him (1 Sam. xxii. 2, xxv. 13). Further, the position of the Levites, who had themselves a similar claim on the produce of the land, but no possession in its soil would secure their influence as expounders, teachers, and in part administrators of the law, in favor of such a claim. In the later period of the prophets their constant complaints concerning the defrauding the poor a (Is. x. 2; Amos v. 11, viii. 6) seem to show that such laws had lost their practical force. Still later, under the Scribes, minute legislation fixed one-sixtieth as the portion of a field which was to be left for the legal "corner:" but provided also (which seems hardly consistent) that two fields should not be so joined as to leave ne corner only where two should fairly he reck-.nei. The proportion being thus fixed, all the grain might be reaped, and enough to satisfy the regulation subsequently separated from the whole erop. This "corner" was, like the gleaning, tithe-iree. Certain fruit-trees, e. g. nuts, pomegranates, vines, and olives, were deemed liable to the 'aw of the corner. Maimonides indeed lays down the

legally and socially, to a heathen community (Acts | principle (Constitutiones de donis pouperun, cap ii. 1) that whatever crop or growth is fit for food, is kept, and gathered all at once, and carried into store, is liable to that law. A Gentile holding land in Palestine was not deemed liable to the obliga tion. As regards Jews an evasion seems to have been sanctioned as follows: - Whatever field was consecrated to the Temple and its services, was held exempt from the claim of the poor; an ownes might thus consecrate it while the crop was on it, and then redeem it, when in the sheaf, to his own use. Thus the poor would lose the right to the " corner." This reminds us of the "Corban" (Mark vii. 11). For further information, see un. der AGLICULTURE.

The treatise Peak, in the Mishna, may likewise be consulted, especially chap. i. 2, 3, 4, 5, 6; ii.; iv. 7, also the above-quoted treatise of Maimonides.

CORNER-STONE (T) 128: Allos y vinios, or accorportaios: lupis ungularis; also ראש פנה, Ps. crviii. 22: הנקמאא yourlas: 00put anguli), a quoin or corner-stone, of great importance in binding together the aides of a building. Some of the corner-stones in the ancient work of the temple foundations are 17 or 19 feet long, and 71 feet thick (Robinson, i. 286). Corner-stones are usually laid sideways and endways alternately, so that the end of one appears above or below the side-face of the next. At Nineveh the corners are sometimes formed of one angular stone (Layard, Nin. ii. 254). The expression in Ps. cxviii. 22 is by some understood to mean the coping or ridge, "coign of vantage," of a building, but as in any part a corner-stone must of necessity be of great importance, the phrase "corner-stone" is sometimes used to denote any principal person, as the princes of Egypt (Is. xix. 13), and is thus applied to our Lord, who, having been once rejected, was afterwards set in the place of the highest honor (Is. xxviii. 16; Matt. xxi. 42; 1 Pet ii. 6, 7; Grotius on Ps. cxviii. and Eph. ii. 20; Harmer, Obs. ii. 356). H. W. P.

CORNET (Shiphar, כשובר: שלא ישוב: buccina), a loud sounding instrument, made of the horn of a ram or of a chamois (sometimes of au ox), and used by the ancient Hebrews for signals, for announcing the יוֹבֵל, "Jubile " (Lev. xxv. 9), for proclaiming the new year (Mishma, Rosh Hashshanah, iii. and iv.), for the purposes of war (Jer. iv. 5, 19, comp. Job xxxix. 25), as well as for the sentinels placed at the watch-towers to give notice of the approach of an enemy (Ez. xxxiii. 4, 5,. שולפר is generally rendered in the A. V. "trumpet," but " cornet " (the more correct translation) is used in 2 Chr. xv. 14; Ps. xcviii. 6; Hos. v. 8; and 1 Chr. xv. 28. It seems probable that in the two last instances the authors of the A. V. would also have preferred "trumpet," but for the difficulty of finding different English names in the same passage for two things so nearly resembling each other in meaning as TOTE, buccina, and Chatzotzerah. תצריבה, tuba. "Cornet" is also employed ir

a The two latter passages, speaking of "taking bur-log, seem hoss of wheat from the poor," and of "selling the vest laws.

te 'te (מפל) of the wheat," f. e. perhaps, the glean ing, seem to point to some special evasion of the has

Dan. iii. 5. 7. 10, 15, for the Chaldee noun 7.72, Keren (literally a horn).

Oriental scholars for the most part consider shophar and keren to be one and the same musical Instrument; but some Biblical critics regard shophar and chatzótzerah as belonging to the species of keren, the general term for a horn. (Joel Brill, in preface to Mendelssohn's version of the Psalms.) Jahn distinguishes keren, "the horn or crooked trumpet," from chatzótzeráh, the straight trumpet, "an instrument a cubit in length, hollow throughout, and at the larger extremity so shaped as to resemble the mouth of a short bill " (Archaeolog. xcv. 4, 5); but the generally received opinion is, that keren is the crooked horn, and shophar the long and straight one.

The silver trumpets (אָסֶאָ דוֹצרוֹת פָסָא), which Moses was charged to furnish for the laraelites, were to be used for the following purposes: for the calling together of the assembly, for the journeying of the camps, for sounding the slarm of war, and for celebrating the sacrifices on festivals and new moons (Num. x. 1-10). The divine command through Moses was restricted to two trumpets only; and these were to be sounded by the sons of Aaron, the anointed priests of the sanctuary, and not by laymen. It should seem, however, that at a later period an impression prevailed, that "whilst the trumpets were suffered to be sounded only by the priests within the sanctuary, they might be used by others, not of the priesthood, without the mcred edifice." (Conrad Iken's Antiquitates Hebraica, pars i. sec. vii. "Sacerdotum cum instrumentis ipsorum.") In the age of Solomon the "silver trumpets" were increased in number to 120 (2 Chr. v. 12); and, independently of the objects for which they had been first introduced, they were now employed in the crchestra of the temple as an accompaniment to songs of thanksgiving and praise.

Yobel, יובל, used sometimes for the "year of Jubilee " (יאָרָה הַיּוֹבָה, comp. Lev. xxv. 13, 15, with xxv. 38, 40), generally denotes the institution of Jubilee, but in some instances it is spoken of as a musical instrument, resembling in its object, if not in its shape, the keren and the shophar. Gesenius pronounces yobel to be "an onomatopoetic word, signifying jubilum or a joyful sound, and hence applied to the sound of a trumpet signal, ike הרדעה" ("alarm," Num. x. 5): and Dr. Munk is of opinion that "le mot YOBEL n'est qu'une épithète " (Palestine, p. 456 a, note). Still it is difficult to divest yobel of the meaning of a sounding instrument in the following instances: "When the trumpet (היובל) soundeth long, they shall come up to the mount " (Ex. xix. 13); "And it shall come to pass that when they make a long blast with the ram's horn " (דְּהֶרָן דַיּּיֹבֵל, Josh. vi. 5); "And let seven priests bear seven trumpets של rams' horns " (שיפרות י בלים, Josh. vi. 51

The sounding of the cornet (הקיער שופר) was the distinguishing ritual feature of the festival appointed by Moses to be held or the first day of the seventh month under the denomination of "a iay of blowing trumpets " (הרגעה), Num. 84-40). The word " solemn assembly " (געירה)

xxix. 1), or "a memorial of blowing of trumpets"

(דרון הרהעדה, Lev. xxiii. 24); and that rite is still observed by the Jews in their celebration of the same festival, which they now call "the day of memorial " (יום הַלְפַרוֹן), and also "New Year"

ראש השבה). "Some commentators," says Rosenmüller, "have made this festival refer to the preservation of Isaae (Gen. xxii.), whence it is sometimes called by the Jews, "the Binding of

Isaac " (עקדת יצחק). But it is more probable that the name of the festival is derived from the usual kind of trumpets (rams' horns) then in use, and that the object of the festival was the celebration of the new year and the exhortation to thanksgivings for the blessings experienced in the year just finished. The use of cornets by the priests in all the cities of the land, not in Jerusalem only (where two silver trumpets were added, whilst the Levites chanted the 81st Psalm), was a suitable means for that object " (kosenmüller, Das alle und neue Morgenland, vol. ii., No. 337, on Lev. xxiii. 24).

Although the festival of the first day of the seventh month is denominated by the Mishna " New Year," and notwithstanding that it was observed as such by the Hebrews in the age of the second temple, there is no reason whatever to believe that it had such a name or character in the times of Moses. The Pentateuch fixes the vernal equinox (the period of the institution of the Passover), as the commencement of the Jewish year; but for more than twenty centuries the Jews have dated their new year from the autumnal equinox, which takes place about the season when the festival of "the day of sounding the cornet" is held. Ratbinical tradition represents this festival as the anniversary of the creation of the world, but the statement receives no support whatever from Scripture. On the contrary, Moses expressly declares that the month ABIB (the Moon of the Spring) is to be regarded by the Hebrews as the first month of the year : - " This month shall be unto you the begin-

ning $(U \aleph^{-})$ of months; it shall be the first

N^{·)} month of the year to you" (Ex. xii. 2). (Munk, Palestine, p. 184 b.)

The intention of the appointment of the festival "of the Sounding of the Cornet," as well as the duties of the sacred institution, appear to be sa forth in the words of the prophet, "Sound the cornet () in Zion, sanctify the fast, proclaim the solemn assembly " (Joel ii. 15). Agreeably to the order in which this passage runs, the institution of "the Festival of Sounding the Cornet," seems to be the prelude and preparation for the awful Day of Atonement. The Divine command for that fast is connected with that for "the Day of Sound-

ing the Cornet" by the conjunctive particle TIN. "Likewise on the tenth day of this seventh month is the Day of Atonement" (Lev. xxiii. 27). Have

The (likewise) unites the festival "of the Day of Sounding the Cornet" with the solemnity of the Day of Atonement precisely as the same particle connects the "Festival of Tabernacles" with the observance of the ceremonial of "the fruit of the Hador tree, the palm branches," &c.

"stival "Eighth day of Solemn Assembly " (דעצורי עצור) (Lev. xxiii. 36), the closing rite of the festive cycle of Tishri (see Religious Discourses of Rev. Professor Marks, vol. i. pp. 291, 292).

Besides the use of the cornet on the festival of "blowing the trumpets," it is also sounded in the synagogue at the close of the service for the day of stonement, and, amongst the Jews who adopt the ritual of the Sephardim, on the seventh day of the feast of Tabernacles, known by the post-biblical de-

nomination of "the Great Hosannah " (הרשעכה)

 $\square \square \square$). The sounds emitted from the cornet in modern times are exceedingly harsh, although they produce a solemn effect. Gesenius derives the name ngi from שלפר Arab. שלפר, "to be bright,

clear " (compare שְׁכָרָה, Ps. xvi. 6).

COS (Kŵs, now Stanchio or Stanko: [Cous]).ª This small island has several interesting points of connection with the Jews. It is specified, in the edict which resulted from the communications of Simon Maccabæus with Rome, as one of the places which contained Jewish residents (1 Macc. xv. 23). Josephus, quoting Strabo, mentions that the Jews had a great amount of treasure stored there during the Mithridatic war (Joseph. Ant. xiv. 7, § 2). From the same source we learn that Julius Casar issued an edict in favor of the Jews of Cos (ibid. 10, § 15). Herod the Great conferred many favors on the island (Joseph. B. J. i. 21, § 11); and an inscription in Böckh (No. 2503) associates it with Herod the tetrarch. St. Paul, on the return from his third missionary journey, passed the night here, after sailing from MILETUS. The next day he went on to RHODES (Acts xxi. 1). The proximity of Cos to these two important places, and to CNI-

Jetradachm of Cos (Phoenician ? talent). Obv., Head

an the verse from Joel quoted above, applies to the jontory called Scandarium: and perhaps it is to the town that reference is made in the Acts (L c.) There is a monograph on Cos by Küster (De Ce Insula, Halle, 1833), and a very useful paper or the subject by Col. Leake (in the Trans. of the Royal Soc. of Literature, vol. i., second series). An account of the island will be found in Clarke's Travels, vol. ii., pt. i., pp. 196-213, and vol. ii., pt. ii., pp. 321-333; but the best description is in Ross, Reisen nach Kos, Hulicarnassus, u. s. w. (Halle, 1852), with which his Reisen auf den Griech. Insein should be compared, vol. ii. (1843), pp. 86-92, vol. iii. (1845), pp. 126-139. J. S. H.

CO'SAM (Koordu: Cosan, a name that occurs nowhere else either in the O. T. or N. T., and is of doubtful etymology), son of Elmodam, and fifth before Zorobabel, in the line of Joseph the husband of Mary, Luke iii. 28. [GENEALOGIES OF A. C. H. CHRIST.]

• COTTAGE. In Is. xxiv. 20 the Hebrew word מלהנה, Mělúnáh, rendered "cottage" in the A. V., would be better translated "hammock." See BED, p. 261.

COTTON (D272 : κάρπασος, τὰ καρπάσινα, Esth. i. 6, where the Vulg. has carbasini coloris, as if a color,^b not a material (so in A. V. "green"), were intended). There is a doubt whether under $\mathcal{W}\mathcal{W}$, Shish, in the earlier and $\mathcal{V}\mathcal{D}$, Butz, in the later books of the O. T. rendered in the A. V. by "white linen," "fine linen," &c., cotton may have been included as well. Both shesh and butz are said by Gesen. (s. v.) to be from roots signifying originally mere whiteness; a sense said also to in-

here in the word 72 (perhaps Arab. abyad,

white "), used sometimes instead of, and . sometimes together with shesh to mean the fabric.

In Ez. xxvii. 7, 16, WW, shesh, is mentioned as imported into Tyre from Egypt, and bûtz as from

Syria. Each is found in turn coupled with 72378 (purpura), in the sense of "purple and fine linen, i. e. the most showy and costly apparel (comp Prov. xxxi. 22 with Esth. viii. 15). The dress of the Egyptian priests, at any rate in their ministrations, was without doubt of linen (Herod. ii. 37) in spite of Pliny's assertion (xix. 1. 2) that they preferred cotton. Yet cotton garments for the worship of the temples are said to be mentioned in the Rosetta stone (Wilkinson, Anc. Egypt. iii. 117) The same with the Jewish ephod and other priestly attire, in which we cannot suppose any carelessue to have prevailed. If, however, a Jew happened a have a piece of cotton cloth, he probably would not be deterred by any scruple about the heterogeneou of Deut. xxii. 11 from wearing that and linen together. There is, however, no word for the cotton

plant (like T, min for flax) in the Hebrew, nor any reason to suppose that there was any early knowledge of the fabric.

The Egyptian mummy swathings also, many o which are said to remain as good as when fresh

مرير, hareer, " silk." The إتر ," sheets," marg

"shirts," of A. V. Judg. xiv. 12, 18, and "fine lines," Is. iii 28, is perhaps a form of the same word as

From the boon, we decided, after much controversy and minute analysis, to have been of linen, and not cotton. The very difficulty of deciding, however, shows how easily even scientific observers may mistake, and, much more, how impossible it would have been for ancient popular writers to avoid confusion. Even Greek naturalists sometimes clearly include "cotton" under λ_{IPOP} . The same appears to be true of $\partial \partial \delta rn$, $\partial \partial \partial r lor$, and the whole class of words signifying white textile vegetable fabrics. The proper Oriental name for the article

그일기곳 (said to occur with slight variation in Sanskr. and other Oriental languages") is rendered "green" in the A. V. of Esth. i. 6, but Grecized in the 1 XX. by *kaonagipous*. From the same word, with which either their Alexandrian or Parthian intercourse might familiarize them, the Latins borrowed carbasus, completely current in poetical use in the golden and silver period of Latinity, for sails, awnings, &c. Varro knew of tree-wool on the authority of Ctesias, contemporary with Herodotus. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Amasis indeed (about s. c. 540) sent as a present from Egypt a corstet κεκοσμημένον χρυσώ καl έρίοισι από ξυλοῦ (Herod. iii. 47), which Pliny says was still existing in his time in a temple in Rhodes, and that the minuteness of its fibre had provoked the experiments of the curious. Cotton was manufactured and worn extensively in Egypt, but extant monuments give no proof of its growth, as in the case of flax, in that country (Wilkinson, so. pp. 116-139, and plate No. 356); indeed, had it been a general product, we could scarcely have missed finding some trace of it on the monumental details of ancient Egyptian arts, trades, &c.; but, especially, when Pliny (A. D. 115) asserts that cotton was then rown in Egypt, a statement confirmed by Julius grown in Egypt, a statement contained presist the Pollux (a century later), we can hardly resist the inference that, at least as a curiosity and as an experiment, some plantations existed there. This is the more likely since we find the cotton-tree (gossypium arboreum, less usual than, and distinct from, the cotton *plant*, goss. herbac.) is mentioned still by Pliny as the only remarkable tree of the adjacent Ethiopia; and since Arabia, on its other side, appears to have known cotton c from time immemorial, to grow it in abundance, and in parts to be highly favorable to that product. In India, however, we have the earliest records of the use of cotton for dress; of which, including the starching of it, some curious traces are found as early as 800 B. C., in the Institutes of Manu; also (it is said, on the authority of Prof. Wilson) in the Rig-Veda, 105, v. 8. For these and some other curious antiquities of the subject, see Royle's Culture and Commerce of Cotton in India, pp. 117-122.

Cotton is now both grown and manufactured in various parts of Syria and Palestine, and, owing probably to its being less conductive of heat, seems preferred for turbans and shirts to linen; but there is no proof that, till they came in contact with Per-

COURT

sia the Hebrews generally knew of it a a distinct fabric from linen, whilst the negative proof of language and the probabilities of fact offer a strong presumption that, if they obtained it at all in commerce, they confounded it with linen under the terms shich or buits. The greater cleanliness and durability of linen probably established its superiority over cotton for sepulchral purposes in the N. T. period, by which time the latter must have been commonly known, and thus there is no reason for assigning cotton as the material of the $\delta\delta dura$ and $\delta rrdopta$ of which we read. For the whole subject, see Yates's Textrinum Antiquorum, pt. i. chap. vi. and app. D. H. H.

COUCH. [BED.]

COUNCIL. (1.) συνέδριον, the great council of the Sanhedrim, which sat at Jerusalem. [SANHEDRIM.] (2.) ouvédoia (Matt. z. 17. Mark xiii. 9), the lesser courts, of which there were two at Jerusalem, and one in each town of Palestine. The constitution of these courts is a doubtful point; according to Talmudical writers the number of judges was twenty-three in places where there was a population of 120, and three where the population fell below that number (Mishn. Sankedr. 1, § 6). Josephus, however, gives a different account: he states that the court, as constituted by Moses (Deut. x-i. 18; comp. Ant. iv. 8, § 14), consisted of seven judges, each of whom had two Levites as assessors; accordingly in the reform which he carried out in Galilee, he appointed seven judges for the trial of minor offenses $(B. J. ii. 20, \S 5)$. The statement of Josephus is generally accepted as correct; but it should be noticed that these courts were not always in existence; they may have been instituted by himself on what he conceived to be the true Mosaic model; a supposition which is rendered probable by his further institution of a council of Seventy, which served as a court for capital offenses, altogether independent of the Sanhedrim at Jerusalem (Vit. § 14; B. J. ii. 20, § 5). The existence of local courts, however constituted, is clearly implied in the passages quoted from the N T.; and perhaps the judyment (Matt. v. 21) applies to them. (3.) συμβούλιον (Acts xxv. 12), a kind of jury or privy council, consisting of a certain number of assessors (consiliarii, Suet. Tib. 33, 55), who assisted Roman governors in the administration of justice and other public matters.

W. L. B.

COURT, an open inclosure, applied in the A. V. most commonly to the inclosures of the Tabernacle and the Temple. The Hebrew word invariably used for the former is *Châtsér*, $\neg \stackrel{\text{res}}{=} ,$ from a root, $\neg \stackrel{\text{res}}{=} ,$ to surround (Gesen, p. 512). (See,

amongst others, Ex. xxvii. 9, to xl. 33; Lev. vi. 16; Num. iii. 26, &c.) The same word is also most frequently used for the "courts" of the Temple, as 1 K. vi. 36, vii. 8; 2 K. xxiii. 12; 2 Chr. xxvm. 5; Ps. xcii. 13, &c. In 2 Chr. iv. 9, and vi. 13, however, a different word is employed, apparently

⁶ Kurpasa or kurpasum is the Sanskr. Kupas in findee means the couon rose or pod with seed, which n the Bengales is kapasee, and in the Bombay dialect, eq.00.

^b So Burckhardt (*Ivar. Nub.* App. iii. p. 515, note) sentions a "species of cuirass made of quilted coton" as still worn by certain tribes adjacent to the **file.**

c Arab. Cotm, قطري means: (1) any annual,
 (2) anything between two leaves; (3) the well-known "cotton" plant. This evolving of the special from the general sense seems to indicate that the name "cotton" is originally Arabic; though it may be true that the plant is indigenous in India.

be the same places — Azarsh, TIY, from a root if similar meaning to the above. This word also occurs in Ez. xliii. 14, 17, 20, xlv. 19 (A. V. "setthe "), but perhaps with a different force. Châtzêr also designates the court of a prison (Neh. iii. 25; Jer. xxxii. 2, &c.), of a private house (2 Sam. xvii. 18), and of a palace (2 K. xx. 4; Esth. i. 5, &c.). In Am. vii. 13, where the Hebrew word is Beth = " " house," our translators, anxious to use a term applicable specially to a king's residence, have put "court." [HOUSE; TABERNACLE; TEMPLE.]

The word chatzer is very often employed for the inclosures of the villages of Palestine, and under the form of Hazer or Hazor frequently occurs in the names of places in the A. V. [HAZER; VIL-LAGE.]

* In Matt. xxvi. 69 (ver. 58 may be doubtful); Mark xiv. 66 (perhaps also ver. 54) and xv. 16; John xviii. 15, aux f should be rerdered "court," i. e. the quadrangle around which the house or palace of the high-priest was built, and not " palace" or "hall '(A. V.). Peter himself was not in the room of the palace where the Saviour was on trial, as the English reader would be led to suppose, but was in the court outside. [See HOUSE; PETER.] H.

COUTHA (Koved; [Vat. omits:] Phusa), 1 Edr. v. 82. There is no name corresponding with this in the lists of Ezra and Nehemiah. [He is mentioned as one of those whose sons were "servants of the temple " after the return from the Captivity. - H.]

COVENANT (Jathan; diathan; once Wisd. i. 16, ourthen: in O. T. fadus, pactum often interchangeably, Gen. ix., xvii.; Num. xxv.; in Apocr. testamentum, but sucramentum, 2 Esdr ii. 7; sponsiones, Wisd. i. 16; in N. T. testamentum [absque faedere, Rom. i. 31; Gr. dourdérous]). The Hebrew word is derived by Gesenius from the root 可见, i. q. 可见, "he cut," and taken to mean primarily "a cutting," with reference to the custom of cutting or dividing animals in two, and passing between the parts in ratifying a covenant (Gen. xv.; Jer. xxxiv. 18, 19). Hence the expression "to cut a covenant" (בְּרָת בְּרָית), Gen.

xv. 18, or simply הַרָּת, with אָרָרָא understood, 1 Sam. xi. 2) is of frequent occurrence. (Comp. **δρκια** τέμνειν, τέμνειν σπονδάs, icere, ferire, percutere fastus.) Professor Lee suggests (Heb.

Lez. s. v. בריה) that the proper signification of the word is an eating together, or banquet, from

the meaning "to eat," which the root TTT sometimes bears, because among the Orientals to eat together amounts almost to a covenant of friendship. This view is supported by Gen. xxxi. 46, where Jacob and Laban eat together on the heap of stones which they have set up in ratifying the covenant between them. It affords also a satisfactory explanation of the expression "a covenant of

alt " (ברית מלח, διαθήκη åλos, Num. rviii 19; 2 Chr. xiii. 5). when the Eastern idea of eatng salt together is remembered. If, however, the

ther derivation of קריה be adopted. this expres-sion may be explained by supposing salt to have been eaten, or offered with accompanying sacrifices, un occasion of very solemn covenant or it may the form of a covenant is maintained by the bane

be regarded as figurative, denoting, either, from the use of salt in sacrifice (Lev. ii. 13; Mark in 49), the sacredness, or, from the preserving quali ties of salt, the perpetuity, of the covenant.

In the N. T. the word $\delta_{ia}\theta_{he\eta}$ is frequently, though by no means uniformly, translated testament in the English Authorized Version, whence the two divisions of the Bible have received their common English names. This translation is perhaps due to the Vulgate, which having adopted testamentum as the equivalent for diathwn in the Apocr., uses it always as such in the N. T. (see above). There seems, however, to le no necessity for the introduction of a new word conveying a

new idea. The LXX. having rendered (which never means will or testament, but always covenant or agreement) by dia84nen consistently throughout the O. T., the N. T. writers, in adopting that word, may naturally be supposed to intend to convey to their readers, most of them familiar with the Greek O. T., the same idea. Moreover, in the majority of cases the same thing which has

been called a " covenant " (בְרִיה) in the O. T. is referred to in the N. T. (e. g. 2 Cor. iii. 14; Heb. vii., ix.; Rev. xi. 19); while in the same context the same word and thing in the Greek are in the English sometimes represented by " covenant," and sometimes by "testament" (Heb. vii. 22, viii. 8-13, ix. 15). In the confessedly difficult passage, Heb. ix. 16, 17, the word Suathen has been thought by many commentators absolutely to require the meaning of will or testament. On the other side, however, it may be alleged, that in addition to what has just been said as to the usual meaning of the word in N. T., the word occurs twice in the con text, where its meaning must necessarily be the

same as the translation of אָרָיה, and in the un

questionable sense of corenant (cf. diathen rainh Heb. ix. 15, with the same expression in vili. 8; and diathin, ix. 16, 17, with ver. 20, and Ex. xxiv. 8). If this sense of $\delta_{ia}\theta_{hen}$ be retained, we may either render ent verpois, "over, or in the case of, dead sacrifices," and & dialéµevos, " the mediating sacrifice" (Scholefield's Hints for an improved Translation of the N. T.), or (with Ebrard and others) restrict the statement of ver. 16 to the O. T. idea of a covenant between man and God, in which man, as guilty, must always be represented by a sacrifice with which he was so completely identified, that in its person he (& Statfueros, the human covenanter) actually died (cf. Matt. xxvi 28).

In its Biblical meaning of a compact or agreement between two parties, the word is used -1. Improperly, of a covenant between God and man Man not being in any way in the position of an independent covenanting party, the phrase is evidently used by way of accommodation. Strictly speaking, such a covenant is quite unconditional and amounts to a promise (Gal. iii. 15 ff., where erayyerla and diathen are used almost as synonyms) or act of mere favor (Ps. lxxxix. 28, where

TOT stands in parallelism with בריה) on God's part. Thus the assurance given by God after the Flood, the's like judgment should not be repeated,

and that the recurrence of the seasons, and of day and night, anould not cease, is called a covenant (Gen. ix.; Jer. xxxiii. 20). Generally, however,

501 COVENANT

fits which God engages to bestow being made by him dependent upon the fulfillment of certain conditions which he imposes on man. Thus the covenant with Abraham was conditioned by circumcision (Acts vii. 8), the omission of which was declared tantamount to a breach of the covenant (Gen. xvii.); the covenant of the priesthood, by zeal for God, his bonor and service (Num. xxv. 12, 13; Deut. xxxiii. 9; Neh. xiii. 29; Mal. ii. 4, 5); the covenant of Sinai, by the observance of the ten commandments (Ex. xxxiv. 27, 28; Lev. xxvi. 15), which are therefore called "Jehovah's covenant" (Deut. iv. 13), a name which was extended to all the books of Moses, if not to the whole body of Jewish canonical Scriptures (2 Cor. iii. 13, 14). This last-mentioned covenant, which was renewed at different periods of Jewish history (Deut. xxix.; Josh. xxiv.; 2 Chr. x7., xxiii., xxix., xxxiv.; Ezr. x.; Neh. ix., x.), is one of the two principal covenants between God and man. They are distinguished as old and new (Jer. xxxi. 31-34; Heb. viii. 8-13, x. 16), with reference to the order, not of their institution but of their actual development (Gal. iii. 17); and also as being the instruments respectively of bondage and free-dom (Gal. iv. 24). The latter of these covenants appears to be represented in Gal. iii. under a twofold aspect, as being a covenant between the First and Second Persons of the blessed Trinity (ver. 16 and ver. 20, as explained by Scholefield, Ellicott, &c.), and also a covenant, conditioned by faith in Christ, between God and man. (See Bishop Hopkins's Works, vol. ii. pp. 299-398, and Witsius on the Covenants, for the theology of the subject.) Consistently with this representation of God's dealings with man under the form of a covenant, such covenant is said to be confirmed in conformity to human custom by an oath (Deut. iv. 31; Ps. lxxxix. 3), to be sanctioned by curses to fall upon the unfaithful (Deut. xxix 21), and to be accompanied by

a sign (איד), such as the rainbow (Gen. ix.), circumcision (Gen. xvii.), or the Sabbath (Ex. xxxi. 16, 17).

2. Properly, of a corenant between man and man, i. c. a solemn compact or agreement, either between tribes or nations (1 Sam. xi. 1; Josh. ix. 6, 15), or between individuals (Gen. xxxi. 44), by which each party bound himself to fulfill certain conditions, and was assured of receiving certain advantages In making such a covenant God was solemnly invoked as witness (Gen. xxxi. 50), whence

the expression "a covenant of Jehovah " (בְּרָירה)

and an cath was sworn (Gen. xxi. 31); and accordingly a hreach of covenant was regarded as a very heinous

an (Ez. xvii. 12-20). A sign (היה) or witness

lords or men of one's covenant," are employed to denote confederacy (Gen. xiv. 13, Ob. 7). T. T. P.

COVERING OF THE EYES

• COVERING OF THE EYES The

Hebrew word THOP occurs in eight passages of the Old Testament; in six of which (Gen. xx. 16 Fx. xxii. 27, Job xxiv. 7, xxvi. 6, xxxi. 19, Js. L 3) it is translated "covering" in the A. V.; is one (Ex. xxi. 10) it is translated "raiment," and in one (Deut. xxii. 12) "vesture."

The meaning of the phrase, "covering of the eyes," in Gen. xx. 16, and the construction and import of the sentence, are still subjects of discussion, even among the latest interpreters. "Tot pene exstant explicationes, quot sunt interpretes" (Ros.). The points still at issue have respect to almost every word in the sentence. The pronoun NATT (he or it) may be referred (a) to Abraham himself, or (b) to the present made to him. "A covering of the eyes" may mean (c) a literal veil, or (d) a veil in a figurative sense as a protective influence, or (e) with a different allusion, a means of pacification. By "the eyes" may be meant (f) those of Sarah herself, or (g) in connection with the following $2^{1/2}$, those of all around her and

in intercourse with her. The word "all " (in (in fi)) may refer (h) to thing (namely, acts), or (i) to

persons. In the last clause, $\prod N$ may be (j) a preposition, or (k) the sign of the accustive case,

after 1, 2, 0, or (1) as the punctators have indicated by the Athnach, in connection with the follow-

ing verb. The form n = 2 may be (na) the 2d pers. fem. of the perfect, or (n) the participle used as the 3d pers. fem.

No. a, in conjunction with d, was well expressed by Calvin : "Docetur enim Sara, maritum cui juncta est, instar veli esse, quo se tegere debeat, ne exposita sit alienis." So Vitringa. But Tiele justly objects, that in this view, the present of a thousand silverlings, with which Abimelech prefaces this remark, has no significance.

Evald (Ausf. Lehrb. p. 281), combining a, a, g, i, j, m, translates and explains thus: " Πe is to thee a covering of the eyes for every one who is with thee (so that, under his protection, no impure eye can with impunity venture to look on thee), and toward every one; so dust thou right thyself (defend thy right)."

Genenius, combining b, e, f, h, j, n, translates and explains thus: "So this (the thousand silverlings) is to the a penalty [satisfaction] fin all which (has happened) with thee and before all; and she was convicted (had nothing to say in excuse). Compare Gen. xxii. 21, I will cover his fair (appease him) with the present." So Keil, and also Delitzsch;

except that they take コロラコ (m) as the 2d pers.,

and 5 (i) as referring to persons: "So it is to the a covering of the eyes (an explatory gift) in reference to all the are with the (because all in the household shared their mistress's disbonor); so thou art righted (properly, proved, namely, to be the one who suffered wrong)."

So the passage is understood by Tuch. He takes exception, however (after Schumann) to Ewald's and Gesenius's construction of the second אוליא, which should be constructed as the one immediately preceding it; for אוליך (אויג כל must not be arbitrarily separated in construction and reference

Hence he translates: 'for all which (has been, or, the faminine gen ler is required by the sense. In has taken place) with thes and with all, that those Job xxi. 10 and Is. xi. 7, the A. V. has "cow" an mayest be righted."

Baumgarten (Theol. Comm. sum Pent.) has revived Schroeder's interpretation (followed by Rosenmülier and others), taking "covering of the eyes" (c) in the sense of a literal veil; not, however, as Schroeder viewed it, as the token of a married woman, but simply as a means of concealing her beauty, and thus avoiding the danger referred to in v. 11. Baumgarten supposes that after Athnach

the accusative construction is resumed in TN

(k), taking $\Pi \square \supseteq \square$ as the 2d pers. perf. (m), and translates: " and all this (I do, or, I give) that thou mayest be righted."

Lange, understanding by " oovering of the face ' a veil in the figurative sense, finds (with Le Clerc) a double meaning in the expression; namely, a gift of atonement and reconciliation, which at the same time shall be as a veil to all eyes, by indicating the relation of one married to a husband.

On these views it may be remarked, that the form of the expression, "covering of the eyes," (not "of the face,") seems to be decisive against the supposition that a veil is meant, either as worn by Sarah for concealing her person from the sight of others, or by them to restrict their sight. In the former case, the expression should have been, "cov-

aring of the face" (D)?). A "covering of the eyes," in the literal sense, can mean nothing else than the repression of the improper use of the eyes, as of wantou looks. This, with reference to Sarah, is inapposite, as no such fault is laid to her charge; and if understood of others ("a covering of the eyes to all who are with thee"), a veil cannot be meant, for that is used for concealment, and not for the purpose of obstructing the vision. The objection lies equally against the supposition of a veil in a figurative sense, since this must conform to the literal and proper use of the term.

The only alternative remaining, is to take the expression, "covering of the eyes," in its strict and proper sense, instead of a veil for the face; either with Ewald, as referring to Abraham, her lawful protector from the wanton gaze of others, or with Gesenius, as a figurative expression for a peaceoffering. In favor of the former, is the juxtaposition

of the pronoun NiT (he, or it) with "thy brother," making this its most natural antecedent : an objection to the latter view, which is but partially obviated

by the use of NATI for both genders in the Pentateuch. But on the contrary, against Ewald's view lies the more serious objection, that Abimelech prefaces this remark with a statement which has no bearing on it; and thus a part of what he says to Sarah herself is without significance, as addressed to her.

The ancient versions are all at fault here, and throw no light on the true rendering and interpretation (unless we understand the Septuagint rsion with Gesenius), showing that it was as tifficult then as it is now. T. J. C.

OOW. The Heb. words בַּרֵה, בַּרֵה, and "", have been treated of under BULL. The A. | notes of the various species of the Hirsedinicks V. renders by "cow," both 72, in Es. iv. 15, and The in Lev. xxii. 28; Num. xviii. 17, where

506

bullock." W. D.

COZ (Vin [a thorn]: Kosé: Cos), a mai. among the descendants of Judah (1 Chr. iv. 8).

* The name also of one of the Levites (see 1 Chr. xxiv. 10; Ezr. ii. 61; Neh. iii. 4, 21; vii. 63). The article is prefixed in these passages, and in the first of them retained in the A. V. (HAKKOV which see).

COZ'BI ('DID [deceptive, lying] : Xas Bl. [Vat. -Bei;] Jos. XoorBla: Cozbi), a Midiauite woman, daughter of Zur, one of the chiefs of the nation (Num. xxv. 15, 18).

* CRACKNELS (in 1 Kings xiv. 3, A. V.), denotes crumb-cakes, "so called from the sharp noise made when breaking " (Eastwood & Wright's Bible Word-Book, p. 134). They formed a part of the present which the wife of Jeroboam carried to the prophet Ahijah (comp. 1 Sam. iz. 7, 8; zvi. 20) when she went to learn from him the issue of her son's sickness. They were different from ordi nary loaves, for both are mentioned together in the above passage. Fürst says they were perhaps small dried cakes, and pricked or pointed like biscuit, such as common people carried with them on jour-neys (Hebr. u. Chald. Wörterb. ii. 53). Being thus dry and hard, they would have the quality expressed by the English name, but inferred only from the Hebrew. The queen took such cakes with her, because she wished to conceal her rank and appear as an ordinary person. See Bunsen's Bibel-werk on 1 Kings xiv. 3. The Hebrew term is that in Josh. ix. 5, 12, usually understood there of bread so old as to be dry and spotted with mould. But the etymology is very obscure. See Fürst's Concord. s. v., and Ges. Thes. ii. 909. H.

CRANE (DID or D'D, sús or ets [horse, from the fleetness of the swallow]: χελιδών: pullus hirundinis, hirundo). There can be little doubt that the A. V. is incorrect in rendering suis by "crane," which bird is probably intended by the Hebrew word 'dgur, translated "swallow" hy the A. V. [SWALLOW.] Mention is made of the sús in Hezekiah's prayer (Is. xxxviii. 14). "Like a sus or an 'dyur so did I twitter;" and again in Jer. viii. 7 these two words occur in the same order, "the sis and the 'agur observe the time of their coming:" from which passage we learn that both birds were migratory. According to the testimony of most of the ancient versions sús denotes a "swallow." The passage in Jere mish (l. c.), compared with the twittering notes of the sús in Hezekiah's prayer, goes far to establish this translation, for the Hebrew verba which is rendered "chatter" by the A. V. more properly signifies to "chirp" or to "twitter," the term being evidently, as Bochart (Hieroz. ii. 605) has shown, onomatopoetic, indicative of the notes of the bird. The Italians about Venice call a swallow zizilla, and its chirping they express by zizillars (see Bochart, l. c.). The expression "like a swallow did I twitter " may perhaps appear to us not a very spt illustration of mournful complaint, the

coing expressive of happiness rather than of grief; a | the Great and the final destruction of Jeausale out it must be remembered that the ancients regarded the swallow as a mournful bird; and it is worthy of remark that, according to Dr. Kennicott, in thirteen Codices of Jeremiah (L c.) the word Isis occurs instead of sis: it is probable therefore that the story of Procne, Tereus, &c., of Grecian mythology had its source in ancient Egyptian fable, Isis, as the Egyptians say, having been changed into a swallow. The Hebrew word Derór (TTT) is noticed under the article SWALLOW. W. H

CRATES (KodTys: Vulg. translates produtus est), governor of the Cyprians (& ent tar K.), who was left in charge of the "castle" (This depond-Acus) of Jerusalem (?), during the absence of Sostratus, in the reign of Antiochus Epiphanes (2 Macc. iv. 29).

CREDITOR. [LOAN.]

CRES'CENS (Kohowns [the Greek for the Latin name Crescens, "increasing"], 2 Tim. iv. 10), an assistant of St. Paul [who went from Rome to Galatia, perhaps sent by the Apostle], said to have been one of the seventy disciples. According to the Apostolical Constitutions, and many of the fathers, he preached the Gospel in Galatia, which perhaps is only a conjecture built on the "Crescens to Galatia " of 2 Tim. iv. 10. Later tradition (Sophronius) makes him preach in Gaul (Galatia, see Theodoret on 2 Tim. L c.), and found the Church at Vienne. H. A.

CRETE (Kohrn: Creta), the modern Candia. This large island, which closes in the Greek Archipelago on the S., extends through a distance of 140 miles between its extreme points of Cape SAL-MONE (Acts xxvii. 7) on the E., and Cape Criumetopon beyond PHENICE or PHENIX (ib. 12) on the W. The breadth is comparatively small, the sarrowest part (called an isthmus by Strabo, x. 475) seing near Phœnix. Though extremely bold and mountainous, this island has very fruitful valleys, und in early times it was celebrated for its hundred vities (Virg. Æn. iii. 106). Crete has a conspicaous position in the mythology and earliest history of Greece, but a comparatively unimportant one in its later history. It was reduced (B. C. 67) by the Romans under Metellus, hence called Creticus, and united in one province with Cyrenaica, which was at no great distance (Strabo, x. 4.5) on the opposite coast of Africa [CYRENE]. It is possible that in Tit. iii. 1, there may be an implied reference to a turbulent condition of the Cretan part of the province, especially as regarded the Jewish resiiants.

It seems likely that a very early acquaintance took place between the Cretans and the Jews. The story in Tacitus (Hist. v. 2), that the Jews were themselves of Cretan origin, may be accounted for by supposing a confusion between the Philistines and the Jews, and by identifying the Cherethites of 1 Sam. xxx. 14; 2 Sam. viii. 18; Ez. xxv. 16; Zeph. ii. 5, with Cretan emigrants. In the two hast of these passages they are expressly called Ko $\eta\tau$ es by the LXX., and in Zeph. ii. 6, we have the word Ko $\eta\tau\eta$. Whatever conclusion we may arrive at on this point, there is no doubt that Jews were settled in the island in considerable numbers luring the period between the death of Alexander

• Unless perhaps the sis may have reference more loud squealing may appear to some to be indisative of particularly to some species of swift ((vpselus), whose | restless grief.

Gortyna seems to have been their chief residence for it is specially mentioned (1 Macc xv. 22) is the letters written by the Romans on behalf of the Jews, when Simon Maccabaus renewed the treaty which his brother Judas had made with Rome. [GORTYNA.] See 1 Macc x. 67. At a later period Josephus says (Ant. xvii. 12, § 1, B. J. ii. 7 § 1) that the Pseudo-Alexander, Herod's supposed son, imposed upon the Jews of Crete, when on his way to Italy. And later still, Philo (Leg. ad Cai. § 36) makes the Jewish envoys say to Caligula that all the more noted islands of the Mediterranean, including Crete, were full of Jews. Thus the special mention of Cretans (Acts ii. 11) among those who were in Jerusalem at the great Pentecost is just what we should expect.

No notice is given in the Acts of any more direct evangelization of Crete: and no absolute proof can be adduced that St. Paul was ever there before his voyage from Cæsarea to Puteoli; though it is quite possible that he may have visited the island in the course of his residences at Corinth and Ephesus. For the speculations which have been made in reference to this point, we must refer to what is written in the articles on TITUS, and TITUS, EPISTLE TO.

The circumstances of St. Paul's recorded visit were briefly as follows. The wind being contrary when he was off CNIDUS (Acts xxvii. 7), the ship was forced to run down to Cape Selmone, and thence under the lee of Crete to FAIR HAVENS, which was near a city called LAS.RA (ver. 8). Thence, after some delay, an attempt was made, on the wind becoming favorable, to reach Phœnice for the purpose of wintering there (ver. 12); but a sudden gale from the N. E. [WINDS] coming down from the high ground of Crete (kar' abris), in the neighborhood of Mount Ida, drove the ship to the little island of CLAUDA (vv. 13-16), whence she drifted to Malta. It is impossible to say how far this short stay at Fair Havens may have afforded opportunities for preaching the Gospel at Lasara or ewhere.

The next point of connection between St. Paul and this island is found in the epistle to Titus. It is evident from Tit. i. 5, that the Apostle himself was here at no long interval of time before he wrote the letter. We believe this to have been between the first and second imprisonments. In the course of the letter (Tit. i. 12) St. Paul adduces from Epimenides, a Cretan sage and poet (deios arho, Plat. Legg. i. 642), a quotation in which the vices of his countrymen are described in dark colors. The truth of what is said by Epimenides is abun. dantly confirmed by the passages collected (iv. 10) in Moursius's great work on Crete (Meursii Opera, Florence, 1744, vol. iii.). He has also a chapter (iv. 4) on the early Christian history of the island. Titus was much honored here during the middle ages. The cathedral of Megalo-Castron was dedicated to him: and his name was the watchword of the Cretans, when they fought against the Vene tians, who themselves seem to have placed hir: above St. Mark in Candia, when they became masters of the island. See Pashley's Trovels in Crete, i. 6, 175 (London, 1837). In addition to this valuable work, we must refer to Hoeck's Kreta (Göttingen, 1829), and to some papers translated from the Italian, and published by Mr. E. Falkener in the

J. S. H. gunties (London, 1856).

* Rangabes in his 'EAAnvied (iii. 453-579) has sketched the ancient history and the geographical features of Crete (mountains, rivers. promontories, and harbors, with an enumeration of the cities and villages), and (though some readjustment may be necessary for the present time) furnishes valuable statistics respecting the population of the island at different periods (Greeks and Turks), its monastic establishments, products, exports, imports, and the like. This author represents Kahol Ameres as an insecure roadstead, to which vessels resorted only in great distress, in accordance with its reputation among seamen in Paul's time (Acts xxvii. 8). He supposes the Lassea which was near there to be the "Lisia" of the Peutinger Table, but says nothing of any place still known by that name (LASARA). He mentions the interesting fact that Phoenix or Phoenice (Acts xxvii. 12) had its own bishops at an early period, and that one of them named Leon was present at the second Nicene Council. He speaks of this Phœnix as near Lutro (Acorpor), but evidently had no idea that they were identical (see PHCENICE). The opinion of so eminent an archæologist on these points deserves to be considered. The more recent publications of Capt. Spratt, R. N. (Sailing Directions for the Island of Crete, and Travels and Researches in Crete) have added largely to our knowledge of the topography of the island. Mr. Smith has availed himself of these later discoveries, with good effect, in his admirable work on the Voyage and Shipporeck of St. Paul (3d ed. 1866).

One of the observations reported by navigators is that on the south side of Crete a light southerly wind is often succeeded by a typhoon, which strikes down from the high mountains on the island, as happened to Paul's vessel in going from Fair Havens to Phœnice (Acts xxvii. 13, 14). It is said that this fact favors the interpretation of ibade rar' aurns (mentioned in the article above and adopted in several of the later English Commentaries) which refers adrigs to the island (down from it) and not to the ship. (Voyage and Shipwreck of St. Paul, 3d ed. p. 99). It was true, no doubt, that the wind in that instance came from the high land on shore, but it does not follow that $\kappa \alpha \tau' \alpha \dot{\upsilon} \tau \hat{\eta} s$ points out that circumstance. No proof has been given that $\beta_{d\lambda\lambda\alpha}$, as said of winds, was actually used thus with the genitive of the quarter whence the wind came. Lechler's view (Der Apostel Geschichten, p. 348, in Lange's Bibelwerk) seems to be more correct, that airis refers to the vessel which the wind struck and drove out to sea, with rais as the mental antecedent, which (actually employed in ver. 41) could so easily take the place here of Luke's usual motion. This is the explanation also of Winer (N. Test. Gram. § 47, 5, h) and of Buttmann (Neutest. Gram. p. 127). It is known to the writer that Prof. Sophocles of Harvard College interprets Luke here in the same manner.

• CRETES (Konres: Cretes), inhabitants of Crete (Acts ii. 11), where probably Jews and pros slytes are meant (comp. 'Pauaioi ='Ioudaioi re nal **νροσήλυτοι** in the previous verse); while for the same term we have Cretians (A. V.) in Tit. i. 12, applied there to native Greeks. "Cretans" would ne a better rendering, says Trench (Auth. Vers. p. 78, ed. 1850), in both passages. The subscription to the Epistle to Titus (A. V.) states that it

second volume of the Museum of Classical Anti- | was written to him as the "first hishop or overses of the church of the Cretians." For the character H. of the ancient Cretans, see CRETE.

* CRETIANS. [CRETES.]

* CRIB. This is the rendering (A. V.) of

DADN, e. g. in Is. i. 3. The word denotes (from

DIN, to fodder) the place from which cattle and horses were accustomed to eat their food, but throws no light on the sort of structure provided for that purpose. It was, no doubt (for such usages in the East remain the same from age to age), a box or trough "built of small stones and mortar," or hollowed out of an entire block, such as the farmers of the country use at the present time. Dr. Thomson mentions an incident connected with these contrivances which illustrates a Scripture passage. At Tiberias, as "the droves of cattle and donkeys came down from the green hills " at night, "I hurried after them . . . and no sooner had we got within the walls than the droves began to disperse. Every ox knew perfectly well his owner, his house, and the way to it, nor did he get bewildered for a moment in the mazes of these narrow and crooked alleys. As for the asses, they walked straight to the door, and up to their master's crib. . . . I followed one company clear into their habitation, and saw each take his appropriate manger, and begin his evening meal of dry tibn. Isaiah (i. 3, 4) says in all this they were wiser than their owners, who neither knew nor considered, but forsook the Lord, and provoked the Holy One of Larael." - Land and Book, ii. 97.

The "mangers" of the N. T. were probably like the "cribs" of the Old. The new Paris edition of Stephens's Thesaurus Gracas Linguas adopts the representation in Suicer's Thes. Eccles. ii. 1420. that odren is "properly a hollow place in the stable which coutains the food of animals; " that " it is a part of the stable, and each of the horses has his own $\phi d\tau \nu \eta$ or table, as it were, before him. Here odren and rodresa (crib and table) are used in-But while the writers admit terchangeably." that sense in Luke xiii. 15 (where the A. V. has "stall") they regard the word as employed out of its proper signification in the passages relating to the nativity of our Lord, and as "standing there by metonymy for a stable in which was a crib." But such an exception to the usual meaning is the less necessary here, because the locality of the $\phi d\tau r \eta$ may imply the stall, if for any reason that be required. Undoubtedly the true conception of the history is that the holy family, excluded from the part of the caravanserai (kardhuµa) allotted to travellers, repaired to the part where the animals were, and the birth taking place there, the newborn child was laid in one of the feeding-troughs within reach. They are not ill adapted to such a use: for Dr. Thomson states (Land and Book, ii. 98) that "his own children have slept in them in his rude summer retreats on the mountains." The Arabic translation from the Vulgate by the Maronite bishop Serkis en-Kurr (under Pope Urban VIII.) adjusts the rendering to this view of the word. Dr. Van Dyck says that he has no doubt of the correctness of such a translation.a The writer found this to be a common use of parry smong the modern Greeks. Biel (This. Philod iii. 534) states very correctly the Sept. usage, and in accordance with the foregoing view. ÍL.

a . From a note of Dr. Van Dyck to the writer

CRIMSON [COLORS.]

 CRISPING - PINS. The Hebrew word so translated in Is. ii. 22, D'O'T, charitim, denotes the reticules, often, probably, elegant and highly ornamented, carried by the Hebrew ladies. In 2 K. v. 23, the only other passage in which it

be surs, it is rendered bugs. See BAG, 1. CRISPUS (Kolonos [crisped, curled]; found

also in the Talmudists under the forms אסטייספא

and 'GC', ruler of the Jewish synagogue at Corinth (Acts xviii. 8); baptized with his family by St. Paul (1 Cor. i. 14). According to tradition, he became afterwards Bishop of Ægina (Const. Apost. vii. 46). H. Ă.

 His office (doxiourdywyos) shows that he was a Jew, and his foreign name that he or his ances tors had mingled freely with other nations. The guarded manner in which Paul speaks in 1 Cor. i. 14, would lead us to think that he baptized Crispus only, and not those of his family also who believed (Acts xviii. 8). H.

CROSS (σταυρός, σκόλοψ). Except the Latin orwa there was no word definitively and invariably applied to this instrument of punishment. The Greek word gravoos is derived from Igrnu, and properly, like or bow, means merely a stake (Hom. Od. xiv. 11; 1l. xxiv. 453). Hence Eustathius defines σταυροί to be όρθα και απωξυμμένα ξύλα. and Heaven of naramemnyores onthomes, xapa The Greeks use the word to translate both KES. pakes and cruz; e. g. σταυρφ προσδείν in Dion Cass. (xlix. 22) is exactly equivalent to the Latin ad palum deligare. In Livy even crux means a mere stake (" in tres sustolli cruces," xxviii. 29), just as, rice versi, the Fathers use oxohow and even stipes (" de stipite pendens ") of a cross proper. (In consequence of this vagueness of meaning, impaling (Herod. ix. 76) is sometimes spoken of, loosely, as a kind of crucifixion, and ἀνασκολοπί-Gen is nearly equivalent to avactaupour; "alii per obscena stipitem egerunt, alii brachia patibulo explicuerunt," Sen. Consol. ad Marc. xx.; and Ep. xiv.). Other words occasionally applied to the cross are patibulum and furca, pieces of wood in the shape of Π (or Y) and Λ respectively (Dig. 48, tit. 18; Plaut. Mil. Gl. ii. 47; and in Sall fr. ap. Non. iv. 355, " patibulo eminens affligebatur " seems slearly to imply crucifizion). After the abolition of this mode of death by Constantine, Trebonianus substituted furca figendos, for crucifigendos, wherever the word occurred. More generally the cross is called arbor infelix (Liv. i. 26; Sen. Ep. 101), er lignum infelix (Cic. per Rab. 3); and in Greek Shor (Deut. xxi. 22). The Fathers, in controversy, used to quote the words of Kúpios eBagilevoer (dord τοῦ ξύλου), from Ps. xlv. 10, or Ps. xcvi., a prophecy of the cross; but these words are " vluiterina et Christiana devotione addita ; " though Jenebrardus thought them a prophetic addition of the LXX., and Agellius conjectures that they read

YY for YN (Schleusner's The...). The Hebrews and no word for a cross more definite than VZ. "wood " (Gen. xl. 19, &c.), and so they called the transverse beams אָשָׁרָי וְעֵרֶב, " warp and woof "

(Penmon, On the Creed, art. iv.), like Ebhor 8(81-LXX. Cruz is the root of crucio, and is

"summum jus, summa crux," Colum i. 7; "queren in malo crucem," Ter. Phorm. iii. 3, 11), and as a nickname for villains ("Quid ais, crux?" Plant. Pen. ii. 5, 17). Rarer terms are Explor (Euseb viii. 8), odres (?), and Gabalus (Varro ap. Non. ii 378; Macrinus ap. Capitol. Macr. 11). This last

word is derived from "", " to complete."

As the emblem of a slave's death and a murderer's punishment, the cross was naturally looked upon with the profoundest horror, and closely connected "with the ideas of pain, of guilt, and of ignominy " (Gibbon, ii. 158; " Nomen ipsum crucis abait non modo a corpore civium Romanorum, sed etiam a cogitatione, oculis, auribus," Cic. pro Rab. 5). But after the celebrated vision of Constantine (Euseb. Vit. Const. i. 27-30), he ordered his friends to make a cross of gold and gems, such as he had seen, and "the towering eagles resigned the flags unto the cross " (Pearson), and "the tree of cursing and shame" "sat upon the sceptres and was engraved and signed on the foreheads of kings" (Jer. Taylor, Life of Christ, iii. xv. 1). The new standarde -

" In quibus effigies crucis aut gemmata refulget, Aut longis solido ex auro presfertur ab hasti (Prudent. in Symm. il. 464 fl.)

were called by the name Labarum, and may be seen engraved in Baronius (Ann. Eccl. A. D. 312, No. 36), or represented on the coing of Constantine the Great and his nearer successors. The Labarum is described in Euseb. (V. Constant. i. 25), and, besides the pendent cross, supported the

celebrated embroidered mon-St ogram of Christ (Gibbon, ii. 154; " Transverså X

littera, summo capite circumflexo," Cæcil.), which was also inscribed on the shields and helmets of the legions : --

"Christus purpureum genimanti tectus in auro Signabat labarum ; clypeo rum insignia Chri-tus Scripeerat, ardebat summis crux addita cristis."

The Labarum Nay, the σύμβολαν σωτήριον (From a Coin in the British Museum.)

was even more prominently honored ; for Jerome says, " Reguin purpuras et ardentes diadematum gemmas patibuli Salvatoris pictura condecorat " (Ep. ad Lastam).

We may tabulate thus the various descriptions of cross (Lips. de Cruce, i.; Godwyn's Moses and Aaron):-

1. The cruz simplex, or more stake "of se then used proverbially for what is most painful (as single piece without transom," was probably the

riginal of the rest Sometimes it was merely driven through the man's chest, but at other times it was driven longitudinuely, did paxeus nal varou (Hesych. s. v. ortohuy), coming out at the mouth (Sen. Ep. xiv.), a method of punishment called Avaorivous, or infixio. The offixio consisted merely of twing the criminal to the stake (ad polum deligare. Liv. xx.i. 13), from which he hung by his arms: the process is described in the little poem of Ausonius, Cupido crucifizus. Trees were naturally convenient for this purpose, and we read of their being applied to such use in the Martyrologies. Tertullian too tells us (Apol. viii. 16) that to punish the priests of Saturn, Tiberius " in eisdem arboribus, obumbratricibus scelerum, votivis crucibus explicuit" (cf. Tac. Germ. xii., " Proditores et trans fugas arboribus suspendunt"). How far the expression "accursed tree" is applicable under this head is examined under the word CRUCIFINION.

2. The cruz decussata is called St. Andrew's cross, although on no good grounds, since, according to some, he was killed with the sword; and Hippolytus says that he was crucified upright, "ad arborem olivæ." It is in the shape of the Greek letter X (Jerome, is Jer. XXI; "X litters et in figurâ crucem, et in numero decem demonstrat," Isidor. Orig. i. 3). Hence Just. Mart. (Diud. c. Tryph. p. 200) quotes l'lato's expression, $d\chi la \xiev$ durby $ev \tau \phi$ mart, with reference to the cross. The Fathers, with their usual luxuriant imagination, discover types of this kind of cross in Jacob's blessing of Joseph's sons, $\chi \ell \rho \sigma w r \Lambda \lambda \alpha \gamma \mu \ell \nu \alpha \sigma$ (cf. Tert. de Buptismo, viii.); in the anointing of riests "decussatively" (Sir T. Browne, Garden of Cyrue); for the rabbis say that kings were anointed "in formâ coronæ, sacerdotes autem

יב , i. e. ad formam X Graecorum" (Schoettgen's Hor. Hebr. et Talm. iv. ad f.); and in the crossing of the hands over the head of the goat on the day of explation (Targ. Jonath. ad Lev. xvi. 21, dx.).

3. The crux commissa, or St. Anthony's cross (so called from being embroidered on that saint's cope, Mrs. Jameson's Sacred Art, i. xxxv.), was in the shape of a T. Hence Lucian, in his amusing Vien parnérrar, jocosely derives oraupos from .οῦ (ἀπὸ τόυτου . . καὶ τῷ τεχνήματι τῷ πονηρῷ την πονηράν επωνυμίαν συνελθείν), and make mankind accuse it bitterly for suggesting to tyrants the instrument of torture (Jud. Vocal. 12). This shape is often alluded to as "the mystical Tau" (Garden of Cyrus ; "nostra autem T species crucis," Tert. adv. Marc. iii. 22; Jer. in Ezech. ix., &c.) As that letter happens to stand for 300, opportunity was given for more elaborate trifling; thus the 300 cubits of the ark are considered typical (Clem. Alex. Strum. vi.; S. Paullin. Ep. ii.); and even Abraham's 318 servants (!); since 318 is represented by τ_{in} , they deduced the use 'Intoniv in tois But yoduaaoir kal ir irl tor otaupor (Barnah. Ep. ix.; Clem. Alex. Strom. vi.; Ambros. Prol. in l. i. de Fide ; Pearson (art. iv.) On the Creed, in whose notes these passages are quoted).

A variety of this cross (the crux ansata, " crosses with circles on their besds ") is found "in the sculptures from Khorsabad and the vories from Nimroud. M. Lajard (*Observa*-

tions sur la Croix ansée) refers it to the Ausyrian symbol of divinity, the winged figure in a circle; out Egyptian antiquaries quite reject the theory " 'Layard's Nineveh. ii. 213, nots). In the Egyptum

sculptures, a similar object, cafled a crux ansata, is constantly borne by divinities, and is variously called "the key of the Nile" (Dr. Young in Encycl Britan.), " the character of Venus," and more cor rectly (as by Lacroze) "the emblem of life." ln. deed this was the old explanation (spunvevueiras σημάναι τάυτην γραφήν Ζωή $\epsilon \pi \epsilon \rho \chi o \mu \epsilon v \eta$, Sozo-men, Hist. Eccl. vii. 15; so too Rufinus (ii. 29). who cays it was one of the "isparikal vel sacerdotal s litterse "). "The Egyptians thereby expressed the powers and motion of the spirit of the world, and the diffusion thereof upon the celestial and elemental nature" (Sir T. Browne, Gard. of Cyrus). This too was the signification given to is by the Christian converts in the army of Theodosius, when they remarked it on the temple of Serapis, according to the story mentioned in Suidas. ŤЪ same symbol has been also found among the Copts. and (perhaps accidentally) among the Indians and Persians.

4. The cruz immissa (or Latin cross) differed from the former by the projection of the $\delta d\rho u$ $\psi \eta \lambda \delta u$ (or stipes) above the $\kappa \epsilon \rho as \delta \gamma \kappa d\rho \sigma \iota o u$, of patibulum (Euseb. de V. Constant. i. 31). That this was the kind of cross on which our Lord died is obvious (among other reasons) from the mention of the "title," as placed above our Lord's head, and from the almost unanimous tradition; it is repeatedly found on the coins and columns of Constantine. Hence ancient and modern imagination has been chiefly tasked to find symbols for this sort of cross, and has been eminently successful. They find it typified, for instance, in the attitude of Moses during the battle of Rephidim (Ex. xvii. 12), saying that he was bidden by the Spirit, iva $\pi o(\eta \sigma \eta)$ τύπον σταυροῦ και τοῦ μέλλοντος πάσχειν (Barnah. Ep. 12; Just. Mart. Dial. c. Tryph. 89; habitus crucis, Tert. adv. Marc. iii. 18). Firmic. Maternus (de Errore, xxi.) says (from the Talmudists?) that Moses made a cross of his rod. "ut facilius impetraret quod magnopere postularet, crucem sibi fecit ex virgâ." He also fantastically applies to the cross expressions in Hab. iii. 3-5; Is. ix. 6, &c. Other supposed types are Jacob's ladder (Jer. Com. in Ps. xci.; "Dominus innixus scalae Christus crucifixus ostenditur," August. Serm. de Temp. lxxix.); the paschal lamb, pierced by transverse spits (σχηματιζόμενον όμοίως τῷ σχήματι τοῦ σταυροῦ ὀπτᾶται, Just. M. Dial. c. Tryph. 40); and "the Hebrew Tenupha, or ceremony of their oblations waved by the priest into the four quarters of the world after the form of a cross' (Vitringa, Obs. Sacr. ii. 9; Schoettgen, I. c.). A

fignity, energy, or deliverance: as the actions of ligging, plowing, &c., the human face, the antennos of a ship in full sail, &c. "Aves quando volant ad æthera signum crucis assumunt. Homo natana. vel orans, formå crucis visitur " (Jer. in Marc. xi.). " Signa ipsa et cantabra et vexilla quid aliud quam inauratse cruces sunt ?" (Min. Fel. Oct. xxix.). Similar analogies are repeated in Firm. Matern. de Errore, xxi.; Tert. adv. Nat. i. 12; Apol. 16; de Coron. Mil. 3, and, in answer to the sneers of those to whom the cross was "foolishness," were considered sufficient proof that "signo crucis aut ratio naturalis nititur aut vestra religio formatur " (Min. Fel., &c.). The types adduced from Scriptare were valuable to silence the difficulties of the Jews, to whom, in consequence of Deut. xxi. 22 (invariant of the cross was an especial "stumbling-block" (Tert. adv. Jud. 9). Many such fancies (e. g. the harmlessness of cruciform flowers, the southern cross, &c.) are collected in " Communications with the Unseen World."

Besides the four $\delta\kappa\rhoa$ (or *apices*, Tert.) of the cross, was a fifth $(\pi\tilde{\eta}\gamma\mu a)$, projecting out of the contral stem, on which the body of the sufferer rested ($c_0^{o} \delta$ erroycibrat *a i* or *aupoviperoa*, Just. M. Tryph. 91, who (more suo) compares it to the horn of a rhinoceros; setilis excesses, Tert. *adv.* Nat. i. 12; "ubi requiescit qui clavis affigitur," Iren. *adv.* Harves. i. 12). This was to prevent the weight of the body from tearing away the hands, since it was impossible that it "abould rest upon nothing but four great wounds" (Jer. Taylor, Life of Christ, iii. xv. 2, who erroneously quotes the $\delta\delta\rho u \tau erp \delta\pi\lambda eupon$ of Nonnus). This projection is prohably alluded to in the famous lines of Maecensa (ap. Sen. Ep. 101): —

"Vita dum superest bene est ; Hano mihi vel acutà Si sedeam cruce, sustine."

Runkopf (ad loc.) so explains it, and it is not so probable that it refers to *dwarnwowlevents* as Lipsius thinks (de Cruce, i. 6). Whether there was also a *brordow* or support to the feet (as we see in pictures), is doubtful. Gregory of Tours mentions it; but he is the earliest authority, and has no weight (G. J. Voss. Hurm. Passion. ii. 7, 28).

An inscription, titulus or elogism ($i\pirpaph$, Luke xxiii.; $airla, Matt. xxvii.; <math>\eta$, $i\pirpaph$, $f\eta$ s $airlas, Mark; <math>\tau(\tau\lambda os, John xix.; "Qui causam$ $pene indicavit," Suet. Col. 33: <math>\pi fugt.$ Euseb.; $\gamma pd\mu\mu a \tau a \tau h r airlar \tau \eta s barar docess b \eta \lambda o b r a,$ $Uion Cass. liv. 3: <math>\pi \tau v \chi (or i r (\gamma p \eta \mu \mu a i \chi or,$ Hesych.; $\Gamma (1)$) was generally placed above the person's head, s.d briefly expressed his guilt, as $o \tau d s i \sigma \tau u \pi A \tau \tau a \lambda o s \delta \chi o to \tau (as o, t),$ "Imple locutus parmularius" (Suet. Dom. x.), and generally was carried before the criminal ("precedente titulo," Suet.). It was covered with white gypaum, and the letters were black; hence Sozomer culls it $\lambda \ell v \kappa o \mu a$ (*Hist. Eccl.* iii. 1), and Nicephorus a $\lambda everty \sigma drus (H. Eccl. viii. 29)$. But Nicquetus (Tu. Sanct. Crucis, i. 6) says it was white with red letters.

A common tradition assigns the perpetual shiver of the aspen to the fact of the cross having been formed of its wood. Lipsius, however (de Cruce, ii. 13), thinks it was of oak, which was strong mough, and common in Judges. Few will attach erge consequence to his other reason, that the relice' used to mail on the title. Cyprian is a very good

appear to be of oak. The legend to which he alludes,

"Pes crucis est cedrus, corpus tenet alta cupressas . Palma manus retinet, titulo isetatur oliva,"

hardly needs refutation. It must not be overlooked that crosses must have been of the meanest and readiest materials, because they were used in such marvelous numbers. Thus we are told that Alexander Jannæus crucified 800 Jows (Joseph. Ant. xiii. 14, § 2); and Varus 2000 (id. xvii. 10, § 10); and Hadrian 500 a.day; and Titus so many that $\chi \omega \rho d$ $\tau e^{\delta \mu c} \lambda e^{\delta \mu c} \tau \sigma \hat{\sigma} \hat{\sigma} \sigma \sigma \mu \rho \sigma \hat{\sigma}$ so that they are the land rightly notices the strange retribution, "so that they who had. nothing but 'crucify' in their mouth, were therewith paid home in their own bodies," Sir T. Browne, [*'ulg. Err.* v. 21). In Sicily, Augustus crucified 600 (Orce. vi. 18).

It is a question whether tying or binding to the cross was the more common method. In favor of the first are the expressions ligare and deligare; the description in Ausonius, Cupido Crucif.; the Egyptian custom (Xen. Fphes. iv. 2); the mention by Pliny (xxviii. 11) of spartum e cruce among magical implements; and the allusion to crucifixion noted by the fathers in John xix. 24 (Theophyl. ad loc. and Tert. " Tunc Petrus ab altero cingitur cum cruci astringitur "). On the other side we have the expression προσηλούσθαι, and numberless suthorities (Sen. de Vit. Beatá, 19; Artemidor. Oneirocr., in several passages; Apul. Met. iii. 60; Plaut. Mostel. ii. 1, 13, et passim). That our Lord was nailed, according to prophecy, is certain (John xx. 25, 27, &c.; Zech. xii. 10; Ps. xxii. 16: "Foderunt manus meas et pedes, que propria atrocitas crucis," Tert. adv. Marc. iii. 19, &c.; Soutar, LXX.; although the Jews vainly endeavor

to maintain that here ``ND, ' like a lion," is the true reading, Sixt. Senensis *Bibl. Sanct.* viii. 5, p. 640). It is, however, extremely probable that both methods were used at once: thus in Lucan (vi. 547, ff.) we have mention both of " nodos nocentes" and of " insertum manibus chalybem": and Ililary (*de Trin.* x.) mentions together " colligantum funium vincula et adactorum clavorum vulnera." We may add that in the crucifixion (as it is sometimes called, Tert. adv. Marc. i. 1, cf. Manil. de Androm v.) of Prometheus, *Eschylus*, besides the nails, speaks of a $\mu a \sigma \chi a \lambda_1 \sigma \tau h \rho$ (*Prom.* 79). When either method was used alone, the tying was considered more painful (as we find in the Martyrologies), since it was a "diutinus cruciatus."

It is doubtful whether three or four nails were employed. The passage in Plaut. Most. ii. 1, 13, is, as Lipsius (de Cruce, ii. 9) shows, indecisive. Nonnus speaks of the two feet (δμοπλοκέεs) being fustened with one nail (άζυγι γόμφφ), and Greg. Naz. (De Christ. pat.) calls the cross a ξύλον $\tau_0(\sigma_n\lambda_0 r)$; hence on gold and silver crosses the nails were represented by one ruby or carbuncle a each extremity (Mrs. Jameson, I. c.). In the "invention " of the cross, Socrates (H. F. i. 17) only mentions the hand-nails; and that only two were found is argued by Winer (s. v. Kreuzigung) from the $\tau \ge \mu \epsilon \nu$, $\tau \ge \delta \epsilon$ (instead of $\tau obs \ \mu \epsilon \nu$) in Theodor. H. E. i. 17. Romish writers, however, generally follow Gregory of Tours (De Glor. Mart. vi.) in maintaining four, which may also be implied by the plural in Cypr. de Passione (" clavis . . . pedes terebrantibus"), who also mentions three more

zuthority, because he had often been a witness of | Bosins (de Cruce triumphante et glorioed, Antexecutions. There is a monograph on the subject by Corn. Curtius (de clavis dominicis, Antw. 1670). What has been said sufficiently disproves the calumny against the Albigenses in the following very curious passage of Lucas Tudensis (ii. contra 11/19.): "Albigensis primi pinzerunt imaginen erneifixi uno elavo simul utrumque pedem configente. et virginem Mariam Monoculam (!); utrumque in derisionem: sed postes prior figura retenta est, et irrepsit in vulgarem famam." (Quoted by Jer. Tuylor, I. c.) On the supposed fate of the nails, see Theodor. U. E. i. 17. Constantine fastened one as a *pulanthpiov* on his horse's bridle, and one (Zonaras says some) on the head of the statue which he intended to be the palladium of Constantinople, and which the people used to surround with lighted torches (Mosheim, Eccl. Hist. ii. 1, 3, and notes). The clavus peaks dextri is shown at Trèves (Lips. ii. 9, note).

The story of the so-called "invention of the cross," A. D. 326, is too famous to be altogether passed over. Besides Socrates and Theodoret, it is mentioned by Rufinus, Sozomen, Paulinus, Sulp. Severus, and Chrysostom, so that Tillemont (Mem. Ecc. vii.) mays that nothing can be more certain; but, even if the story were not so intrinsically absurd (for among other reasons it was a law among the Jews that the cross was to be burnt; Othonia Lex. Rub. s. v. Supplicia), it would require far more probable evidence to outweigh the silence of Eusebius. It clearly was to the interest of the Church of Rome to maintain the belief, and invent the story of its miraculous multiplication, because the sale of the relics was extremely profitable. The story itself is too familiar to need repeating. To this day the supposed title, or rather fragments of it, are shown to the people once a year in the church of Sta. Croce in Gerusalemme at Rome. On the capture of the true cross by Chosroes II., and its rescue by Heraclius, with even the seals of the case unbroken, and the subsequent sale of a large fragment to Louis IX., see Gibbon, iv. 326, vi. 66. Those sufficiently interested in the annals of ridiculous imposture may see further accounts in Baronius (Ann. Ecc. A. D. 326, Nos. 42-50), Jortin, and Schmidt (Problem. de Crucis Dominica Inventione, Heimst. 1724); and on the fate of the true eross, a paper read by Lord Mahon before the Society of Antiquaries, Feb. 1831 (cited by Dean Milman).

It was not till the 6th century that the emblem of the cross became the image of the crucifix. As symbol the use of it was frequent in the early Church (" frontem crucis signaculo terimus," Tert. de Cor. Mil. 3). It was not till the 2d century that any particular efficacy was attached to it (Cypr. Testim. ii. 21, 22; Lact. Inst. iv. 27, &c.; Mosheim, ii. 4, 5). On its subsequent worship (latria) by the Church of Rome, see Jer. Taylor's Diss. from Popery, i., ii. 7, 12; and on the use of the sign in our Church, Hooker's Ecol. Pol. v. 65. Some suppose an allusion to the custom in Es. ix.

4 (Poli Synops. au loc.; Gesen. s. v. 10; signum ppec. cruciforme, Sixt. Sen. ii. 190).

Besides the noble monograph of Lipsus, de Cruce (from which we have largely borrowed, and whose wealth of erudition has supplied every succeeding writer on the subject with abundant authorities), ing two fingers broad, bore the inscription (not ir.

CROWN (דְשָׁרָד). This ornament, which is both ancient and universal, probably originated from the fillets used to prevent the hair from being dishevelled by the wind. Such fillets are still common, and they may be seen on the sculptures of Persepolis, Nineveh, and Egypt; they gradually developed into turbans (Joseph. Ant. iii. 7, § 7, which by the addition of ornamental or precious materials assumed the dignity of mitres or crowns. The use of them as ornaments probably was suggested by the natural custom of encircling the head with flowers in token of joy and triumph. ("Let us crown ourselves with rosebuds," Wisd. ii. 8; 8 Macc. vii. 16; Jud. xv. 18, and the classical writers, prassim; Winer, s. v. Kränze). The first crown was said to have been woven for Pandora by the Graces (comp. ortéquos xapiror, Prov. iv. b = στέφανος τών πνευματικών χαρισμάτων, Lex. Cyr.). According to Pherecydes, Saturn was the first to wear a crown; Diodorus says that Jupiter was first crowned by the gods after the conquest of the Titans. Pliny, Harpocration, &c., ascribe its earliest use to Bacchus, who gave to Ariadne a crown of gold and Indian gems, and assumed the laurel after his conquest of India. Leo Ægyptius attributes the invention to Isis, whose wreath was cereal. These and other legends are collected by Tertullian from the elaborate treatise on crowns by Claud. Saturnius (" præstantissimus in håc materiå commentator "). Another tradition mays that Nimrod was the first to wear a crown, the shape of which was suggested to him by a cloud (Eutychius Alexandr. Ann. i. 63). Tertullian in his tract De Cor. Militis (c. 7 ff.) argues against them as unnatural and idolatrous. He is, however, singularly unsuocessful in trying to disprove the countenance given to them in Scripture, where they are constantly mentioned. He says "Quis . . . episcopus invenitur coronatus?" (c. 9). But both the ordinary priests and the high-priest wore them. The com-

mon mitre (העָבָרָשָ, גוֹטֿמָטָג, Ex. xxviii. 40, xxix. 9, &c., raivia, Joseph. στρόφιον & ol lepeis φοροῦσι, Hesych.) was a πίλος άκωνος, forming a sort of linen tania or crown (or equal), Joseph.

Ant. iii. 7. The TARY (Burolin ridpa) of the high-priest (used also of a regal crown, Ez. xxi. 96) was much more splendid (Ex. xxviii. 39; Lev. viii. 9; "an ornament of honor, a costly work the de sire of the eyes," Ecclus. xlv. 12; "the holy rown," Lev. viii. 9, so called from the Tetragrammaton ir scribed on it; Sopranes, de Re Vest. Jud., p. 441 It had a second fillet of blue lace (it variros πεποικιλμένοs, the color being chosen as a type of

beaven; und over it a golden diadem ("), Ex xxix. 6), "on which blossomed a golden calyx like the flower of the boordayos" (Joseph. Ant. iii. 6).

The gold band (VY, LXX. nerator, Orig. 12ar. Thpion, Das Stirnblatt, Luther) was tied behind with blue lace (embroidered with flowers), and be there are works by Salmasius (de Cruce, Epp. 3); bas-relief as Abarbanel says) "Holiness to the Kippingius (de Cruce et Jruciariis, Bren. 1671); i.ord." (Comp. Rev. xvii. 5; Braunius, de Vest

Sacord. II. 22; Maimon. de Apparatu Temple, II. ונרה . the crown of priesthood; and גלכות Sacord. II. 1; Reland, Antiq. ii. 10; Carpaov. Apparties 7 cmps, ik. 1; Reland, Antiq. ii. 10; Carpaov. Appar. Crit. p. 85; Joseph. B. J. v. 5, § 7; Philo, de Vit. Mosts, iii. 519.) Some suppose that Josephus is describing a later crown given by Alexander the Great to Jaddua. (Jennings's Jew. Ant. p. 158.) The use of the crown by priests and in religious services was universal, and perhaps the badge belonged at

Crowns worn by Assyrian kings. (From Nimroud and Kouyunjik.)

first "rather to the pontificalia than the regalia." Thus Q. Fabius Pictor says that the first crown was used by Janus when sacrificing. "A striped head-dress and queue," or "a short wig, on which a band was fastened, ornamented with an asp, the symbol of royalty," was used by the kings of Egypt in religious ceremonies (Wilkinson's Anc. 1. gypt. iii. 354, fig. 13). The crown worn by the kings of Assyria was "a high mitre . . . frequently adorned with flowers, dtc., and arranged in bands of linen or silk. Originally there was only one band, but afterwards there were two, and the ornaments were richer " (Layard, ii. 320, and the illustrations in Jahn, Arch. Germ. ed. pt. i. vol. ii. tab. iz. 4 and 8).

There are several words in Scripture for a crown besides those mentioned; as THP, the head-dress of bridegrooms, Is. lxi. 10, $\mu i \tau \rho a$, LXX.; Bar. v. 2; Fz. xxiv. 17 ($\tau \rho i \chi \omega \mu a$), and of women, Is. iii. 20 (ξμπλόκιον?); ΠΣΟΥ, a head-dress of great splendor (Is. xxviii. 5); לְּלָרָה, a wreath of flowers (ortégaros), Prov. i. 9, iv. 9: such wreaths were used on festal occasions (Is. xxviii. 1). 키ンジ common tiara or turban, Job xxix. 14; Is. iii. 23 (but LXX. SIRAots, Ofpiorpor). The words פָרָבָּלָא and בָּרָבָלָא, are spoken of under DIADEM. The general word is TTOY. and we must attach to it the notion of a costly turban irradiated with pearls and gems of priceless value, which often form aigrettes for feathers, as in the crowns of modern Asiatic sovereigns. Such was probably the crown, which with its precious stones weighed (or rather "was worth ") a talent, taken y David from the king of Ammon at Rabbah, and used as the state crown of Judah (2 Sam. xii. 30). Some groundlessly suppose that being too heavy to wear, it was suspended over his head. The royal srown was sometimes buried with the king (Schickand, Jus Rey. vi. 19, 421). Idolatrous nations also "made crowns for the head of their gods" (Ep. ler. 9) [or Bar. vi. 9].

The Jews boast that three crowns were given to them: הורה לגרה, the crown of the Law; כתר הורה see Games (Amer. ed.).

the royal crown, better than all, which is 772

בוב DUD, the crown of a good name (Carpzov Apparat. Critic. p. 60; Othonis Lex. Talm. s. v Corona).

Zréparos is used in the N. T. for every kind of crown; but στέμμα only once (Acts xiv. 13) for the garlands used with victims. In the Byzantine Court the latter word was confined to the imperial crown (Du Frenne, Gloss. Grazc. p. 1442). The use of funeral crowns is not mentioned in the Bible.

In Rev. xii. 3, xix. 12, allusion is made to "many crowns" worn in token of extended dominion. Thus the kings of Egypt used to be crowned with the "pshent" or united crowns of Upper and Lower Egypt (Wilkinson, Anc. Egypt. iii. 851 ff.; comp. Layard, ii. 320); and Ptolemy Philometor wore two diadents, one for Europe and one for Asia. Similarly the three crowns of the Papal tiara mark various accessions of power: the first corona was added to the mitra by Alexander III., in 1159; the second by Boniface VIII., in 1303; and the third by Urban V., in 1362.

The laurel, pine, or parsley crowns given to victors in the great games of Greece are finely alluded to by St. Paul (1 Cor. ix. 25; 2 Tim. ii. 5, &c.).4 They are said to have originated in the laurelwreath assumed by Apollo on conquering the Python (Tert. de Cor. Mil. cc. 7, 15). "Crown" 'is often used figuratively in the Bible (Prov. xii. 4, xvii. 6; Is. xxviii. 5; Phil. iv. 1, &c.). The term is also applied to the rims of altars, tables, &c. (Ex. xxv. 25, &c. : Deut. xxii. 8, nothoeis orepárην τῷ δώματί σου. "Projectus coronarum," Vitr. ii. 8: "Angusti muri corona," Q. Curt. ix. 4, 30). The ancients as well as the moderns had a coin called "a crown " (τόν στέφανον δυ δφείλετε, 1 Macc. xiii. 39, x. 29, A. V. "crown-tax," ε. Suid. s. v. στεφανικόν τέλεσμα). [DIADEM.]

The chief writers on crowns are Gaschalius (de Coronis libri x.) and Meursius (de Coroná, Hafnise. 1671). For others, see Fabricius, Bibl. Ant. xiv. F. W. F. 13.

CROWN OF THORNS (ortéparos ét ànas 0wr, Matt. xxvii. 29). Our Lord was crowned with thorns in mockery by the Roman soldiers. The object seems to have been insult, and not the infliction of pain, as has generally been supposed. The Rhamnus or Spina Christi, although abundant in the neighborhood of Jerusalem, cannot be the plant intended, because its thorns are so strong and large that it could not have been woven $(\pi\lambda \epsilon)$ Earres) into a wreath. The large-leaved acanthus (bear's-foot) is totally unsuited for the purpose. Had the acacia been intended, as some suppose, the phrase would have been it and whys. Obviously some small flexile thorny shrub is meant; perhancappares spinosas (Reland's Palastina, ii. 523). Hasselquist (Travels, p. 260) says that the thorn used was the Arabian Nabk. "It was very sunable for their purpose, as it has many sharp thorus which inflict painful wounds; and its flexible pliant, and round branches might easily be plaited in the form of a crown." It also resembles the rich dark green of the triumphal ivy-wreath, which would give additional pungency to its ironical pur

CRUCIFIXION (σταυροῦν, ἀνασταυροῦν, σκολοπίζειν, προσηλοῦν (and. less properly, ἀναorivourebeiv): cruci or patibulo affigere, suffigere, or simply figere (Tert. de Pat. iii.), cruciare (Auson.), ad palum alligare, crucem alicui statuere, in crucem agere, tollere, &c.: the sufferer was called crucivrius). The variety of the phrases shows the extreme commonness of the punishment, the invention of which is traditionally ascribed to Semir.unis. It was in use among the Egyptians (as in the case of Inarus, Thuc. i. 30; Gen. xl. 19), the Carthaginians (as in the case of Hanno, &c., Val. Max. ii. 7; Sil. Ital. ii. 344), the Persians (Polycrates, &c., Herod. iii. 125, iv. 43; Esth. vii. 10, σταυρωθήτω έπ' αὐτό, LXX. v. 14), the Assyrians (Diod. Sic. ii. 1), Scythians (id. ii. 44), Indians (id. ii. 18), (Winer, s. v. Kreuzigung,) Germans (possibly, Tac. Germ. 12), and very frequent from the earliest times (reste suspendito, Liv. i. 26) among the Greeks and Romans. Cicero, however, refers it, not (as Livy) to the early kings, but to Tarquinius Superbus (pro Rab. 4); Aurel. Victor calls it " Vetus veterrimumque (an teterr. ?) patibulorum supplicium." Both Rpeuge and suspendere (Ov. Ibis, 299) refer to death by crucifixion ; thus in speaking of Alexander's crucifixion of 2000 Tyrians, arenpépaser in Diod. Sic. answers to the crucibus affixus, Q. Curt. iv. 4.

Whether this mode of execution was known to the ancient Jews is a matter of dispute, on which Winer quotes a monograph by Bormitius. It is asserted to have been so by Baronius (Annul. i. xxxiv.), Sigonius (de Rep. Hebr. vi. 8), &c., who are refuted by Casaubon (c. Baron. Exerc. avi.; Carpzov. Apparat. Crit. p. 591). The Hebrew words said to allude to it are a cometimes with the addition of אל הַנָּץ; hence the Jews in polemics and Christians עוברי תלוי, and Christians עוברי תלוי,

"worshippers of the crucified ") and 377, both of which in A. V. are generally rendered "to hang" (2 Sam. xviii. 10; Deut. xxi. 22; Num. xxv. 4; Job xxvi. 7); for which oraupów occurs in the LXX (Esth. vii. 10), and crucifixerunt in the Vulg. (2 Sam. xxi. 6, 9). The Jewish account of the matter (in Maimonides and the Rabbis) is, that the exposure of the body tied to a stake by its hands (which might loosely be called crucifixion), took place after death (Lightfoot, Hor. Hebr. in Matt. xxvii. 31; Othonis Lex. Rab. s. v. Supplicia; Beland, Ant. ii. 6; Sir T. Browne, Vulg. F. rrors, v. 21). Even the placing of a head on a single upright pole has been called crucifixion. This custom of crucifixion after death (which seems to be implied in Deut. xxi. 22, 23), was by no means rare; men were first killed in mercy (Suet. Cas.; Herod. iii. 125; Plut. Cleom. 38). According to a strange story in Pliny (xxxvi 15, § 24), it was adopted by Tarquin, as a post mortem disgram, to prevent the prevalence of suicide. It seems on the whole that the Rabbis are correct in asserting that this exposure is intended in Scripture, since the Mosaic capital punishments were four (namely, th. | this view be correct, the opayethioras in Matt. sword, Ex. xxi., strangling, fire, l.ev. xx. and ston-ing, Deut. xxi.). Philo indeed says (de Leg. spec.; could hardly have been endured twice (see Puli 82

ishment, because it was the worst he could discover; but the passage in Deut. (xxi. 23) does not prove his assertion. Probably therefore the Jews 1 orrowed it from the Romans (Joseph. Ant. xx. 6, § 2; de Bell. Jud. ii. 12, § 6; Vit. 75, &c.), although there may have been a few isolated instances of it before (Joseph. Ant. xiii. 14, § 2).

It was unanimously considered the most horrible form of death, worse even than burning, since the "cross" precedes "burning" in the law-books (Lips. de Cruce, ii. 1). Hence it is called " crudelissimum teterrimumque supplicium" (Cic. Verr. v. 66), "extrema pœna" (Apul. de Ars. Asin. x.), "summum supplicium" (Paul. Sent. v. tit. xxi., dc.); and to a Jew it would acquire factitious horror from the curse in Deut. xxi. 23. Among the Romans also the degradation was a part of the infliction, since it was especially a servile supplicium (Tac. H. iv. 11; Juv. vi. 218; Hor. Sat. i. 3, 8, dc.; Plaut. passim), so that even a freedman ceased to dread it (Cic. pro Rab. 5); or if applied to freemen, only in the case of the vilest criminals, thieves, &c. (Joseph. Ant. xvii. 10, § 10; B. J. v. 11, § 1; Paul. Sent. v. tit. xxiii.; Lamprid. Alex. Ser. 23). Indeed exemption from it was the privilege of every Roman citizen by the jus civitutis (Cic. Verr. ii. 1, 3). Our Lord was condemned to it by the popular cry of the Jews (Matt. xxvii, 23, as often happened to the early Christians) on the charge of sedition against Cæsar (Luke xxiii. 2), although the Sanhedrim had previously condemned him on the totally distinct charge of blasphemy. Hundreds of Jews were crucified on this charge, as by Florus (Joseph. Bell. Jud. ii. 14, § 9) and Varus, who crucified 2000 at once (Ant. xvii. 10, § 10).

We now purpose briefly to sketch the steps of the punishment, omitting only such parts of it as have been already detailed under CRoss.

The scarlet robe, crown of thorns, and other insults to which our Lord was subjected were illegal, and arose from the spontaneous petulance of the brutal soldiery. But the punishment properly commenced with scourging, after the criminal had been stripped; hence in the common form of sentence we find "summove, lictor, despolia, verbera," &c. (Liv. i. 26). For this there are a host of authorities, Liv. xxvi. 13; Q. Curt. vii. 11; Luc. de Piscat. 2; Jer. Comment. ad Matt. xxvii. 26, &c. It was inflicted not with the comparatively mild virgas, but the more terrible flagellum (Hor. Sat. i. 3; 2 Cor. xi. 24, 25), which was not used by the Jews (Deut. xxv. 3). Into these scourges the soldiers often stuck nails, pieces of bone, &c., to heighten the pain (the udoris dorpayadorf mentioned by Athenseus, &c.; "flagrum pecuinis ossibus catenatum," Apul), which was often so intense that the sufferer died under it (Ulp. de Panis, 1. viii.). The scourging generally took place at a column, and the one to which our Lord was bound was seen by Jerome, Prudentius, Gregory of Tours, &c., and is still shown at several churches among the relics. In our Lord's case, however, this infliction seems neither to have been the legal scourging after the sentence (Val. Max. i. 7; Joseph. B. J. v. 28, ii 14, § 9), nor yet the examination by torture (Acts xxii. 24), but rather a scourging before the sentence, to excite pity and procure immunity from further punishment (Luke xxiii. 22; John xix. 1); and if

Synopsis, ad los.). How severe it was is indicated | (or posca, the common drink of Ron an soldiera in prophecy (Ps. xxxv. 15, Is. l. 6). Vossius considers that it was partly legal, partly tentative (Harm. Pass. v. 13).

The criminal carried his own cross, or at any rate a part of it (Plut. de iis qui sero, &c. 9; Artemid. Oneirocr. ii. 61; John xix. 17; " Patibulum ferat per urbem, deinde affigatur cruci," Plaut. Carsonar.). Hence the term Furcifer, = crossbearer. This was prefigured by Isaac carrying the wood in Gen. xxii. 6, where even the Jews notice the paralsel; and to this the fathers fantastically applied the expression in Is. ix. 6, "the government shall be upon his shoulder." They were sometimes scourged and goaded on the way (Plaut. Mostel. i. 1, 52). "In some old figures we see our Lord described with a table appendent to the fringe of his garment, set full of nails and pointed iron " (Jer. Taylor, Life of Christ, iii. xv. 2. "Herebas ligno quod tuleras," Cypr. de Pas. p. 50). [SIMON OF **ÚYRENE.**]

The place of execution was outside the city (" post urbem," Cic. Verr. v. 66; " extra portam, Plaut. Mil. Gl. ii. 4, 6; 1 K. xxi. 13; Acts vii. 58; Heb. xiii. 12; and in camps "extra vallum "), sften in some public road (Quinct. Decl. 275) or other conspicuous place like the Campus Martius (Cic. pro Rabirio), or some spot set apart for the purpose (Tac. Ann. xv.). This might sometimes be a hill (Val. Max. vi.); it is however merely tradition to call Golgotha a hill; in the Evangelists it is called toxos [CALVARY]. Arrived at the place of execution, the sufferer was stripped naked (Artemid. Oneirocr. ii. 58), the dress being the perauisite of the soldiers (Matt. xxvii. 35; Dig. xlviii. 20, 6); possibly not even a cloth round the loins was allowed him; at least among the Jews the rule was "that a man should be stoned naked," where what follows shows that "naked " must not be taken in its restricted sense. The cross was then driven into the ground, so that the feet of the condemned were a foot or two above the earth (in pictures of the crucifixion the cross is generally much too large and high), and he was lifted upon it ("agere," "excurrere," " tollere," " ascendere in crucem ; " Prudent. mepl oreq; Plaut. Mostel. "Crucisalus:" Id. Bacch. ii. 3. 128; aviyov, fyor, fyor els Expor ground, and then lifted with it, to which there seems to be an allusion in a lost prophecy quoted by Barnabes (Ep. 12), δταν ξύλον κλιθή και αναστή (Pearson on Creed, Art. iv.). The former method was the commoner, for we often read (as in Esth. vii. 10. &c.) of the cross being erected beforehand in terrorem. Before the nailing or binding took place (for which see CROSS), a medicated cup was given out of kindness to confuse the senses and deaden the pangs of the sufferer (Prov. xxxi. 6), usually of olvos έσμυρμισμένος οτ λελιβανωμένος, as among the Jews (Lightfoot, Hor. Hebr. ad Matt. arvii.), because myrrh was soporific. Our Lord refused it that his senses might be clear (Matt. xxvii. 34; Mark xv. 23. Maimon. Sanhed. xiii.). St.

Matt. calls it bios mera xohis (??. T), an expresnion used in reference to Ps. lxix. 21, but not strictly accurate. This mercifully intended draught must not be confounded with the spongeful of vinegar

· The malefactors (κακούργοι) crucified with the Restour ware not " thie res " (shistra) as in the A. V., thon between the terms (John z. 9). See TPUEVEN.

Spart. Hudr.; Plaut. Mil. Gl. iii. 2, 28), which was put on a hyssop-stalk and offered to our Lord in mocking and contemptuous pity (Matt. xxvii 48; Luke xxiii. 36); this He tasted to allay the agonies of thirst (John xix. 29).

Our Lord was crucified between two "thieves" a or "malefactors" (then so common in Palestine, Joseph. B. J. ii. 6, &c.), according to prophecy (Is. liii. 12); and was watched according to custom by a party of four soldiers (John xix. 23) with their centurion (rovor wola, Matt. xxvii. 66; " mike qui cruces assurabat," Petr. Sut. iii. 6; Plut. Vit. Cleom. c. 38), whose express office was to prevent the surreption of the body. This was necessary from the lingering character of the death, which sometimes did not supervene even for three days, and was at last the result of gradual benumbing and starvation (Euseb. viii. 8; Sen. Prov. 8). But for this guard, the persons might have been taken down and recovered, as was actually done in the case of a friend of Josephus, though only one survived out of three to which the same Beparela enuereration was applied (Vit. c. 75). Among the Convulsionnaires in the reign of Louis XV, women would be repeatedly crucified, and even remain on the cross three hours; we are told of one who underwent it 23 times (Encycl. Metr. s. v. Cross); the pain consisted almost entirely in the nailing, and not more than a basinful of blood was lost. Still we cannot believe from the Martyrologies that Victorinus (crucified head downwards) lived three days, or Timotheus and Maura nine days. Fracture of the legs (Plaut. Pan. iv. 2, 64) was especially adopted by the Jews to hasten death (John xix. 31), and it was a mitigation of the punishment, as observed by Origen. But the unusual rapidity of our Lord's death was due to the depth of his previous agonies (which appears from his inability to bear his own cross far) and to his mental anguish (Schoettgen, Hor. Hebr. vi. 3; De Pass. Messia), or may be sufficiently accounted for simply from peculiarities of constitution. There is no need to explain the "giving up the ghost" as a miracle (Heb. v. 7?), or say with Cyprian, "Prevento carnificis officio, spiritum sponte dimisit" (adr. De-metr.). Still less can the common cavil of infidelity be thought noteworthy, since had our Lord been in a swoon the piercing of his pericardium (proved by the appearance of lymph and blood) would have insured death. (See Eschenbach. Opusc. Med. de Servatore non apparenter sed vere mortuo, and Gruner de Morte Christi non synoptical, quoted by Jahn in the Arch. Bibl.) Pilate expressly satisfied himself of the actual death by questioning the centurion (Mark 1v. 44); and the omission of the breaking of the legs in this case was the fulfillment of a type (Ex. xii. 46). Other modes of hastening death were by lighting fires under the cross (hence the nicknames Sar mentitii and Semaxii, Tert. Apolog. c. 50), or let ting loose wild beasts on the crucified (Suet. Ner. 49).

Generally the body was sufficred to rot on the cross (Cic. Tusc. Q. i. 43; Sil Ital. viii. 466), by the action of sun and rain (Herod. iii. 12), or to be devoured by birds and beasts (Apul. de Aur. Asia c. 6; Hor. Ep. i. 16, 48; Juv. xiv. 77). Sepultan

but "robbers " (Apgrai). The Greek makes a dist

Digitized by Google

was generally therefore forbidden, though it might be granted as a special favor or on grand occasions (Ulp. l. ix. De off. Pascons.). But in consequence of Deut. xxi. 22, 23, an express national exception was made ir, favor of the Jews (Matt. xxvii. 58; cf. Joseph. R. J. iv. 5, § 2).

Having thus traced the whole process of crucifixion, it only remains to speak of the manner of death, and the kind of physical suffering endured which we shall very briefly abridge from the treatise of the physician Richter (in Jahn's Arch. Bibl.). These are, 1. The unnatural position and violent tension of the body, which cause a painful sensation from the least motion. 2. The nails being driven through parts of the hands and feet which are full of nerves and tendons (and yet at a distance from the heart) create the most exquisite anguish. 8 The exposure of so many wounds and lacerations brings on inflammation, which tends to become gangrene, ar-l every moment increases the poignancy of suffering 4. In the distended parts of the body more blood flows through the arteries than can be carried back into the veins: hence too much blood finds its way from the sorta into the head and stomach, and the blood-vessels of the head become pressed and swollen. The general obstruction of circulation which ensues causes an internal excitement, exertion, and anxiety, more intolerable than death itself. 5. The inexpressible misery of gr.id-ually increasing and lingering anguish. To all which we may add, 6. Burning and raging thirst.

This accursed and awful mode of punishment was happily abolished by Constantine (Sozom. i. 8), probably towards the end of his reign (see Lips. de Cruce, iii. 15), although it is curious that we have no more definite account of the matter. " An edict so honorable to Christianity," says Gibbon, "deserved a place in the Theodosian code, instead of the indirect mention of it which seems to result from the comparison of the 5th and 18th titles of the 9th book " (ii. 154, note)

An explanation of the other circumstances attending the crucifixion belongs rather to a commentary than a dictionary. On the types and prophecies of it, besides those adduced, see Cypr. Testim. ii. 20. On the resurrection of the saints, see Lightfoot ad Matt. xxvii. 52 (there is a monograph by Gebaverius - Dissert. de Resur. sanctorum cum Christo). On other concomitant prodigies, see Schoettgen, Hor. Hebr. et Talmud. vi. 3, 8. [DARK-NESS; CROSS.] The chief authorities are quoted in the article, and the ancient ones are derived in part from Lipsius; of whose most interesting treatise, De Cruce, an enlarged and revised edition, with notes, would be very acceptable. On the points in which our Lord's crucifixion differed from the ordinary Jewish customs, see Othonis Lex. Rab-Sinicum, s. v. Supplicia; Bynæus de Morte J. Christi; Vossius, Harm. Passionis; Carpzov, Aporrat. Crit. p. 591 ff. &c. [See also Friedlieb, Archäologie der Leidensgeschichte, Bonn, 1843; Stroud, Physical cause of the Death of Christ, Lond. 1847; and for very full references to the Sterature of every part of the subject, Hase, Leben lesu, 5º Aufl. Leipz. 1865. - A.] F. W. F.

* The question, whether the ject of Jesus were salled to the cross, has a bearing on the realizy of uis death and resurrection; for, if they were, it sannot reasonably be supposed that, having been restored, without a miracle, from a merely arparent death, he was able to walk the same day many

feet would have surely prevented the journey to Emmans. Influenced, it appears, by this consid-eration, Dr. Paulus published an Essay in 1792, asserting that the feet of persons crucified were not nailed to the cross, but rather bound to it by cords. Forty years later, in reply to arguments against this view, he attempted to show that the feet were not even bound to the cross, but suffered to hang down freely. The point in question is one of considerable interest and a brief survey of the evidence which relates to it is therefore inserted. (1.) The narrative of Luke (see xxiv. 39), seems to imply that the feet, as well as the hands, of Jesus were nailed to the cross. For, according to this narrative, when the two disciples whom Christ had joined on their way to Emmaus had returned to Jerusalem and were reporting to the eleven what they had seen and heard. Jesus himself stood in the midst of the astonished group, saying: " Peace be unto you"; and then, for the double purpose of enabling them to identify fully his person, and ascertain that his body was real, he added: "Ser my hands and my feet, that it is I myself: handle me and see; for a spirit hath not flesh and bones, as ye see me have." Had it been the sole aim of Christ to convince his disciples that they were not gazing at a mere apparition, the words, "handle me and see; for a spirit hath not flesh and bones, as ye see me have," would have been quite sufficient; for the act of grasping his hand would have afforded evidence of his possessing a genuine body, as complete as could have been gained by touching his feet also. But if he wished to convince them that they were looking once more upon their Lord, who had risen with his own body from the dead, it was natural for him to call their attention to those parts of his body which would enable them most surely to identify it, that is, to those which bore the marks of his recent crucifizion. Hence the fact that he showed them his hands and his feet affords evidence that the marks of his peculiar death were visible in them both. (See Meyer, Bleek, Alford, in loc.) Moreover, the narrative of John (see xx. 19 ff.), which probably describes the same meeting of Jesus with his disciples, confirms the interpretation now given to the words preserved by Luke. For, John declares that Christ "showed unto them both (sal, repeated, Tisch.) his hands and his side "; evidently, as appears from the whole tenor of the account, that they might identify him beyond a doubt by the known marks of violence on his body, and thus assure themselves of his actual resurrection. That John does not mention the feet of Christ, is surely no evidence that they were not shown for the same purpose as his hands and his aide. (2.) Justin Martyr twice refers to the nailing of Christ's feet as a fulfillment of the prophecy in Ps. xxii. 17. (See Apol. i. c. 35; Disk. c. Tryph. c. 97.) In the former passage he says: "But the sentence, 'they pierced my hands and my feet,' was on account of the nails fixed in his hands and feet on the cross "; and in the latter: " In the twenty-second Psalm David did thus typically speak of his cross and passion: 'They pierced my hands and my feet.' For when they crucified him they pierced his hands and his feet by driving nails into them." Justin distinctly affirms that the feet as well as the hands of Christ were naded to the cross, and that by this act a prediction of the O. T. respecting him was fulfilled. But he does not intimate that his srucifizion difwhiles through a hilly country. The wounds of his fered in any respect from the same punishment

516 CRUCIFIXION

recognized the nailing of his feet as a peculiarity. he would have been likely to call attention to it as aggravating his suffering. He may have been misled by the Septuagint version as to the meaning of the verse quoted from the 22d Psalm, but he would hardly have ventured to appeal, without explanation, to its fulfillment in the manner of Christ's death, had it not been customary in his own day to nail the feet of persons crucified to the CTOSS. That he was acquainted with the process of crucifizion by the Romans may be inferred from his minute description of a cross (Dial. c. Tryph. c. 91), and from his general intelligence. (3.) Tertullian, who also lived before this kind of punishment was prohibited, speaks of the nailing of the feet in crucifixion. (See Adv. Marc. iii. 19). He refers to the twenty-second Psalm as "containing the whole passion of Christ," and quotes the 17th verse: "Foderunt manus meas et pedes," adding the words, "que propria atrocia crucis." These words show that Tertullian regarded nailing the hands and feet as a characteristic and most dreadful feature of death by the cross. And it is not easy to believe that such writers as Justin Martyr and Tertullian were unacquainted with this method of punishment, so frequent in their times, or that they were likely, in refuting adversaries, to bring forward a passage from the O. T. as prophetic of Christ's death, the words of which were but half fulfilled in an ordinary crucifixion. (Compare Winer, Realto. i. 679.) (4.) A passage in Plautus (Mostellaria, ii. 1) appears to favor the view that the feet were nailed to the cross. It is the language of a slave on the approach of his master, against whom he had committed many offenses during his absence. He cries out in fear of the punishment which might be inflicted on himself: -

"Ego dabo ei talentum, primus qui in crucem excucurrerit :

Sed en lege, ut affigantur bis pedes, bis brachia."

The unusual severity of punishment is here expressed by the word bis; the structure of the sentence does not point to the nailing of the feet as peculiar. (5.) Reference is made by several writers of the fifth century to certain nails which the Empress Helena found with the true cross and sent to Constantine her son. (Socrates, H. E. i. 17; Theodoret, H. E. i. 18; Sozomen, H. E. ii. 1; Rufinus, H. E. ii. 8; Ambrose, Oratio de obitu Theodos. 47.) But the statements of these writers are apparently contradictory, and certainly of little value. (6.) The following classical writers have also been referred to on the point in question. Xenophon Ephesius (iv. 2) asserts that in Egypt the hands and feet were simply bound to the cross, but this only proves that the Egyptian method of crucifixion differed from the Roman. Lucan (Phar. vi. 543 ff.) mentions the nailing of the hands and the use of cords, but he does not aim to give a full account of crucifixion, and the cords may have been used to bind the body more firmly to the cross. (See Winer. Realw. i. 678.) In the mock crucifixion of Amor. described by Ausonius (Idyl. viii. 56 ff.), the propria atrocia crucis would have been out of place, and no one can be surprised that the victim's bands and fert are represented as merely bound to the tree. And though the dialogue of Lucian (Prometh. i. 2) speaks only of nailing the hands, it describes no proper crucifizion, and hence gives se trustworthy evidence in respect to the usual Arabs eat their dinner in the evening, and it b

CRUSE

as it was usually inflicted upon criminals. Had he | method. The nailing of the feet of Jesus to tas cross may therefore be said to rest on satisfactory evidence; but whether a single nail was drive through both feet, or they were fastened separately to the cross, cannot be ascertained with any degree of certainty. A H

> CRUSE, a word employed in the A. V., appa rently without any special intention, to translate three distinct Hebrew words.

1. Trappachath. MODY (from MDY. a root with the idea of width; comp. ampulla, from amplus). Some clew to the nature of this vessel is perhaps afforded by its mention as being full of water at the head of Saul when on his night expedition after David (1 Sam. xxvi. 11, 12, 16), and also of Elijah (1 K. xix. 6). In a similar case in the present day this would be a globular vessel of blue porous clay - the ordinary Gaza pottery about 9 inches in diameter, with a neck of about 3 inches long, a small handle below the neck, and opposite the handle a straight spout, with an orifice about the size of a straw, through which the water is drunk or sucked. The form is common also in Spain, and will be familiar to many from pictures of Spanish life. A similar globular vessel probably contained the oil of the widow of Zarephath (1 K. xvii. 12, 14, 16). For the "box" or "horn" in which the consecrated oil was carried on special occasions, see OIL.

2. The noise which these vessels make when emptied through the neck is suggestive of the second term, Bakbuk, TAL, probably like the Greek bombulos, BóµBuAos, an onomatopoetic word. This is found but twice - a "cruse of houey," 1 K. xiv. 3; and an "earthen bottle," Jer. xix. 1.

3. Apparently very different from both these is the other term, Tzelachah, コロジョ (found also in the forms גל הית and צל מווי), from a root (צלה) signifying to sprinkle; or perhaps from

to ring, the root of the word for cymbal. This was probably a flat metal saucer of the form still common in the East. It occurs 2 K. ii. 20, "cruse; "'xxi. 13, "dish;" 2 Chr. xxxv. 13, "pans;" also Prov. xix. 24, xxvi. 15. where the figure is obscured by the choice of the word "bosom." G.

* What is related of "the cruse of water" placed by Saul's "bolster" as he slept in the cave, which David so quietly removed without awaking him (1 Sam. xxvi. 12), and of "the cruse of water at the head" of Elijah as "he lay and slept beneath a juniper-bush" (1 Kings xix. 5, 6), accords perfectly, says Thomson, with the habits of Eastern life at this day. "No one ventures to travel over the deserts there without his cruse of water; and it is very common to place one at the bolster, so that the owner can reach it during the night. The

Digitized by Google

he quantity of water which they drink is enormous. The cruse is, therefore, in perpetual demand." (Lund and Book, ii. 21.)

CRYSTAL, the representative in the A. V. of the Hebrew words zecacith (173737) and kerach

(קרח).

1. Zecucith (Jakos: vitrum) occurs only in Job xxviii. 17, where wisdom is declared to be more valuable than "gold and the crystal." Notwithstanding the different interpretations of "rock erystal," "glass," " adamant," &c., that have been assigned to this word, there can, we think, be very fittle doubt that "glass" is intended. The old versions and paraphrases are in favor of this interpretation. The Targum has zegougitha, by which the Talmudists understand "glass." The Syriac has zagugitto; the Arabic zujaj, i. e. "glass." Schultens (Comment. in Job. 1. c.) conjectures that

the words zahab uzecucith (TTCFCTC) are a hendiadys to denote "a valuable glass or crystal goblet. 'or "a glass vessel gilt with gold," such a one perhaps as that which Nero is reported to have broken to pieces in a fit of anger (Pliny, II. N. xxxvii. 2). Cary (Job L c.) translates the words "golden glass;" and very aptly compares a passage in Wilkinson (Anc. Eyypt. ii. 61, ed. 1854), who, speaking of the skill of the Egyptians in making glass, says " they had even the secret of introducing gold between two surfaces of glass, and in their bottles a gold band alternates within a set of blue, green, and other colors." It is very probable that the zecúcith of Job (l. c.) may denote such a work of art as is referred to in this quotation. [GLASS.]

2. Kerach (*kpbστaλλos*: crystallum) occurs in aumerous passages in the O. T. to denote "ice," "frost," &c.; but once only (Ez. i. 22), as is generally understood, to signify " crystal : " " And the likeness of the firmament was as the color of the magnificent crystal." The ancients supposed rock-crystal to be merely ice congealed by intense cold; whence the Greek word κρύσταλλος, from novos, "cold" (see Pliny, N. H. xxxvii. 2). The similarity of appearance between ice and crystal raused no doubt the identity of the terms to express these substances. The A. V., following the Vulg., translates the epithet (NT) "terrible " in Ez. (l. c.); the word would be better rendered "solendid." It has the same meaning as the Intin spectabilis. The Greek κρύσταλλos occurs in Rev. iv. 6, xxii. 1. It may mean either "ice" or "crystal." Indeed there is no absolute necessity tc depart from the usual signification of the Hebrew bernch in Ez. (l. c.). The upper vault of heaven may well be compared to "the astonishing brightnuss of ice" (see Harris, Nat. Hist. of Bible, art.

CUBIT. [MEASURES.]

Crystal).

CUCKOO (河口燈, shackaph [leanness]: idoos: larus). There does not appear to be any uthority for this translation of the A. V.; the deb. word occurs only in Lev. xi. 16; Deut. xiv. .5, as the name of some unclean bird. Bochart (Hieros. iii. 1) has attempted to show that shachaph isnotes the Cepphus. The (sendos) of Aristotle Anim. Hiet. viii. 5, § 7; ix. 23, § 4), Nica...ler Alexipharm. 165), and other Greek writers. has for sure as articles of food in the Arab marines on the seen, with sufficient reason we think, identified by coast.

W. H.

enerally of such a nature as to create thirst, and Schneider with the storm-petrel (Thalassidroma pelagica), the Procellaria pelagica of Linnsus The Scholiast on Aristophanes (Plutus) describes the cepphus as a light kind of gull. Suidas, under the word *kémpos*, says, "It is a bird like a gull light of body, and sails over the waves." The notion held by the ancients that the cepphus lived on the foam of the sea, may perhaps be traced to the habit the petrels have of seeking their food, dc., in the midst of an agitated and frothy sea; the folly ascribed to the bird, whence the Greek verb Kenpoopan, " to be easily deceived " (see LXX in Prov. vii. 22), may have some foundation in the fact that these birds when on the nest will allow themselves to be taken by the hand. The etymology of the Hebrew word points to some "slender" bird. It is very improbable, however, that this diminutive bird, which would be literally but a mouthful, is signified by the shachaph; and perhaps therefore, as Mr. Tristram suggests to us. some of the larger petrels, such as the Puffinus cinereus and P. anglorum (shearwater), which abound in the east of the Mediterranean and which are similar in their habits to the storm-petrel, may be denoted by the Hebrew term.^a Of the Laridæ the Larus fuscus and the L. argentatus are two common species of Palestine. W. H.

> CUCUMBERS (TY), kishshuim : ol olicuot: cucumeres). This word occurs once only, in Num. xi. 5, as one of the good things of Egypt for which the Israelites longed. There is no doubt as to the meaning of the Hebrew word, which is found with a slight variation in the Arabic, Syriac. Ethiopic, &c., to denote the plant now under consideration (see Celsius, Hierob. ii. 247). Egypt produces excellent cucumbers, melons, &c. [MELON], the Cucumis chate being, according to Hasselquist (Trav. p. 258), the best of its tribe yet known. This plant grows in the fertile earth around Cairo after the inundation of the Nile, and not elsewhere in Egypt. The fruit, which is somewhat sweet and cool, is eaten, says Hasselquist, by the grandees and Europeans in Egypt as that from which they have least to apprehend. Prosper Alpinus (Plunt Egypt. xxxviii. p. 54) speaks of this cucumber as follows: "The Egyptians use a certain kind of cucumber which they call chate. This plant does not differ from the common kind, except in size. color, and tenderness; it has smaller, whiter, softer and rounder leaves, and the fruit is longer and greener than ours, with a smooth soft rind, and more easy of digestion." The account which Forskål (Flor. Ægypt. p. 168) gives of the Cucumis chate, which he says is called by the Araba Abdellavi or Adjur, does not agree with what Hasselquist states with regard to the locality where it is grown, this plant being, according to the testimony of the first-named writer, "the commonast fruit in Egypt, planted over whole fields." The C chate is a variety only of the common melon (Cmelo); it was once cultivated in England and called "the round-leaved Egyptian melon;" but it is rather an insipid sort. Besides the Cucumis chate, the common cucumber (C. sativus), of which the Arabs distinguish a number of varieties, is common in Egypt. This grows with the water-melons; the poor people boil and eat it with vinegar; the richer

a f cinercus and P. anglorum are both exposed

518 CUMMIN

ople fill it with flesh and aromatics, and make a kind of puddings, which, says Hasselquist (p. 257), ant very well. "Both Cucumis chate and C. satious," says Mr. Tristram, "are now grown in great quantities in Palestine: on visiting the Arab school in Jerusalem (1858) I observed that the dinner which the children brought with them to school consisted, without exception, of a piece of barley cake and a raw cucumber, which they eat rind and all.

The prophet Isaiah (i. 8) foretells the desolation that was to come upon Judah and Jerusalem in these words: "The daughter of Zion is left as a cottage in a vineyard, as a lodge in a garden of cucumbers, as a besieged city." The cottage or lodge here spoken of is a rude temporary shelter, erected in the open grounds where vines, cucumbers, gourds, &c., are grown, in which some lonely man or boy is set to watch, either to guard the plants from robbers, or to scare away the foxes and jackals from the vines. Dr. Thomson (Land and Book, ii. 11) well illustrates this passage of Scripture, and brings out its full force. The little woodcut which he gives of the lodge at Butaiha represents such a shelter as is alluded to above: by and by, when the crop is gathered and the lodge forsaken, the "poles will fall down or lean every way, and the green brighs with which it is shaded will be scattered by the winds, leaving only a ragged sprawling wreck - a most affecting type of utter desolation."

It is curious to observe that the custom of keeping off birds, &c., from fruit and corn by means of a scarecrow is as old as the time of Baruch (vi. 70) [or Epist. of Jer. 70]: "As a scarecrow ($\pi\rho c\beta a\sigma$ - is represented in the accompanying drawing: *ndviov*) in a garden of cucumbers keepeth nothing, so are their gods of wood," &c.

w. н.

CUMMIN [rather CUMIN] (722: aburrow: cyminum), one of the cultivated plants of Palestine, mentioned by Isaiah (xxviii. 25, 27) as not being threshed in the ordinary way in which wheat was threshed, but with a rod; and again by our Saviour Modern Egyptian drinking-cups, one-fifth of the real size. (Lane

as one of the crops of which the Scribes and Pharisees paid tithe. It is an umbelliferous plant something like fennel (Cuminum satirum, Linn.). The seeds have a bitterish warm taste with an aromatic flavor. It was used in conjunction with salt as a sauce (Plin. xix. 8). The Maltese are said to grow cummin at the present day, and to thresh it in the nanner described by Isaiah. W. D.

* CUNNING originally meant "skillful," "knowing," and has this sense in Gen. xxv. 27 (where Esau is called a "cunning hunter"); in Exod. xxvi. 1 ("cunning work," said of figures of the Cherubim); in 1 Sam. xvi. 16 ("cunning player " on the harp) and other passages (A. V.). ч

* CUNNINGLY (2 Peter i. 16). [CUNNING.]

CUP. The chief words rendered "cup" in the א. V. are, 1. בלם: zorfpior: calix ; 2. השורת .

mly in plural : משטיאל הוא crateres ; 8. אַבִיע : cordu: scyphus. See also, further, words BABIN and BOWL. The cups of the Jews, whether of metal or earthenware, were possibly borrowed, in point of shape and design. from Egypt and from the Phoenicians, who were celebrated in that branch workmanship (ת xxiii. 743; Od. iv. 615, 618). cumuchs (כביסריס), and from Eastern enstow

CUP-BRARER

Egyptian cups were of various shapes, either having handles or without them. In Solomon's time all his drinking vessels were of gold, none of silver (J K. x. 21). Babylon is com pared to a golden cup (Jer. li. 7)

Assyrian cups from Khorsabad and Nimroud may be seen figured in Layard (Nin. ii. 303, 804; Nin. and Bab. 186, 190, 192), some perhaps of Phoenician workmanship, from which source both Solomon and the Assyrian monarch possibly derived both their workmen and the works themselves. The cups and other vessels brought to Habylon by Nebuchadnezzar

Assyrian cup with handle. (Layard, may thus have been of Phoeniii. 808.) cian origin (Dan. v. 2).

On the bas-reliefs at Persepolis many figures are represented bearing cups or vases which may fairly be taken as types of the vessels of that sort described in the book of Esther (Esth. i. 7; Amyrian drinking- Niebuhr, Voyage, ii. 106; Char-

cup. (Layard, ii. din, Voyages, viii. p. 268; Pl. 304.) Iviii.). The great layer, or "sea," was made with a rim like the rim of a cup

(Cos), "with flowers of lilies" (1 K. vii. 26), a form which the Persepolitan cups resemble (Jahn, Arch. § 144). The common form of modern Oriental cupa

The use of gold and silver cups was introduced into Greece after the time of Alexander (Athen. vi. 229, 30, xi. 446, 465; Birch, Anc. Pott. ii. 109).

The cups of the N. T., northpia, were often no doubt formed on Greek and Roman models. They were sometimes of gold (Rev. xvii. 4). Dict. of H. W. P. Antiq. art. Patera.

* "Cup" or "bowl" would undoubtedly be more correct than "vial" (A. V.), as the rendering of $\phi_{id\lambda\eta}$ in the Apocalypse. The term designates a vessel with breadth rather than depth, and whether used of the censer-dish (Rev. v. 8), or of the cup with its contents as the emblem of punishment (Rev. xv. 7, xvi. 2, &c.), does not correspond to our word rink, as at present employed. н.

CUP-BEARER (TIDE: olvoxoos: pincerna), an officer of high rank with Egyptis 1, Persian, Assyrian, as well as Jewish monarchs. The chief cup-bearer, or butler, to the king of Egypt was the means of raising Joseph to his high position (Gen. xl. 1-21, xli. 9). Rabshakeh, who was sent by Sennacherib to Hezekiah, appears from his name to have filled a like office in the Assyrian court (2 K. xviii. 17; Ges. p. 1225), and it seems probable. from his association with Rab-saris, chief of the

a general, that he was, like him, an eunuch (Ges. | of "iewarding svil to nim who was at peace with p. 978). Herod the Great had an establishment him "- an act in which no Oriental of ancient or of sumuchs, of whom one was a cup-bearer (Joseph. Ant. xvi. 8, 1). Nehemiah was cup-bearer to Artaxerxes Longimanus king of Persia (Neh. i. 11, ii. 1). Cup-bearers are mentioned among the attendants of Solomon (1 K. x. 5; comp. Layard, N.a. ii. 324, 326). H. W. P. Nin. ii. 324, 328).

CURTAINS. The Hebrew terms translated in the A. V. by this word are three:

1. I'ert'eth, ידער . the ten "curtains" of fine linen, &c., each 28 cubits long and 4 wide, and also the eleven of goats' hair, which covered the Tabernacle of Moses (Ex. xxvi. 1-13, xxxvi. 3-17) The charge of these curtains and of the other textile fabrics of the Tabernacle was laid on the Gershonites (Num. iv. 25). Having this definite meaning, the word came to be used as a synonym for the Tabernacle - its transitoriness and slightness; and is so employed in the sublime speech of David, 2 Sam. vii. 2 (where "curtains" should be "the curtain"), and 1 Chr. xvii. 1. In a few later instances the word bears the more general meaning of the sides of a tent; as in the beautiful figure of Is. liv. 2 (where "habitations" should be "tabernacles," כושכנות, poetic word for

"tents"); Jer. iv. 20, x. 20 (here "tabernacle'

and "tent" are both one word, להלא = tent);

l's. civ. 2 (where "stretch," כמן, is the word usually employed for extending a tent). Also specially of nomadic people, Jer. xlix. 29; Hab. iii. 7; Cant. i. 5 (of the black hair-cloth of which the tents of the real Bedoueen are still composed).

2. Masac, TOO: the "hanging" for the doorway of the tabernacle, Ex. xxvi. 36, 37, xxxv. 15, xxxvi. 37, xxxix. 38, xl. 5; Num. iii. 25, iv. 25 and also for the gate of the court round the tabernacle, Ex. xxvii. 16, xxxv. 17, xxxviii. 18, xxxix. 40, zl. 33; Num. iii. 26, iv. 26. Amongst these the rendering "curtain" occurs but once, Num. iii. 26; while "hanging" is shared equally between

Masác and a very different word - Kelá'l, 'J The idea in the root of Masac seems to be of shield-

ing or protecting (700, Ges. p. 951). If this be so, the Masac may have been not a curtain or veil, out an awning to shade the entrances - a thing astural and common in the fierce sun of the East (see one figured in Fergusson's Nineveh and Persepolis, p. 184). But the nature of this and the other textile fabrics of the tabernacle will be best examined under TABERNACLE.

Besides "curtain" and "hanging," Masac is rendered "covering" in Ex. xxxv. 12, xxxix. 34, 1. 81; Num. iv. 5; 2 Sam. xvii. 19; Ps. cv. 39; la mii 8.

3. Dik 77. There is nothing to guide us to the meaning of this word. It is found but once (is. xl. 22), in a passage founded on the meraphor f a tent.

CUSH (23) [see the word below]: Xouri; [7at. Sin. - Jet:] Æthiopis, and Chusi), a Benjanite mentioned only in the title to Ps. vii. There te every reason to believe this title to be of great antiquity (Ewald. Paalmen, p. 9). Cush was probybly a follower of Saul, the head of his tribe, and dise of the Egyptians was a sacred Egypt watered and sought the friendship of David for the purpose by a sacred Nile; the Arabs have told of the ter-

modern times would see any shame, but, if successful, the reverse. Happily, however, we may gather from verse 15 that he had not succeeded.

* The antiquity of the name has been less questioned than its application. The Jewish interpreters very generally regard the name as symbolic: Ethiopian, black in heart and character. But among those who accept this view opinions differ as to the person thus enigmatically designated. Some suppose Cush to be Shimei who cursed David when he fled from Absalom (2 Sam. xvi. 5 ff.); and others suppose him to be Saul, chiefly because the Psalm seems to refer to the times of Saul rather than those of Absalom. The latter is Hengstenberg's view (Die Psalmen, i. 138 ff.), and also Alexander's (Psalms, i. 49). Rosenmüller argues against both opinions and abides by the name as that of some partisan of Saul, and an enemy and calumnizator of David, otherwise unknown (Scholia in Psalmos H. redacta, iii. 56).

CUSH (2013 [dark-colored, Fürst; perh. an assembly, people brought together, Ges., 6. Aufl.]: Xobs: Chus (Gen. x. 6, 7, 8; 1 Chr. i. 8, 9, 10);

Aldionia, Aldiones: Æthiopin ; Cush'ire, WD : Alelow: Æthiops; pl. בושים, בושים; fem.

תרשית), the name of a son of Ham, apparently the eldest, and of a territory or territories occupied by his descendants. (1.) In the genealogy of Noah's children Cush seems to be an individual, for it is said "Cush begat Nimrod" (Gen. z. 8; 1 Chr. i. 10). If the name be older than his time he may have been called after a country allotted to him. The following descendants of Cush are enumerated: his sons, Seba, Havilah, Sabtah or Sabta, Raamah, and Sabtechah or Sabtecha; his grandsons, the sons of Raamah, Sheba and Dedan; and Nimrod, who, as mentioned after the rest, seems to have been a remoter descendant than they, the text not necessarily proving him to have been a son. The only direct geographical information given in this passage is with reference to Nimrod, the beginning of whose kingdom was in Babylonia. and who afterwards went, according to the reading which we prefer, into Assyria, and founded Nineveh and other cities. The reasons for our prefer-ence are, (1) that if we read "Out of that land went forth Asshur," instead of "he went forth [into] Asshur," i. e. Assyria, there is no account given but of the "beginning" of Nimrod's kingdom; and (2) that Asshur the patriarch would seem here to be quite out of place in the genealogy.

(2.) Cush as a country appears to be African in all passages except Gen. ii. 13. We may thus dis tinguish a primeval and a post-diluvian Cush. The former was encompassed by Gihon, the second river of Paradise. It would seem, therefore, to have been somewhere to the northward of Assyria. It is possible that Cush is in this case a name of a period later than that to which the history relates, but it seems more probable that it was of the earliest age, and that the African Cush was named from this older country. Most ancient nations thus connected their own lands with Paradise, or with primeval seats. In this manner the future Para-

sometimes seen in their deserts; the Greeks located the all-destroying floods of Ogyges and Deucalion in Greece; and the Mexicans seem to have placed a similar deluge in America; all carrying with them their traditions and fixing them in the territories where they established themselves. The Cushan mentioned in Hab. (iii. 7) has been thought to be an Asiatic post-diluvian Cush, but it is most reasonable to hold that Cushan-rishathaim is here intended [CUSHAN]. In the ancient Egyptian inscriptions Ethiopia above Egypt is termed Keesh or Kesh, and this territory probably perfectly corresponds to the African Cush of the Bible. The Cushites however had clearly a wider extension, like the Ethiopians of the Greeks, but apparently with a more definite ethnic relation. The settlements of the sons and descendants of Cush mentioned in Gen. x. may be traced from Meroë to Babylon, and probably on to Nineveh. We have not alone the African Cush, but Seba appears to correspond to Meroë, other sons of Cush are to be traced in Arabia [ARABIA, RAAMAII, &c.], and Nimrod reigned in Babylonia, and seems to have extended his rule over Assyria. Thus the Cushites appear to have spread along tracts extending from the higher Nile to the Euphrates and Tigris. Philological and ethnological data lead to the same conclusion. There are strong reasons for deriving the non-Semitic primitive language of Babylonia, variously called by scholars Cushite and Scythic, from an ante-Semitic dialect of Ethiopia, and for supposing two streams of migration from Africa into Asia in very remote periods; the one of Nigritians through the present Malayan region, the other and later one. of Cushites, "from Ethiopia properly so called, through Arabia, Babylonia, and Persia, to Western India ' (Genesis of the Earth, dc., pp. 214, 215). Sir H. Rawlinson has brought forward remarkable evidence tending to trace the early Babylonians to Ethiopia ; particularly the similarity of their mode of writing to the Egyptian,^a and the indication in the traditions of Babylonia and Assyria of "a connection in very early times between Ethiopia, Southern Arabia, and the cities on the Lower Euphrates," the Cushite name of Nimrod himself as a deified hero, being the same as that by which Meroë is called in the Assyrian inscriptions (Rawlinson's Herod. i. 442, 443). History affords many traces of this relation of Babylonia, Arabia, and Ethiopia. Zerah the Cushite (A. V. "Ethiopian") who was defeated by Asa, was most probably a king of Egypt, certainly the leader of an Egyptian army. The dynasty then ruling (the 22d) bears names that have caused it to be supposed to have had a Babylonian or Assyrian origin, as Sheshonk, Snishak, Sheshak; Naumret, Nimrod; Tekrut, Teklut. Tiglath. The early spread of the Mizraites illustrates that of the Cushites [CAPHTOR]: it may be considered as a part of one great system of migrations. On these grounds we suppose that these Hamite races, very soon after their arrival in Africa, began to spread to the east, to the north, and to the west; the Cushites establishing settlements along the southern Arabian coast, on the Arabian shore of the Persian Gulf and in Babylonia, and thence onward to the Indus, and probably northward to Nineveh; and the Mizraites spreading along the south and east shores of the Mediterranean, on

a fileogra; hic writing seems characteristic of Tumain nations; at least such alone have kept to it phonetic characters.

CUSHI

restrial Paradise of Sheddád the son of 'A'd, as sometimes seen in their deserts; the Greeks located the all-destroying floods of Ogyges and Deucalion in Greece; and the Mexicans seem to have placed a similar deluge in America; all carrying with them their traditions and fixing them in the territories where they established themselves. The Cushan mentioued in Hab. (iii. 7) has been thought to be an Asiatic post-diluvian Cush, but it is most reaan Asiatic post-diluvian Cush, but it is most reasonable to hold that Cushan-rishathaim is here inteuded [CUSILIN]. In the ancient Egyptian eriptions Ethiopia above Egypt is termed Keesh or quainted. [ETHIOPIA.] R. S. P.

> • 2773, as the name of a country, is translated in the A. V. "Ethiopia" or "Ethiopians," in all the passages in which it occurs except Is. xi. 11.

CU'SHAN (שרשן: Aldiones; [Sin.1 Ed.orres:] Æthiopia, Hab. iii. 7), possibly the same as Cushan-rishathaim (A. V. Chushan-) king of Mesopotamia (Judg. iii. 8, 10). The order of events alluded to by the prophet seems to favor this supposition. First he appears to refer to former acts of Divine favor (ver. 2); he then speaks of the wonders at the giving of the Law, "God came from Teman, and the Holy One from Mount Paran;" and he adds, "I saw the tents of Cushan in affliction: [and] the tent-curtains of the land of Midian did tremble," as though referring to the fear of the enemies of Israel at the manifestations of God's favor for His people. Cushan-rishathaim, the first recorded oppressor of the days of the Judges, may have been already reigning at the time of the entrance into Palestine. The Midianites, certainly allied with the Moabites at that time, feared the Israelites and plotted against them (Num. xxii., xxiii., xxiv., xxv.); and it is noticeable that Balaam was sent for from Aram (xxiii. 7), perhaps the Aram-naharaim of the oppressor. Habakkuk afterwards alludes to the crossing of Jordan or the Red Sea, or both, (ver. 8-10, 15,) to the standing still of the sun and moon (11), and apparently to the destruction of the Canaanites (12, 13, 14). There is far less reason for the supposition that Cushan here stands for an Asiatic Cush. [CHU-R. S. P. SHAN-RISHATHAIM.]

CU'SHI (WD: Xouơi [Vat. -σει]: Chusi), a name occurring more than once in the O. T. 1. One of the ancestors of Jehudi, a man about the court of king Jehoiakim (Jer. xxxvi. 14).

2. [Vat. Alex. $Xou\sigma\epsilon_i$.] Father of Zephaniah the Prophet (Zeph. i. 1).

3. (With the article, "2"]], i. e. "the Cushite," "the Ethiopian:" & Xovoí [Vat. Alex. -ore1]: Chusi), a man apparently attached to Joab's person, but unknown and unaccustomed to the king, as may be inferred from his not being recognized by the watchman, and also from the abrupt manner in which he breaks his evil tidings to David, unlike Ahimaaz, who was well aware of the effect they were sure to produce. That Cushi was a foreigner — as we should infer from his name — is also alightly corroborated by his ignorance of the ground in the Jordan valley — "the way of the 'Ciccar'" — by knowing which Ahimaaz was enabled to outrun him (2 Sam. xviii. 21, 22, 23, 31, 39). Ewald

however, conjectures that a mode of running is here referred to, peculiar to Ahimaaz, and by which

partly or wholly, in spite of their after knowledge - phonetic characters.

Α.

as was recognized a long distance off by the watch-

פות, פותה עדעדא מי כעדא פותה, העדדע Xoubd [Vat. Xourba, Alex. Xoua], Xoub [Alex omits]; Joseph. Xovoos: Cutha), one of the countries whence Shalmaneser introduced colonists into Samaria (2 K. xvii. 24, 30); these, intermixing with the remnant of the ten tribes, were the progenitors of the Samaritans, who were called Cu theans by the Jews, and are so described in the Chaldee and Talmud (oi Kara Thy 'Espalar γλώτταν Χουθαΐοι, κατά δέ την Έλλήνων Σαμα peiras, Joseph. Ant. ix. 14, § 3). The position of Cuthan is undecided; Josephus speaks of a river of that name in Persia, and fixes the residence of the ('utherans in the interior of Persia and Media (Ant. ix. 14, § 3, x. 9, § 7). Two localities have been proposed, each of which corresponds in part, but neither wholly, with Josephus's account. For the one we depend on the statements of Arabian geographers, who speak of a district and town named Ku tha, between the Tigris and Euphrates, after which one of the canals (the fourth in Xen. Anab. i. 7) was named; the town existed in the time of Abulfeda, and its site has been identified with the ruins of Towibah immediately adjacent to Babylon (Ainsworth's Assyria, p. 165; Knobel, Völkertafel, p. 252); the canal may be the river to which Josephus refers. The other locality corresponds with the statement that the Cuthmans came from the interior of Persia and Media. They have been identified with the Cosssei, a warlike tribe, who occupied the mountain ranges dividing those two countries, and whose lawless habits made them a terror even to the Persian emperors (Strab. xi. p. 524, xvi. p. 744). They were never wholly subdued until Alexander's expedition; and it therefore appears doubtful whether Shalmaneser could have gained sufficient auchority over them to effect the removal of any considerable number; their habits would have made such a step highly expedient, if practicable. The connection between the Samaritans and the Sidonians, as stated in their letter to Alexander the Great (Joseph. Ant. xi. 8, § 6, xii. 5, § 5), and between the Sidonians and the Cuthæans as expressed in the version of the Chaldee Paraphrast Pseudo-Jonathan in Gen. x. 19, who substitutes כותכיים for צדון, and in the Tar gum, 1 Chr. i. 13, where a similar change is made is without doubt to be referred to the traditional belief that the original seat of the Phœnicians was on the shores of the Persian Gulf (Herod. i. 1).

W. L. B.

CUTTING OFF FROM THE PEOPLE. (Excommunication.]

OUTTINGS [IN THE FLESH] ((1.) גָּשָׁרָשָׁר, א. ה., both from עָּדָשָׁר, א. אָיָרָשָׁר גַשּׁׁרָש (Gesen. p. 1395), cut; (2.) גָּדָדור, from דַאָּ, incise (Gesen. p. 264): לעדר-

udles: incisure; (3.) $\mathcal{Y}[2\mathfrak{Y}]_{7}^{2}$, s., from $\mathcal{Y}[3]_{7}^{2}$, engrave (Gesen. p. 1208): $\gamma p d\mu \mu \alpha \pi \alpha$ στικτά stigsada). The prohibition (Lev. xix. 28) against marks or cuttings in the flesh for the dead must be taken in connection with the parallel passages (Lev. cxi. 5; Deut. xiv. 1), in which shaving the head with the same view is equally forbidden. But it appears from Jer. xvi. 6, 7, that some outward manifestation of grief in this way was not wholly

forbidden, or was at least tolerated. The ground therefore, of the prohibition must be sought elsewhere, and will be found in the superstitious or inhuman practices prevailing among heathen nations A notion apparently existed that self-inflicted baldness or mutilation had a propitiatory efficacy in respect of the manes of the dead, perhaps as representing, in a modified degree, the solemnity of human or animal sacrifices. Herodotus (iv. 71) describes the Scythian usage in the case of a deceased king, for whose obsequies not fewer than six human victims, besides offerings of animals and other effects, were considered necessary. An extreme case of funereal bloodshed is represented on the occasion of the burial of Patroclus, when four horses, two dogs, and twelve Trojan captives are offered up (Il. xxiii. 171, 176). Together with human or animal sacrifices at funerals, and after these had gone out of use, the minor propitiatory acts of self-laceration and depilation continued in use (Il. xxiii. 141; Od. iv. 197; Virg. Æn. iii. 67, with Servius ad loc. xii. 605; Eurip. Alc. 425; Seneca, Hippol. v. 1176, 1193). Plutarch says that some barbarians mutilate themselves (De Consol. ad Apollon. p. 113, vol. vi. Reiske). He also says that Solon, by the advice of Epimenides, curtailed the Athenian practice in this respect (Solon. 12-21, vol. i. pp. 184, 194). Cicero quotes a law of the twelve tables to the same effect; "mulieres genas ne radunto " (De Leg. ii. 23).

Such being the ancient heathen practice it is not surprising that the Law should forbid similar practices in every case in which they might be used or misconstrued in a propitiatory sense. "Ye shall not make cuttings for (propter) the dead \overrightarrow{upp} (Lev. xix. 28; Gesen. p. 731; Spencer de Leg. Hebr. ii. xix. 404, 405).

But the practice of self-mutilation as an act of worship belonged also to heathen religious ceremonies not funereal. The priests of Baal, a Syrian and also an Assyrian deity, cut themselves with knives to propitiate the god "after their manner" (1 K. xviii. 28). Herodotus says the Carians, who resided in Europe, cut their foreheads with knives at festivals of Isis; in this respect exceeding the Egyptians, who beat themselves on these occasions (Herod. ii. 61). This shows that the practice was not then at least an Egyptian one. Lucian, speak ing of the Syrian priestly attendants of this mock deity, says, that using violent gestures they cut their arms and tongues with swords (Lucian, Asnus, c. 37, vol. ii. 102, Amst.; de Dea Syr. ii. 658, 681; comp. Ez. viii. 14). Similar practices in the worship of Bellona are mentioned by Lucan (Phars. i. 560), and alluded to by Ælius Lampridius (Comm. p. 209), by Tertullian (Apol. c. 9), and Lactantius (Div. Instit. i. c. 21, 29, Paris). He rodotus, speaking of means used for allaying a storm, uses the words Erroua mousines, which may mean cutting the flesh, but more probably offering human sacrifices (Herod. vii. 191, ii. 119, with Schweighæuser's note; see also Virg. En. ii. 116; Lucr. i. 85).

The prohibition, therefore, is directed against practices prevailing not among the Egyptians whom the Israelites were leaving, but among the Syrians. to whom they were about to become neighborn (Selden, de Diis Syris, Syn. ii. c. 1).

with the same view is equally forbidden. But it Practices of self-mutilation, whether propitiatory appears from Jer. xvi. 6, 7, that some outward or simply funereal, i. c. expressive of highly excited manifestation of grief in this way was not wholly feeling, are mentioned of the modern Persians on

the occasion of the celebration of the death of Ho- | note) he regards Cyamon (Jud. vii. 8; as unknown seyn, at which a man is paraded in the character of the saint, with points of lances thrust into his flesh. At funerals also in general the women tear their hair and faces. The Circassians express grief by tearing the flesh of their foreheads, arms, and breasts. The Mexicans and Peruvians offered human sacrifices both at funerals and festivals. The Gosáyens of India, a class of Brahminical friars, endeavor in some cases to extort alms by gashing their limbs with knives. Among the native negro African tribes also the practice appears to prevail of offering human sacrifices at the death of chiefs (Chardin, Voyages, vi. 482, ix. 58, 490; Olearius, Travels, p. 237; Lane, Mod. Egypt. ii. 59; Prescott, Mexico, i. 53, 63; Peru, i. 86; Elphinstone, Hist. of India, i. 116; Strab. xv. p. 711 ff.; Niebuhr, Voyages, ii. 54; Livingstone, Tracels, pp. 318, 588; Col. Ch. Chron. No. cxxxi. 179; Muratori, Anecd. iv. 99, 100).

But there is another usage contemplated more remotely by the prohibition, namely, that of printing marks (orlyµara), tattooing, to indicate allegiance to a deity, in the same manner as soldiers and slaves bore tattooed marks to indicate allegiance or adscription. This is evidently alluded to in the Revelation of St. John (xiii, 16, xix, 20, xvii. 5), $\chi d\rho a \gamma \mu a \epsilon \pi l \tau \hat{\eta} s \chi \epsilon \mu \rho s \tau \hat{\eta} s \delta \epsilon \xi i \hat{a} s \kappa a l \epsilon \pi l \tau \hat{u} r \mu e \tau \dot{a} \pi \omega r$, and, though in a contrary direction, by Ezekiel (ix. 4), by St. Paul (Gal. vi. 17), in the Revelation (vii. 3), and perhaps by Isaiah (xliv. 5) and Zechariah (xiii. 6). Lucian, speaking of the priests of the Syrian deity, says, στίζονται πάντες, οί μέν ές καρπούς, οί δè és αύχένας, και άπό τοῦδε άπαντες Ασσύριοι στιγ-ματοφορέουσι (de Dea Syr. [c. 59,] ii. p. 684). A tradition, mentioned by Jerome, was current among the Jews, that king Jehoiakim bore on his body marks of this kind which were discovered after his death (Spencer, De Leg. Hebr. ii. xx. 410). Philo, quoted by Spencer, describes the marks of tattooing impressed on those who submitted to the process in their besotted love for idolworship, as being made by branding ($\sigma_i \delta \eta \rho \varphi \pi \epsilon$ πυρωμένφ, Philo, de Monurch. i. 819; Spencer, p. 416). The Arabs, both men and women, are in the habit of tattooing their faces, and other parts of the body; and the members of Brahminical sects in India are distinguished by marks on the forehead, often erroneously supposed by Europeans to be marks of caste (Niebuhr, Descr. de l'Arab. p. 58; Voyages, i. 242; Wellsted, Arabia, ii. 206, 445; Olearius, Travels, p. 299; Elphinstone, India, H. W. P. L 195).

CY'AMON (Kvaµáv: Chelmon), a place named only in Jud. vii. 3, as lying in the plain (aυλάν, A. V. "valley ") over against (aπέναντι) Esdrelom. If by "Esdrelom" we may understand Jerreel, this description answers to the situation of the modern village Tell Kaimón, on the eastern slones of Carmel, on a conspicuous position overlooking the Kishon and the great plain (Rob. iii. 114; Van de Velde, i. 330). The place was known to Eusebius (Kaumwrd) and Jerome (Cimana), and is mentioned by them in the Onomasticon. They identify it with CAMON, the burial-place of Jair the Gileadite. Robinson suggests its identity with JOKNEAM.

* This last remark may be misunderstood. Dr. Robinson assents to the suggestion that Jokneam nay be Tell Kadanda (iii. 114); but (see iii. 389, rhythm, especially in music of a loud and grand

unless it be Fuleh, on the east side of the plain of Esdraelon. Cyamon (Kvaµúv, and Fuleh both mean a bean or place of beans, and so may repre sent an earlier name (פּרל, פּרל) of that significa tion. Raumer (Palästina, p. 154) identifies Cya-mon with Fulch. It was the central point of the battle of Kleber against the Turks in 1799, in which Bonaparte's opportune arrival from Akka saved the French from defeat. H.

CYMBAL, CYMBALS (צָלְצָלִים) ロゾクマンク), a percussive musical instrument, from 772, to tinkle (comp. his two ears shall tingle, הצילבה, 1 Sam. iii. 11, and a fish-spear, אָלְצָר, Job xli. 7); possibly so called from its tinkling sound. The three instruments which appear to have been most in common use amongst the Hebrews were Nebel, נְבָל, Cinnor, כְּפָנוֹר, and Tzilzś, צָלְצָל Two kinds of cymbals are mentioned in Ps. cl. 5, אַרְאָרֵי שָׁמַע, "loud cymbals," cymbala bene sonantia, or castagnettes, and אַלְצָלֵי הרועָדו, "high-sounding cymbals," cymbula jubilationis. The former consisted of four small plates of brass or of some other hard metal; two plates were attached to each hand of the performer, and were smote together to produce a loud noise. The latter consisted of two larger plates, one held in each hand, and struck together as an accompaniment to other instruments. Asaph, Heman, and Jeduthun, the renowned conductors of the music of the sanctuary, employed the "loud cymbals" possibly to beat time, and to give the signal to the choir when it was to take part in the sacred chant. Lewis says - but he does not support his statement by any authority - that " their was allowed but one cymbal to be in choir at once. The use of cymbals was not necessarily restricted to the worship of the Temple or to sacred occasions. they were employed for military purposes, as also by the Hebrew women as a musical accompaniment to their national dances. The "loud cymbals

are the same with ロックさつ, A. V. "cymbals," performed on by the band which accompanied Da vid when he brought up the ark of God from Kirjath-jearim (1 Chr. xiii. 8).

Both kinds of cymbals are still common in the East in military music, and Niebuhr often refers to them in his travels. "Il y a chez les Orientaux," says Munk, "deux espèces: l'une se compose de deux petits morceaux de bois ou de fer creux et ronds qu'on tient entre les doigts, et qui sont connus sous le nom de castagnettes; l'autre est composée de deux demi-sphères creusés en metal." Lampe has written a copious dissertation on ancient cymbals, and his work may be consulted with advantage by those who desire fuller information on the subject.

The cymbals used in modern orchestras at d military bands, and which are called in Italian piatti are two metal plates of the size and shape of saucers, one of which is fixed, and the other is held by the performer in his left hand. These resemble very closely the "high-sounding cymbals" of old and they are used in a similar manner to mark the

Digitized by Google

sharacter. They are generally played by the person $|\rho_{ios} - \hat{\varphi} \gamma e_{ie_i}$, Acts iv. 36), for which the A. V. who performs on the large side dram (also an in- substitutes "of the country of Cyprus." This orthogeneration of the substitutes of the country o who performs on the large side drum (also an instrument of pure percussion); and whilst he holds one cymbal in his left hand, he strikes it against the other which is fixed to the drum, his right hand remaining free to wield the drumstick, as the large drum is only struck on one side, and with one stick. In practice the drum and the cymbals are struck simultaneously, and an effect of percussion is thus produced which powerfully marks the time

The noun metzilloth, העצלות, found in Zech. xiv. 20, is regarded by some critics as expressive of certain musical instruments known in the age of the second Temple, and probably introduced by the Israelites on their return from Babylon. The A. V. renders the word "bells," supposing it to be derived from צַלַל. The most generally received opinion, however, is, that they were concave pieces or plates of brass which the people of Palestine and Syria attached to horses by way of ornament. (See Mendelssohn's Preface to Book of Psalms; Kimchi, Comment. in loc.; Lewis, Origines Hebrane, Lond. 1724, 176-7; Forkel, Geschichte d. Musik; Jahn, Archaulogy, Amer. ed., cap. v. § 96, 2; Munk, Palestine, p. 456; Esendier, Dict. of Music, i. 112). D. W. M.

OYPRESS (ΠΓ., tirzah : aγριoβάλavos, Alex., Aq., and Theod.: ilex). The Hebrew word is found only in Is. xliv. 14, "He heweth him down cedars and taketh the tirzâh and the oak." We are quite unable to assign any definite rendering to this word. Besides the cypress, the "beech," the "holm-oak," and the "fir" have been proposed; but there is nothing in the etymology of the Hebrew name, or in the passage where it occurs, to guide us to the tree intended. The word is derived from a root which means "to be hard." a quality which obviously suits many kinds of trees. Celsius (Hierob. ii. 269) believes the "ilex" or "holm-oak" is meant; but there is no reliable evidence to show that this tree is now found in Palestine. With respect to the claims of the cypress (Cupressus sempervirens), which, at present, at all wents, is found cultivated only in the lower levels

f Syria, it must be granted that they are unsuported hy any authority. Van de Velde's cypress is the Juniperus excelse, which is also the cypress of Pococke; but neither juniper nor cypress, as is asserted by Pococke, grow anywhere near the top of Lebanon. "The juniper," says Dr. Hooker, "is found at the height of 7000 feet, on Lebanon, the top of which is 10,500 feet or so." The true cypress is a native of the Taurus. The Hebrew word points to some tree with a hard grain, and this is W. H. all that can be positively said of it.

UYP'RIANS (Κύπριοι: Cyprü). Inhabitants of the island of Cyprus (2 Macc. iv. 29). At the time alluded to (that is during the reign of Antiochas Epiphanes), they were under the dominion of Egypt, and were governed ty a viceroy who was sed of ample powers, and is called in the inecriptions στρατηγός και ναύασχος και άρχιερευς δ κατά την νήσον (comp. Boeckh, Corp. Insc. No. 9524). Crates, one of these viceroys, was left by Sostratus in command of the castle, or acropolis. f Jerusalem while he was summoned before the

gin of Barnabas appears to have been the providential reason why the first missionaries went to the particular fields of labor first visited by them (Cyprus and the southern parts of Asia Minor) where Christianity won its carliest signal victories among the heathen. H.

CY'PRUS (Kómpes). This island was in early times in close commercial connection with Phœnicia; and there is little doubt that it is referred to in such passages of the O. T. as Ez. xxvii [CHITTIM.] Josephus makes this identifica-6. tion in the most express terms (Xéôiµa . . . Kiπρος αδτη νῦν καλείται; Ant. i. 6, § 1; so Epi-phan. Hær. xxx. 25). Possibly Jews may have settled in Cyprus before the time of Alexander Soon after his time they were numerous in the island, as is distinctly implied in 1 Macc. xv. 23. The first notice of it in the N. T. is in Acts iv. 36, where it is mentioned as the native place of Barnabas. In Acts xi. 19, 20, it appears prominently in connection with the earliest spreading of Christianity, first as receiving an impulse among its Jewish population from the persecution which drove the disciples from Jerusalem, at the death of Stephen, and then as furnishing disciples who preached the gospel to Gentiles at Antioch. Thus when Paul was sent with Barnabas from Antioch on his first missionary journey, Cyprus was the first scene of their labors (Acts xiii. 4-18). Again when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv. 89). An other Christian of Cyprus, Mnason, called "an old disciple," and therefore probably an early convert. is mentioned Acts xxi. 16. The other notices of the island are purely geographical. On St. Paul's return from the third missionary journey, they "sighted " Cyprus, and sailed to the southward of it on the voyage from Patara to Tyre (id. 3). At the commencement of the voyage to Rome, they sailed to the northward of it, on leaving Sidon, in order to be under the lee of the land (Acts xxvii. 4), and also in order to obtain the advantage of the current, which sets northerly along the coast of Phœnicia, and westerly with considerable force along Cilicia.

All the notices of Cyprus contained in ancient writers are diligently collected in the great work of Meursius (Meursii Opera, vol. iii. Flor. 1744). Situated in the extreme eastern corner of the Mediterranean, with the range of Lebanon on the east, and that of Taurus on the north, distinctly visible, it never became a thoroughly Greek island. Its religious rites were half Oriental [PAPHOS], and its political history has almost always been associated with Asia and Africa. Cyprus was a rich and productive island. Its fruits and flowers were famous. The mountains also produced metals, especially copper. This circumstance gives us an interesting link between this island and Judsea. The copper mines were at one time farmed to Herod the Great (Joseph. Ast. xvi. 4, § 5), and there is a Cyprian inscription (Beeckh, No. 2628) which seems to refer to one of the Herods. The history of Cyprus is briefly as follows: - After be ting. W. A. W. Barnabas, who was Paul's associate in his first ii. 182) it became a part of the Persian empire (i) iii. 182) it became a part of the Persian empire (ii) iii. 182) it became a part of the Persian empire (ii) ing subject to the Egyptian king Amasis (Herod. wissionary journey, was a Cyprime by birth (Kon- iii. 19, 91), and furnished ships against Greece is

it was subject to Greek influence, but again became tributary to Persia. After the battle of Issus, it joined Alexander, and after his death fell to the share of Ptolemy. In a desperate sea-fight off SALAMIS at the east end of Cyprus (B. C. 306) the victory was won by Demetrius Poliorcetes. but the island was recovered by his rival, and afterwards it remained in the power of the Ptolemies and was regarded as one of their most cherished possessions. It became a Roman province (B. C. 58) under circumstances discreditable to Rome.

Copper Coin of Cyprus, under Emp. Claudius. Obv. [CL]AVDIVS. CÆSA[B]. Head of Emp. to left. Rev. EIII KOMINIOY II[POKA]OY ANOYIIA KYIIPI₁₀N.

At first its administration was joined with that of Cilicia, but after the battle of Actium it was separately governed. In the first division it was made an imperial province (Dion Cass. liii. 12). From this passage and from Strabo (xiv. 683) it has been supposed by some, as by Baronius, that St. Luke used the word avouraros (proconsul), because the island was still connected with Cilicia; by others, as by Grotius and Hammond, that the evangelist employs the word in a loose and general manner. But, in fact, Dion Cassius himself distinctly tells us (ib. and liv. 4) that the emperor afterwards made this island a senatorial province; so that St. Luke's language is in the strictest sense correct. Further confirmation is supplied by coins and inscriptions, which mention other proconsuls of Cyprus not very remote from the time of SERGIUS PAULus. The governor appears to have resided at Paphos on the west of the island. Under the Roman empire a road connected the two towns of Paphos and Salamis, as appears from the Peut. Table. One of the most remarkable events in this part of the history of Cyprus was a terrible insurrection of the Jews in the reign of Trajan, which led to a massacre, first of the Greek inhabitants, and then of the insurgents themselves (Milman, Hist. of Jews, iii. 111, 112). In the 9th century Cyprus fell into the power of the Saracens. In the 12th it was in the hands of the Crusaders, under our king Richard I. Materials for the description of Cyprus are supplied by Pococke and Von Hammer. But see especially Engel's Kypros, Berlin, 1843, and Ross's Reisen nach Kos, Halikarnassos, Rhodos, u. der Insel Cypern, Halle, 1852. J. S. H.

* CYRA'MA, 1 Esdr. v. 20, an incorrect form in the A. V. ed. 1611, and other early editions, for CIRAMA.

CYRE'NE (Kuphun), the principal city of that part of northern Africa, which was anciently called Cyrenaica, and also (from its five chief cities) Penapolitana. This district was that wide projecting portion of the coast (corresponding to the modern Tripoli), which was separated from the territory of Justhage on the one hand, and thet of Egypt on among those who are specially mentioned as labor

the expedition of Xerres (ib. vii. 90). For a time | the other. Its surface is a table-land descending by terraces to the sea; and it was celebrated for its climate and fertility. It is observable that the expression used in Acts ii. 10, "the parts of Libya about (nard) Cyrene," exactly corresponds with a phrase used by Dion Cassius (AiBin & repl Kuph- $\nu\eta\nu$, liii. 12), and also with the language of Jose phus (ή πρός Κυρήνην Λιβύη; Ant. xvi. 6, § 1) [LIBYA.]

The points to be noticed in reference to Cyrene as connected with the N. T. are these, - that, though on the African coast, it was a Greek city; that the Jews were settled there in large numbers ; and that under the Romans it was politically connected with Crete, from which it is separated by no great space of sea. The Greek colonization of this part of Africa under Battus began as early as B. C. 631; and it became celebrated not only for its commerce, but for its physicians, philosophers, and poets. After the death of Alexander the Great, it became a dependency of Egypt. It is in this period that we find the Jews established there with great privileges. Ptolemy, the son of Lagus, introduced them, because he thought they would contribute to the security of the place (Joseph. c. Apion. ii. 4): they became a prominent and influential class of the community (.4nt. xiv. 7, § 2); and they afterwards received much consideration from the Romans (xvi. 6, § 5). See 1 Macc. xv. 23. We learn from Josephus (Life, 76) that soon after the Jewish war they rose against the Roman power. Another insurrection in the reign of Trajan led to great disasters, and to the beginning of the decay which was completed under the Mohammedans. It was in the year B. C. 75 that the territory of Cyrene (having previously been left to the Romans as a legacy by Apion, son of Ptolemy Physcon) was reduced to the form of a province. On the conquest of Crete (B. C. 67) the two were united in one province, and together frequently called Creta-Cyrene. Under Constantine they were again separated. [CRETE.]

Tetradrachm (Attic talent) of Cyrene. Obv. Sacred silphium plant. Rev. KYPA, Heal of bearded Jupiter Ammon to the right.

The notices above given of the numbers and position of the Jews in Cyrene (confirmed by Philo, who speaks of the diffusion of the Jews and Top πρός Λιβύην καταβαθμοῦ μέχρι των όρίων Αίθιonlas, adv. Flacc. p. 523) prepare us for the frequent mention of the place in the N. T. in connection with Christianity. Simon, who bore our Saviour's cross (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26), was a native of Cyrene. Jewish dwellers in Cyrenaica were in Jerusalem at Pentecost (Acts ii. 10). They even gave their name to one of the synagogues in Jerusalem (ib. vi. 9). Christian converts from Cyrene were among those who contributed actively to the formation of the first Gentile church at Anti the (ib. xi 20), and

ing at Antioch when Barnabas and Saul were sent | by Augustus (Dion Cass. lii. 23), that none should a their missionary journey is Lucius of Cyrene (ib. Aili. 1), traditionally said to have been the first bishop of his native district. Other traditions connect Mark with the first establishment of Christianity in this part of Africa.

The antiquities of Cyrene have been illustrated in a series of recent works. See Della Cella, Viuggio da Tripoli, &c., Genoa, 1819; Pacho, Voyage dans la Marmurique, la Cyrénaique, &c., Paris, 1827-1829; Trige, Res Cyrenenses, Hafn. 1848; Beechey, Expedition to explore the north coast of Africa, Sc., London, 1828; Barth, Wanderungen durch das Punische u. Kyrenäische Küstenland, Berlin, 1849; Hamilton, Wanderings in North Africa, London, 1856. J. S. H.

* CYRE'NIAN (Kupyraios: Cyrenæus), Mark XV. 91; Luke XXIII. 26; Acts vi. 9, a native or in-habitant of CYRENE, which see. The adjective also occurs in the original, 2 Macc. ii. 23; Matt. xxvii. 82; Acts xi. 20, xiii. 1.

CYRE'NIUS (Kuphrios: [Cyrinus], Luke ii. 2), the literal English rendering in the A. V. of the Greek name, which is itself the Greek form of the Roman name QUIRINUS (not Quirinius; see Meyer, in loc.; Suet. Tiber. 49; Tac. Ann. ii. 30, iii. 48). The full name is Publius Sulpicius Quirinus. He was consul A. U. C. 742, B. C. 12, and made governor of Syria after the banishment of Archelaus in A. D. 6 (Joseph. Ant. xvii. 13, § 5). He was sent to make an enrolment of property in Syria, and made accordingly, both there and in Judsea, a census or aroypaph (Joseph. l. c., and xviii. 1, § 1). But this census seems in Luke (ii. 2) to be identified with one which took place at the time of the birth of Christ, when Sentius Saturninus was governor of Syria. Hence has arisen a considerable difficulty, which has been variously solved, either by supposing some corruption in the text of St. Luke (a supposition which is not countenanced by any external critical evidence), or by giving some unusual sense to his words, αύτη ή ἀπογραφή πρώη έγένετο ήγεμονεύοντος της Συρίας Κυρηνίου. Many commentators and chronologists, e. g. Perizonius, Ussher, Petavius, Storr, Tholuck, Wieseler, would render this, "was made before Q. was governor of Syria," by a usage otherwise confined to St. John among the Evangelists. But this is very improbable, both in itself and because thus there would have been no adequate ground for inserting the notice.

An unexpected light has been thrown on the matter lately, which renders it only necessary to pler to summaries and criticisms of the various . ypotheses, such as that in Winer, art. Quirinius.

A. W. Zumpt, of Berlin, the nephew of the distinguished grammarian, in his Commentatio de ia Romanorum provincia a Casare Augusto ad T. Vespasianum, has shown it to be probable that Quirinus was twice governor of Syria. This he supports by the following considerations: -

In 9 B. C. Sentius Saturninus succeeded M. Tihas in the province of Syria, and governed it three rears. He was succeeded by T. Quintilius Varus Joseph. Ant. xvii. 5, § 2), who, as it appears, remained governor up to the end of 4 B C. Thence forward we lose sight of him till he is appointed to vhe command in Germany, in which he lost his life a A. D. 7. We also lose sight of the governors

hold an imperial province for less than three or more than five years, Varus cannot have been governor of Syria during the twelve years from B. C. 6 to A. D. 6. Who then were the missing governors? One of them has been found, L. Volusius Saturninus, whose name occurs as "legatus Syrise" on a coin of Antioch, A. D. 4 or 5. But his proconsulate will not fill the whole time, and one or two governors must be supplied between Varne, ending 4 B. C., and Volusius, 4 or 5 A. D.

Just in that interval falls the census, of which it is said in Luke ii. 2, that it motory evers the μονεύοντος της Συρίας Κυρηνίου. Could Quirinus have been governor at any such time? From Jan to Aug. B. C. 12 he was consul. Soon after that he triumphed over the Homonadenses ("Mox expugnatis per Ciliciam Homonadensium castellis insignia triumphi adeptus," Tac. Ann. iii. 48). Now Zumpt applies the exhaustive process to the provinces which could by any possibility have been under Quirinus at this time, and eliminates from the inquiry Asia - Pontus and Bithynia - and Galatia. Cilicia only remains. But at this time, as he shows, that province had been reduced by successive diminutions, had been separated (Dion Cass. liv. 4) from Cyprus, and - as is shown by the history of the misconduct of Piso soon afterwards, who was charged with having, as ex-governor of Syria, attempted "repetere provinciam armis" (Tac. Ann. iii. 12), because he had attacked Celenderis, a fort in Cilicia (ib. ii. 78-80) - attached to the province of Syria. This Zumpt also confirms by the accounts in Tacitus (Ann. vi. 41, xii. 55) of the Clitze, a seditious tribe of Cilicia Aspera, who on two occasions were repressed by troops sent by the governors of Syria.

Quirinus then appears to have been governor of Syria at some time during this interval. But at what time ? We find him in the East (Tac. Ann. iii. 48), as datus rector C. Casari Armeniam obtinenti; and this cannot have been during his wellknown governorship of Syria, which began in A. D. 6; for Čaius Cæsar died in A. D. 4. Zumpt, by arguments too long to be reproduced here, but very striking and satisfactory, fixes the time of his first governorship at from B. C. 4 to B. C. 1, when he was succeeded by M. Lollius.

It is true this does not quite remove our difficulty. But it brings it within such narrow limits, that any slight error in calculation, or even the lat itude allowed by the words notion evere, might well cover it.

In the passage of Tacitus referred to more than once (Ann. iii. 48), we learn that in A. D. 21, Tiberius asked of the Senate the honor of a public funeral for Quirinus. The historian describes. however, his memory as not being popular for other reasons (see Ann. iii. 22), and because of his "sordida et præpotens senectus."

For the controversy respecting the census under Quirinus, as it stood before Zumit's discovery, see Winer, ut supra; Greswell, vol. i. Dissertation xii.; Browne's Ordo Sæclorum, Appendia, il. 40 ff.; and Wieseler, Chronologische Synopes der vier Fnangelien, p. 109 ff. H.A.

* Was Cyrenius or Quirinius - not Quirinus, as many call him - governor or legatus Augusti pre prostore in Syria more than once? A. W. Zumpt, in his Comment. epigraph. ii. 71-150 (Berlin, 1864) If Syria till the appointment of P. Sulpicius Qui-inus, in s. D. 6. Now from the maxim acted on accepted by many. Quirinius, consul in the year

12 B. C. == 742 C. C., and afterwards at the head of an array in Africa, -- perhaps as proconsul of the province of Africa in 7 B. C. = 747 U. C. (comp. Florus, iv. 12) - appears in the East sometime beween 2 B. C. = 752 U. C., and 2 A. D. Here he won a triumph over a people in Cilicia Trachea, was appointed "rector" of C. Csesar, when he was sent to Armenia, and visited Tiberius during his stay at Rhodes (Tac. Ann. iii. 48; comp. Strabo, xii. p. 854 a.). C. Cæsar went to the East late in 2, or early in 1 B. C., and Tiberius returned to Rome in 2 A. D. As Quirinius needed an army in Cilicia, he must have been a governor of a province, or a legate of the emperor's legate. Zumpt shows that probably at this time Cilicia, although popularly called a province, was under the jurisdiction of the legate in Syria, who had with him a large army, while the other provincial governors around Cilicia had no army. With Syria, then, Quirinius is at this time brought into connection, and, as Zumpt endeavors to make out on probable grounds, in the capacity of governor of that province. This could have happened only after the departure of Quintilius Varus from his Syrian administration. Varus followed C. Sentius Saturninus, is known by coins to have been governor in 748-750 U. c. =6-4 B. C., and left his post after the death of Herod the Great in 4 B. C. (Tac. Hist. v. 9; Joseph. Ant. xvii. 10). It happens that there is here a gap in our list of governors of Syria until 4 A. D., when L. Volusius Saturninus, as appears from coins, held the office. Quirinius is assigned by Zumpt on probable grounds to the earlier part of this interval - to the years between 4 and 1 B. C.

It is then far from being improbable that this Roman filled the office of governor of Syria twice once at this time, and once from 6 A. D. onward, in the times of the "taxing" mentioned Acts v. 87. The $\dot{a}\pi\sigma\gamma\rho a\phi\eta$ in Luke ii. 2 might thus be called "the first" in opposition to the second or more noted one, which Luke had in his mind without mentioning it. It may be added that a Latin inscription speaks of some one as twice governor of Syria under Augustus. The name is lost. Mommsen refers it to our Quirinius, Zumpt to Senius Saturninus, his second predecessor. But these combinations fail to remove the difficulties which Luke ii. 1-2 presents to us: they rather bring Matthew and Luke into irreconcilable variance. For our Lord was born some time before Herod's death. and Quirinius cannot have commanded in Syria until some months after Herod's death.

Something, however, is gained from the known fact that Quirinius was in the East and in active service about the time of our Saviour's birth. 'Hyeudo of Syria he could not, it is certain, then have been. But if employed there as a special commissioner, he may well at that time have subdued the mountaineers of Cilicia, and superintended the census in Popularly he might be called irrender, Syria. while acting in such a capacity; but the $\dot{a}\pi\sigma\gamma\rho a\phi\eta$ itself was not like the one which the same Quirmius -- sent there, we may suppose, on account of tis previous experience — undertook in 6 A. D., which was a valuation of property in Judges with a view to the taxation of the Jews, now no longer under a king; while the prior one could not have gone beyond a numbering of the population.

T. D. W.

• CYR'IA (Kupla: domina), supposed by some to be a proper name (2 John, ver. 1). See JOHN, byses, the powerful king" (Col. Rawlinson, on Have SECOND AND THIRD EPISTLES OF. H.

CY'RUS (שרש), or שלש), i. e. Chreak: Ki pos; probably from the root contained in the Pers kohr, the sun; Sans. súra: so Plut. Artax. c. 1 cf. Gesen. Thes. s. v.), the founder of the Persian empire (cf. Dan. vi. 28, x. 1, 13; 2 Chr. xxxvi. 22, 23), was, according to the common legend (Herod i. 107; Xen. Cyrup. i. 2, 1), the son of Mandane, the daughter of Astyages, the last king of Media, and Cambyses, a Persian of the royal family of the Achsemenidae.ª In consequence of a dream, Astyages, it is said, designed the death of his infant grandson, but the child was spared by those whom he charged with the commission of the crime (Herod. i. 109 ff.), and Cyrus grew up in obscurity under the name of Agradates (Strab. xv. p. 729). His real parentage was discovered by the imperious spirit which he displayed while yet a boy (Herod. i. 114), and when he grew up to manhood his cour-age and genius placed him at the head of the Per-sians. The tyranny of Astyages had at that time alienated a large faction of the Medes, and Cyrus headed a revolt which ended in the defeat and capture of the Median king B. C. 559, near Pasargadse (Murgh-Aub, Strab. xv. p. 730). After consolidat-ing the empire which he thus gained, Cyrus entered on that career of conquest which has made him the hero of the East. In B. C. 546 (?) he defeated Crossus, and the kingdom of Lydia was the prize of his success. While his general Harpagus was engaged in completing the reduction of Asia Minor, Cyrus turned his arms against the Babylonians. Babylon fell before his army, and the ancient dominions of Assyria were added to his empire (B. C. 538). The conquest of Babylon opened the way for greater designs. It is probable that Cyrus planned an invasion of Fgypt; and there are traces of campaigns in Central Asia, in which he appears to have attempted to extend his power to the Indus (Ctes. Pers. cc. 5 ff.). Afterwards he attacked the Massagetse, and according to Herodotus (i. 214; cf. Joseph. Ant. xi. 2, 1) he fell in a battle against them B. C. 529 (Clinton, F. H. ii. 301 ff.). His tomb is still shown at Pasargadæ (Arr. Exp. Al. vi. 29), the scene of his first decisive victory (Rawlinson, Herod. i. 351).

It is impossible to insist upon the details of the outline thus sketched. In the time of Herodotus Cyrus was already regarded as the national hero of Persia, and his history had received various popular embellishments (Herod. i. 95; cf. iii. 18, 160; Xen. Cyrop. i. 2, 1). In the next century Xenophon chose him as the hero of his romance, and fact and fiction became thenceforth hopelessly confused in classical writers. But in the absence of authentic details of his actions, the empire which he left is the best record of his power and plans. Like an oriental Alexander he aimed at universal dominion; and the influence of Persia, like that of Greece, survived the dynasty from which it sprung. In every aspect the reign of Cyrus marks an epoch in universal history. The fall of Sardis and Babylon was the starting-point of European life; and it is a singular coincidence that the beginning of Grecian art and philosophy, and the foundation of the Roman constitution synchronize with the triumph of the Aryan race in the East (cf. Niebuhr Gesch. Ass. p. 232).

a In an inscription he is described as "Son of G L 107).

CYRUS

with regard to the nations of the world is strikingly dgnificant, the personal relations to God's people, with which he is invested in the Scriptures, are full of a more peculiar interest.a

Hitherto the great kings, with whom the Jews had been brought into contact, had been open oppressors or seductive allies; but Cyrus was a gen erous liberator and a just guardian of their rights. An inspired prophet (Is. xliv. 28) recognized in him "a shepherd" of the Lord, an "anointed" king

(Is. xlv. 1; Ξψ, Messich: τφ χριστφ μου: Christo meo); and the title seemed to later writers to invest him with the dignity of being in some signalized by the consolidation of a Church; the sense a type of Christ himself (Hieron. Comm. in /s. xlv. 1). prophecy with their religious issue; and if that appear to be a partial view of history which represents the restoration of a poor remnant of captive Israeltories (Is. xliv. 28-xlv. 4), it may be answered that iv. 3, v. 13, 17, vi. 3) was in fact the beginning

But while the position which Cyrus occupied | the permanent effects which Persia has wrought upon the world can be better traced through the Jewish people than through any other channel. The laws, the literature, the religion, the very ruins of the material grandeur of Persia have passed away; and still it is possible to distinguish the effects which they produced in preparing the Jews for the fulfillment of their last mission. In this respect also the parallel, which has been already hinted, holds good. Cyrus stands out clearly as the representative of the East, as Alexander afterwards of the West. The one led to the development of the idea of order, and the other to that of independence. Ecclesiastically the first crisis was second by the distinction of sects. The one found His successes are connected in the its outward embodiment in "the great Synagogue;" the other in the dynasty of the Asnunæans.

The edict of Cyrus for the rebuilding of the ites to their own land as the final cause of his vio- Temple (2 Chr. xxxvi. 22-23; Ezr. i. 1-4, iii. 7,

nation was transformed into a church are clearly marked.

1. The lesson of the kingdom was completed by the Captivity. The sway of a temporal prince was at length felt to be at best only a faint image of that Messianic kingdom to which the prophets pointed. The royal power had led to apostasy in Israel, and to idolatry in Judah; and men looked for some other outward form in which the law might be visibly realized. Dependence on Persia excluded the hope of absolute political freedom and offered a sure guarantee for the liberty of religious A ganization.

2. The Captivity which was the punishment of dulatry was also the limit of that sin. Thenceerth the Jews apprehended fully the spiritual na-

of Judaism; and the great changes by which the | ture of their faith, and held it fast through persecution. At the same time wider views were opened to them of the unseen world. The powers of good and evil were recognized in their action in the material world, and in this way some prepara-tion was made for the crowning doctrine of Christianity.

3. The organization of the outward Church was connected with the purifying of doctrine, and served as the form in which the truth might be realized by the mass. Prayer - public and private - assumed a new importance. The prophetic work came to an end. The Scriptures were collected The "law was fenced" by an oral tradition. Syu agogues were erected, and schools formed. Scribes shared the respect of priests, if they did not supersede them in popular regard.

mar of the Bible has found advocates in Germany (Presses, s. v. Cyrus in Hernog's Encyklop.). It is ditory, though the opinion of the Duke of Manches- impossible that the great conqueror of Isaiah can be

528 DABAREH

4. Above all, the bond by which "the people of God" was held together was at length felt to be religious and not local, nor even primarily national. The Jews were incorporated in different nations, and still looked to Jerusalem as the centre of their faith. The boundaries of Canaan were passed; and the beginnings of a Spiritual dispensation were already made when the "Dispersion" (comp. Niebuhr's Gesch. Assurs und Babels, p. 224 f.; Ewald, Gesch. d. Volkes Israel, iv. 60 ff.; Jost, Gesch. d. Judenthums, i. 13 ff.). [DISPER-BON OF THE JEWS.] B. F. W.

D.

DAB'AREH ($\neg \neg \neg \neg$ [*pasture*]: $\Delta \epsilon \beta \beta a$; **Alex.** $\Delta \epsilon \beta \rho a \theta$: *Dabereth*), Josh. **xxi**. 28. This name is incorrectly spelt in the A. V., and should be DABKRATH; which see.

• The A. V. inherits the orthography from the older English versions. The pronunciation of the word without Metheg, as usually read in 1 Chr. vi. 57 (A. V. 72), would be *Dorrath*. H.

DABBA'SHETH (העֶשְה: Bauddoaßa: Alex. (הענים: Debbaseth), a town on the boundary of Zebulun (Josh. xix. 11 only).

DAB'ERATH (with the article in Josh Tirst]: [the pasture, fem. of הֹבֶר Fürst]: $\Delta \alpha \beta_{i\rho} \omega \theta$ [Vat. - β_{ei} -]; Alex. $\Delta \alpha \beta_{\rho} \alpha \theta$; in Chr. by louble copying, The DeBepl [Vat. -pei] Kal The $\Delta \alpha \beta \omega \rho$: Dibereth), a town on the boundary of Zebulun (Josh. xix. 12) named as next to Chisloth-Tabor. In the list of Levitical cities, however, in 1 Chr. vi. 72, and in Josh. xxi. 28 (where the name) in the original is the same, though in the A. V. " Dabareh "), it is stated as belonging to Issachar. [DABAREII.] It is no doubt the Dabaritta (da**βαρίττων** κώμη) mentioned by Josephus (B. J. ii. 21, § 3). Under the name of Deburieh it still lies at the western foot of Tabor ([Rob. Bibl. Res.] ii. 350). A tradition mentioned by Van de Velde (ii. 374) makes this the scene of the miracle on the funatic child performed by our Lord after his descent from the Mount of Transfiguration (Matt. xvii. 14). But this event probably took place far way.a G.

• For the scene of the Transfiguration, see ILERMON and TABOR. Daberath could belong to

DAGON

Deburich lies in the way of the traveller in going from Nazareth to Tabor. Like other Galilean villages, it illustrates still ancient Scripture customs. The writer, passing there, observed booths made of the branches of trees on the roofs of some of the houses, occupied as an apartment of the house. Allusion is made to dwelling on the house-top in some such way as this in Prov. xxi. 9. In this place, says Mr. Bartlett (Footsteps of our Lord and his Apostles, p. 199, 3d ed.), "we established our bivouac at night-fall upon the roof of a house, amidst heaps of corn just gathered from the surrounding plain." It is a custom that reaches back to the age of the ('anaanites. Rahab who dwelt at Jericho took the two Hebrew spies and "brought them up to the roof of the house and hid them with the stalks of the flax which she had laid in order upon the roof' (Josh. ii. 6). The flat roof furnishes a convenient place for storing such products, because, exposed there to the sun, they ripen or become dry more speedily, and are also more secure from pillage. [HOUSE.] One of the remoter branches of the Kishon has its source near Deburich (Rob. Phys. Geogr. p. 188). H.

DA'GON ($\{U_i^n\}, \Delta d_{YOU}$, a diminutive of $\{2, 3\}$, a fish, used in a sense of endearment: cf. Genen. Thes. s. v.), apparently the masculine (1 Sam. v. 8, 4; Sanchon. p. 28; Movers, Phôniz. i. 144) correlative of Atargatis [ATARGATIS], was the national god of the Philistines. The most famous temples of Dagon were at Gaza (Judg. xvi. 21-30) and Ashdod (1 Sam. v. 5, 6; 1 Chr. x. 10). The latter temple was destroyed by Jonathan in the Maccabean wars (1 Macc. x. 83, 84, xi. 4; Joseph. Ant. xiii. 4, § 5). Traces of the worship of Dagon likewise appear in the names Caphar-Dagon

(near Jamnia), and Beth-Dagon in Judah (Josh. xv. 41) and Asher (Josh. xix. 27). [ВЕТП-DA GON.] Dagon was represented with the face and hands of a man and the tail of a fish (1 Sam. v. 4).

In the Babylorian mythology the name Dagon, Odakou ($\Omega \delta d \kappa \omega \nu$), is applied to a

family of Judah (1 Chr. iii. 24).

DALMANUTHA (Daluarovod). In Matt. xv. 39 it is said that Jesus "came into the borders of Magdala," while in Mark viii. 10 we read that he "came into the regions (eis $\tau \dot{a} \mu \epsilon \rho \eta$) of Dalmanutha." From this we may conclude that Dalmanutha was a town on the west side of the Sea of Galilee, near Magdala. The latter stood close upon the shore, at the southern end of the little plain of Gennesaret. [MAGDALA.] Immediately south of it a precipitous hill juts out into the sea. Beyond this, about a mile from Magdala, a narrow glen breaks down from the west. At its mouth are some cultivated fields and gardens, amid which, just by the beach, are several copious fountains, surrounded by heavy ancient walls, and the ruins of a village. The place is called '*Ain-el-Barideh*, "the cold Fountain." Here in all probability is the site of the long lost Dalmanutha. J. L. P.

* Mr. Tristram (Land of Israel, p. 429, 2d ed.) would also identify Dalmanutha with 'Ain-el-Barideh. Dr. Thomson (Lund and Book, ii. 60) alightly favors the idea that Dalmanutha may be the present Dulhamia or Dulmamiu on the Jarmuk which flows into the Jordan a little south of the lake of Galilee. But the manifest parallelism between Mark viji. 10 and Matt. xv. 39 (where there can be no doubt about the position of Magdala) requires that it should be found on the west side of the lake and not on the east. It may be that Mark, with his characteristic precision (Westcott, Introduction to the Study of the Gospels, p. 366, Amer. ed.), mentions the more exact place, and Matthew the one near which the Saviour disembarked. The two points on the coast are so near each other that it would be perfectly natural for the writers to adopt this twofold designation Whether the Evangelists agree or differ in cases like this the critics of Baur's school find fault with them; if they agree they merely copy from each other, and if, as here, Matthew writes Magdala but Mark Dalmanutha, it is because Mark wished to show his independence.

DALMATIA (Δαλματία), a mountainous district on the eastern coast of the Adriatic Sea, extending from the river Naro in the S. to the Sa vus in the N. It formed a portion of the Roman province of Illyricum, subsequently to Tiberins's expedition, A. D. 9. St. Paul sent Titus there (2 Tim. iv. 10); he himself had preached the Gospel in its immediate neighborhood (Rom. xv. 19), for the boundaries of illyricum and Dalmatia were not well defined, and the two names were, at the time St. Paul wrote, almost identical. [ILLYRICUM.] W 1. R

DAL'PHON (דְלָפוֹן [prob. Persian]: Δεא φών, some MSS. [FA*] και αδελφων: Delphm), the second of the ten sons of Haman; killed by the Jews on the 13th of Adar (Esth. ix. 7).

DAM'ARIS (Aduapis) [a heifer], an Athenian wor an converted to Christianity by St. Paul's preaching (Acts xvii. 34). Chrysostom (de Sacerdotio, iv 7) and others held her to have been the wife of Dionysius the Areopagite, but apparently for no other reason than that she is mentioned together with him in this passage. Grotius and Hemsterhuis think the name should be $\Delta dua \lambda_{15}$. which is frequently found as a woman's name; but

the permutation of λ and ρ was not uncommon both in pronunciation and writing. We have apl-Baros and KAlBaros, Benkbhos and Beokopos, Bobrohos and alyiropeus, from the obsolete rop or notes, curo, colo (Lobeck on Phrynichus, p. 652). H. A.

* If Damaris had been the wife of Dionysius, she would properly have been called $\dot{\eta}$ youth autou (Acts v. 1) or at least $\dot{\eta}$ youth (Acts xxiv. 24). She must have had some personal or social distinc-tion, to cause her to be thus singled out by name from the others.

* DAMASCENES' (Δαμασκηνοί : Dunusceni), inhabitants of Damascus (2 Cor. xi. 32). It repeats $\ell \nu \Delta a \mu a \sigma \kappa \hat{\varphi}$ just before, but is not alto-gether pleonastic. The city which the Ethnarch guarded was that of the Damascenes, while he himself was an Arabian. H.

DAMASCUS

2 K. xvi. 10, and דִרְמָשָׁק in 1 and 2 Chr.; se tivity, industry, as being a seat of traffic, Ges.]. Δauaσκόs: Damascus) is one of the most ancient and has at all times been one of the most important, of the cities of Syria. It is situated in a plain of vast size and of extreme fertility, which lies east of the great chain of Anti-Libanus, on the edge of the desert. This fortile plain, which is nearly circular, and about 30 miles in diameter, is due to the river Barada, which is probably the "Abana" of Scripture." This stream, rising hig's up on the western flank of Anti-Liba us, forces its way through the chain, running for some time among the mountains, till suddenly it bursts through a narrow cleft upon the open country east of the hills, and diffuses fertility far and wide [ABANA.] "From the edge of the mountain range," says a modern traveller, "you look d wn on the plain of Damascus. It is here seen in its DAMAS'CUS (המשון באישק outer and fullest perfection, with the visible expla

sharm, that which it must have had when it was the solitary seat of civilization in Syria, and which it will have as long as the world lasts. The river is visible at the bottom, with its green banks, rushng through the cleft; it bursts forth, and as if in a moment scatters over the plain, through a circle of 30 miles, the same verdure which had hitherto seen confined to its single channel. . . . Far and wide in front extends the level plain, its horizon sare, its lines of surrounding hills bare, all bare far sway on the road to Palmyra and Bagdad. In the nidst of this plain lies at your feet the vast lake or stand of deep verdure, walnuts and apricots waving above, corn and grass below; and in the midst of this mass of foliage rises, striking out its white arms of streets hither and thither, and its white be a desert into a garden. The various streams

sation of the whole secret of its great and enduring | minarets above the trees which embosom them, the city of Damascus. On the right towers the snowy height of Hermon, overlooking the whole scene. Close behind are the sterile limestone mountains so that you stand literally between the living and the dead " (Stanley, S. & P., p. 410). Another writer mentions among the produce of the plain in question "walnuts, pomegranates, figs, plums, apricots, citrons, pears, and apples " (Addison's Dam. and Palmyra, ii. 92). Olive-trees are also a principal feature of the scene. Besides the main stream of the Barada, which runs directly through the town, supplying its public cisterns, baths, and fountains, a number of branches are given off to the right and to the left, which irrigate the meadows and corn-fields, turning what would otherwise

secate but greatly weakened in volume, at a little | streets " (1 K. xx. 34; comp. Nic. Dam. Fr. p. 31 distance beyond the town; and the Barada flows on towards the east in a single channel for about 15 miles, when it separates, and pours its waters into two small and shallow lakes, which lie upon the verge of the desert. Two other streams. the Wouly Helbon upon the north, and the Awy upon the south, which flows direct from Hermon, increase the fertility of the Damascene plain, and contend for the honor of representing the "Pharpar" of Soripture. [PHARPAR.]

According to Josephus (Ant. i. 6) Damascus was founded by Uz, the son of Aram, and grandson of Shem. It is first mentioned in Scripture in connection with Abraham, whose steward was a native of the place (Gen. xy. 2). We may gather from the name of this person, as well as from the statement of Josephus, which connects the city with the Aramæans, that it was a Semitic settlement. According to a tradition preserved in the native writer, Nicolaüs, Abraham stayed for some time at Damascus, after leaving Charran and before entering the promised land, and during his stay was king of the place. "Abraham's name was," he says, "even in his own day familiar in the mouths of the Damascenes, and a village was shown where he dwelt, which was called after him " (Fr. p. 30). This last circumstance would seem however to conflict with the notion of Abraham having been king, since in that case he would have dwelt in the capital. Nothing more is known of Damascus until the time of David, when "the Syrians of Damascus came to succor Hadadezer, king of Zobah, with whom David was at war (2 Sam. viii. 5; 1 Chr. xviii. 5). On this occasion David "slew of the Syrians 22,000 men;" and in consequence of this victory became completely master of the whole territory, which he garrisoned with Israelites. " David put garrisons in Syria of Damascus; and the Syrians became servants to David, and brought gifts ' (2 Sam. viii. 6). Nicolaüs of Damascus said that the name of the king who reigned at this time was Hadad; and he a cribes to him a dominion, not only over Damascus, but over "all Syria except Phœnicia" (Fr. p. 31). He noticed his attack upon David; and related that many battles were fought between them, the last, wherein he suffered defeat, being " upon the Euphrates." According to this writer Hadad the First was succeeded by a son who took the same name, as did his descendants for ten generations. But this is irree meilable with Scripture. It appears that in the reign of Solomon, a certain Rezon, who had been a subject of Hadadezer, king of Zobah, and had escaped when David conquered Zobah, made himself master of Damascus and established his own rule there (1 K. xi. 23-25). He was "an adversary to Israel all the days of Solomon . . . and he abhorred Israel, and reigned over Syria." Afterwards the family of Hadad appears to have recovered the throne, and a Benhadad, who is probably Hadad III. of Nicolaüs, a grandson of the anagonist of David, is found in league with Baasha, cing of Israel, against Asa (1 K. xv. 19; 2 Chr. svi. 3), and afterwards in league with Asa against Baasha (1 K. xv. 20). He made a successful invasion of the Israelite territory in the reign of that sing: and in the reign of Omri he not only capvared a number of Israelite cities which he added to his own dominions, but even seems to have exercised a species of lordship over Samaria itself, in which he sequired the right of "making himself over it. The mention of this circumstance is fol-

ad fin.). He was succeeded by his son, Hadad IV. (the Benhadad II. of Scripture, and the Benidri of the Assyrian inscriptions), who came at the head of thirty-two subject kings against Ahab, and laid siege to Samaria (1 K. xx. 1). The attack was unsuccessful; and was followed by wars, in which victory declared itself unmistakably on the side of the Israelites; and at last Benhadad was taken prisoner, and forced to submit to a treaty whereby he gave up all that his father had gained, and submitted in his turn to the suzerainty of Ahab (ib. xx. 13-34). The terms of the treaty were perhaps not observed. At any rate three years afterward war broke out afresh, through the claim of Ahab to the city of Ramoth-Gilea. (ib. xxii. 1-4). The defeat and death of Ahab at that place (ib. 15-37) seems to have enabled the Syrians of Damascus to resume the offensive. Their bands ravaged the lands of Israel during the reign of Jehoram; and they even undertook at this time a second siege of Samaria, which was frustrated miraculously (2 K. vi. 24, vii. 6, 7). After this, we do not hear of any more attempts against the Israelite capital. The cuneiform inscriptions show that toward the close of his reign Benhadad was exposed to the assaults of a great conqueror, who was bent on extending the dominion of Assyria over Syria and Palestine. Three several attacks appear to have been made by this prince upon Benhadad, who, though he had the support of the Phoenicians, the Hittites, and the Hamathites, was unable to offer any effectual opposition to the Assyrian arms. His troops were worsted in several engagements, and in one of them he lost as many as 20,000 men. It may have been these circumstances which encouraged Hazael, the servant of Benhadad, to murder him, and seize the throne, which Elisha had declared would certainly one day be his (2 K. viii. 15). He may have thought that the Syrians would willingly acquiesce in the removal of a ruler under whom they had suffered ac many disasters. The change of rulers was not at first productive of any advantage to the Syrians. Shortly after the accession of Hazael (about B. C. 881), he was in his turn attacked by the Assyrians who defeated him with great loss amid the fastnesses of Anti-Libanus. However, in his other wars he was more fortunate. He repulsed an attack on Ramoth-Gilead, made by Ahaziah king of Judah and Jehoram king of Israel in conjunction (2 K viii. 28, 29); ravaged the whole Israelite territory east of Jordan (ib. x. 32, 33); besieged and took Gath (ib. xii. 17; comp. Am. vi. 2); threatened Jerusalem, which only escaped by paying a heavy ransom (2 K. xii. 18); and established a species of suzerainty over Israel, which he maintained to the day of his death, and handed down to Benhadad, his son (2 K. xiii. 3-7, and 22). This prince in the earlier part of his reign had the same good fortune as his father. Like him, he "oppressed Israel," and added various cities of the Israelites to his own dominion (2 K. xiii. 25); but at last a deliverer appeared (verse 5), and Joash, the son of Jehoahaz, " beat Hazael thrice, and recovered the cities of Israel " (verse 25). In the next reign still further advantages were gained by the Israelites. Jeroboam II. (about B. C. 836) is said to have "recovered Damascus" (ib. xiv. 28), and though this may not mean that he captured the city, it at least implies that he obtained a certain influence

582 **DAMASCUS**

lowed ty a long pause, during which we hear noth- | the house of Herod, held his king lon. under the ing of the Syrians, and must therefore conclude that their relations with the Israelites continued eaceable. When they reappear nearly a century later (about B. C. 742) it is as allies of Israel against Judah (2 K. xv. 37). We may suspect that the chief cause of the union now established between two powers which had been so long hostile, was the necessity of combining to resist the Assyrians, who at the time were steadily pursuing a policy of encroachment in this quarter. Scripture mentions the invasions of Pul (2 K. xv. 19; 1 Chr. v. 26), and Tiglath-Pileser (2 K. xv. 29; 1 Chr. v. 26); and there is reason to believe that almost every Assyrian monarch of the period made war in this direction. It seems to have been during a pause in the struggle that Rezin king of Damascus and Pekah king of Israel resolved conjointly to attack Jerusalem, intending to depose Ahaz and set up as king a creature of their own (Is. vii. 1-6; 2 K. xvi. 5). Ahaz may have been already suspected of a friendly feeling towards Assyria, or the object may simply have been to consolidate a power capable of effectually opposing the arms of that country. In either case the attempt signally failed, and only brought about more rapidly the evil against which the two kings wished to guard. Jerusalem successfully maintained itself against the combined attack; but Elath, which had been formerly built by Azariah, king of Judah, in territory regarded as Syrian (2 K. xiv. 22), having been taken and retained by Rezin (ib. xvi. 6), Ahaz was induced to throw himself into the arms of Tiglath-Pileser, to ask aid from him, and to accept voluntarily the position of an Asseyrian feudatory (ib. xvi. 7, 8). The aid sought was given, with the important result that Rezin was slain, the kingdom of Damascus brought to an end, and the city itself destroyed, the inhabitants being carried captive into Assyria (ib. verse 9; comp. Is. vii. 8 and Am. i. 5).

It was long before Damascus recovered from this serious blow. As Isaiah and Amos had prophesied in the day of her prosperity, that Damascus should be "taken away from being a city and be a ruinous heap" (Is. xvii. 1), that "a fire should be sent into the house of Hazael, which should devour the palaces of Benhadad " (Am. i. 4); so Jeremiah, writing about B. C. 600, declares "Damascus is waxed feeble and turneth herself to flee, and fear hath seized on her; anguish and sorrows have sken her, as a woman in travail. How is the city of praise not left, the city of my joy?" (Jer. xlix. 24-5). We do not know at what time Damascus was rebuilt; but Strabo says that it was the most famous place in Syria during the Persian period (xvi. 2, § 19); and we find that before the battle of Issus it was selected by Darius as the city to which he should send for better security the greater part of his treasures and valuables (Arr. Exp. Al. ii. 11). Shortly after the battle of Issus it was taken by Parmenio (ibid.); and from this time it continued to be a place of some importance under the Greeks; becoming however decidedly second to Antioch, which was raised up as a rival to it by the Seleucidse. From the monarchs of this house \$ passed to the Romans, who became masters of it a the war between Pompey and Mithridates (Mos. Whom n. i. 14; comp. Joseph. Ant. Jud. xiv. 2, § 3; and App. Bell. Mithr. p. 244). At the time of the Gospel history, and of the Apostle Paul, it tormed a part of the kingdom of Aretas (2 Cor. trees," and used as the Christian burial-ground

Romans (Joseph. Ant. Jud. xvi. 11, § 9). A little later it was reckoned to Decapolis (Plin. H. N. v 16), after which it became a part of the province known as Phœnicia Libanesia (Hierocl. Syneod. p. 717). It grew in magnificence under the Greek emperors, and when taken by the Mohammedan Arabs in A. D. 634, was one of the first cities of the eastern world. It is not necessary to trace its subsequent glories under the Caliphs, the Saracens, and the Turks. It may however be noticed that there has scarcely been an interruption to its prosperity, and that it is still a city of 150,000 inhabitants.

Damascus has always been a great centre for trade. The difficulties and dangers of the moun tain passes to the west of Anti-Libanus made the line of traffic between Egypt and Upper Syria follow the circuitous route by Damascus rather than the direct one through Cole-Syria, while the trade of Tyre with Assyria and the East generally, passed naturally through Damascus on its way to Palmyra and the Euphrates. Ezekiel, speaking of Tyre, says, " Damascus was thy merchant in the multitude of the wares of thy making, for the multitude of all riches; in the wine of Helbon, and white wool." It would appear from this that Damascus took manufactured goods from the Phœnicians, and supplied them in exchange with wool and wine. The former would be produced in abundance in Coele-Syria and the valleys of the Anti-Libanus range, while the latter scems to have been grown in the vicinity of Helbon, a village still famous for the produce of its vines, 10 or 12 miles from Damascus to the northwest (Geograph. Jour. vol. xxvi. p. 44). But the passage trade of Damascus has probably been at all times more important than its direct commerce. Its merchants must have profited largely by the caravans which continually assed through it on their way to distant countries. It is uncertain whether in early times it had any important manufactures of its own. According to some expositors, the passage in Amos iii. 12 which we translate "i.: Damascus on a couch"

(הָבִרְקָשָׂק עָרָש), means really " on the damask couch," which would indicate that the Syrian city had become famous for a textile fabric as early as the eighth century B. C. There is no doubt that such a fabric gave rise to our own word, which has its counterpart in Arabic as well as in most of the languages of modern Europe; but it is questionable whether either this, or the peculiar method of working in steel, which has impressed itself in a similar way upon the speech of the world, was invented by the Damascenes before the Mohammedan era. In ancient times they were probably rather a consuming than a producing people, as the passage in Ezekiel clearly indicates.

Certain localities in Damascus are shown as the site of those Scriptural events which especially interest us in its history. A "long, wide thoroughfare " - leading direct from one of the gates to the Castle or palace of the Pasha - is "called by the guides · Straight '" (Acts ix. 11); but the natives know it among themselves as "the Street of Bazaars" (Stanley, p. 412). The house of Judas is shown, but it is not in the street " Straight " (Pococke, ii. 119). That of Ananias is also pointed out. The scene of the conversion is confidently said to be "an open green spot, surrounded by gi. 32), an Arabian prince, who, like the princes of but this spot is on the eastern side of the city

whereas St. Paul must have approached from the | Dan was own brother to Naphtali; and as the son south or west. Again it appears to be certain that "four distinct spots have been pointed out at different times" (Stanley, p. 412) as the place where the ' great light suddenly shined from heaven (Acts ix. 3); so that little confidence can be placed in any of them. The point of the walls at which St. Paul was let down by a basket (Acts ix. 25; 2 Cor. xi. 33) is also shown; and, as this locality is free from objection, it may be accepted, if we think that the tradition, which has been so faithless or so uncertain in other cases, has any value bere.

In the vicinity of Damascus certain places are shown, traditionally connected with the prophet Elisha; but these local legends are necessarily even more doubtful than those which have reference to the comparatively recent age of the Apostles.

(See Stanley's Sinai and Palestine ; Maundrell's Journey to Damascus; Addison's Damascus and Palmyra; Pococke's Travels; and especially Porter's Fire Years in Damascus, and his account of the country round Damascus in the Geographical Journal, vol. xxvi.) a G R.

* DAMN, DAMNATION. These terms. when the common English version was made, were not restricted to their present meaning, but were used also in their primitive sense of condemn and constemnation (comp. Pope's "damn with faint praise "). This, often with the associated idea of punishment, is all that the Greek words which they represent properly signify. Dumn is the rendering of naranplyon, Mark zvi. 16; Rom. ziv. 23, "h that doubteth is damned (condemned) if he eat;" and rolver, 2 Thess. ii. 12. Dumnation is the rendering of nofma, literally "judgment," Matt. xxiii. 14; Mark xii. 40; Luke xx. 47; Rom. iii. 8, xiii. 2, "they that resist shall receive to themselves dumnation " (punishment); 1 Cor. xi. 23, "he that eateth and drinketh unworthily eateth and drinketh damnation (condemnation, judgment) to himself; " 1 Tim. v. 12; - spiois, Matt. xxiii. 33; Mark ili. 29; John v. 29; — καταβίκη, "condemnation," "punishment," Wisd. xii. 27; and ἀπάλεια, "destruction," 2 Pet. ii. 3.

DAN. 1. (7]: Δdu ; Joseph. Δdu , $\theta \epsilon \delta \kappa \rho i$ -דסי עי דווינה פואסוני אמדע דאי יצאא. אשידמי Dan). The fifth son of Jacob, and the first of Bilhah, Rachel's maid (Gen. xxx. 6). The origin of the name is given in the exclamation of Rachel

- "'God hath judged me ('키귀귀, dananni) . . and given me a son,' therefore she called his name i. e. "judge." In the blessing of Jacob Dan, (Gen. xlix. 16) this play on the name is repeated - " Dan shall b judge (', ', yadin) his people.

a • It is understood that Mr. Rogers, the English "onsul at Damascus, has in preparation an elaborate work on the manners and customs of the Syrians similar to that of Mr. Lans on Egypt. H.

^b Gesenius has pointed out a slight difference be tween the two derivations; the erb being active in the latter and passive in the former (Thes. 836). This is quite in keeping with the uncertainty which stiends many of these ancient parunomastic ieriva-Hons (compare Assi, BENJAMIN, and others).

c The frequent variations in the LXX, forms also rate reliance on these numbers ; and, in addition, it should not be overlooked that the census in Num. I. s of fighting men, that of xxvi. of the "children of

of Rachel's maid, in a closer relation with Rachel's sons, Joseph and Benjamin, than with the other members of the family. It may be noticed that there is a close affinity between his name and that of DINAH, the only daughter of Jacob whose name is preserved.

The records of Dan are unusually meagre. Of the patriarch himself no personal history is, unfortunately, preserved. Only one son is attributed to him (Gen. xlvi. 23); but it may be observed that "Hushim" is a plural form, as if the name, not of an individual, but of a family; and it is remarkable - whether as indicating that some of the descendants of Dan are omitted in these lists, or from other causes - that when the people were numbered in the wilderness of Sinai, this was, with the exception of Judah, the most numerous of all the tribes. containing 62,700 men able to serve. The position of Dan during the march through the desert was on the north side of the tabernacle (Num. ii. 25). Here, with his brother Naphtali, and Asher, the son of Zilpah, before him, was his station, the hindmost of the long procession (ii. 31, x. 25). The

names of the "captain" (ND) of the tribe at this time, and of the "ruler" (the Hebrew word is the same as before), who was one of the spies (xiii. 12), are preserved. So also is the name of one who played a prominent part at that time, " Aholiab the son of Ahisamach, of the tribe of Dan," associated with Bezaleel in the design and construction of the fittings of the tabernacle (Fx. xxxi. 6, &c.). The numbers of this tribe were not subject to the violent fluctuations which increased or dimmished some of its brethren (comp. the figures given in Num. i. and xxvi.), and it arrived at the threshold of the Promised Land, and passed the ordeal of the rites of Baal-peor (Num. xxv.) with an increase of 1700 on the earlier census." The remaining notices of the tribe before the passage of the Jordan are unimportant. It furnished a "prince" (Nasid as before) to the apportionment of the land; and it was appointed to stand on Mount Ebal, still in company with Naphtali (but opposite to the other related tribes), at the ceremony of blessing and cursing (Deut. xxvii. 13). After this nothing is heard of Dan till the specification of the inheritance allotted to him (Josh. xix. 48). He was the last of the tribes to receive his portion, and that portion, according to the record of Joshua - strange as it appears in the face of the numbers just quoted - was the smallest of the twelve. But notwithstanding its smallness it had eminent natural advantages. On the north and east it was completely embraced by its two brother-tribes Ephraim and Benjamin, while on the south-east and routh it joined Judah, and was thus surrounded by the

Reuben," &c., and therefore probably without that limitation.

d This one word is rendered in the A. V. by " prince," " ruler," " captain," " chief," and " gov ernor."

" The enumeration of the tribes in this record is in the order of their topographical position, from S. to N. It is remarkable that Dan is named after Naphtali and Ashe , as if already associated with the northern position afterwards occupied by the city Dan. This is also the case in Judg. i. 84, and 1 Chr. zii. 55. The writes is not aware that any explanation has I sen offered of this apparent anomaly.

Digitized by

three most powerful states of the whole confederacy. | xviii. 1).6 They perhaps furnish a reason for the Of the towns enumerated as forming "the 'border of its inheritance," the most easterly which can now be identified are Ajalon, Zorah (Zareah), and IP-Shemesh (or Beth-shemesh; which see). These places are on the slopes of the lower ranges of hills by which the highlands of Benjamin and Judah descend to the broad maritime plain, that plain which on the S. bore the distinctive name of "the Shefelsh," and more to the N., of "Sharon.' From Japho — afterwards Joppa, and now Ydfa — on the north, to Ekron and Gathrimmon on the south - a length of at least 14 miles - that noble tract, one of the most fertile in the whole of Palestine, was allotted to this tribe. By Josephus (Ant. v. 1, § 22, and 3, § 1) this is extended to Ashdod on the south, and Dor, at the foot of Carmel, on the north, so as to embrace the whole, or nearly the whole, of the great plain. But this rich district, the corn-field and the garden of the whole south of Palestine (Stanley, S. and P. 258), which was the richest prize of Phœnician conquest many centuries later," and which even in the now degenstate state of the country is enormously productive, was too valuable to be given up without a struggle by its original possessors. The Amorites accordingly "forced the children of Dan into the mountain, for they would not suffer them to come down into the valley" (Judg. i. 34) - forced them up from the corn-fields of the plain, with their deep black soil, to the villages whose ruins still crown the hills that skirt the lowland. True, the help of the great tribe so closely connected with Dan was not wanting at this juncture, and . the hand of the children of Joseph," i. e. Ephraim, "prevailed against the Amorites" for the time. Rot the same thing soon occurred again, and in the glimpse with which we are afterwards favored into the interior of the tribe, in the history of its great hero, the Philistines have taken the place of the Amorites, and with the same result. Although Samson " comes down " to the " vineyards of Timnath" and the valley of Sorek, yet it is from Mahaneh-Dan - the fortified camp of Dan, between Zorah and Eshtaol, behind Kirjath-jearim - that he descends, and it is to that natural fastness, the residence of his father, that he "goes up" again after his encounters, and that he is at last borne to his family sepulchre, the burying-place of Manoah (Judg. xiv. 1, 5, 19, xiii. 25, xvi. 4; comp. xviii. 19. xvi. 31).

DAN

These considerations enable us to understand how it happened that long after the partition of the and "all the inheritance of the Danites had not fallen to them among the tribes of Israel " (Judg.

a See the inscription of king Esmunasar, as interpreted by Stanley (S. § P. pp. 278, 258). b * The "all" in this passage (A. V.) has nothing

answering to it in the liebrew, and hides from the reader a peculiarity of the text. The Hebrew writer states that the Danites had not yet received an in heritance among the tribes of Israel. What is m may be that they had not received any territory adequate to the wants of an overgrown population in their original settlement, or, more probably, had received none which they could securely occupy as a permanent possession on account of the superior power of the Philistines (see Bertheau, Richter und Ruth, p. 196). Cassel suggests that the Dunites may have complained in these terms of their having no inheritance as an sx use for their rapacity, when the complaint was not rue in fact (Rich'w und Ruth, p. 160). Ħ.

absence of Dan from the great gathering of the tribes against Sisera (Judg. v. 17). They also explain the warlike and independent character of the tribe betokened in the name of their headquarters, as just quoted — Mahaneh-Dan, "the camp, or host, of Dan" — in the fact specially insisted on and reiterated (xviii. 11, 16, 17) of the complete equipment of their 600 warriors d "appointed with weapons of war," - and the lawless freebooting style of their behavior to Micah. There is something very characteristic in the whole of that most fresh and interesting story preserved to us in Judg. xviii. - a narrative without a parallel for the vivid glance it affords into the manners of that distant time - characteristic of boldness and sagacity, with a vein of grim sardonic humor, but undeformed by any unnecessary bloodshed.

In the "security" and "quiet" (Judg. xviii. 7, 10) of their rich northern possession the Danites enjoyed the leisure and repose which had been denied them in their original seat. But of the fate of the city to which they gave "the name of their father " (Josh. xix. 47), we know scarcely anything. The strong religious feeling which made the Danites so anxious to ask counsel of God from Micah's Levite at the commencement of their expedition (Judg. xviii. 5), and afterwards take him away with them to be "a priest unto a tribe and a family in Israel," may have pointed out their settlement to the notice of Jeroboam as a fit place for his northern sanctuary. But beyond the exceedingly obscure notice in Judg. xviii. 30, we have no information . on this subject. From 2 Chr. ii. 14 it would appear that the Danites had not kept their purity of lineage, but had intermarried with the Phœnicians of the country. (See an elaboration of this in Blunt, Coincidences, Pt. II. iv.)

In the time of David Dan still kept its place among the tribes (1 Chr. xii. 35). Asher is omitted, but the "prince of the tribe of Dan" is mentioned in the list of 1 Chr. xxvii. 22. But from this time forward the name as applied to the tribe vanishes; it is kept alive only by the northern city. In the genealogies of 1 Chr. ii. to xii. Dan is omitted entirely, which is remarkable when the great fame of Samson and the warlike character of the trille are considered, and can only be accounted for by supposing that its genealogies had perished. It is perhaps allowable to suppose that little care would be taken to preserve the records of a tribe which had left its original seat near the head-quarters of the nation, and given its name to a distant city notorious only as the seat of a rival and a forbidden worship. Lastly, Dan is omitted from the list of

c Ewald ascribes it to their being engaged in commerce (Dichter, i. 180). This may have been the case with Asher, but can hardly, for the reasons a lvanced above, have been so with Dan. The "ships " of Deborah's song are probably only a bold figure, in allusion to Joppa

d The complete appointment of these warriors is perhaps a more certain sign of the tribe being practiced in war, when we recollect that it was the Philistine policy to deprive of their arms those whom they had conquered (comp. 1 Sam. xiii. 19-21, and perhaps also Samson's rude weapon, the jaw-bone).

· For "the captivity of the land," VTE. Sweld

proposes to read " of the ark," " time of Samuel (1 Sam. iv. 11), Gesch. ii. pt. 2 y 9999

of St. John (Rev. vii. 5-7).

The mention of this tribe in the "blessings" of Jacob and Moses must not be overlooked, but it is lifficult to extract any satisfactory meaning from them. Herder's interpretation as given by Prof. Stanley will fitly close this notice.

"It is doubtful whether the delineation of Dan in Jacob's blessing relates to the original settlement on the western outskirts of Judah, or to the northern outpost. Herder's explanation will apply almost equally to both. 'Dan,' the judge, 'shall judge his people; ' he, the son of the concubine, no icss than it e sons of Leah; he, the frontier tribe, no less that those in the places of honor, shall be 'as one of the tribes of Israel.' 'Dan shall be a serpent by the way, an adder in the path,' that is of the invading enemy by the north or by the west, ' that biteth the heels of the horse,' the indigenous serpent biting the foreign horse unknown to Israelite warfare, 'so that his rider shall fall backwards.' And his war-cry as from the frontier fortresses shall be · For Thy salvation, O Lord, I have waited !' " In the blessing of Moses the southern Dan is lost sight of. The northern Dan alone appears, with the same characteristics though under a different image; •a lion's whelp ' in the far north, as Judah in the far south: 'he shall leap from Bashan' - from the slopes of Hermon, where he is couched watching for his prey."

2. (77: Δάν; Joseph. το Δάνον: Dan.) The well-known city, so familiar as the most northern andmark of l'alestine, in the common expression ' from Dan even to Beersheba." The name of the place was originally LAISH or LESHEM (Josh. xix. 47). Its inhabitants lived "after the manuer of the Zidonians," i. e. engaged in commerce, and without defense. But it is nowhere said that they were Phœnicians, though it may perhaps be inferred from the parentage of Huram - his mother "of the daughters of Dan," his father "a man of Tyre ' (2 Chr. ii. 14). Living thus "quiet and secure,' they fell an easy prey to the active and practiced freebooters of the Danites. They conferred upon their new acquisition the name of their own tribe, " aft r the name of their father who was born unto Israet" (Judg. xviii. 29; Josh. xix. 47), and Laish became Dan.

The locality of the town is specified with some minuteness. It was "far from Zidon," and "in the valley (כָלָה, Emek) that is by (לָ) Bethrehob," but as this latter place has not been identified with certainty, the position of Dan must be ascertained by other means.

The graven image which the wandering Danites had stolen from Micah they set up in their new home, and a line of priests was established, which, though belonging to the tribe of Levi and even descended from Moses,^b was not of the family of Aaron, and therefore not belonging to the regular priesthood. To the form of this image and the nature of the idolatry we have no clew, nor to the

,hose who were sealed by the Angel in the vision relation, if any, which existed between it and the calf-worship afterwards instituted there by Jeroboam (1 K. xii. 29, 30). The latter is alluded to by Amos (viii. 14) in a passage which possibly preserves a formula of invocation or adjuration in use among the worshippers; but the passage is very obscure.

DAN

After the establishment of the Danites at Dan it became the acknowledged extremity of the country. and the formula "from Dan even to Beersheba" is frequent throughout the historical books (Judg. xx. 1; 1 Sam. iii. 20; 2 Sam. iii. 10, xvii. 11, xxiv. 2, 15; 1 K. iv. 25). In the later records the form is reversed, and becomes "from Beershebs even to Dan " (1 Chr. xxi. 2; 2 Chr. xxx. 5).

Dan was, with other northern cities, laid waste by Benhadad (1 K. xv. 20; 2 Chr. xvi. 4), and this is the last mention of the place.

Various considerations would incline to the suspicion that Dan was a holy place of note from a far earlier date than its conquest by the Danites. These are: (1.) the extreme reluctance of the Orientals - apparent in numerous cases in the Bible - to initiate a sanctuary, or to adopt for worship any place which had not enjoyed a reputation for holiness from pre-historic times. (2.) The correspondence of Dan with Beershebs in connection with the life of Abraham - the origin of Beersheba also being, as has been noticed, enveloped in some diversity of statement. (3.) More particularly its incidental mention in the very clear and circumstantial narrative of Gen. xiv. 14, as if well known even at that very early period. Its mention in Deut. xxxiv. 1 is also before the events related in Judg. xviii., though still many centuries later than the time of Abraham. But the subject is very difficult, and we can hardly hope to arrive at more than conjecture upon it.

With regard to Gen. xiv. 14 three explanations suggest themselves. 1. That another place of the same name is intended. (See Kalisch, ad loc. for an ingenious suggestion of Dan-jaan; another is disposed of by Prof. Stanley, S. of P. p. 400.) Against this may be put the belief of Josephus (comp. Ant. i. 10, § 1, with v. 3, § 1) and of Jerome (Onomust. Laisa, comp. with Quest. Hebr. in Genesim, xiv. 14), who both unhesitatingly identify the Dan of the Danites, near Paneas, with the Dan of Abraham. 2. That it is a prophetic anticipation by the sacred historian of a name which was not to exist till centuries later, just as Samson has been held to be alluded to in the blessing of Dan by Jacob. 3. That the passage originally contained an older name, as Laish; and that when that was superseded by Dan, the new name was inserted in the MSS. This last is Ewald's (Gesck. i. 73), and of the three is the most feasible, especially when we consider the characteristic, genuine air of the story in Judges, which fixes the origin of the name so circumstantially. Josephus (Ant. v. 8, § 1) speaks positively of the situation of Laish as "not far 'rom Mount Libanus and the springs of the lesser Jordan, near $(\kappa \alpha \tau d)$ the great plain of the city of Sidon " (compare also Ant. viii. 8, §

a According to Jewish tradition, Jacob's blewing on Day, is a prophetic allusion to Samson, the great 'Judge " of the tribe; and the ejaculation with which t closes was that actually uttered by Samson when brought into the temple at Gaza. (See the Targum 's. Jonathan on Gen. xlix. 16, 17, and the quotations in Kalisch's Genesis ad loc.) Modern critics likewise see an allusion to Samson in the terms of the blessing, of Judg. xviii. 80. [MANASSES, 5.]

which they presume on that account to have been written after the days of the Judges (Ewald, Gesch. i. 92). Jerome's observations (Qu. in Grs.) on this passage are very interesting. ^b Moses is doubtless the genuine reading of the

mane, which, by the insertion of an N, was changed by the Jews into Manasseh, as it stands in the A. V

4); and this, as just said, he identifies with the | Moses, compactly displaced and eclipsed the under Dan in Gen. xiv. 14 (Ant. i. 10, § 1). In consonance with this are the notices of St. Jerome, who derives the word "Jordan" from the names of its two sources. Dan, the westernmost and the smaller of the two, he places at four miles from Paneas on the road to Tyre. In perfect agreement with this is the position of Tell el-A adi, a mound from the foot of which gushes out "one of the largest fountains in the world," the main source of the Jordan (Rob. iii. 390-393; Stanley, 394, 395). The Tell itself, rising from the plain by somewhat steep terraces, has its long, level top strewed with ruins, and is very probably the site of the town and citadel of Dan. The spring is called *el Leuklan*, possibly a corruption of Dan (Rob. iii. 892), and the stream from the spring Nahr ed-Dhan (Wilson, ii. 173), while the name, Tell el-Kâdi, "the Judge's mound," agrees in signification with the ancient name.^a Both Dr. Robinson and Prof. Stanley give the exact agreement of the spot with the requirements of the story in Judg. xviii. - " a good land and a large, where there is no want of anything that is on the earth" (Rob. iii. 396; Stanley, as above). G.

DAN

* Delitzsch accounts for the name of Dan in Gen. xiv. 14, by his theory that the Pentateuch was completed by sone of the companions and survivors of Moses. Murphy (Commentary on Genesis, p. 286, Amer. ed.) argues from the mode of designation here employed that Dan was the original name, current in Abraham's time. He supposes that the recollection of its ancient name and story attracted the Danites, and that after taking and destroying the city, they displaced the intermediate name, Leshem (according to Josh. xix. 47), by the original designation. But the conjecture not only lacks foundation, but seems in conflict with the narrative, which refers the origin of the name to "the name of their father" Dan (Josh. xix. 47; Judg. xviii. 29). Ewald's suggestion (No. 3 above) is strongly countenanced by the character of the narrative and the circumstances of the case. The air of extreme antiquity which invests Gen. xiv. has been recognized even by such questioners as Ewald, Tuch, and Knobel; Ewald ascribing it to patriarchal times, and Tuch to a period prior to the Israelitish invasion, except for this one name. Even the general phraseology of the chapter is peculiar. But the names of places have this peculiarity, that several of them were obsolete at the time of the conquest of Canaan, and are interpreted by other names appended; thus, Bela which is Zoar; En-mishpat which is Kadesh; the vale of Siddim which is the Salt Sea. In one or two other cases we have an old name without the more modern appended, as though the later were not yet established or originated; thus, Hazazon-tamar, which afterwards became En-gedi (2 Chr. xx. 2), and El Paran, the older name, as Keil and Knobel argue, for Flath.

Now in the midst of these ancient appellations ocurs one place not designated by its older name, but by a title which, a few years after the time of

name. When, however, we bear in mind the eatire obscurity of the place under its former appellation, the speedy change, the renown of its later name, and the circumstances under which it was given, it can be no matter of surprise that a later hand, instead of adding the explanatory phrase "which is Dan" or leaving the old and unknows name Leshem, should directly substitute the one for the other. The solution seems equally obvious and simple, and the transaction itself almost unavoidable.

Keil, however, still insists with Kalisch and cthers on the first of the above solutions, namely, that it was another Dan, the Dan-Jaan of 2 Sam. xxiv. 6, and belonging to Gilead (Deut. xxxiv. 1). They say that Laish-Dan did not lie on either of the two roads leading from the vale of Siddim or of the Jordan to Damascus; whereas this Dan, supposed to be "in northern Perea to the southwest of Damascus " (Keil), "between Gilead and Sidon " (Kalisch), would be perfectly appropriate to the passage.^b The argument involves too many assumptions to be of much weight. Yet on the other hand it must be admitted that we cannot deny the existence of another Dan without supposing an incorrect reading in 2 Sam. xxiv. 6 (the interchange

of 7 for 7); a supposition countenanced by the Vulgate, though not so clearly by the Septuagint.

3. (77: om. in LXX. [in most MSS.; Comp. Δdv ; Ald. $\Delta \epsilon \delta dv$:] Dan). Apparently the name of a city, associated with Jason as one of the places in Southern Arabia from which the Phoenicians obtained wrought iron, cassia, and calamus (Ez. xxvii. 19). Ewald conjectures that it is the same as the Keturahite Dedan in Gen. xxv. 3, but his conjecture is without support, though it is adopted by Fürst (Handw.). Others refer it to the tribe of Dan, for the Danites were skillful workmen, and both Aholiab (Ex. xxxv. 34) and Huram (2 Chr. ii. 13) belonged to this tribe. But for this view also there appears to be as little foundation, if we consider the connection in which the name occurs. W. A. W.

DANCE. As emotions of joy and sorrow universally express themselves in movements and gestures of the body, efforts have been made among all nations, but especially among those of the south and east, in proportion as they seem to be more demonstrative, to reduce to measure and to strengthen by unison the more pleasurable - those of joy. The dance is spoken of in Holy Scripture universally as symbolical of some rejoicing, and is often coupled for the sake of contrast with mourning, as in Eccl. iii. 4, "a time to mourn and a time to dance" (comp. Ps. xxx. 11; Matt. xi. 17). In the earlier period it is found combined with some song or refruin (Ex. xv. 20, xxxii. 18, 19; 1 Sam. xxi.

11); and with the 月戸, or tambourine (A. V. " timbrel "), more especially in those impulsive outbursts of popular feeling which cannot find suffi-

b * A still more recent writer, Quarry (Genesis and its Authorship, p. 472. Lond. 1866), deems it after all tenable position that the Dan of Abraham (Gen. xi= 14) was a different one from that of the later Hebrew history. Zeller (Zeller's Bibl. Wörterb. p. 218) proposed the same view.

a This agreement in meaning of the modern name with the ancient 18 so rare, that little dependence can pe placed on it. Indeed, Stanley (S. & P. p. 394, note) has shown grounds for at least questioning it. The modern names, when representatives of the ancient, generally agree in sound though often disagreeing in mening.

sent sent in voice or in gesture singly.^a Nor is there any more strongly popular element traceable in the religion of the ancient Jews than the opportunity so given to a prophet or prophetess to kinlle enthusiasm for Jehovah on momentous crises of national joy, and thus root the theocracy in their leepest feelings, more especially in those of the women, ther selves most easily stirred, and most capable of exciting others. The dance was regarded even by the Romans as the worship of the body, and thus had a place amongst sacred things: " Sane ut in religionibus saltaretur," says Servius ad Virg. Bucol. v. 73, "hec ratio est, quod nullam majores nostri partem^b corporis esse voluerunt, quæ non sentiret religionem." A similar sentiment is conveyed in Ps. xxxv. 10: "All my lones shall say, Lord, who is like unto thee?" So the "tongue" is the lest member among many, the "glory" ́(₽∎. lvii. 8) of the whole frame of flesh, every part of which is to have a share in the praises of God. Similarly among the Greeks is ascribed by Athenzeus to Socrates the following fragment -

οι δè χόροις κάλλιστα θεούς τιμώσιν άριστοι èr πολέμφ

who also praises among styles of dancing τδ eiryeris καl άνδρωδες (Athen. xiv. p. 627; comp. Arr. Alex. iv. 11).

Dancing formed a part of the religious ceremonies of the Egyptians, and was also common in private entertainments. Many representations of dances both of men and women are found in the Egyptian paintings. The "feast unto the Lord," which Moses proposed to Pharaoh to hold, was

really a dance $(\Im, \exists \neg, \exists e below)$.

Plato certainly (Ley. vii, 6) reckons dancing (Spxnois) as part of gymnastics (yuuraorish). So far was the feeling of the purest period of antiquity from attaching the notion of effeminacy to dancing, that the ideas of this and of warlike exercise are mutually interwoven, and their terms almost correspond as synonyms (Hom. 1l. xvi. 617; comp. Creuzer, Symb. ii. 367, iv. 474; and see specially Lucian de Salt., passim). Women, however, among the Hebrews made the dance their aspecial means of expressing their feelings; and when their husbands or friends returned from a hattle on behalf of life and home, felt that they too sught to have some share in the event, and found that share in the dance of triumph welcoming them back. The "eating and drinking and dancing" of the Amalekites is recorded, as is the people's

"rising up to play" (기기가, including a revelling iance), with a tacit censure; the one seems to mark the lower civilization of the Amalekites, the other the loseness of conduct into which idolatry led the Larselites (Ex. xxxii. 6; 1 Cor. x. 7; 1 Sam. xxx. 16). So among the Bedouins, native dances of men are mentioned (Lynch, *Dead Sea*, p. 295; Stanley, pp. 56, 466), and are probably an ancient rustom. The Hebrews, however, save in such moments of temptation, seem to have left dancing to the women. But more especially on such occasions of triumph, any woman whose nearness of kin to the champion of the moment gave her a public

• The proper word for this combination is proper yrange. xvi. 25; 1 Sam xviii. 6; 2 Sam. vi. 5, 21; 1 Mar. xiii. 8, xv. 29; Jel. xxx. 19), though it also inwholes other senses.

character among her own sex, seems to have felt that it was her part to lead such a demonstration of triumph, or of welcome; so Miriam (Ex. xv. 20) and so Jephthah's daughter (Judg. xi. 34), and similarly there no doubt was, though none is mentioned, a chorus and dance of women led by Deborah, as the song of the men by Barak (comp. Judg. v. 1 with Ex. xv. 1, 20). Similarly, too. Judith (xv. 12, 13) leads her own song and dance of triumph over Holofernes. There was no such leader

Egyptian dances. (Wilkinson.)

of the choir mentioned in the case of David and Saul. Hence whereas Miriam "answered" the entire chorus in Ex. xv. 21, the women in the lat ter case "answered one another as they played " (1 Sam. xriii. 7), that "answer" embodying the sentiment of the occasion, and forming the burden of the song. The "coming out" of the women to do this (Judg. xi. 34; 1 Sam. xviii. 6; comp "went out," Ex. xv. 20) is also a feature worthy of note, and implies the object of meeting, attending upon, and conducting home. So Jephthah's daughter met her father, the "women of all the cities" came to meet and celebrate Saul and David, and their host, but Miriam in the same way "goes out" before "Jehovah" the "man of war" whose presence seems implied. This marks

¹ Among Romans of a late period the sontiment had expired. "Nemo fere saltat sobrius, nisi forte insanit" (Gi. pro Mur. p. 14). Perhaps, however, the standard of m. als would rather lead us to expect 2° at drunkenness was common than that dancing was maps.

the peculiarity of David's conduct, when, on the return of the Ark of God from its long sojourn among strangers and borderers, he (2 Sam. vi. 5-22) was himself choreques; and here too the women. with their timbrels " (see especially v. 5, 19, 20, 22), took an important share. This fact brings out more markedly the feelings of Saul's daughter Michal, keeping aloof from the occasion, and "looking through a window " at the scene. She should, in accordance with the examples of Miriam, &c. have herself led the female choir, and so come out to meet the Ark, and her lord. She stays with the "household" (ver. 20), and "comes out to meet" him with reproaches, perhaps feeling that his zeal was a rebuke to her apathy. It was before "the handmaids," i. e. in leading that choir which she should have led, that he had "uncovered" hiuself: an unkingly exposure as she thought it, which the dance rendered necessary b --- the wearing merely the ephod or linen tunic. The occasion was meant to be popularly viewed in connection with David's subjugation of various enemies and accession to the throne of Israel (see I Chr. xii. 23-xiii. 8); he accordingly thinks only of the honor of God who had so advanced him, and in that forgets self (comp. Müller, de Davide ant. Arc. Ugolini, xxxii.). From the mention of "damsels, "timbrels," and "dances" (I's. lxviii, 25, cxlix. 3, cl. 4), as elements of religious worship, it may perhaps be inferred that David's feeling led him to incorporate in its rites that popular mode of festive celebration. This does not seem to have survived him, for as Saalschütz remarks (Archäol. der Hebr. vol. i. p. 299), in the mention of religious revivals under Hezekiah and Josiah, no notice of them occurs; and this, although the "words," the "writand the "commandment of David" on such ing. subjects, are distinctly alluded to (2 Chr. xxix. 30, xxxv. 4, 15). It is possible that the banishing of this popular element, which found its vent no doubt in the idolatrous rites of Baal and Astarte (as it certainly did in those of the golden calf, Ex. xxxii. 19), made those efforts take a less firm hold on the people than they might have done; and that David's more comprehensive scheme might have retained some ties of feeling which were thus lost. On the other hand was doubtless the peril of the soose morality which commonly attended festive dances at heathen shrines. Certainly in later Judaism the dance was included among some religious festivities, c. g. the feast of Tabernacles (Mishna, Succah, v. 3, 4), where, however, the performers were men. This was probably a mere following the example of David in the letter. Also in the sarlier period of the Judges the dances of the virgine in Shiloh (Judg. xxi. 19-23) were certainly part of a religious festivity. It seems also from this last instance clear, and from the others probable, that such dances were performed by maidens apart from men, which gives an additional point to the reproach of Michal. What the fashion or figure of the dance was is a doubtful question; nor is it tkely to have lacked such variety as would adapt it

to the various occasions of its use. The word 22 means to move in a ring, or round; whence in Ps.

" The P) was clearly the women's instrument. see the allotment of the other different instruments to on in 1 Chr. xv. 16-21, and xvi. 6, 42; comp. also the סופטור העפטר אני פור געונו. 26.

4 Some comment

zhi. 4 we find בורך הרגב, meaning a fastive crowd, apparently as dancing in a ring. So 2%7. whence , means to turn. In modern Oriental dances a woman leads off the dance, the others then follow her with exact imitation of her artistic and graceful attitudes. A parallelism of movement is also incident to it (Saalschütz, ib. p. 301). Possibly Miriam so led her countrywomen. The same writer thinks that in Cant. vi. 13, the words מחלת הפהנים (A. V. "company of two armies ") imply two rows of dancing girls, and that the address in the singular number, "return, return," and again in vii. 1 applies to the movements of the individual performer in a kind of contre-danse. The interpretation, however, does not remove the obscurities of the passage.

Dancing also had its place among merely festive amusements apart from any religious character (Jer xxxi. 4, 13; Lam. v. 15; Mark vi. 22; Luke xv. 25). The accomplishments exhibited by Herodias's daughter seen, however, to show that Dean Trench's remark on the last-named passage that the dancers were of course not the guests but hired performers is hardly to be received with strictness; although the tendency of luxury in the East has no doubt been to reduce the estimation in which the pastime, as shared in, is there held. Children, of course, always did and always will dance (Job xxi. 11; Matt. xi. 17; Luke vii. 32). Whilst in their "dancing dervishes" the Turks seem to have adopted into their system the enthusiastic raptures, at once martial and sacred, which (e. g. in the Roman Sulii) seem indigenous in many southern and eastern races from the earliest times. For further remarks Spencer, de Salut. ret. Hebr., may be consulted (Ugolini, xxx.); and, for the Greek and Roman dances, see Dict. of Ant. art. Sultatio. н. н.

DANCE. By this word is rendered in the A. V. the Hebrew term Machiel, 2000. a musical instrument of percussion, supposed to have been used by the Hebrews at an early period of their history. Some modern lexicographers, who regard Machol as synonymous with Rubid, TIT (Focl. iii. 4), restrict its meaning to the exercise or amusement of dancing. But according to many scholars, it also signifies a musical instrument used for accompanying the dance, and which the Hebrews therefore called by the same name as the dance itself. The Septuagint generally renders machil xopos, " dancing: " occasionally, however, it gives a different meaning, as in Ps. xxx. 11 (Heb. Bible, ver. 12), where it is translated xapa, "joy." and ir. Jer. xxxi. 4 and 14, where it is rendered our you's, "assembly." The Semitic versions of the O. T. " assembly." almost invariably interpret the word as a musical instrument.

On the joyous occasion wher the Israelitos escape from their Egyptian pursuers, and reach the Arabian shore of the Red Sea in safety, Miriam is represented as going forth striking the F in, and

out that it was not the act of dancing, but the dress divested of upper robes which was the subject of re mark. But clearly the "dancing with all his might" could hardly be done in the dignified costume of reg alty : every Hebrew would see that the one implies tors have been at pains to point the other. Comp. Ex. xxxii. 6, 25.

followed by her sisters in faith, who join in " with | small bells attached to its border, and was played timbrels and dances " (Ex. xv. 20). Here the sense of the passage seems to be, agreeably to the Auth. Vers., that the Hebrew women came forth to dance. and to accompany their dance by a performance on timbrels; and this is the view adopted by the majority of the Latin and English commentators. Parkhurst and Adam Clarke do not share this opinion. According to the former, machol is "some fistular wind-instrument of music, with

holes, as a flute, pipe, or fife, from 77, to make a hole or opening;" and the latter says, "I know no place in the Bible where machol and machakuth mean dance of any kind; they constantly signify some kind of pipe." The Targumists very fre-quently render machol as a musical instrument. In Ex. xv. 20, Onkelos gives for machalath the

Aramaic word 7'2277, which is precisely the same employed by him in Gen. xxxi. 27 for cinnin (A. V. " harp "). The Arabic version has for muchol

in most places طبل, pl. طبول, translated by Freytag, in his Arabic Lexicon, "a drum with either one or two faces; " and the word ובמחלות (Judg. xi. 34, A. V. " and with dances ") is ren-

dered by Siist, "songs." Gesenius, Fürst, and

others, adopt for the most part the Septuagint rendering; but Rosenmüller, in his commentary on Ex. xv. 20, observes that, on comparing the passages in Judg. xi. 34, 1 Sam. xviii. 6, and Jer. xxxi. 4, and assigning a rational exegesis to their contexts, machol must mean in these instances some musical instrument, probably of the flute kind, and principally played on by women.

In the grand Hallelujah Psalm (cl.) which closes that magnificent collection, the sacred poet exhorts mankind to praise Jehovah in His sauctuary with all kinds of music; and amongst the instruments mentioned at the 3d, 4th, and 5th verses is found muchól, which cannot here be consistently rendered in the sense of dancing. Joel Brill, whose second

preface (הקדמה שניה) to Mendelssohn's Psalms contains the best treatise extant on the munical instruments mentioned in the Hebrew Bible, remarks: "It is evident from the passage, 'Praise Him with the tof and the machol' that Machol must mean here some musical instrument, and this is the opinion of the majority of scholars." Mendelssohn derives machol from JT, " hollow," on account of its shape; and the author of

Shilts Haggibborim denominates it DI7000 which he probably intends for niedoa.

The musical instrument used as an accompaniment to dancing is generally believed to have been nade of metal, open like a ring: it had many DANIBL

at weddings and merry-makings by women, who accompanied it with the voice. According to the author of Shilte Haygibbo rim, the machol had tinkling metal plates fastened on wires, at intervals, within the

Musical Instruments. Dance. (Mendelssohn.)

circle that formed the instrument, like the modern tambourine; according to others, a similar instrument, also formed of a circular piece of metal or wood, but furnished with a haudle, which the performer might so manage us to set in motion several rings strung on a netal bar, passing from one side of the instrument to the other, the waving of which produced a loud, merry sound.

Some modern critics consider machalath the same with machol. Gesenius, however, translates the latter "dancing," whilst the former he renders "a stringed instrument," from the root 777.

Ethiopic "AP. " to sing." D. W. M.

DANTEL (Judge of God, his representative as such, or God (E1) is judge], Dan. i. 6, 7, 8, &c.; Ezr. viii. 2; Neh. x. 6; 1 Chr. iii. 1;

and 707, Ez. xiv. 14, 20; xxviii. 3), the name of three (or four) persons in the Old Testament.

1. The second son of David ($\Delta a \mu r i \hbar \lambda$; [Ald.] Alex Daroua; [Comp. Darih: Daniel]), "born unto him in Hebron," " of Abigail the Carmelitess " (1 Chr. iii. 1). In the parallel passage, 2 Sam. iii.

3, he is called Chileab (IN), i. e. like his father (?): Daloula). For the Jewish explanation of the origin of the two names see Patrick; Bochart, Hierozoic. ii. 55, p. 663.

2. [Darinh: Daniel.] The fourth of "the greater prophets " (cf. Matt. xxiv. 15, προφήτη:). Nothing is known of the parentage or family of Daniel. He appears, however, to have been of royal or noble descent (Dan. i. 3; cf. Joseph. Ant. x. 10, § 1), and to have possessed considerable personal endowments (Dan. i. 4). He was taken to Babylor. in "the third year of Jehoiakim (B. C. 604)," and trained for the king's service with his three companions. Like Joseph in earlier times, he gained the favor of his guardian, and was divinely supported in his resolve to abstain from the "king's meat" for fear of defilement (Dan. i. 8-16). At the close of his three years' discipline (Dan. i. 5, 18), Daniel had an opportunity of exercising his peculiar gift (Dan. i. 17) of interpreting dreams, on the occasion of Nebuchadneszar's decree against the Magi (Dan. ii. 14 ff.). In consequence of his success he was made "ruler of the whole province of Babylon," and "chief of the governors over all

chadnessar was not properly king. But some further difficulties remain, which appear, however, to have been satisfactorily removed by Niebuhr (Gesch. Assur's, p. 86 ff.) The date in Jer. xivi. 2, is not that of the battle of Carchemish, but of the warning of the prophet; and the threats and promises in Jer. xxv. are consistent with the notion of a previous subjection of Jerusalem to Nebuchadnesser, which may have been accomplished without resistance (cf. Niebuhr, a. a. 0 ff 368 ff.).

[&]quot; This data has given rise to many objections, be sause the fourth year of Jeholakim is identified with the just of Nebuchadnessar (Jer. xxv. 1). Various volutions have been proposed (cf. Keil, Einl. § 188, 2); but the text of Daniel itself suggests the true explana The second year of Nebuchadnessar's reign (il. I) falls after the completion of the three years' trainat of Daniel which commenced with his captivity . 1, 5); and this is a clear indication that the expeition mentioned in 1 1, was undertaken in the last tear of the reign of Nabopolassar, while as yet Nebu-

the wise men of Babylon " (ii. 48). He afterwards | of Chaldsean wisdom, and placed at the head of the interpreted the second dream of Nebuchadnezzar (iv. 8-27), and the handwriting on the wall which disturbed the feast of Belshazzar (v. 10-28), though he no longer held his official position among the magi (Dau. v. 7, 8, 12), and probably lived at Susa (Dan. viii. 2; cf. Joseph. Ant. x. 11, § 7; Bochart, Geogr. Sacr. iii. 14). At the accession of Darius [DARIUS] he was made first of the "three presidents " of the empire (cf. 1 Esdr. iii. 9), and was delivered from the lions' den, into which he had been cast for his faithfulness to the rites of his faith (vi. 10-23; cf. Bel & Dr. 29-42). At the accession of Cyrus he still retained his prosperity (vi. 28; cf. i. 21; Bel & Dr. 2); though he does not appear to have remained at Babylon (cf. Dani. 21), and in "the third year of Cyrus" (B. C. 534) he saw his last recorded vision on the banks of the Tigris (x. 1, 4). According to the Moham-medan tradition Daniel returned to Judzea, held the government of Syria, and finally died at Susa (Rosenmüller, Schol. p. 5, n.), where his tomb is still shown, and is visited by crowds of pilgrins. In the prophecies of Ezekiel mention is made of Daniel as a pattern of righteousness (xiv. 14, 20) and wisdom (xxviii. 3); and since Daniel was still young at that time (c. B. C. 588-584), some have thought that another prophet of the name must have lived at some earlier time (Bleek), perhaps during the captivity of Nineveh (Ewald, Die Propleten, ii. 560), whose fame was transferred to his later namesake. Hitzig imagines (Vorbemerk. § 3) that the Daniel of Ezekiel was purely a mythical personage, whose prototype is to be sought in Melchizedek, and that the character was borrowed by the author of the book of Daniel as suited to his design. These suppositions are favored by no internal probability, and are unsupported by any direct evidence. The order of the names "Noah, Daniel, and Job" (Fz. xiv. 14) seems to suggest the idea that they represent the first and last historic types of righteousness before the law and under it, combined with the ideal type (cf. Delitzsch, p. 271). On the other hand the narrative in Dan. i. 11, implies that Daniel was conspicuously distinguished for purity and knowledge at a very early sge (cf. Hist. Sus. 45), and he may have been searly forty years old at the time of Ezekiel's prophecy.

Allusion has been made already to the comparison which may be instituted between Daniel and Joseph, who stand at the beginning and the slose of the divine history of the Jews, as represenatives of the true God in heathen courts (Auberlen, Daniel, pp. 32, 83). In this respect the position of Daniel must have exercised a powerful influence upon the form of the revelations conveyed through nim. And in turn the authority which he enjoyed renders the course of the exile and the return clearly intelligible. By station, by education, and ts character, he was peculiarly fitted to fulfill the work assigned to him. He was not only a resident n a foreign land, like Jeremiah or Ezekiel, but the minister of a foreign empire, and of successive dynasties (Dan. ii. 48, vi. 28). His political experience would naturally qualify him to give distinct expression to the characteristics of nations in themselves, and not only in their relation to God's reople. His intellectual advantages were as renarkable as his civil dignity. Like the great law- Christian Church than any other writing of the

school of the Magi (Dan. ii. 48). He was thus enabled to preserve whatever was true in the traditional teaching of the East, and to cast his revelations into a form suited to their special character But though engaged in the service of a heathen prince and familiar with Oriental learning, Daniel was from the first distinguished by his strict observance of the Mosaic law (i. 8-16; cf. vi. 10, 11). In this way the third outward condition for his work was satisfied, and at the close of the exile he offered a pattern of holiness for the instruction of the Dispersion of after times. (Cf. Auberlen, D miel, 24, &c.)

The exact meaning of the name is disputed. The full form ('주말귀) is probably more correct, and in this the yod appears to be not merely formative. but a pronominal suffix (as יוצהריאל, אהריאל, אהריאל, אוויא so that the sense will be God is my Judge (C. B. Michaelis ap. Rosenmüller, Schol. § 1). Others interpret the word the Judge of God, and the use of a yod formative is justified by the parallel of Melchizedek, &c. (Hitzig, § 2). This interpretation is favored by the Chalds-au name, Belteshazzar רָקלָשָאַצָר), i. 7, i. e. the prince of Bel: Theod. LXX. Bartdoap : Vulg. Baltassar), which was given to Daniel at Babylon (Dan. i. 7), and contains a clear reference to his former name. Hitzig's interpretation (" Påla tschåcara = Ernährer und Verzehrer ") has nothing to recommend it. Such changes have been common at all times; and for the simple assumption of a foreign name compare Gen. xli. 45; Ezr. i. 11, v. 14 (Sheshbazzar).

Various spocryphal fragments attributed Daniel are collected by Fabricius (Cod. Pseud. V. T. i. 1124), but it is surprising that his fame in later times seems to have been obscured (Hottinger. llist. Urient. p. 92). Cf. Epiph. Vit. Dan. ii. p. 243, ed. Petav.: Vit. Dan. ap. Fabric.; Joseph. Ant. x. 11.

3. A descendant of Ithamar, who returned with Ezra to Judsea in the time of "Artaxerxes." [ARTAXERXES.] (Ezr. viii. 2.)

4. A priest who sealed the covenant drawn up by Nehemiah B. C. 445 (Neh. x. 6). He is probably the same as (3); and is confounded with the prophet in the sporryphal addenda to Daniel: Dan. xiv. 1 (LXX., not Theodot.). B. F. W.

DANIEL, THE BOOK OF, is the earliest example of apocalyptic literature, and in a great degree the model, according to which all later apocalypses were constructed. In this aspect it stands at the head of a series of writings in which the deepest thoughts of the Jewish people found expression after the close of the prophetic era. The book of Enoch [ENOCH], the Jewish Sibyllines, and the fourth book of Ezra [2 ESDRAS], carry out with varied success and in different directions, the great outlines of universal history which it contains; and the "Revelation" of Daniel received at last its just completion in the Revelation of St. John. Without an inspired type it is difficult t: conceive how the later writings could have been framed; and whatever judgment be formed as to the composition of the book, there can be no doubt that it exercised a greater influence upon the early gyer who was "trained in all the wisdom of the Old Testment, while in the Gospels it is specially "gypt'ans," the great seer was trained in the secrets distinguished by the emphatic quotation of the

540

Lord (Matt. xxiv. 15, $\tau \partial \ \eta \partial \partial x$ dia $\Delta \alpha x \partial \lambda \ r u \hat{v}$ book was no late compilation though he questioned

προφήτου... δ αναγινώσκων νοείτω...). 1. In studying the book of Daniel it is of the atmost importance to recognize its spocalyptic character. It is at once an end and a beginning, the last form of prophecy and the first " philosophy of history." The nation is widened into the world: the restored kingdom of Judah into a universal kingdom of God. To the old prophets Daniel stands, in some sense, as a commentator (1)an. ix. 2-19): to succeeding generations, as the herald of immediate deliverance. The form, the style, and the point of sight of prophecy, are relinquished upon the verge of a new period in the existence of God's people, and fresh instruction is given to them suited to their new fortunes. The change is not abrupt and absolute, but yet it is distinctly felt. The eve and not the ear is the organ of the Seer: visions and not words are revealed to him. His utterance is clothed in a complete and artificial shape, illustrated by symbolic imagery and pointed by a specific purpose. The divine counsels are nuade known to him by the ministry of angels (vii. 16, viii. 16, ix. 21), and not by "the Word of the Lord." The seer takes his stand in the future rather than in the present, while the prophet seized on the elements of good and evil which he saw working around him and traced them to their final issue. The one looked forward from the present to the great "age to come;" the other looked backward from "the last days" to the trials in which he is still placed. In prophecy the form and the essence, the human and divine were inseparably interwoven; in revelation the two elements can be contemplated apart, each in its greatest vigor, -the most consummate art, and the most striking predictions. The Babylonian exile supplied the outward training and the inward necessity for this last form of divine teaching; and the prophetic visions of Ezekiel form the connecting link between the characteristic types of revelation and prophecy. (Cf. Lücke, Versuch, i. 17 ff.; Hitzig, Daniel, Vorbem. § 9; Hilgenfeld, Die jud. Apok., 1 ff.). (DANIEL.]

2. The language of the book, no less than its general form, belongs to an era of transition. Like the book of Ezra, Daniel is composed partly in the vernacular Aramaic (Chaldee), and partly in the sacred Hebrew. The introduction (i.-ii. 4 a) is written in Hebrew. On the occasion of the

"Syriac " (הרבית, syriace, i. e. Ara aic) answer of the Chaldmans, the language . langes to Aramaic, and this is retained till the close of the seventh chapter (ii. 4 b-vii.). The personal introduction of Daniel as the writer of the text (viii. 1) is marked by the resumption of the Hebrew, which continues to the close of the book (viii.-xii.). The character of the Hebrew bears the closest affinity to that of Ezekiel and Habakkuk, or in other words to those prophets who lived nearest to the assumed age of Daniel; but it is less marked by peculiar forms and corruptions than that of Ezekiel. The Aramaic, like that of Ezra, is also of an earlier form (cf. Maurer, Comm. in Dan. p. 87) than exists in any other Chaldaic document. but as the Targums - the next most ancient specimens withe language - were not committed to wrigh ill about the Christian era, this fact cannot be nsisted on as a proof of remote antiquity. It is, Nebuchadnezzar (ch. iv.) forms a striking contrast

the authenticity of some part of it (c. iii.-vil., cf. Keil, Lehr. d. Einl. § 135, n. 4). In addition to these two great elements - Aramaic and Hebrew - the book of Daniel contains traces of other languages which indicate the peculiar position of the writer. The use of Greek technical terms (.f. § 10) marks a period when commerce had already united Persia and Greece; and the occurrence of peculiar words which admit of an explanation by reference to Aryan and not to Semitic roots (Delitzsch, p. 274) is almost inexplicable on the supposition that the prophecies are a Palestinian forgery of the Maccabsean age.

3. The book is generally divided into two ucarly equal parts. The first of these (i.-vi.) contained chiefly historical incidents, while the second (vii.xii.) is entirely apocalyptic. This division is further supported by the fact that the details of the two sections are arranged in order of time, and that the commencement of the second section falls earlier than the close of the first, as if the writer himself wished to mark the division of subject. But on the other hand this division takes no account of the difference of language, nor of the change of person at the beginning of ch. viii. And though the first section is mainly historical, yet the vision of ch. vii. finds its true foundation and counterpart in ch. ii. From these circumstances it seems better to divide the book (Auberlen, p. 36 ff.) into three parts. The first chapter forms an introduction. The next six chapters (ii.-vii.) give a general view of the progressive history of the powers of the world, and of the principles of the divine government as seen in events of the life of Daniel. The remainder of the book (viii.-xii.) traces in minuter detail the fortunes of the people of God, as typical of the fortunes of the Church in all ages. The second section is distinguished by a remarkable symmetry. It opens with a view of the great kingdoms of the earth revealed to a heathen sovereign, to whom they appeared in their outward unity and splendor, and yet devoid of any true life (a metal colossus); it closes with a view of the same powers as seen by a prophet of God, to whom they were displayed in their distinct characters, as instinct with life, though of a lower nature, and displaying it with a terrible energy of action ($\theta\eta\rho la$, four beasts). The image under which the manifestation of God's kingdom is foreshown corresponds exactly with this twofold exhibition of the worldly powers. "A stone cut without hands," " becoming a great mountain and filling the whole earth " (Dan. ii. 34, 35) - a rock and not a metal - is contrasted with the finite proportions of a statue moulded by man's art, as "the Son of man," the representative of humanity, is the true Lord of that lower creation (Gen. i. 30) which symbolizes the spirit of mere earthly domin ions (Dan. vii. 13, 14). The intermediate chapter (iii.-vi.) exhibit a similar correspondence, while setting forth the action of God among men. The deliverance of the friends of Daniel from the pupishment to which they were condemned for refusing to perform an idolatrous act at the command of Nebuchadnezzar (ch. iii.), answers to the deliverance of Daniel from that to which he was exposed by continuing to serve his God in spite of the edict of Darius (ch. vi.); and in the same way the degradation, the repentance, and the restoration of sowever, worthy of notice that J. D Michaelis to 'he sacrilegious pride and death of Belaharsay sillermed, on purely linguistic grounds, that the (en. v. 29-5.). The arrangement of the last section

542 DANIEL, THE BOOK OF

(viii.-xii.) is not equally distinct, though it offers | 34), its predictions (Matt. xxiv. 15), and its dostring traces of a similar disposition. The description of the progress of the Grecian power in ch. viii. is further developed in the last vision (x.-xii.), while the last chapter appears to carry on the revelation to the first coming of Messiah in answer to the prayer of Daniel. The book for the same author (cf. Fritzsche, Handb. zw. d. Apok. i. 173); and the first

4. The position which the book of Daniel occupies in the Hebrew Canon seems at first sight remarkable. It is placed among the Holy writings (Kethuvim, ayidypapa) between Esther and Ezra, or immediately before Esther (cf. Hody, De Bibl. text. p. 614, 645), and not among the prophets. This collocation, however, is a natural consequence if the right apprehension of the different functions if the prophet and seer. It is not, indeed, certain at what time the triple division of the Scriptures which is preserved in the Hebrew Bibles was first made; but the characteristics of the classes show that it was not based on the supposed outward authority, but on the inward composition of the books [CANON]. Daniel, as the truth has been well stated, had the spirit but not the work of a prophet; and as his work was a new one, so was it carried out in a style of which the Old Testan:ent offers no other example. His Apocalypse is as distinct from the prophetic writings as the Apocalypse ТЪе of St. John from the apostolic epistles. heathen court is to the one seer what the isle of Patmos is to the other, a place of exile and isolation, where he stands alone with his God, and is not like the prophet active in the midst of a struggling nation (Auberlen, p. 34)."

5. The unity of the book in its present form, notwithstanding the difference of language, is g erally acknowledged (De Wette, Kinl. § 256; Hitzig, § 4).⁶ Still there is a remarkable difference in its internal character. In the first seven chapters Daniel is spoken of historically (i. 8-21, ii. 14-49, iv. 8-27, v. 13-29, vi. 2-28, vii. 1, 2): in the last five he appears personally as the writer (vii. 15-28, viii. 1-ix. 22, x. 1-19, xii. 5). This peculiarity, however, is not without some precedents in the writings of the earlier prophets (e. g. Is. vii. 3, xx. 2), and the seventh chapter prepares the way for the change; for while Daniel is there spoken of in the third person (vii. 1, 2), the substance of the chapter is given in his words, in the first person (vii. 2, 15, 28). The cause of the difference of person is commonly supposed to lie in the nature of the case. The prophet narrates symbolic and representative events historically, for the event is sts own witness: but revelations and visions need the personal attestation of those to whom they are sommunicated. It is, however, more probable that the peculiarity arose from the manner in which the book assumed its final shape (§ 11).

6. Allusion has been made already to the influmore which the book exercised upon the Christian Church Apart from the general type of apocatyptic composition which the apostolic writers serived from Daniel (2 Thess. ii.; Rev. pressim; af. Matt. xxvi. 64, xxi. 44?), the New Testament Incidentally acknowledges each of the characteristic elements of the book, its miracles (Hebr. xi. 33,

DANIEL, THE BOOK OF

of angels (Luke i. 19, 26). At a still earlier time the same influence may be traced in the Apocrypha. The book of Baruch [BARUCH] exhibits so many coincidences with Daniel, that by some the two books have been assigned to the same author (cf. Fritzsche, Handb. zu d. Apok. i. 173); and the first book of Maccabees represents Mattathias quoting the marvelous deliverances recorded in Daniel, together with those of earlier times (1 Macc. ii. 59, 60), and elsewhere exhibits an acquaintance with the Greek version of the book (1 Macc. i. 54 = Dan. ix. 27). The allusion to the guardian angels of nations, which is introduced into the Alexandrine translation of the Pentateuch (Deut. xxxii. 8; LXX.), and recurs in the Wisdom of Sirach (Ecclus. xvii. 17), may have been derived from Dan. x. 21, xii. 1, though this is uncertain, as the doctrine probably formed part of the common belief. According to Josephus (Ast. xi. 8, § 4) the prophecies of Daniel gained for the Jews the favor of Alexander [ALEXANDER THE GREAT]; and whatever credit may be given to the details of his narrative, it at least shows the unquestioning belief in the prophetic worth of the book which existed among the Jews in his time.

7. The testimony of the Synagogue and the Church gave a clear expression to the judgment implied by the early and authoritative use of the book, and pronounced it to contain authentic prophecies of Daniel, without contradiction, with one exception, till modern times. Porphyry alone († c. 305 A. D.) assailed the book, and devoted the 19th of his fifteen Discourses against Christians (Xoyos Rard Xpioriarar) to a refutation of its claims to be considered a prophecy. " The history," he said, " is true up to the date of Antiochus Epiphanes, and false afterwards; therefore the book was written in his time" (Hieron. Proof. in Dan.). The argument of Porphyry is an exact anticipation of the position of many modern critics, and involves a twofold assumption, that the whole book ought to contain predictions of the same character, and that definite predictions are impossible. Externally the book is as well attested as any book of Scripture, and there is nothing to show that Porphyry urged any historical objections against it; but it brings the belief in miracle and prediction, in the divine power and foreknowledge as active among men, to a startling test, and according to the character of this belief in the individual must be his judgment upon the book.

8. The history of the assaults upon the prophetic worth of lausiel in modern times is full of interest. In the first instance doubts were raised as to the authorship of the opening chapters, i.-vii. (Spinoas, Newton), which are perfectly compatible with the fullest recognition of their canonicity. Then the variations in the LXX. suggested the belief that cc. iii.-vi. were a later interpolation (J. D. Michaelis). As a next step the last six chapters only were retained as a genuine book of Scripture (Eichhorn, 1st and 2d edits.); and at last the whole book was rejected as the work of an impostor, who lived in the time of Antiochus Epiph.

Eichhorn attributed ch. ii -vi., vii.-xii., to different authors; and Bertholdt supposed that each section was the work of a distinct writer, though he admitted that each successive writer was acquainted with the composition of his predecessors, recognising in this way the unity of the book (Eisel.).

a The Jewish doctors of later times were divided as to the degree of the inspiration of Daniel. Abarbanel maintained against Maimonides that he was endowed with the nighest prophetic power (Fabric. Cod. pseudrp. V. T i. S07, n j.

anes (Corrodi, 1753. Hitzig fixes the date more | often afterthoughts, the results and not the causes exactly from 170 B. C. to the spring of 164 B. C.). This last opinion has found, especially in Germany, a very wide acceptance, and Lücke ventures to prononnce it "a certain result of historical criticism."

5. The real grounds on which most modern critics rely in rejecting the book, are the "fabulous-1.ess of its narratives" and "the minuteness of its prophetic history." "The contents of the book," it is said, "are irrational and impossible" (Hitzig, § 5). It is obvious that it is impossible to answer such a statement without entering into general views of the Providential government of the world. It is admitted that the contents of the book are exceptional and surprising; but revelation is itself a miracle, however it be given, and essentially as incenceivable as any miracle. There are times, perhaps, when it is required that extraordinary signs should arrest the attention of men and fix their minds upon that Divine Presence which is ever working around them. Prodigies may become a guide to nature. Special circumstances may determine, and, according to the Bible, do determine, the peculiar form which the miraculous working of God will assume at a particular time; so that the question is, whether there is any discernible relation between the outward wonders and the moral condition of an epoch. Nor is it impossible to apply this remark to the case of Daniel. The position which he occupied [DANIEL] was as ex coptional as the book which bears his name. He survived the exile and the disappointment which attended the first hopes of the Jews. The glories which had been connected with the return in the foreshortened vision of earlier prophets were now felt to be far off, and a more special revelation may have been necessary as a preparation for a period of silence and conflict.ª The very character of the Babylonian exile seems to have called for some signal exhibition of divine power. As the first erodus was distinguished by great marvels, it might appear natural that the second should be also (cf. Mic. vii. 15; Delitzsch, p. 272, dc.). National miracles, so to speak, formed the beginning of the theocracy: personal miracles, the beginning of the church. To speak of an "aimless and lavish display of wonders " is to disregard the representative significance of the different acts, and the relation which they bore to the future fortunes of the people. ŤЪе A new era was inaugurated by fresh signs. Jews, now that they are left among the nations of the world, looked for some sure token that God was able to deliver them and work out His own purposes. The persecution of Antiochus completed the teaching of Daniel; and the people no longer sought without, that which at length they had found within. They had withstood the assault of one typical enemy, and now they were prepared to meet all. The close of special predictions coincided with the consolidation of the national faith. [ANTIOCHUS IV. EPIPH.]

10. The general objections against the "legendary " miracles and specific predictions of Danies are strengtheued by other objections in detail, which phenomena of the Alexandrine version, all point in rannot, however, be regarded in themselves as of the same direction; and a sounder system of interany considerable weight. Some of these have been pretation, combined with a more worthy view of

² The special prophecies of Balaam (Num. xxiv. 24) parallel to those of Daniel, both from their partic and Isalah (xilv., xiv.) centre in Daoie (cf. Dan. zi | larity, and from the position which the prophet ecce 19,; so the predictions of Balasm offer a remarkable | pied (cf. Delitsch, p. 278).

of the rejection of the book. Not only, it is said. is the book placed among the Hagiographa, but Daniel is on itted in the list of prophets given in the Wisdom of Sirach; the language is corrupted by an intermixture of Greek words; the details are essentially unhistorical; the doctrinal and moral teaching betrays a late date.

In reply to these remarks, it may be urged, that if the book of Daniel was already placed among the Hagiographa at the time when the Wisdom of Sirach was written, the omission of the name of Daniel (Ecclus. xlix.) is most natural, and that under any circumstances the omission is not more remarkable than that of Ezra and the twelve lesser prophets, for xlix. 10 is probably an interpolation intended to supply a supposed defect. Nor is the mention of Greek musical instruments (iii. 5, 7, 10,

קיתרס, גואפאוא: אָבָשְׁם, ספּעָאוֹא הויתרים, אואפאניד,

συμφωνία; ζημορ, ψαλτήριον), for these words only can be shown to be derived from the Greek (De Wette, Einl. p. 255 b.), surprising at a time when the intercourse of the East and West was already considerable, and when a brother of Alcasus (c. 600-500 B. C.) had gained distinction "at the farthest end of the world, aiding the Babylonians" (Brandis, in Delitzsch, p. 274; Alc. Frag. 33, Bergk.). Yet further the scene and characters of the book are Oriental. The colossal image (D?? iii. 1, not necessarily a human figure; the term is applied familiarly to the cross ; Buxtf. Lex. Rabb. s. r.), the fiery furnace, the martyr-like boldness of the three confessors (iii. 16), the decree of Darius (vi. 7), the lions' den (vi. 7, 19, D), the demand

of Nebuchadnezzar (ii. 5), his obeisance before Daniel (ii. 46), his sudden fall (iv. 33; cf. Euseb. Prosp. Ev. ix. 41; Jos. c. Ap. i. 20), are not only consistent with the nature of Eastern life, but in many instances directly confirmed by other evidence (cf. DANIEL D. and DARIUS THE MEDE for the difficulties of i. 1, ii. 1, v. 31). In doctrine, again, the book is closely connected with the writings of the Exile, and forms a last step in the development of the ideas of Messiah (vii. 13, &c.), of the resurrection (xii. 2, 3), of the ministry of angels (viii. 16, xii. 1, &c.), of personal devotion (vi. 10, 11, i. 8), which formed the basis of later speculations, but received no essential addition in the interval before the coming of our Lord.

Generally it may be said that while the book presents in many respects a startling and exceptional character, yet it is far more difficult to explain its composition in the Maccabean period than to connect the peculiarities which it exhibits with the exigencies of the Return. It appears as a key to the later history and struggles of the Jews, and not as a result from them. The peculi vities of language, the acquaintance with Eastern manners and history, which is seen more clearly as our knowledge widens, the reception into the canon, the already answered incidentally. Some still require the divine government of men and nations, will a short notice, though it is evident that they are, probably do much to remove those undefined doubte

as to the inspired character of the Revelation which naturally arise at first in the minds of thoughtful students

11. But while all historical evidence supports the canonicity of the book of Daniel, it does not follow that the recognition of the unity and authority of the book is necessarily connected with the belief that the whole is to be assigned to the authorship of Daniel. According to the Jewish tradition (Bava Bathra, f. 146) "the books of Ezekiel. the twelve minor prophets, Daniel, and Esther were written (i. e. drawn up in their present form) by the men of the great synagogue," and in the case of Daniel the tradition is supported by strong internal evidence. The manner in which Daniel is spoken sf (i. 17, 19, 20, v. 11, 12; the title in ix. 23, xii. is different) suggests the notion of another writer; and if Daniel wrote the passages in question, they cannot be satisfactorily explained by 1 Cor. xv. 10; ? Cor. xi. 5, 6, xii. 2 (Keil, § 136), or by the consciousness of the typical position which he occupied (Auberlen, p. 37). The substantial authorship of a book of Scripture does not involve the subordinate work of arrangement and revision; and it is scarcely conceivable that a writer would purposely write one book in two languages, though there may have been an obvious reason why he should treat in separate records of events of general history in the vernacular dialect, and of the special fortunes of God's people in Hebrew. At the return we may suppose that these records of Daniel were brought into one whole, with the addition of an introduction and a fuller narrative," when the other sacred writings received their final revision. The visions themselves would be necessarily preserved in their original form, and thus the later chapters (vii.-xii.) exhibit no traces of any subsequent recension, with the exception, perhaps, of two introductory verses, rii. 1, x. 1.

12. The interpretation of Daniel has hitherto proved an inexhaustible field for the ingenuity of commentators, and the certain results are comparatively few. According to the traditional view, which appears as early as the fourth book of Ezra [9 ESDRAS] and the epistle of Barnabas (c. 4), the four empires described in cc. ii. vii. are the Babyionian, the Medo-Persian, the Greek, and the Roman. With nearly equal consent it has been supposed that there is a change of subject in the eleventh chapter (xi, 31 ff.), by which the seer passes from the persecutions of Antiochus to the times of Antichrist. A careful comparison of the language of the prophecy with the history of the Syrian kings must, however, convince every candid student of the text that the latter hypothesis is wholly unfounded and arbitrary. The whole of the for instance, "inferior" to the Roman (Dan ii. eleventh chapter forms a history of the struggles of 39) may be compared with that of the Medes. The the Jewish church with the Greek powers up to Teutonic races with their divided empire recall the the death of its great adversary (xi. 45). This con-| image of Persia (vii. 6). Nor is it difficult to see flict, indeed, has a typical import, and foreshows in the growing might of the northern powers, a in its characteristic outlines the abiding and final future kingdom which may rival in terrible energy conflict of the people of God and the powers of evil, the conquests of Alexander. Without insisting on so that the true work of the interpreter must be such details as these, which still require careful to determine historically the nature of each event 'examination, it appears that the true interpretation signalized in the prophetic picture, that he may of Daniel is to be sought in the recognition of the draw from the past the lesson of the future. The principle which they mode. In this way the traditional interpretation of "the four empires", book remains a "prophecy," while it is also a

though it still finds numerous advocates (Hofmann. Auberlen, Keil, Hävernick, Hengstenberg, and moss English commentators). It originated at a time when the triumphant advent of Messiah was the object of immediate expectation, and the Roman empire appeared to be the last in the series of earthly kingdoms. The long interval of conflict which has followed the first Advent formed no place in the anticipations of the first Christians, and in succeeding ages the Roman period has been unnaturally prolonged to meet the requirements of a theory which took its rise in a state of thought which experience has proved false. It is a still more fatal objection to this interpretation that it destroys the great idea of a cyclic development of history which lies at the basis of all prophecy. Great periods (aimyes) appear to be marked out in the fortunes of mankind which answer to another, so that that divine utterance which receives its first fulfillment in one period, receives a further and more complete fulfillment in the corresponding part of some later period. Thus the first coming of Christ formed the close of the last age, as His second coming will form the close of the present one. The one event is the type and, as it were, the spring of the other. This is acknowledged with regard to the other prophecies, and yet the same truth is not applied to the revelations of Daniel, which appear then first to gain their full significance when the are seen to contain an outline of all history in the history of the nations which ruled the world before Christ's coming. The first Advent is as much a fulfillment of the visions of Daniel as of those of the other prophets. The four empires precede the coming of Messiah and pass away before him. At the same time their spirit survives (cf. vii. 12), and the forms of national existence which were developed on the plains of Mesopotamia again reproduce themselves in later history. According to this view the empires of Daniel can be no other than those of the Babylonians, Medes, Persians, and Greeks, who all placed the centre of their power at Babylon, and appear to have exhibited on one stage the great types of national life. The Roman power was at its height when Christ came, but the Egyptian kingdom, the last relic of the empire of Alexander, had just been destroyed, and thus the - stone cut without hands struck the feet of the image,' ' and Christianity destroyed for ever the real supremacy of heathen dominion. But this first fulfillment of the vision was only inchoative, and the correlatives of the four empires must be sought in post-(hristian history. The corresponding symbolism of Babylon and Rome is striking at first sight, and other parallels may be drawn. The Byzantine empire, seems to spring from the same error as the other, ! " revelation ; " and its most special predictions acquire an abiding significance."

An example of the recurrent and advancing com-piction of the predictions of Daniel occurs in 2004

[•] The letter of Nebuchadnessar (c. iv.) appears to present clear traces of the interweaving of a commtary with the original text.

18 There is no Chaldee translation of Daniel, | Dan. proph. Vitemb. 1543), and Calvin (Prodect. and the deficiency is generally accounted for, as in the parallel case of Ezra, by the danger which would have existed in such a case of confusing the original text with the paraphrase; but on the other hand the whole book has been published in Hebrew. The Greek version has undergone singular changes. At an early time the LXX. version was supplanted in the Greek Bibles by that of Theodotion," and in the time of Jerome the version of Theodotion was generally " read by the Churches " (c. Rufin. ii. 33; Pref. in Comm. "Illud quoque lectorem admoneo, Danielem non juxta LXX. interpretes sed juxta . . . Theodotionem ecclesias legere" . . .). This change, for which Jerome was unable to account (" hoc cur acciderit nescio," Prof. su Vers. Dan.), may have been made in consequence of the objections which were urged against the corrupt LXX. text in controversy with Jews and heathen. The LXX. version was certainly very unfaithful (Hieron. 4 c.); and the influence of Origen, who preferred the translation of Theodotion (Hieron. in Dan. iv. 6), was probably effectual in bringing about the substitution (cf. Credner, Beitr. ii. 256 ff.). In the course of time, however, the version of Theodotion was interpolated from the LXX., so that it is now impossible to recover the original text. [DANIEL, APOCRYPHAL AD-DITIONS TO.] Meanwhile the original LXX. translation passed entirely out of use, and it was supposed to have been lost till the last century. when it was published at Rome from a Codex Chisianus (Daniel secundum LXX. Romse, 1772, ed. P. de Magistris), together with that of Theodotion, and several illustrative essays. It has since been published several times (ed. Michaelis. Gotting. 1774; ed. Segaar, 1775; Hahn, 1845), and lastly by Tischendorf in the second edition of his Sentuagint. Another recension of the text is contained in the Syro-Hexaplaric version at Milan (ed. Bugatus, 1788), but a critical comparison of the several recensions is still required.

14. The commentaries on Daniel are very numerous. The Hebrew commentaries of R. Saadijah Haggaon († 942), Rashi († c. 1105), and Aben Ezra († c. 1167), are printed in the great Rabbinic Bibles of Bomberg and Basle. That of Abarbanel († c. 1507) has been printed separately several times (Amstelod. 1647, 4to); and others are quoted by Rosenmüller, Scholia, pp. 39, 40. Among the pa-tristic commentaries the most important are those of Jerome (vol. v. ed. Migne), who noticed especially the objections of Porphyry, Theodoret (ii. 1053 ff. ed. Schulze), and Ephrem Syrus (Op. Syr. ii., Ronze, 1740). Considerable fragments remain of the commentaries of Hippolytus (collected in Migne's edition, Paris, 1857), and Polychronius (Mai, Script. Vet. Nov. Coll. vol. i.); and Mai has published (l. c.) a catena on Daniel, containing fragments of Apollinarius, Athanasius, Basil, Eusebins, and many others. The chief reformers, Luther (Auslegung d. Proph. Dan. 1530-1546; Op. Uerm. vi. ed. Walch), Geolampadius (In Dan. libri duo, Basil. 1530), Melanchthon (Comm. in

xxiv. 15, compared with 1 Macc. i. 54. The same truth is also implied in the interpretation of " the seventy sevens," as springing out of the " seventy " (years) of Jeremiah. On this there are some good remarks in Browne's Ordo Swelorum, though his interpretation of the four empires as signifying the Babylonian, Grecian. Roman, and some f-ture empire | iv. 18, 17, 28). Cf. Daniel sec. LXX. 125 f (pp. 675 ff.), seems very unnatural. The where "wee 25

in Dan., Genevæ, 1563, &c.; in French, 1565; in English, 1852-3), wrote on Daniel; and Rosenmüller enumerates nearly fifty other special commentators, and his list now requires considerable additions. The combination of the Revelations of Daniel and St. John (Sir I. Newton, Observations upon the Prophecies, &c., Lond. 1733; M. F. Roos, Ausl. d. Weissag. Dan. u. s. w. Leipz. 1771) opened the way to a truer understanding of Daniel; but the edition of Bertholdt (Daniel, aus dem Hebr.-Aram. neu übersetzt und erklärt, u. s. w. Erlangen, 1806-8), in spite of all its grave faults, marks the beginning of a new era in the study of the book. Bertholdt was decidedly unfavorable to its authen ticity; and he was followed on the same side by von Lengerke (Das Buch Dan. verd. u. ausgel. Königsb. 1835), Maurer (Comm. Gramm. Crit. ii. Lips. 1838), and Hitzig (Kurzgef. Exeg. Handb. [x.] Leipz. 1850), whose commentary is among the worst specimens of supercilious criticism which his school has produced. On the other side the coalmentary of Hävernick (Comm. üb. d. B. Dan. Hamb. 1832) is the most complete, though it leaves much to be desired. Auberlen (Der Proph. Dan. u. d. Offenbarung Joh. u. s. w., 2te Aufl. Basel, 1857, translated into English from the 1st ed. by A. Saphir, 1856) has thrown considerable light upon the general construction and relations of the book. Cf. Hofmann, Weissag. u. Erfüllung, i. 276 ff. The question of the authenticity of the book is discussed in most of the later commentaries; and specially by Hengstenberg (Die Authentie d. Dan. . . . erwiesen, 1831, translated by E. B. Pratten, Edinb.), Hävernick (Neue krit. Untersuch. Hamb. 1838), Delitzsch (Herzog's Real-Encykl. s. v. 1854), Keil (Lehrb. d. Einl. in d. A. T. Frankf. 1853), Davidson (Introduction to the O. T. ii. Lond. 1856), who maintain the affirmative; and by Bleek (Berl. Theolog. Zeitschr. iii. 1822), Bertholdt (Einleit. Erlang. 1814), Lücke (Versuch einer vollständ. Einl. u. s. w. 2te Aufl. Bonn, 1852), De Wette (Einleit. 7te Aufl. Berl. 1852), who deny its anthenticity. Cf. Ewald, Die Proph. d. Alt. Bund. ii. 559 ff. Among English works may be mentioned the Essays of T. R. Birks, The four prophetic Empires, &c., 1844, and The two later Visions of Daniel, &c., 1846; of F. B. Elliott, Hora Apoculyptice, 1844; of S. P. Tregelles, Remarks on the prophetic Visions of Daniel, 1852; and the Commentary of Stuart (Boston, 1850).

W. R. A., Inquiration of the Book of Daniel, etc. Lond. 1863; Baxmann, Ueber Vas Buch Daniel, in the Theol. Stud. u. Kril. 1863, pp. 452-532, reviewing Zündel; Hilgenfeld, Die Propheten Esra u. Daniel u. ihre neuesten Bearbeitungen, Halle, 1863; comp. his Judische Apokalyptik, pp. 19-50; Davidson, Introd. to the O. T. iii, 158-231 (Lond. 1863); The Book of Daniel as viewed by Hippolytus, Porphyry, and others, an art. in the Journ. of Sac. Lit. for Jan. 1864; Fuller, J. M., Authenticity of the Book of Daniel, Camb. (Eng.) 1864; Pusey, E. B., Duniel the Prophet : Nine Lectures . . . with Copious Notes, "a contribution," he tells us, "against the tide of scepticism which the publication of the 'Essays and Reviews' let loose ;" Tregelles, Remarks on the Prophetic Visions in Daniel. and a Defence of the Authenticity of the Book, 5th ed., Lond. 1864; Desprez, P. S., Daniel: or, The Apocalypse of the U. T.; with an Introd. by Rowland Williams, Lond. 1864; Perowne, J. J. S., Dr. Pusey on Duniel the Prophet, in the Contemp. Review for Jan. 1866; Bosanquet, Messiah the Prince, or the Inspiration of the Prophecies of Daniel, Lond. 1866. See also Rawlinson's Historical Evidences (Bampton Lectures), Lect. V.

In this country, besides the elaborate commentary of Prof. Stuart, we have: Chase, Irah, Re-marks on the Book of Daniel, in the Christian Renew for March, 1842, reprinted separately, Boston, 1844; Folsom, N. S., Crit. and Hist. Interp. of the Book of Daniel, Boston, 1842; The Prophecies of Daniel, an art. in the New Englander for April, 1843; Barnes, Notes, Critical, Illustrative, and Practical, on the Book of Daniel, New York, 1853, considered one of the best of his commentaries; Palfrey, Lectures on the Jewish Scriptures and Antiquities, iv. 389-455 (Bost. 1852); Herman, H. M., The Genuineness of Daniel, in the Meth. Quar. Rev. for Oct. 1854; Noyes, G. R., New Transl. of the Hebrew Prophets, vol. ii., 3d ed., Boston, 1866. The American scholars named above (except Barnes) differ from the majority of English commentators in finding no place for the Roman empire or the Pope in their exposition of the visions of Daniel.

Among the writers here referred to, the following impugn the genuineness of the book: Bleek, Baxmann, Davidson (in opposition to his earlier view), Hilgenfeld, Desprez, Rowland Williams, Palfrey, Noyes. So Milman, Hist. of the Jews, i. 457, note, new Amer. edition. Α.

APOCRYPHAL DANIEL, ADDI TIONS TO. The Greek translations of Daniel, like that of Esther, contain several pieces which are not found in the original text. The most important of these additions are contained in the Apocrypha of the English Bible under the titles of The Song of the three Holy Children, The History of Summa, and The History of . . . Bel and the Dragum.

1. (a.) The first of these pieces is incorporated into the narrative of Daniel. After the three confemors were thrown into the furnace (Dan. iii. 23), Azarias is represented praying to God for deliverance (Song of Three Children, 3-22); and in answer the angel of the Lord shields them from the fire which consumes their enemies (23-27), whereupon "the three, as out of one mouth," raise a tri- Song incorporated into the canonical text. Thus smphant song (29-68), of which a chief part (35-

ness of the Book of Daniel, Lond. 1862; Boyle, Christian Church since the 4th century (figin Apol. ii. 35; cf. Concil. Tolet. iv. Can. 14) Like several similar fragments, the chief parts of this composition are given at the end of the Pasiter in the Alexandrine MS. as separate pasims, under the titles "The prayer of Azarias" and "The hymn of our Fathers;" and a similar arrangement occurs in other Greek and Latin Psalters.

(b.) The two other pieces appear more distinctly as appendices, and offer no semblance of forming part of the original text. The History of Susama (or The Judgment of Duniel) is generally found at the beginning of the book (Gr. MSS. Vet. Int.): though it also occurs after the 12th chapter (Valg. ed. Compl.). The History of Bel and the Drag is placed at the end of the book; and in the LXX version it bears a special heading as "part of the prophecy of Habaktuk " (in mpogyrelas 'Außa-

κούμ υἰοῦ Ἰησοῦ ἐκ τῆς φυλῆς Λευΐ). 2. The additions are found in both the Greek texts-the LXX. and Theodotion, in the Old Latin and Vulgate, and in the existing Syriac and Arabic versions. On the other hand there is no evidence that they ever formed part of the Hebrew text, and they were originally wanting in the Syria: (Polychronius, ap. Mai, Script. Vett. Nov. Coll. i. 113, says of the hymn expressly of reital in tois έβραϊκοΐς ή έν τοΐς συριακοΐς βιβλίοις). From the LXX. and Vulgate the fragments passed into common use, and they are commonly quoted by Greek and Latin fathers as parts of Daniel (Clem. Alex. Ecl. proph. i.; Orig. Ep. ad Afric.; Ter-tull. de Pudic. 17, &c.), but rejected by those who adhered to the Hebrew canon. Jerome in particular called attention to their absence from the Hebrew Bible (Proof. in Dan.), and instead of any commentary of his own adds shortly Origen's remarks "on the fables of Bel and Susanna" (Comm. in Dan. xiii. 1). In a similar manner he notices shortly the Song of the Three Children, " lest he should seem to have overlooked it " (Comm. in Dan. iii. 23).

3. Various conjectures have been made as to the origin of the additions. It has been supposed that they were derived from Aramaic originals (Welte, Herbst's Einl. ii. 3, Kap. 8, gives the arguments at length), but the intricate evidence is wholly insufficient to establish the point. The character of the additions themselves indicates rather the hand of an Alexandrine writer; and it is not unlikely that the translator of Daniel wrought up traditions which were already current, and appended them to his work (cf. Fritzsche, Ereg. Handb. zu den Apok. i. 121). The abruptness of the narrative in Daniel furnished an occasion for the introduction of the prayer and hymn; and the story of the Dragor seems like a strange exaggeration of the record of the deliverance of Daniel (Dan. vi.), which may naturally have formed the basis of different legends Nor is it difficult to see in the History of Summas a pointed allusion to the name of the prophet, though the narrative may not be wholly fictures

4. The LXX. appears to be the original source from which all the existing recensions of the fragments were derived (cf. Hody, de Bibl text. p 583). Theodotion seems to have done little more than transcribe the LXX. text with improvements in style and language, which are considerably greater in the appended narratives than in the while the History of Susanna and Bel and the 48) has been used as a hymn (Benedicite) in the Dragon contain large additions which complete and

stabellish the story (e. g. Hist Sus. vv. 15-18; 20, | northern limit of the nation, was too important 11; 94-97; 48, 47; 49, 50; Bel and Drag. vv. 1, 9-18; Eichh. pp. 431 ff.), the text of the Song is little more than a repetition of that of the LXX. (cf. De Magistris, Daniel, &c., pp. 234 ff.; Eichh. Einl. in d. Apok. Schrift. p. 422 ff.). The Polyglott-Syriac, Arabic, and Latin versions are derived from Theodotion; and the Hexaplar-Syriac from the LXX. (Eichh. p. 430, &c.).

5. The stories of Bel and Susanna received various embellishments in later times, which throw some light upon the manner in which they were originally composed (cf. Orig. Ep. ad Afric. §§ 7, 8; Bochart, Hieroz. iii. 3; Eichhorn, p. 446, &c.); just as the change which Theodotion introduced into the narrative of Bel, to give some consistency to the facts, illustrates the rationalizing process through which the legends passed (cf. Delitzsch, De Habacuci vità et astute, 1844). It is thus useless to institute any inquiry into the historic foundation which lies below the popular traditions; for though the stories cannot be regarded as mere fables, it is evident that a moral purpose determined the shape which they assumed. A later age found in them traces of a deeper wisdom, and to Christian commentators Susanna appeared as a type of the true Church tempted to infidelity by Jewish and Pagan adversaries, and lifting up her voice to God in the midst of persecution (Hippol. In Susomm. p. 689 ff. ed. Migne). B. F. W.

Volkes Israel, 3º Aufl. iv. 635 ff.; Ginsburg's art. in the 3d ed. of Kitto's Cycl. of Bib. Lit.; Arnald's Comm. on the Apoc. Books; and Fritzsche, Exeg. Handb. zu den Apokr. des A. T. L 111 ff. Α.

DANITES, THE (אם ל במדי [Vat ·vei], Δdr, δ Δdr, oi Δανίται [Vat. -vei-]; Alex. o Δαν, oi Δανίται: Dan). The descendants of Dan, and members of his tribe (Judg. xiii. 2, xviii. 1, 11; 1 Chr. xii. 35).

DAN-JA'AN (72773: Davidar [Vat. rei-] Kal Oùsdy; Alex. Dariapar Kai Iovõar; [Ald. Dariodr; Comp. Adr:] Dan sylvestria), a place named only in 2 Sam. xxiv. 6 as one of the points visited by Joab in taking the census of the people. It occurs between Gilead and Zidon, and therefore may have been somewhere in the direction of Dan (Laish), at the sources of the Jordan. The reading of the Alex. LXX. and of the Vulg. was

evidently 79 73, Dan-jaar, the nearest translation of which is "Dan in the wood." This reading is approved by Gesenius, and agrees with the character of the country about Tel el Kadi. Fürst (Annuboorterbuch, p. 303) compares Dan-jaan with Beal-jaan, a Phœnician divinity whose name is found on coins. Thenius suggests that Jaan was

origi tally Laish, the > having fallen away, and }D

baving been substituted for U (Exeg. Handb. on 84m. p. 257).ª There seems no reason for doubtmg that the well-known Dan is intended. We have no record of any other Dan in the north, and even if this were not the case, Dan, as the accepted

place to escape mention in such a list as that ir the text. Dr. Schultz, the late Prussian Consul at Jerusalem, discovered an ancient site called Danian or Danyal, in the mountains above Khan-en-Nakura, south of Tyre, which he proposes to identify with Dan-jaan (Van de Velde, Memoir, p. 306), but this requires confirmation. G.

DAN'NAH (17) [depression, low ground, Ges., Fürst]: 'Perra: Danna), a city in the mountains of Judah (Josh. xv. 49), and, from its mention with Debir and Socoh, probably south or southwest of Hebron. No trace of its name has been discovered. A

DAPH'NE (adorn: [Daphne]), a celebrated grove and sanctuary of Apollo, near Antioch in Syria [ANTIOCH]. Its establishment, like that of the city, was due to Seleucus Nicator. The distance between the two places was about 5 miles, and in history they are associated most intimately together. Just as Antioch was frequently called 'A. $d\pi$) $\Delta d\phi r\eta$, and $\dot{\eta} \pi \rho \delta s \Delta d\phi r\eta r$, so conversely we find Daphne entitled Δ . $\dot{\eta} \pi \rho \delta s$ 'Arrioxelar (Joseph. B. J. i. 12, § 5). The situation was of extreme natural beauty, with perennial fountains and abundant wood. Seleucus localized here, and appropriated to himself and his family the fables of Apollo and the river Peneus and the nymph Daphne. Here he erected a magnificent temple and colossal statue of the god. The succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. Among other honors, it possessed the privileges of an asylum It is in this character that the place is mentioned 2 Macc. iv. 33. In the reign of Antiochus Epiph. anes (B. C. 171) the aged and patriotic high-prica Onias, having rebuked Menelaus for his sacrilege at Jerusalem, took refuge at Daphne; whence he was treacherously brought out, at the instance of Menelaus, and murdered by Andronicus, who was governor of Antioch during the king's absence on a campaign. Josephus does not give this account of the death of Onias (Ant. xii. 5, § 1). When Syria became Roman, Daphne continued to be famous as a place of pilgrimage and vice. " Duph nici mores " was a proverb (see Gibbon's 23d chapter). The beginning of the decay of Daphne must be dated from the time of Julian, when Christianity in the Empire began to triumph over Heathenism. The site has been well identified by Pococke and other travellers at Beit-el-Maa, "the House of the Water," on the left bank of the Oroutes, to the S. W. of Antioch, and on higher ground; where the fountains and the wild fragrant vegetation are in harmony with all that we read of the natural characteristics of Apollo's sanctuary. J. S. H.

" Besides the famous description in Gibbon's 23d chapter, referred to above, an account of Daphne and its worship will be found in K. O. Müller's dissertations De Antiquitatibus Antiochenis (Gotting. 1829), p. 41 ff. Å remarkable Greek inscription of the date 183 B. C., relating to the worship of Apollo and Artemis at Daphne, was discovered in 1858, in a garden on the ancient site of the place, by the Rev. Homer B. Morgan, an American missionary in Syria, and published, with a translation, by Prof. James Hadley in the Journal of the American Oriental Society, vi. 550-555, comp. vii. p. xliv. The inscriptior stone itself is now in the Library of Yale Cr'lege New Haven.

a Not a bad specimen of the wild and gratuitous aggestions which sometimes occur even in these genwally careful Manuals.

low]: Δαράδ; [Vat.] Alex. Δαρα; Comp. Δα- are not anterior to the reign of Xerxes, or ever. andi: Syr. Pesh. افا : Arab. داريداع : that of Artaxerxes Longimanus. There are, how-Dara), 1 Chr. ii. 6. [DARDA.]

DAR'DA (שַרָרָ [heart of wisdom; perh. thorn, thistle, see Dietr. in Ges. s. v.]: Dapata; Alex. Tor Sapaa; [Ald. with 17 MSS. The Dag δά; Comp. τον Δαρδαί;] Joseph. Δάρδανος: Dorda), a son of Mahol, one of four men of great fame for their wisdom, but who were excelled by Solomon (1 K. iv. 31). Ethan, the first of the four, is called "the Ezrachite;" but it is uncertain whether the designation extends to the others. [ETHAN.] In 1 Chr. ii. 6, however, the same four names occur again as "sons of Zerach," of the great family of Pharez in the tribe of Judah, with the alight difference that Darda appears as Dara. The identity of these persons with those in 1 K. iv. has been greatly debated (see the arguments on both sides in Burrington, i. 206-8); but there cannot be much reasonable doubt that they are the same.

1. A great number of Hebrew MSS. read Darda in Chr. (Davidson, Hebr. Text, p. 210), in which they are followed by the Targum and the Syriac and Arabic versions. [DARA.]

2. The son of Zerach would be without difficulty called in Hebrew the Ezrachite, the change depending merely on the position of a vowel point. [EZRAHITE.] And further, the change is actually made by the Targum Jonsthan, which in Kings has "son of Zerach."

3. The word "son" is used in Hebrew so often to denote a descendant beyond the first generation, that no stress can be laid on the "son of Mahol," as compared with "son of Zerach." For instance, of the five "sons of Judah" in 1 Chr. iv. 1. the first was really Judah's son, the second his grandson, the third his great-grandson, and the fourth and fifth still later descendants. Besides there is great plausibility in the conjecture that "Bene Mahol" means "sons of the choir;" in which case the men in question were the famous musicians, two of whom are named in the titles to Psalms lxxxviii. and lxxxix. [MAHOL.] G.

DARIC (אַדַרְפּוֹן, דְרָפָמוֹן, only in pl.;

Talm. דרבון: אסטסטי: solidus, drachma; Ezr. ii. 69, viii. 27; Neh. vii. 70, 71, 72; 1 Chr. xxix. 7), a gold coin current in Palestine in the period after the return from Babylon. That the Hebrew word is, in the Bible, the name of a coin and not of a weight appears from its similarity to the Greek appellation of the only piece to which it could refer. The mentions in Ezr. and Neh. show that the coin was current in Palestine under Cyrus and Artaxerxes Longimanus. At these times there was no large issue of gold money except by the Persian kings, who struck the coin known to the Greeks as the στατήρ Δαρεικός, or Δαρεικός. The Daries which have been discovered are thick pieces of pure gold, of archaic style, bearing on the obverse the figure of a king with bow and javelin, or bow and dagger, and on the reverse an irregular incuse square. Their full weight is about 128 grains troy, or a little less than that of an Attic stater, and is most probably that of an carly didrachm of the Phonician talent. They must have been the comson gold pieces of the Persian empire. The oldest that we have seen cannot be referred to an earlier was advanced by the king to the highest dignit.

DATRA (977] [contracted for the word be- period than about the time of Cyrus. Cumbyses, or Darms Hystaspis, and it is more probable that they ever, gold pieces of about the same weight, but of an older style, found about Sardis, which cannot be doubted to be either of Crossus or of an earlier Lydian king, in the former case the Kougeiou (στατήρες) of the Greeks. It is therefore probable, as these followed a Persian standard, hat Daries were struck under Cyrus or his nearer successors. The origin of this coin is attributed by the Greeks to a Darius, supposed by the modeum to be either Darius the Mede, or Darius Hystascia. That the Greeks derived their distinctive appellation of the coin from this proper name cannot be doubted; but the difference of the Hebrew forms

> of the former from that of the latter 277, renders this a questionable derivation. Gesenius suggests the ancient Persian word Dara (Handho. s. v.), "king;" but (in his Thes. s. v.) inclines to connect the Hebrew names of the coin and that of Darius. In favor of the derivation from Dara, it must be noted that the figure borne by these coins is not that of any one king, but of the king of Persia in an abstract sense, and that on the same principle the coins would rather be called regal coins than Daries. The silver Daries mentioned by Plutarch (Cim. p. 10) are probably the Persian silver pieces similar in types to the gold Daries, but weighing a drachm and a third of the same standard. See MONEY and Dict. of Ant. art Daricus R. S. P.

Daric. Obv.: King of Persia to the right, kneeling. bearing bow and javelin. Rev.: Irregular incuse SO DAPE.

DARI'US (דְרָוָשׁ: Durayawush, Tariyavaus, in Inser.: Daperos, I.XX.; Daperfuens, Strab. xvi. p. 785; *Aaquaios*, Ctes.), the name of several kings of Media and Persia. Herodotus (vi. 98) says that the name is equivalent to epseins (elpyw). the restrainer; and this is probably correct from the analogy of the Persian durresh, "restraint:" Sanskr. dhari, "firmly holding" (Gesen. Thes. s. v.). Hesychius gives a double derivation: Augelos ύπο Περσών δ φρόνιμος ύπο δέ Φρυγών έκι ωρ. Others have regarded the word as another form of the modern Persian dara, darab, "a king;" but this sense of dara is not justified by usage, and it is rather the epithet of a king (the holder, restrainer, as above) than the title itself (Ges. L c.). Three kings bearing this name are mentioned in the O. T.

1. DARIUS the MEDE (, Dan. xi. 1;

Chald. THYTO'T, vi. 1), "the son of Ahasuerus of the seed of the Medes " (ix. 1), who succeeded to (קְּבָּל) the Babylonian kingdom on the death of Belshazzar, being then sixty-two years old (Dan v. 31 (LXX. 'Aρταξέρξης), ix. 1). Only one year of his reign is mentioned (Dan. 1x. 1, xi. 1); but that was of great importance for the Jews. Daniel

548

miraculous deliverance, Darius issued a decree enjoining throughout his dominions "reverence for the God of Daniel " (Dan. vi. 25 ff.)

The extreme obscurity of the Babylonian annals has given occasion to three different hypotheses as to the name under which Darius the Mede is known in history. The first of these, which identifies him with Darius Hystaspis, rests on no plausible evidence, and may be dismissed at once (Lengerke, Dan. p. 219 ff.). The second, which was adopted by Josephus (Ant. x. 11, § 4), and has been supported by many recent critics (Bertholdt; Von Lengerke; Hävernick; Hengstenberg; Auberlen, Daniel und d. Offenbarung, p. 16 ff.) is more deserving of notice. According to this he was (Cuawares II.) "the son and successor of Astyages " (Joseph. L. c. Ar 'Astudyous vids, Etepor δέ παρά τοις "Ελλησιν έκαλείτο δνομα), who is commonly regarded as the last king of Media. It is supposed that the reign of this Cyaxares has been neglected by historians from the fact that through his indolence and luxury he yielded the real exercise of power to his nephew Cyrus, who married his daughter, and so after his death received the crown by direct succession (Xen. Cyrop. 1. 5, § 2, iv. 5, § 8, viii. 5, § 19). But it appears to be a fatal objection to this hypothesis that the only direct evidence for the existence of a second Cyaxares is that of Xenophon's romance (cf. Niebuhr, Gesch. Ass. u. Bab. p. 61). The title Cyrus [filius] Cyazaris, which has been quoted from an inscription (Auberlen, Daniel u. d. Offenbarung, p. 18), is either a false reading or certainly a false translation (Niebuhr, Gesch. Ass. u. Bub. 214, n. 4); and the passage of Æschylus (Pers. 766 f.) is inconsistent with the character assigned to Cyaxares II. On the other hand, Herodotus expressly states that "Astyages" was the last king of the Medes, that he was conquered by Cyrus, and that he died without leaving any male issue (Herod. i. 73, 109, 127 ff.); and Cyrus appears as the imme-liate successor of "Astyages" in the Chronicle of Eusebius (Chron. ad Ol. 54; Syncell. p. 188; cf. Bel and Dragon, i.). A third identification (Winer, Realwort. s. v.; Niebuhr, Gesch. Ass. u. Bab. pp. 45, 92) remains, by which Darius is represented as the personal name of "Astyages," the last king of the Medes, and this appears to satisfy all the conditions of the problem. The name "Astyages" was national and not personal [ASTYAGES], and Ahasuerus (Achashverosh) represents the name (Hunouk hshatra) Cyaxares, borne by the father of "Astyages" (Tob. xiv. 15). The description of the unnamed king in Æschylus a (l. c.) as one whose "feelings were guided by wisdom " (opéves yap stroù bundr danoorpoqour), is applicable to the Darius of Scripture and the Astyages of Herodotus. And as far as the name itself is concerned, there are traces of the existence of an older king Darius before the time of Darius Hystaspis (Schos. ad Arist. Eccles. 598 Δαρεικοί — ούκ άπο Δαρείου 1οῦ Δέρξου πατρός, άλλ' ἀφ' ἐτέρου τινός παλαιοτέοου βασιλέως ώνομάσθησαν. cf. Suidas s. v. Δαpeinos). If, as seems most probable, Darius (Astyages) occupied the throne of Babylon as supreme tovereign with Nerigalsarassar as vassal-prince, after

(Dan. vi I ff.), probably in consequence of his the murder of Evil-merodach (Belshazzar) B. C. former services (cf. Dan. v. 17); and after his 559, one year only remains for this Median supremacy before the victory of Cyrus B. C. 558, in exact accordance with the notices in Daniel (Niebuhr L c.), and the apparent incompleteness of the political arrangements which Darius "purposed" to

make (Dan. vi. 8, ハウダン). For the short dura-

tion of his supreme power may have caused his division of the empire (Dan. vi. 1 ff.) - a work congenial to his character - to fall into abeyance, so that it was not carried out till the time of his namesake Darius Hystaspis: a supposition at least as probable as that there is any confusion of the two monarchs in the book of Daniel.

The chronological difficulties which have been raised (Rawlinson, Herodotus, i. 418) against the identification of Darius with Astyages on the assumption that the events in Dan. v. relate to the taking of Babylon by Cyrus (B. C. 538), in which case he would have ascended the throne at seven years of age, are entirely set aside by the view of Marcus Niebuhr, which has been adopted above; and this coincidence serves to confirm the general truth of the hypothesis.

2. DARIUS the son of HYSTASPES (Vashtaspa). the fifth in descent from Achsemenes, the founder of the Perso-Aryan dynasty, was, according to the popular legend (Herod. i. 209, 210), already marked out for empire during the reign of Cyrus. Upon the usurpation of the Magian Smerdis [AR-TAXERXES], he conspired with six other Persian chiefs to overthrow the impostor, and on the success of the plot was placed upon the throne B. C. 521. He devoted himself to the internal organization of his kingdom, which had been impeded by the wars of Cyrus and Cambyses, and the confusion of the reign of Smerdis. His designs of foreign conquest were interrupted by a revolt of the Babylonians, under a pretender who bore the royal name of Nabukudrassar (Niebuhr, Gesch. Ass. u. Bab. p. 94), which was at length put down, and punished with great severity (c. B. C. 516). After the subjugation of Babylon Darius turned his arms against Scythia, Libya (Herod. iv. 145 ff.), and India (Herod. iv. 44). Thrace and Macedonia acknowledged his supremacy, and some of the islands of the Ægrean were added to his dominion in Asia Minor and the seaboard of Thrace (B. C. 513-505). Shortly afterwards he came into collision with Greece, and the defeat of Marathon (B. C. 490) only roused him to prepare vigorously for that decisive struggle with the West which was now inevitable. His plans were again thwarbed by rehellion. Domestic quarrels (Herod. vii. 2) followed on the rising in Egypt, and he died, B. C. 485, before his preparations were completed (Herod vii. 4).

With regard to the Jews, Darius Hystaspis pur sued the same policy as Cyrus, and restored to them the privileges which they had lost. For the usurpation of Smerdis involved a religious as well as a political revolution, and the restorer of the Magian faith willingly listened to the enemies of a people who had welcomed Cyrus as their deliverer (Ezr. iv. 17 ff.). But in the second year of Darius, B. C. 520, as soon as his power had assumed some solidity, Haggai (Hag. i. 1, ii. 1, 10) and Zechariah

of Babylonia, p. 80, n.) shows that the foundation of the Median empire was really due to Huwakhshates

a It is most worthy of notice that Rechylus charerterians Cyaxares (I) as Mindos . . . d apartos tyrquine the Median empire was really due to Huwakh rparos, while Sir H. Rawlinson (Notes on the History (Cyaxares), in spite of the history of Herodotus

encouraged their countrymen to resume the work | and the Evangelist's testimony to similar phenom of restoration (Ezr. v. 1 ff.), and when their proseedings came to the king's knowledge he confirmed the decree of Cyrus by a new edict, and the temple was finished in four years (B. C. 516, Ezr. vi. 15), though it was apparently used before that time (Zech. vii. 2, 3).

"จ 3. DARIUS the PERSIAN (Neh. zii. 22,

רְפָרָסָי) may be identified with Darius II. Nothus (Ochus), king of Persia B. C. 424-3-405-4, if the whole passage in question was written by Nehemiah. If, however, the register was continued to a later time, as is not improbable, the occurrence of the name Jaddua (vv. 11, 22), who was highpriest at the time of the invasion of Alexander [ALEXANDER], points to Darius III. Codomanus, the antagonist of Alexander and last king of Per**ia**, B. c. 336-330 (1 Macc. i. 1). Cf. Jahn, Arch-äol. ii. 1, 272 ff.; Keil, Lehrb. d. Einl. § 152, 7, who defends at length the integrity of the passage. [NKIIKMIAH.] B. F. W. [NEIIEMLAH.]

4. (Δαρείος; [Sin.] Alex. Δαριος: Arius). Areus, king of the Lacedsemonians (1 Macc. xii. 7). [AREUS.]

DARKNESS (TWT, fem. form TPWT and with much variation in the vowel points: $\sigma\kappa \phi$ ros), is spoken of as encompassing the actual presence of God, as that out of which He speaks, the envelope, as it were, of Divine glory (Ex. xx. 21; 1 K. viii. 12). The cloud symbol of His guidance offered an aspect of darkness to the enemy as of light to the people of Israel. In the description of His coming to judgment, darkness overspreading nature and blotting the sun, &c., is constantly included (Is. xiii. 9, 10; Joel ii. 81, iii. 15; Matt. xxiv. 29; Mark xiii. 24; Luke xxi. 25; Rev. vi. 19).

The plague of darkness in Egypt has been ascribed by various neologistic commentators to nonmiraculous agency, but no sufficient account of its intense degree, long duration, and limited area, as proceeding from any physical cause, has been given. The darkness in waras the yn of Matt. xxvii. 45 attending the crucifixion has been similarly attributed to an eclipse. Phlegon of Tralles indeed mentions an eclipse of intense darkness, and which began at noon, combined, he says, in Bithynia, with an earthquake, which in the uncertain state of our chronology (see Clinton's Fasti Romani, Olymp. 902) more or less nearly synchronizes with the event. Nor was the account one without reception in the early church. See the testimonies to that effect collected by Whiston (Testimony of Phlegon rindicated, Lond. 1732). Origen, however, ad loc. (Latin commentary on St. Matt.) denies the possibility of such a cause, arguing that by the fixed Paschal reckoning the moon must have been about full, and denying that Luke xxiii. 45 by the words έσκοτίσθη ό ήλιοs means to allege that fact as the muse. The genuineness of this commentary has peen impeached, nor is its tenor consistent with Origen adv. Cels. p. 80; but the argument, unless on such an assumption as that mentioned below, seems decisive, and has ever since been adhered to. He limits Tavar the yne to Judes. Dean Alford ad loc), though without stating his reason, prefers he wider interpretation of all the earth's surface an which it would naturally have been day. That Phegon's darkness, perceived so intense in Tralles and Bithynia, was felt in Judsea is highly probable : ported by Burckhardt.

ens of a coincident darkness and earthquake, takes in connection with the near agreement of time gives a probability to the supposition that the former speaks of the same circumstances as the latter Wieseler (Chron. Synop. p. 388), however, and De Wette (Comm. on Matt.) consider the year of Phlegon's eclipse an impossible one for the crucifixion, and reject that explanation of the darkness. The argument from the duration (3 hours) is also of great force; for an eclipse seldom lasts in great intensity more than 6 minutes. On the other hand, Seyffarth (Chronolog. Sacr. pp. 58, 59) maintains that the Jewish calendar, owing to their following the sun, had become so far out that the moon might possibly have been at new, and thus, admitting the year as a possible epoch, revives the argument for the eclines as the cause. He, however, views this rather as a natural basis than as a full account of the darkness, which in its degree at Jerusalem was still preternatural (ib. p. 138). The pamphlet of Whiston above quoted, and two by Dr. Sykes, Dissertation on the Eclipse mentioned by Phlegon, and Defence of same, Lond. 1733 and 1734, may be consulted as regards the statement of Phlegon.

Darkness is also, as in the expression, "land of darkness," used for the state of the dead (Job x. 21, 22); and frequently figuratively, for ignorance and unbelief, as the privation of spiritual light (John i. 5: iii. 19). н. н.

DAR'KON (TIT [bearer, Fürst]: Aar кών, Δορκών; [Alex. in Exr. Деркши:] Dercon). Children [sons] of Darkon were among the "servants of Solomon," who returned from Babylon with Zerubbabel (Ezr. ii. 56; Neh. vii. 58). [Lo-ZON.]

* DARLING, twice in the A. V., Ps. xxii. 90, and xxxv. 17, and used there of life as something inexpressibly dear and precious to men (like Homer's φίλον κηρ, and Plato's τιμιωτάτη ac. ψυχή). " My only one "would be more correct for Th, the original word, applied properly (masc. or fem.) to something which exists singly and cannot be replaced if lost, as an only son (Gen. xxii. 2) or daughter (Jud. xi. 34). In the Psalms, as above, the Sept. has the moreyer n more, and the Vulg. " unicam H. meam.'

* DART. [ARMS.]

DATES, margin of 2 Chr. xxxi. 5 only. [PALM TREE.]

DA'THAN (777] [perh. fontanus, concerned with fountains]: Dathar: Dathan), a Reubenite chieftain, son of Eliab, who joined the conspiracy of Korah the Levite (Num. xvi. 1, [12, 24, 25, 27,] xxvi. 9; Deut. xi. 6; Ps. cvi. 17; [Ecclus. xlv. R. W. R. 18]).

DATH'EMA (Aideua; Alex. and Josephus Δάθεμα; other MSS. Δαμεθα; [Sin. Δαθαιμα:] Dathema), a fortrees (το όχύρουμα; Joseph. φρού-ριον) in which the Jews of Gilead took refuge from the heathen (1 Macc. v. 9). Here they were relieved by Judas and Jonathan (24). They murched from Bozora to Dathema (28, 29) and left it for Maspha (Mizpeh) (35). The reading of the Peshito, Ramtha, points to Ramoth-Gilead, which cas hardly fail to be the correct identification. Ewals however (iv. 359, note) would correct this to Dam tha, which he compares with Dhami, a place re G.

DAUGHTER (Bath, 72, contr. from 7.2,

hm. of $\left[\frac{n}{2}\right]$: $\theta_{UYarfh\rho}$: fikia). 1. The word is used in Scripture not only for daughter, but for granddaughter or other female descendant, much in the

mme way and like extent with ?异, son (Gen. xxiv. 48, xxxi. 43). [See CHILDREN; EDUCATION. WOMEN.]

 In a kindred sense the female inhabitants of a place, a country, or the females of a particular roce, are called daughters (Gen. vi. 2, xxvii. 46, xxvii. 6, xxxvi. 2; Num. xxv. 1; Deut. xxiii. 17; Is. iii. 16; Jer. xlvi. 11, xlix. 2, 3, 4; Luke xxiii. 28).

8. Women in general (Prov. xxxi. 29).

4. Those addicted to particular forms of idolatrous worship (1 Sam. i. 16; Mal. ii. 11).

5. The same notion of descent explains the phrase "daughters of music," *i. e.* singing birds (liccl. xii. 4), and the use of the word for branches of a tree (Gen. xlix. 22), the pupil of the eye, $\kappa \delta \rho \eta$ (Lam. ii. 18; Ps. xvii. 8), and the expression "daughter of 90 years," to denote the age of Sarah (Gen. xvii. 17).

6. It is also used of cities in general, agreeably to their very common personification as belonging to the female sex (Is. x. 32, xxiii. 12, xxxvii. 22, xlvii. 1, lli. 2; Jer. vi. 2, 26, ix. 1, xxxi. 4, xlvi. 11, 24, xlviii. 18, li. 33; Nah. iii. 4, 7; Zech. ix. 9; Ez. xvi. 3, 44, 48, xxiii. 4).

7. But more specifically of dependent towns or handets, while to the principal city the correlative "mother" is applied (Num. xxi. 25; Josh. xvii. 11, 16; Judg. i. 27; 1 Chr. vii. 28; 2 Sam. xx. 19).

llazerim is the word most commonly employed for the "villages" lying round, and dependent ou,

• "city" ('Ir: "Y). But in one place Bath is used as if for something intermediate, in the case of the Philistine cities Ekron, Ashdod, and Gaza (Joah. xv. 45-7) — "ber daughter-towns and her villages." Without this distinction from *Hazerim*, the word is also employed for Philistine towns in 1 Chr. xviii. 1 — Gath; 2 Chr. xxviii. 18 — Shoeho, Timnath, and Gimzo. In Neh. xi. 25-31, the two terms are employed alternately, and to all appearance quite indiscriminately. [VILLAGE.]

н. W. F.

DAVID (7)7, 7)7 [beloved]: a LXX. $\Delta \alpha$ wis; [Vat. $\Delta \alpha weis$:] N. T. [Elz.] $\Delta \alpha \beta i\delta$ [Griesb. $\Delta \alpha u \delta$; Lachm. Tisch. Treg.] $\Delta \alpha u \epsilon \delta$, the son of Jesse, is the best known to us of any of the characters in the O. T. In him, as in the case of St. Paul in the N. T., we have the advantage of comparing a detailed narrative of his life with undoubted works of his own composition, and the combined result is a knowledge of his personal character, such as we probably possess of no historical personage sefore the Christian era, with the exception of Ciever, and perhaps of Caesar.

The authorities for the life of David may be slivided into six classes: ---

If the name, in commor use, is Jo, Daood.

I. The original Hebrew authorities: -

DAVID

- The Davidic portion of the Psalma,^b including such fragments as are preserved to us from other sources, namely, 2 Sam. i. 19-27, iii. 33, 34, xxii. 1-51, xxiii. 1-7. [PsALMS.]
- 2. The "Chronicles" or "State-papers" of David (1 Chr. xxvii. 24), and the original biographies of David by Samuel, Gad, and Nathan (1 Chr. xxix. 29). These are lost, but portions of them no doubt are preserved in
- 3. The narrative of 1 Sam. xvi. to 1 K. ii. 10; with the supplementary notices contained in 1 Chr. xi. 1 to xxix. 30.

II. The two slight notices in the heathen historiana, Nicolaus of Damascus in his Universal History (Joseph. Ant. vii. 5, § 2), and Eupolemus in his History of the Kings of Judah (Eus. Pray Ev. ix. 30).

III. David's apocryphal writings, contained in Fabricius, *Codex pseudepigruphus V. Test.* pp. 906-1006. (1.) Ps. cli., on his victory over Goliath. (2.) Colloquies with God, on madness, on his temptation, and on the building of the Temple. (3.) A charm against fire. Of these the first alone deserves any attention.

IV. The Jewish traditions, which may be divided into three classes : ---

- 1. The additions to the Biblical narrative contained in Josephus, Ant. vi. 8-vii. 15.
- The Hebrew traditions preserved in Jerome's Quastiones Hebraicas in Libros Regum et Paralipomenon (vol. iii., Venice ed.).
- 3. The Rabbinical traditions reported in Basnage, Hist. des Juifs, lib. v. c. 2; Calmet's Dictionary, art. Duvid.

V. The Mussulman traditions, chiefly remarkable for their extravagance, are contained in the Koran, ii. 250-252, xxxviii. 20-24, xxii. 79-82, xxii. 15, and explained in Lane's Selections from the Kwan, p. 228-242; or amplified in Weil's Legends. Eng. Tr. p. 152-170.

VI. In modern times his life has been ofter. treated, both in separate treatises and in histories of Israel. Winer's article on David refers to mon ographs on almost every point in his life. In English, the best known is Dr. Chandler's *Life*, written in the last century; in French, De Choisi's, and that in Bayle's *Dictionary*. The most recent, and probably the best treutment is that in Ewald's *Geschicht des Volkes Israel*, ii: 71-257.

His life may be divided into three portions, more or less corresponding to the three old lost biographies by Samuel, Gad, and Nathan: I. His youth before his introduction to the court of Saul. II. His relations with Saul. III. His reign.

I. The early life of D wid contains in many important respects the antecedents of his future career.

1. Unlike most of the characters of the Scriptures his family are well known to us by name, and are rot without bearing on his subsequent career. They may best be seen in the form of a genealogy.

^a The shorter form is used in the earlier books; mdsed, everywhere except in 1 K. iii. 14, and in Chr., Bar., Neh., Cant., Hos., Am., Es. xxxiv. 23, and Zerh., is which the longer form is found. The Arabic form

In quoting the Psalms in connection with the history, we have been guided partly by the titles (as expressing the Jewish traditions), partly by the internal evidence, as verified by the judgmont of Hebrer scholars.

It thus appears that David was the youngest son, probably the youngest child, of a family of ten. His mother's name is unknown. His father, Jesse, was of a great age when David was still young (1 Sam. xvii. 12). His parents both lived till after his final rupture with Saul (1 Sam. xxii. 3). Through them David inherited several points which he never lost. (a.) His connection with Moab through his great-grandmother Ruth. This he kept up when he escaped to Moab and entrusted his aged parents to the care of the king (1 Sam. xxii. 3), and it may uot have been without its use in keeping open a wider view in his mind and history than if he had been of purely Jewish descent. Such is probably the design of the express mention of Ruth in the genealogy in Matt. i. 5.

(b.) His birthplace, BETHLEHEM. His recollection of the well of Bethlehem is one of the most touching in vidents of his later life (1 Chr. xi. 17). From the territory of Bethlehem, as from his own patrimony, he gave a property as a reward to ('himham, son of Barzillai (2 Sam. xix. 37, 38; Jer. xii. 17); and it is this connection of David with Bethlehem that brought the place again in later times into universal fame, when Joseph went up to Bethlehem, "because he was of the house and lineage of David" (Luke ii. 4).

(c.) His general connection with the tribe of Judah. In none of the tribes does the tribal feeling appear to have been stronger; and it must be borne in mind throughout the story both of his security amongst the hills of Judah during his flight from Saul, and of the early period of his reign at Hebron, as well as of the jealousy of the tribe at having lost their exclusive possession of him, which broke out in the revolt of Absalom.

(d.) His relations to Zeruiah and Abigail. Though called in 1 Chr. ii. 16, sisters of David, they are not expressly called the daughters of "erze; and Abigail, in 2 Sam. xvii. 25, is called the daughter of Nahash. Is it too much to suppose that David's mother had been the wife or congubine "of Nahash, and then married by Jesse? This would agree with the difference of age between David and his sisters, and also (if Nahash was the mme as the king of Ammon) with the kindnesses which David received first from Nahash (2 Sam.

It thus appears that David was the youngest son, $|x. 2\rangle$, and then from Shobi, son of Nahash (xvii. obably the youngest child, of a family of ten. 27).

2. As the youngest of the family he may possibly have received from his parents the name, which first appears in him, of David, the beloved, the darling. But, perhaps for this same reason, he was never intimate with his brethren. The eldest brother, who alone is mentioned in connection with him, and who was afterwards made by him head of the tribe of Judah (1 Chr. xxvii. 18), treated him. scornfully and imperiously (1 Sam. xvii. 28), as the eldest brothers of large families are apt to do. his command was regarded in the family as law (xx. 29); and the father looked upon the youngest son as hardly one of the family at all (xvi. 11), and as a mere attendant on the rest (xvii. 17). The familiarity which he lost with his brothers, he gained with his nephews. The three sons of his sister Zeruiah, and the one son of his sister Abigail. seemingly from the fact that their mothers were the eldest of the whole family, were probably of the same age as David himself, and they accordingly were to him - especially the three sons of Zeruiah - throughout life in the relation usually occupied by brothers and cousins. In them we see the rougher qualities of the family, which David shared with them, whilst he was distinguished from them by qualities of his own, peculiar to himself. The two sons of his brother Shimeah are both connected with his after history, and both celebrated for the gift of sagacity in which David himself excelled. One was Jonadab, the friend and adviser of his eldest son Amnon (2 Sam. xiii. 3). The other was Jonathan (2 Sam. xxi. 21), who afterwards became the counsellor of David himself (1 Chr. xxvii. 32). It is a conjecture or tradition of the Jews preserved by Jerome (Qu. Heb. on 1 Sam. xvii. 12) that this was no other than Nathan the prophet, who, being adopted into Jesse's family, makes up the eighth son, not named in 1 Chr. ii. 13-15. But this is hardly probable.

The first time that David appears in history at once admits us to the whole family circle. There was a practice once a year at Bethlehem, probably at the first new moon of the year, of holding a sacrificial feast, at which Jesse, as the chief proprietor of the place, would preside (1 Sam. xx. 6), with the elders of the town. At this or such like feast (xvi.

a The later rabbis represent him as born in adulary. This is probably a coarse inference from Ps. II. 's but it may possibly have reference to a tradition of he above. On the other hand, in the earlier rabbis which he contr be abave. Some an attempt at "immaculate conception." Sam. xvii. 25.)

They make Nahash — "the serpent" — to be another name of Jesse, bocause he had no sin except that which he contracted from the original serpent; and thus David inherited none. (Jerorre, Qu. Heb. in Sam. xvii. 25.)

1) suddenly appeared the great prophet Samuel, | from this humble station is deeply impressed on his driving a heifer before him, and having in his hand a horn of the consecrated oil a of the Tabernacle. The elders of the little town were terrified at this apparition, but were reassured by the august visitor, and invited by him to the ceremony of sacrificing the heifer. The heifer was killed. The party were waiting to begin the feast. Samuel stood with his horn to pour forth the oil, as if for an invitation to begin (comp. ix. 22). He was restrained by divine intimation as son after son passed by. Eliab, the eldest, by "his height" and "his countenance," seemed the natural counterpart of Saul, whose rival, unknown to them, the prophet came to select. But the day was gone when kings were chosen because they were head and shoulders taller than the rest. "Samuel said unto Jesse, Are these all thy children? And he said, There remaineth yet the youngest, and behold he keepeth the sheep.

This is our first and most characteristic introduction to the future king. The boy was brought in. We are enabled to fix his appearance at once in our minds. He was of short stature, thus contrasting with his tall brother Eliab, with his rival Saul, and with his gigantic enemy of Gath. He had red^b or auburn hair, such as is not unfrequently seen in his countrymen of the East at the present day. In later life he wore a beard. His bright eyes are especially mentioned (xvi. 12), and generally he was remarkable for the grace of his figure and countenance ("fair of eyes," ' " comely. goodly," xvi. 12, 18, xvii. 42), well made, and of immense strength and agility. His swiftness and activity made him (like his nephew Asahel) like a wild gazelle, his feet like harts' feet, and his arms strong enough to break a bow of steel (Ps. xviii. 33, 34). He was pursuing the occupation allotted in Eastern countries usually to the slaves, the females, or the despised of the family (comp. the case of Moses, of Jacob, of Zipporah, and Rachel, and in later times, of Mohammed; Sprenger, p. 8). The pastures of Bethlehem are famous throughout the sacred history. The Tower of Shepherds (Gen. xxxv. 21), the shepherds abiding with their flocks by night (Luke ii.), were both there. He usually carried a switch or wand e in his hand (1 Sam. xvii. 40), such as would be used for his dogs (xvii. 43), and a scrip or wallet round his neck, to carry anything that was needed for his shepherd's life (xvii. 40). Such was the outer lafe of David when (as the later Psalmists described his call) he was "taken from the sheepfolds, from following the swes great with young, to feed Israel according to the integrity of his heart, and to guide them by the skillfulness of his hands" (Ps. lxxviii. 70-72). The recollection / of the sudden and great elevation

" "The oil; " so Joseph. Ant. vi. 8, § 1.

It is useless to speculate on the extent to which is unission was known to himself or to others. Jose-

after life. "The man who was raised up on high " (2 Sam xxiii. 1) - "I have exalted one chosen out of the people" (Ps. lxxxix. 19) - "I took thee from the sheepcote" (2 Sam. vii. 8).

3. But there was another preparation still more needed for his office, which possibly had made him already known to Samuel, and which at any rate is his next introduction to the history. When the body-guard of Saul were discussing with their master where the best minstrel could be found to chase away his madness by music, one of the young men in the guard suggested David. Saul, with the absolute control inherent in the idea of an Oriental king, instantly sent for him, and in the successful effort of David's harp we have the first glimpse into that genius for music and poetry which was afterwards consecrated in the Psalms. It is impossible not to connect the early display of this gift with the schools of the prophets, who exercised their vocation with tabret, psaltery, pipe, and harp (1 Sam. x. 5), in the pastures (*Naioth*; comp. Ps. xxiii. 2), to which he afterwards returned as to his natural home (1 Sam. xix. 18).9

Whether any of the existing Psalms can be referred to this epoch of David's life is uncertain. The 23d, from its subject of the shepherd, and from its extreme simplicity (though placed by Ewald somewhat later), may well have been suggested by this time. The 8th, 19th, and 29th,^A which are universally recognized as David's, describe the phenomena of nature, and as such may more naturally be referred to this tranquil period of his life than to any other. The imagery of danger from wild beasts, lions, wild bulls, &c. (Ps. vii. 2, xxii. 20, 21), must be reminiscences of this time. And now, at any rate, he must have first acquired the art which gave him one of his chief claims to mention in after times - "the sweet singer of Israel" (2 Sam. xxiii. 1), "the inventor of instruments of music" (Am. vi. 5); "with his whole heart he sung songs and loved him that made him " (Ecclus. xlvii. 8).

4. One incident alone of his solitary shepherd life has come down to us - his conflict with the lion and the bear in defense of his father's flocks (1 Sam. xvii. 34, 85). But it did not stand alone. He was already known to Saul's guards for his martial exploits, probably against the Philistines (xvi. 18), and when he suddenly appeared in the camp, his elder brother immediately guessed that he had left the sheep in his ardor to see the battle (xvii. 28). To this new aspect of his character we are next introduced.

There is no perfectly satisfactory means of reconciling the apparently contradictory accounts in 1 Sam. xvi. 14-23, and xvii. 12-31, 55-58. The first

phus (Ant. vi. 8, § 1) says that Samuel whispered is into his ear.

9 The Mussulman traditions represent him as skilled in making haircloth and sackcloth — the usual occupations of the prophets. See the notes to BETHLEHEM, p. 293 a.

A The Mussulman traditions describe him as understanding the language of birds (Koran, axi. 9, axii. 16).

i In Mussulman traditions, as Abraham is called "the Friend," and Mohammed "the Apostle," so Devid is "the Prophet of God." In Well's Legends, p. 157, A s striting Oriental description of his powers as a pealmist : "He could imitate the thunders of heaven, the roar of the lion, the notes of the wightiw

states that David was made known to Saul and youth from soldier to soldier talking of the event became his armor-bearer in consequence of the charm of his music in assuaging the king's melancholy. The second implies that David was still a shepherd with his father's flocks, and unknown to Saul. The Vatican MS. of the LXX., followed by Kennicott (who argues the question at length, Dissertation on Hebrew Text, 418-432, 554-558), rejects the narrative in 1 Sam. xvii. 12-31, 55-58, as spurious. But the internal evidence from its graphic touches is much in its favor, and it must at least be accepted as an ancient tradition of David's life. Horsley, but with no external authority, transposes 1 Sam. xvi. 14-23. Another explanation supposes that Saul had forgotten him. But this only solves half the difficulty, and is evidently not the intention of the narrative. It may therefore be accepted as an independent statement of David's first appearance, modified by the counter-statement already noticed.ª

The scene of the battle is at EPHES-DAMMIM, in the frontier-hills of Judah, called probably from this or similar encounters "the bound of blood." Saul's army is encamped on one side of the ravine, the Philistines on the other, the water-course of Elah or "the Terebinth" runs between them.^b A Philistine of gigantic stature, and clothed in com-plete armor, insults the comparatively defenseless Israelites, amongst whom the king alone appears to be well armed (xvii. 38; comp. xiii. 20). No one can be found to take up the challenge. At this juncture David appears in the camp, sent by his father with ten loaves and ten slices of milk-cheese to his three eldest brothers, fresh from the sheepfolds. Just as he comes to the circle of wagons which formed, as in Arab settlements, a rude fortification round the Israelite camp (xvii. 20), he hears the well known shout of the Israelite war cry (comp. Num. xxiii. 21). The martial spirit of the boy is stirred at the sound; he leaves his provisions with the baggage-master, and darts to join his brothers (like one of the royal messengers c) into the midst of the lines.^d Then he hears the challenge, now made for the fortieth time - sees the dismay of his countrymen - hears the reward proposed by the king - goes with the impetuosity of

a * On the question of the consistency of the different passages referred to in this paragraph, see addition at the end of the article. H.

b Variations in the common account are suggested by two other passages. 1. In 2 Sam. xxi. 19, it is stated that "Goliath of Gath, the staff of whose spear vas like a weaver's beam," was killed (not by David, sut) by Elhanan of Bethlehem. This, combined with .3e fact that the Philistine whom David slew is usually cameless, has suggested to Ewald (ii. 28, 611) the inganious conjecture that the name of Goliath (which is unly given twice to David's enomy, 1 Sam. xvil 4, xxi. 9) was borrowed from the conflict of the real Goliath with Elhanan, whose Bethlehemite origin has led to the confusion. Jerome (Qu. Heb. ad loc.) makes Elhanan the same as David. 2. In 1 Chr. xi. 12, Aleasar (or more probably Shammah, 2 Sam. xxiii. 11) is said to have fought with David at Ephes-dammim against the Philistines. It is of course possible that the same scene may have witnessed two encounters between Israel and the Philistines; but it may also indicate that David's first acquaintance with Eleazar, afterwards one of his chief captains, was made on this memorable occasion.

* The conjecture of Ewald is wholly unnecessary. The Philistine whom David slew is as expressly called **Jolisth** (see above) as the Philistine whom Elhanan new, and, as the writer of the book of Samuel distin- 9 See Fabricius, Cod. pseudepigr. F. T. I. 906

in spite of his brother's rebuke - he is introduced to Saul - undertakes the combat. His victory over the gigantic Philistine is rendered more conspicuous by his own diminutive stature, and by the simple weapons with which it was accomplished --- not the armor of Saul, which he naturally found too large. but the shepherd's sling, which he always carried with him, and the five polished pebbles which he picked up as he went from the water-course of the valley, and put in his shepherd's wallet. Two trophies long remained of the battle - one, the huge sword of the Philistine, which was hung up behind the ephod in the Tabernacle at Nob (1 Sam. xxi. 9); the other, the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem. [NOB.] Ps. cxliv., though by its contents of a much later date, is by the title in the LXX. "against Goliath." Bnt there is also a psalm, preserved in the LXX. at the end of the Psalter, and which, though probably mere adaptation from the history, well sums up this early period of his life: "This is the psalm of David's own writing (?) (idioypapos els Daulo and outside the number, when he fought the single combat with Goliath." "I was small amongst my brethren, and the youngest in my father's house. I was feeding my father's sheep. My hands made a harp, and my fingers fitted a pealtery. And who shall tell it to my Lord? He is the Lord, He heareth. He sent his messenger (angel?) and took me from my father's flocks, and anointed me with the oil of His anointing. My brethren were beautiful and tall, but the Lord was not well pleased with them. I went out to meet the Philistine, and he cursed me by his idols. But I drew his own sword and beheaded him, and took away the reproach from the children of Israel."

II. Relations with Saul. - We now enter on a new aspect of David's life. The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court. Jonathan was inspired by the romantic friendship which bound the two youths together to the end of their lives. The triumphant songs " of the Israelitish women announced that they felt that

guishes the time and place of David's victory from the time and place of Elhanan's victory (which was after David became king and at Gob), he must have had in view different PL listines who bore this name. If they were brothers (comp. 2 Sam. xxi. 22), the second of them may have assumed the other's name after his death, and if they were not, the Hebrews might nat urally enough speak of them by the same name, used is a sort of representative sense (Goliath = giant, hero). "The brother of " in A. V., 2 Sam. xxi. 19, is italicized, but very possibly states what was true of the two champions referred to. For other suggestions, see Wordsworth, Books of Samuel, p. 122.

It is justly remarked above that Ephes-dammim (or Pas-dammim, a shorter form, 1 Chr. xi. 18) within the valley of Elah (which see), may have been the scene of more than one conflict. It was near the frontier of the hostile races, and fighting between them must often have taken place there. H.

c The same word is used as in 1 Sam. xxii. 17.

d As in 1 Sam. iv 16, 2 Sam. xviii. 22.

e For the Mussulman legend, see Well's Legends p. 168.

f Of these and of like songs, Bunsen (Bibelsoerk Pref. p. cl.) interprets the expression in 2 Sam. xxis 1, not "the sweet singer of Israel," but " the dariim of the songs of Israel."

in him Israel had now found a deliverer mightier even than Saul. And in those songs, and in the fame which David thus acquired, was laid the founlation of that unhappy jealousy of Saul towards him which, mingfing with the king's constitutional malady, poisoned his whole future relations to David.

Three new qualities now began to develop themselves in David's character. The first was his prudence. It had been already glanced at on the first mention of him to Saul (1 Sam. xvi. 18), "prudent in matters." But it was the marked feature of the beginning of his public career. Thrice over it is emphatically said, "he behaved himself wisely," and evidently with the impression that it was the wisdom called forth by the necessities of his delicate and difficult situation. It was that peculiar Jewish caution which has been compared to the sagacity of a hunted animal, such as is remarked in Jacob, and afterwards in the persecuted Israelites of the Middle Ages. One instance of it appears immediately, in his answer to the trap haid for him by Saul's servants, "Seemeth it to you a light thing to be the king's son-in-law, seeing that I am a poor man and lightly esteemed?" (xviii. 23). Secondly, we now see his magnanimous forbearance called forth, in the first instance, towards Saul, but displaying itself (with a few painful exceptions) in the rest of his life. He is the first example of the virtue of chivalry. Thirdly, his hairbreadth escapes, continued through so many years, impressed upon him a sense of dependence on the Divine help, clearly derived from this epoch. His usual oath or asseveration in later times was, "As the Lord liveth who hath redeemed my soul out of adversity" (2 Sam. iv. 9; 1 K. i. 29); and the Psalms are filled with imagery taken even literally from shelter against pursuers, slipping dowr precipices (Ps. xviii. 36), hiding-places in rocks and caves, leafy coverts (xxxi. 20), strong fastnesses (xviii. 2).

This course of life subdivides itself into four portions: --

1. His life at the court of Saul till his final cscape (1 Sam. xviii. 2-xix. 18). His office is not exactly defined. But it would seem that, having been first armor-bearer (xvi. 21, xviii. 2), then made captain over a thousand - the subdivision of a tribe --- (xviii. 13), he finally, on his marriage with Michal, the king's second daughter, was raised to the high office of captain of the king's body-guard.ª second only, if not equal, to Abner, the captain of the host, and Jonathan, the heir apparent. These three formed the usual companions of the king at his meals (xx. 25). David was now chiefly known for his successful exploits against the Philistines, by one of which he won his wife, and drove back the Philistine power with a blow from which it only rallied at the disastrous close of Saul's reign.^b He also still performed from time to time the office

G 1 Sam. xx. 25, xxii. 14, as explained by Kwald, B. 98.

^b The story of his wooing Merab, and of her marringe with Adriei (1 Sam. xviii. 17-19), is omitted in LXX. and Joseph. (Ant. vi. 10, § 1) There is the same obliteration of her name in the existing Text of 8 Sam. xxi. 8.

c The first of these (1 Sam. xviii. 9-11) is omitted m the Vatican MS. of the LXX. and Joseph (Ant. vi. 10, § 1). d For the Mussulman legend, see Well's Legends,

d For the Mussulman legend, see Well's Legends, > 154.

* The allusions to his danger from the Benjamite

to entrap him, and the open violence into which the king's madness twice broke out," at last convinced him that his life was no longer safe. He had two faithful allies, however, in the court - the son of Saul, his friend Jonathan - the daughter of Saul, his wife Michal. Warned by the one, and assisted by the other, he escaped by night, d and was from thenceforward a fugitive. Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death [MICHAL]. To this escape the traditional title assigns Ps. lix. Internal evidence (according to Ewald) gives Ps. vi.e and vii. to this period. Ir the former he is first beginning to contemplate the necessity of flight; in the latter he is moved by the plots of a person not named in the history (perhaps those alluded to in 1 Chr. xii. 17) - socording to the title of the pealm, Cush, a Benjamite, and therefore of Saul's tribe.

2. His escape (1 Sam. xix. 18-xxi. 15). -- (a.) He first fled to Naioth (or the pastures) of Ramah, to Samuel. This is the first recorded occasion of his meeting with Samuel since the original interview during his boyhood at Bethlehem. It might almost seem as if he had intended to devote himself with his musical and poetical gifts to the prophetical office, and give up the cares and dangers of public life. But he had a higher destiny still. Up to this time both the king and himself had thought that a reunion was possible (see xx. 5, 26). But the madness of Saul now became more settled and ferocious in character; and David's danger proportionably greater. The secret interview with Jonathan, of which the recollection was probably handed down through Jonathan's descendants when they came to David's court, confirmed the alarm already excited by Saul's endeavor to seize him at Ramah, and he now determined to leave his country, and take refuge, like Coriolanus, or Themistocles in like circumstances, in the court of his enemy. Before this last resolve, he visited NOB, the seat of the tabernacle, partly to obtain a final interview with the High-priest (1 Sam. xxii. 9, 15), partly to obtain food and weapons. Un the pretext of a secret mission from Saul, he gained an answer from the oracle, some of the consecrated loaves, and the consecrated sword of Goliath. "There is none like that: give it me." The incident was of double importance in David's career. First, it established a connection between him and the only survivor from the massacre in which David's visit involved the house of Ahimelech Secondly, from Ahimelech's surrender of the consecrated bread to David's hunger our Lord drew the inference of the superiority of the moral to the ceremonial law, which is the only allusion made to David's life in the N. T. (Matt. xii. 3; Mark ii.

archers (Ps. xi. 2), to his flight like a bird to the mountains (xi. 1, comp. 1 Sam. xxvi. 20), and probably to the neighborhood of the Dead Sea (xi. 6), rather point to the time when he was at Magedi.

/ The statement of his pretended mission is differently given in the Hebrew and in the LXX. It must be observed that the young men spoken of as his companions were imaginary. He was quite alone.

g J. is a characteristic Jewish comment (as distinguished from the lesson drawn by Christ) that t_{Le} bread was useless to him (Jeroma, Qw. Hec. in hec.).

the traditional title of Ps. lii.

(6.) His stay at the court of ACHISH was short. Discovered possibly by "the sword of Goliath," his presence revived the national enmity of the Philistines against their former conqueror; and he only ascaped by feigning madness," violent gestures, playing on the gates of the city, or on a drum or cymbal, letting his beard grow, and foaming at the mouth (1 Sam. xxi. 13, LXX.). The 56th and 34th pealms are both referred by their titles to this event, and the titles state (what does not appear in the narrative) that he had been seized as a prisoner by the Philistines, and that he was, in consequence of this stratagem, set free by Achish, or (as he is twice called) Abimelech.

3. His life as an independent outlaw (xxii. 1xxvi. 25. (a.) His first retreat was the cave of Adullam, probably the large cavern (the only very large one in Palestine), not far from Bethlehem, now called Khureitun (see Bonar's Land of Promise, p. 214). From its vicinity to Bethlehem, he was joined there by his whole family, now feeling themselves insecure from Saul's fury (xxii. 1). This was probably the foundation of his intimate connection with his nephews, the sons of Zeruiah.

Of these, Abishai, with two other companions, was amongst the earliest (1 Chr. xi. 15, 20; 1 Sam. xxvi. d; 2 Sam. xxiii. 13, 18). Beside these, were outlaws and debtors from every part, including doubtless some of the original Canaanites - of whom the name of one at least has been preserved, Ahimelech the Hittite (1 Sam. xxvi. 6).^b

(b.) His next move was to a stronghold, either the mountain, afterwards called Herodium, close to Adullam, or the fastness called by Josephus (B. J. vii. 8, § 3) Masada, the Grecized form of the Hebrew word Matzed (1 Sam. xxii. 4, 5; 1 Chr. xii. 16), in the neighborhood of En-gedi. Whilst there, he had deposited his aged parents, for the sake of greater security, beyond the Jordan, with their ancestral kinsman of Moab (ib. 3). The neighboring king, Nahash of Ammon, also treated him kindly (2 Sam. x. 2). Here another companion appears for the first time, a schoolfellow, if we may use the word, from the schools of Samuel, the prophet Gad, his subsequent biographer (1 Sam. axii. 5); and whilst he was there, occurred the chivalrous exploit of the three heroes just mentioned to procure water from the well of Bethlehem, and David's chivalrous answer, like that of Alexander in the desert of Gedrosia (1 Chr. xi. 16-19; 2 Sam. sxiii. 14-17). He was joined here by two separate bands. One a little body of eleven fierce Gadite c mountaineers, who swam the Jordan in flood-time to reach him (1 Chr. xii. 8). Another was a detachment of men from Judah and Benjamin under his aephew Aniasai, who henceforth attached himself to David's fortunes (1 Chr. xii. 16-18).

(c.) At the warning of Gad, he fled next to the forest of Hareth (somewhere in the hills of Judah, 'ut its exact site unknown), and then again fell in with the Philistines, and again, apparently advised by Gad (xxiii. 4) made a descent on their foraging parties, and relieved Keilah (also unknown), in

This is the subject of one of David's apocryphal colloquies (Fabricius, Cod. pseudepigr. V. T. p. 1002

35. Luke vi. 3, 4). It is also commemorated by [which he took up his abode. Whilst there, non for the first time in a fortified town of his own (xxiii. 7), he was joined by a new and most important ally - Abiathar, the last survivor of the house of Ithamar, who came with the High-priest s Ephod, and henceforth gave the oracles, which David had hitherto received from Gad (xxiii. 6, 9, xxii. 23). By this time, the 400 who had joined him at Adullam (xxii. 2) had swelled to 600 (xxiii. 13).

> (d.) The situation of David was now changed by the appearance of Saul himself on the scene. Apparently the danger was too great for the little army to keep together. They escaped from Keilah. and dispersed, "whithersoever they could go," amongst the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness, partly from ignorance of the localities, partly because the same event seems to be twice narrated (1 Sam. xxiii. 19-24, xxvi. 1-4, and perhaps 1 Sam. xxiv. 1-22, xxvi. 5-25). But thus much we discern. He is in the wilderness of Ziph. Once (or twice) the Ziphites betray his movements to Saul. From thence Saul literally hunts him like a partridge, the treacherous Ziphites beating the bushes before him, and 3000 men stationed to catch even the print of his footsteps on the hills (1 Sam. xxiii. 14, 22 (Heb.), 24 (LXX.), xxiv. 11, xxvi. 2, 20). David finds himself driven to the extreme south of Judah, in the wilderness of Maon. On two, if not three occasions, the pursuer and pursued catch sight of each other. Of the first of these escapes, the memory was long preserved in the name of the "Cliff of Divisions," given to the cliff down one side of which David climbed, whilst Saul was surrounding the hill on the other side (xxiii. 25-29), and was suddenly called away by a panic of a Philistine invasion. On another occasion, David took refuge in a cave "by the spring of the wild goats " (Engedi) immediately above the Dead Sea (1 Sam. xxiv. 1, 2). The rocks were covered with the pursuers. Saul entered, as is the custom in Oriental countries, for a natural necessity. The followers of David, seated in the dark recesses of the cave, seeing, yet not seen, suggest to him the chance thus thrown in their way. David, with a characteristic mixture of humor and generosity, descends and silently cuts off the skirt of the long robe, spread, as is usual in the East on such occasions, before and behind the person so occupied and then ensued the pathetic scene of remonstrance and forgiveness (xxiv. 8-22).d The third (if it can be distinguished from the one just given) was in the wilderness further south. There was a regular camp, formed with its usual fortification of wagon and baggage. Into this inclosure David penetrated by night, and carried off the cruse of water and the well known royal spear of Saul, which had twice so nearly transfixed him to the wall in former days (xxvi. 7, 11, 22). [ARMS, Chanith.] ТЪэ same scene is repeated as at Engedi - and this is the last interview between Saul and David (xxvi. 25). He had already parted with Jonathan in the forest of Ziph (xxiii. 18).

To this period are annexed by their traditiona.

d For the Mussulman legend, see Well, p. 156.

^b Sibbechai, who kills the giant at Gob (2 Sam. xxi 1º1, is said by Josephus to have been a Hittite.

[&]quot; Gad, as Jerome's Jewish commentators observ

⁽Qu. Heb. in loc.), appears suddenly, without intro duction, like Elijah. Is it possible that he, like Elijah may have been from beyond the Jordan, and com as his name implies, with the eleven Gaditas ?

atles Pealms liv. ("When the Ziphim came and table for the first time to requite the friendly inhabmad, both not David hide himself with us?"); lvii. [itants of the scene of his wanderings (1 Sam. xxx. ("When he fled from Saul in the cave," though this may refer also to Adullam); lxiii. (" When he a in the wilderness of Judah," or Idumsea, LXX.); cxlii. ("A prayer when he was in the cave "). It is probably these psalms which made the Psalter so dear to Alfred and to Wallace during their like wanderings.

Whilst he was in the wilderness of Maon occurred David's adventure with NABAL, instructive as showing his mode of carrying on the freebooter's life, and his marriage with Abigail. His marriage with Ahinoam from Jezreel,ª also in the same neighborhoud (Josh. xv. 56), seems to have taken place a short time before (1 Sam. xxv. 43, xxvii. 8: 2 Sam. iii. 2).

4. His service under Achish b (1 Sam. xxvii. 1-2 Sam. i. 27). - Wearied with his wandering life he at last crosses the Philistine frontier, not as before in the capacity of a fugitive, but the chief of a powerful band - his 600 men now grown into an organized force, with their wives and families around them (xxvii. 8-4). After the manner of Eastern potentates, Achish gave him, for his support, a city - Ziklag on the frontier of Philistiaand it was long remembered that to this curious arrangement the kings of Judah owed this appanage of their dynasty (xxvii. 6). There we meet with the first note of time in David's life. He was settled there for a year c and four months (xxvii. 7), and his increasing importance is indicated by the fact that a body of Benjamite archers and slingers, twenty-two of whom are specially named, joined him from the very tribe of his rival (1 Chr. xii. 1-7). Possibly during this stay he may have acquired the knowledge of military organization, in which the Philistines surpassed the Israelites, and in which he surpassed all the preceding rulers of Innel.

He deceived Achish into confidence by attacking the old nomadic inhabitants of the desert frontier. and representing the plunder to be of portions of the southern tribes or the nomadic allied tribes of Israel. But this confidence was not shared by the Philistine nobles; and accordingly David was sent eack by Achish from the last victorious campaign gainst Saul. In this manner David escaped the difficulty of being present at the battle of Gilbon, hut found that during his absence the Bedouin Amalekites, whom he had plundered during the previous year, had made a descent upon Ziklag, burnt it to the ground, and carried off the wives and children of the new settlement. A wild scene of frantic grief and recrimination ensued between David and his followers. It was calmed by an oracle of assurance from Abiathar. It happened that an important accession had just been made to his force. On his march with the Philistines northward to Gilbon, he had been joined by some chiefs of the Manassites, through whose territory he was passing. Urgent as must have been the need for them at home, yet David's fascination carried them off, and they now assisted him against the plunserers (1 Chr. xii. 19-21). They overtook the fugitive Abiatoar, now came in strength, reprenvaders in the desert, and recovered the spoil, sented by the head of the rival branch of Eleazar, These were the gifts with which David was now the High-priest, the aged Jehoiada and his youth-

26-31). A more lasting memorial was the law which traced its origin to the arrangement made by him, formerly in the attack on Nabal, but now again, more completely, for the equal division of the plunder amongst the two-thirds who followed to the field, and one-third who remained to guard the baggage (1 Sam. xxx. 25, xxv. 13). Two days after this victory a Bedouin arrived from the North with the fatal news of the defeat of Gilbon. The reception of the tidings of the death of his rival and of his friend, the solemn mourning, the vent of his indignation against the bearer of the message, the pathetic lamentation that followed, well close the second period of David's life (2 Sam. i. 1-27)

III. David's reion

(I.) As king of Judah at Hebron, 7; years (2 Sam. ii. 11; 2 Sam. ii. 1-v. 5).

Hebron was selected, doubtless, as the ancient sacred city of the tribe of Judah, the burial place of the patriarchs and the inheritance of Caleb. Here David was first formally anointed king - by whom is not stated - but the expression seems to limit the inauguration to the tribe of Judah, and therefore to exclude any intervention of Abiathar (2 Sam. ii. 4). To Judah his dominion was nominally confined. But probably for the first five years of the time the dominion of the house of Saul, whose seat was now at Mahanaim, did not extend to the west of the Jordan; and consequently David would be the only Israelite potentate amongst the western tribes. Gradualiy his power increased, and during the two years which followed the elevation of Ishbosheth, a series of skirmishes took place between the two kingdoms. First came a successful inroad into the territory of Ishbosheth (2 Sam. ii. 28). Next occurred the defection of Abner (2 Sam. iii. 12), and the surrender of Michal, who was now separated from her second husband to return to her first (2 Sam. iii. 15). Then rapidly followed, though without David's consent, the successive murders of ABNER and of ISHBOSHETH (2 Sam. iii. 30, iv. 5). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. A solemn league was made between him and his people (2 Sam. v. 8). For the third time David was anointed king, and a festival of three days celebrated the joyful event (1 Chr. xii. 39). His little band had now swelled into "a great host, like the host of God " (1 Chr. xii. 22). The command of it, which had formerly rested on David alone, he now devolved on his nephew Josh (2 Sam. ii. 28). It was formed by contingents from every tribe of Israel. Two are specially mentioned as bringing a weight of authority above the others The sons of Issachar had " understanding of the times to know what Israel ought to do," and with the adjacent tribes contributed to the common feast the peculiar products of their rich territory (1 Chr. xii. 32, 40). The Levitical tribe, formerly represented in David's following only by the solitary

c But the value of this is materially damaged by According to the Jewish tradition (Jerome, Qu the variations in the LXX. to "4 months," and

Web. on 2 Sam. vill. 10), he was the son of the former Joseph. Ant. vi. 13, to "4 months and 20 days" tehish ; his mother's name Maa sh.

xxvii. 5).

The only psalm directly referred to this epoch is the 27th (by its title in the LXX. Ilpd Tou Xp10-Byrau - " before the anointing " i. e. at Hebron).

Underneath this show of outward prosperity, two cankers, incident to the royal state which David now assumed, had first made themselves apparent at Hebron, which darkened all the rest of his career. The first was the formation of a harem, according to the usage of Oriental kings. To the two wives of his wandering life, he had now added four, and including Michal, five (2 Sam. ii. 2, iii. 2-5, 15). The second was the increasing ower of his kinsmen and chief officers, which the king strove to restrain within the limits of right, and thus of all the incidents of this part of his career the most plaintive and characteristic is his lamentation over his powerlessness to prevent the murder of Abner (2 Sam. iii. 31-36).

(II.) Reign over all Israel 38 years (2 Sam. v 5, to 1 K. ii. 11).

(1.) The Foundation of Jerusalem. -- It must have been with no ordinary interest that the surrounding nations watched for the prey on which the Lion of Judah, now about to issue from his native lair, and establish himself in a new home, would make his first spring. One fastness alone in the centre of the land had hitherto defied the arms of Israel. On this, with a singular prescience, David fixed as his future capital. By one sudden assault Jebus was taken, and became henceforth known by the names (whether borne by it before or not we cannot tell) of Jerusalem and Zion. Of all the cities of Palestine great in former ages, Jerusalem alone has vindicated by its long permanence the choice of its founder. The importance of the capture was marked at the time. The reward bestowed on the successful scaler of the precipice, was the highest place in the army. Joah henceforward became captain of the host (1 Chr. xi. 6). The royal residence was instantly fixed there - fortifications were added by the king and by Joab - and it was known by the special name of the "city of David" (1 Chr. xi. 7; 2 Sam. v.

The neighboring nations were partly enraged and partly awestruck. The Philistines a made two ineffectual attacks on the new king (2 Sam. v. 17-90),^b and a retribution on their former victories took place by the capture and confiagration of their own idols (1 Chr. xiv. 12). Tyre, now for the first time appearing in the sacred history, allied herself with Israel; and Hiram c sent cedarwood for the buildings of the new capital (2 Sam. v. 11), especially for the palace of David himself (2 Sam. vii. Unhallowed and profane as the city had been 8). before, it was at once elevated to a sanctity which it has nover lost, above any of the ancient sanctuaries of the land. The ark was now removed from its obscurity at Kirjath-jearim with marked

* The importance of the victory is indicated by the (probable) allusion to it in Is. xxviii. 21.

b In 1 Chr. xiv. 8, the incoherent words of 2 Sam. r. 17, "David went down into the hold," are omitted.

c Eupolemus (Eus. Prop. Ev. ix. 80) mentions an expedition against Hiram king of Tyre and Sidon, and a letter to Vafres king of Ngypt to make an allia non

4 1 Chr. zvi. 1, says "they offered;" 2 Sam. vi. 17, "he offered." Both any "he blessed." The LEX , by a slight variation of the text, reads both in

al and warlike kinsman Zadok (1 Chr. xii. 27, 28, i solemnity. A temporary halt (owing to the death of Uzzah) detained it at Obed-edom's house, after which it again moved forward with great state to Jerusalem. An assembly of the nation was convened, and (according to 1 Chr. xiii. 2, xv. 2-27) especially of the Levites. The musical arts in which David himself excelled were now developed on a great scale (1 Chr xv. 16-22; 2 Sam. vi. 5) Zadok and Abiathar, the representatives of the two Aaronic families, were both present (1 Chr. xv. 11 Chenaniah presided over the music (1 Chr. xv. 29 27). Obed-edom followed his sacred charge (1 Chr. xv. 18, 21, 24). The prophet Nathan appears for the first time as the controlling adviser of the future (2 Sam. vii. 3). A sacrifice was offered as soon as a successful start was made (1 Chr. xv. 36; 2 Sam. vi. 13). David himself was dressed in the white linen dress of the priestly order, without his royal robes, and played on stringed instruments (1 Chr. xv. 27; 2 Sam. vi. 14, 20). As in the prophetic schools where he had himself been brought up (1 Sam. x. 5) and as still in the impressive ceremonial of some Eastern Dervishes, and of Seville cathedral (probably derived from the East), a wild dance was part of the religious solemnity. Into this David threw himself with unreserved enthusiasm, and thus conveyed the symbol of the presence of Jehovah into the ancient heathen fortress. In the same spirit of uniting the sacerdotal with the royal functions, he offered sacrifices on a large scale, and himself gave the benediction to the people (2 Sam. vi. 17, 18; 1 Chr. xvi. 2).d The scene of this inauguration was on the hill which from David's habitation was specially known as the "City of David." As if to mark the new era he had not brought the ancient tabernacle from Gibeon, but had erected a new tent or tabernacle (1 Chr. xv. 1) for the reception of the ark. It was the first beginning of the great design, of which we will speak presently, afterwards carried out by his son, of erecting a permanent temple or palace for the ark, corresponding to the state in which he himself was to dwell. It was the greatest day of David's life. One incident only tarnished its splendor - the reproach of Michal, his wife, as he was finally entering his own palace, to carry to his own household the benediction which he had already pronounced on his people. [MICHAL.] His act of severity towards her was an additional mark of the stress which he himself laid on the solemnity (2 Sam. vi. 20-23; 1 Chr. xv. 29).

No less than eleven pealms, either in their traditional titles, or in the irresistible evidence of their contents, bear traces of this great festival. The 29th peaks (by its title in the LXX.) is mid to be on the "Going forth of the tabernacle." « The 80th (by its title), the 15th and 101st by their contents, express the feelings of David on his occupation of his new home. The 68th, at least in part, and the 24th / seem to have been actually composed for the entrance of the ark into the

2 Sam. vi. 14 and 2 Chr. xxx. 21, "instruments of praise," for " all his might."

" As "the tabernacle" was never moved from Gib eon in David's time, "the ark " is probably meant I is the pealm which describes a thunder-storm. Is if possible to connect this with the event described in § Sam. vi. 6? A similar allusion may be found in Ps lxviii. 7, 88. (See Chandler, ii. 211.)

In the LXX title said to be "on the Sabharh day."

aucient gates of the heathen fortress - and the last | the founder, a position which entitled him to the words of the second of these two pasims a may be name of "Patriarch" (Acts ii. 29) and (ultimately) regarded as the inarguration of the new name by of the ancestor of the Messiah. which God henceforth is called, The Lord of hosts. "Who is this king of glory?" "The Lord of hosts, He is the king of glory" (Ps. xxiv. 10; comp. 2 Sam. vi. 2). Fragments of poetry worked up into pealms (xcvi. 2-13,b cv., cvi. 1, 47, 48), occur in 1 Chr. xvi. 8-36, as having been delivered by David "into the hands of Asaph and his brother" after the close of the festival, and the two mysterious terms in the titles of Ps. vi. and xlvi. (Sheminith and Alamoth) appear in the lists of those mentioned on this occasion in 1 Chr. xv. 20, 21. The 132d is, by its contents, if not by its authorship, thrown back to this time. The whole progress of the removal of the ark is traced in David's vein.

(2.) Foundation of the Court and Empire of Israel, 2 Sam. viii. to xii. - The erection of the new capital at Jerusalem introduces us to a new era in David's life and in the history of the monarchy. Up to this time he had been a king, such as Saul had been before him, or as the kings of the neighboring tribes, each ruling over his territory unconcerned with any foreign relations except so far as was necessary to defend his own nation. But David, and through him the Israelitish monarchy, now took a wider range. He became a king on the scale of the great Oriental sovereigns of Egypt and Persia, with a regular administration and organization of court and camp; and he also founded an imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen. xv. 18-21). The internal organization now established lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reigns of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history. For once, the kings of Israel were on a level with the great potentates of the world. David was an imperial conqueror, if not of the same magnitude, yet of the same kind, as Rameses or Cyrus, - "I have made thee a great name like unto the name of the great men that are in the earth " (2 Sam. vii. 9). " Thou hast shed blood abundantly, and hast made great wars" (1 Chr. xxii. 8). And as, on the one hand, the external relations of life, and the great incidents of war and conquest receive an elevation by their contact with the religious history, so the religious history swells into larger and broader dimensions from its contact with the course of the outer world. The enlargement of territory, the amplification of power and state, leads to a corresponding enlargement and amplification of ideas, of imagery, of sympa thies; and thus (humanly speaking) the magnificent forebodings of a wider dispensation in the prophetic writings first became possible through the court and empire of David.

(a.) In the internal organization of the kingdom the first new element that has to be considered is the royal family, the dynasty, of which David was

a Ewald, iii. 164. For an elaborate adaptation of she 68th Psalm to this event, see Chandler, ii. 54.

" In the title of the LXX. said to be David's "when the hours was built after the captivity." It s possible that by "the captivity " may be meent the sapilivity of the ark in Philistia, as in Judg. xviii. 80.

" Compare the legends in Weil's Legends, p. 155, and Lane's Selections from the Koran, p. 229. Thu

Of these, Absalom and Adonijah both inherited their father's beauty (2 Sam. xiv. 25; 1 K. i. 6); but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1 K. xv. 2). The princes were under the charge of Jehiel (1 Chr. xxvii. 32), perhaps the Levite (1 Chr. xv. 21; 2 Chr. xx. 14), with the exception of Solomon, who (according at least to one rendering) was under the charge of Nathan (2 Sam. xii. 25). David's strong parental affection for all of them is very remarkable (2 Sam. xiii. 81, 83, 86, xiv. 83, xviii. 5, 83, xix. 4; 1 K. i. 6).

(b.) The military organization, which was 'm fact inherited from Saul, but greatly developed by David, was as follows:

(1.) "The Host," i. e. the whole available military force of Israel, consisting of all males, capable of bearing arms, and summoned only for war. This had always existed from the time of the first settlement in Cansan, and had been commanded by the chief or the judge who presided over Israel for the time. Under Saul, we first find the recognized post of a captain or commander-in-chief - in the person of Abner; and under David this post was given, as a reward for the assault on Jerusalem, to his nephew JOAB (1 Chr. xi. 6, xxvii. 34), who conducted the army to battle in the absence of the king (2 Sam. xii. 28). There were 12 divisions of 24,000 each, who were held to be in duty month by month; and over each of them presided an officer, selected for this purpose from the other military bodies formed by David (1 Chr. xxvii. 1-15). The army was still distinguished from those of surrounding nations by its primitive aspect of a force of infantry without cavalry. The only innovations as yet allowed were, the introduction of a very limited number of chariots (2 Sam. viii. 4) and of mules for the princes and officers instead of the asses (2 Sam. xiii. 29, xviii. 9). According to a Mussulman tradition (Koran, xxi. 80), David invented chain armor.c The usual weapons were still spears and shields, as appears from the Psalms. For the general question of the numbers and equipment of the army, see ARMS and ARMY.

(2.) The Body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer (1 Sam. xxii. 14; Ewald). But it now assumed a peculiar organiza-tion. They were at least in name foreigners, as having been drawn from the Philistines, probably during David's residence at the court of Gath. They are usually called from this circumstance "Cherethites and Pelethites," but had also d a pody especially from Gath e amongst them, of whom the name of one, Ittai, is preserved, as a faithful serv ant of David (2 Sam. xv. 19). The captain of the force was, however, not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who outlived David, and became the chief support of

a good coat of mail is often called by the Arabs " Daoodes," i. c. Davidean.

e But here the reading is doubtful (Ewald, Mi. E note.)

[&]quot; A tradition in Jerome (Qu. Heb. on 1 Chr. xviii 17) speaks of their being in the place of the seventy judges appointed by Mos

the throne of his son, namely, Benaiah, son of the 18), Eleazar (1 Chr. xi. 12; 2 Sam. xxiii. 9), Shamchief priest Jehoiada, representative of the eldest branch of Aaron's house (2 Sam. viii. 18, xv. 18, xx. 23; 1 K. i. 38, 44).

(3.) The most peculiar military institution in David's army was that which arose out of the peculiar circumstances of his early life. As the nucleus of the Russian army is the Preobajinsky regiment formed by Peter the Great out of the companions who gathered round him in the suburb of that name in Moscow, so the nucleus of what afterwards became the only standing army in David's forces was the band of 600 men who had gathered round him in his wanderings. The number of 600 was still preserved, with the name of Gibborim, "heroes" or "mighty men." It became yet further subdivided e into 8 large bands of 900 each, and small bands of 20 each. The small bands were commanded by 30 officers, one for each band, who together formed "the thirty," and the 3 large bands by 3 officers, who together formed "the three," and the whole by one chief, "the captain of the mighty men" (2 Sam. xxiii. 8-39; 1 Jur. xi. 9-47). This commander of the whole force was Abishai, David's nephew (1 Chr. xi. 20; and comp. 2 Sam. xvi. 9). "The three" were Jash heam (1 Chr. xi. 11) or Adino (2 San. xxiii.

" Taken in war (Jerome, Qu. Heb. ad 2 Sam. xili. 37). b Eglah alone is called "David's wife" in the enumeration 2 Sam. iii. 5. The tradition in Jerome (Qu. Heb. ad loc.) says that she was Michal; and (id. ad 2 Sam. vi. 23) that she died in giving birth to Ith-POINTS.

« The LXX. in 2 Sam. v. 16, after having given substantially the same list as the present liebrew text, ppeaks the list, with strange variations, as follows: Sumar, lessibath, Nathan, Galamaan, Itbaar, Threeus Ehdaint, Naged, Naphek, Ianathan, Leasamys, Baalath, Eliphanth.

Josephus (Ant. vii. 8, § 8) gives the following list, viii. 100).

mah (2 Sam. xxiii. 11). J Of "the thirty," some few only are known to fame elsewhere. Asahel, David's nephew (1 Chr. xi. 26; 2 Sam. ii. 18); Elhanan, the victor of at least one Goliath (1 Chr. xi. 26; 2 Sam. xxi. 19); Joel, the brother or son (LXX.) of Nathan (1 Chr. xi. 38); Naharai, the armor-bearer of Joab (1 Chr. xi. 39; 2 Sam. xxiii. 37); Eliam,⁹ the son of Ahithophel (2 Sam. xxiii. 34); Ira, one of David's priests (1 Chr. xi. 40; 2 Sam. axiii. 38, ax. 26); Uriah the Hittite (1 Chr. xi. 41; 2 Sam. xxiii. 39, xi. 3).

(c.) Side by side with this military organization were established social and moral institutions. Some were entirely for pastoral, agricultural, and financial purposes (1 Chr. xxvii. 25-31), others for judicial (1 Chr. xxvi. 29-32). Some few are named as constituting what would now be called the court or council of the king; the councillors, Ahithophel of Gilo, and Jonathan the king's nephew, (1 Chr. xxvii. 32, 33); the companion or "friend," Hushai (1 Chr. xxvii. 33; 2 Sam. xv. 37, xvi. 19); the scribe, Sheva, or Seraiah, and at one time Jonathan (2 Sam. xx. 25; 1 Chr. xxvii. 32); Jehoshaphat, the recorder or historian A (2 Sam. xx. 24), and Adoram the tax collector, both of whom survived him (2 Sam. xx. 24; 1 K. xii.

of which only four names are identical. He states that the two last were sons of the concubines : Amnus, Emnus, Eban, Nathan, Solomon, Ichar, Mitz, Phalna, Ennaphèn, Ienaö, Eliphale. « See Ewald, iii. 178.

f The LXX. (cf. 2 Sam. xxifi. 8) make them: 1. Isboseth the Canasnite ; 2. Adino the Asonite ; 8. Ess sar, son of Dodo.

9 Perhaps the father of Bathsheba, whose m a se la ca with Urinh would thus be accounted for. (See Blunt Coincidences, II. x.)

A As in the court of Permis (Herod. vi. 100, vil. SC

18, iv. 3, 6). Each tribe had its own head (1 Chr. | and, as if to include his whole court within the xxvii. 16-22). Of these the most remarkable were Elihu, David's brother (probably Eliab), prince of Judah (ver. 18), and Jaasiel, the son of Abner, of Benjamin (ver. 21).

But the more peculiar of David's institutions were those directly bearing on religion. Two prophets appear as the king's constant advisers. Of these, Gad, who seems to have been the elder, had been David's companion in exile; and from his being called "the seer." belongs probably to the earliest form of the prophetic schools. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem (2 Sam. vii. 2), is distinguished both by his title of "prophet," and by the nature of the prophecies which he utters (2 Sam. vii. 5-17, xii. 1-14), as of the purest type of prophetic dispensation, and as the hope of the new generation, a which he supports in the person of Solomon (1 K. i.). Two high-priests also appear - representatives of the two rival houses of Aaron (1 Chr. xxiv. 3); here again, as in the case of the two prophets, one, Abiathar,^b who attended him at Jerusalem, companion of his exile, and connected with the old time of the judges (1 Chr. xxvii. 34), joining him after the death of Saul, and becoming afterwards the support of his son, the other Zadok, who ministered at Gibeon (1 Chr. xvi. 39), and who was made the head of the Aaronic family (xxvii. 17). Besides these four great religious functionaries there were two classes of subordinates - prophets, specially instructed in singing and music, under Asaph, Heman, the grandson of Samuel, and Jeduthun (1 Chr. xxv. 1-31) - Levites, or attendants on the sanctuary, who again were subdivided into the guardians of the gates and guardians of the treasures (1 Chr. xxvi. 1-28) which had been accumulated, since the reëstablishment of the nation, by Samuel, Saul, Abner, Joab, and David himself (1 Chr. xxvi. 26-28).

The collection of those various ministers and representatives of worship round the capital must have given a new aspect to the history in David's time, such as it had not borne under the disconnected period of the Judges. But the main peculiarity of the whole must have been, that it so well harmonized with the character of him who was its centre. As his early martial life still placed him at the head of the military organization which had sprung up around him, so his early education and his natural disposition placed him at the head of his own religious institutions. Himself a prophet, a psalmist, he was one in heart with those whose advice he sought, and whose arts he fostered. And, more remarkably still, though not himself a priest, ie yet assumed almost all the functions usually ascribed to the priestly office. He wore, as we have seen, the priestly dress, offered the sacrifices, gave she priestly benediction (2 Sam. vi. 14, 17, 18);

b Compare Blunt, II. xv.

The punishment of the Mosbites is too obscurely worded to be explained at length. A Jewish tradition (which shows that there was a sense of its being ex-centive) maintained that it was in conrequence of the Moabites having murdered David's parents, when con-6del to them, 1 Sam. xxii. 8 (Chandler, il. 168).

same sacerdotal sanctity, Benaiah the captain of his guard was a priest o by descent (1 Chr. xxvii. 5), and joined in the sacred music (1 Chr. xvi. 6); David himself and "the captains of the host" arranged the prophetical duties (1 Chr. xxv. 1): and his sons are actually called "priests" (2 Sam. viii. 18; 1 Chr. xviii. 17, translated "chief," and aυλάρχαι, "chief rulers"), as well as Ira, of Manasseh (2 Sam. xx. 26, translated "chief ruler," but LXX. iepeus). Such a union was never seen before or since in the Jewish history. Even Solomon fell below it in some important points. But from this time the idea took possession of the Jewish mind and was never lost. What the heathen historian Justin antedates, by referring it back to Aaron, is a just description of the effect of the reign of David : - " Sacerdos mox rex creatur;

semperque exinde hic mos apud Judzos fuit ut eosdem reges et sacerdotes haberent; quorum justitiå religione permixtâ, incredibile quantum coeluere " (Justin, xxxvi. 2). (d.) From the internal state of David's kingdom, we pass to its external relations. These will be found at length under the various countries to which they relate. It will be here only necessary to briefly indicate the enlargement of his dominions. Within 10 years from the capture of Jerusalem, he had reduced to a state of permanent subjection the PHILISTINES " on the west (2 Sam. viii. 1); the MOABITES on the east (2 Sam. viii. 2), by the exploits of Benaiah (2 Sam. xxiii. 20); the SYRIANS on the northeast as far as the Euphrates/ (2 Sam. viii. 3); the EDOMITES (2 Sam. viii. 14), on the south; and finally the AMMONIFES,^A who had broken their ancient alliance, and made one grand resistance to the advance of his empire (2 Sam. x. 1-19, xii. 28-31). These three last wars were entangled with each other. The last and crowning point was the siege of Rabbah. The ark went with the host (2 Sam. xi. 11). David himself was present at the capture of the city (2 Sam. xii. 29). The savage treatment of the inhabitants --- the only instance as far as appears of cruel severity against his enemies --- is perhaps to be explained by the formidable nature of their re-

sistance - as the like stain on the generosity of the Black Prince in the massacre of Limoges. The royal crown, or "crown of Milcom," was placed on David's head (2 Sam. xii. 30), and, according to Josephus (Ant. vii. 5) was always worn by him The Hebrew tradition (Jerome, Qu. afterwards. Heb. ad 1 Chr. xx. 2) represents it as having been the diadem of the Ammonite god Milcom or Moloch; and that Ittai the Gittite (doing what no Israelite could have done, for fear of pollution) tore it from the idol's head, and brought it to David. The general peace which followed was commemorated in the name of "the Peaceful" (Solomon), given to the son born to him at this crisis.*

To these wars in general may be ascribed Ps.

J Described briefly in a fragment of Nicolaus of Damascus, in Joseph. Ant. vii. 5, § 2, and Eupolemus, in Eus. Prep. Ev. ix. 80.

9 To these Eupolemus adds the Nabateans and Nebdetens.

i The story appears to be told twice over (2 Sam viii. 8-14, x. 1 -xi. 1, xii. 26-81).

a 2 Sam. xii. 25, is by some interpreters rendered " He put him (Solomon) under the hand of Nathan;" thus making Nathan Solomon's preceptor. (See Uhandler, ii. 272.)

c à ispeus ru véres (Joseph. Ans. vii 12, § 4). d By the reduction of Gath, 1 Chr. xviii. 1.

A For the details of the punishment, see RABBAM. Chandler (ii. 287, 288) interprets it of hard servitude; Bwald (iii. 214), of actual torture and slaughter.

^{*} The go'ien shields taken in the Syrian wars w

sz., as illustrating 1 oth the sacerdotal character of David, and also his mode of going forth to hattle. To the Edomite war, both by its title and contents must be ascribed Ps. lx. 6-12 (cviii. 7-13), describing the assault on Petra. Ps. lxviii. may probably have received additional touches, as it was sung on the return of the ark from the siege of Rabbah.ª Ps. xviii.^b (repeated in 2 Sam. xxii.) is ascribed by its title, and appears from some expressions to belong to the day "When the Lord had delivered him out of the hand of all his enemies," as well as "out of the hand of Saul" (2 Sam. xxii. 1; Ps. zviii. 1). That "day" may be either at this time or at the end of his life. Ps. xx. (Syr. Vers.) and xxi. relate to the general union of religious and of military excellences displayed at this time of his career. (Ps. xxi. 3, "Thou settest a crown of pure gold upon his head," not improbably refers to the golden crown of Ammon, 2 Sam. xii. 30.)

(3.) In describing the incidents of the life of David after his accession to the throne of Israel, most of the details will be best found under the names to which they refer. Here it will be needful only to give a brief thread, enlarging on those points in which David's individual character is brought out.

Three great calamities may be selected as marking the beginning, middle, and close, of David's otherwise prosperous reign; which appears to be intimated in the question of Gad, 2 Sam. xxiv. 13, " a three c years' famine, a three months' flight, or a three daya' pestilence." ^d

(a.) Of these, the first (the three years' famine) introduces us to the last notices of David's relations e with the house of Saul. There has often arisen a painful suspicion in later times, as there seems to have been at the time (xvi. 7), that the oracle which gave as the cause of the famine Saul's massacre of the Gibeonites, may have been connected with the dosire to extinguish the last remains of the fallen dynasty. But such an explanation is not needed. The massacre was probably the most recent national crime that had left any deep impression; and the whole tenor of David's conduct towards Saul's family is of an opposite kind. It was then that he took the opportunity of removing the bodies of Saul and Jonathan to their own ancestral sepulchre at Zelah (2 Sam. xxi. 14); and it was then, or shortly before, that he gave a permanent home and restored all the property of the family to Mephibosheth, the only surviving son of Jonathan (2 Sam. iz. 1-13, zzi. 7). The seven who perished were, two sons of Saul by Rizpah, and five grandsons - sons of Merab / and Adriel (2 Sam. xxi. 8).

nained long afterwards as trophies in the temple at Jeruwsiem (2 Sam. viii. 7; Cant. iv. 4). [Anns, Skelet, p. 162.] The brass was used for the brasen basins and pillars (2 Sam. viii. 8; LXX.).

a See Hengstenberg on Ps. lxviii.

^b The imagery of the thunderstorm, Ps. xviii. 7-14. may possibly allude to the events either of 2 Sam. v. 20-24 (Chaudler, ii. 211), or of 2 Sam. vi. 8.

c Bo LXX. and 1 Chr. xxi. 12, instead of seven.

d Ewald, iii. 207.

In this incident took place early in the reign, appears (1) from the freshness of the allusion to Saul's act (2 Sam. xxi. 1-8); (2) from the allusions to the massacre of Saul's sons in xix. 28; (3) from the apparent connection of the story with ch. iz.

I The mention of Added necessitates the reading of dation. Merab for Michal.

(b.) The second group of incidents contains the tragedy of David's life, which grew in all its parts out of the polygamy, with its evil consequences, into which he had plunged on becoming king Underneath the splendor of his last glorious campaign against the Ammonites, was a dark story, known probably at that time only to a very few. and even in later times # kept as much as possible out of the view of the people, but now recognized as one of the most instructive portions of his career - the double crime of adultery with Bathsheba, and of the virtual murder of Uriah. The crimes A are undoubtedly those of a common Oriental despot But the rebuke of Nathan; the sudden revival of the king's conscience; his grief for the sickness of the child; the gathering of his uncles and elder brothers around him; his return of hope and peace; are characteristic of David, and of David only. And if we add to these the two pealms, the 39d and the 51st, of which the first by its acknowledged internal evidence, the 2d by its title ' also claim to belong to this crisis of David's life, we shall feel that the instruction drawn from the sin has more than compensated to us at least for the scandal occasioned by it.

But, though the "free spirit" and "clean heart" of David returned, and though the birth of Solomon was as auspicious as if nothing had occurred to trouble the victorious festival which succeeded it; the clouds from this time gathered over David's fortunes, and henceforward "the sword never departed from his house" (2 Sam. xii. 10). The outrage on his daughter Tamar; the murder of his eldest son Amnon; and then the revolt of his best beloved Absalom, brought on the crisis, which once more sent him forth a wanderer, as in the days when he fied from Saul; and this, the heaviest trial of his life, was aggravated by the impetuosity of Joab, now perhaps from his complicity in David's crime more unmanageable " than ever. The rebellion was fostered apparently by the growing jealousy of the tribe of Judah at seeing their king absorbed into the whole nation; and if, as appears from 4 2 Sam. xi. 3, xxiii. 34, Ahithophel was the grandfather of Bathsheba, its main supporter was one whom David had provoked by his own crimes. For its general course, the reader is referred to the names just mentioned. But two or three of its scenes relate so touchingly and peculiarly to David, that this is the place for dwelling upon then.

The first is the most detailed description of any single day that we find in the Jewish history.

It was apparently early on the morning of the day after he had received the news of the rebellion at Hebron that the king left the city of Jerusalem on foot. He was accompanied by a vast concourse; in the midst of which he and his body guard were

g It is omitted in the Chronicles.

A This is the subject of one of the aporry hal colloquies of David (Fabric. Cod. pseudepigr. F. T. 1. 1000). The story is also told in the Koran (xxxviii. 20-24), and wild legends are formed out of it (Wei's Legends, p. 158-160, 170).

¹ Ewald places it after the Captivity. From the two last verses (ii. 18, 19) this would be the almost certain conclusion. But is it not allowable to suppose these verses to be an adaptation of the paim to that later time ?

k See Blunt's Coincidences, II. xi. for a theory perhaps too much elaborated, yet not without some foundation.

Blunt II. x. ; Jerome, Qu. Heb. on 2 Sam. zi. 4

conspicuous. They started from a nouse on the of the river. At midnight they were at sused by sutskirts of the city (2 Sam. xv. 17, LXX.), and every stage of the mournful procession was marked by some incident which called forth a proof of the deep and lasting affection which the king's peculiar character had the power of inspiring in all who knew him. The first distinct halt was by a solitary alive-tree (2 Sam. xv. 18, LXX.), that marked the road to the wilderness of the Jordan. Amongst his guard of Philistines and his faithful company of 600 a he observed Ittui of Gath, and with the true nobleness of his character entreated the Philistine chief not to peril his own or his countrymen's lives in the service of a fallen and a stranger sovereign. But Ittai declared his resolution (with a fervor which almost inevitably recalls a like profession made almost on the same spot to the great descendant of David centuries afterwards) to follow him in life and in death. They all passed over the ravine of the Kedron; and here, when it became apparent that the king was really bent on departure, "the whole land wept with a loud voice ' ' — the mountain and the valley resounded with the wail of the people. At this point they were overtaken by the two priests, Zadok and Abiathar, bringing the ark from its place on the sacred hill to accom pany David on his flight - Abiathar, the elder, going forward up the mountain, as the multitude defiled past him. Again, with a spirit worthy of the king, who was prophet as well as priest, David turned them back. He had no superstitious belief in the ark as a charm; he had too much reverence for it to risk it in his personal peril. And now the whole crowd turned up the mountain pathway; all wailing, all with their heads muffled as they went; the king only distinguished from the rest by his unsandalled feet. At the top of the mountain, consecrated by an altar of worship, they were met by Hushai the Archite, "the friend," as he was officially called, of the king. The priestly garment, which he wore b after the fashion, as it would seem. of David's chief officers, was torn, and his head was ameared with dust, in the bitterness of his grief. In him David saw his first gleam of hope. A moment before, the tidings had come of the treason of Ahithophel; and to frustrate his designs Hushai was sent back, just in time to meet Absalom arriving from Hebron. It was noon when David passed over the mountain top, and now, as Jerusalem was left behind, and the new scene opened before him, two new characters appeared, both in connection with the hostile tribe of Benjamin, whose territory they were entering. One was Ziba, servant of Mephibosheth, taking advantage of the civil war to make his own fortunes. At Bahurim, also evidently on the downward pass, came forth one of its inhabitants, Shimei, in whose furious curses broke out the long suppressed hatred of the fallen **Samily of Saul, as well perhaps as the popular feel-**ig against the murderer ^c of Uriah. With characteristic replies to both, the king descended to the fordan valley (2 Sam. xvi. 14; and comp. xvii. 22; Jos. Ant. vii. 9, § 4) and there rested after the long and eventful day at the ford or bridge d (Abara)

c Blunt, II. x.

568

the arrival of the two sons of the high-priests, and by break of dawn they had reached the opposite side in safety.

To the dawn of that morning is to be ascribed Ps. iii., and (according to Ewald, though this seems e certain) to the previous evening, Ps. iv. Ps. cxliii. by its title in the LXX., "When his son was pursuing him," belongs to this time. Also by long popular belief the trans-Jordanic exile of Pa. xlii. has been supposed to be David, and the complaints of Ps. lv., lxix., and cix., to be levelled against Ahithophel.

The history of the remaining period e of the rebellion is compressed into a brief summary. Mahanaim was the capital of David's exile, as it had been of the exiled house of Saul (2 Sam. xvii. 24, comp. ii. 8, 12). Three great chiefs of that pastoral district are specially mentioned as supporting him : one, of great age, not before named, Barzillai the Gileadite: the two others, bound to him by former ties, Shobi, the son of David's ancient friend Nahash, probably put by David in his brother's place (xii. 30, x. 2); and Machir, the son of Ammiel the former protector of the child of David's friend Jonsthan (2 Sam. rvii. 27, ix. 4). His forces were arranged under the three great military officers who remained faithful to his fortunes - Joah, captain of the host; Abishai, captain of "the mighty men;" and Ittai, who seems to have taken the place of Benaiah (had he wavered in his allegiance, or was he appointed afterwards?), as captain of the guard (2 Sam. zviii. 2). On Absalom's side, was David's nephew, Amasa (io. xvii. 25). The warlike spirit of the old king and of his faithful followers at this extremity of their fortunes is well depicted by Hushai, "chafed in their minds, as a bear robbed of her whelns in the 'field' (or a fierce wild boar in the Jordan valley, LXX.);" the king himself, as of old, " lodging not with the people," but " hid in some pit or some other place" (2 Sam. xvii. 8, 9). The final battle was fought in the " forest of Ephraim," which terminated in the accident leading to the death f of Absalom. At this point the narrative resumes its minute detail. As if to mark the greatness of the calamity, every particular of its first reception is recorded. David was waiting the event of the battle in the gateway of Mahanaim. Two messengers, each endeavoring to outstrip the other, were seen running breathless from the field. The first who arrived was Ahimaaz, the son of Zadok, already employed as a messenger on the first day of the king's flight. He had been entreated by Joab not to make himself the bearer of tidings so mournful; and it would seem that when he came to the point his heart failed, and he spoke only of the great confusion in which he had left the army. At this moment the other messenger burst in — a stranger, perhaps an Ethiopian 9 — and abruptly revealed the fatal news (2 Sam. xviii. 19-32). [CUSH1.] The passionate burst of grief which followed, is one of the best proofs of the deep affection of David's character. He wrapt himself up in his sorrow; and even at the very moment of his

e If Bwald's interpretation of 2 Sam. xxiv. 18 be correct, it was 8 months. The Jewish tradition (ir Jerome, Qu. Heb. on 2 Sam. iv. 4) makes it 6. / For the Mussulman legend, see Weil, p. 161.

triumph, he could not forget the hand that had, an apparition at such a moment was at or slain his son. He made a solemn vow to supersude marked out for a sanctuary. David demanded, Joab by Amasa, and in this was laid the lasting breach between himself and his powerful nephew, which neither the one nor the other ever forgave (2 Sam. xix. 18).

The return was marked at every stage by rejoic ing and amnesty, - Shimei forgiven, Mephibosheth a partially reinstated, Barzillai rewarded by the gifts, long remembered, to his son CHIMHAM (2 Sam. xix. 16-40; 1 K. ii. 7). Judah was first reconciled. The embers of the insurrection still smouldering (2 Sam. xix. 41-43) in David's hereditary enemies of the tribe of Benjamin were trampled out by the mixture of boldness and sagacity in Joab, now, after the murder of Amasa, once more in his old position. And David again reigned in undisturbed peace at Jerusalem (2 Sam. xx. 1-22).0

(c.) The closing period of David's life, with the exception of one great calamity, may be considered as a gradual preparation for the reign of his successor. This calamity was the three days' pestilence which visited Jerusalem at the warning of the prophet Gad. The occasion which led to this warning was the census of the people taken by Joab at the king's orders (2 Sam. xxiv. 1-9; 1 Chr. xxi. 1-7, xxvii. 23, 24); an attempt not unnaturally suggested by the increase of his power, but imply ing a confidence and pride alien to the spirit incul cated on the kings of the chosen people [see NUM BERS]. Joab's repugnance to the measure was such that he refused altogether to number Levi and Benjamin (1 Chr. xxi. 6). The king also scrupled to number those who were under 20 years of age (1 Chr. xxvii. 23), and the final result never was recorded in the "Chronicles of King David" (1 Chr. xxvii. 24). The plague, however, and its cessation were commemorated down to the latest times of the Jewish nation. Possibly Ps. xxx. and xci. had reference (whether David's or not) to this time. But a more certain memorial was preserved on the exact spot which witnessed the close of the pestitence, or, as it was called, like the Black Death of 1348, "The Death." Outside the walls of Jerusalem, Araunah or Ornan, a wealthy Jebusite --- perhaps even the ancient king of Jebus (2 Sam. xxiv. 23) c-possessed a threshing-floor; there he and his sons were engaged in threshing the corn gathered in from the harvest (1 Chr. xxi. 20). At this spot an awful vision appeared, such as is described m the later days of Jerusalem, of the Angel of the Lord stretching out a drawn sword between earth and sky over the devoted $\operatorname{city.}^d$ The scene of such

^b To many English readers, the events and name of this period have acquired a double interest from the power and skill with which Dryden has made the story of "Absalom and Achitophel" the basis of his political poem on the Court of King Charles II.

c In the original the expression is much stronger than in the A. V. -- "Araunah, the king." 1See ARAUNAH.]

d This apparition is also described in a fragment of the heathen historian Eupolemus (Eus. Prop. Ec. iz 30), but is confused with the warning of Nathan against building the Templo. "An angel pointed out | presence of the high-priest Ell."

and Araunah willingly granted, the site; the altar was erected on the rock of the threshing-floor; the place was called by the name of " Moriak " (2 Chr. iii. 1); and for the first tame a noly place, anctified by a vision of the Divine presence, was recog-nized in Jerusalem. It was this spot which afterwards became the altar of the Temple, and therefore the centre of the national worship, with but slight interruption, for more than 1000 years, and it is even contended that the same spot is the rock, still regarded with almost idolatrous veneration, in the centre of the Mussulman " Dome of the Rock " (see Professor Willis in Williams's Holy City, ii.).

The selection of the site of this altar probably revived the schemes of the king for the building of a permanent edifice to receive the ark, which still remained inside his own palace in its temporary tent. Such scheues, we are told, he had entertained after the capture of Jerusalem, or at the end of his wars. Two reasons were given for their delay. One, that the ancient nomadic form f of worship was not yet to be abandoned (2 Sam. vii. 6): the other, that David's wars 9 unfitted him to be the founder of a seat of peaceful worship (1 Chr. xxii. 8). But a solemn assurance was given that his dynasty should continue " for ever " to continue the work (2 Sam. vii. 18; 1 Chr. xxii. 9, 10). Such a founder, and the ancestor of such a dynasty, was Solomon to be, and to him therefore the stores A and the plans of the future Temple (according to 1 Chr. xxii. 9-19, xxviii. 1-xxix. 19) were committed.

A formidable conspiracy to interrupt the succes sion broke out in the last days of David's reign [see ADONIJAH], which detached from his person two of his court, who from personal offense or adherence to the ancient family had been alienated from him - Josb and Abiathar. But Zadok, Nathan, Benaiah, Shimei, and Rei i remaining firm, the plot was stifled, and Solomon's inauguration took place under his father's suspices k (1 K. i. 1-53).

The Psalms which relate to this period are, by title, Ps. xcii.; by internal evidence, Ps. ii.

By this time David's infirmities had grown upon him. The warmth of his exhausted frame was attempted to be restored by the introduction of a young Shunammite, of the name of Abishag, mentioned annarently for the sake of an incident which grew up in connection with her out of the later events (1 K. i. 1, ii. 17). His last song is preserved — a striking union of the ideal of a just ruler which he had placed before him, and of the

the place where the altar was to be, but forbade him to build the Temple, as being stained with blood, and having fought many wars. His name was Dissethan."

e In 1 Chr. xxi. 26, a fire from heaven descends to sanctify the altar. This is not mentioned in 2 Sum. xxiv.

f This is the subject of one of the apocryptial colloquies (Fabric. Cod. pseudepigr. V. T. i. 1004).

9 In this respect David still belonged to the older generation of heroes. (See Jerome, Qu. Heb. ad loc., A Eupolemus (Eus. Prop. Ev. ix. 80) makes David

send fleets for these stores to Elath and to Ophir. i Jerome (Qu. Hrb. ad loc.) renders Rel = Ira, no improbably. Ewald's conjecture (iii. 266, note) is that

he is identical with Raddai. k Eupolemus (Eus. Prop. Er. ir 30) adds, "in the

a The injustice done to Mephibosheth by this division of his property was believed in later traditions to he the sin which drew down the division of David's kingdom (Jerome, Qu. Hrb. on 2 Sam. xix.). The question is argued at length by Selden, De Successione. 1. 25, pp. 67, 68. (Chandler, ii. 876.)

fifficulties which he had felt in realizing it (2 Sam. | cob, or of Moses, but he was truly "the son of xxiii. 1-7). His last words, as recorded, to his successor, are general exhortations to his duty, combined with warnings against Joab and Shimei and charges to remember the children of Barzillai (! K. ii. 1-9).

He died, according to Josephus (Ant. viii. 15, § 2), at the age of 70, and "was buried in the city of David." After the return from the Captivity, "the sepulchres of David" were still pointed out "between Silcah and the house of the 'mighty men,' " or " the guardhouse " (Neh. iii. 16). His tomb, which become the general sepulchre of the kings of Judah, was pointed out in the latest times of the Jewish people. "His sepulchre is with us unto this day," says St. Peter at Pentecost (Acts ii. 29); and Josephus (Ant. vii. 15, § 8; xiii. 8. § 4; xvi. 7, § 1) states that, Solomon having buried a vast treasure in the tomb, one of its chambers was broken open by Hyrcanus, and another by Herod the Great. It is said to have fallen into ruin in the time of Hadrian (Dion Cassius, lxix. 14). In Jerome's time a tomb, so called, was the object of pilgrimage (Ep. ad Marcell. 17 (46)), but apparently in the neighborhood of Bethlehem. The edifice shown as such from the Crusades to the present day is on the southern hill of modern Jerusalem commonly called Mount Zion, under the socalled "Conaculum." For the description of it see Barclay's City of the Great King, p. 209. For the traditions concerning it see Williams's Holy City, ii, 509-513. The so-called "Tombs of the Kings" have of late been claimed as the royal sepulchre by De Saulcy (ii. 162-215), who brought to the Louvre (where it may be seen) what he believed to be the lid of David's sarcophagus. But these tombs are outside the walls, and therefore cannot be identified with the tomb of David, which was emphatically within the walls (see Robinson, ili. 252, note).

The character of David has been so naturally brought out in the incidents of his life that it need not be here described in detail. In the complexity of its elements,^b passion, tenderness, generosity, fierceness - the soldier, the shepherd, the poet, the statesman, the priest, the prophet, the king - the romantic friend, the chivalrous leader, the devoted father - there is no character of the O. T. at all to be compared to it. Jacob comes nearest in the ariety of elements included within it. But David's haracter stands at a higher point of the sacred

istory, and represents the Jewish people just at the moment of their transition from the lofty virtues of the older system to the fuller civilization and cultivation of the later. In this manner he becomes naturally, if one may so say, the likeness or portrait of the last and grandest development of the nation and of the monarchy in the person and the period of the Messiah. In a sense more than figurative, he is the type and prophecy of Jesus Christ. Christ is not called the son of Abraham, or of Ja-

a A striking legand of his death is preserved in Weil's Legends, pp. 169, 170; a very absurd one, in Dasnage, Hist. des Juifs, bk. v. ch. 2.

b This variety of elements is striking y expres in "the Song of David," a poem written by the unforunate Christopher Smart in charcoal on the walls of his cell, in the intervals of madness.

o It may be remarked that the name never annear as given to any one else in the Jewish history, as if, like "Peter" in the Papacy, it was too sacred to be opropriated.

David."

To his own people his was the name most dearly cherished after their first ancestor Abraham. "The city of David," "the house of David," "the throne of David," "the seed of David," "the oath sworn unto David" (the pledge of the continuance of his dynasty), are expressions which pervade the whole of the Old Testament and all the figurative language of the New, and they serve to mark the lasting significance of his appearance in history."

His Psalms (whether those actually written by himself be many or few) have been the source of consolation and instruction beyond any other part of the Hebrew Scriptures. In them appear qualities of mind and religious perceptions not before expressed in the sacred writings, but eminently characteristic of David. - the love of nature, the sense of sin, and the tender, ardent trust in, and communion with, God. No other part of the Old Testament comes so near to the spirit of the New. The Psalms are the only expressions of devotion which have been equally used through the whole Christian Church - Abyssinian, Greek, Latin, Puritan, Anglican.

The difficulties which attend on his character are valuable as proofs of the impartiality of Scripture in recording them, and as indications of the union of natural power and weakness which his character included. The Rabbis in former times, and critics (like Bayle) d in later times, have seized on its dark features and exaggerated them to the utmost. And it has been often asked, both by the scoffers and the serious, how the man after God's own heart could have murdered Urish, and seduced Bathsheba, and tortured the Ammonites to death? An extract from one who is not a too-indulgent critic of sacred characters expresses at once the common sense and the religious lesson of the whole matter. "Who is called 'the man after God's own heart '? David, the Hebrew king, had fallen into sins enough ---- blackest crimes ----- there was no want of sin. And therefore the unbelievers sneer, and ask 'Is this your man according to God's heart?' The sneer, I must say, seems to me but a shallow one. What are faults, what are the outward details of a life, if the inner secret of it, the remorse, temptations, the often baffled, never-ended struggle of it be forgotte ? . . . David's life and history, as written for us in those l'aslms of his, I consider to be the truest emblem ever given us of a man's moral progress and warfare here below. All earnest souls will ever discern in it the faithful struggle of an earnest human soul towards what is good and best. Struggle often baffled - sore baffled - driven as into entire wreck: yet a struggle never ended, ever with tears, repentance, true unconquerable pur-pose begun anew" (Carlyle's Herocs and Hero-Worship, p. 72). A. P. S.

* The conciliation of 1 Sam. xvi. 14-23 with xvii. 12-31, 55-58 (see I. 4 of the article above)

e This expression has been perhaps too much made of. It occurs only once in the Scriptures (1 Sam. xiii 14, quoted again in Acts xill. 22), where it merely in dicates a man whom God will approve, in distinction from Saul who was rejected. A much stronger and mor. peculiar commendation of David is that contained in 1 K. xv. 8-5, and implied in Ps. ixxxiz. 20-28

acknowledged that there are some difficulties here. Winer (though without assenting to them all as squally well founded) enumerates them in his Bibl. Beaks. i. 259 ff., and Bleek also in his Lind. in das A. Test. p. 336 ff., with the admission at the same time that they have been urged too far. The reader may be disappointed if no notice should be taken of them here, or of the considerations which have been offered to account for the apparent disagreement. It should be stated that the better critical judgment of scholars (as De Wette, Ewald, Bleek, Keil) is that the Hebrew text of the passages under remark has not been corrupted or interpolated, but that the two sections (from whatever source originally derived) form an integral part of the work as it came from the hand of the writer or compiler.

One of the principal difficulties in the relation of the two portions to each other, is that, in the first of them, David is said to have been a musician and an armor-bearer at the court of Saul (1 Sam. xvi. 19 ff.); and, in the second, that he appears to be introduced to the king, at the time of the battle with Goliath, as a stranger of whom Saul had no previous knowledge (1 Sam. xvii. 31 ff.). It deserves to be said, in reply to this representation, that David may not have been permanently connected with Saul in his capacity as harpist, but was only summoned to him as the intermittent malady of Saul required, and then, after exerting his skill for its removal, returned to the care of his flocks. (See Chandler's Life of David, p. 48.) It is expressly stated, at all events, that even after the outbreak of the war with the Philistines he was in the habit of passing to and fro between the camp and his father's home at Bethlehem (1 Sam. xvii. 17, 18). It is true, he was appointed at the same time one of Saul's armor-bearers as well as his musician; but this office, at least in times of peace, was one of honor rather than of active service, and would not require that he should be constantly about the person of the king. This was the less necessary. because the number of such servitors was so great. Joab, David's chief commander at a later date, is said to have had ten armor-bearers, and Saul in his higher station must have had many more. Under these circumstances, Saul's first acquaintance with David may have been often interrupted and hence comparatively slight; so that when they met again, possibly after an interval of some considerable duration, amid the distraction and tumult of a war which was engrossing every energy of the king's mind, it is not incredible that Saul at first sight may not have recognized the shepherd toy whom he had occasionally seen; a while as to David himself it is not to be supposed that he would put forward any obtrusive claim to the king's recognition on the ground of his former services

Again, it is objected that Saul's inquiry of Abner. saptain of the host (1 Sam. xvii. 55), after David's slaving of Goliath, "Whose son is this youth," is extraordinary, if David had really stood in the rela tion to Saul which the previous account has men tioned. But as Kurtz remarks (Herzog's Real-Encyk. iii. 300), the import of the question may

has given rise to various explanations. It must be have been not so much who is David's futher as to his name merely, as what is David's ancestry, his parentage and rank in life. Saul may have been indifferent respecting the family of his harp-player and armor-bearer; but after the victory, when the successful champion, according to the terms which Saul himself had proposed, was about to become his son-in-law (1 Sam. xvii. 25), it was obviously a matter of great interest to him to obtain more particular information respecting his birth and connections.

It is affirmed also that the account of David at the time of his first introduction to Saul (1 Sam. xvi. 18), as "a mighty valiant man, and a man of war," is out of place there, because he had not yet displayed the military qualities which those words ascribe to him. This description, as Winer admits (Realso. i. 260), may be merely proleptic, inserted by the historian not of course as representing what David was at that time, but what he was known to be in history to readers of the story. Keil and Delitzsch prefer to say, that his conflicts with the lion and the bear (1 Sam. xvii. 34, 85) had already furniabed such proofs of heroism, that none who knew him could fail to discern in him the future warrior (Books of Samuel, p. 171, Clark's Library). Stanley (see I. 4 above) thinks that David may already have fought against the Philistines, and was known to some of Saul's guards for his military exploits. But this supposition implies in effect that the two parts of the narrative are inconsistent with each other; for David's awkwardness in the use of weapons when he assumed the championship against Goliath (1 Sam. xvii. 38 ff.) shows that he was then inexperienced in war.

Another allegation is that the statement in 1 Sam. xvii. 54, that "David took the head of the Philistine and brought it to Jerusalem," must certainly be an anachronistic addition to the history, because Jerusalem was not then in possession of the Hebrews, but was captured by David (or Joab) at a later period (1 Chr. xi. 4 ff.). But the statement in that passage really is that David took at that time not Jerusalem itself, but the fortress of Jerusalem, the citadel on Mount Zion (called after him the city of David), which had not before been wrested from the ancient inhabitants (Josh. xv. 63). As to Jerusalem itself, i. e. the other hills and the suburbs which the city comprised, we read that it had been in the hands of the Hebrews from the time of their first arrival on the west of the Jordan, in the days of Joshua (Judg. i. 8, 21). David at first deposited the armor of Goliath in his own tent or house at Bethlehem (1 Sam. xvii. 54); but it was in the natural course of things that such a trophy after a time would be placed in some more public custody. No one can seriously think that this statement conflicts with 1 Sam. xxi. 9, from which it appears that the sword of Goliath was found in the sanctuary at NOB at the time of David's interview with the priest Ahimelech. Nor is such a return of David to Bethlehem, to leave there the spoils of war or to visit his friends, incunsistent with 1 Sam. xviii. 2, where it is said that Saul did not permit him any more " to go to his father's

Josephus (Ant. vi. 9, § 1) says that even a few years elapsed between David's leaving the court of Saul, and their meeting again in the camp from which Davis went forth to fight Geliath.

^{• •} The physical development is much more rapid a the East than amongst us, and a young person there soon rasses out of the knowledge of these from whom he is separated. For some very interesting remarks on this point, see Thomson's Land and Book, H. 806.

bouse." The meaning in that passage is that | ii. 350, 1st ed.; Thomson's Land and Book, ii. David was henceforth to attach himself to Saul as one of his personal retinue, and not again, as he had formerly done, resume his occupation as a shepherd.

Dean Stanley has three Lectures on David in his History of the Jewish Church (ii. 49-155). He has presented there essentially the same facts and aspects of character that are brought before us in the preceding sketch: but with the advantage of making the picture more living and real by being put in the frame-work of the history and finished with minuter touches. Of David's personal appearunce in his boyhood, he retains in his Lectures the description previously given in the Dictionary (p. \$58). Against one of the traits in this figure Dietrich urges an objection from an unexpected juarter. He understands (Ges. Heb. und Chald. Handw. p. 16, 6te Aufl.) that what the A. V. renters "a pillow of goat's hair," which Michal placed in David's bed (1 Sam. xix. 13), was in reality a texture of goat's hair, a sort of wig which she put around the head of the teraphim or image so as to make it appear like David's hair, and thus deceive Saul's messengers. On that view of the case, he says, the stratagem presupposes that David's hair was black, that being the usual color of goat's hair

in Palestine. Fürst also (i. 25) refers VICTN not to the hair, but to the countenance of David. Bunsen (Bibehoerk, ii. 1ter Theil, p. 122) says: "rothwangig, wrtl. rithlich. An die Haare ist dabei wol nicht zu denken." Its being used of Esau, Gen. xxv. 25, is not decisive, for being generic (= "reddish"), it admits of that application or the one claimed here. The older translators often render mechanically (hence perhaps suppokens, Sept. and rufus, Vulg.). It was because David appeared so boyish (ruddy and fair), that Goliath looked on him with contempt (1 Sam. xvi. 12, xvii. 42). It does not appear why he should be thought less a warrior for being red-haired.

In regard to the variations which appear in the node of relating David's history, Kurtz has well stated and answered the current objections in his article on David in Herzog's Real-Encyk. iii. 298-307. He does not consider them to be of any great moment. See also Hävernick's Einl. in das A. Test. ii. 135 ff. for the grounds of a similar conclusion. Tholuck has given a good sketch of David's outward life in its relation to his writings, and has grouped together on that basis the principal pealms which he would refer to him as the author (Übersetzung u. Auslegung der Psalmen, § 3). l'erowne's remarks here are valuable for the light which they throw on the connection between the Psalmist's inner and outward life as expressed in his poetry (Book of Psulms, i. xviii.-xxiv.). Chandler's Life of Durid (Oxford, 1853), though antiquated in some respects, still remains one of our best helps for the study of David's history. Herder commends it strongly (Studium der Theologie, 8ter Brief). Kitto's Daily Bible Illustrations furnish eseful information on the leading incidents in the sareer of the poet-king. There is a collection of sermons, David, der König, by F. W Krummacher (1866), similar to those on Enjah and Elisha by the same author, which have obtained so much celebrity.

DAVID, CITY OF. [JERUSALEM.]

DAY (Yom, Di, perhaps from DI, ialve, w be warm). The variable length of the natural day ("ab exortu ad occasum solis," Censor. de Die Nat. p. 23) at different seasons led, in the very earliest times, to the adoption of the civil day (or one revolution of the sun) as a standard of time. The commencement of the civil day varies in different nations: the Babylonians (like the people of Nuremberg) reckoned it from sunrise to sunrise (Isidor Orig. v. 30); the Umbrians from noon to noon: the Romans from midnight to midnight (Plin. ii. 79); the Athenians and others from sunset to sunset (Macrob. Saturn. i. 3; Gell. iii. 2).

The Hebrews naturally adopted the latter reckoning (Lev. xxiii. 32, "from even to even shall ye celebrate your sabbath") from Gen. i. 5, "the evening and the morning were the first day" (a passage which the Jews are said to have quoted to Alexander the Great (Gem. Tamid, 66, 1; Reland, Ant. Hebr. iv. 1, § 15). Some (as in Godwyn's Moses and Aaron) argue foolishly from Matt. xxviii. 1, that they began their civil day in the morning . but the expression entroper shows that the natural day is there intended. Hence the expressions "evening-morning" = day (Dan. viii. 14; LXX. vux thuepor; also 2 Cor. xi. 25), the Hindoo ahoratra (Von Bohlen on Gen. i. 4), and vuy 04-HEDOY (2 Cor. xi. 25). There was a similar custom among the Athenians, Arabians, and ancient Teutons (Tac. Germ. xi., "nec dierum numerum ut apud nos, sed noctium computant . . . nox ducere diem videtur"), and Celtic nations (Cas. de B. G. vi. 18, " ut noctem dies subsequatur "). This mode of reckoning was widely spread. It is found in the Roman law (Gaius, i. 112), in the Nibelungenlied. in the Salic law (inter decem noctes), in our own terms "fort-night," "seven-nights" (see Orelli, &c. in loc. Tac.), and even among the Siamese ("they reckon by nights," Bowring, i. 137) and New Zealanders (Taylor's Te-Ika-Maui, p. 20). No doubt this arose from the general notion "that the first day in Eden was 36 hours long " (Lightfoot's Works, ii. 334, ed. Pitanan; Hes. Theogon. p. 123; Aristoph. Av. 693; Wilkinson, Anc. Egypt. iv. 274). Kalisch plausibly refers it to the use of lunar years (Gen. p. 67). Sometimes, however, they reckoned from sunrise (meportarior, comp. Ps. i. 2; Lev. vii. 15).

* The Hebrew custom of reckoning the day from evening to evening, arose from the use of the lunarcalendar in regulating the feast-days, and other days of religious observance. It was not "adopted from Gen. i. 5," where the A. V. (the evening and the morning were the first day) misrepresents the sacred writer's meaning, assuming a construction of the Hebrew which is grammatically impossible. The true construction is: And there was evening (the close of a period of light), and there was morning (the close of a period of darkness), one day. So De Wette: "Und so wind Abend una ward Morgen, Ein Tag." So also Keil; and he adds. p. 18: "Hieraus folgt, dass die Schöpfungstage nicht von Abend zu Abend, sondern . . von Morgen zu Morgen gezählt sind." Delitzsch

568

"Und so ward es Abend und ward Morgen, der erste Tag [Ein Tag hier für der erste Tag].

The day consisted, therefore, of a period of light followed by a period of darkness, being reckoned from morning to morning. In later Hebrew usage also, where simply the natural day is meant, as in Lev. vii. 15, the terminating limit is the following morning. See further in Herzog's Encyk., art Tag (xv. 410). T. J. C.

The Jews are supposed, like the modern Arabs, to have adopted from an early period minute specifications of the parts of the natural day. Roughly indeed they were content to divide it into "morning, evening, and noonday" (Ps. lv. 17); but when they wished for greater accuracy they pointed to six unequal parts, each of which was again subdi-These are held to have been : vided.

I. Nesheph, 키ガン (from 키ガン, "to blow")

and Shachar, TIW, or the dawn. After their ac quaintance with Persia they divided this into, (a)the time when the eastern, and (b) when the western horizon was illuminated, like the Greek Leucothea --- Matuta --- and Aurora; or "the gray dawn' (Milton), and the rosy dawn. Hence we find the dual Shaharaim as a proper name (1 Chr. viii. 8). The writers of the Jerus. Talmud divide the dawn into four parts, of which the (1.) was Aijeleth hashachar. "the gazelle of the morning" [AIJELETH SHAHAR], a name by which the Arabians call the sun (comp. "eyelids of the dawn," Job iii. 9 åμέραs βλέφαρον, Soph. Antig. 109). This was the time when Christ arose (Mark xvi. 2; John xx. 1; Rev. xxii. 16; ή έπιφωσκούση, Matt. xxviii. 1).

The other three divisions of the dawn were. (2.) "when one can distinguish blue from white" (mpost, okorlas tri oboys, John xx. 1; "obscurum adhuc captæ lucis," Tac. H. iv. 2). At this time they began to recite the phylacteries. (3.) Cum lucescit oriens (ophpos Badvs, Luke). (4.) Oriente sole (λίαν πρωť, άνατείλαντος τοῦ ἡλίου, Mark xvi. 2: Lightfoot, Hor. Hebr. ad Marc. xvi. 2).

II. Boker, בֹּקָר, "sunrise." Some suppose that the Jews, like other Oriental nations, commenced their civil day at this time until the Exodus (Jennings's Jewish Ant.).

III. Chom Hayom, הים הירם אווים, "heat of the day '' (έως διεθερμάνθη ή ήμέρα, LXX.), about 9 o'clock.

IV. Traharaim, ロフラジ, "the two noons' (Gen. xli.i. 16; Deut. axviii. 29).

V. Ruach hayom, "the cool (lit. wind) of the day," before sunset (Gen. iii. 8); so called by the Persians to this day (Chardin, Voy. iv. 8; Jahn, Arch. Bibl. § 29).

VI. Ereb, Z, "evening." The phrase "between the two evenings" (Ex. xvi. 12, xxx. 8).

a • But this precision appears not merely by comparing Matthew's byia with Mark's öre cou à hicos, but still more clearly by observing that Mark himself subjoins this clause to owias in his own text (i. 82). This double note of time Mark introduces as tacitly explaining why the people of Capernaum did not bring their sick to Jesus before the sun went down : they were restrained by their scruples about the Sabbath. Thomson (Land and Book, i. 426) represents this scrupulosity as still entertained by many of the eastup Jaws with whom he has come in contact : " A pro-

wurde wieder Morgen . . . Ein Tag." Lange: | being the time marked for slaying the paschal land and offering the evening sacrifice (Ex. xii. 6, xxix. 39), led to a dispute between the Karaites and Samaritans on the one hand, and the Pharisees on the other. The former took it to mean between sunset and full darkness (Deut. xvi. 6); the Rabbinists explained it as the time between the beginning (delan mowta, "little evening," Hab.) and end of sunset (5. dula, or real sunset: Joseph. B. J. vi. 9, § 8; Gosen. s. v.; Jahn, Arch. Bibl. § 101; Bochart, Hieroz. i. 558).

Since the sabbaths were reckoned from sunset to sunset (Lev. xxiii. 32), the Sabbatarian Pharisees, in that spirit of scrupulous superstition which so often called forth the rebukes of our Lord, were led to settle the minutest rules for distinguishing the actual instant when the sabbath began (byla, Matt. viii. 16 = Sre Idu & Alios, Mark).ª They therefore called the time between the actual sunset and the appearance of three stars (Maimon. in Shabb. cap. 5, comp. Neh. iv. 21, 22), and the Talmudists decided that "if on the evening of the sabbath a man did any work after one star had appeared, he was forgiven; if after the appearance of two, he must offer a sacrifice for a doubtful transgression; if after three stars were visible, he must offer a sinoffering: " the order being reversed for works done on the evening after the actual sabbath (Lightfoot, Hor. Hebr. ad Matt. viii. 16; Otho, Lez. Rab. s. v. Sabbathum).

Before the Captivity the Jews divided the night into three watches (Ps. lxiii. 6, xc. 4), namely, the first watch, lasting till midnight (Lam. ii. 19, A. V. "the beginning of the watches") = $d\rho\chi\eta$ vurtos; the "middle watch" (which proves the statement), lasting till cock-crow (Judg. vii. 19) == μέσον νυκτών; and the morning watch, lasting till sunrise (Ex. xiv. 24) = ἀμφιλύκη νύξ (Hom. Π. vii. 433). These divisions were probably connected with the Levitical duties in the Temple service. The Jews, however, say (in spite of their own definition, "a watch is the third part of the night") that they always had four night-watches (comp. Neh. ix. 3), but that the fourth was counted as a part of the morning (Buxtorf's Lex. Talm. s. v. Carpzov. Appar. Crit. p. 347; Reland, iv. 18).

In the N. T. we have allusions to four watches, a division borrowed from the Greeks (Herod. ix. 51) and Romans ($\varphi \cup \lambda \alpha \pi h$, $\tau \delta \tau \epsilon^{\dagger} a \rho \tau o \nu \mu \epsilon \rho o \tau \tau \eta s$ $\nu v \kappa \tau \delta s$, Suid.). These were, (1) $\delta \psi \epsilon$, $\delta \psi a$, or $\delta \psi a$ $\delta \rho a$, from twilight till 9 o'clock (Mark xi. 1); John xx. 19); (2) μεσονύκτιον, midnight, from 9 till 12 o'clock (Mark xiii. 35); (3) àλεκτοροφωνία, till 3 in the morning (Mark xiii. 35, &π. λεγ.; 8 Macc. v. 23); (4) $\pi \rho \omega t$, till daybreak, the same as πρωta (Spa) (John xviii. 28; Joseph. Ant. v. 6, § 5, xviii. 9, § 6).

The word held to mean "hour" is first found in Dan. iii. 6, 15, v. 5 (Shà'áh, TYU, also "a moment," iv. 19). Perhaps the Jews, like the

fane and most quarrelsome fellow once handed me his watch to wind just after sunset on Friday evening. It was now his Sabbath, and he could not work. Thue they still tithe mint, and anise, and cummin, and teach for doctrines the commandments of men, making void the law of God by their traditions (Matt. xv 5). It was such perverse traditions as these that our Lord rebuked when he declared that the Sabbath was made for man, not man for the Sabbath (Mark # 27) See other like examples on the same page.

Greeks. learnt from the Babylonians the division of the day into 12 parts (Herod. ii. 109). In our Lord's time the division was common (John xi. 9). It is probable that Ahaz introduced the first sundial from Babylon ($\omega\rho\sigma\lambda\sigma\gamma\iota\sigma\nu$, I.S.

EXENDING Structure (Jahn, Arch. § 101). Possibly the Jews at a later period adopted the clepsydra (Joseph. Ant. xi. 6). The third, sixth, and ninth hours were devoted to prayer (Dan. vi. 10; Act. ii. 15, iii. 1, &c.).

On the Jewish way of counting their week-days from the sabbath, see Lightfoot's Works, ii. 334, ed. Pitman. [WEEK.]

The word "day" is used of a festal day (Hos. vii. 5); a birthday (Job iii. 1); a day of ruin (Hos. i. 11; Job xviii. 20; comp. tempus, tempora reipublica, Cic., and dies Cannensis); the judgment day (Joel i. 15; 1 Thess. v. 2); the kingdom of Christ (John viii. 56; Rom. xiii. 12); and in other senses which are mostly self-explaining. In 1 Cor. iv. 3, ύπο ανθρωπίνης ήμέραs is rendered "by man's judyment." a Jerome, ad Algas. Quast. x. considers this a Cilicism (Bochart, Hieroz. ii. 471) On the prophetic or year-day system (Lev. xxv. 3, 4; Num. xiv. 34; Ez. iv. 2-6, &c.), see a treatise in Elliott's Hor. Apoc. iii. 154 ff. The expression errovoror, rendered "daily" in Matt. vi. 11, is a an. $\lambda \epsilon \gamma$, and has been much disputed. It is unknown to classical Greek (foure nenddovai ind τών Ευαγγελιστών, Orig. Oral. c. 16). The Vulg. has supersubstantialem, a rendering recommended by Abelard to the nuns of the Paraclete. Theophyl. explains it as & in the our our rdoei huw aurapshs, and he is followed by most commentators (cf. Chrysost. Hom. in Or. Domin. Suid. & Etym. M. s. v.). Salmasius, Grotius, &c.

arguing from the rendering $\neg \Box \Box$ in the Nazarene Gospel, translate it as though it were $= \tau \hat{\eta} s \, \epsilon \pi i o b^{-}$ $\sigma \eta s \, \dot{\eta} \mu \epsilon \rho a s$, or $\epsilon i s \, a \delta \rho_{i o \nu}$ (Sixt. Senensis Bibl. Sanct. p. 444 a). But see the question examined at full length (after Tholuck) in Alford's Greek Test. ad loc.; ^b Schleusner, Lex. s. v.; Wetstein, N. T. i. 461, &c. See CHRONOLOGY.

F. W. F.

• DAY'S JOURNEY. Distance is often reckoned in the Bible by this standard (see Gen. xxi. 23; Ex. iii. 18; Num. xi. 31; Deut. i. 2; 1 K. xiz. 4; 2 K. iii. 9; Jonah iii. 3, 4; Luke ii. 44; Acts i. 12). It is certainly conceivable that this mode of reckoning, used vaguely at first, as being dependent on circumstances that were liable to vary in the case of each particular journey, might at length have become definite, so as to denote a certain distance traversable under conditions assumed as always the same. Something like this was true no doubt among the Greeks and Romans, who reckoned by days and at the same time by stadia or

miles; so that, interchanging the two modes, they meant often by a day's journey a fixed number of stadia or miles, without taking into account the cir cumstances which might control the distance actually traversed in a given instance. This later and more precise scale for measuring distances arose gradually among them, and appears never to have superseded altogether the more primitive method Herodotus (as an example of this fluctuation) describes a day's journey at one time as 150 stadia or about 19 Roman miles, and at another as 200 stadia or nearly 25 such miles.^c For information on this subject see Forbiger's Hundb. der Alten Geogr. i. 549 ff. Roman mile-stones are still found on different lines of travel in Palestine, e. g. two south of Sidon, on the maritime road along the Mediterranean (Rob. Bibl. Res. iii. 415, 1st ed.), and one at Beth-zur, between Bethlehem and Hebron (Stanley's Notices of certain Localities, &c., p. 169). The proverbial expression in Matt. v. 41, "And whoseever shall compel thee to go a mile, go with him twain," refers to a foreign custom made famil. iar to the Jews in the days of their Roman subjection. Most of the Roman roads with their mile stones (viæ stratæ) have as late an origin as the time of the Emperor Septimius Severus, A. D. 193-211. Traces of them are found on the east of the Jordan as well as the west.

But nothing strictly correspondent to the Greek and Roman system of measurement (as far as such a system existed among them) appears to have been known among the Hebrews. It may be assumed, as a general rule, that when the writers of the Bible speak of a day's journey, they mean to speak historically rather than geometrically, i. e. to mention the time actually employed in the journey rather than any certain distance assigned by universal consent to a day's journey. Hence, to know the actual distance in any instance, we must know more or less of the circumstances under which the travelling took place. As the modes of travelling were so various, - as the people journeved on foot, or with horses and camels (though if they went in caravans the difference then would not be very great), with flocks or without them, with women and children or without them, across plains or mountains, and with stations for halting at night along the route at irregular intervals, de termined by herbage, streams, fountains, and the like, - it is evident that a fixed uniformity must have been out of the question. It may be mentioned, as illustrating this uncertainty, that the pilgrim caravans at the present day occupy two days in going from Jerusalem to the Jordan, about 25 miles; and yet a mounted horseman can easily accomplish the distance, rough as some parts of the way are, in less than half a day. Josephus states repeatedly that it was a journey of three days from the Holy City to the Sea of Tiberias or Galilee. Dragomen at the present time, partly because

a • Strictly, by "*human* or man's day" as opposed to Christ's day, or that of the final account: comp. 35 in ver. 2. H.

^b • The reader will find a much fuller note than Alford's, on *invoivant* in Matt vi. 11, in Dr. Conant's *mainting with a Revised Version*, p. 30 (New York 1960). The conclusion is that "daily" of the A. V. is substantially correct and sanctioned by the seat authorities, ancient and modern. Dr. Schaff supports also, but not son the same view in his *Lange's Matthew*, p La. (New Fork, 1965). How the seame view in his *Lange's Matthew*, p 'La. (New Strabo. It is est York, 1965). How the seame view of the seame view in his *Lange's Matthew*, p 'La. (New Strabo. It is est also but also but also stadia."

c • The same remark may be made of the Persian parasang. "The truth is," says Rawlinson (*Hirod.* 11. 260), "that the ancient parasang, like the modern *farsiki*, was originally a measure of time (an hour, not a measure of distance. In passing from the one meaning to the other, it came to mark a different length in different places, according to the nature of the country traversed. The modern *farsakk* varies also, but not so much as the parasang, if we can trust Strabo. It is estimated at from 8½ to 4 miles, or true al to 35 studia."

they would adjust the time to the convenience of tourists, usually allot 4 days to the journey. The English consul at Jerusalem (as happens to be within the writer's knowledge) on one occasion of special emergency rode on horseback from Jerusatem to Nazareth in one day.

It is obvious that such "posting" (that of "a runner" in Heb.) as that to which Job refers (ix. 25), mentioned by him as an emblem of speed along with that of the "swift ships" (lit. "reed-skiffs") and of "the eagle that hasteth to the prey." must be very different from that of ordinary travellers. [See ANGARKUO.] Reland, therefore, could well say (*Palassina*, p. 400): "Iter unius diei, quod spatium dietam vocant, certo intervallo definiri vix potest. Clarum est, pro locorum ratione, et modo iter faciendi, diversa spatia uno die confici."

One consequence of a neglect to consider how variously incidental causes may affect the length of a day's journey in the East is that the statements of the sacred writers may not only have been misunderstood, but charged with inaccuracies and contradictions for which the writers are not to be held accountable. It is obvious, for example, that when the journeyings of the Israelites in the desert are mentioned by days, great latitude must be allowed in judging of the distance, since the movements of the vast concourse must often have been hastened or retarded by circumstances of which no account is given. The "eleven days' journey from Horeb. by the way of Mount Seir unto Kadesh-barnea (Deut. i. 2), as the writer would merely insert there a general notice of the distance, are to be taken in all probability as the days of ordinary travel with camels, and not such days as people would need with flocks and herds. This specification accords substantially with the report of modern travellers (as Seetzen, Russegger, Robinson). See Knotel, Exeget. Handb. ii. 208.

Yet it is not to be inferred that the "day's journey" allows no proximate scale of measurement in this matter of distances. The itineraries of travellers, ancient and modern, show that the usual rate of the foot-journey (as it may be called, since those who walk may easily keep pace with those who ride) varies from 3 to 4 miles an hour, and as the number of hours devoted to travelling rarely exceeds 6 or 8 hours per day, the distance of an ordinary day's journey may be said to average about 25 or 30 miles." When there is nothing in the known or probable circumstances of the case to modify this rule, we may safely follow it in judging of the distances represented by time in the Scriptures. Yet here, too, at least in the case of caravans, some allowance must be made for the shortness of the first day's march. That is usually restricted to 2 or 3 hours, or even less, and these the hours near the those of the day; and yet in estimating the time this short distance may be reckoned in Eastern parance as a whole day's journey. It is so counted, to doubt, in speaking of the day's journey (probably in this case, if they went through Persea, 3 or 4 miles only out of Jerusalem) which the parents 'f Jesus made before they discovered his absence (Luke ii. 44). See the addition under BEEROTH (Amer. ed.).

Some of the journeys mentioned in the Scriptres confirm the general rule laid down above, and

intimated in the narratives or justified by them Thus, Cornelius (Acts x. 1 ff.) sent messengers from Cæsarea to Joppa, distant about 40 Roman miles (according to Reland's combination from the Itimer. Hierosolym. and the Itiner. Antonna), to invite Peter to come to him; they started on the day of the vision in the afternoon (vers. 7, 80), and arrived at Joppa on the next day about noon (ver. 9); and returning on the morrow, they reached Cæsarea on the day following, the fourth from the setting out thence. They were unencumbered by any baggage, had in the main a level road, and could proceed rapidly. The return appears to have occupied more time than the going to Joppa, which would be a natural result in the latter part of a continuous journey of some length. Again, we read in Acts xxiii. 31 that the Roman chiliarch, Lysias, sent Paul under a military escort by night from. Jerusalem to Antipatris. This latter place was about 38 miles from Jerusalem on the route to Cæsarea. To perform the journey in that time would require them to travel at the rate of about 4 miles an hour. As those who conducted Paul had a good road (traces of the old Roman pavement are still visible; see Rob. Bibl. Res. iii. 79), they could accomplish a forced march of that extent in nine hours. Strabo says that an army under ordinary circumstances could march from 250 to 300 stadia in a day, i. e. an average of about 30 miles. See Forbiger's Handb. der Alten Geogr 551.

The distances indicated by such reckoning sometimes agree remarkably with information derived from other sources. Jonah (iii. 3) describes Nineveh as "a city of three days' journey," i. e. in its circumference; for it could have had no diameter of that extent unless, contrary to all precedent, it was built in a circle. The dimensions which Diodorus (ii. 7) assigns to Nineveh give it a circuit of about 60 miles; and thus his statement accords very closely with that of the prophet, who would naturally have in view the foot-journey of about 25 miles. Further, Jonah's "day's journey" in the city (about 25 miles) delivering his message as he went from one end of it to the other (Jonah iii. 4), would be the proportionate length of a street in a city whose longer sides according to Diodorus were 150 furlongs, the shorter 90 furlongs. See Dr Pusey's Commentary on Jonah, p. 253. Modern investigations on the ground support the same conclusion (Lavard's Nin. and Bab. p. 640). On the other hand, Laban's overtaking Jacob in seven days when the latter fled from Haran to Gilead, a distance of 300 miles, seems at first sight to be topographically impossible, and obliges us to resort to suppositions for clearing up the difficulty which lie entirely outside of the history (see HARAN, Amer. ed.; Bibl. Sacra, xxiv. 176-179; and Kitto's Daily Bibl. Illust. i. 320, Porter's ed. 1866). The question whether the Moriah of Abraham's sacrifice (Gen. xxii. 2) was the mount of that name near Jerusalem, or Gerizim near Shechem, depends in part on how we are to dispose of the patriarch's journey of 3 days from Hebron to the place intended (see the addition to MORIAH, Amer. ed.).

The Israelites prayed Pharaoh (Ex. iii. 18) to allow them "to go a three day's journey into the

Res. 1. 15, 2d ed.). This estimate seems slightly below rather than above the general average. H.

a • Dr. Robinson puts down (as the rule for commuting his hours into miles) 1 hour with camels as _____ in miles, and with horses or mules = 8 miles (Biol.

wilderness," in order to offer sacrifices to Jel. ovah. Some have supposed that Horeb was the place which they had in view in making that request. But Horeb is about 150 miles from Suez; travellers with camels occupy 7 days on the way (Rob. Bibl. Res. i. 60). There is no reason for finding a topographical error in 1 Kings xix. 4 ff. It is not meant there that Elijah spent 40 days in going from Beershebs to Horeb; but that in the strength of the food miraculously provided for him he wandered 40 days and nights in the desert before he came to that mount, as Israel, nourished with manna from heaven, wandered 40 years before reaching the promised land. The direct journey from Heersheba to Horeb is one of 8 or 10 days only (see Keil and Delitzsch, Bächer der Könige, p. 190). The day's route of the confederate kings of Israel, Judah, and Edom in their expedition against Moab (2 K. iii. 9 ff.), though not entirely certain, is less uncertain for its being said that they made a "journey of 7 days" before reaching the border of Moab (ver. 19). The opinion at least must be set aside that they went through Arabia so as to march against Moab from the south, as did the Israelites under Moses. It would be impossible to make that journey in 7 days. The note here in Keil and Delitzsch, as above (p. 226), shows the value of the modern researches on questions of this nature. At the same time it may be hoped that the proper surveys and observations are soon to be made, which will remove the vagueness connected with these calculations by time, and give us a fixed scale of distances at least for the places on this side of the Jordan.

The reader may consult on the topics of this article, Reland, Palastina, pp. 397, 494, 451; Pauly, Real-Encyk. vi. 254 ff., and v. 196 ff.; Greswell's Dissertations on the Harmony of the Gospels, ii. 138-142, 219, iv. 525 ff.; Winer, Realw. ii. 561; De Wette, Lehrb. der Hebr. Archäologie, p. 390 (1864); and Leyrer, in Herzog's Real-Encyk. xv. 157-169. The last writer refers also to Bergier, Hist. des grands Chemins de l'Emp. rom., Bruxell. 1728, translated in Greevii Thes. Antt. Rom. tom. x.; and Pilargix, De lapid. Rom. juxta vias positis. н

* DAY'S JOURNEY ON THE SAB-BATH. [SABBATH DAY'S JOURNEY.]

DAYSMAN, an old English term, meaning umpire or arbitrator (Job ix. 33). It is derived from day, in the specific sense of a day fixed for a trial (comp. 1 Cor. iv. 3, where $d\nu\theta\rho\omega\pi i\nu\eta$ $\eta\mu\epsilon\rho a$ — lit. man's day, and so given in Wycliffe's translation — is rendered " man's judyment " in the A. V.). Similar expressions occur in German (eine Sache tuyen = to bring a matter before a court of justice) and other Teutonic languages. The word 'daysman'' is found in Spenser's Faerie Queene, ii. c. 8, in the Bible published in 1551 (1 Sam. ii. 25), and in other works of the same age. W. L. B.

DEACON (Sidnoros: diaconus). The office described by this title appears in the N. T. as the correlative of enioxonos [BISHOP]. The two are The union of the two in the LXX. of Is. lx. 17. had its elders (זֶרֶנִים), or pastors (פְרָנָסִין), so say have suggested both as fit titles for the officers | also it had its subordinate officers (1), the of the Christian Church, or have led to the adop-ston of one after the other had been chosen on inde-the reader the rolls containing the lessons for the

Clement of Rome (1 Cor. xlii.) as prophetic. Like most words of similar import, it appears to have been first used in its generic sense, implying subordinate activity (1 Cor. iii. 5; 2 Cor. vi. 4), and afterwards to have gained a more defined connotation, as applied to a distinct body of men in the Christian society.

The narrative of Acts vi. is commonly referred to as giving an account of the institution of this office. The Apostles, in order to meet the complaints of the Hellenistic Jews, that their widows were neglected in the daily ministration (dianovia), call on the body of believers to choose seven men "full of the Holy Ghost and of wisdom," whom they "may appoint over this business." The seven are accordingly appointed, and it is left to them "to serve tables "- to attend to the distribution of the alms of the Church, in money or in kind (Neander, Pflanz. u. Leit. i. 51, ed. 1847), while the ministry (Sianovía) of the word is reserved for the Apostles. On this view of the narrative the seven were the first deacons, and the name and the office were derived by other Churches from that of Jerusalem. At a later period, the desire to reproduce the apostolic pattern led in many instances to a limitation of the deacons in a given diocese to the original number (Conc. Neocas. c. 14).

It may be questioned, however, whether the seven were not appointed to higher functions than those of the descons of the N. T. They are spoken of not by that title but as "the seven" (Acts xxi. 8). The gifts implied in the words "full of the Holy Ghost and of wisdom" are higher than those required for the office of deacon in 1 Tim. iii. Two out of the seven do the work of preachers and evangelists. It has been inferred accordingly (Stanley, Apostolic Age, p. 62), that we meet in this narrative with the record of a special institution to meet a special emergency, and that the seven were not deacons, in the later sense of the term, but commissioners who were to superintend those that did the work of deacons. There are indications, however, of the existence of another body in the Church of Jerusalem whom we may compare with the deacons of Phil. i. 1, and 1 Tim. iii. 8. As the πρεσβύτεροι of Acta xiv. 23, xv. 6; 1 Pet. v. 1, were not merely men advanced in years, so the reartepoi or rearionoi of Acts v. 6, 10 were probably not merely young men, but persons occupying a distinct position and exercising distinct functions (cf. Mosheim de Reb. Christ. p. 118). The identity of inigromou and mpegBúrepou has been shown under BISHOP; and it is natural to infer from this that there was a similar relation between the two titles of Sidkovoi and vew repoil. The parallelism of & rear epos and & dianorar in Luke xxii. 26, tends to the same conclusion.

Assuming on these data the identity of the two names we have to ask -

(1.) To what previous organization, if any, the order is traceable?

(2.) What were the qualifications and functions of the men so designated?

I. As the constitution of the Jewish synagogue

pendent grounds. The coincidence, at all events, day, to clean the synagogue, to open and close it con attracted notice, and was appealed to by, at the right times (SYNAGOGUE; and see Winer).

It was natural that when the Galilean disciples found themselves at the head of congregations of their own, they should adopt this as well as other parts of the arrangements with which they were familiar, and accordingly the *sectropol* of Acts v. do what the $imp \epsilon rat of$ the synagogue would have done under like circunstances.

II. The moral qualifications described in 1 Tim. iii. as necessary for the office of a deacon are substantially the same as those of the bishop. The deacons, however, were not required to be "given to hospitality," nor to be "apt to teach." It was enough for them to "hold the mystery of the faith in a pure conscience." They were not to gain their living by disreputable occupations $(\mu \eta)$ airxporepôcis). Cn offering themselves for their work they were to be subject to a strict scrutiny (1 Tim. iii. 10), and if this ended satisfactorily were to enter on it. On the view that has been taken of the events of Acts vi., there is no direct evidence in the N. F. that they were appointed by the laying on of hands, but it is at least probable that what was so familiar as the outward sign of the bestowal of spiritual gifts or functions would not have been omitted in this instance, and therefore that in this respect the later practice of the Church was in harmony with the earlier. What the functions of the deacons were we are left to infer from that later practice, from the analogy of the synagogue and from the scanty notices of the N. T. From these data we may think of the rewrepoi in the Church of Jerusalem as preparing the rooms in which the disciples met, taking part in the distribution of alms out of the common fund, at first with no direct supervision, then under that of the Seven, and afterwards under the elders, maintaining order at the daily meetings of the disciples to break bread, baptizing new converts, distributing the bread and the wine of the Lord's Supper, which the Apostle or his representative had blessed. In the Asiatic and Greek churches, in which the surrender of property and consequent dependence of large numbers on the common treasury had never been carried to the same extent, this work would be one of less difficulty than it was when "the Grecians murmured against the Hebrews," and hence probably it was that the appointment of the Seven stands out as a solitary fact with nothing answering to it in the later organization. What ever alms there were to be distributed would naturally pass through their hands, and the other functions continued probably as before. It does not appear to have belonged to the office of a deacon to teach publicly in the Church. The possession of any special $\chi d\rho_i \sigma \mu a$ would lead naturally to a nigher work and office, but the idea that the diacmate was but a probation through which a man nad to pass before he could be an elder or bishop vas foreign to the constitution of the Church of the 1st century. Whatever countenance it may receive from the common patristic intepretation of 1 Tim. iii. 13 (cf. Estius and Hammond ad loc.). there can be little doubt (as all the higher order of expositors have felt, cf. Wiesinger and Ellicott ad loc.) that when St. Paul speaks of the rands Bat uos, which is gained by those who "do the office of a deacon well," he refers to the honor which belongs essentially to the lower work, not to that which they were to find in promotion to a higher. Fraces of the primitive constitution and of the permanence of the diaconate are found even in the nore developed system of which we find the com-

mencement in the Ignatian epistles. Originally the descons had been the helpers of the bishop Originally elder of a Church of a given district. When the two names of the latter title were divided and the bishop presided, whether as primus inter pares, or with a more absolute authority over many elders the deacons appear to have been dependent directly on him and not on the presbyters, and as being his ministers, the "eyes and ears of the bishop (Const. Apost. ii. 44), were tempted to set themselves up against the elders. Hence the necessity of laws like those of Conc. Nic. c. 18; Conc. Carth. iv. c. 37, enjoining greater humility, and hence probably the strong language of Ignatius as to the reverence due to deacons (Ep. ad Trall. c. 8; ad Smyrn. c. 8). E. H. P.

• We think it proper to add a few remarks to this article, supplementary in part, and in part by way of dissent.

(1.) The diaconate or office of help, like the presbytero-episcopate, grew out of the apostolioffice, which at first embraced all the ministerial functions and duties. Christ did not appoint, either directly or by verbal command, bishops, priests, and deacons, but he chose apostles and endowed them with his Spirit, under whose guidance they divided their labor with proper regard to times and seasons, and founded such institutions in the Church as were useful and necessary. The diaconate originated in the congregation of Jerusalem at the time and on the occasion recorded in Acts vi. 1-7.

(2.) The Seven, of errd, elected on the occasion referred to (Acts vi. 3, cf. xxi. 8), were not extraordinary commissioners or superintendents of deacons (Stanley, Plumptre), but deacons in the primitive sense of the term; for their office is expressly described as Sianovia, help, and Sianoveir Tpane. (are, to serve, or wait upon, the tables, i. e. to distribute food to the widows and the poor (Acts vi. 1, 2). Exegetical tradition is almost unanimously in favor of this view, and the latest and best commentators sustain it (comp. Meyer, Alford and Lange-Lechler on Acts vi. 3). In the ancient church the number seven was even considered bind ing; and at Rome, for example, as late as the third century, there were only seven deacons, though the number of presbyters amounted to forty. The name seven is no argument against this view; for the word deacons nowhere occurs in the Acts. There is indeed some difference between the apostolic deacons and the ecclesiastical deacons, a difference which is acknowledged by Chrysostom, Œcumenius and others (see Suicer's Thesaurus, s. v. Sidnoros); but the latter were universally regarded as the legitimate successors of the forner - as much so as the presbyters were the successors of the πρεσβύτεροι $= \epsilon \pi (\sigma \kappa \sigma \pi \sigma)$ of the N. T., - notwithstanding the changes in their duties and relations. "In these early days," says Alford, on Acts vi. 3, "titles sprung out of realities, and were not mere hierarchical classifications." Hackett says, on Acts vi. 8 (p. 116, 2d ed.), "The general opinion at present is, that this order arose from the institution of the Seven, but by a gradual extension of the sphere of duty at first assigned to them."

(3.) There is no evidence whatever for the assumption (of Mosheim, Mack, Kuinoel, Olshausen, Meyer, Conybeare and Howson, Stanley, and the writer of the above article) that the "goung (younger) men" mentioned in Acts v. (of ref report, ver. 6, and of rearistics, ver. 10; comp. Luke

szli. 26, where δ rewrepos is used as equivalent; Church of the first century stood above the need of to & Signovar) were identical with descons and reg- the mechanism of office, and Divine charity was ularly appointed church officers whose official duty the leveller and equalizer of all class distinctions. required them to attend to the burial of the dead. There is no trace in the N. T. of such an ecclesiontical class as of rewrepoi, in distinction from the $\pi\rho\epsilon\sigma\beta$ $i\tau\epsilon\rhooi$ (who first appear Acts xi. 39), and the alternate use of rearlowor in ver. 10 of the same persons is against it. Nor was the burial of the dead ever regarded as a part of the deacon's duty, but was left during the first three centuries to the kindness of friends and neighbors, until a special class of officers called copiute (variously derived from Kond (eir, quiescere, or from Koneros, pl inclus, or from Konize, lubor are) among the Greeks, and fossarii, fossores among the Latins, were appointed for this office, at least in large cities, as Constantinople. In the case before us the removal and burial of the bodies of Ananias and Sapphira was in all probability a voluntary service, for which the younger members of the congregation would naturally offer themselves from a sense of propriety, or in obedience to Jewish custom, or on a hint given by Peter. (So Neander, Geschichte der Pflanzung, i. 67; R. Rothe, Anfänge der Christl. Kirche, p. 163 ff.; and De Wette, Alford, Hackett, Lechler in loc.)

(4.) The disconate of the Apostolic Church cannot be derived (as is done in the above article) from the office of "ministers" or "servants

(□)] [. ύπηρέται, Luke iv. 20, cf. John vii. 32)

in the Jewish synagogue, whose business was simply to open and close the synagogues, to keep them clean, and to hand out the books to the reader. The correspondence between the Christian $\pi\rho\epsilon\sigma$ -

Búrepoi and the Jewish zekinim (D)) is no reason why the diaconate should have had a Jewish precedent. There were no officers in the synagogue similar to the apostles, evangelists, and deaconesses

(5.) The diaconate was instituted first for the care of the poor and the sick. Those who held the office were alms-distributors and nurses, the descons for the male portion of the congregation, the deaconesses for the female. But this care was spiritual as well as temporal, and implied instruction and consolation as well as bodily relief; for Christian charity uses poverty and affliction as occasions for leading the soul to the source of all comfort. Hence Paul counts the helps and ministrations (duri- $\lambda \eta \psi_{eis}$) among the spiritual gifts (1 Cor. xii. 28). Hence the appointment of such men for the office of deacons as were of strong faith and exemplary piety (Acts vi. 3; 1 Tim. iii. 8 ff.; comp. the µaprupou-sévous, Acts vi. 3, and avéykhyroi, 1 Tim. iii. 3). In many cases, no doubt, already in the aposlic age, the diaconate was the stepping-stone to the higher office of the presbyterate which had the charge of public instruction, church government, and general pastoral care. Stephen preached and prepared the way for Paul's ministry of the Gentiles, and Philip, another of the seven deacons of Jerusalem, subsequently labored as an evangelist (Acts xxi. 8). The patristic interpreters refer the passage in 1 Tim iii. 13 to promotion from the office of p. 535. He understands the controverted karateacon to that of presbyter. [DEGRER. Amer. ed.] $\lambda_{e\gamma}$ to this particular office. Presense also build not confound the liberty of the tion" to this particular office. Presense also -postolic church with 'he fixed ecclesiastical order (Histoire des trois premiers Siècles, ii. 234) holds

P. S.

DEACONESS (Sidnoros: diaconissa, Tert.) The word Sidnovos is found in Rom. xvi. 1 associated with a female name, and this has led to the conclusion that there existed in the apostolic age, as there undoubtedly did a little later (Pliny, Ep. ad Traj.), an order of women bearing that title, and exercising in relation to their own sex functions which were analogous to those of the deacons. Ou this hypothesis it has been inferred that the women mentioned in Rom. xvi. 6, 12, belonged to such an order (Herzog, Real-Encykl. s. v.). The rules given as to the conduct of women in 1 Tim. iii. 11. Tit. ii. 3, have in like manner been referred to them (Chrysost., Theophyl., Hamm., Wiesinger, ad loc.), and they have been identified even with the "widows" of 1 Tim. v. 3-10 (Schaff, Apost Kirche, p. 356 [Amer. ed. in English p. 535 ff.]).

In some of these instances, however, it seems hardly doubtful that writers have transferred to the earliest age of the Church the organization of a later. It was of course natural that the example recorded in Luke viii. 2, 3, should be followed by others, even when the Lord was no lenger with his disciples. The new life which pervaded the whole Christian society (Acts ii. 44, 45, iv. 31, 82) would lead women as well as men to devote themselves to labors of love. The strong feeling that the true Opporela of Christians consisted in "visiting the fatherloss and the widow" would make this the special duty of those who were best fitted to undertake it. The social relations of the sexes in the cities of the empire (cf. Grot. on Rom. xvi. 1) would make it fitting that the agency of women should be employed largely in the direct personal application of Christian truth (Tit. ii. 3, 4), possibly in the preparation of female catechumens. Even the later organization implies the previous existence of the germs from which it was developed. It may be questioned, however, whether the passages referred to imply a recognized body bearing a distinct name. The "widows " of 1 Tim. v. 3-10 were clearly, so far as the rule of ver. 9 was acted on, women who were no longer able to discharge the active duties of life, and were therefore maintained by the Church that they might pass their remaining days in "prayers night and day." The conditions of v. 10 may, however, imply that these only who had been previously active in ministering to the brethren, who had in that sense been deaconesses, were entitled to such a maintenance. For the fuller treatment of this subject, see WIPOW. On the existence of deaconesses in the apostolin age, see Mosheim, de Reb. Christ. p. 118; Neander, Pflanz. u. Leit. i. 265; Augusti, Handb. der Christ. Archand. ii. 3. E. H. P.

* Ziegler's De Diaconis et Diaconissis veteris Ecclesiae (Wittenbergæ, 1678), a monograph of sterling value, should not be left out of the list here. The reader will find the argument for "deaconesses " in the primitive church well stated by Dr. Schaff in his History of the Apostolic Church, If a later age. In the fullness of the Holy Spirit to the existence of this order of women in the first and under the guidance of inspired apostles, the Christian age, but places it not so much on the

eral fitness and probability. Huther's view is not essentially different from this. Without supposing that the widows in question were formally set apart to an official work at this early period, he thinks that their "being put on the roll" $(\kappa \alpha \tau \alpha \lambda \epsilon \gamma \epsilon \sigma \delta \omega)$ of those wholly supported by the Church would naturally bring with it the result, as it did the obligation, of devoting themselves to such works of benevolence as were suited to their age and sex. (See in Meyer's Comm. üb. dus N. Test. viii. 64.) Out of this Ansatz may have grown the female diaconate of later times

Rev. J. S. Howson, D. D., has written a valuwhile treatise on this subject: Deaconesses; or The Official Help of Women in Parochial Work and in Charitable Institutions (Lond, 1860). He speaks here in a more positive tone than in his Life and Epistles of St. Paul, of the validity of the texts to which appeal is usually made in proof of such ministrations in the apostolic church. He pleads for the revival of the institution in Protestant churches, and states the results of some attempts for this purpose in England, France, and Germany. See also his remarks on this point in his still later work: Scenes from the lafe of SL. Paul, and their Religious Lessons (Lond. 1866).

For the later ecclesiastical opinions and usages on this subject, the reader may see Woman's Work in the Church, by J. M. Ludlow (Lond. 1865). The writer treats there less fully of the Scripture argument, assuming rather than proving, that Stakovos applied to Phæbe (Rom. xvi. 1) can mean only "deaconess." as the correlative of "deacon," and that yuraikas (1 Tim. iii. 11) must mean "deaconesses," and that all other explanations are impossible. Dissenting from most of those who yet adopt his conclusion on the main question, he denies that the "widows" (1 Tim. v. 9 ff.) were deaconesses at all, and thus relies almost wholly upon the controverted yuraikas for his Scripture proof of a primitive female diaconate. See also Church Polity, hy H. J. Ripley, D. D. (Boston, 1867). The author suggests that on whatever ground the Scripture warrant for this office may be put, its proper sphere of exercise is not to conflict with the Apostle's views of woman's position in the church (1 Cor. xiv. 34, 35; 1 Tim. ii. 12).

It may not be known to all readers that the earliest Congregational churches in England, in the 16th century, recognized fully this order of female laborers as a part of their organization. Robert Browne (1582) speaks of the deacon as "the reliever" and the deaconess as "the widow" (Hanbury's Memorials relating to Independents, i. 21). The Separate or Congregational church of Gainsborough, England (1589) - out of which came the Scrooby church, the Leyden church, and the Plynouth church - had "relievers" or "widows," ' who nust be "widows of 60 years of age at least," whose work it was "to minister to the sick," &c. (Hanoury, i. 30, 31). Johnson and Ainsworth's Congregational church in Amsterdam (1606) had "one ancient widow for a deaconess." Though 60 years old when chosen, "she did frequently visit the sick and weak: . . . and if they were poor, she would rather relief of them that were able, or acquaint he deacons; and she was obeyed as an officer of Christ" (Young's Chronicles, p. 455, Boston, 1841). The Cambridge Platform (ch. vii. § 7) recequizes this office of desconess. "The Lord hath appointed ancient widows (where they may be had) a • Delitasch, Sustem der Bibl. Psychologie, p 400

ground of explicit Scripture proof, as that of gen- | to minister in the Church, in giving attendance to the sick, and to give succor unto them, and others in the like necessities." The Rev. Mr. Punchard. well known for his studies in the early ecclesiastical history of New England, has kindly pointed out to the writer the foregoing references. H.

> DEAD SEA. This name nowhere occurs in the Bible, and appears not to have existed until the 2d century after Christ. It originated in an erroneous opinion, and there can be little doubt that to the name is due in a great measure the mistaker and misrepresentations which were for so long prevalent regarding this lake, and which have not indeed yet wholly ceased to exist.

> In the O. T. the lake is called "the Salt Sea," and "the Sea of the Plain" (Arabah); and under the former of these names it will be found described. [SEA, THE SALT.] G

> * The popular name of this remarkable sheet of water is a natural and appropriate appellation, although exaggerated stories have been current repecting its properties - among them the fable that it exhales a noxious miasma. Reposing in its deep chasm or caldron, without any current or outlet; its heavy waters impregnated with mineral salts, combined with asphaltum and sulphur, acrid and nauseous to the taste, and fatal to animal and vegetable life; no fin stirring its still depths, and no flowers or foliage fringing its borders; its shores and surrounding territory sterile, desolate and dreary; the whole region lonely and stern, and bearing marks of some dread convulsion of nature: the cemetery of cities that once occupied a portion of its site, and a perpetual memorial of the righteous judgments of God; - by what more suitable and expressive name can it be called, than that by which it is now generally known, The Dead Sea? S. W

* DEAD, THE. By this term the A. V. represents the Hebrew word רְכָאים (once translated, deceased, Is. xxvi. 14), as well as the word

no which it properly corresponds. It thus confounds two words of very different import; and what is greatly to be regretted, it effaces, in the English version of the Hebrew Scriptures, a distinct and striking recognition of the separate existence of the soul, or spiritual part of man, after the death of the body.

The dead (those who have ceased to live on earth, and are therefore absolutely dead to all earthly relations) are represented by D', which, as gen-

eric, includes also the other term.

The other term translated dead, D, means disembodied spirits separated from the body at death, and continuing to live in a separate existence.

According to Fürst (Heb. w. Chall. Hander. 797. II.), it is from a root meaning to be obscure, dark, and was applied, by the same figure as the German Schatten, to departed spirits, conceived as mere shadowy forms. According to Gesenius, it means, either the quiet, the silent, from their supposed state of inactivity and repose, "ut incolse regni tenebrosi et silentis " (comp. Is. xiv. 9), or the weak, the feeble, "debiles, faccidi, . . . quod manium na turæ satis accommodatum est," Is. xiv. 10 (Thes ш. 1302).а

in either case, it is well represented by the word shade, by which the same object is designated in English usage. The Hebrew word occurs in the following passages, which show the importance of the distinction overlooked in the A. V.

The shades tremble,

Beneath the waters and their inhabitants. Job xxvi. 5.

Wilt thou show wonders to the dead?

Will the shades arise and praise thee? Pa. Ixxxviii, 10.

For her house inclines to death,

And her ways to the shades.

Prov. ii. 18.

And he knows not that the shades are there, Her guests in the depths of the underworld ! Prov. iz. 18.

The boldness of this truthful representation is worthy of notice. "Her house" is called (ch. vii. 37) "ways to the underworld," and "her steps" (it is said in ch. v. 5) "take hold on it; "so near to its abodes, that (by a bold figure) the shades of the dead are there, and her guests are in the depths of hell!

Other passages in which this word occurs are Prov. xxi. 16; 1s. xiv. 9, xxvi. 14, 19. See, in the art. GIANTS, the paragraph added at the close of No. 3. T. J. C.

DEARTH. [FAMINE.]

DE'BIR, the name of three places of Palestine.

1. (דְבָיר, but in Judg. and Chr. דְבִיך [hinder part as of a temple, and hence the sanctuary, Ges.; perh. pasture, Fürst]: $\Delta \alpha \beta (\rho; [Vat.] Alex. \Delta \alpha$ -Beio: Dabir), a town in the mountains of Judah (Josh. xv. 49), one of a group of eleven cities to the west of Hebron. In the narrative it is mentioned as being the next place which Joshua took after Hebron (x. 38). It was the seat of a king (x. 39, xii. 13), and was one of the towns of the Anakim, from which they were utterly destroyed by Joshua (xi. 21). The earlier name of Debir was KIRJATH-SEPHER, "city of book" (Josh. xv. 15; Judg. i. 11), and KIRJATH-SAN-NAH, "city of palm" [or palm-branch or leaf] (Josh. xv. 49). The records of its conquest vary, though not very materially. In Josh. xv. 17 and Judg. i. 13 a detailed account is given of its capture by Othniel son of Kenaz, for love of Achsah the daughter of Caleb, while in the general history of the conquest it is ascribed to the great commander himself (Josh. x. 38, 39) [since the acts of the principal and the subordinate in such a case may be ascribed to one or the other]. In the bust two passages the name is given in the Hebrew

text as Debirah (デニア). It was one of the cities

given with their "suburbs" (ゼウス) to the priests (Josh. xxi. 15; 1 Chr. vi. 58). Debir does not appear to have been known to Jerome, nor has it been discovered with certainty in modern times. About three miles to the W. of Hebron is a deep and socheded valley called the Wrady Nunkár, inrlosed on the north by hills of which one bears a

foot-note : " Der Name der Hadesbewohner

tie Schlaffen (von Υς) schlaff, matt sein) stimmt su ien homerischen Benennungen of καμόντες die Erschlafften, άμεταγκά κάρηνα die Häupter ohne Kraft [μάντε], σκιαί, είδελα, und kommt auch in der Inschrift ber deduesben Königs-Sarges voc."

name certainly suggestive of Debir, — Dever-bos. (See the narrative of Rosen in the Zeiteck. d. D. M. G. 1857, pp. 50-64.) The subject, and indeed the whole topography of this district, requires further examination: in the mean time it is perhaps some confirmation of Dr. Rosen's suggestion that a village or site on one of these hills was pointed out to the writer as called *isa*, the Arabic name for Joshua. Schwarz (p. 86) speaks of a Wady Dibir in this direction. Van de Velde (Memoir, p. 307; finds Debir at DibleA, six miles S. W. of Hebron where Stewart mentions a spring brought dow. from a high to a low level by an aqueduct.

2. $(\neg \neg \neg; i en)$ rò réraprov rîs ¢doaryns 'Axép: Debera.) A place on the north boundary of Judah, near the "Valley of Achor" (Josh. xv. 7), and therefore somewhere in the complication s of hill and ravine behind Jericho. De Sauley (ii. 139) attaches the name Thour-ed-Dabour a to the ruined khan on the right of the road from Jerusslem to Jericho, at which travellers usually stop to refreah [themselves], but this is not corroborated by any other traveller. The name given to it by the Arabs when the writer passed (1858) was Khan Hatherûrah. A Wady Dabor is marked in Van de Velde's map as close to the S. of Neby Müsa, at the N. W. corner of the Dead Sea.

3. The "border (\neg)) of Debir" is named as forming part of the boundary of Gad (Josh. xiii. 26), and as apparently not far from Mahanaim. Relaud (p. 734) conjectures that the name may possibly be the same as Lodebar (\neg), but no identification has yet taken place (LXX. $\Delta a_{i}\beta \delta \nu$, [Vat.] Alex. $\Delta a\beta \epsilon \omega$: Dabir). Lying in the grazing country on the high downs east of Jordan, the name may be derived from \neg , Dabar, the same word which is the root of Midbar, the wilder-

ness or pasture (see Ges. p. 318). [DESERT.]

DE'BIR [∇ τ; [Vat. Δαβειν;] Alex. Δαβειν; Dabir), king of Eglon, a town in the low country of Judah; one of the five kinge hanged by Joshus (Josh. x. 3, 23).

DEB'ORA ($\Delta \epsilon \beta \beta \omega \rho d$; [Alex. $\Delta \epsilon \mu \beta \omega \rho a$: Vulg. omits]), a woman of Naphtali. mother of Tobiel, the father of Tobit (Tob. i. 8) The same name as

DEB'ORAH $(\Pi \neg \neg \neg \neg$] [bee]: $\Delta \epsilon \beta \delta \delta \rho a$, [Alex.] $\Delta \epsilon \beta \beta \omega \rho a$: Debora). 1. The nurse of Rebekah (Gen. xxx. 8). Nurses held a high and honorable place in ancient times, and especially in the East (2 K. xi. 2; Hom. Od. i. 429; Ving. *En.* vii. 2, "*Eneia nutrix*;" Ov. *Met.* xiv. 441). where they were often the principal members of the family (2 Chr. xxii. 11; Jahn, Arch. Bibl. § 166). Deborah accompanied Rebekah from the house of Bethuel (Gen. xxiv. 50), and is only mentioned by name on the occasion of her burial, under the oaktree⁶ cf Bethel, which was called in her honor Allon-Baci.uth (Bd*Aavos wérbous*, LXX.). Such spots were usually chosen for the purpose (Gen. xxiii. 17, 18; 1 Sam. xxx. 13; 2 K. xxi. 18, &c.).

^a De Saulcy quotes the name in Joshua as "Dabor;" but on what authority is not apparent. Certainly not that of the Hebrew or the Vulgate. ^b • The A. V. omits the article, and thus obscures the fact that the tree was well known for ages. H

576 DEBORAH

Many have been puzzled at finding her in Jacob's | ("that great dame of Lapidoth," Tennyson), or family; it is unlikely that she was sent to summon Jacob from Haran (as Jarchi suggests), or that she had returned during the lifetime of Rebekah, and was now coming to visit her (as Abarbanel and others say); but she may very well have returned at Rebekah's death, and that she was dead is probable from the omission of her name in Gen. xxxv. 27; and if, according to the Jewish legend, Jacob first heard of his mother's death at this spot, it will he an additional reason for the name of the tree, and may possibly be implied in the expression

", comforted, A. V. "blessed" (Gen. xxxv. 9; see too Ewald, Gesch. i. 390).

2. $[\Delta \in \beta \beta \omega \rho a: Debbora.]$ A prophetess who judged Israel (Judg. iv., v.). Her name, means "a bee" (or $\sigma\phi\hbar\xi$, "a wasp"), just as $M\epsilon$ - $\lambda_{i\sigma\sigma\alpha}$ and Melitilla were proper names. This name may imply nothing whatever, being a mere appellative, derived like Rachel (a lamb), Tamar (a pain), &c., from natural objects; although she was (as Corn. a Lapide quaintly puts it) suis mellen, hostibus aculeata. Some, however, see in the name an official title, implying her prophetic authority. A bee was an Egyptian symbol of regal power (cf. Call. Jov. 66. and Et. Mag. s. v. (gothy); and among the Greeks the term was applied not only to poets (more apis Matinas, Hor.), and to those peculiarly chaste (as by the Neoplatonists), but especially to the priestesses of Delphi ($\chi \rho \eta \sigma \mu ds \mu e$ λίσσας Δελφίδος, Pind. P. iv. 106), Cybele and Artemis (Creuzer, Symbolik, iii. 354, &c.), just as eroty was to the priests (Liddell and Scott, s. r.). In both these senses the name suits her, since she was essentially a vates or seer, combining the functions of poetry and prophecy.

She lived under the palm-tree ("such tents the patriarchs loved," Coleridge) of Deborah, between Ramah and Bethel in Mount Ephraim (Judg. iv. 5), which, as palm-trees were rare in Palestine, "is mentioned as a well-known and solitary landmark, and was probably the same spot as that called (Judg. xx. 33) Baal-Tamar, or the sanctuary of the palm " (Stanley, S. of P. p. 146). Von Bohlen (p. 334) thinks that this tree is identical with Allon-Bachuth (Gen. xxxv. 8), the name and locality being nearly the same (Ewald, Gesch. i. 391, 405), although it is unhistorical to say that this "may have suggested a name for the nurse " (Hävernick's Introd. to Pent. p. 201; Kalisch, Gen. ad loc.). Possibly it is again mentioned as "the oak of Tabor," in 1 Sam. x. 3, where Thenius would

read הברה for הברה. At any rate it was a well-known tree, and she may have chosen it from its previous associations.

She was probably a woman of Ephraim, although from the expression in Judg. v. 15, some suppose her to have belonged to Issachar (Ewald, Gesch. ii.

489). The expression לַפּירוֹת is much disputed; it is generally thought to mean " wife of Lapidoth," as in A. V.; but other versions render it "uxor principis," or "Fœmina Lapidothana"

mulier splendorum, i. e. one divinely illuminated, since לפידות elightnings." But the most prosaic notion is that of the rabbis, who take it te mean that she attended to the tabernacle lamps from T', lappid, a lamp! The fem. termination is often found in men's names, as in Shclomith (1 Chr. xxiii. 9), Koheleth, &c. Lapidoth then was probably her husband, and not Barak, as some sav.

She was not so much a judge (a title which belongs rather to Barak, Heb. xi. 32) as one gifted with prophetic command (Judg. iv. 6, 14, v. 7), and by virtue of her inspiration "a mother in Israel." Her sex would give her additional weight, as it did to Veleda and Alaurinia among the Germans, from an instinctive belief in the divinity of womanhood (Tac. Germ. c. 8). Compare the instances of Miriam, Huldah, Anna, Noadiah (2 K. xxii. 14; Neh. vi. 14).

Jabin's tyranny was peculiarly felt in the northern tribes, which were near his capital and under her jurisdiction, namely, Zebulon, Naphtali, and Issachar; hence, when she summoned Barak to the deliverance, "it was on them that the brunt of the hattle fell; but they were joined by the adjacent central tribes, Ephraim, Manasseh, and Benjamin, though not by those of the extreme west, south, and east" (Stanley, p. 339). Under her direction Barak encamped on "the broad summit of Tabor ' (Joseph. B. J. ii. 20, § 6). When asked to uccompany him, "she answered indignantly, Thou, oh Barak, deliverest up meanly the authority which God hath given thee into the hands of a woman; neither do I reject it" (Joseph. Ant. v. 5, § 2). The LXX. interpolate the words STI our olda The ήμέραν έν ή εὐοδοῖ ὁ Κύριος τὸν ἄγγελον μετ έμοῦ as a sort of excuse for Barak's request (iv. 8; cf. 14, v. 23). When the small band of ill-armed (Judg. v. 8) Israelites saw the dense iron chariots of the enemy, "they were so frightened that they wished to march off at once, had not Deborah detained them, and commanded them to fight the enemy that very day " (Joseph. l. c.). They did so, but Deborah's prophecy was fulfilled (Judg. iv. 9), and the enemy's general perished among the "oaks of the wanderers (Zaanaim)," in the tent of the Bedouin Kenite's wife (Judg. iv. 21) in the northern mountains. " And the land had rest forty years" (Judg. v. 31). For the natural phenomena which aided (Judg. v. 20, 21) the victory, and the other details (for which we have ample authority in the twofold narration in prose and poetry', see BA-RAK, where we have also entered on the difficult question of the chronology (Ewald, Gesch. ii. 489-494).

Deborah's title of "prophetess" (בְּרָאָד) includes the notion of inspired poetry, as in Ex. xv. 20; and in this sense the glorious triumphal ode (Judg. v.) well vindicates her claim to the office. On this ode much has been written, and there are separate treatises about it by Hollmann, Kalkar.

Jews at present as Deborah's fountain. They have a tradition that the heroine passed there with Barak on his march to Tabor, and bathed in this fountain on the morning of the decisive battle See the writen Illustr. of Scripture, p. 243 (revised ed.); and Thomson's Land and Book, 1. 424.

a . Cassel (Richter und Kuth, p. 48) explains tappidoth (see above) of the fiery spirit, enthusiasm, and ardor, which burned in her, and enabled her to set others on fire by the contagion of her own example. The beautiful fountain at the base of the hill on which Meiron stands, the place of the famous Jewish cemevery, ab ut 6 miles west of Safed, is known among the

DECAPOLIS (Derduolis, "the ten cities"). This name occurs only three times in the Scriptures, Matt. iv. 25; Mark v. 20, and vii. 31; but it is frequently mentioned by Josephus and other ancient writers. Immediately after the conquest of Syria by the Romans (B. C. 65), ten cities appear to have been rebuilt, partially colonized, and endowed with peculiar privileges; the country around them was hence called Decupolis. The limits of the territory were not very clearly defined; and protably in the course of time other neighboring cities received similar privileges. This may account for the fact that ancient geographers speak so indefinitely of the province, and do not even agree as to the names of the cities themselves. Pliny (v. 18) admitting that "non omnes eadem observant," enumerates them as follows: Scythopolis, Hippos, Gadara, Pella, Philadelphia, Gerasa Dion, Canatha, Damascus, and Raphana. Ptolemy (v. 17) makes Capitolias one of the ten; and an old Palmyrene inscription quoted by Reland (Pal. p. 525) includes Abila, a town which, according to Eusebius (Onom. s. v. Abila) was 12 Roman miles east of Gadara. Josephus (B. J. iii. 9, § 7) calls Scythopolis the largest city of Decapolis, thus manifestly excluding Damascus from the number. All the cities of Decapolis, with the single exception of Scythopolis, lay on the east of the Jordan; and both Eusebius and Jerome (Onom. s. v. Decupolis) say that the district was situated "beyond the Jordan, around Hippos, Pella, and Gadara, that is, to the east and southeast of the Sea of Galilee. With this also agrees the statement in Mark v. 20, that the demoniac who was cured at Gadara "began to publish in Decapolis how great things Jesus had done to him." It would appear, however, from Matt. iv. 25 and Mark vii. 31, that Decapolis was a general appellation for a large district extending along both sides of the Jordan. Pliny (v. 18) says it reached from Damascus on the north to Philadelphia on the south, and from Scythopolis on the west to Canatha on the east - thus making it no less than 100 miles long by 60 broad; and he adds, that between and around these cities are tetrarchies, each like a kingdom; such as Trachonitis, Paneas, Abila, Arca, &c.

This region, once so populous and prosperous, from which multitudes flocked to hear the Saviour, and through which multitudes followed his footsteps --- is now almost without an inhabitant. Six out of the ten cities are completely ruined and deserted. Scythopolis, Gadara, and Canatha have still a few families, living, more like wild beasts than human beings, amid the crumbling ruins of palaces, and in the cavernous recesses of old tombs. Damascus alone continues to flourish, like an oasis in a desert. J. L. P.

* DECEITFULLY, A. V. Job vi. 15 ff. "Deceitful as a brook," appears to have been a sort of proverb among the Semitic tribes. Thus Job in the above passage compares the conduct of insincere, false-hearted friends to the streams of the

and Kenrick. It is also explained by Ewald (die | desert. Dr. Conant (Book of Job, p. 24) trans-

" My brethren are deceitful, like the brook. As the channel of brooks that pass away : That become turbid, from ice; The snow hides itself in them At the time they are poured off, they fail; When it is hot they are consumed from their place. The caravans along their way turn aside ; They go up into the wastes, and perish. The caravans of Tema looked ; The companies of Shebs waited for them They were ashamed that they had trusted They came thither and were confounded."

The ground of the comparison here lies in the uncertain character of the brooks or streams in the East. A detailed example may best serve to illustrate the peculiarity referred to. On the 2d of April the writer crossed the stone bridge to the right of Kulowich, 1; hours to the northwest of Jerusalem. The channel of the stream was then entirely destitute of water. Richardson (Travels along the Mediterranean, ii. 236) found there on the 15th of April, of another year, "a small brook trickling down the valley." Prokesch (Reise ins heilige Land, p. 41), who was there at another time, a few weeks later in the season, speaks of a full rushing stream as dashing along the water-bed. Otto von Richter (Wallfahrten im Morgenlande, p. 15) who was there in August, says that it contained then a little water. Again, Salzbacher (Erinnerungen aus meiner Pilgerreise, ii. 31), who saw the brook near the end of June, says that it was then entirely dry. The stream, therefore, is evidently a very precarious one. It varies not only in winter, but at the same season in different years. It is a fair example of what is true of eastern brooks in general. These water-courses, as they may more properly be called, flow with water during the rainy season; but soon after that are liable to be wholly dried up, or if they contain water still later, contain it only for a longer or shorter time, according to their situation and the severity of the heat of particular years. Hence, the traveller in quest of water must often be disappointed when he comes to such streams. He may find them entirely exhausted; or, he may find the water gone at the place where he approaches them, though it may still linger in other places which elude his observation; he may perceive, from the moisture of the ground, that the last drops have just disappeared, and that he has arrived but a few hours too late for the attainment of his object. Fainting with thirst and after many a weary step out of his direct course in pursuit of the cooling stream, the wayfarer reaches at length the place of hoped-for relief, but only to be doomed to disappointment - the deceitful brook has fled.

We meet with the same comparison somewhat differently applied in Jer. xv. 18. The prophet's sky had long been darkened with trouble and sorrow; but the helper for whom he was waiting delayed to come. The more exact translation would be:-

> "Why is my affliction perpetual And my wound incurable? It will not be healed. Thou art to me as a lying brook, As waters which are not enduring."

Thomson (Land and Book, ii. 231) has some remarks on this characteristic of the brook. He

upposes, on account of the reference to Tema and , where we find Dedan with Sheba and the merchants Sheba, that the streams which suggested Job's ilinstration are those "which flowed down from the high lands of Gilead and Bashan, and came to nothing in the neighboring desert." H.

* DECISION, VALLEY OF. [JEHO8-HAPHAT.]

DEDAN (777 [depression, low country, Fürst]: Aadder; [Vat. in 1 Chr. Iovdadar:] Da dan). 1. The name of a son of Raamah, son of Cush (Gen. x. 7; 1 Chr. i. 9, "the sons of Raamah, Sheba, and Dedan ").

2. [In Gen. Aeddr, Alex. Audar; 1 Chr. and Ez. Aaidar; Jer. XXV. 23, Aaidar, FA. Aedar; xlix. 8, Δαιδάμ, Alex. FA. Δαιδαν: Dadan, De-dan.] That of a son of Jokshan, son of Keturah (Gen. xxv. 3, and "Jokshan begat Sheba and Dedan. And the sons of Dedan were Asshurim, Letushim, and Leummin." Cf. 1 Chr. i. 82). The usual opinion respecting these founders of tribes is that the first settled among the sons of Cush, wherever these latter may be placed; the second, on the Syrian borders, about the territory of Edom. But Gesenius and Winer have suggested that the name may apply to one tribe; and this may be adopted as probable, on the supposition that the descendants of the Keturahite Dedan intermarried with those of the Cushite Dedan, whom the writer places, presumptively, on the borders of the Persian [ARABIA, CUSH, RAAMAH, &c.] Gulf. The theory of this mixed descent gains weight from the fact that in each case the brother of Dedan is named Sheba. It may be supposed that the Dedanites were among the chief traders traversing the caravan-route from the head of the Persian Gulf to the south of Palestine, bearing merchandise of India, and possibly of Southern Arabia; and hence the mixture of such a tribe with another of different (and Keturahite) descent presents no impossibility. The passages in the Bible in which Dedan is mentioned (besides the genealogies above referred to) are contained in the prophecies of Isaiah, Jeremiah, and Ezekiel, and are in every case obscure. The Edomite settlers seem to be referred to in Jer. xlix. 8, where Dedan is mentioned in the prophecy against Edom; again, in xxv. 23, with Tema and Buz; in Ez. xxv. 13, with Teman, in the prophecy against Edom; and in Is. xxi. 13 ("The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye travelling companies of Dedanim " with Tema and Kedar. This last passage is by some understood to refer to caravans of the Cushite Dedan; and although it may only signify the wandering propensities of a nomad tribe, such as the Edomite portion of Dedan may have been, the supposition that it means merchant-caravans is strengthened by the remarkable words of Ezekiel in the lamentation for Tyre. This chapter (xxvii.) twice mentions Dedan; first in ver. 15, where, after enumerating among the traffickers with the merchant-city many Asiatic peoples, it is said, "The children of Dedan were thy merchants, many isles

 $(\square \land \land \land \land)$ were the merchandise of thine hand: they brought thee for a present horns of ivory, and ebony." Passing thence to Syria and western and northern peoples, the prophet again (in ver. 20) mentions Dedan in a manner which seems to point to the wide-spread and possibly the mixed ancestry of this tribe. Ver. 15 may be presumed to allude days, but it did not require attendance at Jerus

of Tarshish; apparently, from the context, the De dan of ch. xxvii. 15); but the passage commencing in v. 20 appears to include the settlers on the borders of Edom (i. e. the Keturahite Dedan). The whole of the passage is as follows: "Dedan [was] thy merchant in precious clothes for chariots. Arabia, and all the princes of Kedar, they occupied with thee in lambs, and rams, and goats: in these [were they] thy merchants. The merchants of Sheba and Raamah they [were] thy merchante: they occupied in thy fairs with chief of all spices, and with all precious stones, and gold. Harau, and Canneh, and Eden, the merchants of Sheba, As shur, [and] Chilmad, [were] thy merchants." (Es. xxvii. 20-23.) We have here a Dedan connected with Arabia (probably the northwestern part of the peninsula) and Kedar, and also with the father and brother of the Cushite Dedan (Reamsh and Sheba), and these latter with Asiatic peoples commonly placed in the regions bordering the head of the Persian Gulf. This Dedan moreover is a merchant, not in pastoral produce, in sheep and goats, but in "precious clothes," in contradistinction to Arabia and Kedar, like the far-off eastern nations who came with "spices and precious stones and gold," "blue clothes and broidered work," and " chests of rich apparel."

The probable inferences from these mentions of Dedan support the argument first stated, namely: 1. That Dedan son of Raamah settled on the shores of the Persian Gulf, and his descendants became caravan-merchants between that coast and Palestine. 2. That Jokshan, or a son of Jokshan, by intermarriage with the Cushite Dedan formed a tribe of the same name, which appears to have had its chief settlement in the borders of Idumes, and perhaps to have led a pastoral life.

All traces of the name of Dedan, whether in Idumsea or on the Persian Gulf, are lost in the works of Arab geographers and historians. The Greek and Roman geographers however throw some light on the eastern settlement; and a native indication of the name is presumed to exist in the island of Dadan, on the borders of the gulf. The identification must be taken in connection with the writer's recovery of the name of Sheba, the other son of Raamah, on the island of Audi, near the Ambian shore of the same gulf. This is discussed in the art. RAAMAH. E. S. P.

DED'ANIM (בדָרָים: Dedanim), Is. xxi. 13. [DEDAN.]

DEDICATION, FEAST OF THE (rd dynalvia, John x. 22: Encania, Vulg.; & dynar vious tou dusiastroplow, 1 Mace. iv. 56 and 59 (the same term as is used in the LXX. for the dedication of the altar by Moses, Num. vii. 10); δ καθαρισμός τοῦ ναοῦ, 2 Macc. x. 5: Mishna,

חברה, i. e. dedication : Joseph. φωτα, Ant. xii. 7, § 7), the festival instituted to commemorate the purging of the Temple and the rebuilding of the altar after Judas Maccabseus had driven out the Syrians, B. C. 164. It is named only once in the Canonical Scriptures, John r. 22. Its institution is recorded 1 Macc. iv. 52-19. It commenced on the 25th of Chialeu, the anniversary of the pollution of the Temple by Antiochus Epiphanes, B. C. 167. Like the great Mosaic feasts, it lasted eight supecially to the Cushite Dedan (cf. ch. xxxviii. 13, lem. It was an occasion of much festivity. The

writer of 2 Macc. tells us that it was celebrated in | stage of their destiny is reached. In Rom. z. 7 nearly the same manner as the Feast of Tabernacles, with the carrying of branches of trees, and with much singing (x. 6, 7). Josephus states that the festival was called "Lights," and that he supposes the name was given to it from the joy of the nation at their unexpected liberty - The dopthe άγομεν καλούντες αύτην Φώτα, έκ του παρ' έλπίδος οίμαι ταύτην ημῶν φανηναι την έξουσίαν (Ant. xii. 7, § 7). The Mishna informs us that no fast on account of any public calamity could be commenced during this feast. In the Gemara a story is related that when the Jews entered the Temp's, after driving out the Syrians, they found there nly one bottle of oil which had not been polluted, and that this was miraculously increased, so as to feed the lamps of the sanctuary for eight days. Maimonides ascribes to this the custom of the Jews illuminating each house with one candle on the first day of the feast, two on the second day, three on the third, and so on. Some had this number of candles for each person in the house. Neither the books of Maccabees, the Mishna, nor Josephus mention this custom, and it would seem to be of later origin, probably suggested by the name which Josephus gives to the festival. In the Temple at Jerusalem, the "Hallel" was sung every day of the feast.

In Ezra (vi. 16) the word TPLT, applied to the dedication of the second Temple, on the third of Adar, is rendered in the LXX. by dynalvia, and in the Vulg. by dedicatio. But the anniversary of that day was not observed. The dedication of the first Temple took place at the Feast of Tabernacles (1 K. viii. 2; 2 Chr. v. 3). [TABERNACLES, FBAST OF.]

See Lightfoot, Temple Service, sect. v.; Horas Heb. on John x. 22, and his Sermon on the same text; Mishna, vol. ii. p. 369, ed. Surenhus., and Houtingius' note, 317; Kuinoel On John x. 22.

S. C.

* DEEP, THE (&Burros: abyssus). The term which the A. V. renders thus in Luke viii. 31 and Rom. x. 7, it renders " bottomless pit " in Rev. ix. 1, 2, 11; xi. 7; xx. 1, 3. The translation as thus varied (abyss would be better) is unfortunate, as it not only conceals the link of unity which binds together these passages (Rom. x. 7 partially excepted), but leads the reader to confound it with "the deep" as meaning the sea (e. g. Luke v. 4; 2 Cor. xi. 25), and founded on a different original word $(\theta d\lambda a \sigma \sigma a)$. "The deep" in Luke viii. 31, into which the demons that possessed the Gadarene maniacs besought Jesus not to cast them, is evidently the place of punishment to which they knew they were ultimately to be consigned; for the being sent thither stands in that passage as equivalent to suffering the torment before the time spoken of in Matt. viii. 29, which they feared might be at once inflicted on them. We may say further, in view of the evident analogy between these passages and Jude ver. 6, that "abyss" is the place ulso where other wicked spirits of the same class ure already confined, awaiting the more complete punishment which they are to suffer after the judgment of the great day. "Abyss" is not one of he names actually applied to the state or place of wicked men after death; but we seem to be forbidden by such language as that in Matt. xxv. 41 b) infer that the condition of lost men and fallen in vv. 9-12. The passage in 1 Tim. iii. 13 may augels is to be easentially different when the last be rendered and explained, then, as follows: "For

"the abyes " and " heaven " are opposed to each other as limits separated by the greatest conceivable distance. The use of the term in the Apocalypee partakes of the vagueness and poetic freedom of that figurative book, but retains still the groundidea of its more direct, literal application. The "abyss " or " bottomless pit " is a place enveloped in gloom and darkness whence arise clouds of smoke which "darken the sun and the air" (ix. 2); from which issue myriads of destructive locusts whose king is Abaddon or Apollyon, who leads them forth to ravage the earth and torment mankind (ix. 3 ff.); and into which at length this enemy of all good, "the old serpent which is the Devil and Satan, is plunged and chained for a thousand years, and where after a brief respite he is confined again apparently forever (xx. 1 ff.).

In regard to the origin and force of this imagery, which with some variations has given expression to men's natural consciousness of a future retribution, among so many different nations, see Prof. Stuart's Comment. on the Apocalypse, i. 189, and Pfanner's Systema Theologia Gentilis Purioris, pp. 459-489. For the usage of the Septuagint, see Biel's Thesaur. Phil. p. 4, and for that of the Apocrypha, Wahl's Cluvis Librorum Vet. Test. Apocryph. p. 2. We are not to understand, of course, that "abyss" in the N. T. is coëxtensive with Hades or the underworld as the abode of the dead indiscriminately but is the part of that wider realm assigned as their special abode to the wicked. [HADES.] H.

DEER. [FALLOW-DEER.]

* DEGREE (βαθμός: gradus). The original word occurs in the N. T. only in 1 Tim. iii. 13: " For they that have used the office of a deacon well, purchase to themselves a good degree, and great boldness in the faith which is in Christ Jesus." The "degree" or step referred to has been variously understood : (1.) Of ecclesiastical preferment, e. g. from the diaconate to a higher office: so some of the fathers, and lately Wordsworth; but this, as Alford and Ellicott admit, is untenable. It is not likely that any such process of ecclesiastical preferment existed at this early period. (2.) A station or standing-place in the sight of God, and with reference to their own salvation (De Wette, Alford, Ellicott). (3.) A place of honor in the estimation of the Church (Luther, Calvin). (4 rogress in the faith.

The word etymologically signifies a step upward or forward, and in the tropical sense in which it is here used, expresses the general idea of advancement. The somewhat emphatic dative " for themselves," makes distinct the idea of personal advantage, as distinguished from service to others, indicated by the verb rendered in A. V., "used the office of a deacon." The subjoined phrase, " boldness (or better, joyous confidence: see De Wette and Huther in loc.) in faith." shows that this advantage is of a spiritual nature, and essentially subjective. The "degree" or step referred to, then, would seem most naturally to relate to progress in epiritual life. We may accordingly regard the passage in 1 Tim. iii. 13 as a general proposition in respect to the subjective spiritual benefit obtained by faithfully serving as deacons, the importance of which in turn becomes confirmatory of the propriety of requiring the qualifications mentioned

680 DEGREES, SHADOW OF

they who well served as deacons " (the verb in the is adopted by Rosenmüller, Herder, Mendelsschn, sorist simply indicates the service viewed as completed; there is nothing to mark a reference to the day of judgment, as Alford would have it) "obtain for themselves a good degree" (furtherance in spiritual attainments), "and much confidence" (towards God) "in faith in Christ Jesus." Van Oosterzee would unite with this the idea of future G. E. D. blessedness.

* DEGREES, SHADOW OF [AUAZ; DIAL; HEZEKIAH.]

DEGREES, SONGS OF שירי) המעלוה), a title given to fifteen psalms, from cxx. to cxxxiv. inclusive. Four of them are attributed to David, one is ascribed to the pen of Solomon, and the other ten give no indication of their author. Eichhorn supposes them all to be the work of one and the same bard (Einl. in dus A. T.), and he also shares the opinion of Herder (Geist der ebräischen Poesie), who interprets the title "Hymns for a journey." "The beadings of the paalms, however, are not to be relied on, as many of these titles were superadded long after the authors of the psalms had passed away. The words ' of David, or 'of Solomon,' do not of themselves establish the fact that the psalm was written by the person named, since the very same phraseology would be employed to denote a hymn composed in honor of David or of Solomon " (Marks's Sermons, i. 208-9). Bellermann (Metrik der Hebräer) calls these pealms " Trochaic songs."

With respect to the term השעלות, A. V. "degrees," a great diversity of opinion prevails amongst Biblical critics. According to some it refers to the melody to which the psalm was to be chanted. Others, including Gesenius, derive the word from the poetical composition of the song, and from the circumstance that the concluding words of the preceding sentence are often repeated at the commencement of the next verse. Thus Paalm cxxi. : -

> " I will lift up mine eyes unto the hills From whence cometh my help My krip cometh even from Jehovah," &c.

And so in other passages (comp. cxxi. 4, 5, and exxiv. 1, 2 and 3, 4). Aben Eura quotes an ancient authority, which maintains that the degrees allude to the fifteen steps which, in the temple of Jeruwhen, led from the court of the women to that of the men, and on each of which steps one of the fifteen songs of degrees was chanted. Adam Clarke (Comment. on Ps. exx.) refers to a similar opinion as found in the Apocryphal Gospel of the birth of Mary : " Her parents brought her to the temple, mentioned but once in Scripture (Far. iv. 9). They and set her upon one of the steps. Now there are ; were among the colonists planted in Samuia by fifteen steps about the temple, by which they go the Assyrian monarch Esarhaddon, after the con up to it, according to the fifteen Paalms of De-pletion of the Captivity of Israel. From their grees."

1729 " to go up," or to travel to Jerusalem : that that they are the Dal or Dahi, mentioned by Herod-

some of these hymns were preserved from a period otus (i. 125) among the nomadic tribes of Pernia. anterior to the Babylonish Captivity; that others 'This people appears to have been widely differed, were composed in the same spirit by those who being found as Dahar (Adau) both in the con weturned to Palestine, on the conquest of Babylon east of the (aspian (Strab. xi. 8, § 2; Arrian 7) Cyrus, and that a few refer even to a later date. *Exped. Al.* iii. 11, dc.), and in the vicinity of the but were all incorporated into one collection, be- Sea of Azof (Strab. zi. 9, § 3); and again as Di muss they had one and the same object. This view (Ales, Thueyd. ii. 96), Dal (Ades, Strab.), or Das

DEHAVITES

Joel Brill, &c. &c. Luther translates the words "Ein Lied im höhern Chor," thus connecting the psalm with the manner of its execution; and Michaelis compares מעלה with the Syriad Scala) which would likewise characterize D. W. M. the metre or the melody.

• If הַמַּצַלוֹת designates the pealms grouped together under that title as those which the Hebrews sung when they went to derusalem to keep the yearly feasts, the rendering should be "Goingsup " or " Ascents " (comp. arafairs as so often said of journeys thither in the N. T.). Hengsten. berg's advocacy of this explanation (Die Psulmer, iv. 2te Abth. p. 6), has given to it more recently still wider currency. Some of his arguments (which taken together have a cumulative force, though singly less decisive) are the following: (1.) is the usual expression for these festival journeys (Ex. xxxiv. 24; 1 Kings xii. 27, 28; Ps. cxxii. 4). (2.) The article in הפַּעֵלוֹת, by way of preeminence, denotes the journeys, which can only be those annual journeys prescribed by the law (comp Ps. exxii. 4). (3.) The oldest, in all probability, of these pilgrim songs, namely: that which was com posed by David soon after the consecration of Zior as the seat of the sanctuary and at the commencement of the pilgrimages thither (Ps. cxxii.), contains an explanation of the sense of מַעֵלוֹת in the occurrence of two correspondent expressions (as in the case of the explanation of בעלביל, Ps. xxxii.), namely: "We will go to the house of the Lord" in ver. 1, and " to which the tribes go up " (עלד) in ver. 4. (4.) Some of these pealms, in accordance with the most manifest internal marks, have been used for this purpose, e. g. Ps. exxi. 1 shows how appropriate the psalm was as designed to be sung in view of the mountains of Jerusalem. (5.) According to this interpretation all the common peculiarities of these pealms are accounted for, such as contents, rhythmical structure, and local allusions. Hupfeld (Die Paalmen, iv. 252) favora this re-

vived opinion of many of the older critics. Evald also agrees with those who consider them hymne designed for pilgrimages to the Temple, composed during and after the time of the exile (Bibl. Jakrb. vi. 105, and Gesch. Isr. iv. 115). Perowne (Book of Psalms : Introduction, p. zevi., Lond. 1865) gives the preference to this explanation. II.

DEHA VITES (NTT: Annie: Diet.) are name, taken in conjunction with the fact that they The most generally accredited opinion, however, are coupled with the Susanchites (Susianians, or is that נועלד is etymologically connected with people of Susa) and the Flamites (Elymenna, natives of the same country), it is fairly concluded

Assoi Strab. D. Cass. &c.) upon the Dauube. προεστώτες, τοις άρχουσι Παλαιστίνων; LXX. They were an Aryan race, and are regarded by some άρχουτες: Satrapoz; ol τοῦ κοινοῦ; magistrates having their lineal descendants in the modern politician lords, Milton, Sams. Ag. 850, 1195) Danes (see Grimm's Geschichte d. deutsch. Sprache, i. 192-3). The Septuagint form of the name Davanus, may compare with the Davus (== $\Delta dFos$) of Latin comedy. G. R.

DE'KAR. The son of Deker, i. c. BEN-DEKER

(ארד vibs Dando: Bendecar), was Solomon's commissariat officer in the western part of the hill-country of Judah and Benjamin, Shaalbim and Beth-shomesh (1 K. iv. 9).

DELA'IAH [3 syl.] (הַרָּלֶיָדה and דְּלֶיָדה) = "Jehovah's freedman" — comp. ἀπελέυθερος Κυ-píou, 1 Cor. vii. 22; also the Phœnician name Δελαιαστάρτοs, quoted from Menander by Jonephus, Cont. Ap. i. 18, and the modern name Godfrey = Gottesfrey [?]; LXX. Dalate, Dalas: Dulaiau, Dulain), the name of several persons.

1. DELALAHU ('Adarral; [Ales. Daraia Dalaiau]); a priest in the time of David, leader of the twenty-third course of priests (1 Chr. xxiv. 18).

2. DELAIAH [Dadala; Vat. in Ezr. Aaxea, in Neh. Dalea: Duluia]. "Children of Delaiah' were among the people of uncertain pedigree who returned from Babylon with Zerubbabel (Ezr. ii. 80; Neh. vii. 62). In 1 Eadr. the name is LADAN.

3. DELAIAH [Dalaia; Vat. Dalaia]; son of Mehetabeel and father of Shemaiah (Neh. vi. 10).

4. DELAIAHU (Δαλαίαs and Γοδολίαs; [ver. 12 Alex. Daleas, FA. Dalas; ver. 25, Comp. Ald. FA.⁵ Dalaias: Dulaias]; son of Shemaiah, one

of the "princes" (") shout the court of Jehoiakim (Jer. xxxvi. 12, 25).

The name also occurs in the A. V. as DALAIAH

DELI'LAH (דְּלִילָה [pining with desire]: $\Delta \alpha \lambda_i \delta \dot{\alpha}$; [Vat. in ver. 13, $\Delta \alpha \lambda_i \delta \alpha$:] Joseph. $\Delta \alpha \lambda_i \lambda_{\eta}$: Dalila), a woman who dwelt in the valley of Sorek, beloved by Samson (Judg. xvi. 4-18). Her connection with Samson forms the third and last of those amatory adventures which in his history are so inextricably blended with the traft and prowess of a judge in Israel. She was bribed by the "lords of the Philistines" to win from Samson the secret of his strength, and the means of overcoming it. [SAMSON.]

It is not stated, either in Judges or in Josephus, whether she was an Israelite or a Philistine. Nor can this question be determined by reference to the geography of Sorek; since in the time of the Judges the frontier was shifting and indefinite. [SOREK.] The following considerations, however, supply presumptive evidence that she was a Phillatine:

1. Her occupation, which seems to have been that of a courtesan of the higher class, a kind of political Hetzera. The hetzeric and political view of her position is more decided in Josephus than in Judges. He calls her you'h $\epsilon \tau au \rho_1 \zeta o \mu \epsilon \nu \eta$, and associates her influence over Samson with $\pi \delta - \sigma s$ und *auvovala* (Ant. v. 8, § 11). He also states uore clearly her relation as a political agent to the ·lords of the Philistines " (יקר: Joseph. ol

a * Luke's name is coupled with that of Demas in of his grandest hymns on this association of the two

DEMAS

employing under their directions "liers in wait"

(בהאקן: דא לדבספסטי: insidiis ; cf. Josh. viii. 14; [Joseph.] στρατιωτών). On the other hand, Chrysostom and many of the Fathers have maintained that Delilah was married to Samson (so Milton, 227), a natural but uncritical attempt to save the morality of the Jewish champion. See Judg. xvi. 9, 18, as showing an exclusive command of her establishment inconsistent with the idea of matrimonial connection (Patrick, ad loc.). There seems to be little doubt that she was a courtesan; and her employment as a political emissary, together with the large sum which was offered for her services (1100 pieces of silver from each lord = 5500 shekels; cf. Judg. iii. 3), and the tact which is attributed to her in Judges, but more especially in Josephus. indicates a position not likely to be occupied by any Israelitish woman at that period of national depression.

2. The general tendency of the Scripture narrative: the sexual temptation represented as acting upon the Israelites from without (Num. xxv. 1, 6, xxxi. 15, 16).

3. The special case of Samson (Judg. xiv. 1, xvi. 1).

In Milton Delilah appears as a Philistine, and justifies herself to Samson on the ground of patriotism (Sams. Ag. 850, 980). T. E. B.

DELUGE. [NOAH.]

DE'LUS ($\Delta \hat{\eta} \lambda os$), mentioned in 1 Mace. xv 23, is the smallest of the islands called Cyclades in the Ægrean Sea. It was one of the chief seats of the worship of Apollo, and was celebrated as the birth-place of this god and of his sister Artemis (Diana). We learn from Josephus (Ant. xiv. 10, § 8) that Jews resided in this island, which may be accounted for by the fact, that after the fall of Corinth (B. C. 146) it became the centre of an extensive commerce. The sanctity of the spot and its consequent security, its festival which was a kind of fair, the excellence of its harbor, and its convenient situation on the highway from Italy and Greece to Asia, made it a favorite resort of merchants. So extensive was the commerce carried on in the island, that 10,000 slaves are said to have changed hands there in one day (Strab. xiv. p. 668). Delus is at present uninhabited, except by a few shepherds. (For details, see Dict. of Gr. A Rom. Geogr. s. v.)

DE'MAS ($\Delta \eta \mu \hat{a}_s$), most probably a contraction from $\Delta \eta \mu \eta \tau \rho \iota os$, or perhaps from $\Delta \eta \mu a \rho \chi os$, a companion of St. Paul (called by him his $\sigma v \nu e \rho \gamma \delta s$ in Philem. 24; see also Col. iv. 14) during his first imprisonment at Rome. At a later period (2 Tim. iv. 10) we find him mentioned as having deserted the Apostle through love of this present world, and gone to Thessalonica. This departure has been magnified by tradition into an apostasy from Chris-Δημάν, και Έρμογένην, τους άγαπήσαντας του ένταῦθα alŵra, καὶ καταλείψαντας την όδον τῆς $\dot{\alpha}\lambda\eta\theta e(\alpha s)$, which is by no means implied in the passage.a H. A.

Joi iv 14, and Philem. ver. 24. It is hardly neces-men with Paul's earlier captivity and the subsequent ary to remind the realer that Keble has founded one upostary of Demas (Christian Year: St. Labe). H.

These raol apyupoi were small models of the great temple of the Ephesian Artemis, with her statue, which it was customary to carry on journeys, and place on houses, as charms. Demetrius and his fellow craftsmen, in fear for their trade, raised a tumult against St. Paul and his missionary companions. H. A.

* The speech of Demetrius, by which he so much excited the Ephesian shrine-makers and through them the populace at large, was singularly adroit. He took care, in the first place, to show his fellowcraftsmen how the growth of this new sect affected their own personal interests (xix. 25), and then, in order to throw over this motive a better guise, appealed to their zeal for religion (vv. 26, 27). But the speaker relied mainly, as Calvin thinks, on the selfishness of his auditors: "Res ipsa clamat non tam pro aris ipsos quam pro focis pugnare, ut scilicet culinam habeant bene calentem " (In Acta Apost. xix. 23). The attempt to identify this Demetrius with the one next named on the supposition that he may have become a believer, is unwarranted by Scripture or history.

* DEMETRIUS (Δημήτριος) another person of this name, whom the Apostle mentions in 3 John, ver. 12, as the model of a Christian, to whom the truth itself, so faithfully exemplified by him, bore witness. This is the only notice of him. The relation between him and John is uncertain. He may have been the bearer of the letter to Gaius (ver. 1), and one of the missionaries (vv. 5, 6) whom the Apostle exhorts Gaius to forward on their journey. There is no contemporary history to illustrate the epistle, and these points are necessarily obscure.

DEMETRIUS I. (Anutroios), surnamed " The Saviour " (Zwrhp, in recognition of his services to the Babylonians), king of Syria, was the son of Seleucus Philopator, and grandson of Antiochus the Great. While still a boy he was sent by his father as a hostage to Rome (B. c. 175) in exchange for his uncle Antiochus Epiphanes. From his position. he was unable to offer any opposition to the usurpation of the Syrian throne by Antiochus IV.; but on the death of that monarch (B. c. 164) he claimed his liberty and the recognition of his claim by the Roman senate in preference to that of his cousin Antiochus V. His petition was refused from selfish policy (Polyb. xxxi. 12); and by the advice and assistance of Polybius, whose friendthip he had gained at Rome (Polyb. xxxi. 19; Just. xxxiv. 3), he left Italy secretly, and landed witl a small force at Tripolis in Phœnicia (2 Macc. xiv. 1; 1 Macc. vii. 1; Joseph. Ant. xii. 10, 1). The Syrians soon declared in his favor (B. C. 162), and Antiochus and his protector Lysias were put to death (1 Macc. vii. 2, 3; 2 Macc. xiv. 2). Having thus gained possession of the kingdom, Demetrius succeeded in securing the favor of the Romans (Polyb. xxxii. 4), and he turned his attention to the internal organization of his dominions. The Grecizing party were still powerful at Jerusalem, and he supported them by arms. In the first camusign his general Bacchides established Alcimus in the high-priesthood (1 Macc. vii. 5-20); but the success was not permanent. Alcimus was forced to take refuge a second time at the court of Demesrius, and Nicanor, who was commissioned to re-

DEMETRIUS

DEMETRIUS ($\Delta\eta\mu\eta\tau\rho_{105}$), a maker of ments by Judas Maccabseus (1 Macc. vii. 81, 32, silver shrines of Artenis at Ephesus (Acts xix. 24). 43-5), and fell on the field. Two other campaigns were undertaken against the Jews by Bacchides (B. C. 161; 158); but in the mean time Judas had completed a treaty with the Romans shortly before his death (B. C. 161), who forbade Demetrius to oppress the Jews (1 Macc. viii. 31). Not long after wards Demetrius further incurred the displeasure of the Romans by the expulsion of Ariarathes from Cappadocia (Polyb. xxxii. 20; Just. xxxv. 1); and he alienated the affection of his own subjects by his private excesses (Just. I. c.; cf. Polyb. xxxiii. 14). When his power was thus shaken (B. C. 152), Alexander Balas was brought forward, with the consent of the Roman senate, as a claimant to the throne, with the powerful support of Ptolemy Philometor, Attalus, and Ariarathes. Demetrius vainly endeavored to secure the services of Jonathan, who had succeeded his brother Judas as leader of the Jews, and now, from the recollection of his wrongs, warmly favored the cause of Alexander (1 Macc. x. 1-6). The rivals met in a decisive engagement (B. C. 150), and Demetrius, after displaying the greatest personal bravery, was defeated and slain (1 Macc. x. 48-50; Joseph. Ant. xiii. 2, § 4; Polyb. iii. 5). In addition to the very interesting fragments of Polybius the following references may be consulted : Just. xxxiv. 3, xxxv. 1; App. Syr. 46, 47, 67. B. F. W.

DEMETRIUS II. (Δημήτριος), "The Vic-torious" (Νικάτωρ), was the elder son of Demetrius Soter. He was sent by his father, together with his brother Antiochus, with a large treasure, to Cnidus (Just. xxxv. 2), when Alexander Balas laid claim to the throne of Syria. When he was grown up, the weakness and vices of Alexander furnished him with an opportunity of recovering his father's dominions. Accompanied by a force of Cretan mercenaries (Just. l. c.; cf. 1 Macc. x. 67), he made a descent on Syria (B. C. 148), and was received with general favor (1 Macc. z. 67 ff.). Jonathan, however, still supported the cause of Alexander, and defeated Apollonius, whom Demetrius had appointed governor of Cœle-Syria (1 Macc. x. 74-82). In spite of these hostilities Jonathan succeeded in gaining the favor of Deme-trius when he was established in the kingdom (1 Macc. xi. 23-27), and obtained from him an advautageous commutation of the royal dues, as d other concessions (1 Macc. xi. 32-37). In return for these favors the Jews rendered important services to Demetrius when Tryphon first claimed ti e king-dom for Antiochus VI., the son of Alexa der (1 Macc. xi. 42); but afterwards, being offende by his faithless ingratitude (1 Macc. xi. 53), they a soused the cause of the young pretender. Demostrins (B. C. 144; 1 Macc. xii. 28); but the où plyrran, and did dauporlar masd form Reachery to which Jonathan fell a victim (B. C. 143) again altered the policy of the Jews. Simon, the successor of Jonathan, obtained very favorable terms from Demetrius (B. C. 142); but shortly afterwards Demetrius was himself taken prisoner (B. C. 138) by Arsaces VI. (Mithridates), whose dominions he had invaded (1 Macc. xiv. 1-3; Just. xxxvi.). Mithridates treated his captive honorably, and gave him his daughter in marriage (App. Syr. 67); and after his death, though Demetrius made several attempts to escape, he still received kind treatment from his successor, Phraates. When Antiochus Sidetes, who had gained possession of the Syrian throne, invaded Parthia, Phraates employed Demetrius to effect a diversion. In this Demetrius succeeded, and when Antiochus fell in battle, he again took possession of the Syrian crown (B. C. 128). Not long afterwards a pretender, supported by Ptol. Physcon, appeared in the field against him, and after suffering a defeat he was assassinated, according to some by his wife (App. Syr. 68), while attempting to escape by sea (Just. XXXIX. 1; Jos. Ant. XIII. 9, 3). [CLEOPATRA.] B. F. W.

DEMON (LXX. daimorior; N. T. daimorior, s: rarely Saluwy: [deminium, demon]). Derivaion uncertain. Plato (Crat. i. p. 398) connects it with Satury, "intelligent," of which indeed the form Saluer is found in Archil. (B. C. 650); but it seems more probably derived from dalw, to "divide" or "assign," in which case it would be sim-ilar to Molpa). In sketching out the Scriptural doctrine as to the nature and existence of the demons, it seems natural, 1st, to consider the usage of the word dalucy in classical Greek; 2dly, to notice any modification of it in Jewish hands; and then, 3dly, to refer to the passages in the N. T. in which it is employed.

I. Its usage in classical Greek is various. In Homer, where the gods are but supernatural men. it is used interchangeably with $\theta \in \delta_S$; afterwards in Hesiod (Op. 121), when the idea of the gods had become more exalted and less familiar, the Saluoves are spoken of as intermediate beings, the messengers of the gods to men. This latter usage of the word evidently prevailed afterwards as the correct one, although in poetry, and even in the vague language of philosophy, 70 Saudrior was sometimes used as equivalent to 70 Belov for any superhuman nature. Plato (Symp. pp. 202, 203) fixes it distinctly in be more limited sense: $\pi a \nu \tau \delta \delta a \mu \delta \nu \iota \nu \sigma \tau \delta \delta t he place of use name of Jehovah, by His appointed$ lori θεοῦ καὶ θνητοῦ θεὸς ἀνθρώπφι messengers (Acts xix. 15); and look forward in

όμιλία και ή διάλεκτος θεοίς πρός ανθρώποις. Among them were numbered the spirits of good men, "made perfect" after death (Plat. Crat. p. 398, quotation from Hesiod). It was also believed that they became tutelary deities of individuals (to the purest form of which belief Socrates evidently referred in the doctrine of his daunovior); and hence $\delta a(\mu\omega\nu)$ was frequently used in the sense of the "fate" or "destiny" of a man (as in the tragedians constantly), thus recurring, it would seem, directly to its original derivation.

The notion of evil demons appears to have belonged to a later period, and to have been due both to Eastern influence and to the clearer separation of the good and evil in men's thoughts of the supernatural.^a They were supposed to include the spirits of evil men after death, and to be authors, not only of physical, but of moral evil.

II. In the LXX. the words daimor and daimorior are not found very frequently, but yet employed to render different Hebrew words; generally in reference to the idols of heathen worship; as in Ps. xcvi 5 [LXX. xcv. 5], for אלילים, the "empty," the "vanities," rendered xeipowoihrois, &c., it Lev. xix. 4, xxvi. 1; in Deut. xxxii. 17, for Dirtig "lords" (comp. 1 Cor. viii. 5); in Is. lxv. 11, for T2, Gad, the goddess of Fortune: sometimes in the sense of avenging or evil spirits, as in Ps. xci. 6, for $\Box \square \square \square$, "pestilence," *i. e.* evidently "the destroyer; " also in Is. xiii. 21, xxxiv. 14, for الإلات,

"hairy," and """, "dwellers in the desert," in the same sense in which the A. V. renders "satyrs."

In Josephus we find the word "demons" used always of evil spirits; in Bell. Jud. vii. 6, § 8, he defines them as tà Treumana Tŵr Tornpŵr, and speaks of their exorcism by fumigation (as in Tob. viii. 2, 3). See also Ant. vi. c. 8, § 2, viii. c. 2, § 5. Writing as he did with a constant view to the Gentiles, it is not likely that he would use the word in the other sense, as applied to heathen divinities.

By Philo the word appears to be used in a more general sense, as equivalent to "angels," and reerring to both good and evil.

The change, therefore, of sense in the Hellenistic usage is, first, the division of the good and evil demons, and the more general application of the word to the latter; secondly, the extension of the name to the heathen deities.

III. We now come to the use of the term in the N. T. In the Gospels generally, in James ii 19, and in Rev. xvi. 14, the demons are spoken of as spiritual beings, at ennity with God, and having power to afflict man, not only with disease, but, as is marked by the frequent epithet "unclean," with spiritual pollution also. In Acts xix. 12, 13, &c., they are exactly defined as $\tau \dot{a} \pi \nu \epsilon \dot{\nu} \mu a \tau a \tau \dot{a} \pi \nu \nu \eta \rho d$. They "believe" the power of God "and tremble" (James ii. 19); they recognize our Lord as the Son of (Jod (Matt. viii. 29; Luke iv. 41), and acknowiedge the power of His name, used in exorcism, in

· These who imputed lust and envy of man to their supernatural powers of good and evil, as everally rois were hardly likely to have a distinct view of opposed to each other.

terror to the judgment to come (Matt. viii. 29). The description is precisely that of a nature akin to the angelic [see ANGELS] in knowledge and powers, but with the emphatic addition of the idea of positive and active wickedness. Nothing is said either to support or to contradict the common Jewish belief, that in their ranks might be numbered the spirits of the wicked dead. In support of it are sometimes quoted the fact that the demoniacs sometimes haunted the tombs of the dead (Matt. viii. 28), and the supposed reference of the epithet $\Delta x d \theta a \rho ra$ to the ceremonial uncleanness of a dead body.

In 1 Cor. x. 20, 21, 1 Tim. iv. 1, and Rev. ix. 20, the word dampy is used of the objects of Gentile worship, and in the first passage opposed to the word $\Theta_{\epsilon \hat{\omega}}$ (with a reference to Deut. xxxii. 17). So also is it used by the Athenians in Acts xvii. 18. The same identification of the heathen deities with the evil spirits is found in the description of the danisel having Trevua Tibura, or $\pi \dot{\upsilon} \theta \omega r \sigma s$, at Philippi, and the exorcism of her as a demoniac by St. Paul (Acts xvi. 16); and it is to be noticed that in 1 Cor. x. 19, 20, the Apostle is arguing with those who declared an idol to be a pure nullity, and while he accepts the truth that it is so, yet declares that all which is offered to it is offered to a "demon." There can be no doubt then of its being a doctrine of Scripture, mysterious (though not à priori improbable) as it may be, that in idolatry the influence of the demons was at work and permitted by God to be effective within certain bounds. There are not a few passages of profane history on which this doctrine throws light; nor is it inconsistent with the existence of remnants of truth in idolatry, or with the possibility of its being, in the case of the ignorant, overruled by God to good.

Of the nature and origin of the demons, Scripture is all but silent. On one remarkable occasion, recorded by the first three Evangelists (Matt. xii. 24-30; Mark iii. 22-30; Luke xi. 14-26), our Lord distinctly identifies Satan with Beelzebub, Tŵ άρχοντι των δαιμονίων; and there is a similar though less distinct connection in Rev. xvi. 14. From these we gather certainly that the demons are agents of Satan in his work of evil, subject to the kingdom of darkness, and doubtless doomed to share in its condemnation; and we conclude probably (though attempts have been made to deny the inference) that they must be the same as "the angels of the devil" (Matt. xxv. 41; Kev. xii. 7, 9), "the principalities and powers" against whom we "wrestle" (Eph. vi. 12, &c.). As to the question of their fall, see SATAN; and on the method of their action on the souls of men, see DEMONIACS.

The language of Scripture, as to their existence and their cannity to man, has suffered the attacks of skepticism, merely on the ground that, in the vescarches of natural science, there are no traces of the supernatural, and that the fall of spirits, created doubtless in goodness, is to us inconceivable. Both facts are true, but the inference false. The very darkness in which natural science ends, when it approaches the relation of mind to matter, not only does not contradict, but rather implies the existence of supernatural influence. The mystery of the strigin of evil in God's creatures is inconceivable; but the difficulty in the case of the angels differs maly in degree from that of the existence of sin in man of which nevertheless as a fact we are only the anoth assured. The attempta made to erals in

the words of our Lord and the Apostles as a merv accommodation to the belief of the Jews are in com patible with the simple and direct attribution of personality to the demons, as much as to men or to God, and (if carried out in principle) must destroy the truth and honesty of Holy Scripture itself.

A. B.

On the use of the terms daluar and daludrur, in the Greek mythology, see Creuser, Religions de l'Antiquilé, trad. pir Guigniaut, tom. iii. pt. i., pp. 1-55, pt. iii. p. 873 ff.; Ukert, Über Dämonen, Hercen u. Genien, in the Abhandl. d. kön. söcka, Ges. d. Wiss., 1850, hist.-phil. Kl., pp. 137-219; Gerbard, Über Dämonen, u. s. w., in the Abhandl. de kön. Aknd. d. Wiss. zu Berlän, 1852, phil-him. Kl., pp. 237-266; Maury, Relig. de la Grèce on sique, i. 865 ff., iii. 426 ff.

On the Biblical representations, and on the later superstitions respecting the subject, see, in addition to the works referred to under ANGELS, DEMO-MLACS, MAGIC, and SATAN, J. F. Ditmar, De Darmonibus, etc. (two diss.) Helmst. 1719, 4to. " useful for the history of opinions " (Bretschn.); J. Oporin, Erläuterte Lehre d. Hebräer u. Christen von guten u. bösen Engeln, Hamb. 1736; J. G. Mayer, Historia Diaboli, s. Comm. de Diaboli malorumque Spirituum existentia, etc., 2d ed. Tüb. 1780, an elaborate work; J. F. Winzer, Commentat. I.-V. de Damonologia in saoris N. T. Libris proposita, Viteb. et Lips. 1812-23, 4to, " particularly valuable " (Bretschn.); Jahn, Was lekrt die Bibel vom Teufel, von der Dämonen, u. s. w., in the Nuchträge to his Theol. Werke, Tüb. 1821, pp. 61-251, maintaining that "demons," in distinction from fallen angels, are the spirits of wicked men decensed; H. A. Schott, Sententia recentive defensa de ils naturis qua in N. Walter Scott, The Ezistence of Exil Spirits proved, and their Agency illustrated, 2d ed., Lond. 1845 (Cong. Lect.); J. T. Berg, Abaddon and Mahanaim, or, Demons and Guardian Angels, Phila. 1856.

On the fault of the A. V. in rendering διάβολος, δαίμων, and δαιμόνιον indiscriminately by the same word (devil), see Campbell's Four Gospels, Prel. Diss. vi. pt. 1.

The first elaborate treatise by a Christian writer on this subject appears to be that of Michael Paellus (9th cent.?), Перl е́керуеías бащо́ных, De Operatione Damonum, reprinted from Gaulmin's edition (1615) in Migne's Patrol. Graeoa, vol. exxii., which also contains the so-called Testament of Solomon. One who has the curiosity to look into the speculations of the scholastic divines on angels and demons will find enough to satisfy him in Bonaventura's Expos. in Lib. ii. Sententiarum (Opp. tom. iv., Lugd. 1668), and in the Summa totius Theologia of Thomas Aquinas. For th: Rabbinical notions, besides the works of Eisenmenger and others referred to under ANGELS, see L. A. Cohen, Over de bouze geesten volgens het begrip der Rabbijnen, Gron. 1845; and J. F. Schrider, Satzungen u. Gebräuche des talm. rabb. Judenthums, Bremen, 1851, p. 385 ff. **A**.

but the difficulty in the case of the angels differs any in degree from that of the existence of sin in an of which nevertheless as a fact we are only the under the second seco

DEMONIACS

tension generally showing itself visibly in bodily | right as far as it goes, but imperfect, because of disease or mental derangement. The word daunovir is used in a nearly equivalent sense in classical Greek (as in Æsch. Choeph. 566; Sept. c. Theb. 1001, Eur. Phoen. 888, &c.), except that, as the idea of spirits distinctly evil and rebellious hardly existed, such possession was referred to the will of the gods or to the vague prevalence of an "A $\tau\eta$. Neither word is employed in this sense by the LXX., but in our Lord's time (as is seen, for example, constantly in Josephus) the belief in the possession of men by demons, who were either the souls of wicked men after death, or evil angels, was thoroughly established among all the Jews, with the exception of the Sadducees alone. With regard to the frequent mention of demoniacs in Scripture, three main opinions have been started.

I. That of Strauss and the mythical school, which makes the whole account merely symbolic, without basis of fact. The possession of the devils is, according to this idea, only a lively symbol of the prevalence of evil in the world, the casting out the devils by our Lord a corresponding symbol of his conquest over that evil power by his doctrine and his life. The notion stands or falls with the mythical theory as a whole: with regard to the special form of it, it is sufficient to remark the plain, simple, and prosaic relation of the facts as facts, which, whatever might be conceived as possible in highly poetic and avowedly figurative pas sages, would make their assertion here not a symbol or a figure, but a lie. It would be as reasonable to expect a myth or symbolic fable from Tacitus or Thucydides in their accounts of contemporary history.

II. The second theory is, that our Lord and the Evangelists, in referring to demoniacal possession, spoke only in accommodation to the general belief of the Jews, without any assertion as to its truth or its falsity. It is concluded that, since the symptoms of the affliction were frequently those of bodily disease (as dumbness, Matt. ix. 32; blindness, Matt. xii. 22; epilepsy, Mark ix. 17-27), or those seen in cases of ordinary insanity (as in Matt. viii. 28; Mark v. 1-5), since also the phrase "to have a devil" is constantly used in connection with, and as apparently equivalent to, "to be mad" (see John vii. 20, viii. 48, x. 20, and perhaps Matt. xi. 18; Luke vii. 33); and since, lastly, cases of demoniacal possession are not known to occur in our own days, therefore we must suppose that our Lord spoke, and the Evangelists wrote, in accordance with the belief of the time, and with a view to he clearly understood, especially by the sufferers themselves, but that the demoniacs were merely persons suffering under unusual diseases of body and mind.

With regard to this theory also, it must be remarked that it does not accord either with the general principles or with the particular language of Scripture. Accommodation is possible when, in things indifferent, language is used which, although scientifically or etymologically inaccurate, yet conreys a true impression, or when, in Lings not 'adifferent, a declaration of truth (1 Cor iii. 1, 2), w a moral law (Matt. xix. 8), is given, true or

DEMONIACS

the imperfect progress of its recipients. But certainly here the matter was not indifferent. The age was one of little faith and great superstition. its characteristic the acknowledgment of God as a distant Lawgiver, not an Inspirer of men's hearts. This superstition in things of far less moment was denounced by our Lord; can it be supposed that He would sanction, and the Evangelists be permitted to record forever, an idea in itself false, which has constantly been the very stronghold of superstition? Nor was the language used such as can be paralleled with mere conventional expression. There is no harm in our "speaking of certain forms of madness as lunacy, not thereby implying that we believe the moon to have or to have had any influence upen them; ... but if we began to describe the cure of such as the moon's ceasing to afflict them, or if a physician were solemnly to address the moon, bidding it abstain from injuring his patient, there would be here a passing over to quite a different region, . . . there would be that gulf between our thoughts and words in which the essence of a lie consists. Now Christ does everywhere speak such language as this." (Trench, On the Miracles, p. 153, where the whole question is most ably treated.) Nor is there, in the whole of the New Testament, the least indication that any "economy" of teaching was employed on account of the "hardness" of the Jews' 'hearts." Possession and its cure are recorded plainly and simply; demoniacs are frequently distinguished from those afflicted with bodily sickness (see Mark i. 32, xvi. 17, 18; Luke vi. 17, 18), even, it would seem, from the epileptic $(\sigma \epsilon \lambda \eta \nu) \alpha$ -(óµevoi, Matt. iv. 24); the same outward signs are sometimes referred to possession, sometimes merely to disease (comp. Matt. iv. 24, with xvii. 15; Matt. xii. 22, with Mark vii. 32, &c.); the demons are represented as speaking in their own persons with superhuman knowledge," and acknowledging our Lord to be, not as the Jews generally called him, son of David, but Son of God (Matt. viii. 29; Mark i. 24, v. 7; Luke iv. 41, &c.). All these things speak of a personal power of evil, and. if in any case they refer to what we might call mere disease, they at any rate tell us of something in it more than a morbid state of bodily organs or selfcaused derangement of mind. Nor does our Lord speak of demons as personal spirits of evil to the multitude alone, but in his secret conversations with his disciples, declaring the means and conditions by which power over them could be exercised (Matt: xvii. 21). Twice also He distinctly connects demoniacal possession with the power of the Evil One; once in Luke x. 18, to the seventy disciples, where He speaks of his power and theirs over demoniants as a "fall of Satan," and again in Matt. xii. 25-30, when He was accused of casting out demons through Beelzebub, and, instead of giving any hint that the possessed were not really under any direct and personal power of wil, He uses an argument, as to the division of Satan against himself, which, if possession be unreal, becomes inconclusive and almost insincere. Lastly, the single fact recorded of the entrance of tre demons at Gadara (Mark v. 10 14) into the herd of swine,^b and the effect which that entrance caused, is sufficient to overthrow the notion

a Compare also the cave of the damael with the pirit of divination (πνεύμαι πύθωνος) at Philippi; where also the power of the evil spirit is referred to ander the well known name of the supposed inspirafor w Delphi.

b It is almost needless to refer to the subterfuges of interpretation by which the force of this fact m evaded.

that our Lord and the Evangelists do not assert or | loss of the sufferer's reason or power of will; h.s imply any objective reality of possession. In the actions, his words, and almost his thoughts are conceive how the theory can be reconciled with any- xix. 15), till his personality seems to be destroyed, thing like truth of Scripture.

But besides this it must be added, that to say of a case that it is one of disease or insanity, gives no real explanation of it at all; it merely refers it to a class of cases which we know to exist, but gives no auswer to the further question, how did the discase or insanity arise? Even in disease, whenever the mind acts upon the body (as e. g. in nervous disorders, epilepsy, &c.) the mere derangement of the physical organs is not the whole cause of the evil; there is a deeper one lying in the mind. Insanity may indeed arise, in some cases, from the physical injury or derangement of those bodily organs through which the mind exercises its powers. but far oftener it appears to be due to metaphysical causes, acting upon and disordering the mind itself. In all cases where the evil lies not in the body but in the mind, to call it "only disease or insanity" is merely to state the fact of the disorder, and give up all explanation of its cause. It is an assumption, therefore, which requires proof, that, amidst the many inexplicable phenomena of mental and physical disease in our own days, there are none in which one gifted with "discernment of spirits" might see signs of what the Scripture calls "possemion."

The truth is, that here, as in many other instances, the Bible, without contradicting ordinary experience, yet advances to a region whither human science cannot follow. As generally it connects the existence of mental and bodily suffering in the world with the introduction of moral corruption by the Fall, and refers the power of moral evil to a spiritual and personal source; so also it asserts the existence of inferior spirits of evil, and it refers certain cases of bodily and mental disease to the influence which they are permitted to exercise directly over the soul and indirectly over the body. Inexplicable to us this influence certainly is, as all action of spirit on spirit is found to be; but no one can pronounce à priori whether it be impossible or improbable, and no one has a right to eviscerate the strong expressions of Scripture in order to reduce its declarations to a level with our own ignorance

III. We are led, therefore, to the ordinary and literal interpretation of these passages, that there are evil spirits [DEMON¹, subjects of the Evil ()ne, who, in the days of the Lord himself and his Apostles especially, were permitted by God to exercise a direct influence over the souls and bodies of certain men. This influence is clearly distinguished from the ordinary power of corruption and temptation wielded by Satan through the permis-sion of God. [SATAN.] Its relation to it, indeed, appears to be exactly that of a miracle to God's ordinary Providence, or of special prophetic inspiration to the ordinary gifts of the Holy Spirit. Both (that is) are actuated by the same general prinuples, and tend to the same general object; but the former is a special and direct manifestation of that which is worked out in the latter by a long sourse of indirect action. The distinguishing featuse of possession is the complete or incomplete

face of this mass of evidence it seems difficult to mastered by the evil spirit (Mark i. 24, v. 7; Acta or, if not destroyed, so overborne as to produce the consciousness of a twofold will within him, like that sometimes felt in a dream. In the ordinary temptations and assaults of Satan, the will itself yields consciously, and by yielding gradually assumes, without losing its apparent freedom of action, the characteristics of the Satanic nature. It is solicited, urged, and persuaded against the strivings of grace, but not overborne.

Still, however, possession is only the special and, as it were, miraculous form of the "law of sin in the members," the power of Satan over the heart itself, recognized by St. Paul as an indwelling and agonizing power (Rom. vii. 21-24). Nor can it be doubted that it was rendered possible in the first instance by the consent of the sufferer to temptation and to sin. That it would be most probable in those who yielded to sensual temptations may easily be conjectured from general observation of the tyranny of a habit of sensual indulgence.a The cases of the habitually lustful, the opium-eater, and the drunkard (especially when struggling in the last extremity of delirium tremens) bear, as has been often noticed, many marks very similar to those of the Scriptural possession. There is in them physical disease, but there is often something more. It is also to be noticed that the state of possession, although so awful in its wretched sense of demoniacal tyranny, yet, from the very fact of that consciousness, might be less hopeless and more capable of instant cure than the deliberate hardness of willful sin. The spirit might still retain marks of its original purity, although through the flesh and the demoniac power acting by the flesh it was enslaved. Here also the observation of the suddenness and completeness of conversion. seen in cases of sensualism, compared with the greater difficulty in cases of more refined and spiritual sin, tends to confirm the record of Scripture.

It was but natural that the power of evil should show itself in more open and direct hostility than ever, in the age of our Lord and his Apostles, when its time was short. It was natural also that it should take the special form of possession in an age of such unprecedented and brutal sensuality as that which preceded His coming, and continued till the leaven of Christianity was felt. Nor was it leas natural that it should have died away gradually before the great direct, and still greater indirect, influence of Christ's kingdom. Accordingly we find early fathers (as Just. Mart. Dial. c. Trypk. p. 311 b; Tertullian, Apol. 23, 87, 43) alluding to its existence as a common thing, mentioning the attempts of Jewish exorcism in the name of Jeho vah as occasionally successful (see Matt. xii. 27: Acts xix. 13), but especially dwelling on the power of Christian exorcism to cast it out from the country as a test of the truth of the gospel, and as one well-known benefit which it already conferred on the empire. By degrees the mention is less and less frequent, till the very idea is lost or perverted. Such is a brief sketch of the Scriptural notices of possession. That round the Jewish notion of it

John, writing mainly of the ministry in Judan, m tions none.

[.] It is to be noticed that almost all the cases of lementac possession are recorded as occurring among he rude and half-Gentile population of Galiles. St.

DEMONIACS

there grew up, in that noted age of superstition. many foolish and evil practices, and much superstition as to fumigations, &c. (comp. Tob. viii. 1-3; Joseph. Ast. viii. c. 2, § 5), of the "vagabond exorcists " (see Acts xix. 13) is obvious and would be inevitable. It is clear that Scripture does not in the least sanction or even condescend to notice such things; but it is certain that in the Old Testament (see Lev. xix. 31; 1 Sam. xxviii. 7, &c.; 2 K. xxi. 6, xxiii. 24, &c.) as well as in the New, it recognizes possession as a real and direct power of evil spirits upon the heart. A. B.

* It would seem impossible to deny the fact of demoniac possession, properly so called, without disparaging the inspiration of the Gospels and the integrity or intelligence of our Lord. That the sacred writers shared in the belief of their time is sufficiently shown above, and is as positively asserted by Strauss (Leben Jesu, § 91), and Meyer (Komment. Matt. iv. 24), as by Ellicott (Life of Christ, p. 179, Amer. ed.). Jesus enters fully and on all occasions into the same view. He discriminates between demoniacs and diseased persons (Matt. x. 8), addresses the demons (Matt. viii. 32; Luke iv. 35), commands them to be silent, to come out, and, in one instance (Mark ix. 25), no more to enter into the person; he argues with the Jews on that assumption (Matt. xii. 25); he gives his disciples power to cast out evil spirits (Luke ix. 1; Matt. x. 1, 8), and enters into their rejoicing over their success (Luke x. 18); and in his private conversation tells them of the conditions of that success (Matt. xvii. 21). It was as much his esoteric as his exoteric doctrine. A few additional suggestions may be in place. (1.) Whatever resemblances may be found in some particulars, yet in other respects the cases of demoniac possession mentioned in the N. T. stand clearly and entirely apart from all phenomena of the present day; e. g. in the supernatural knowledge exhibited by the demoniacs, and in such facts as occurred in connection with the herd of swine. (2.) We may discern a special reason for the abundant outbreak of this manifestation at that time, in its symbolic relation to Christ's work. He came to "destroy the works of the devil " (1 John iii. 8), and to resover the world from its bondage to Satan unto its allegiance to God. Hence, just as he expressed his sin-healing power by his miracles of bodily cure, and as his personal triumph over Satan was set forth by the temptations in the wilderness, so he symbolized his great spiritual victory over the prince of the power of the air, and the release of his captives, by casting out evil spirits from their outward and visible possession and control of human beings around him. He more than once hints at this significance; e. g. Matt. xii. 28, and especially Luke z. 17, 18. For this purpose in the divine sconomy, perhaps, were demoniac possessions permitted to such a remarkable extent at that time. (3.) Possession with devils, though always carefully tinguished from every kind of disease, was very sommonly accompanied by phenomena of disea aspecially such as belong to a nervous system shatwred by sin. (4.) This gives some support to the spinion expressed above, important in its bearings m the government of God, that demoniac possession was the result of moral delinquency; that the victim had at first, by a course of vicious indulgence, yielded himself up outwardly are, inwardly to the service of Satan, till he was at length given wer to the complete dominion of the master he had Dissertations.) In Germany, Semler appears to

For (5.) the evil spirits appear to have chosen taken entire control of the body and mind of the victim, so that while there was a remarkable play of double consciousness and personality, a sense of misery and some desire for deliverance, the subjection apparently was hopeless, except as deliverance was brought by Christ.

For the older literature of the subject, see Winer's Realw. art. Besessene. For a fuller illustration of the general views presented above, see Trench, On the Miracles, pp. 129-136; Olshansen's Commentary, on Matt. viii. 28; Alford's Greek Test. ibid.; Owen on the Demonology of the N. T., in the Bibl. Sucra, Jan. 1859; Stuart's Sketches of Angelology, in Robinson's Bibl. Sacra, 1843. For the theory that the possession was disease wrought by Satan, but only through the series of natural causes and laws, see Twesten's Doctrine respecting Angels, in the Bibl. Sacra, Feb. 1845. Some of the theological principles of the subject are well discussed by President Jesse Appleton, D. D. (three Lectures, in his Works, ii. 94-127, Andover, 1836). S. C. B.

• On so interesting a subject as the present, it may be well to give a brief sketch of the history of opinions, and a fuller view of the literature. The learned and pious Dr. Joseph Mede, in a discourse on John x. 20, first published in his Diatriba, Lond. 1642 (Works, ed. 1672, pp. 28-30) maintained that the demoniacs of the Gospels were madmen or epileptics; but though often referred to as a disbeliever in demoniacal possession, he expressly admits that their maladies may have been caused by evil spirits. In 1676 a volume entitled The Doctrine of Devils proved to be the Grand Apos tacy of these Later Times, etc., was published anonymously in London by a clergyman of the Church of England, who maintained that the demoniacs were insanc or diseased persons. The same view was presented in Holland by Benj. Daillon, a French refugee minister of learning and ability, in his Examen de l'oppression des Reformés en France, Amst. 1687, 2d ed. 1691 (see Haag's La France protestante, iv. 188), and by Dr. Balthasar Bekker, in his famous work, De bewoverde weereld, or " The World Bewitched,' published at Amsterdam in 1691-93 (see bk. ii. ch. xxvi.-xxx.). This book, widely circulated, and speedily translated into French, German, English, and Italian, though it called forth a host of writings in opposition, did much to shake the prevalent belief in witchcraft and kindred superstitions. Daillon's opinion was also supported by his brother Jacques, in a work entitled Daumorodoyla, or o Treatise of Spirits, Lond. 1723.

In 1737 Dr. A. A. Sykes published anonymously An Enquiry into the Meaning of the Demoniacks in the New Testament, which, opposing the com-mon view, gave rise to a considerable controversy, in which Twells, Whiston, Thos. Church, Gregory Sharpe, Thos. Hutchinson, Samuel Pegge, and others, took part. Dr. Richard Mead, in his Med. ica Sacra, Lond. 1749, likewise regarded the demoniacs as afflicted with natural diseases; and this view appears to have been prevalent among physiciuns, ancient and modern (see Wetstein on Matt. iv. 24). In 1⁻⁵⁸ Lardner published his four dis-courses On th⁻ Case of the Darmoniacs mentioned in the N. T., ably controverting the doctrine of real possession. (See his Works, i. 449-519, ed. 1829; comp. x. 265-275, Remarks on Dr. Ward's

588 DEMONIACS

nave been the first who vigorously assailed the pop- | art. Demoniace, in Kitto's Cycl. of Bibl. Litera ular opinion. in his Commentatio de Damoniacis ture. morum in N. T. fit mentio, Hal. 1760, 4th ed. reatly enlarged, 1779. This essay gave a stimulus to the discussion of the subject, and a number of dissertations were published on both sides of the question. Another controversy was excited in England by the appearance of the Rev. Hugh Farmer's Essay on the Demoniacs of the N. T. , Lond. 1775, a learned and elaborate treatise, which was replied to by W. Worthington, An Impartial Enquiry, etc. 1777. Farmer rejoined in Letters, etc. 1778. followed by Worthington's Farther Inquiry, 1779, and by John Fell's Doemonince : an Inquiry into the Heathen and Scripture Doctrine of Damons, 1779. Farmer's two volumes were translated into German, and his view found very general acceptance in that country, while in England it has been adopted by such men as Paley, Abp. Newcome, Dean Milman (Hist. of Christianity, i. 228 f., Amer. ed.), and very generally by Unitarians, Universalists, and theologians of a "rationalistic' tendency. The belief that the demoniacs of the N. T. were really possessed by evil spirits is, however, still held by the great majority of Christians, and many recent writers dispose of the phenomena of modern "Spiritualism" or "Spiritism" by referring them to the same source.

Besides the authors already mentioned, particularly Lardner, Farmer, and Winer, the following may be consulted, in opposition to the doctrine of real possession: Wetstein, note on Matt. iv. 24, in his Nov. Test. i. 279-284, transl. in the Christian Disciple, new series, v. 35-42; T. G. Timmermann, Diatribe antiquario-medica de Dæmoniacis Evangeliorum, Rintel. 1786, 4to; J. F. Winzer, De Dæmonologia in N. T. Libris (as cited above, art. DEMON); Hewlett's disquisition in his Comm. on Matt. iv. 24, reprinted in Critica Biblica, vol. iii., which also contains the essays of Townsend and Carlisle on the other side; the Rev. E. S. Gannett, On the Demoniacs of the N. T., in the Scriptural Interpreter (Boston), 1832, ii. 255-302; and the notes of Meyer, Norton, and Bleek (Synopt. Erkl. d. drei ersten Evang. i. 217 ff.) on Matt. iv. 24. See also Neander, Leben Jesu, 4º Aufl., p. 237 ff. (pp. 145-151, Amer. transl.), who holds a sort of intermediate view. See further the valuable articles, Theory and Phenomena of Possession amony the Hinduos, and Pythonic and Dai moniac Possessions in India and Judea, in the Dublin Univ. Mag. for March, Sept. and Oct. 1848, the two last reprinted in Littell's Living Age, xix. 385 ff., 443 ff.; compare also, for modern analogues of the demoniacs, Roberts's Oriental Illustrations of Scripture on Matt. xii. 27, and Thomon's Land and Book, i. 212, 213.

In favor of the doctrine of real possession, see, in addition to the treatises already referred to, articles by W. E. Taylor, in Kitto's Journal of Sac. Lit. July, 1849, and by "J. L. P." ibid. April. 1851; Fbrard, art. Dämonische, in Herzog's Real-Encykl. ii. 240-255, abridged translation by Prof. Reubelt in the Meth. Quar. Rev. for July, 1857; Samuel Hopkins, Demoniacal Possessions of the N. T., in the Amer. Presb. and Theol. Rev. Oct. 1865; and several of the works referred to under the art. DEMON. See also the cautious remarks of Dr. J. H. Morison, On Matthew, pp. 157-168. 1 fair summary of the arguments on both sides

DEPOSIT

DEM'OPHON (Δημοφών), a Syrian genera. in Palestine under Antiochus V. Fupator (2 Maco xii. 2).

DENA'RIUS (8nvdpior: denarius; A. V. penny," Matt. xviii. 28, xx. 2, 9, 13, xxii. 19, Mark vi. 37, xii. 15, xiv. 5; Luke vii. 41, x. 35, xx. 24; John vi. 7, xii. 5; Rev. vi. 6), a Roman silver coin, in the time of our Saviour and the Apostles. It took its name from its being first equal to ten "asses," a number afterwards in-creased to sixteen. The earliest specimens are of about the commencement of the 2d century B. C. From this time it was the principal silver coin of the commonwealth. It continued to hold the same position under the Empire until long after the close of the New Testament Canon. In the time of Augustus eighty-four denarii were struck from the pound of silver, which would make the standard weight about 60 grs. This Nero reduced by striking ninety-six from the pound, which would give a standard weight of about 52 grs., results confirmed by the coins of the periods, which are, however, not exactly true to the standard. The drachm of the Attic talent, which from the reign of Alexander until the Roman domination was the most important Greek standard, had, by gradual reduction, become equal to the denarius of Augustus, so that the two coins came to be regarded as identical.

Denarius of Tiberius.

Obv. TI CAESAR DIVI AVG F AVGVSTVS. Head of Tiberius, laureate, to the right (Matt. xxii. 19, 20, 21). Rev. PONTIF MAXIM. Seated female figure to the right.

Under the same emperor the Roman coin superseded the Greek, and many of the few cities which yet struck silver money took for it the form and general character of the denarius, and of its half, the quinarius. In Palestine, in the N. T. period. we learn from numismatic evidence that denari must have mainly formed the silver currency. It is therefore probable that in the N. T. by Spaxut and apyupion, both rendered in the A. V. " piece of silver," we are to understand the denarius [DRACHMA; SILVER, PIECE OF]. The Sidpaynor of the tribute (Matt. xvii. 24) was prohably in the time of our Saviour not a current coin, like the $\sigma \tau a \tau h \rho$ mentioned in the same passage (ver. 27). [MONEY.] From the parable of the laborers in the vineyard it would seem that a denarius was then the ordinary pay for a day's labor (Matt. xx. 2, 4, 7, 9, 10, 13). The term denarius surreus (Plin. xxxiv. 17, xxxvii. 3) is probably a corrupt designation for the aureus (nummus): in the N. T. the denarius proper is always intended. (See MONEY, and Dict. of Ant. art. Denarius.)

* DENS. [CAVES.]

is given in Jahn's Bibl. Archaology, Upham's θ_{hen} : depositem), the arrangement by which one translation, §§ 193-197, and by J. F. Denham, man kept at another's request the property of the

whiter, until demanded back, was one common to Il the nations of antiquity; and the dishonest dealing with such trusts is marked by profane writers with extreme reprobation (Herod. vi. 86; Juv. xiii. 199, &c.; Joseph. Ant. iv. 7, § 38; B. J. iv. 8, § 5, 7). Even our Saviour seems (Luke xvi. 12) to allude to conduct in such cases as a test of honesty.ª In later times, when no banking system was as yet devised, shrines were often used for the custody of treasure (2 Macc. iii. 10, 12, 15; Xenoph. Anub. v. 3, § 7; Cic. Legy. ii. 16; Plut. Lys. c. 18); but, especially among an agricultural people, the exigencies of war and other causes of absence must often have rendered such a deposit, especially as regards animals, an owner's only course. Nor was the custody of such property burdensome; for the use of it was no doubt, so far as that was consistent with its unimpaired restoration, allowed to the depositary, which office also no one was compelled to accept. The articles specified by the Mosaic law are (1) "money or stuff;" and (2) "an ass, or an ox, or a sheep, or any beast." The first case was viewed as only liable to loss by theft (probably for loss by accidental tire, &c., no compensation could be claimed), and the thief, if found, was to pay double, i. c., probably to compensate the owner's loss, and the unjust suspicion thrown on the depositary. If no theft could be proved, the depositary was to swear before the judges that he had not appropriated the article, and then was quit.^b In the second, if the beast were to "die or be hurt, or driven away, no man seeing it," - accidents to which beasts at pasture were easily liable, - the depositary was to purge himself by a similar oath. (Such oaths are proba bly alluded to Heb. vi. 16, as "an end of all strife.") In case, however, the animal were stolen, the depositary was liable to restitution, which probably was necessary to prevent collusive theft. If it were torn by a wild beast, some proof was easily producible, and, in that case, no restitution was due (Ex. xxii. 7-13). In case of a false oath so taken, the perjured person, besides making restitution, was to "add the fifth part more thereto,' to compensate the one injured, and to "bring a ram for a trespass-offering unto the Lord" (Lev. vi. 5, 6). In the book of Tobit (v. 8) a written acknowledgment of a deposit is mentioned (i. 14 (17), iv. 20 (21)). This, however, merely facilitated the proof of the fact of the original deposit, leaving the law untouched. The Mishna (Baba Metaia, c. iii., Shebuoth, v. 1), shows that the law of the oath of purgation in such cases continued in force among the later Jews. Michaelis on the laws of Moses, ch. 162, may be consulted on this sub-Н. Н. iect.

DEPUTY. The uniform rendering in the A. V. of $\lambda\nu\theta\delta\pi\alpha\tau\sigma\sigma$, "proconsul" (Acta xiii. 7, 8, 12, tix. 38). The English word is curious in itself, and to a certain extent appropriate, having been upplied formerly to the Lord Lieutenant of Ireland. Thus Shakespeare, Hen. VIII. iii. 2:

> "Plague of your policy, You sent me *deputy* for Ireland." W. A. W.

DER BE (Δέρβη, Acts xiv. 20, 21, xvi. 1: Eth $\Delta e \rho \beta a \hat{i} o s$, Acts xx. 4). The exact position of this town has not yet been ascertained, but its general situation is undoubted. It was in the eastern part of the great upland plain of LYCAUNIA. which stretches from ICONIUM eastward along the north side of the chain of Taurus. It must have been somewhere near the place where the pass called the Cilician Gates opened a way from the low plain of Cilicia to the table-land of the interior; and probably it was a stage upon the great road which passed this way. It appears that Cicero went through Derbe on his route from Cilicia to Iconium (Cic. ad Fam. xiii. 73). Such was St. Paul's route on his second missionary journey (Acts xv. 41, xvi. 1, 2), and probably also on the third (xviii. 23, xix. 1). In his first journey (xiv. 20, 21) he approached from the other side, namely, from Iconium, in consequence of persecution in that place and at LYSTRA. No incidents are recorded as having happened at Derbe [see infra]. In harmony with this, it is not mentioned in the enumeration of places 2 Tim. iii. 11. "In the apostolic history, Lystra and Derbe are commonly mentioned together: in the quotation from the epistle, Lystra is mentioned and not Derbe. The distinction is accurate; for St. Paul is here enumerating his persecutions" (Paley, Horas Paulina, in loc.).

Three sites have been assigned to Derbe. (1.) By Col. Leake (Asia Minor, p. 101) it was supposed to be at Bin-bir-Kilisseh, at the foot of the Karadagh, a remarkable volcanic mountain which rises from the Lycaonian plain; but this is almost certainly the site of Lystra. (2.) In Kiepert's Map, Derbe is marked further to the east, at a spot where there are ruins, and which is in the line of a Roman road. (3.) Hamilton (Researches in Asia Minor, ii. 313) and Texier (Asie Mineure, ii. 129, 130) are disposed to place it at Divle, a little to the S. W. of the last position and nearer to the roots of Taurus. In favor of this view there is the important fact that Steph. Byz. says that the place was sometimes called $\Delta \epsilon \lambda \beta \epsilon i a$, which in the Lycaonian language (see Acts xiv. 11) meant a "juniper tree." Moreover, he speaks of a Aiuty here, which (as Leake and the French translators of Strabo suggest) ought probably to be $\lambda(\mu\nu\eta)$; and if this is correct, the requisite condition is satisfied by the proximity of the Lake Ak Göl. Wieseler (Chronol. der Apost. Zeitalter, p. 24) takes the same view, though he makes too much of the possibility that St. Paul, on his second journey, trav elled by a minor pass to the W. of the Cilician Gates. It is difficult to say why Winer (Realw. s. v.) states that Derbe was "S. of Iconium, and S. E. of Lystra."

Strabo places Derbe at the edge of Isauria; but in the Symecclemus of Hierocles (Wesseling, p. 675, where the word is $\Delta \epsilon \rho \beta \alpha \mu$) it is placed, as in the Acts of the Apostles, in Lycaonia. The boundaries of these districts were not very exactly defined. The whole neighborhood, to the sea-coast of CILI-CIA, was notorious for robbery and piracy. Antipater, the friend of Cicero (ad Fam. xiii. 78) was the bandit chieftain of Lycaonia. Amyntas, king of Galatia (successor of Deiotarus III.), murdered

b The Hebrew expression N DR, Br. xxii. 8, rec leved in the A. V. " to see whether," is a common formula jurandi

Such is probably the meaning of the words $\delta v \tau \psi$ iAλοτρίφ πιστοί. It may also be remarked that in the parable of the talents, the "slothful servant " affects to consider himself as mere depositorius, in the words be igns: τb of (Matt. XXV. 25).

690

swn. Under the Roman provincial government Derbe was at first placed in a corner of CAPPADO-CIA: but other changes were subsequently made. [GALATIA.] Derbe does not seem to be mentioned in the Byzantine writers. Leake says (102) that its bishop was a suffragan of the metropolitan of Iconium. J. S. H.

* "No incidents " of an adverse character took place at Derbe. But Paul and Barnabas preached there and gained many disciples (µabyrebrarres inarous, Acts xiv. 21). On his second missionary tour Paul visited Derbe again (Acts xvi. 1), where no doubt was one of the churches to which he delivered "the decrees" relating to the treatment of converts from heathenism (Acts. xvi. 4). The Gaius who accompanied Paul on his journey from Greece as far as Asia, belonged to Derte (Acts xx. 4). Some make this place also the home of Timothy (Kuinoel, Olshausen, Neander); but the surer indication from exei in Acts xvi. 1 is that he belonged to Lystra. At the same time we learn from Acts xvi. 3 (see also ver. 2) that his family, and no doubt Timothy himself, were well known in many of the towns in that region, among which Derbe would naturally be included.

* DESCRY means in Judg. i. 23 (A. V.) to observe in a military sense, to reconnoitre: "And the house of Joseph sent to descry Bethel." The word occurs only in that passage in our Bible and is now obsolete in that signification. Eastwood and Wright (Bible Word-Book, p. 555) point out examples of the same usage in Shakespeare (Rich. 111. v. 8, and Lear, iv. 5). н.

DESERT, a word which is sparingly employed in the A. V. to translate four Hebrew terms, of which three are essentially different in signification. A "desert," in the sense which is ordinarily attached to the word, is a vast, burning, sandy a plain, alike destitute of trees and of water. This idea is probably derived from the deserts of Africa - that, for example, which is overlooked by the Pyramids, and with which many travellers are faniliar. But it should be distinctly understood that no such region as this is ever mentioned in the Bible as having any connection with the history of the Israelites, either their wanderings or their settled existence. With regard to the sand, the author of "Sinai and Palestine" has given the fullest correction to this popular error, and has shown that "sand is the exception and not the rule of the Arabian desert " of the Peninsula of Sinai (S. & P. pp. 8, 9, 64). And as to the other features of a desert, certainly the Peninsula of Sinai is no plain, but a region extremely variable in height. and diversified, even at this day, by onces and valleys of verdure and vegetation, and by frequent wells, which were all probably far more abundant in those earlier times than they now are. This bowever will be more appropriately discussed under the head of WILDERNEAS OF THE WANDERINGS. Here, it is simply necessary to show that the words rendered in the A. V by "desert," when used in the historical books, denoted definite localities; and that those localities do not answer to the common sonception of a "desert."

ABABAH (הקרבין). The root of this word,

Antupater and incorporated his dominions with his according to Gesenius (Thes. p. 1086), is Arad $\Box \Box \Sigma$, to be dried up as with heat; and it has been already shown that when used, as it invariably is in the historical and topographical records of the Bible, with the definite article, it means that very depressed and inclosed region - the deepest and the hottest chasm in the world - the sunken valley north and south of the Dead Sea, but more particularly the former. [ARABAH.] True, in the present depopulated and neglected state of Palestine the Jordan valley is as arid and desolate a region as can be met with, but it was not always so. (... the contrary, we have direct testimony to the fact that when the Israelites were flourishing, and later in the Roman times, the case was emphatically the reverse. Jericho, "the city of Palm trees," at the lower end of the valley, Bethshean at the upper and Phasaëlis in the centre, were famed both in Jewish and profane history for the luxuriance of their vegetation (Joseph. Ant. rviii. 2, § 2; rvi. 5, § 2; BETHSHEAN; JERICHO). When the abundant water-resources of the valley were properly husbanded and distributed, the tropical heat caused not barrenness, but tropical fertility, and here grew the balsam, the sugar-cane, and other plants requiring great heat, but also rich soil, for their culture. ARABAH in the sense of the Jordan Valley is translated by the word "desert" only in Ez. xlvii. 8. In a more general sense of waste, deserted country - a meaning easily suggested by the idea of excessive heat contained in the root - " Desert." as the rendering of Arabak, occurs in the prophets and poetical books; as Is. xxxv. 1, 6, xl. 8, xli. 19, li. 3; Jer. ii. 6, v. 6, xvii. 6, l. 12; but this general sense is never found in the historical books. In these, to repeat once more, Arabah always denotes the Jordan valley, the Gkor of the modern Arabs. Professor Stanley proposes to use "desert" as the translation of Arabak whenever it occurs, and though not exactly suitable, it is difficult to suggest a better word.

2. But if Arabah gives but little support to the ordinary conception of a "desert," still less does the other word which our translators have most frequently rendered by it. MIDBAR (כדָבָר) is accurately the " pasture ground," deriving its name from a root dabar (727), "to drive," significant of the pastoral custom of driving the flocks out to feed in the morning, and home again at night; and therein analogous to the German word trift, which is similarly derived from treiben, to drive. With regard to the Wilderness of the Wanderings - for which MIDBAR is almost invariably used. this signification is most appropriate; for we must never forget that the Israelites had flocks and herds with them during the whole of their passage to the Promised Land. They had them when they left Egypt (Ex. x. 26, xii. 88), they had them at Hazeroth, the middle point of the wanderings (Num. xi. 22), and some of the tribes possess them in large numbers immediately before the transit of the Jordan (Num. xxxii. 1). Midbar is not often rendered by "desert" in the A. V. Its usual and certainly more appropriate translation is " wilderness," a word in which the idea of vegetation is present. In speaking of the Wilderness of the Wanderings the word "desert" occurs as the rendering of Midber, in Ex. iii. 1, v. 3, xiz. 9 Num, xxxiii, 15, 16; and in more than one of

< "The sea of sand." See Colaridge's parable on Hystes and Mysticiam (Aids to Ref. Conclusion).

tes it is evidently employed for the sake of tions in 1 Macc. or in Josephus. Ewald conjectsuphony merely.

Midbar is most frequently used for those tracts of waste land which lie beyond the cultivated ground in the immediate neighborhood of the towns and villages of Palestine, and which are a very familiar feature to the traveller in that country. In spring these tracts are covered with a rich green verdure of turf, and small shrubs and herbs of various kinds. But at the end of summer the herbage withers, the turf dries up and is powdered thick with the dust of the chalky soil, and the whole has certainly a most dreary aspect. An example of this is furnished by the hills through which the path from Bethany to Jericho pursues its winding descent. In the spring so abundant is the pasturage of these hills, that they are the resort of the flocks from Jerusalem on the one hand and Jericho on the other, and even from the Arabs on the other side of the Jordan. And even in the month of September --- when the writer made this journey - though the turf was only visible on close inspection, more than one large flock of goats and sheep was browsing, scattered over the slopes, or stretched out in a long even line like a regiment of soldiers." A striking example of the same thing, and of the manner in which this waste pasture land gradually melts into the cultivated fields, is seen in making one's way up through the mountains of Benjamin, due west, from Jericho to Mukhmas or Jeba. These Midbars seem to have borne the name of the town to which they were most contiguous; for example, Beth-aven (in the region last referred to); Ziph, Maon, and Paran, in the south of Judah; Gibeon, Jeruel, &c., &c.

In the poetical books "desert" is found as the translation of Midbar in Deut. xxxii. 10; Job xxiv. 5; Is. xxi. 1; Jer. xxv. 24.

3. Снав'ван [rather Сновван] (ПС). This word is perhaps related to Arabah, with the substitution of one guttural for another; at any rate it appears to have the same force, of dryness, and thence of desolation. It does not occur in any historical passages. It is rendered "desert" in Ps. cii. 6; Is. xlviii. 21; Ez. xiii. 4. The term commonly employed for it in the A. V. is "waste places " or " desolation."

4. JESHIMON (ישומרן [desert, waste]. This word in the historical books is used with the definite article, apparently to denote the waste tracts on both sides of the Dead Sea. In all these cases it is treated as a proper name in the A. V. [JKSHIMON; BETH-JESHIMOTH.] Without the article it occurs in a few passages of poetry; in the following of which it is rendered "desert:" Ps. lxxviii. 40; cvi. 14; Is. xliii. 19, 20.

* DESIRE in 2 Chr. xxi. 20 is used in the A. V. in the sense of the Latin desiderare, "to feel the loss of," " to regret." " Jehoram reigned in Jerusalem eight years, and departed without being desired."

DES'SAÜ [3 syl.] (Δεσσαού; Alex. Λεσσαου Dessu), a village (not "town;" κώμη, castellum, st which Nicanor's army was once encamped during nis campaign with Judas (2 Macc. xiv. 16). There a no mention of it in the account of these transac-

a This practice is not peculiar to Palestine. Mr. diskesley observed it in Algeria ; and gives the reason or it, panely, a more systematic, and therefore com-

ures that it may have been Adasa (Gesch. iv. 368, note).

DEUTEL [2 syl] (דעראל [calling on God, Ges.; El is knowing, Fürst]: [Rom.] Vat. and Alex. Paryouthλ: Duel), father of Eliasaph, the "captain" (NUD) of the tribe of Gad at the

time of the numbering of the people at Sinai (Num. i. 14, vii. 42, 47, x. 20). The same man is mentioned again in ii. 14, but here the name appears as Reuel, owing to an interchange of the two very

similar Hebrew letters 7 and 7. In this latter passage the Samaritan, Arabic and Vulg. retain. the D; the LXX., as in the other places, has R. [REUEL.] Which of the two was really his name we have no means of deciding.

DEUTERONOMY (הַדְּכָרִים, or קרים, so called from the first words of the book; Δευτερονόμιον, as being a repetition of the Law; cuteronomium: called also by the later Jews

מפר הוכחות and בישנה הוכה).

A. Contents. The Book consists chiefly of three discourses delivered by Moses shortly before his death. They were spoken to all Israel in the plains of Moab on the eastern side of the Jordan (i. 1), in the eleventh month of the last year of their wanderings, the fortieth year after their exodus from Egypt (i. 3).

Subjoined to these discourses are the Song of Moses, the Blessing of Moses, and the story of his death.

I. The first discourse (i. 1-iv. 40). After a brief historical introduction, the speaker recapitulates the chief events of the last 40 years in the wilderness, and especially those events which had the most immediate bearing on the entry of the people into the promised land. He enumerates the contests in which they had been engaged with the various tribes who came in their way, and in which their success had always depended upon their obrdience: and reminds them of the exclusion from the promised land, first of the former generativen, because they had been disobedient in the matter of the spies, and next of himself, with whom the Lord was wroth for their sakes (iii. 26). On the appeal to the witness of this past history is then based an earnest and powerful exhortation to obedience; and especially a warning against idolatry as that which had brought God's judgment upon them in times past (iv. 3), and would bring yes sorer punishment in the future (iv. 26-28). this discourse is appended a brief notice of the severing of the three cities of refrige on the cast side of the Jordan (iv. 41-43).

II. The second discourse is introduced like the first by an explanation of the circumstances under which it was delivered (iv. 44-49). It extends from chap. v. 1-xxvi. 19, and contains a recapitulation with some modifications and additions, of the Law already given on Mount Sinai. Yet it is not bare recapitulation, or naked enactment, but every word shows the neart of the lawgiver full at once of zen for God and of the most fervent desire for the wel-

plets consumption of the scanty herbags. (Free Montas in Algeria, p 308.)

592 DEUTERONOMY

are of his nation. It is the Father no less than | the Legislator who speaks. And whilst obedience and life are throughout bound up together, it is the obedience of a loving heart, not a service of formal constraint which is the burden of his exhortations. The following are the principal heads of discourse: (a.) He begins with that which formed the basis of the whole Mosaic code, - the Ten Commandments, --- and impressively repeats the circumstances under which they were given (v. 1-vi. 3). (b.) Then follows an exposition of the spirit of the First Table. The love of Jehovah who has done so great things for them (vi.), and the utter uprooting of all idol-worship (vii.) are the points chiefly insisted upon. But they are also reminded that if idolatry be a snare on the one hand, so is self-righteousness on the other (viii. 10 ff., x.), and therefore lest they should be lifted up, the speaker enters at length on the history of their past rebellions (ix. 7, 22-24), and especially of their ain in the matter of the golden calf (ix. 9-21). The true nature of obedience is again emphatically urged (x. 12-xi. 32), and the great motives to obedience set forth in God's love and mercy to them as a people (x. 15, 21, 22), as also his signal punishment of the rebellious (xi. 3-6). The blessing and the curse (xi. 26-32) are further detailed. (c.) From the general spirit in which the Law should be observed, Moses passes on to the several enactments. Even these are introduced by a solemn charge to the people to destroy all objects of idolatrous worship in the land (xii. 1-3). They are upon the whole arranged systematically. We have (1) first the laws touching religion (xii.-xvi. 17); (2) then those which are to regulate the conduct of the government and the executive (xvi. 18-xxi. 23); and (3) lastly those which concern the private and social life of the people (xxii. 1-xxvi. 19). The whole are framed with express reference to the future occupation of the land of Canaan.

(1.) There is to be but one sanctuary where all offerings are to be offered. Flesh may be eaten anywhere, but sacrifices may only be slain in "the place which the Lord thy God shall choose" (zii. 5-32). All idol prophets, all enticers to idolatry from among themselves, even whole cities, if idolatrous practices to be eschewed (xiv. 1, 2). Next come regulations respecting clean and unclean animals, tithe, the year of release and the three feasts of the Passover, of Weeks, and of Tabernacles (xiv. 3-xvi. 17).

(2.) The laws affecting public personages and defining the authority of the Judges (xvi. 18-20) and the Priests (xvii. 8-13), the way of proceeding in courts of justice (xvii. 1-13); the law of the King (xvii. 14-20), of the Priests and Levites and Prophets (xviii.); of the cities of refuge and of sitnesses (xix.). The order is not very exact, but on the whole the section xvi. 18-xix. 21 is judicial in its character. The passage xvi. 21-xvii. 1, seems strangely out of place. Baumgarten (Comm. m loc.) tries to account for it on the ground of the close connection which must subsist between the true worship of God and righteous rule and judgment. But who does not feel that this is said with more ingenuity than truth?

Next come the laws of war (xx.), both as waged (a) generally with other nations, and (b) especially with the inhabitants of Canaan (ver. 17).

(3.) Laws touching domestic life and the relation originally formed the conclusion of the book of a soan to usan (xxi. 15-xxvi. 19). So Ewald Numbers, and that the Deuteronomist [PENTA

DEUTERONOMY

divides, assigning the former part of chap. xxi. te the previous section. Hävernick on the other hand includes it in the present. The fact is, that ve 10-14 belong to the laws of war which are treated of in chap. xx., whereas 1-9 seem more naturally to come under the matters discussed in this section. It begins with the relations of the family, passes on to those of the friend and neighbor, and then touches on the general principles of justice and charity by which men should be actuated (xxiv. 16-22). It concludes with the solemn confession which every Israelite is to make when he offers the first fruits, and which reminds him of what he is as a member of the theoracy, as one in covenant with Jehovah and greatly blessed by Jehovah.

Finally, the whole long discourse (v. 1-xxvi. 19) is wound up by a brief but powerful appeal (16-19), which reminds us of the words with which it opened. It will be observed that no pains are taken here, or indeed generally in the Mosaic legislation, to keep the several portions of the law, considered as moral, ritual, and ceremonial, apart from each other by any clearly marked line. But there is in this discourse a very manifest gradual descent from the higher ground to the lower. The speaker begins by setting forth Jehovah himself as the great object of love and worship, thence he passes (1) to the Religious, (2) to the Political, and (3) to the Social economy of his people.

III. In the third discourse (xxvii. 1-xxx. 20) the Elders of Israel are associated with Moses. The people are commanded to set up stones upon Mount Ebal, and on them to write "all the words of this law." Then follow the several curses to be pronounced by the Levites on Ebal (xxvii. 14-26), and the blessings on Gerizim (xxviii. 1-14). How terrible will be the punishment of any neglect of this law, is further portraved in the vivid words of a prophecy but too fearfully verified in the subsequent history of the people. The subject of this discourse is briefly "The Blessing and the Curse."

IV. The delivery of the Law as written by Moses (for its still further preservation) to the custody of the Levites, and a charge to the people to hear it read once every seven years (xxxi): the Song of Moses spoken in the cars of the people (xxxi 30xxxii.41): and the blessing of the twelve tribes (xxxii).

V. The Book closes (xxxiv.) with an account of the death of Moses, which is first announced to him in xxxii. 48-59. On the authorship of the last chapter we shall speak below.

B. Relation of Deuteronomy to the preceding books. It has been an opinion very generally entertained by the more modern critics, as well as by the earlier, that the book of Deuteronomy forms a complete whole in itself, and that it was appended to the other books as a later addition. Only chapters xxxii., xxxiii., xxxiv., have been in whole or in part called in question by De Wette, Ewald, and Von Lengerke. De Wette thinks that xxxii. and xxxiii. have been borrowed from other sources, and that XXXIV. is the work of the Elohist [PENTATEUCH]. Ewald also supposes xxxii. to have been borrowed from another writer, who lived, however (in accordance with his theory, which we shall notice lower down), after Solomon. On the other hand, he considers xxxiii. to be later, whilst Bleek (Repert. i. 25 and Tuch (Gen. p. 556) decide that it is Elohistic. Some of these critics imagine that these chapters originally formed the conclusion of the book of

DEUTERONOMY

THUCH] tore them away from their proper position | request; Moses refers it to God, who then gives 'o in order the better to incorporate his own work it his sanction. In the historical book of Numbers with the rest of the Pentateuch, and to give it a the divine command only is mentioned. Here, fitting conclusion. Gesenius and his followers are where the lawgiver deals so largely with the feelings of opinion that the whole book as it stands at and conduct of the people themselves, he reminds present is by the same hand. But it is a question of some interest and importance whether the book of Deuteronomy should be assigned to the author, or one of the authors, of the former portions of the Pentateuch, or whether, it is a distinct and independent work. The more conservative critics of the school of Hengstenberg contend that Deuteronomy forms an integral part of the Pentateuch, which is throughout to be ascribed to Moses. Others, as Stähelin and Delitzsch, have given reasons for believing that it was written by the Jehovist; whilst others again, as Ewald and De Wette, are in favor of a different author.

The chief grounds on which the last opinion rests are the many variations and additions to be found in Deuteronomy, both in the historical and legal portions, as well as the observable difference of style and phraseology. It is necessary, therefore, before we come to consider more directly the question of authorship, to take into account these alleged peculiarities; and it may be well to enumerate the principal discrepancies, additions, &c., as given by De Wette in the last edition of his Einleitung (many of his former objections he afterwards abandoned), and to subjoin the replies and explanations which they have called forth.

I. Discrepancies. - The most important discrepancies alleged to exist between the historical portions of Deuteronomy and the earlier books are the following -

(1.) The appointment of judges (i. 6-18) is at variance with the account in Ex. xviii. It is referred to a different time, being placed after the departure of the people from Horeb (ver. 6), whereas in Exodus it is said to have occurred during their sucampment before the mount (Ex. xviii. 5). The circumstances are different, and apparently it is mixed up with the choosing of the seventy elders (Num. xi. 11-17). To this it has been answered, that although Deut. i. 6 mentions the departure from Sinai, yet Deut. i. 9-17 refers evidently to what took place *during* the abode there, as is shown by comparing the expression "at that time," ver. 9, with the same expression ver. 18. The speaker, as is not unnatural in animated discourse, checks bimself and goes back to take notice of an important

ircumstance prior to one which he has already ...entioned. This is manifest, because ver. 19 is so carly resumptive of ver. 6. Again, there is no force in the objection that Jethro's counsel is here samed over in silence. When making allusion to

well-known historical fact, it is unnecessary for he speaker to enter into details. This at most is n omission, not a contradiction. Lastly, the story in Exodus is perfectly distinct from that in Num. xi., and there is no confusion of the two here. Nothing is said of the institution of the seventy in Dent., probably because the office was only temporary, and if it did not cease before the death of Moses, was not intended to be perpetuated in the promised land. (So in substance Ranke, v. Lengerke, Hengst., Hävern., Stähelin.)

(2.) Chap. i. 22 is at variance with Num. xiii. 2. because here Moses is said to have sent the spice into Canaan at the suggestion of the people, whereas there God is said to have commanded the measure. the return route.) Various attempts have been The explanation is obvious. The people make the unade to reconcile these accounts. The explanation

them both that the request originated with themselves, and also of the circumstances out of which that request sprang (vv. 20, 21). These are not mentioned in the history. The objection, it may be remarked, is precisely of the same kind as that which in the N. T. is urged against the reconciliation of Gal. ii. 2 with Acts xv. 2, 3. Both admit of a similar explanation.

(3.) Chap. i. 44, "And the Amorites which dwelt in that mountain," &c., whereas in the story of the same event, Num. xiv. 43-45, Amalekites are mentioned. Answer: in this latter passage not only Amalekites, but Canaanites, are said to have come down against the Israelites. The Amorites stand here not for "Amalekites," but for "Canaanites," as being the most powerful of all the Canaanitish tribes (cf. Gen. xv. 16; Deut. i. 7); and the Amalekites are not named, but hinted at, when it is said, "they destroyed you in Seir," where, according to 1 Chr. iv. 42, they dwelt (so Hengst. iii. 421).

(4.) Chap. ii. 2-8, confused and at variance with Num. xx. 14-21, and xxi. 4. In the former we read (ver. 4), "Ye are to pass through the coast of your brethren, the children of Esau." In the latter (ver. 20), "And he said, Thou shalt not go through. And Edom came out against him," &c. But, according to Deut., that part of the Edomite territory only was traversed which lay about Elath and Ezion-geber. In this exposed part of their territory any attempt to prevent the passage of the Israelites would have been usekss, whereas at Kadesh, where, according to Numbers, the opposition was offered, the rocky nature of the country was in favor of the Edomites. (So Hengst. iii. 283 ff., who is followed by Winer, i. 293, note 8.) To this we may add, that in Deut. ii. 8, when it is said, "we passed by from our brethren the children of Esau . . . through the way of the plain fron-Elath," the failure of an attempt to pass elsewhere is implied. Again, according to Deut., the Israelites purchased food and water of the Edomites and Moabites (vv. 6, 28), which, it is said, contradicts the story in Num. xx. 19, 20. But in both accounts the Israelites offer to pay for what they have (cf. Deut. ii. 6 with Num. xx. 19). And if in Deut. xxiii. 4 there seems to be a contradiction to Deut. ii. 29, with regard to the conduct of the Moabites, it may be removed by observing (with Hengst. iii. 286) that the unfriendliness of the Moabites in not coming out to meet the Israelites with bread and water was the very reason why the latter were obliged to buy provisions.

(5.) More perplexing is the difference in the account of the encampments of the Israelites, as given Deut. x. 6, 7, compared with Num. xx. 23, xxxiii. 30 and 37. In Deut. it is said that the order of encampment was, (1) Bene-jaakan, (2) Mosera (where Aaron dies), (8) Gudgodah, (4) Jot Mosera (where Aaron u.c.), (b) (budgets, (c)) bath. In Numbers it is, (1) Moseroth, (2) Bene-tuber (2) Howharddoad (4) Jotbath. Theu fol low the stations Ebronah, Ezion-geber, Kadesh, and Mount Hor, and it is at this last that Aaron dies. (It is remarkable here that no account is given of the stations between Exion-geber and Kadesh on

694 DEUTEBONOMY

given by Kurts (Atlas sur Gesch. d. A. B. 20) is | xxxv. 14 and Deut. iv. 41; of one particular pl on the whole the most satisfactory. He says: "In for the solemn worship of God, where all offerings the first month of the fortieth year the whole congregation comes a second time to the wilderness of Zin, which is Kadesh (Num. xxxiii, 36). On the down-route to Ezion-geber they had encamped at the several stations Moseroth (or Mosera), Bene-Jaakan, Chor-hagidgad, and Jotbath. But now again departing from Kadesh, they go to Mount Hor, ' in the edge of the land of Edom' (ver. 37, 38), or to Mosera (Deut. x. 6, 7), this last being in the desert at the foot of the mountain. Bene-Jaakan, Gudgodah, and Jotbath were also visited about this time, i. e. a second time, after the second halt at Kadesh." This seems a not improbable explanation, and our knowledge of the topography of the desert is so inaccurate that we can hardly hope for a better. More may be seen in Winer, art. Wüste.

(6.) But this is not so much a discrepance as a peculiarity of the writer: in Deut. the usual name for the mountain on which the law was given is Horeb, only once (xxxiii. 2) Sinai; whereas in the other books Sinai is far more common than Horeb. The answer given is, that Horeb was the general name of the whole mountain-range; Sinai, the particular mountain on which the law was delivered; and that Horeb, the more general and well-known name, was employed in accordance with the rhetorical style of this book, in order to bring qui th contrast between the Sinaitic giving of the law, and the giving of the law in the land of Moab (Deut. i. 5, xxix. 1). So Keil. Of this last explanation it is not too much to say that it is neither ingenious nor satisfactory.

It must be remembered, with regard to all the answers above given, that so far as they reconcile alleged contradictions, they tend to establish the veracity of the writers, but they by no means prove that the writer of the book of Deuteronomy is no other than the writer of the earlier books. So far indeed there is nothing to decide one way or the other. The additions both to the historical and legal sections are in this respect of far more importance, and the principal of them we shall here enumerate.

II. Additions. - These are to be found both in he History and in the Law.

1. In the History. (4.) The command of God to leave Horeb, Deut. i. 6, 7, not mentioned Num. x. 11. The repentance of the Israelites, Deut. i. 15, omitted Num. xiv. 45. The intercession of Moses in behalf of Aaron, Deut. ix. 20, of which uothing is said Ex. xxxii., xxxiii. These are so slight, however, that, as Keil suggests, they might have been passed over very naturally in the earlier hooks, supposing both accounts to be by the same hand. But of more note are: (b.) The command not to fight with the Moshites and Ammonites, Deut. ii. 9, 19, or with the Edomites, but to buy of them food and water, ii. 4-8. The valuable historical notices which are given respecting the earlier inhabitants of the countries of Moab and Ammon and of Mount Seir, ii. 10-12, 20-23; the sixty fortified cities of Bashan, iii. 4, the king of the country who was "of the remnant of giants," iii. 11; the different names of Hermon, iii. 9; the wilderness of Kedemoth, ii. 26; and the more detailed account of the attack of the Amalekites, xxv. 17, 18, compared with Ex. xvii. 8.

2. In the Law. rLs appointment of the cities of refuge, Deut. xix. 7-9, as compared with Num.

DEUTER()NOMY

tithes, &c., are to be brought, Deut. xii. 5, de. whilst the restriction with regard to the slaying of animals only at the door of the tabernacle of the congregation (Lev. xvii. 3, 4) is done away, 15, 20 21; the regulations respecting tithes to be brought with the sacrifices and burnt-offerings to the ap pointed place, Deut. xii. 6, 11, 17, xiv. 22, &c., xxvi. 12; concerning false prophets and seducers to idolatry and those that hearken unto them, xiii.; concerning the king and the manner of the kingdom, xvii. 14, &c. ; the prophets, xviii. 15, &c. ; was and military service, xx.; the expiation of secret murder; the law of female captives; of first-born sons by a double marriage; of disobedient sons; of those who suffer death by hanging, xxi.; the laws in xxii. 5-8, 13-21; of divorce, xxiv. 1, and various lesser enactments, xxiii. and xxv.; the form of thanksgiving in offering the first-fruits, xxvi.; the command to write the law upon stones, xxvii., and to read it before all Israel at the Feast of Tabernacles, xxxi. 10-13.

Many others are rather extensions or modifications of, than additions to, existing laws, as for instance the law of the Hebrew slave, Deut. xv. 12 tc., compared with Ex. xxi. 2, de. See also the uller directions in Deut. xv. 19-93, xxvi. 1-11, as compared with the briefer notices, Ex. xiii. 12. xxiii. 19.

C. Author. 1. It is generally agreed that by far the greater portion of the book is the work of one author. The only parts which have been questioned as possible interpolations are, according to De Wette, iv. 41-8, x. 6-9, xxxii., and xxxiiii. Internal evidence indeed is strongly decisive that this booles the Tentateuch was not the work of a compiler.

2. It cannot be dealed that the style of Deuteronomy is very different from that of the other four books of the Pentsteuch. It is more flowing, more rhetorical, more sustained. The rhythm is grand, and the diction more akin to the sublimer pas of the prophets, than to the sober prose of the historians

3. Who then was the author? On this point the following principal hypotheses have been maintained : -

(1.) The old traditional view that this book, like the other books of the Pentateuch, is the work of Moses himself. Of the later critics Hengstenberg, Hävernick, Ranke, and others, have maintained this view. Moses Stuart writes: " Deuteronomy appears to my mind, as it did to that of Eichborn and Herder, as the earnest outpourings and admonitions of a heart which felt the deepest interest in the welfare of the Jewish nation, and which realized that it must soon bid farewell to them . Instead of bearing upon its face, as is alleged by some, evidences of another authorship than that of Moses, I must regard this book as being so deeply fraught with holy and patriotic feeling, as to couvince any unprejudiced reader who is competent to judge of its style, that it cannot, with any tolerable degree of probability, be attributed to any pretender to legislation, or to any mere imitato of the great legislator. Such a glow as runs through all this book it is in vain to seek for in any artificial or supposititious composition " (list, of the 0. T. Canon, § 3).

In support of this opinion it is said: (a) That supposing the whole Pentateuch to have been with

DEUTEBONOMY

by Moses, the change in style is easily accounted for when we remember that the last book is hortatory in its character, that it consists chiefly of orations, and that these were delivered under very peculiar circumstances. (b.) That the usus loquendi is not only generally in accordance with that of the earlier books, and that as well in their Elohistic as in their Jehovistic portions, but that there are certain peculiar forms of expression common only to these five books. (e ' That the alleged discrepancies in matters of fact between this and the earlier books may all be reconciled (see above), and that the additions and corrections in the legislation are only such as would necessarily be made when the people were just about to enter the promised Thus Bertheau observes: "It is hazardous land. to conclude from contradictions in the laws that they are to be ascribed to a different age . . . He who made additions must have known what it was he was making additions to, and would either have avoided all contradiction, or would have altered the earlier laws to make them agree with the later (Die Sieben Gruppen Mos. Gesetze, p. 19, note). (d.) That the book bears witness to its own authorship (xxxi. 19), and is expressly cited in the N. T. as the work of Moses (Matt. xix. 7, 8; Mark x. 8; Acts iii. 22, vii. 37).

The advocates of this theory of course suppose that the last chapter, containing an account of the death of Moses, was added by a later hand, and perhaps formed originally the beginning of the book of Joshua.

(2.) The opinion of Stähelin (and as it would seem of Bleek) that the author is the same as the writer of the Jehovistic portions of the other books. He thinks that both the historical and legislative portions plainly show the hand of the supplementist (Krit. Unters. p. 76). Hence he attaches but little weight to the alleged discrepancies, as he considers them all to be the work of the reviser, going over, correcting, and adding to the older materials of the Elohistic document already in his hands.

(3.) The opinion of De Wette, Gesenius, and others, that the Deuteronomist is a distinct writer from the Jehovist. De Wette's arguments are **based**, (a) on the difference in style; (b) on the contradictions already referred to as existing in matters of history, as well as in the legislation, when compared with that in Exodus; (c) on the peculiarity noticeable in this book, that God does not speak by Moses, but that Moses himself speaks to the people, and that there is no mention of the angel of Jehovah (cf. i. 30, vii. 20-23, xi. 13-17 with Ex. xxiii. 20-33); and lastly on the fact that the Deuteronomist ascribes his whole work to Moses, while the Jehovist assigns him only certain portions.

(4.) From the fact that certain phrases occurring n Deuteronomy are found also in the prophecy of Jeremiah, it has been too hastily concluded by some witics that both books were the work of the prophet. 30 Von Bohlen, Gesenius (Gesch. d. Hebr. Spr. n. 32), and Hartmann (Hist. Krit. Forsch. p. 660). König, on the other hand (Alttest. Stud. ii. 12 ff.), has shown not only that this idiomatic resemblance has been made too much of (see also Keil, Einl. p. 117), but that there is the greatest possible differsace of style between the two bucks. And De Wette ren arks (Einl. p. 191), "Zu riel behauptet ther diese Verwandtschaft von Bohlen, Gen. s. stavii."

i

| Jew living in Egypt during the latter half of the reign of Manasseh (Gesch. des V. J. i. 171). He thinks that a pions Jew of that age, gifted with prophetic power and fully allve to all the evils of his time, sought thus to revive and to impress more powerfully upon the minds of his countrymen the great lessons of that Law which he saw they were in danger of forgetting. He avails himself therefore of the groundwork of the earlier history, and also of the Mosaic mode of expression. But as his object is to rouse a corrupt nation, he only makes use of historical notices for the purpose of introducing his warnings and exhortations with the more effect. This he does with great skill and as a master of his subject, whilst at the same time he gives fresh vigor and life to the old law by means of those new prophetic truths which had so lately become the heritage of his people. Ewald further considers that there are passages in Deuteronomy borrowed from the books of Job and Isaiah (iv. 32 from Job viii. 8; and xxviii. 29, 30, 35 from Job v. 14, xxxi. 10, ii. 7; and xxviii. 49, &c. from Is. v. 26 ff., xxxiii. 19), and much of it akin to Jeremiah (Gesch. i. 171, note). The song of Moses (xxxii.) is, according to him, not by the Deuteronomist, but is nevertheless later than the time of Solomon.

D. Date of Composition. Was the book really written, as its language certainly implies, before the entry of Israel into the Promised Land? Not only does the writer assert that the discourses contained in the book were delivered in the plains of Moab, in the last month of the 40 years' wandering, and when the people were just about to enter Canaan (i. 1-5), but he tells us with still further exactness that all the words of this Law were written at the same time in the book (xxxi. 9). Moreover, the fact that the goodly land lay even now before their eves seems everywhere to be uppermost in the thoughts of the legislator, and to lend a peculiar solemnity to his words. Hence we constantly meet with such expressions as "When Jeliovah thy God bringeth thee into the land which he hath sworn to thy fathers to give thee," or "whither thou goest in to possess it." This phraseology is so constant, and seems to fall in so naturally with the general tone and character of the book, that to suppose it was written long after the settlement of the Israelites in Canaan, in the reign of Solomon (De Wette, v. Lengerke and others), or in that of Manasseh (Ewald as above), is not only to make the book an historical romance, but to attribute very considerable inventive skill to the author (as Ewald in fact does).

De Wette argues, indeed, that the character of the Laws is such as of itself to presuppose a long residence in the land of Canaan. He instances the allusion to the temple (xii. and xvi. 1-7), the provision for the right discharge of the kingly and prophetical offices, the rules for civil and military organization and the state of the Levites, who are represented as living without cities (though such are granted to them in Num. xxxv.) and without tithes (allotted to them in Num. xviii. 20, &c.). But in the passages cited the temple is not named, much less is it spoken of as already existing: on the contrary the phrase employed is "The place which the Lord your God shall choose." Again, to suppose that Moses was incapable of praviding for the future and very different position of his people as settled in the land of Cansan, is to deny rvi." (5.) Farald is of op nion that it was written by a question about his divine commission, surely it is

legislator would foresee the growth of a polity and freedom in man to seek a fancied independence would be anxious to regulate its due administration and it is but a slight step further to impute false in the fear of God. Hence he would guard against hood or cruelty to Him. The success of the Devil's false prophets and seducers to idolatry. As regards the Levites, Moses might have expected or even desired that, though possessing certain cities (which, however, were inhabited by others as well as themselves), they should not be confined to those cities but scattered over the face of the country. This must have been the case at first, owing to the The very gradual occupation of the new territory. mere fact that in giving them certain rights in Deut. nothing is said of an earlier provision in Num. does not by any means prove that this earlier provision was unknown or had ceased to be in force.

Other reasons for a later date, such as the mention of the worship of the sun and moon (iv. 19, xvii. 3); the punishment of stoning (xvii. 5, xxii. 21, &c.); the name Feast of Tabernacles; and the motive for keeping the Sabbath, are of little force. In Amos v. 26, Saturn is said to have been worshipped in the wilderness; the punishment of stoning is found also in the older documents; the Feast of Tabernacles agrees with Lev. xxiii. 34; and the motive alleged for the observance of the Sabbath at least does not exclude other motives.

A further discussion of the question of authorship, as well as of the date of the legislation in Deuteronomy, must be reserved for another article. [PENTATEUCH.] J. J. S. P.

* On the general literature relating to Deuteronomy, see PENTATEUCH. Recent exceptical works on this book are: Riehm, Die Gesetzgebung Mosis im Lande Moab, 1854; F. W. DEVIL ($\Delta id\beta o \lambda os: Diabolus;$ properly "one who sets at variance," $\delta ia\beta d\lambda \lambda \epsilon_i$; comp. Plat. Symp. p. 222, c, d; and generally a "slanderer" or "false accuser").

The word is found in the plural number and ad jective sense in 1 Tim. iii. 11; 2 Tim. iii. 3; and Tit. ii. 3. In all other cases it is used with the zticle as a descriptive name of Satan a [SATAN], xcepting that in John vi. 70 it is applied to Judas ias "Satan" to St. Peter in Matt. xvi. 23), because they - the one permanently, and the other for the noment -- were doing Satan's work.

The name describes him as slandering God to man, and man to God.

The former work is, of course, a part of his great work of temptation to evil; and is not only exemplified but illustrated as to its general nature and tendency by the narrative of Gen. iii. We find there that its essential characteristic is the representation of God as an arbitrary and selfish uter, seeking his own good and not that of his

a * Without the article, though applied to Satan, in account of its predicate relation, or its force as a prope

not too much to assume that so wise and great a creatures. The effect is to stir up the spirit of slander is seen, not only in the Scriptural narrative of the Fall, but in the corruptions of most mythologies, and especially in the horrible notion of the divine poloros, which ran through so many. (See e. g. Herod. i. 32, vii. 46.) The same slander is implied rather than expressed in the temptation of our Lord, and overcome by the faith which trusts in God's love even where its signs may be hidden from the eye. (Comp. the unmasking of a similar slander by Peter in Acts v. 4.)

The other work, the slandering or accusing man before God, is, as it must necessarily be, unintelligible to us. The All-Seeing Judge can need no accuser, and the All-Pure could, it might seem. have no intercourse with the Evil One. But in truth the question touches on two mysteries, the relation of the Infinite to the finite spirit, and the permission of the existence of evil under the government of Him who is "the Good." As a part of these it must be viewed, -- to the latter especially it belongs; and this latter, while it is the great mystery of all, is also one in which the facts are proved to us by incontrovertible evidence.

The fact of the Devil's accusation of man to God is stated generally in Rev. xii. 10, where he is called "the accuser $(\kappa\alpha\tau\eta\gamma\omega\rho)$ of our brethren, who accused them before our God day and night," and exemplified plainly in the case of Job. Its essence as before is the imputation of selfish motives (Job i. 9, 10), and its refutation is placed in the selfsacrifice of those "who loved not their own lives unto death."

For details see SATAN.

A. B.

* DEVOTIONS denoted formerly objects of worship or religious veneration, and not, as at present, acts of worship or sentiments of devotion. It is in the former sense only that it stands correctly for $\sigma \epsilon \beta d\sigma \mu a \tau a$ in Acts xvii. 23 (A. V.), under which term Paul refers to the temples, images altars and the like, which the Athenians regarded as sacred, and to which they paid divine homage. It will be seen that in the Greek text nal Bound's (also an altar) is put forward as one of the examples of the class which $\sigma \in \beta d\sigma \mu a \tau a$ designates. Our pres ent English therefore requires "your objects of devotion " in Paul's speech, instead of " your devotions." H.

* DEVOUT. [PROSELYTES, at the end. Amer.ed.]

DEW (לְשָׁ: Spooros: ros). This in the summer is so copious in Palestine that it supplies to some extent the absence of rain (Ecclus. xviii. 16. xliii. 22), and becomes important to the agriculturist; as a proof of this copiousness the well-known sign of Gideon (Judg. vi. 37, 39, 40) may be adduced. Thus it is coupled in the divine blessing with rain, or mentioned as a prime source of fertility (Gen. xxvii. 28; Deut. xxxiii. 13; Zech. viii. 12), and its withdrawal is attributed to a curse (2 Sam. i. 21; 1 K. xvii. 1; Hag. i. 10). It becomes a leading object in prophetic imagery by reason of its penetrating moisture without the apparent effort of rain (Deut. xxxii. 2; Job xxix. 19; Ps. cxxxi¹¹ 8; Prov. xix. 12; Is. xxvi. 19; Hos. xiv. 5; Mie.

Acts xill. 10, 1 Pet. v. 8, and Rev. xx. 2, either on name. See Buttmann's Newtest. Gramm. p. 78. 2.

v. 7), while its speedy evanescence typifies the tran-| from it. The tiara generally had pendent flape sent goodness of the hypocrite (Hos. vi. 4, xiii. 3). falling on the shoulders. (See Paschalius, de Coro-It is mentioned as a token of exposure in the night (Cant. v. 2; Dan. iv. 15, 23, 25-33, v. 21).

* DEW OF HERMON. [HERMON.]

DIADEM (אָנָרָר, אָנָרָא, or מָאַגָּכָר, also

גפירה), a word employed in the A. V. as the translation of the above Hebrew terms. They occur in poetical passages, in which neither the Hebrew nor the English words appear to be used with

any special force. אָאָגָט is strictly used for the " mitre " of the high-priest. [MITRE.]

What the "diadem" of the Jews was we know not. That of other nations of antiquity was a fillet of silk. two inches broad, bound round the head and tied behind, the invention of which is attributed to Liber (Plin. H. N. vii. 56, 57). Its color was generally white (Tac. Ann. vi. 37; Sil. Ital. xvi. 241); sometimes, however, it was of blue, like that of Darius, " cerulea fascia albo distincta " (Q. Curt. iii. 3, vi. 20; Xen. Cyr. viii. 3, § 13); and it was sown with pearls or other gems (Gibbon, i. 392; Zech. ix. 16), and enriched with gold (Rev. ix. 7). It was peculiarly the mark of oriental sovereigns (1 Macc. xiii. 32, 7d diddnua ths 'Aolas), and hence the deep offense caused by the attempt of Casar to substitute it for the laurel crown appropriated to Roman emperors ("sedebat . . . coronatus; . . . diadema ostendis," Cio. Phil. ii. 34): when some one crowned his statue with a laurel-wreath, "candidæ fasciæ præligatam," the tribunes instantly ordered the fillet or diadem to be removed, and the man to be thrown into prison (Suet. Cas. 79). Caligula's wish to use it was considered an act of insanity (Suet. Cal. 22). Heliogabalus only wore it in private. Antony assumed it in Egypt (Flor. iv. 11), but Diocletian (or, according to Aurel Victor, Aurelian) first assumed it as a badge of the empire. Representations of it may be seen on the coins of any of the later emperors (Tillemont, Hist. Imp. iii. 531).

A crown was used by the kings of Israel, even in battle (2 Sam. i. 10; similarly it is represented on coins of Theodosius as encircling his helmet); but in all probability this was not the state crown (2 Sam. xii. 30), although used in the coronation of Joash (2 K. xi. 12). Kitto supposes that the state crown may have been in the possession of Athaliah; but perhaps we ought not to lay any great stress

on the word in this place, especially as it is very likely that the state crown was kept in the Temple.

In Esth. i. 11, ii. 17, we have TDD (kirapis, aldapis) for the turban (orox h Bussien, vi. 8) worn by the Persian king, queen, or other eminent persons to whom it was conceded as a special favor The (viii. 15, διάδημα βύσσινον πορφυρούν). diadem of the king differed from that of others in naving an erect triangular peak (RupBaola, Arisoph. Av. 487; ην οί βασιλείς μόνον δρθην έφοοουν παρά Πέρσαις, υί δε στρατηγοί κεκλιμένην, Nuid. s. v. ridpa, and Hesych.). Possibly the

- פָרָבָל of Dan. iii. 21 is a tiara (as in LXX.,

na, p. 573; Brissonius, de Regn. Pers., &c.; Lavard, ii. 320; Scacchus, Myrothec. iii. 38; Fabricius, Bibl. Ant. xiv. 13.)

The words קרההי מבהלים ("exceeding in dyed attire," A. V.] in Ez. xxiii. 15 mean long and flowing turbans of gorgeous colors (LXX. mapdβαπτα, where a better reading is τιάραι βαπταί). F. W. F [CROWN.]

Obverse of Tetradrachm of Tigranes, king of Syria. Head of king with diadem, to the right.

* The difference between "diadem" (didonua) and "crown " (or é pavos) is very important for the study of the New Testament. The distinction is not duly recognized in the foregoing article or in that on CROWN. Both the classical usage and that of the Hellenistic Greek are well illustrated by Trench in his Synonyms of the N. T., § xxiii. See also Corona in Pauly's Real-Encyk. ii. 714. The distinctive idea of "diadem" is that of royalty or kingly power; while the other senses of our English "crown" (which embraces also that of "diadem," and hence of itself is indeterminate) belong to or toparos, denoting " the crown of victory in the games, of civic worth, of military valor, of nuptial joy, of festal gladness," but not the emblem of sovereignty and regal grandeur.

Hence the reference (see above) to Rev. ix. 7, as showing how the diadem was ornamented, is incorrect; for the term there is $\sigma \tau \epsilon \phi a \nu o_i$, and describes "the locusts" as conquerors, not as kings. The Septuagint (see e. g. the passages in the first book of Maccabees, which contain the two words) observes the distinction under remark with undeviating accuracy. It would be better, perhaps, if the A. V. had at least suggested to the reader the variation in the Greek, by saying "diadems " instead of "crowns" in Rev. xii. 3, xiii. 1, xix. 12. Without a distinct apprehension of the import of these sim ilar but different expressions, we fail, as Trench remarks, to perceive how "fitly it is said of Him who is King of Kings and Lord of Lords, that on his head were many diadems (diadhuara rohhd).

. . . these 'many diadems' the tokens of the many royalties - of earth, of heaven, and of hell (Phil. ii. 10) - which are his; royalties once usurped or assailed by the Great Red Dragon, the usurper of Christ's dignity and honor, described therefore with his seven diadems as well (xiii. 1), but now openly and forever assumed by Him to whom they rightfully belong." See also Webster's Syntax and Synonyms of the Greek Testament, p. 233 (Lond. 1864).

DIAL (בעַלוֹת: מאם מאם מאני: horologium). where however Drusius and others invert the words | 'The word is the same as that rendered " steps " in val ridpais kal mepikernjaîri), A. V. "hat [HAT.]" A. V. (Ex. xx. 26; 1 K. x. 19), and "degrees" is Some render it by tibiale or calceamentum. A. V. (2 K. xx. 9, 10, 11; Is. xxxviii. 8), where, Schleusner suggests that $\kappa_{\rho\omega\beta\nu\lambda\rho\sigma}$ may be derived to give a consistent rendering, we should read with

A Ahas. In the absence of any materials for de- xxxix. 11), and mentioned by Ezekiel (xxviii. 13 termining the shape and structure of the solar in- among the precious stones of the king of Tyre strument, which certainly appears intended, the best course is to follow the most strictly natural meaning of the words, and to consider with Cyril of Alexandria and Jerome (Comm. on Is. xxxviii.

8), that the and age were really stairs, and that the shadow (perhaps of some column or obelisk on the top) fell on a greater or smaller number of them according as the sun was low or high. The terrace of a palace might easily be thus ornamented. Ahaz's tastes seem to have led him in pursuit of foreign curiosities (2 K. xvi. 10), and his intimacy with Tiglath-Pileser gave him probably an opportunity of procuring from Assyria the pattern of some such structure; and this might readily lead the "princes of Babylon" (2 Chr. xxxii. 31) to "inquire of the wonder," namely, the alteration of the shadow, in the reign of Hezekiah. Herodotus (ii. 109) mentions that the Egyptians received from the Babylonians the x6λos and the yrshar, and the division of the day into twelve hours. Of such division, however, the O. T. contains no undoubted trace, nor does any word proved to be equivalent to the "hour" occur in the course of it, although it is possible that Ps. cii. 11, and cix. 23. may contain allusion to the progress of a shadow as measuring diurnal time. In John xi. 9 the day is spoken of as consisting of twelve hours. As regards the physical character of the sign of the retrogression of the shadow in Is. xxxviii. 8, it seems useless to attempt to analyze it; no doubt an alteration in the inclination of the gnomon, or column, &c., might easily effect such an apparent retrogression; but the whole idea, which is that of Divine interference with the course of nature in behalf of the king, resists such an attempt to bring it within the compass of mechanism.

It has been suggested that the DYDET of Is. svii. 8, xxvii. 9; Ez. vi. 4, 6, rendered in the margin of the A. V. "sun-images," were gnomons to measure time (Jahn, Archaeol. i. i. 539), but there seems no adequate ground for this theory

H. H.

* Gumpach, in his Sonnenzeiger des Ahas (Alttestamentliche Studien, p. 186) suggests that the "dial of Ahaz" was so called because it was a present to him from his ally Tiglath-Pileser, and that it was not only modelled after the style of such structures in Babylonia, but was made there and sent to Ahaz from that country. In his restoration of the figure he makes it resemble very much what is supposed to have been the shape of the edifices represented by the Birs Nimroud and ther similar ruins, namely, a series of steps or ter races on which an upright pole cast its shadow. [See BABBL, TOWER OF.] Mr. Layard thinks it possible that these great structures in Mesopotamia may have been built for some astronomical purpose (Nin. and Bub. p. 499). The confirmation of this conjecture would bring the ruins on the banks of the Euphrates into a new connection with sacred history. Gumpach attempts to explain the account of the sun's going back on the dial of Ahaz without finding anything miraculous in the text. See against that view Keil and Delitzsch, Bücher der Könige (1865), p 345. [HEZEKIAH.] Н.

UIAMOND (דולם: Yaowis: jaspis), a pre-

the margin the "degrees" rather than the "dial"; breast-plate of the high-priest .Ex. xxviii 18 Gesenius has noticed the difficulty of identifying the terms used in the versions for each of the Hebrew names of precious stones in the above passages, the translators or transcribers having apparently altered the order in which they stand. lagres seems to be the word in the LXX. corresponding to

> but most ancient commentators give לדים. but most ancient commentators give לדים droxior, onychinus. Our translation, "diamond. is derived from Aben Ezra, and is defended by Braun (de Vest. Sacerd. ii. 13). Kalisch (on Ex. p. 536) says "perhaps Emerald." The etymology

> (from "", to strike, or crush) leads us to suppose a hard stone. The emerald, which is of a green color, of various depths, is nearly as hard as the topaz, and stands next to the ruby in value. The same authority doubts whether the art of engraving on the diamond was known to the ancients, since they did not even understand how to cut the ruby.

> Respecting つぬび, which is translated "diamond " in Jer. xvii. 1, see under ADAMANT.

W.D

DIA'NA. This Latin word, properly denoting a Roman divinity, is the representative of the Greek Artemis ('Apreus), the tutehry goddees of the Ephesians, who plays so important a part in the narrative of Acts xix. The Ephesian Diana was, however, regarded as invested with vary different attributes, and made the object of a different worship from the ordinary Diana of the Greeks, and is rather perhaps to be identified with Astarte and other female divinities of the East. K. O. Müller says (Hist. of the Dorians, i. 403, Eng. trans.), "everything that is related of this deity is singular and foreign to the Greeks."

Guhl, indeed (Fphesiaca, pp. 78-86), takes the contrary view, and endeavors in almost all points to identify her with the true Greek goddess. And in some respects there was doubtless a fusion of the two. Diana was the goddess of rivers, of pools, and of harbors; and these conditions are satisfied by the situation of the sanctuary at Ephesus. Coressus, one of the hills on which the city stood, is connected by Stephanus Byzantinus with Kopn. We may refer also to the popular notion that, when the temple was burnt on the night of Alexander's birth, the calamity occurred because the goddees was absent in the character of Lucina. Again, on coins of Ephesus we sometimes find her exhibited as a huntress and with a stag. But the true Ephesian Diana is represented in a form entirely alien from Greek art. St. Jerome's words are (Proefat. ad Ephes.), "Scribebat Paulus ad Ephesios Dianau colentes, non hanc venatricem, que arcum tenet et succincta est, sed istam multimammiam, quam Græci πολύμαστον vocant, ut scilicet ex ipen effigie mentirentur omnium eam bestiarum et viventium esse nutricem." Guhl, indeed, supposes this mode of representation to have reference simply to the fountains over which the goddess presided, conceiving the multiplication of breasts to be similar to the multiplication of eyes in Argus or of heads in Typhoeus. But the correct view is undoubteally that which treats this peculiar form as a symbol of the productive and nutritive powers of nature This is the form under which the Ephesian Diana nous stone, the third in the second row on the so called for distinction, was slways represented

many places, such as Samos, Mitvlene, Perga, Hisrapolis, and Gortyna, to mention those only which secur in the N. T. or the Apocrypha. The coin below will give some notion of the image, which

Greek imperial copper coin of Ephesus and Smyrns allied ('Onórosa); Domitia, with name of proconsul.

Obv.: AOMITIA CIBACTH. Bust to right. Rev. : ANOYKAICEN HAITOY OMONOIA EOE ZMYP. Robesian Diana.

was grotesque and archaic in character. The head wore a mural crown, each hand held a bar of metal, and the lower part ended in a rude block covered with figures of animals and mystic inscriptions. This idol was regarded as an object of peculiar sanctity, and was believed to have fallen down from heaven (τοῦ Διοπετοῦς, Acts xix. 35).

The Oriental character of the goddess is shown by the nature of her hierarchy, which consisted of women and eunuchs, the firmer called Mexiooa, the latter Meyd $\beta_{J}(\omega)$. At their head was a high-priest called 'E $\sigma\sigma\eta\nu$. These terms have probably some connection with the fact that the bee was sacred to the Ephesian Dana (Aristoph. Ran. 1273). For the temple considered as a work of art we must refer to the article EPHESUS. No arms were allowed to be worn in its precincts. No bloody sacrifices were offered. Here, also, as in the temple of Apollo at Daphne, were the privileges of asylum. This is indicated on some of the coins of Ephesus (Akerman, in Trans. of the Numismatic Soc. 1841); and we find an interesting proof of the continuance of these privileges in imperial times in Tac. Ann. iii. 61 (Strab. xiv. 641; Paus. vii. 2; Cic. Verr. ii. 33). The temple had a large revenue from endowments of various kinds. It was also the public treasury of the city, and was regarded as the safest bank for private individuals.

The cry of the mob (Acts xix. 28), "Great is Diana of the Ephesians!" and the strong expression in ver. 27, "whom all Asia and the world worshippeth," may be abundantly illustrated from a variety of sources. The term µeydan was evidently a title of honor recognized as belonging to ne Ephesian goddess. We find it in inscriptions , as in Boeckh, Corp. Insc. 2963, c), and in Xenophon's Ephesiaca, i. 11. (For the Ephesian Xenophon, see Dict. of Biog. and Mythol.) As to the enthusiasm with which "all AstA" regarded this worship, independently of the fact that Ephesus was the capital of the province, we may refer to such passages as the following: $\delta \tau \hat{\eta} s' A \sigma las rads.$ Corp. Insc. 1, c.; "communiter a civitatibus Asise factum," Liv. i. 45; "tota Asia exstruente," Plin. xvi. 79; "factum a tota Asia," ib. xxxvi. 21. As to the notoriety of the worship throughout the world," Pausanius tells us (iv. 31) that the From this circumstance it possibly received the

sherever worshipped; and the worship extended to [Ephesian Diana was more honored privately than any other deity, which accounts for the large manufacture and wide-spread sale of the "silver shrines " mentioned by St. Luke (ver. 24), and not by him only. This specific worship was publicly adopted also, as we have seen, in various and distant places; nor ought we to omit the games celebrated at Ephesus in connection with it, or the treaties made with other cities on this half religious half-political basis. J. S. H.

> DIBLA'IM (דְּכְלָיָם [too fig-cakes]: ۵εβη λαtμ; [Alex. Δeβηλaeiμ:] Debelaim), mother of Hosea's wife Gomer (Hos. i. 3)

• The name may be = delicite, voluptas, and

hence Gomer (which see) as the daughter $(\square p) =$ deliciis dedita, in accordance with the symbolic import of the names. See Hengstenberg's Chris tology (Keith's trans.) iii. 11 ff. Diblaim is probably the name of Gomer's father (Manger, Gesen., Hengst., Maurer) and not the mother's name as stated above. H.

DIB'LATH (accurately DIBLAH, הקקל, the word in the text being דְּבְלְתֶרוֹ = " to Diblah; " $\Delta \in \beta \lambda a \theta d$: Deblatha), a place named only in Es. vi. 14, as if situated at one of the extremities of the land of Israel: - " I will . . . make the land Diblah." The word Midbar being frequently used for the nomad country on the south and southeast of Palestine, it is natural to infer that Diblah was in the north. To this position Beth-diblathaim or Alunon-diblathaim in Moab on the east of the Dead Sea, are obviously unsuitable; and indeed a place which like Diblathaim was on the extreme east border of Moab, and never included even in the allotments of Reuben or Gad, could hardly be chosen as a landmark of the boundary of Israel. The only name in the north at all like it is RIBLAH.

and the letters D (7) and R (7) are so much alike and so frequently a interchanged, owing to the carelessness of copyists, that there is a strong probability that Riblah is the right reading. The conjecture is due to Jerome (Comm. in loc.), but it has been endorsed by Michaelis, Gesenius, and other scholars (Ges. Thes. p. 312: and see David son, Heb. Text, Ez. vi. 14). Riblah, though an old town, is not heard of during the early and middle course of Jewish history, but shortly before the date of Ezekiel's prophecy it had started into a terrible prominence from its being the scene of the cruelties inflicted on the last king of Judah, and of the massacres of the priests and chief men of Jerusalem perpetrated there by order of the king of Babylon.

* DIBLATHA'IM. [Almon-Diblathaim BETH DIBLATHAIM.]

DIBON (] [a wasting, Ges.; but Fürst a river-place]: Δαιβών, [in Is.,] Δηβών [Alex. $\Delta \alpha_i \beta_\eta \delta \omega_r$ for $\kappa \alpha_i \Delta_\eta \beta \omega_r$; in Josh. xiii. 9, Comp. Διβων, the rest omit; in Jer., FA. Δεβων:] Dibon). 1. A town on the east side of Jordan, in the rich pastoral country, which was taken possession of and rebuilt by the children of Gad (Num. xxxii. 3, 84).

enme of DIBON-GAD. Its first mention is in the | containing many palm-trees. The city tous insurancient fragment of poetry Num. xxi. 30, and from this it appears to have belonged originally to the Moabites. The tribes of Reuben and Gad being both engaged in pastoral pursuits are not likely to have observed the division of towns originally made with the same strictness as the more settled people on the west, and accordingly we find Dibon counted to Reuben in the lists of Joshus (xiii. 9 - LXX. omits - 17). In the time of Isaiah and Jeremiah, however, it was again in possession of Moab (Is. xv. 2: Jer. xlviii. 18, 22, comp. 24). In the same denunciations of Isaiah it appears, probably, under the name of DIMON, M and B being convertible in Hebrew, and the change admitting of a play charac-teristic of the poetry of Isaiah. The two names were both in existence in the time of Jerome Comm. on Is. xv., quoted by Reland, p. 735). The last passages appear to indicate that Dibon was on an elevated situation: not only is it expressly said to be a "high place" (Is. xv. 2), but its inhabitants are bid to "come down" from their glory or their stronghold. Under the name of Dabon or Debon it is mentioned by Eusebius and Jerome in the Unomasticon. It was then a very large village (κώμη παμμεγέθης) beyond the Arnon. In modern times the name Dhiban has been discovered by Sectzen, Irby and Mangles (142), and Burckhardt (Syr. 372) as attached to extensive ruins on the Roman road, about three miles north of the Arnon (Wady Modjeb). All agree, however, in describing these ruins as lying low.

2. [FA.³ $\Delta_{i\beta\omega\nu}$; the rest omit: Dibon.] One of the towns which was re-inhabited by the men of Judah after the return from captivity (Neh. xi. 25). From its mention with Jekabzeel, Moladah, and other towns of the south, there can be no doubt that it is identical with DIMONAH.

DI'BON-GAD (דיבן בר) [wasting of G ul]: Δαιβών Γάδ: Dibon-gad), one of the halting-places of the Israelites. It was in Moab between IJE-ABARIM and ALMON-DIBLATHAIM (Num. XXXIII. 45, 46). It was no doubt the same place which is generally called DIBON; but whether it received the name of Gad from the tribe, or originally possessed it, cannot be ascertained.ª

DIB'RI (", [perh. eloquent, Ges.]: ∆a $β_{\rho ei}$: [Alex. Δα $β_{\rho i}$:] Dibri), a Danite, father of Shelomith, a woman who had married an Egyptian and whose son was stoned for having "blasphemed the Name" [i. c. of Jehovah] (Lev. xxiv. 11).

DIDRACHMON (δίδραχμου : didrachma). 'MONEY, SHEKEL.]

DID'YMUS (Aldoupos), that is, the Twin, a surname of the Apostle Thomas (John xi. 16, xx. 24, xxi. 2). [THOMAS.]

DIK'LAH (דְקָלָה): בראל (Alex. in 1 Chr. Δenλau:] Decla; Gen. x. 27; 1 Chr. i. 21), a son of Joktan, whose settlements, in common with those of the other sons of Joktan, must be looked for in Arabia. The name in Hebrew signifies " : palm-tree," and the cognate word in Arabic 11

د علق), " a palm-tree abounding with fruit : " hence it is thought that Diklah is a part of Arabia

in the northwest of Arabia Felix, has been sug-gested as preserving the Joktanite name (Boch *Phaleg*, ii. 22); but Bochart, and after him Gesenius, refer the descendants of Diklah to the Minsei, a people of Arabia Felix inhabiting a palmiferous country. Whether we follow Bochart and most others in placing the Minsei on the east borders of the *Hijáz*, southwards towards the Yemen, or follow Fresnel in his identification of the Wádce Doan with the territory of this people, the connection of the latter with Diklah is uncertain and unsatisfactory. No trace of Diklah is known to exist in Arabic works, except the mention of a place

called Dakalah (דְקָלָה = נפּלא) in El-Yemameh (Kimoos, s. v.), with many palm-trees (Mar-

aisid, s. v.). "Nakhleh" (تخليخ) also signifies a palm-tree, and is the name of many places, especially Nakhleh el-Yemaneeyeh, and Nakhleh esh-Shameeyeh (here meaning the Southern and Northern Nakhleh), two well-known towns situate near each other. According to some, the former was a seat of the worship of El-Latt, and a settlement of the tribe of Thakeef; and in a tradition. of Mohammed's, this tribe was not of unmixed Ishmaelite blood, but one of four which he thus excepts: -- " All the Arabs are [descended] from Ishmael, except four tribes: Sulaf [Sheleph], Hadramäwt [Hazarmaveth], El-Arwah [?], and Tha-keef" (Mir-at ez-Zemán, bis).

Therefore, (1) Diklah may probably be recovered in the place called Dikalah above mentioned; or, possibly, (2) in one of the places named Nakhlek.

A discussion of the vexed and intricate question of the Minsei is beyond the limits of this article; but as they are regarded by some authorities of high repute as representing Diklah, it is important to record an identification of their true position. This has hitnerto never been done; those who have written on the subject having argued on the vague and contradictory statements of the Greek geographers, from the fact that no native mention of so important a people as the Minsei had been discovered (cf. Bochart, Phaleg; Fresnel's Lettres, Journal Asiatique; Jomard, Essai, in Mangin's Hist. de l'Egypte, vol. iii.; Caussin, Essai, dec.). There is, however, a city and people in the Yemen which appear to correspond in every respect to the position and name of the Minæi. The latter is written Meiraioi, Miraioi, and Mirraioi, which may be fairly rendered "people of Meir, of Mir, and of Mirr;" while the first exhibits the sound of a diphthong, or an attempt at a diphthong. The Greek account places them, generally, between the Sabseans (identified with Seba, or Ma-rib; see ARABIA) and the Erythræan Sea. It is therefore remarkable that where it should be sought we find a city with a fortress, called Ma'een, or Ma'in.

ريس (Kâmoos, Marásid, s. v.), well-known.

and therefore not carefully described in the Arabic geographical dictionaries, but apparently new San'à; and further that in the same province are 1,

situate the town of Mo'eyn (معيس, abbr. dim of the former), whence the Bence-Mo'eyn, and th town of Ma'eench (fem. of Ma'een). The gent. n would be Ma conce, &c. The township in which

a * As it is said expressly (Num. xxxii. 84) that Gad built " (perh. = rebuilt or fortified) Dison, that fact the second sufficiently for the name. H.

We the latter two places is named Sinhån (comp. the daughter of Jacob by Leah (Gen xxx. **31**). Niebeular, *Descr.* 201) which was one of the zonfederation formed by the ancient tribe of Jenb, o

(Marásid, s. v.), grandson of Kahlin, who was brother of Himyer the Joktanite. This identification is reconcilable with all that is known of the Minsei. See further in art. UZAL.

E. S. P.

DILEAN $(\gamma\gamma\gamma): \Delta\alpha\lambda\delta\delta$; [Vat. $\Delta\alpha\lambda\alpha\lambda$; Ald.] Alex. $\Delta\alpha\lambda\alpha\delta\sigma$: Delean), one of the cities of Judah, in the Shefelah or low country (Josh. xv. 38). If Gesenius's interpretation, "gourd," or "cucumber," be correct, the name is very suitable for a place situated in that rich district. It is not elsewhere mentioned, nor has it been subsequently identified with certainty. Van de Velde (ii. 160) suggests that it may be the modern place *Tina* (Kiepert's map in Robinson, B. *Tima*), about three miles north of *Tell es-Safieh* in the maritime plain of Philistia, south of Ekron. (j.

* DILL, Matt. xxiii. 23, marg. [ANISE.]

DIM'NAH (כוֹדָיקָרָק): Vat. om.; Alex. למעימ: Damna), a city in the tribe of Zebulun, given to the Merarite Levites (Josh. xii. 35). The name does not occur in the list of cities belonging to the tribe (Josh. xiz. 10-16). In the list of Levitical cities in 1 Chr. vi. 77 occurs RIMMON, accurately Rimmono (כמוכני), which may possibly be a variation of Dimnah, T being often changed into T. In this case Rimmon is probably the real name (Bertheau, Chronik, 72, 73; Movers, Chronik, 72). G. DI'MON, THE WATERS OF (כמוכני) דלס Been The Acurán: Alex. Parament:

53sop τὸ Δειμών; Alex. Ρεμμων; [Comp. Διβών:] Diδow), some streams on the east of the Dead Sea, in the land of Moab, against which Isaiah is here uttering denunciations (Is. xv. 9). From Dibon being named in verse 2 of this chapter, as well as in the lists of Moabite towns in Jer. xlviii., and no place named Dimon being elsewhere mentioned as belonging to Moab, Gesenius (Comm. über d. Jes. 1.534) conjectures that the two names are the same, the form "Dimon" being used for the sake of the

play between it and the word Dam (D) "blood." [DIBON, 1.] G.

DIMO'NAH ($\mathcal{T}_{\mathcal{T}}^{\mathcal{T}}$ [a wasting]: 'Peyµd; Alex. $\Delta_{i\mu\omega\nu\alpha}$: Dimonn), a city in the south of Judak, the part bordering on the desert of Idumses (Josh. xv. 22). Dimonah is mentioned in the Onomasticon, but was evidently not known to Eusebius and Jerome, nor has it been identified in later times. It probably occurs under the altered name of DIBON [2] in Neh. xi. 25. G.

Knobel (Josua, p. 423) thinks Dibon (= Dimonah) may be ed-Dheib, a heap of ruins on the bank of a Wady of that name, north-east of Tell Ardd (Arad). See Van de Velde, Memoir, p. 252. Robinson writes the name Ehdeib (Bibl. Res. ii. 473, 1st ed.). Keil and Delitzsch regard this conjecture as possibly correct (Book of Josh ta, p. 159).

DI'NAH (דְיָלָי, judged or avenged, from the mme root as DAN [object of strife, Diet. in Ges. Febr a. Chuld. Worterb. 6te Aufl.]: Δείνα: Dina),

Canaan, and, having ventured among the inhabitants, was violated by Shechem the son of Hamor, the chieftain of the territory in which her father had settled (Gen. xxxiv.). Her age at this time, judging by the subsequent notice of Joseph's age (Gen. xxxvii. 2), may have been from 18 to 15, the ordinary period of marriage in Eastern countries (Lane's Mod. Egypt. i. 208). Shechem proposed to make the usual reparation by paying a sum to the father and marrying her (Gen. xxxiv. 12); such reparation would have been deemed sufficient under the Mosaic law (Deut. xxii. 28, 29) among the members of the Hebrew nation. But in this case the suitor was an alien, and the crown of the offense consisted in its having been committed by an alien against the favored people of God; he had "wrought folly in Israel " (xxxiv. 7). The proposals of Hamor, who acted as his deputy, were framed on the recognition of the hitherto complete separation of the two peoples; he proposed the fusion of the two by the establishment of the rights of intermarriage and commerce; just as among the Romans the just connubii and the jus commercii constituted the essence of ciritas. The sons of Jacob, bent upor revenge, availed themselves of the engerness which Shechem showed, to effect their purpose; they demanded, as a condition of the proposed union, the circumcision of the Shechemites: the practice could not have been unknown to the Hivites, for the Phœnicians (Her. ii. 104), and probably most of the Canaanite tribes were circumcised. They therefore assented; and on the third day, when the pain and fever resulting from the operation were at the highest [CIRCUMCISION], Simeon and Levi, own brothers to Dinah, as Josephus observes (A.t. i. 21, § 1; δμομήτριοι άδελφοί), attacked them unexpectedly, slew all the males and plundered their city. Jacob's remark (ver. 30) does not imply any guiltiness on the part of his sons in this transaction; for the brothers were regarded as the proper guardians of their sister's honor, as is still the case among the Bedouins; but he dreaded the revenge of the neighboring peoples, and even of the family of Hamor, some of whom appear to have survived the massacre (Judg. ix. 28). His escape, which was wonderful, considering the extreme rigo with which the laws of blood-revenge have in all ages prevailed in the East [BLOOD, REVENGER OF], is ascribed to the special interference of Jehovah (xxxv. 5). Josephus omits all reference to the treachery of the sons of Jacob, and explains the easy capture of the city as occurring during the celebration of a feast (Ant. i. 21, § 2). The object for which this narrative is introduced into the book of Genesis probably is, partly, to explain the allusion in Gen. xlix. 5-7, and partly to exhibit the consuquences of any association on the part of the Hebrews with the heathens about them. Ewald (Geschichte, i. 488) assumes that the historical foundation of the narrative was furnished by an actual fusion of the nonnad Israelites with the acorigines of Shechem, on the ground that the daughters of the patriarchs are generally noticed with an ethnological view; the form in which the narrative appears being merely the coloring of a late author: such a view appears to us perfectly inconsistent with the letter and the spirit of the

DI'NAITES ("NO"7: Acuraion; [Ales. Ar

test.

W.L.B.

raue:] Dinosi, Ezr. iv. 9), the name of some of the preaching of St. Paul. Euseb. (H. E. iii. 4) makes Cutheen colonists who were placed in the cities of Samaria by the Assyrian governor, after the conquest and captivity of the ten tribes under Shalmaneser. They remained under the dominion of Persia, and united with their fellow-colonists in opposition to the Jews; but nothing more is known of them. Junius (Comm. in loc.), without any authority identifies them with the people known to geographers by the name *Dennani*. W. A. W.

DINHA'BAH (דְרָהֶרָה) [perb. = הַזָּקָ, depression, low land, Dietr.]: Aevraßd: Denaba; Gen. xxxvi. 32; 1 Chr. i. 43), the capital city, and probably the birthplace, of Bela, son of Beor, king of Edom. Eusebius (Onomasticon, s. v.) mentions a village Dannea (Damnaba, Jerome), eight miles from Areopolis, or Ar of Moab (on the road to Arnon: Jerome), and another on Mount Peor, seven miles from Esbus (Heshbon); but neither of these has claim to be the Dinhabah of Scripture. R. Joseph, in his Targum (on 1 Chr. i. 43, ed. Wilkins), finds a significance in the name. After identifying Balaam the son of Beor with Laban the Syrian, he adds, "And the name of his capital city was Din-

habah, for it was given (איתיהיבת) him as a present." With as little probability Gesenius conjectured that it might signify dominus, i. e. locus direptionis, i. e. prædonum latibulum. The name is not uncommon among Semitic races. Ptolemy (v. 15, § 24) mentions AardBa in Palmyrene Syria, afterwards a bishop's see; and according to Zosimus (iii. 27) there was a Δardβη in Babylonia. (Kno-

uel, Genesis.) The Peahito Syriac has

Daihab, probably a mistake for any

W. A. W.

* DINNER. [MEALS.]

DIONYS'IA (Aurógia: Bacchanalia), "the feast of Bacchus," which was celebrated, especially in later times, with wild extravagance and licentious enthusiasm. Women, as well as men, joined in the processions (diagoi), acting the part of Msenads, crowned with ivy and bearing the thyrsus (cf. Ovid, Fast. iii. 767 ff.; Broukh. ad Tib. iii. 6, 2, who gives a coin of Maroneia, bearing a head of Dionysus crowned with ivy); and the phallus was a principal object in the train (Herod. ii. 48, 49). Shortly before the persecution of Antiochus Epiphanes, 168 B. C., in which the Jews "were compelled to go in procession to Bacchus carrying ivy" (2 Macc. vi. 7), the secret celebration of the Bacchanalia in Italy had been revealed to the Roman senate (B. C. 186). The whole state was alarmed by the description of the excesses with which the festival was attended (Liv. xxxix. 8 ff.), and a decree was passed forbidding its observance in Rome or Italy. This fact offers the best commentary on the conduct of Antiochus; for it is evident that rites which were felt to be incompatible with the comparative simplicity of early Roman worship must have been pesuliarly revolting to Jews of the Hasmonsean age 'cf. Herod. iv. 79, Σκύθαι τοῦ Βακχεύειν πέρι Ελλησιν δνειδί(ουσι). Β. F. W. Ελλησιν δνειδίζουσι).

DIONYS'IUS THE AREOP'AGITE (Lioriorios & 'Apeomayirns, Acts xvii. 34), an eminent Athenian, converted to Christianity by the

him, on the authority of Dionysius, bishop of Corinth, to have been first bishop of Athens (see also H. E. iv. 23). According to a later tradition given in the martyrologies on the authority of Aristides the apologist, he suffered martyrdom at Athens. On the writings which were once supposed to have had Dionysius for their author, but which are now confessed to be spurious and the production of some Neo-Platonists of the 6th century, see an elaborate discussion in Herzog's Encyklopädie; and for further legends respecting himself, Suidas s. v., and the article in the Dictionary of Biography and Mythol. 79.ª H. A.

DIONY'SUS (Atórvoos, Atórvoos, of uncer-tain derivation), also called BACCHUS (Bárxos, lanxos, the noisy god: after the time of Herod otus), was properly the god of wine. In Homes he appears simply as the "frenzied" god (11. vi. 132), and yet "a joy to mortals" (11. xiv. 825); but in later times the most varied attributes were centred in him as the source of the luxuriant fertility of nature, and the god of civilization, gladness, and inspiration. The eastern wanderings of Dionysus are well known (Strab. xv. 7, p. 687: Dict. Biogr. s. v.), but they do not seem to have left any special trace in Palestine (yet cf. Luc. de Syria Dea, p. 886, ed. Bened.). His worship, however, was greatly modified by the incorporation of Eastern elements, and assumed the twofold form of wild orgies [DIONYSIA] and mystic rites. То the Jew Dionysus would necessarily appear as the embodiment of paganism in its most material shape, sanctioning the most tumultuous passions and the worst excesses. Thus Tacitus (*Hist.* v. 5) rejects the tradition that the Jews worshipped Bacchus (Liberum patrem; cf. Plut. Quast. Conv. iv. 6). on the ground of the "entire diversity of their principles" ("nequaquam congruentibus institutis"), though he interprets this difference to their discredit. The consciousness of the fundamental opposition of the God of Israel and Dionysus explains the punishment which Ptolemæus Philopator inflicted on the Jews (8 Macc. ii. 29), "branding them with the ivy-leaf of Dionysus," though Dionysus may have been the patron god of the Ptolemies (Grimm, on the Macc.). And it must have been from the same circumstance that Nicanor is said to have threatened to erect a temple of Dionysus upon the site of the Temple at Jerusalem (2 Macc. xiv. 88). B. F. W.

DIOSCORIN'THIUS. [MONTHS.]

DIOT'REPHES (Διοτρεφήs [Jove-nourished]), a Christian mentioned in 3 John 9, as φιλοπρωτεύων in some church to which St. John had written, and which, on account of his influence, did not receive the Apostle's authority, nor the messengers whom he had sent. It is entirely uncertain what church is meant, as it is who Gaius was to whom the epistle is addressed. [GAIUS.]

H. A. For interesting remarks on the character of Diotrephes and his probable motives for such violent opposition to the Apostle, the reader is referred to Neander's Pflanzung, ii. 647, 648 (Robinson's revised tr. p. 376). See also Lücke, Düsterdieck and Braune (Lange's Bibelwerk, Theil xv.) on John's Third Epistle. H.

• The thouses have a little chapel consecrated to the only structure at present (1869) within the pretaint Dionysius on the north side of the Areopagus, cincts of the hill.

DISCIPLE. [EDUCATION; SCHOOLS]

* DISCOVER is often used in the A. V. in the sense of to uncover, e. g. Deut. xxii. 30; 2 Sam. xxii. 16; Is. xxii. 8; Mic. i. 6. "The voice of the LORD discovereth the forests " (Ps. xxix. 9), that is, the thunderbolt strips the trees of their bark. branches, and leaves. Α.

DISCUS ($\delta(\sigma \kappa os)$), one of the exercises in the Grecian gymnasia, which Jason the high-priest introduced among the Jews in the time of Antiochus Epiphanes, and which he induced even the priests to practice (2 Macc. iv. 14) The discus was a circular plate of stone or metal, made for throwing to a distance as an exercise of strength and dexterity. It was indeed one of the principal gymnastic exercises of the Greeks, and was practiced in the heroic age. (For details and authorities, see Dict. of Gr. of Rom. Ant. s. v.)

Discibolus. (Osteriey, Denk. der att. Kunst, vol i. no. 189.)

DISH. (1.) לכָּכָ, Gesen. p. 965: see BASIN. (צ.) אַלָחִית, in plur. only אַלָחִית, צָלָחָה (ג. ₩ ΠΠ?ξ: ύδρίσκη, δ αλάβαστρος, λέβης: vae,

ebes. (3.) הערד: see Charger.

In N. T. TouBallow, Matt. xxvi. 23, Mark xiv. 80. In ancient Egypt, and also in Judzea, guests at the table handled their food with the fingers, but spoons were used for soup or other liquid food. when required (Wilkinson, Anc. Egypt. i. 181, 2d ed.). The same is the case in modern Egypt. Each person breaks off a small piece of bread, dips it in the dish, and then conveys it to his mouth, together with a small portion of the meat or other contents of the dish. To pick out a delicate morsel and hand it to a friend is esteemed a compliment, and to refuse such an offering is contrary to good manpers. Judas dipping his hand in the same dish with our Lord was showing especial friendliness and

Tum. iv. 7, vii. 13, 19). This is also rendered corrive or half sectarius, i. e. probably a cup or the Dispersion, as a distinct element influencing that rether than a dish. $T_{\rho\nu\beta\lambda'\rho\nu}$ is in Vulg. the entire character of the Jews, dates from the

Matt. xxvi. 23, paropeis; in Mark xiv. 20, cathene. (Schleusner, Lex. in N. T. $\tau_{\rho\nu\beta\lambda}$ lov; Lane, Mod Egypt. i. 193; Chardin, Voy. iv. 53, 54; Niebuhr, Descr. de l'Arab. p. 46). [BASIN.] H. W. P.

DISHAN (דייטן [antelope]: [in Gen.,] 'Piody; [Alex. Perowy; in 1 Chr., Rom. Arody; ver. 38, Vat. omits, Alex. Piowr; ver. 42, Vat. Alex. $\Delta a_{i\sigma\omega\nu}$:] Discin), the youngest son of Seir the Horite (Gen. xxxvi. 21, 28, 30; 1 Chr. i. 38, 42). W. L. B.

DI'SHON (אישרן [antelope]: בישרן ואד [antelope]: באסמטי: וא son). 1. The fifth son of Seir (Gen. xxxvi. 21, 26, 30; 1 Chr. i. 38).

2. [In 1 Chr., *Aaugur.*] The son of Anab and grandson of Seir (Gen. xxxvi. 25; 1 Chr. i. 41). Dishon and Dishan belong to the same root, which may possibly reappear in the name Deisk noticed by Abulfeda (Hisl. Anteisl. p. 196). The geographical position of the tribes descended from these patriarchs is uncertain. Knobel (Comm. in loc.) places them to E. and S. E. of the Gulf of Akaba, on the ground that the names of the sons of Dishon, Eshban, and Hemdan may be identified with Usbany and Humeidy, branches of the tribe of Omran. Such identifications must be received with caution, as similar names are found in other parts of Arabia - Hamde, for instance, near Tayf, and again Hamdan, which bears a still closer resemblance to the original name, near Sana (Burckhardt's Arabia, i. 156, ii. 376). W. L. B.

• DISSOLVE has once (Dan. v. 16) the antiquated sense of "solve," "explain." Belshazzar says to Daniel: "And I have heard of thee, that thou canst make interpretations, and dissolve doubts," &c. (A. V.). H.

DISPERSION, THE JEWS OF THE or simply THE DISPERSION, was the general title applied to those Jews who remained settled in foreign countries after the return from the Babylonian exile, and during the period of the second Temple. The original word applied to these foreigy

settlers (1777); cf. Jer. xxiv. 5, xxviii. 4, &c., from

, to strip naked; so אַכָּר נָלוּתָא, Ezr. vi 16) conveys the notion of spoliation and hereavement, as of men removed from the Temple and home of their fathers; but in the LXX. the ideas of a "sojourning" (meroikeola) and of a "colony" (à roinía) were combined with that of a "captivity " ($ai\chi\mu a\lambda\omega\sigma fa$), while the term "dispersion

(Searwood, first in Deut. xxviii. 25, 77] 27; cf. Jer. xxxiv. 17), which finally prevailed, seemed to imply that the people thus scattered "to the utmost parts of heaven" (Deut. xxx. 4), "in bondage among the Gentiles" (2 Macc. i. 27), and shut out from the full privileges of the chosen race (John vii. 35), should yet be as the seed sown for a future harvest (cf. Is. xlix. 6 Heb.) in the strange lands where they found a temporary resting-place (1 Pet. i. 1, παρεπιδήμοις διασποράς). The schism which had divided the first kingdom was forgotten in the results of the general calamity. The dispersion was not limited to the exiles of Judah, but included "the tweive tribes " (Jam. i. 1, Tais dudera ountimacy. Τρυβλίον is used in LXX. for ΤζΥΤ?, (Aais rais & rfi διαστορά), which expressed the pometimes in A. V. "charger" (Ex. xxv. 29; completeness of the whole Jewish nation (Acts xxv. , 10 Duberaquion .

804 DISPERSION, JEWS OF THE

Babyionian exile. Uncertain legends point to earlier settlements in Arabia, Ethiopia, and Abyssinia; but even if these settlements were made, they were isolated and casual, while the Dispersion, of which Babylon was the acknowledged centre, was the outward proof that a faith had succeeded to a kingdom. Apart from the necessary influence which Jewish communities bound by common laws, ennobled by the possession of the same truths, and animated by kindred hopes, must have exercised on the nations among whom they were scattered, the difficulties which set aside the literal observance of the Mosaic ritual led to a wider view of the scope of the law, and a stronger sense of its spiritual significance. Outwardly and inwardly, by its effects both on the Gentiles and on the people of Israel, the Dispersion appears to have been the clearest providential preparation for the spread of Christianity.

But while the fact of a recognized Dispersion must have weakened the local and ceremonial influences which were essential to the first training of the people of God, the Dispersion was still bound together in itself and to its mother country by religious ties. The Temple was the acknowledged centre of Judaism, and the faithful Jew everywhere contributed the half shekel towards its maintenance (7) Sispaynov, Matt. xvii. 21; cf. Mishna, Shekalim. 7, 4; Joseph. Ant. xvi. 6); and, in part at least, the ecclesiastical calendar was fixed at Jerusalem, whence beacon-fires spread abroad the true date of the new moons (Mishna, Rosh-Hush una, 2, 4). The tribute was indeed the simplest and most striking outward proof of the religious unity of the nation. Treasuries were established to receive the payments of different districts (Joseph. Ant. xviii. 9, 1; cf. Ant. xvi. 6, 5, § 6), and the collected sums were forwarded to Jerusalem, as in later times the Mohammedan offerings were sent to Mecca (Jost, Gesch. d. Judenth. i. 337 n.; Cic. pro Flacco, 28).

At the beginning of the Christian era the Dispersion was divided into three great sections, the Babylonian, the Syrian, the Egyptian. Precedence was yielded to the first. The jealousy which had originally existed between the poor who returned to l'alestine and their wealthier countrymen at Babylon had passed away, and Gamaliel wrote "to the sons of the Dispersion in Babylonia, and to our brethren in Media . . . and to all the Dispersion of Israel " (Frankel, Monateschrift, 1853, p. 413). From Babylon the Jews spread throughout Persia, Media, and Parthia; but the settlements in China selong to a modern date (Frankel, I. c. p. 463). The few details of their history which have been preserved bear witness to their prosperity and influence (Joseph. Ant. xiii. 2, § 2 f., xviii. 9). No schools of learning are noticed, but Hillel the Elder and Nahum the Mede are mentioned as coming from Babylon to Jerusalem (Frankel).

The Greek conquests in Asia extended the limits of the Dispersion. Seleucus Nicator transplanted large bodies of Jewish colonists from Babylonia to the capitals of his western provinces. His policy was followed by his successor, Antiochus the Great; and the persecutions of Antiochus Epiphanes only served to push forward the Jewish emigration to the remoter districts of his empire. In Armenia the Jews arrived at the greatest dignities, and Nisthis became a new centre of colonization (Frankel, spicuous to attract the attention of the satiriste pp. 454-456). The Jews of Cappadocia (1 Pet. i. (Mart. Ep. xi. 94; Juv. Sat. iii. 14). It are casually mentioned in the Mishna; and a

DISPERSION, JEWS OF THE

prince and princess of Adiabane adopted the Jewish faith only 30 years before the destruction of the Temple (Joseph. Ant. xx. 2). Large settlements of Jews were established in Cyprus, in the islands of the Ægsean (Cos, Delos: Joseph. Ant. xiv. 10) and on the western coast of Asia Minor (Ephesus, Miletus, Pergamus, Halicarnassus, Sardis: Joseph. The Romans confirmed to them the Ant. 1. c.). privileges which they had obtained from the Syrian kings; and though they were exposed to sudden outbursts of popular violence (Joseph. Ant. xviii. 9; B. J. vii. 3), the Jews of the Syrian provinces gradually formed a closer connection with their new homes, and together with the Greek language adopted in many respects Greek ideas. [HELLEN-ISTS.]

This Hellenizing tendency, however, found its most free development at Alexandria [ALEXAN-DRIA]. The Jewish settlements established there by Alexander and Ptolemy I. became the source of the African Dispersion, which spread over the north coast of Africa, and perhaps inland to Abyssinia (the Falasha). At Cyrene (Joseph. Ant. xiv. 7 § 2; JASON) and Berenice (Tripoli) the Jewish in habitants formed a considerable portion of the pop ulation, and an inscription lately discovered at the latter place (Frankel, p. 422) speaks of the justice and clemency which they received from a Roman governor (cf. Joseph. Ant. xvi. 6, § 5). The African Dispersion, like all other Jews, preserved their veneration for the "holy city" (Philo, Leg. ad Caium, § 36; in Flace. c. 7), and recognized the universal claims of the Temple by the annual tribute (Joseph. I. c.) But the distinction in language led to wider differences, which were averted m Babylon by the currency of an Aramaic dialect. The Scriptures were no longer read on the Sabbath (Frankel, p. 420; Vorstudien, p. 52 ff.), and nc fire-signals conveyed the dates of the new moons to Egypt (cf. Frankel, p. 419, n.). Still the national spirit of the African Jews was not destroyed. After the destruction of the Temple the Zealots found a reception in Cyrene (Joseph. B. J. vii. 11); and towards the close of the reign of Trajan, A. D. 115, the Jewish population in Africa rose with terrible ferocity (Dion, lxviii. 82). The insurrection was put down by a war of extermination (Euseb. H. \vec{E} . iv. 2); and the remnant who escaped established themselves on the opposite coast of Europe, as the beginning of a new Dispersion.

The Jewish settlements in Rome were consequent upon the occupation of Jerusalem by Pompey, B. C. 63. The captives and emigrants whom he brought with him were located in the trans-Tiberine quarter, and by degrees rose in station and importance (Philo, Leg. ad Caium, § 23 ff.). They were favored by Augustus and Tiberius after the fall of Sejanus (Philo, L c.); and a Jewish school was founded at Rome (Frankel, p. 459). In the reign of Claudius [CLAUDIUS] the Jews became objects of suspicion from their immense numbers (Dion, lx. 6); and the internal disputes consequent, perhaps, upon the preaching of Christianity, led to their banishment from the city (Suet. Claud. 25: "Judzeos impulsore Chresto assidue tumultuantes Roma expulit." Acts xviii. 2). This expulsion, if general, can only have been temporary, for in a few years the Jews at Rome were numerous (Acta xxviii. 17 ff.), and continued to be sufficiently con-

The influence of the Dispersion on the rapid pro

maigation of Christianity can acarcely be overrated. [72, B., where the $\mu dsrts$ is carefully distinguished The course of the apostolic preaching followed in a regular progress the line of Jewish settlements. sionate and irresistible prophecies of Scripture we The mixed assembly from which the first converts were gathered on the day of Pentecost represented each division of the Dispersion (Acts ii. 9-11; (1) Parthians . . . Mesopotamia; (2) Judza (i. e. Syria) . . . Pamphylia; (3) Egypt . . . Greece; (4) Romans . . .), and these converts naturally prepared the way for the Apostles in the interval which preceded the beginning of the separate apos tolic missions. The names of the seven deacons are all Greek, and one is specially described as a proselyte (Acts vi. 5). The church at Antioch, by which St. Paul was entrusted with his great work among the heathen (Acts xiii. 1), included Barnahas of Cyprus (Acts iv. 36), Lucius of Cyrene, and Simeon, surnamed Niger ; and among his "fellowlaborers " at a later time are found Aquila of Pontus (Acts xviii. 2), Apollos of Alexandria (Acts xviii. 24; cf. 1 Cor. iii. 6), and Urbanus (Rom. xvi. 9), and Clement (Phil. iv. 3), whose names, at least, are Roman. Antioch itself became a centre of the Christian Church (Acts xiii. 1, xiv. 26, xv. 22, xviii. 22), as it had been of the Jewish Dispersion; and throughout the apostolic journeys the Jews were the class to whom "it was necessary (draykaior) that the word of God should be first spoken " (Acts xiii. 46), and they in turn were united with the mass of the population by the intermediate body of "the devout " (of ore Boueros) which had recognized in various degrees "the faith of the God of Israel."

The most important original authorities on the Dispersion are Joseph. Ant. xiv. 10, xiv. 7; c. Apion. ii. 5; Philo, Leg. ad Caium; id. c. Flaccum. Frankel has collected the various points together in an exhaustive essay in his Monatsschrift, Nov. Dec. 1853, 409-411, 449-451. Cf. Jost, Gesch. d. Judenth. i. 336-344; Ewald, Gesch. d. Volkes Israel, iv. B. F. W.

DISTAFF, Prov. xxxi. 19. [SPINNING.]

* DIVES. See the last paragraph under LAZARUS.

DIVINATION (DO? : parrela, Fz. xiii 1; μαγεία, Wisd. xvii. 7; D'DDD, φαρμακεία,

reneficium, divinatio, Is. xlvii. 9; 27, ψιθυρισ us, &c.). This art "of taking an aim of divine matters by human, which cannot but breed mixture of imaginations " (Bacon, Ess. xvii.) has been universal in all ages, and all nations alike, civilized and savage. It arises from an impression that in the absence of direct, visible, guiding Providence, the Deity suffers his will to be known to men, partly by inspiring those who from purity of character or elevation of spirit are susceptible of the divine afflatus (deoudrreis, erbouriarral, erorarikol), and partly by giving perpetual indications of the future, which must be learnt from experience and observation (Cic. Dir. i. 18; Plin. The first kind of divination was called xxx. 5). Natural (ärexvos, àbloarros) in which the melium of inspiration was transported from his own individuality, and became the passive instrument of supernatural utterances (An. vi. 47; Ov. Met. i. 640, &c.). As this process involved violent convulsions, the word particly is derived from pair-

have none of these unnatural distortions (Num. xxiii. 5; Ps. xxxix. 3; Jer. xx. 9), although, as we shall see, they were characteristic of pretenders to the gift.

The other kind of divination was artificial $(\tau \epsilon \chi$ with), and probably originated in an honest conviction that external nature sympathized with and frequently indicated the condition and prospects of mankind; a conviction not in itself ridiculous, and fostered by the accidental synchronism of natural phenomena with human catastrophes (Thuc. iii. 89; Joseph. B. J. vi. 5, § 3; Foxe's Martyrs, iii. 406, &c.). When once this feeling was established the supposed manifestations were infinitely multiplied, and hence the numberless forms of imposture or ignorance called kapnomancy, pyromancy, arithmomancy, libanomancy, botanomancy, kephalomancy, &c., of which there are abundant accounts in Cic. de Div.; Cardan de Sapientià; Anton. v. Dale, de Orig. Idol.; Fabricius, Bibl. Ant. pp. 409-426; Carpzov, App. Crit. 540-549; Potter's Antiq. i. ch. viii. ff. Indeed there was scarcely any possible event or appearance which was not pressed into the service of augury, and it may be said of the ancient Greeks and Romans, as of the modern New Zealanders, that "after uttering their karakias (or charms) the whistling of the wind, the moving of trees, the flash of lightning, the peal of thunder, the flying of a bird, even the buzz of an insect would be regarded as an answer " (Taylor's New Zealand, p. 74; Bowring's Siam, i. 153 ff.). A system commenced in fanaticism ended in deceit. Hence Cato's famous saying that it was strange how two augurs could meet without laughing in each other's face. But the supposed knowledge became in all nations an engine of political power, and hence interest was enlisted in its support (Cic. de Legg. ii. 12; Liv. vi. 27; Soph. Ant. 1055; Mic. iii. 11). It fell into the hands of a priestly caste (Gen. xli. 8; Is. xlvii. 13; Jer. v. 31; Dan. ii. 2), who in all nations made it subservient to their own purposes. Thus in Persia, Chardin says that the astrologers would make even the Shah rise at midnight and travel in the worst weather in obedience to their suggestions.

The invention of divination is ascribed to Prometheus (Æsch. Pr. Vinct. 492), to the Phrygians and Etrurians, especially sages (Cic. de Dir. 1, and Clem. Alex. Strom. i. 326, where there is a great deal more on the subject), or (as by the Fathers generally) to the Devil (Firmic. Maternude Errore, Procem.; Lactant. ii. 16; Minuc. Felix, Oct. 27). In the same way Zoroaster ascribes all magic to Ahriman (Nork, Bram. und Rab. p. 97). Similar opinions have prevailed in modern times (Sir Thomas Browne, Vulg. Err. i. xi.).

Many forms of divination are mentioned in Scripture, and the subject is so frequently alluded to that it deserves careful examination. We shall proceed to give a brief analysis of its main aspects as presented in the sacred writers, following as fat as possible the order of the books in which the professors of the art are spoken of.

They are first mentioned as a prominent body in

the Egyptian court, Gen. xli. 8. (1.)

(εξηγηταί; Hosych. ό περί ερείων και διοσημειων erfai, and alludes to the fearing mouth and ¿Fryoducros; Aqu. Koupicoral). They were a treaming hair of the possessed seer (Plat. Tim. class of Egyptian priests, em. nent for learning

Digitized by GOOG

306 DIVINATION

(lepoypaquareis). The name may be derived from | properly means "spirits of the dead," and then Diff., a style; or, according to Jablonski, from an Egyptian word Chertom = thaumaturgus (Gesen. s. v.). For other conjectures see Kalisch, Gen. p. 347: Heidegger, Hist. Patr. xx. 23. Of course it must have the same derivation in Dan. i. 20, and therefore cannot be from the Chaldee Dhardamand = skilled in science (Jahn, Arch. Bibl. § 402). If their divination was connected with drawn figures, it is paralleled by the Persian Rummal (Calmet); the modern Egyptian Zäirgeh, a table of letters ascribed to Idrees or Enoch (Lane, i. 354), the renowned Chinese Y-king, lines discovered by Fouhi on the back of a tortoise, which explain everything, and on which 1450 learned commentaries have been written (Huc's China, i. 123 ff.); and the Jamassu or marks on paper, of Japan (Kæmpfer's Hist. ch. xv.)

2. בקר (oopioral, Ex. vii. 11; Suid. obres έλεγον πάντας τοὺς πεπαιδευμένους: conjectores). Possibly these, as well as their predecessors, were merely a learned class, invested by vulgar superstition with hidden power. Daniel was made head of the college by Nebuchadnezzar (Dan. v. 11).

ובשפים (להמסוסה, Ex. vii. 11, בשפים (להמסופים לבשוקים בשוקים אונים) annanol: incantatores : the variety of words used in the versions to render these names, shows how vague was the meaning attached to them). The

original meaning of TUD is to mutter; and in Ex. vii. 11, the word seems to denote mere jugglers, of the class to which belonged James and Jambres (2 Tim. iii. 8). How they produced the wonders which hardened the heart of Pharaoh, whether by mechanical or chemical means, or by mere legerdemain, or by demoniacal assistance (as supposed by the Fathers, and Joseph. Ant. ii. 5), it is idle to conjecture. Michaelis (adopting an Arabic deri-

vation of 키辺シ) explains them to be "astrologers," such as in ancient times were supposed (from their power to foretell eclipses, &c.) to be able to control the sun and moon by spells (Virg. An. iv. 489; Ov. Met. xii. 263. "While the laboring moon eclipses at their charms," Milton. "A witch, and one so strong she could control the moon," Shakespeare, The Tempest). Women were supposed to be peculiarly addicted to these magical arts (Ex. xxii. 18), which were forbidden to the Jews on theocratic grounds, independently of their liability to abuse.

4. דערים, Lev. xix. 31, xx. 6 (אשטידמן,

ecoles ; wizards, from DT, to know : cf. weiser Mann, kluge Frau, as daluwr, from ddnui): those that could by whatever means reveal the future. The Rabbis derive this word from a certain beast , addua, in anape like a man (raraßherdda), the rones of which the diviner held in his teeth Maimon. de Idol. vi. 3; Bulenger, de Div. iii. \$3; Delrio, Disquis. Mag. iv. 2; Godwyn's Mos.
 \$\$ Aar. iv. 10). The Greek diviner ate τὰ κυριώrara μόρια ζώων μαντικών (Porphyr. de Abstinent. h.,. For other bone divinations see Rubruquis' China, p. 65, and Pennant's Scotland, p. 88 (in Pinkerton).

5. הובות, Lev. xx. 6; Is. viii. 19, xix. 3; tryastplusson, verpoudrters: qui Pythones con-

by an easy metonymy those who consulted th דירישין אל , Deut. xviii. 10; שאל אוב) ol להפאשידים : ol להבאשידים : הקורוים : הקורוים a mortuis veritatem. But Shuckford, who denies that the Jews in early ages believed in spirits, makes it mean " consulters of dead idols," Connect. ii. 395 ff.). They are also called Pythones; tyyaorp πόλαι rurl Πύθωνας καλουμένους (Plut. de Def. Or. 414; Cic. de Div. i. 19). Hence the πνεύμα Πύθωνος, Acts xvi. 16. These ventriloquists "peeped and muttered" (cf. $\tau p(\zeta_{euv}, Il. xxiii. 101;$ "squeak and gibber," Shakespeare, Jul. Cors.) from the earth to imitate the voice of the revealing "familiar" (Is. xxix. 4, &c.; 1 Sam. xxviii. 8;

Lov. xx. 27, cf. orepropartis, Soph. Frag.). 218 properly means a bottle (Job xxxii. 19), and was applied to the magician, because he was supposed to be influted by the spirit (daynovor), like the ancient Ευρυκλείs (els άλλοτρίας γαστέρας erous, Ar. Vesp. 1017, "malum spiritum per verends nature excipiebat." Schol. in Ar. Plat.). Of this class was the witch of Endor (Joseph. Ant. vi. 14, § 2), in whose case intended imposture may have been overruled into genuine necromancy (Ecclus. xlvi. 20). On this wide subject see Chrysost. ad 1 Cor. xii.; Tert. adv. Marc. iv. 25, de Anima, 57; Aug. de Doctr. Christ. § 33; Cic. Tusc. Disp. i. 16, and the commentators on An. vi.; Critici Sacri, vi. 831; Winer, s. v. Todienbeschwörer; Le Moyne, Var. Sacr. p. 993 ff.; Selden, de Diis Syr. i. 2, and above all Böttcher, de Inferis, pp. 101-121, where the research displayed is marvellous. Those who sought inspiration, either from the demons or the spirits of the dead, haunted tombs and caverns (Is. lxv. 4), and invited the unclean communications by voluntary fasts (Maimon. de Idol. ix. 15; Lightfoot, Hor. Hebr. ad Matt. z. 1). That the supposed $\psi v \chi o \mu a v \tau \epsilon i a$ was often effected by ventrilo-quism and illusion is certain; for a specimen of this even in modern times see the Life of Benvenuto Cellini.

6. קָקָמָים קָקָמָים (μαντευόμενοι μαντείαν: qui ariolos scisciletur ; Deut. xviii. 10). (As the most complete list of diviners is given in this passage, we shall follow the order of the kinds there enumerated.) This word involves the notion of "cutting," and therefore may be connected with the Chald.

from إزار (from إزار), to cut), Dan. ii. 27, iv. 7, de. and be taken to mean astrologers, magi, genethlisci, Sc. (Dict. of Ant. art. Astrologia ; Juv. vi. 582 ff.; Diod. Sic. ii. 30; Winer, s. vv. Magier, Sterne). Others refer it to the KAnpouderess (Schol. ad Eur. Hipp. 1057), since the use of lots was very familiar to the Jews (Gataker on Lots, ad init.); but it required no art to explain their use, for they were regarded as directly under God's control (Num. xxvi. 55; Esth. iii. 7; Prov. xvi. 83, xviii. 18). Both lots and digitorum micatio (odd and even) were used in distributing the duties of the Temple (Otho, Lex. Rab. s. v. Digitis micando).

7. אָערוֹכָן, Mic. v. 12; 2 K. xxi. 6; observing sommin; A. V. "an observer of times;" RAP Sovi Comevos (always in LXX., except in Lev. xiz 26, where probably they followed a different reading from AID, a bird, opribookoneir) = & in vin mill, sentriloqui) [D'AN, Is. xix. 8]. The word] raroundows oroxa (openes, Lex. Cyr. ; and aroun

Heaven. It is derived from 122, ω cover, and may mean generally "using hidden arts" (Is. ii. 5; Jer. xxvii. 9). If the LXX. understand it correctly, it refers to that *Adyar mapartiphous* (Suid.), which was common among the Jews, and which they called Bath Kol; of which remarkable instances are found in Gen. xxiv. 14; 1 Sam. xiv. 9. 10; 1 K. xx. 33. After the extinction of the spirit of prophecy it was considered by the Jews as a sort of substitute for the loss. For a curious dissertation on it see Lightfoot, ad Matt. iii. 13. A belief in the significance of chance words was very prevalent among the Egyptians (Clem. Alex. Strom. i. 304; Plut. de Is. 14), and the accidental sigh of the engineer was sufficient to prevent even Amasis from removing the monolithic shrine to Sais (Wilkinson, Anc. Egypt. iv. 144). The universality of the belief among the ancients is known to every scholar (Cic. de Div. i.; Herod. ii. 90; Virg. An vii. 116, &c.). From the general theory of the possibility of such omens sprang the use of the Sortes Biblicse, &c. (Niceph. Greg. viii. Aug. Ep. 119; Prideaux, Connect. ii. 376, &c.; Cardan, de Varietate, p. 1040).

LI עין be derived from עין, it will mean 'one who fascinates with the eyes," as in the Syr. Vers. (cf. Vitringa, Comment. ad Is. ii. 6).

belief in the opparatos Bigkaros (27 12) was universal, and is often alluded to in Scripture (Deut. xxiii. 6; Matt. xx. 15; Tob. iv. 7, μη φθονησάτω σου δ δφθαλμός, 1 Sam. xviii. 9, "Saul eyed David"). The well-known passages of Pliny and the ancients on the subject are collected in Potter's Ant. i. 383 ff.

Others again make the עלנים (Is. ii. 6, &c.) " soothsayers," who predicted " times " as in A. V., from the observation of the clouds (Aben Ezra on Lev. xix. 26) and other Scoonpular, as lightnings, comets, meteors, &c. (Jer. x. 2), like the Etruscan Fulguratores (Cic. Div. i. 18; Plin. ii. 43, 53; Plut. de Superst. ; Hom. Od. v. 102; Virg. Ecl. i. 16; Humboldt's Cosmos, ii. 135, ed. Sabine). Possibly the position of the diviner in making these observations originated the Jewish names for East and West, namely, front and back (Godwyn, iv. 10, but Carpzov disputes the assertion, Ap. Crit. p. 541). The practice naturally led to the tabulation of certain days as lucky or unlucky (Job iii. 5, " monthly prognosticators;" Is. xlvii. 13, hµépas raparypeiove, Gal. iv. 10), just as the Greeks and Romans regarded some days as candidi, others as atri (Hes. Opp. et D. 770; Suet. Aug. 92, &c.). If we had space, every one of the superstitions alluded to might be paralleled in modern times.

In Judg. ix. 37, the expression "terebinth [in-correctly "plain," A. V.] of *Meonenim* (enchant-mente)" [properly "enchanters," or "diviners"] refers not so much to the general sacredness of great trees (Hom. Od. xiv. 328, habite Graits oracula quercus, Virg. Georg.). as to the fact that (probably) here Jacob had buried his amulets (Gen. EXXV. 4; Stanley, S. of P. p. 142'.

8. בחשרם (olari (offeroi : observantes angursa; Ps. lviii. 5; 2 K. xvii. 17, xxi. 6, &c.): A. V. 'enchanters"; ophiomants (Bochart, Hieroz. ii. "But if another kind was that practiced by Elisha. 1. 383), from 2017, to hiss ; people who, like the 2 K. xiii. 15" (Sir Thomas Browne, Valg. Errore, ancient Psylli (Plin. H. N. vii. 2, xviii. 4) and Marmaridar (Sil. Ital. iii. 801),

Ad quorum cantus serpens oblita venen Ad quorum tactum mites jacuere cerasta

were supposed to render serpents innocuous and obedient (Ex. vii. 9; Jer. viii. 17; Eccl. x. 11), chiefly by the power of music (Nicand. Theriac. 162; Luc. iz. 891; Sil. Ital. 8, 495; Æn. vii. 753; Niebuhr's Travels, i. 189); but also no doubt by the possession of some genuine and often hereditary secret (Lane, Mod. Egypt. ii. 106 ff.; Arnob. adv. Gent. ii. 32). They had a similar power over scorpions (Francklen's Tour to Persia). The whole subject is exhausted by Bochart (Hieros tom. 11. iii. 6, de As. fide surdà).

WIN has, however, a general meaning of "learn ing by experience," like "to augur," in English Gen. xxx. 27; either because ophiomancy (Ter. Phorm. iv. 4, 26) was common, or because the word meant (as the Rabbis say) an observation of ένόδια σύμβολα, &c. (Jer. x. 2; Plin. xxviii. 5, 7). Some understand it of divinatio ex pelvibus (Plin. II. N. xxx. 2; Poli Syn. ad Deut. xviii. 10).

 שְׁבָשְׁבָים (φαρμακοl: malefici, venefici; A. V. "wizards"), from the Arabic, "to reveal," meaning not only astrologers proper (Chaldseans), but generally all the professed occult means of discovering the unknown. It might no doubt involve the use of divining-rods for the purpose of Aquelicium, &c., dependent on physical laws only partially understood (Mayo's Pop. Superstitions).

10. אבר הברים (פהמפולסטידני הברים) והבר הברים וויים
cantatores), from 727, to bind (cf. bannen = binden, Gesen. s. v.). [See Deut. xviii. 11.] Those who acquired power by uttering spells, &c. (kara-Stor; and Suros Stomos, Asch. Eum. 296;

"So the spell now works around thee And the clankless chain hath bound theu " Manfred, j. 1).

In Onkelos it is rendered 707, a mutterer ; and this would connect these "enchanters" with the Nekromanteis (No. 5, Is. xxix. 4).

11. Belomants. Alluded to in Es. xxi. 21, where Nebuchadnezzar, at the parting of two ways, uses divination to decide whether he shall proceed against Jerusalem or Rabbah, and קלקל בָּרוּצִים (דסי àraßpåsai þáßðor, LXX.; but it should be rather þísai $\beta \epsilon \lambda \eta$, or as Vulg. commiscens sagittas; the other explanations are untenable). Jerome (ad loc.) explains it of mingling in a quiver arrows on which were inscribed the names of various cities, that city being attacked the name of which was drawn out (Prid. Connect. i. 85). Estius says "he threw up a bundle of arrows to see which way they would light, and falling on the right hand he marched towards Jerusalem." The A. V. "made his arrows bright," seems to allude to a sort of σιδημομαντεία, - incorrectly. The arrows used were particolored and 7 such were kept at Mecca. Pietro della Valle saw a divination derived from the changes of 8 arrows at Aleppo, and attributed it to diabolical agency. We read of a somewhat similar custom in use among the ancient Teutons (Tac. Germ. x.), and among the Alani (Am. Marceli. xxxi.): also among the modern Egyptians (Lane, ii. 111). ···. 23, 7).

12. Closely connected with this was Eukou. or

table and the second state of the second stat

13. Κυλικομαντεία, Gen. xliv. 5 (τὸ κόνδυ τὸ ἀργυροῦν... αὐτὸς δὲ οἰωνισμοὸς οἰωνίζεται ἐν αὐτῷ; Hesych. κόνδυ, ποτήριον βασιλικόν: in quo augurari solet). Parkhurst and others denying that divination is intended, make it a mere cup of office (Bruce's Trarels, il. 657) "for which he

would search carefully " (a meaning which WT may bear. But in all probability the A. V. is right. The Nile was called the cup of Egypt, and the silver vessel which symbolized it had prophetic and mysterious properties (Hävernick. Introd. to the Pentateuch, ad loc.). The divination was by means of radiations from the water, or from magically inscribed gems, &c. thrown into it; a sort of ύδρομαντεία, κατοπτρομαντεία, οτ κρυσταλλο-μαντεία (Cardan. de Kerum Variet. cap. 93), like the famous mirror of ink (Lane, ii. 362), and the crystal divining globes, the properties of which depend on a natural law brought into notice in the recent revivals of Mesmerism. The jewelled cup of Jemsheed was a divining cup, and such a one was made by Merlin (Faerie Queene, iii. 2, 19). Jul. Serenus (de Fato, ix. 18) says that after certain incantations, a demon "vocem instar sibili edebat in aquis." It is curious to find $\kappa \nu \lambda \cdot \kappa \rho \mu a r r \epsilon [a even$ in the South Sea Islands (Daily Bild. Illustr. i. 424). For illustrations of Egyptian cups see Wilkinson, iii. 258. This kind of divination must not be confused with Cysthemanteia (Suid. s. v. κοτταβίζει»).

14. Consultation of Teraphim (Zech. z. 2; Ez. zxi. 21; ἐπερωτήσαι ἐν τοῖς γλυπτοῖς; 1 Sam. zv. 23, 리그카 = an inquirer [where the form is

 \mathbf{x} , \mathbf{z}_0 , \mathbf{y}_1 , \mathbf{z}_1 = an inquiter [where the form is

זאר: 13). These were wooden images (1 Sam. tix. 13) consulted as "idols," from which the exsited worshippers fancied that they received oracular responses. The notion that they were the embalmed heads of infants on a gold plate inscribed with the name of an unclean spirit, is Rabbi Eliezer's invention. Other Rabbis think that they may mean "astrolabes," &c. [TERAPHIM.]

15. 'Hwarookowla, or extispicium (Es. xxi. 21,

катавкопувавана. Атать к., LXX., Пр

The liver was the most important part of the sacrifice (Artemid. Oneirocr. ii. 74: Suct. Ang. 95; Cic. de Die. ii. 13; Sen. Gedy. 360). Thus the deaths of both Alexander and Hephestion were foretold $\delta_{T1} \leq \lambda_0 \beta_{00} \tau \delta \frac{1}{2} \pi a_0 \frac{1}{2} r$ lepelou (Arrist., Alex vii. 18).

16. 'Οreιρομαντεία (Dout. xiii. 2, 3; Judg. vii. 18; Jer. xxiii. 32; Joseph. Ant. xvii. 6, 4). God Henry More, and numberless other eminent men requently revealed himself by dreams when the Such also was the opiniou which led Sir M. Hele

soul was thought to be least debased by contact with the body ($e\delta\delta overa \gamma d_{0} \phi phy \delta \mu users Age.$ $\pi p \delta veral.$ Asch. Eum.). Many warnings occur in Scripture against the impostures attendant on the interpretation of dreams (Zech. x. 2, &c.). We find, however, no direct trace of seeking for dreams such as occurs in Virg. En. vii. 81; Plaut. Owcul. i. 1, 2, 61. [DREAMS.]

17. The consultation of oracles may be considered as another form of divination (Is. xli 21-24, xliv. 7). The term oracle is applied to the Holy of Holies (1 K. vi. 16; Ps. xxviii. 2, $\neg \neg \neg \neg$, $\delta \alpha \beta h p$ $\tau \delta$ $\pi \gamma a$ $\tau \bar{w} r$ $\delta \gamma i a w$ $\delta \gamma o \mu d \xi e_i$, Lex. Ms.; Hottinger, The. Phil. p. 366). That there were several oracles of heathen gods known to the Jews we may infer both from the mention of that of Baal-zebub at Ekron (2 K. i. 2-6), and from the towns named Debir. "Debir quod nos oracular sive responses possumus appellare, et ut contentiosius verbum exprimamus e verbo $\lambda \alpha \lambda \gamma \pi h \rho i o \sigma$, vel locutorium dicere" (Hieron. ad Eph. i.). The word "oracles vii a spplied in the N. T. to the Scriptures (Acts vii. 38; Rom. iii. 2, &c.). On the general subject of oracles see Anton. v. Dale de Oraculis; Dict. of Ant. art. Oraculum; Potter's Antiq. i. 286-396; Sir T. Browne, Tract xi., and Vulg. Err. vii. 12, &c.

18. It only remains to allude to the fact that superstitious importance was peculiarly attached to the words of dying men. And although the observed fact that "men sometimes at the hour of their departure do speak and reason above themselves" (*Relig. Medici*, xi.) does not of course take away from the death-bed prophecies of Scripture their supernatural character (Gen. xii.; 2 K. xiii., &c.), yet it is interesting to find that there are analogies which resemble them (*H.* xxii. 355; and the story of Calanus; Cic. *de Div.* i. 30; Shakesp. *Rich. H.*, ii. 1; Daniell, *Cicil Wars*, iii. 62, &c.).

Moses forbade every species of divination (cf. Koran, ch. v.; Cato, de Re Rust. 5, "vana superstitione rudes animos infestant," Columell. ii. 1), because a prying into the future clouds the mind with superstition, and because it would have been (as indeed it proved to be, Is. ii. 6; 2 K. xxi. 6) an incentive to idolatry; indeed the frequent denunciations of the sin in the prophets tend to prove that these forbidden arts presented peculiar temptations to apostate Israel (Hottinger, Jur. Heb. Lez. pp. 253, 254). But God supplied his people with substitutes for divination, which would have rendered it superfluous, and left them in no doubt as to his will in circumstances of danger, had they continued faithful. It was only when they were unfaithful that the revelation was withdrawn (1 Sam. xxviii. 6; 2 Sam. ii. 1, v. 23, &c.). According to the Rabbis the Urim and Thummim lasted until the Temple; the spirit of prophecy until Malachi; and the Bath Kol, as the sole means of guidance, from that time downwards (Lightfoot, l. c.; Maimonides, de Fundam. Leg. cap. 7; Abarbanel, Prolegg. in Daniel.).

How far Moses and the prophets believed in the reality of necromancy, &c., as distinguished from various forms of imposture, is a question which at present does not concern us. But even if, in thostimes, they did hold such a belief, no one will now urge that we are bound to do so at the present day And yet such was the opinion of Bacon, Bp. Hall, Barter, Sir Thomas Browne, Lavater, Gianville Henry More, and numberless other eminent new

Digitized by Google

to burn Amy Duny and Rose Cullenden at Bury | Levite, not only to secure the formal correctness of in 1664: and caused even Wesley to say, that "to give up a belief in witchcraft was to give up the Bible." We recommend this statement, in contrast with the all but 'universal discellef in such superstitions now, to thoughtful consideration. For a curious statute against witchcraft (5 Eliz. cap. 15), see Collier's Eccl. Hist. vi. 366.

Superstition not unfrequently goes hand in hand with skepticism, and hence, amid the general infidelity prevalent through the Roman empire at our Lord's coming, imposture was rampant, as a glance at the pages of Tacitus will suffice to prove. Hence the lucrative trades of such men as Simon Magus (Acts viii. 9), Bar-jesus (Acts xiii. 6, 8), the slave with the spirit of Python (Acts xvi. 16), the vagabond Jews, exorcists (Luke xi. 19; Acts xix. 13), and other yours (2 Tim. iii. 13; kev. xix. 20, dc.), as well as the notorious dealers in magical βίβλοι ('Εφέσια γράμματα) and περίεργα at Ephesus (Acts xix. 19). Among the Jews these flagrant impostors (drarewves, Joseph.) had become dangerously numerous, especially during the Jewish war; and we find them constantly alluded to in Josephus (B. J. vi. 5, § 1, 2; Ant. xx. 5, § 1, dc.; cf. Matt. xxiv. 23-24; Tac. Hist. v. 12). was natural, they, like most Orientals, especially connected the name of Solomon with their spells and incantations (Joseph. Ant. viii. 2). The names of the main writers on this wide and interesting subject will be found mentioned in the course of the article, and others are referred to in Fabricius Bibl. Antiq. cap. xii., and Bittcher, de Inferis, pp. 101 ff. F. W. F

DIVORCE. The law regulating this subject is found Deut. xxiv. 1-4, and the cases in which the right of a husband to divorce his wife was lost. are stated ib. xxii. 19, 29. The ground of divorce

was what the text calls a אָרָרָת דָּבָר, on the meaning of which the Jewish doctors of the period of the N. T. widely differed; the school of Shammai seeming to limit it to a moral delinquency in the woman, whilst that of Hillel extended it to trifling causes, e. g., if the wife burnt the food she was cooking for her husband.^a The Pharisees wished perhaps to embroil our Saviour with these rival schools by their question (Matt. xix. 3); by his answer to which, as well as by his previous maxim (v. 81), he declares that but for their hardened state of heart, such questions would have no place. Yet from the distinction made, "but I say unto you," vv. 31, 32, it seems to follow, that he regarded all the lesser causes than "fornication" as standing on too weak ground, and declined the question of how to interpret the words of Moses. It would be unreasonable, therefore, to suppose that

by TJJ, to which he limited the remedy of divorce. Moses meant "fornication," i. e. adultery, for that would have been to stultify the law "that such should be stoned" (John viii. 5; Lev. xx 10). The practical difficulty, however, which attends on the doubt which is now found in interpreting Moses' words will be lessened if we consider, nat the mere giving "a bill (or rather 'book,"

ספר) of divorcement " (comp. Is. l. 1; Jer. iii. 8), would in ancient times require the intervention of a DIVORCE

the instrument, but because the art of writing was then generally unknown. This would bring the matter under the cognizance of legal authority, and tend to check the rash exercise of the right by the husband. Traditional opinion and prescriptive prac-

tice would probably fix the standard of the TTT,

and doubtless with the lax general morality which marks the decline of the Jewish polity, that standard would be lowered (Mal. ii. 14-16). Thus the Gemar. Babyl. Gittin, 9 (ap. Selden, de Ux. Heb. iii. 17) allows divorce for a wife's spinning in public or going out with head uncovered or clothes so torn. as not properly to conceal her person from sight. But the absence of any case in point in the period which lay nearest to the lawgiver himself, or in any save a much more recent one, makes the whole question one of great uncertainty. The case of Phalti and Michal is not in point, being merely an example of one arbitrary act redressed by another (1 Sam. xxv. 44; comp. 2 Sam. iii. 14-16). Selden, quoting (de Ux. Heb. iii. 19) Zohar, Præf. p. 8 b, &c., speaks of an alleged custom of the hushand, when going to war, giving the wife the libellus divortii ; but the authority is of slight value, and the fact improbable. It is contrary to all known oriental usage to suppose that the right of quitting their husband and choosing another was allowed to women (Joseph. Ant. xv. 7, § 10). Salome is noted (ibid.) as the first example of it - one, no doubt, derived from the growing prevalence of heathen laxity. Hence also, probably, the caution given 1 Cor. vii. 10. Winer is surely mistaken (s. v. Ehescheidung) in supposing that a man might take back as wife her whom he had divorced, except in the cases when her second husband had died or had divorced her. Such resumption is contemplated by the lawgiver as only possible in those two cases, and therefore is in them only expressly forbidden (Jer. iii. 1).

For the view taken among later Jews on this sub ject, see Joseph. Ant. iv. 8, § 23, xvi. 7, § 3; Vit. 76, a writer whose practice seems to have been in accordance with the views of Hillel. On the gen eral subject, Buxtorf, de Sponsal. et Divort. pp 82-85; Selden, Ux. Heb. iii. 17 ff.; and Mi-chaelis, Laws of Moses, ii. 336, may be consulted. H. H.

* Discorce in the New Testament. The passages treating of divorce are found in Matt. v. 31, 32, xix. 3-9, Mark x. 2-12, Luke xvi. 18, 1 Cor. vii. 10-16, and perhaps Rom. vii. 2, 3, which however has little or no bearing on our subject. If our Lord, as is probable, spoke of divorce more than once, the passage in Luke harmonizes with that in Matt. v., - as the comparison of Matt. v. 18 with Luke xvi. 17 shows, - and the passage in Mark with that in Matt. xix.

In the Gospels only amonion, in 1 Cor. vii. You ρίζομαι and ἀφίημι denote separation of married parties. All three are used of an act proceeding from either sex, but the second, and probably the third, is used in a wider sense than the first. In classical Greek amonéume said of the husband's act, and anoreine chiefly but not exclusively of the wife's act, are the terms in best use, but droking and perhaps other words are to be met with.

Our Lord's declarations may be summed up under the following heads. (1.) The practice ailowed by the Mosaic law of putting away a wife witcout crime on her part, and on the ground of

a Mishna, Gittin, iz. 10 R Akibah allows divorce if the husband merely saw a wife whose appearance and him hetter.

some personal dislike or disgust, is opposed to the | believer in such circumstances is not constrained to original, divine idea of marriage, according to which a man and his wife are joined together by God to be one flesh, and are not to be put asunder by man. (2.) He, therefore, who puts away his wife by a bill of divorce without her crime, causes her to commit adultery by placing it within her power to marry another man (Matt. v. 32). Thus even the party who suffers the divorce is criminal in marrying again. (3.) A man or a woman who procures a divorce, except on account of the adultery of the other party, and marries another person, commits adultery. (4.) The same crime rests on one who contracts marriage with the divorced person. In explanation of these ordinances of Christ, we remark first, that the passages in Matthew alone contain qualifications of the absolute unlawfulness of divorce, - παρεκτός λόγου πορrelas, and $\mu \eta$ $d\pi l$ $\pi oprela, -$ where a more general word $\pi oprela$ is used for a more special one, µoixela, and with it can, a fortiori, include certain rare, more heinous, sexual crimes. A similar qualification must doubtless be understood in Mark x., Luke xvi., and 1 Cor. vii. 10, as being too obvious to be expressed, since the act referred to in Matthew was by the law punishable with death, and actually destroyed the first union by a new union (1 Cor. vi. 16). Secondly, Christ's words go no further than to say that a man who marries a divorced woman commits adultery; but the opposite case, that of a woman marrying a divorced man, is evidently implied. Thirdly, it may excite surprise that, when a wife had no power of legal repudi-ation, Mark should speak of a woman putting away her husband. But Salome, Herod's sister, did this half a century before our Lord's ministry began. and doubtless without formal divorce women often forsook their husbands. The case then needed to be provided for. Fourthly, with "her who is divorced " in Matt. v. 32, mapento's $\lambda \delta \gamma o u$ moprelas is not to be understood, and consequently marriage with a woman divorced on account of adultery is not expressly noticed. Such a case under the law could not occur, as such a person would suffer of difference between the Apostle's two cases. In death. (Comp. Meyer in loc.)

In 1 Cor. vii. two cases are contemplated by Paul. The first, where both the parties are believers (vv. 10, 11), is a case for which our Lord had already provided, and in regard to which the Apostle considers himself as merely repeating some precept of Christ, such as we find in the Gospels. Neither husband nor wife is to separate from the other. If however the wife - for some reason short of her husband's crime, we must suppose - should be separated from him, she is to remain unmarried or seek reconciliation to him, no third step being allowable. And the same rule must hold good if the husband should separate himself from the wife. Thus the Apostle conceives of a separation which is not divorce with liberty of remarriage. In the other case (vv. 12-16), one of the parties is a heathen - a case for which Christ had made no provision. Here separation must proceed from the heathen party, the Christian party must be passive. The Christian party must not regard such a union with a heathen as unclean, and therefore seek to dissolve it, for the marriage relation is more hallowed by the faith of the believing, than profaned by the unbe ief of the heathen party, as is evident from the fact that the children are holy. But if the heathen party withdraw from such a Christian church, and there might be no reparatios

endeavor to keep up the union. For it might involve endless discords, whereas God's call to believen contemplated a state of peace. Nor is the probability of conversion so stang that the believing party. against the other's will, should feel an urgency to keep up the union in the hope of such an event (ver. 16, to which another turn is generally given).

Here the important question arises, whether the Apostle's words allow the Christian, thus separated from a heathen, to marry again. The Catholic Church, although disliking divorce, gives in this specific case an affirmative answer: many Protestante are on the same side, and by this analogy protect remarriage in cases of willful desertion. On the interpretation of the passage we remark first, that xwpl commands, being used in ver. 11 to denote a sep aration without remarriage, and possibly temporary, settles nothing. Secondly, Soulder is not decisive, since the extent and nature of the constraint are not clearly specified (comp. Meyer in loc.). The meaning may be this: that the believing party can regard the heathen partner's act as final, and so need not feel constrained to seek to live with or even to be reconciled to him, while yet the Apostle in such a case would disapprove of remarriage. This indeed is all that can be inferred from the next words, "God has called us in peace." Therefore you need not feel bound to live with one whose difference of religion or disaffection may produce continual jars. "For what knowest thou, O wife, whether thou shalt save thy husband?" etc., i. c. the possibility of something so desirable is not enough to constrain you to keep his society. Thus there is no trace of the thought of remarriage in the context. Meyer, De Wette, Neander, Stanley on this passage, and Tholuck on the Sermon on the Mount, unite in the opinion that the words of the Apostle do not necessarily imply remarriage. And yet, on the other hand, there is some ground for the opinion that Paul contemplated the liberty of marrying again. For otherwise there is not enough the first, the wife is to remain unmarried or be reconciled to her husband. In the second, she is to remain unmarried - according to the supposition - without seeking to be reconciled. Is this enough to constitute a new case, or would the Apostle, regarding this as something novel and outside of Christ's direction, make so little change in the requirements? We admit the force of these considerations, yet cleave on the whole to the explanation first given, which allows our Lord's idea of marriage to stand with regard to all classes of persons, does honor in conformity with the Apostle's spirit to the natural relations, and yet contemplates in certain cases an entire and final separation a mensa et thoro.

The phrase "husband of one wife" in 1 Tim. iii. 2, Titus i. 6, is probably to be understood of successive marriages, and not of simultaneous polygamy, as is shown by 1 Tim. v. 9. This rule fixing a qualification for the office of elders must have been based on the frequency of divorce and of marriage with divorced women, which to a ('hristian would appear scandalous, and on the ground of right no better than polygamy itself. Some persons, who had remarried after divorcing their wives in their state of heathenism, must have entered the ales. let him not be hindered from so doing. A of the evil, but this rule, preventing them from an

of the sanctity of marriage.

Our Lord, who had the correction of one mor mous practical evil before his eyes, has not noticed many questions concerning marriage, as for instance certain disqualifications which would render it void ab initio, but has left these to the practical windom of the Christian Church and the Christian State.

DIZ'AHAB (IT: Kataxpuora: ubi auri est plurimum), a place in the Arabian Desert mentioned Deut. i. 1, as limiting the position of the spot in which Moses is there represented as addressing the Israelites. It is by Robinson (i. 147, (i. 187, note) identified with Duhab, a cape on the W. shore of the Gulf of Akabah about two-thirds down its length: see further under WILDERNESS. The name seems to mean "lord," i. e. " possessor of (Arab. في and في Hob. أي gold;"

[or perh. "7 = where is] probably given from that metal having been there found. See Gesen. s. v. H. H.

* DOCTOR (diddokalos), Luke ii. 46, or " doctor of the Law" (rouodiddonalos), Luke v. 17; Acts v. 34. [LAWYER; RABBI; SCRIBES.]

DO'CUS a (Δώκ; [Ald. Δωκοs;] Joseph. Δαyou: Doch: Syr. 0, Doak), a " little hold '

(τὸ ὀχυρωμάτιον: munitiunculum) near Jericho (1 Macc. xvi. 15, comp. verse 14) built by Ptolemeus the son of Abubus, and in which he entertained and murdered his father-in-law Simon Maccabseus, with his two sons. By Josephus (Ant. xiii. 8, 1; B. J. i. 2, 3) it is called Dagon, and is said to have been "one of the fortresses" (epundraw) above Jericho. The name still remains in he neighborhood, attached to the copious and excellent springs of Ain-Duk, which burst forth in the Wady Naved'imeh, at the foot of the mountain of Quarantania (Kuruntul), about 4 miles N. W. of Jericho. Above the springs are traces of ancient foundations, which may be those of Ptolemy's castle, but more probably of that of the Templars, one of whose stations this was: it stood as late as the latter end of the 13th century, when it was visited by Brocardus. (See Rob. i. 571, and the quotations in 572, note [and also his Phys. Geogr. p. 255].)

DO'DAI [2 syl] (הוֹדָי [amatory]: בשלום; Vat. Audena; Alex. Awala; Comp. Ald. with 17 MSS. Audat:] Dudia), an Abohite who commanded the course of the 2d month (1 Chr. xxvii. 4). It is probable that he is the same as Dodo, whose name in the Cetib and in the LXX. is Dodai, and that the words "Eleazar sor of" have been omitted from the above passage in Chronicles. 'Dobo, 8.]

DOD'ANIM (דְרָנָים: 'Póðioi: Dodanim),

unning the office of elder, was a protest in behalf | Gen. x. 4: 1 Chr. i. 7 (in some copies [of the He brew] and in marg. of A. V. 1 Chr. i. 7, RODANIM. רדנים), a family or race descended from Javan,

the son of Japhet (Gen. x. 4; 1 Chr. i. 7). Authorities vary as to the form of the name: the Hebrew text has both. Dodanim appears in the Syriac, Chaldee, Vulgate, Persian, and Arabic versions, and in the Targum of Onkelos; Rodanim is supported by the LXX., the Samaritan version, and some early writers, as Eusebius and Cosmas. The weight of authority is in favor of the former; the substitution of 'Podioi in the LXX. may have arisen from familiarity with that name (comp. Ez. xxvii. 15, where it is again substituted for Dedan). Dodanim is regarded as identical with Dardani (Gesen. Thes. p. 1266), the latter, which is the original form, having been modified by the change of the liquid r into o, as in Barmilcar and Bomilcar, Hamilcar and Hamilco. Thus the Targum of Jonsthan, that on Chronicles, and the Jerusalem Talmud give Dardania for Dodanim. The Dardani were found in historical times in Illyricum and Troy: the former district was regarded as their original seat. They were probably a semi-Pelasgie race, and are grouped with the Chittim in the genealogical table, as more closely related to them than to the other branches of the Pelasgic race (Knobel, Volkertafel, pp. 104 ff.). The similarity of the name Dodona in Epirus has led to the identification of Dodanim with that place; but a mere local designation appears too restricted for the general tenor of Gen. x. Kalisch (Comm. on Gen.) identifies Dodanim with the Daunians, who occupied the coast of Apulia; he regards the name as referring to Italy generally. The wide and unexplained difference of the names, and the comparative unimportance of the Daunians, form objections to this W. L. B. view.

DODA'VAH (acc. Dodava'hu; ארֹדָן ראוי [love of Jehovah]: Awdia; [Vat. Adeia;] Alex. Ωδια: Doda u), a man of Maresha in Judah, father of Eliezer who denounced Jehoshaphat's alliance with Ahaziah (2 Chr. xx. 87). In the Jewish traditions Dodavah is the son of Jehoshaphat, who was also his uncle (Jerome, Qu. Heb. ad loc.).

DO'DO. 1. (ITIF [amatory, or possibly his uncle]: Doudi [Vat. Douder; Alex. Douder] and Awdowé [Alex. Awdowai]: prtruus ejus), a man of Bethlehem, father of Elhanan, who was one of David's "thirty" captains (2 Sam. xxiii, 24; 1 Chr. xi. 26). He is a different person from

2. [In 2 Sam., Aoudí; Vat. -dei; Alex. Zwoei in 1 Chr. xi. 12, Awdat: patruus ejus.] DODO THE AHOHITE, father of Eleazar, the 2d of the three "mighty men" who were over the "thirty" (2 Sam. xxiii. 9; 1 Chr. xi. 12). He, or his son - in which case we must suppose the words "Eleazar son of" to have escaped from the text -probably had the command of the second monthly course (1 Chr. xxvii. 4). In the latter passage the name is DODAI ('TIT: Audia, Alex. Awala [see in full under DODAI]); but this form occurs in the Hebrew text (Cetib) of 2 Sam xxiii. 9 (דֹּדֹי), and in the LXX. of all; and in Josephus (Ast. vii. 12, § 4, Audeios); and is be-

as that of Wechel, Francof. 1597, which also has the reading Aucer - A.]

a It would be interesting to know whence the form of the name used in the A. V. was derived. [Evitently from the Al line edition, or one founded .n it,

fored by Kennicott (Dissertation, &c. p. 134), who | the Gentiles (Rev. azii. 15; comp. Schöttgen, Hor has examined these lists with great minuteness, to be the correct one. The Jewish tradition (Jerome, Qu. Heb. on 1 Chr. xi. 12) was, that Dodo was the brother of Jesse.

3. A man of Issachar, forefather of Tola the Judge (Judg. x. 1). The LXX. and Vulg. renderings are remarkable; πατραδέλφου αὐτοῦ: patrui Abimelech.

The "remarkable renderings" referred to

make "TTT == " his uncle " (not a proper name). This is the only instance (Judg. x. 1) in which the father and grandfather of a judge are both mentioned. Hence an early Jewish interpretation referred

TIT to Abimelech, and made Puah, Tola's father, the son of some brother or sister of Gideon, the father of Abimelech. But such a relationship is impossible; for Tola was "a man of Issachar," while Gideon was a Manassite (Judg. vi. 15). Even supposing there was a sister who married out of her tribe, it would be very strange to have the descent traced through that line instead of the father's (see Cassel, Richter und Ruth, p. 97). Н.

DO'EG (2)7 [fearful, Gesen. and Fürst]: Dury: [in 1 Sam. xxii. 9, Alex. Dury:] Dury) an Idumean (LXX. and Joseph. Ant. vi. 12, § 1, δ Σύρος) chief of Saul's herdmen ("having charge of the nules"). He was at Nob when Ahimelech gave David the sword of Goliath, and not only gave information to Saul, but when others declined the office, himself executed the king's order to destroy the priests of Nob with their families, to the number of 85 persons, together with all their property (1 Sam. xxi. 7, xxii. 9, 18, 22; Ps. lii.). A question has arisen on the nature of the business by

which he was "detained before the Lord " (つどり) rurexóµevos Neessapár: intus in tabernaculo Domins). The difficulty which lies in the idea that Doeg was a foreigner, and so incapable of a Nazarite vow (Mishn. de Votis, ix. 1, Surenh.), is explained by the probable supposition that he was a proselyte, attending under some vow or some act of purification at the Tabernacle (1 Sam. xx. 18; Ant. Sucr. Patrick, Calmet; Gesen. p. 1059; Winer, s. v. Doey; Thenius, ad loc. in Kurzg. exeg. Handb.). H. W. P.

DOG (בלב אישי, הטילקוסר: canis), an animal frequently mentioned in Scripture. It was used by the Hebrews as a watch for their houses (Is. lvi. 10), and for guarding their flocks (Job xxx. Then also, as now, troops of hungry and semi-1). wild dogs used to wander about the fields and streets of the cities, devouring dead bodies and other offal (1 K. xiv. 11, xvi. 4, xxi. 19, 23, xxii. 28; 2 K. ix. 10, 36; Jer. xv. 3; Ps. lix. 6, 14), and thus became such objects of dislike that fierce and cruel enemies are poetically styled dogs in Ps. xxii. 16, 20. Moreover the dog being an unclean animal (Is. lxvi. 3; Hor. Ep. i. 2, 26, "canis immundus et amica luto sus "), the terms dog, dead slog, dog's head, were used as terms of reproach, or of humility in speaking of one's self (1 Sam. xxiv. 14; 2 Sam. iii. 8, ix. 8, xvi. 9; 2 K. viii. 13). Knox relates a story of a nobleman of Ceylon who being asked by the king how many children he 1ad, replied — "Your Majesty's dog has three pup-gies." Throughout the whole Fast "dog" is a stes." term of reproach for impure and profane persons,

Hebr. i. 1145), and by Mohammedans respecting Christians. The wanton nature of the dog is another of its characteristics, and there can be no doubt that כָּלָב in Deut. xxiii. 18 means scortum

virile, i. q. DTT; comp. Ecclus. xxvi. 25, "A shameless woman shall be counted as a dog,' Hesych. Kurés àraideis. Stanley (S. & P. p. 350) mentions to have seen on the very site of Jezreel the descendants of the dogs that devoured . ezebel, prowling on the mounds without the walls for offal and carrion thrown out to them to consume: and Wood, in his Journal to the source of the Oxus, complains that the dog has not yet arrived at his natural position in the social state. We still use the name of one of the noblest creatures in the world as a term of contempt. To ask an Uzbek to sell his wife would be no affront, but to ask him to sell his dog an unpardonable insult ---Suggeeferosh or dog-seller being the most offensive epithet that one Uzbek can apply to another. The addition of the article (rois nuraplois, Matt. xv. 26; Mark vii. 27) implies that the presence of dogs was an ordinary feature of Fastern life in our Sayiour's time.

As to the etymology of the word, Bochart thinks that it has reference to the firmness and tenacity R.

of a dog's bite, and compares and = forcipes; but this word is more probably itself derived from

≤, a dog.

The root of چِרָב is an unused verb چِרָב, to strike = Germ. klappen; and thence to bark = Germ. kläffen, Fr. clapir. W. D.

 Dietrich assigns a different meaning to □? to take, seize, and hence, as applied to the dog. "the seizer" (harpax). See his addition in Gen. Hebr. und Chald. Handus. p. 409 (6te Aufl.).

DOORS. [GATES.]

DOPH'KAH (7727 [cattle-driving, place of, Fürst]: 'Papara [Alex. Paparar], the LXX. apparently reading 7 for 7: Daphca), a place men tioned Num. xxxiii. 12, as a station in the Desert where the Israelites encamped; see WILDERNESS.

H. H.

DOR (The and The [a habitation], Josh xvii. 11; 1 K. iv. 11; [in Judg. i. 27 and 1 Chr vii. 29, Δώρ; in Josh. and 1 Kings, Φεγαεδδώρ, Νεφθαδώρ, etc.;] 1 Macc. xv. 11, [13,] Δωρα), an ancient royal city of the Cansanites (Josh. xii. 23), whose ruler was an ally of Jabin, king of Hazor, against Joshua (Josh. xi. 1, 2). It was probably the most southern settlement of the Phœnicians on the coast of Syria (Joseph. Vit. 8; Ant. xv. 9, § 8). Josephus describes it as a maritime city, on the west border of Manasseh and the north border of Dan (Ant. v. 1, § 22, viii. 2, § 3; B. J. i. 7, § 7), near Mount Carmel (c. Apion. ii. 10). One old author tells us that it was founded by Dorus, a son of Neptune, while another affirms that it was built by the Phoenicians, because the neighboring rocky shore abounded in the small shell-fish from which they got the purple dye (Steph. B. s. v.; Reland, Palastina, p. 739). It appears to have been withir and in this sense is used by the Jews respecting the territory of the tribe of Asher, though allotted

Digitized by GOOGLE

to Managesh (Josh. zvii. 11; Judg. i. 27). The original inhabitants were never expelled; but during the prosperous reigns of David and Solomon they were made tributary (Judg. i. 27, 28), and the latter monarch stationed at Dor one of his twelve purveyors (1 K. iv. 11). Tryphon, the murderer of Jonathan Maccabaeus and usurper of the throne of Syria, having sought an asylum in Dor, the city was besieged and captured by Antiochus Sidetes (1 Macc. xv. 11). It was subsequently rebuilt by Gabinius the Roman general, along with Samaria, Ashdod, and other cities of Palestine (Joseph. Ant. xiv. 5, § 3), and it remained an important place during the early years of the Roman rule in Svria. Its coins are numerous, bearing the legend Aupa lepd (Vaillant, Num. Impp.). It became an ep copal city of the province of Palastina Prima, but was already ruined and deserted in the fourth century (Hieron. in Epitaph. Paula).

Of the site of Dor there can be no doubt. The descriptions of Josephus and Jerome are clear and full. The latter places it on the coast, "in the ninth mile from Cæsarea, on the way to Ptolemais" (Onom. s. v. Dora). Just at the point indicated is the small village of Tantúra, probably an Arab corruption of Dora, consisting of about thirty houses, wholly constructed of ancient materials. Three hundred yards north are low rocky mounds projecting into the sea, covered with heaps of rubbish, massive foundations, and fragments of columns. The most conspicuous ruin is a section of an old tower, 30 ft. or more in height, which forms the landmark of Tuntura. On the south side of the promontory, opposite the village, is a little harbor, partially sheltered by two or three small islands. A spur of Mount Carmel, steep and partially wooded, runs parallel to the coast line, at the dis tance of about a mile and a half. Between its base and the sandy beach is a rich and beautiful plain - this is possibly the "border," "coast," or

"region" of Dor (72) in Hebrew, Josh. xi. 2, xii. 23; 1 K. iv. 11) referred to in Scripture. The district is now almost wholly deserted, being exposed to the raids of the wild Bedawin who pasture their flocks on the rich plain of Sharon.

J. L. P.

DO'RA ($\Delta expa$: Dora). 1 Macc. xv. 11, 13, 25. [Dor.]

DOR'CAS. [TABITHA.]

DORYM'ENES ($\Delta opuplerys$ [Doryminus]), father of Ptolemy, surnamed Macron (1 Macc. iii. 38; 2 Macc. iv. 45). As this Ptolemy was in the service of Ptolemy Philometor, king of Egypt, before he deserted to Antiochus Epiphanes, it is probable that his father Dorymenes is the same Dorymsnes who fought against Antiochus the Great (Polyb. v. 61).

DOSITHEUS ($\Delta \omega \sigma (\theta \epsilon o s: Dositheus)$. 1. One of the captains of Judas Maccabæus in the attle against Timotheus (2 Macc. xii. 19, 24).

a This passage was a great puxile to the old geograsters, not only from the corrupt reading, μυθαίας, mentioned above [which the A. V. derived from the Aldine edition; Rom Vat. Sin. read Δωγειος, Alex. Δωγγασ], but also from the expression still found in the text, row πρόσου row μαγάλου; A. V. "the great desit: " literally, "the great saw." The knot was it by Beland, who conjectured most ingrahously that seems was the translation of TMPD Massor = a

2. A horse-soldier of Bacenor's company, a man of prodigious strength, who, in attempting to capture Gorgias, was cw⁺ down by a Thracian (2 Maco. xii. 35).

3. The son of Drinylus, a Jew, who had renounced the law of his fathers, and was in the camp of Ptolemy Philopator at Raphia (3 Macc. i. 3). He appears to have frustrated the attempt of Theodotus to assassinate the king. According to the Syriac Version he put in the king's tent a man of low rank ($\delta \sigma \eta \mu \delta \nu \tau \nu \alpha$), who was alain instead of his master. Polybius (v. 81) tells us it was the king's physician who thus perished. Dositheus was perhaps a chamberlain. W. A. W.

4. $(\Delta \sigma \sigma (\theta e \sigma s [Alex. \Delta \omega \sigma : \theta e \sigma s ; FA.¹ \Delta \omega \sigma : e \theta e \sigma s : Dosilheus].) "A pricet and Levite," who carried the translation of Esther to Egypt (Eath. xi. 1). It is scarcely likely that be is identical with the Dositheus who is mentioned by Josephus (c. Apion. ii. 5) as one of the "com mauders of the forces" of Ptol. VI. Philometor, though he probably lived in the reign of that monarch. B. F. W$

DOTHA'IM. [DOTHAN.]

DO'THAN (once), DOTHA'IN, and in

contracted form $7/\sqrt{7}$; possibly = too wells --Gesen. pp. 332, 568; [Vat. Alex. Sin.] $\Delta\omega\theta\alpha\epsilon\mu$, [Rom.] $\Delta\omega\theta\alpha\mu$ [exc. in Gen., where it has $\Delta\omega\sigma$ $\alpha\epsilon\mu\mu$]: Dothain [in 2 K. Dothan, but ed. 1590 Dothain]), a place first mentioned (Gen. xxxvii. 17, in connection with the history of Joseph, and apparently as in the neighborhood of Shechern. It next appears as the residence of Elisha (2 K. vi. 13), and the scene of a remarkable vision of horses and chariots of fire surrounding "the mountain"

($\neg \neg \neg \neg$), on which the city stood. It is not again mentioned in the O. T.; but later still we encounter it — then evidently well known — as a landmark in the account of Holofernes' campaign against Bethulia (Jud. iv. 6, vii. 3, 18, viii. 3). The change in the name DOTHAIM is due to the Greek text, from which this book is translated. In the Vat. and Alex. and Vulg. text — it is also mentioned in Jud. iii. 9, where the A. V. has "Judea" ('Ioudaías for $\Delta wraías$),^a and all these passages testify to its aituation being in the centre of the country near the southern edge of the great plain of Esdraelon.

Dothain was known to Eusebius (Onomasticom), who places it 12 miles to the N. of Sebaste (Samaria); and here it has been at length discovered in: our own times' by Mr. Van de Velde (i. 364, &c.) and Dr. Robinson (iii. 192), still bearing its ancient name unimpaired, and situated at the south end of a plain of the richest pasturage, 4 or 5 miles S. W. of Jesin, and separated only by a swell or two of hills from the plain of Eadraelon. The Tell or mound on which the ruins stand is described as very large ("huge," Van de Velde, i. 364); at its southern foot is still a fine spring. Close to It is

saw, which was a corruption of 7100 Mishor -

b It is right to say that the true site of Dothan was known to the Jewish traveller Rabbi ha-Parchi, A. 3 1300 (see Zunz's extract in notes to Benjamin of Tudela, Asher's ed. ii. 434), and to Schwars, A. 3. 1964. (p. 168); 'ut neither of these travellers gives any eccount of Le site.

an ancient road, running N. and S., the remains of the massive (Jewish?) pavement of which are still distinguishable (Van de Velde, pp. 369, 370). The great road from Beisan to Egypt also passes near Dothan (Rob. iii. 122). The traditional site was at the Khan Jubb Yusuf near Tell Hum, at the N. of the Sea of Galilee. (See the quotations in Rob. ii. 419.) It need hardly be said that this position is not in accordance with the requirements of the narrative. G.

* It shows the tenacity of the ancient names that the name of Dothân still clings to this site, though no village exists or has existed there for a long period. Near the ruins are now large cisterns (from which no doubt the name was derived), such as in that country are liable at times to be left dry, as happened to be true of the one into which Josoph was put by his brothers (Porter, in Kitto's Daily Bibl. Illustr. i. 345, ed. 1866). Its situation on the present line of travel from East-Jordan to Egypt confirms the truth of the Biblical history; for it is implied (Gen. xxxvii. 28) that the Dothan of Moses was on the great thoroughfare which led from Gilead beyond the Jordan to the great centre of traffic in the valley of the Nile. Mr. Tristram (Land of Israel, p. 134, 2d ed.) speaks of meeting there "a long caravan of mules and asses laden " (like the Ishmaelites of old), "on their way from Damascus to Egypt." See also Asher's /tinerary of Benjamin of Tudels, ii. 434, and Bibl. Sacra, x. 122. Precisely here is found at the present day "the best pasturage in all that region," and thus, though the narrative is silent as to the reason why the sons of Jacob went from Shechem to Dothan. we see that it is the very place which herdsmen, such as they were, would naturally seek after having exhausted the supplies of their previous pastureground. It is distant from Shechem about 12 miles northward, and could be easily reached. The Tell or hill on which the ruins are now seen shows itself twice in the brief account of Elisha: it enables us to see how the king of Syria could station his forces so as to "compass the city," and how "the mountain" could appear to the prophet's servant "full of horses and chariots of fire" (2 K. vi. 15, 17). н

* DO TO WIT (A. V. 2 Cor. viii. 1), is a phrase now wholly obsolete, meaning to make known. "Do" was formerly used with other verbs in the same way, in the sense of "to make," "to cause." See Eastwood and Wright's Bible Word-Book, pp. 169. 168.

DOVE (Yondi, TI)": reported: columba). The first mention of this bird occurs in Gen. viii. where it appears as Noah's second messenger sen forth from the ark to ascertain if the waters had abated, and returns from its second mission with an olive leaf in its mouth. The dove's rapidity of light is alluded to in Ps. lv. 6; the beauty of its plumage in Ps. hviii. 18; its dwelling in the rocks and valleys in Jer. xlviii. 28 and Es. vii. 16; its mournful voice in Is. xxxviii. 14, lix. 11; Nah. ii. 7; its harmlessness in Matt. x. 16; its simplicity in Hos. vii. 11, and its amativeness in Cant. i. 15, ii. 14. do.* The last characteristic, according to Gesenius, is the origin of the Hebrew word, from an

unused root 71' (71'), to grow warm (comp. Arab

وحين, to burn with anger, and Gr. latwo None of the other derivations proposed for the word are at all probable; nor can we with Winer regard a word of this form as primitive. It is similar to TIL, from the root IL. Doves are kept in a domesticated state in many parts of the East. The pigeon-cot is an universal feature in the houses of Upper Egypt. In Persia pigeonhouses are erected at a distance from the dwellings for the purpose of collecting the dung as manure. There is probably an allusion to such a custom in Is. Ix. 8. Stanley (S. & P. p. 257), speaking of Ascalon as the haunt of the Syrian Venus, says: "Her temple is destroyed, but the sacred doves sacred by immemorial legends on the spot, and oilebrated there even as late as Eusebius - still fill with their cooings the luxuriant gardens which grow in the sandy hollows within the ruined walls." It is supposed that the dove was placed upon the standards of the Assyrians and Babylonians in honor of Semiramis. Tibullus (i. 7) says :----

"Quid referam ut volitet crebras intacta per urbes Alba Palmstino sancta columba Syro."

This explains the expression in Jer. xxv. 38, קפְרֵי הַרוֹן הַיוֹבָה, "from before the fiercences of the dove," i. e. the Assyrian (comp. Jer. zivi. 16, l. 16). There is, however, no representation of the dove among the sculptures of Nineveh, so that it could hardly have been a common emblem of the nation at the time when they were executed; and the word in the above three passages of Jeremiah admits another interpretation. (See Gesen. Thes. p. 601 a.)

In 2 K. vi. 25, in describing the famine in Samaria, it is stated that "the fourth part of a cab of dove's dung was sold for five pieces of silver "

(חרייוכים, Keri דביונים: גלבסט אנטיס, Keri דביוכים) pây: stercoris columbarum). דורייולנים, i. e.

, is from a root signifying to deposit ordure. There seems good reason for taking this as a literal statement, and that the straits of the besieged were such that they did not hesitate even to eat such revolting food as is here mentioned (comp. Cels. Hierobot. ii. 32; Maurer on 2 K. vi. 25). The notion that some vegetable production is meant which was called by this name, may be compared with the fact that the Arabs call the herb Ksli

sparrows' dung, and in جرو العصافير German the asafatida is called Toufolsdreck. W. D.

DOVE'S DUNG (", chiryónia;

Keri, ביוכים, dibyonim: המחסה הביוכים, dibyonim: stercus columborum). Various explanations have been given of the passage in 2 K. vi. 25, which describes the famine of Samaria to have been sc excessive, that "an ass's head was sold for fourscore pieces of silver, and the fourth part of a cab of dove's dung for five pieces of silver." The old ver-

• * Thomson (Land and Book, 1. 415-418) describes found at Damascus, whose fasthers, all en

sary faily the habits of the Eastern dore, and shows wings, are literally as yellow as gold; they are ver now exactly they illustrate the Scripture allusions to immail, and [often] hept in cages."

some and very many ancient commentators are in 1336 so great a famine distressed the English, that hvor of a literal interpretation of the Hebrew word. "men ate their own children, dogs, mice, and Bochart (*Hieroz.* ii. 572) has labored to show that it denotes a species of cicer, "chick-pea," which a species of cicer, "chick-pea," species of cicer, "chick-

he says the Arabs call usndre (السنان), and sometimes improperly, dove's or sparrow's dung. Linnaus suggested that the chiryonim may signify the Ornithogalum umbellutum, "Star of Bethle hem." On this subject the late Dr. Edward Smith remarks (English Botany, iv. 130, ed. 1814): "If Linnæus is right, we obtain a sort of clew to the derivation of ornithogalum (birds' milk), which has puzzled all the etymologists. May not this observation apply to the white fluid which always accompanies the dung of birds, and is their urine? One may almost perceive a similar combination of colors in the green and white of this flower, which accords precisely in this respect with the description which Dioscorides gives of his ornithogalum." (See also Linnæus, Prælectiones, ed. P. D. Giseke, p. 287.) Sprengel (Comment. on Dioscorides, ii. 173) is inelined to adopt the explanation of Linnaeus. Fuller (Miscell. Sacr. vi. 2, p. 724) understood by the term the crops of pigeous with their undigested contents. Josephus (Ant. ix. 4) thought that dove's dung might have been used instead of salt. Harmer (Observat. iii. 185) was of opinion, that as pigeon's dung was a valuable manure for the cultivation of melons, it might have been needed during the siege of Samaria for that purpose. Most of these interpretations have little to recommend them, and have been refuted by Bochart and others. With regard to Bochart's own opinion, Celsius (Hierob. ii. 30) and Rosenmüller (Not. ad Bocharti Hieroz. ii. 582) have shown that it is founded on an error, and that

he confuses the Arabic حميض, the name of some

species of saltwort (Salsola) with cicer, a "vetch," or chick-pea. The explanation of Linnseus appears to us to be far-fetched; and there is no evidence whatever to show that the Arabs ever called this plant by a name equivalent to dove's dung. On the other hand, it is true that the Arabs apply this or a kindred expression to some plants. Thus it was sometimes used to denote a kind of moss or lichen (Kuz-kendem, Arabice); also some alkali-yielding plant, perhaps of the genus Saleola (ashnan, or usnan, Arab.). In favor of this explanation, it is usual to compare the German Tenfelsdreck ("devil's dung") as expressive of the odor of asafatida (see Gesenius, Thes. p. 516). The advocates for the literal meaning of the expression, namely, that dove's dung was absolutely used as food during the siege, appeal to the following reference in Josephus (B. J. v. 13, 7): "Some persons were driven to that terrible distress as to search the common sewers and old dunghills of cattle, and to cat the dung which they got there, and what they of old could not endure so much as to look upon they now used for food;" see also Eusebius (Eccles. Hist. iii. 6): "Indeed necessity forced them to apply their teeth to every thing; and gathering what was no food even for the futhiest of irrational animals, they levourea it." Celsius, who is strongly in favor of the literal meaning, quotes the following passage from Bru-soui (*Vemorabil.* ii. c. 41): "Cretenses, obsidente Metello, ob penuriam vini aquarumque jumentorum arina sitim sedasse;" and one much to the point how a Spanish writer, who states that in the year has didrachma.

pigeon's dung." Lady Calcott (Script. Herb. p. 130) thinks that by the pigeon's dung is meant the ()rnithogalum umbellatum. We cannot allow this explanation; because if the edible and agreeable bulb of this plant was denoted, it is impossible it should have been mentioned by the Spanish chronicler along with dogs, mice, &c. As an additional argument in favor of the literal interpretation of the passage in question may be adduced the language of Rabshakeh to the Jews in the time of Hezekiah (2 K. xviii. 27; Is. xxxvi. 12). Still it must be confessed there is difficulty in believing that so vile a substance should ever, even in the extremities of a horrible famine, have been sold at the rate of about one pint for six shillings and four pence. We adopt, therefore, the cautious language of Keil (Comment. l. c.): "The above-stated facts prove no doubt the possibility, even the probability, of the literal meaning, but not its necessity; for which reason we refrain, with Gesenius, from de-W. H. ciding."

• Dr. Thomson agrees with those who think some species of vegetable food may be meant, which of course to be so designated must have been very coarse and cheap. "The whimsical title may have been given to a kind of bean, on account of some fancied resemblance between the two. This would not be at all surprising, for the Arabs give the most quaint, obscure, and ridiculous names to their extraordinary edible mixtures." See Land and Book, ii. 200. H.

DOWRY. [MABRIAGE.]

DRACHMA (δραχμή: drachma; [Tob. v. 15:] 2 Macc. iv. 19, x. 20, xii. 43; a [8 Macc. iii. 28; Luke xv. 8, 9), a Greek silver coin, varying in weight on account of the use of different talents. The Jews must have been acquainted with three talents, the Ptolemaic, used in Egypt and at Tyre, Sidon, and Berytus, and adopted for their own shekels; the Phœnician, used at Aradus and by the Persians; and the Attic, which was almost universal in Europe, and in great part of Asia. The drachmæ of these talents weigh respectively, during the period of the Maccabees, about 55 grs. troy, 58-5, and 66. The drachms mentioned in 2 Macc. are probably of the Seleucides, and therefore of the Attic standard; but in Luke denarii seem to be intended, for the Attic drachma had been at that time reduced to about the same weight as the Roman denarius as well as the Ptolemaic drachma, and was wholly or almost superseded by it. This explains the remark of Josephus, & σίκλος 'Αττικάς δέχεται δραχμάς τέσσαρας (Ant. iii. 8 § 2), for the four Ptolemaic drachmæ of the shekel. as equal to four denarii of his time, were also equal to four Attic drachmæ [MONEY; SILVER, PIECE R. S. P. orl.

DRAGON. The translators of the A. V., apparently following the Vulgate, have rendered by the same word "dragon" the two Hebrew words

Tan, 15, and Tannin, 15, The similarity of the forms of the words may easily account for this confusion, especially as the maculine plural of the former, Tannin, actually assumes (in Iam. iv. 3) the form Tannin, and, on the other hand Tannin is evidently written for the singular Tan

In the first and second of these passages th: Vulg has didrackma.

nin Ex. xxix. 3, xxxii. 2. But the words appear to be quite distinct in meaning; and the distinction is generally, though not universally, preserved by the LXX. Expr: (see also the apocryphal history of Bel and

I. The former is used, always in the plural, in Job xxx. 29; Is. xxxiv. 13, xlii. 20 ($\sigma e_1 \rho_1 \rho_2 e_3$; in Is. xiii. 22 ($\delta \chi_1 \rho_2 \rho_1$); in Jer. x. 22, xlix. 33 ($\sigma \tau_1 \rho_2 \rho_2 \rho_2$) $\sigma(d)$; in Ps. xliv. 19 ($\sigma \sigma \sigma \sigma \rho_2 \sigma \sigma \sigma \sigma_3$); and in Jer. ix. 11, xiv. 6, li. 37; Mic. i. 8 ($\delta \rho d\kappa \sigma \tau \sigma s$).

The feminine plural TART is found in Mal. i. 3; a passage altogether differently translated by the LXX. It is always applied to some creatures inhabiting the desert, and connected generally with

the words TDDY ("ostrich") and "N ("jackal"?). We should conclude from this that it refers rather to some wild beast than to a serpent, and this conclusion is rendered almost certain by the comparison of the taunum in Jer. xiv. 6, to the wild asses snuffing the wind, and the reference to their "wailing" in Mic. i. 8, and perhaps in Job xxx. 29. The Syriac (see Winer, *Reako.* s. v. Schakal) renders it by a word which, according to Pococke, means a "jackal" (a beast whose peculiarly mournful howl in the desert is well known), and it seems most probable that this or some cognate species is to be understood whenever the word tan occurs.

II. The word tannin, [נְנַיֹנִים (plur. הַנַּיֹנִים), is always rendered as Spánwr in the LXX., except in Gen. i. 21, where we find sitros. It seems to refer to any great monster, whether of the land or the sea, a being indeed more usually applied to some kind of serpent or reptile, but not exclusively restricted to that sense. When referring to the sea it is used as a parallel to إبراز (" Leviathan "), as in Is. xxvii. 1; and indeed this latter word is rendered in the LXX. by opdacor in Ps. 1xxiv. 14, civ. 26; Job xl. 20; Is. xxvii. 1; and by µéya kôros in Job iii. 8. When we examine special passages we find the word used in Gen. i. 21 of the great sea-monsters, the representatives of the in-habitants of the deep. The same sense is given to it in Ps. lxxiv. 13 (where it is again connected with "Leviathan"), Ps. cxlviii. 7, and probably in Job vii. 12 (Vulg. cetus). On the other hand, in Ex. vii. 9, 10, 12; Deut. xxxii. 33; Ps. xci. 13, it refers to land-serpents of a powerful and deadly kind. It is also applied metaphorically to Pharaoh or to Egypt (Is. li. 9; Ez. xxix. 3, xxxii. 2; perhaps Ps. lxxiv. 13), and in that case, especially as feet are attributed to it, it most probably refers to the crocodile as the well-known emblem of Egypt. When, however, it is used of the king of Babylon, as in Jer. li. 34, the same propriety would lead us to suppose that some great serpent, such as might inhabit the sandy plains of Babylonia, is intended.b

Such is the usage of the word in the O. T. In the N. T. it is only found in the Apocalypse (Rev. xii. 3, 4, 7, 9, 16, 17, dx.), as applied metaphorloally to "the old serpent, called the Devil, and Satan," the description of the "dragon" being liotated by the symbolical meaning of the image ther than by any reference to any actually existng creature. Of similar personification, either of an evil spirit or of the powers of material Nature as distinct from God, we have traces in the exten-

DREAMS

sive prevalence of dragon-worship, and eristence a dragon-temples of peculiar serpentine form, the ase of dragon-standards, both in the East, especially in Egypt (see also the apocryphal history of Bel and the Dragon), and in the West, more particularly among the Celtic tribes. The most remarkable of all, perhaps, is found in the Greek legend of Apolic as the slayer of the Python, and the supplanter of the serpent-worship by a higher wisdom. The reason, at least of the Scriptural symbol, is to be sought not only in the union of gigantic power with craft and malignity, of which the serpent is the natural emblem, but in the record of the serpent's agency in the temptation (Gen. iii.). [SKRPENT.] A. B.

• DRAGON-WELL (Neh. ii. 13, A. V),

but more correctly FOUNTAIN (7). It is mentioned in the account of Nehemiah's night-excursion around Jerusalem (see Neb. as above). It is one of the uncertain points in the topography of the ancient city. Robinson assigns reasons for supposing it was a later name for the GIHON, which Hezekiah stopped up or concealed at the time of the Assyrian invasion (2 Chr. xxxii. 3, 4, 30), near the head of the valley on the west of Jerusalem (Bibl. Res. i. 473, 514, 1st ed.). Barclay (City of the Great King, p. 315, 1st ed.) also places it there, and conjectures, among other explanations, that the name may have come from the figure of a dragon sculptured on the trough or curb-stone. The LXX. substitutes Fountain of Figs for the Biblical designation. Sepp maintains (Jerusalem u. das heil. Land, i. 272) that the Dragon-well of Nehemiah was the Bethesda of the N. T. (John v. 2), and that Bethesda is the present Hammâm esh-Shefa (Bath of Healing), near one of the western avenues to the mosque of Omar. But in that case the Well falls within Jerusalem, and not outside of it so as to be within the path of Nehemiah's circuit, whose object evidently was to survey the ruins of the entire city, and not merely those of Mount Zion or the City of David in its more restricted sense. [JERUSALEM, III.] Sepp traces the name to a popular notion of some connection of a dragon with the intermittent waters. He gives some curious proofs of the prevalence of such a superstition among various nations. (See also Rob. Bibl. Res. i. 507, 1st ed.) In regard to Hammam esh-Shefa it may be mentioned that Dr. Wolcott was the first modern traveller who explored this remarkable well. See an interesting account of the adventure in the Bibl. Sacra, 1843, pp. 24-28. Tobler (Denkblätter, p. 73 ff.) and Barclay (City of the Great King, p. 591 ff.) have remeated the examination. H. 531 ff.) have repeated the examination.

• DRAM. [DARIC.]

DREAMS (דל מוֹה): דּרָל שוּיה: sommia; אמל שׁרָסי in LXX., and אמר לאס in St. Matthew, are generally used for "in a dream "). The Scriptural record of God's communication with man by dreams has been so often supposed to involve much difficulty, that it seems not out of place to refer briefly to the nature and characteristics of dreams generally, before enumerating and classifying the dreams recorded in Scripture.

1. The main difference between our sleeping and waking thoughts appears to lie in this, — that, in

^b The application of Is. xxvii. 1 appears more up certain.

[&]quot; Gesenius derives it from an obsolete root 72, to extend."

DREAMS

the former case, the perceptive faculties of the mind |gest dreams, and the physical organs of speech will (the sensational powers, a and the imagination which sombines the impressions derived from them) are active, while the reflective powers (the reason or judgment by which we control those impressions, and distinguish between those which are imaginary or subjective and those which correspond to, and are produced by, objective realities) are generally asleep. Milton's account of dreams (in Par. Lost, book v. 100-113) seems as accurate as it is striking: -

" But know, that in the soul Are many lesser faculties, that serve Reason as chief: among these Fancy next Her office holds; of all external things Which the five watchful senses represent She forms imaginations, aery shapes, Which Reason joining or disjoining, frames All what we affirm or what deny, and call Our knowledge or opinion ; then retires Into her private cell, when nature rests."

Thus it is that the impressions of dreams are in themselves vivid, natural, and picturesque, occasionally gifted with an intuition beyond our ordinary powers, but strangely incongruous and often grotesque; the emotion of surprise or incredulity, which arises from a sense of incongruity, or of unlikeness to the ordinary course of events, being in dreams a thing unknown. The mind seems to be surrendered to that power of association by which, even in its waking hours, if it be inactive and inclined to "musing," it is often carried through a series of thoughts connected together by some vague and accidental association, until the reason, when it starts again into activity, is scarcely able to trace back the slender line of connection. The difference is, that, in this latter case, we are aware that the connection is of our own making, while in sleep it appears to be caused by an actual succession of events.

Such is usually the case, yet there is a class of dreams, seldom noticed and indeed less common, but recognized by the experience of many, in which the reason is not wholly asleep. In these cases it seems to look on, as it were, from without, and so to have a double consciousness: on the one hand we enter into the events of the dream, as though real; on the other we have a sense that it is but a dream, and a fear lest we should awake and its pageant should pass away.

In either case the ideas suggested are accepted by the mind in dreams at once and inevitably, instead of being weighed and tested, as in our waking hours. But it is evident that the method of such suggestion is still undetermined, and in fact is no more capable of being accounted for by any single cause than the suggestion of waking thoughts. The material of these latter is supplied either by ourselves, through the senses, the memory, and the imagination, or by other men, generally through the medium of words, or lastly by the direct action of the Spirit of God, or of created spirits of orders superior to our own, or the spirit within us. So sho it is in dreams. In the first place. although memory and imagination supply most or the material of dreams, yet physical sensations of cold and heat, of pain or of relief. even actua. impressions of sound or of light. will often mould or sug-

occasionally be made use of to express the emotions of the dreamer. In the second place, instances have been known where a few words whispered into a sleeper's ear have produced a dream corresponding to their subject. On these two points experience gives undoubted testimony; as to the third, it can, from the nature of the case, speak but vaguely and uncertainly. The Scripture declares, not as any strange thing, but as a thing of course, that the influence of the Spirit of God upon the soul extends to its sleeping as well as its waking thoughts. It declares that God communicates with the spirit of man directly in dreams, and also that he permits created spirits to have a like communication with it. Its declaration is to be weighed, not as an isolated thing, but in connection with the general doctrine of spiritual influence; because any theory of dreams must be regarded as a part of the general theory of the origination of all thought.

II. It is, of course, with this last class of dreams that we have to do in Scripture. The dreams of memory or imagination are indeed referred to in Eccl. v. 3; Is. xxix. 8; but it is the history of the Revelation of the Spirit of God to the spirit of man, whether sleeping or waking, which is the proper subject of Scripture itself.

It must be observed that, in accordance with the principle enunciated by St. Paul in 1 Cor. xiv. 15, dreams, in which the understanding is asleep, are recognized indeed as a method of divine revelation, but placed below the visions of prophecy, in which the understanding plays its part.^b It is true that the book of Job, standing as it does on the basis of "natural religion," dwells on dreams and "visions in deep sleep" as the chosen method of God's revelation of himself to man (see Job iv. 13, vii. 14, xxxiii. 15). But in Num. xii. 6; Deut. xiii. 1, 3, 5; Jer. xxvii. 9; Joel ii. 28, &c., dreamers of dreams, whether true or false, are placed below "prophets," and even below "diviners;" and similarly in the climax of 1 Sam. xxviii. 6, we read that "the Lord answered Saul not, neither by dreams, nor by Urim [by symbol], nor by prophets." Under the Christian dispensation, while we read frequently of trances (exordoress) and visions (brτασίαι, δράματα), dreams are never referred to as vehicles of divine revelation. In exact accordance with this principle are the actual records of the dreams sent by God. The greater number of such dreams were granted, for prediction or for warning. to those who were aliens to the Jewish covenant: Thus we have the record of the dreams of Abimelech. (Gen. xx. 3-7); Laban (Gen. xxxi. 24); of the chief butler and baker (Gen. xl. 5); of Pharaoh (Gen. xli. 1-8); of the Midianite (Judg. vii. 13); of Nebuchadnezzar (Dan. ii. 1, &c., iv. 10-18); of the Magi (Matt. ii. 12), and of Pilate's wife (Matt. xxvii. 19). Many of these dreams, moreover, were symbolical and obscure, so as to require an interpreter. And, where dreams are recorded as means of God's revelation to his chosen servants, they are almost always referred to the periods of their earliest and most imperfect knowledge of him. Sc it is in the case of Abraham (Gen. xv. 12, and perhaps 1-9), of Jacob (Gen. xxviii. 12-15), of

^{&#}x27;Αλλ' άγε δή τινα μάντιν ερειομεν, ή ἰερῆα *Η καὶ ὑνειρόπολον, καὶ γὰρ τ' ὄναρ ἐκ Διός ἐστι. Hom. 1. i. 62

a These powers are to be carefully distinguished as in Buther's Analogy, part i. c. 1) from the organs brough wi ich they are exercised when we are awake.

b The same order, as being the natural one. is found in the earliest record of European mythology ----

5), and, in the N. T., of Joseph (Matt. i. 20, ii. 13 19, 22). It is to be observed, moreover, that they belong especially to the earliest age, and become less frequent as the revelations of prophecy increase. The only exception to this is found in the dreams and "visions of the night" given to Daniel (ii. 19, vii. 1), apparently in order to put to shame the falsehoods of the Chaldsean belief in prophetic dreams and in the power of interpretation, and yet to bring out the truth latent therein (comp. St. Paul's miracles at Ephesus, Acts xix. 11, 12, and their effect, 18-20).

The general conclusion therefore is, first, that the Scripture claims the dream, as it does every other action of the human mind, as a medium through which God may speak to man either directly, that is, as we call it, "providentially," or indirectly in virtue of a general influence upon all his thoughts; and secondly, that it lays far greater stress on that divine influence by which the understanding also is affected, and leads us to believe that as such influence extends more and more, revelation by dreams, unless in very peculiar circumstances, might be expected to pass away.

Ă. B.

DRESS. This subject includes the following particulars: - 1. Materials. 2. Color and decoration. 3. Name, form, and mode of wearing the various articles. 4. Special usages relating thereto.

1. The materials were various, and multiplied with the advance of civilization. The earliest and simplest robe was made out of the leaves of a tree (TIN, A. V. " fig-tree " - and comp. the present Arabic name for the fig, tin, or teen), portions

of which were sewn together, so as to form an apron (Gen. iii. 7). Ascetic Jews occasionally used a similar material in later times. Josephus (Vit. § 2) records this of Banus (doon to uter and deroper xpaperor); but whether it was made of the leaves. or the bark, is uncertain. After the Fall, the skins of animals supplied a more durable material (Gen. iii. 21), which was adapted to a rude state of society, and is stated to have been used by various ancient nations (Diod. Sic. i. 43, ii. 38; Arrian, Ind. cap. 7, § 3). Skins were not wholly disused

at later periods: the addereth (Elijah appears to have been the skin of a sheep or some other animal with the wool left on: in the LXX. the word is rendered $\mu\eta\lambda\omega\tau\eta$ (1 K. xix. 13, 19: 2 K. ii. 13), Sopá (Gen. xxv. 25), and Sédois (Zech. xiii. 4); and it may be connected with Sopd etymologically (Saalschütz, Archäol. i. 19); Gesenius, however, prefers the notion of amplitude, אָרָר, in which case it = אָרָר (Mic. ii. 8: Thesaur. p. 23). The same material is implied in the description (שָׁעָר): איש בַעַל שָׁעָר): arhp Barus. LXX.: A. V. "hairy man," 2 K. i. 8), though

these words may also be understood of the hair of the prophet; and in the comparison of Esau's skin to such a robe (Gen. xxv. 25). It was characteristic of a prophet's office from its mean appearance (Zech. xiii. 4; cf. Matt. vii. 15). Pelisses of sheepskin a still form an ordinary article of dress in the Fast (Burckhardt's Notes on Bedouins, i. 50). The

^a The sheep-skin coat is frequently represented in the sculptures of Khorsabad : it was made with sleeves, and was worn over the tunic : it fell over the back, Nincoch, p. 198).

Joseph (Gen. xxxvii. 5-10), of Solomon (1 K. iii. | addereth worn by the king of Nineveh (Jon iii. 6) and the "goodly Babylonish garment" found # Ai (Josh. vii. 21), were of a different character either robes trimmed with valuable furs, or the skins then selves ornamented with embroidery. The art of weaving hair was known to the Hebrews at an early period (Ex. xxvi. 7, xxxv. 6); the sack-cloth used by mourners was of this material [SACK-CLOTH], and by many writers the addereth of the prophets is supposed to have been such. John the Baptist's robe was of camel's hair (Matt. iii. 4), and a similar material was in common use among the poor of that day (Joseph. B. J. i. 24, § 3), probably of goats' hair, which was employed in the Roman cilicium. At what period the use of worl and of still more artificial textures, such as cotton and linen, became known is uncertain: the first of these, we may presume, was introduced at a very early period, the flocks of the pastoral families being kept partly for their wool (Gen. xxxviii. 12): it was at all times largely employed, particularly for the outer garments (Lev. xiii. 47; Deut. xxii. 11, Ez. xxxiv. 3; Job xxxi. 20; Prov. xxvii. 26, xxxi. 13). [WOOL.] The occurrence of the term cethoneth in the book of Genesis (iii. 21, xxxvii. 3, 23) seems to indicate an acquaintance, even at that early day, with the finer materials; for that term, though significant of a particular robe, originally appears to have referred to the material employed (the root being preserved in our cotton; cf. Bohlen's Introd. ii. 51; Saalschütz, Archäul. i. 8), and was applied by the later Jews to flax or linen, as stated by Josephus (Ant. iii. 7, § 2, Xebouéry pèr kaleîtal Λίνεον τοῦτο σημαίνει, χέθον γὰρ το λίνον ήμεῖs καλούμεν). No conclusion, however, can be drawn from the use of the word: it is evidently applied generally, and without any view to the material, as in Gen. iii. 21. It is probable that the acquaintance of the Hebrews with linen, and perhaps cotton, dates from the period of the captivity in Egypt, when they were instructed in the manufacture (1 Chr. iv. 21). After their return to Palestine we have frequent notices of linen, the finest kind being named shish $(\vec{w}\vec{w})$, and at a later period bits

> (VID), the latter a word of Syrian, and the former of Egyptian origin, and each indicating the quarter whence the material was procured: the term chin

> (TAT) was also applied to it from its brilliant appearance (Is. xix. 9; Esth. i. 6, viii. 15). It is the Biogos of the LXX, and the N. T. (Luke xvi. 19: Rev. xviii. 12, 16), and the "fine linen" of the A. V. It was used in the vestments of the highpriests (Ex. xxviii. 5 ff.), as well as by the wealthy (Gen. xli. 42; Prov. xxxi. 22; Luke xiv. 19).

> [LINEN.] A less costly kind was named bad (T) $\lambda(reos)$, which was used for certain portions of the high-priest's dress (Ex. xxviii. 42; Lev. xvi. 4, 23. 32), and for the ephods of Samuel (1 Sam. ii. 18) and David (2 Sam. vi. 14): it is worthy of notice in reference to its quality and appearance, that it is the material in which angels are represented (Ex ix. 3, 11, x. 2, 6, 7; Dan. x. 5, xii. 6; Rev. xv. 6) A coarser kind of linen, termed ωμόλινον (Ecclus. xl. 4), was used by the very poor [LINEN]. The

Hebrew term sadin (1779 = ourowr, and satin

and terminated in its natural state. The people was ing it have been identified with the Segartii (Bonomi

expresses a fine kind of linen. especially adapted for work and needlework, or as marked by the use of summer wear, as distinct from the saraballa, which was thick (Talmud, Merach. p. 41, 1). What may have been the distinction between shesh and sadin (Prov. xxxi. 22, 24) we know not: the probability is that the latter name passed from the material to a particular kind of robe. Silk was not introduced until a very late period (Rev. xviii. 12): the term

meshi (""); tplxantor; Ez. xvi. 10) is of doubtful meaning [SILK]. The use of a mixed material

(DDDD: κίβδηλον, i. e. spurious, LXX.; aντι-Siakelueror, Aquil.; epibliror, Gr. Ven.), such an wool and flax, was forbidden (Lev. xix. 19; Deut. xxii. 11), on the ground, according to Josephus (Ant. iv. 8, § 11), that such was reserved for the priests, or as being a practice usual among idolaters (Spencer, Leg. Heb. Rit. ii. 32), but more probably with the view of enforcing the general idea of purity and simplicity.

2. Color and decoration. The prevailing color of the Hebrew dress was the natural white of the materials employed, which might be brought to a high state of brilliancy by the art of the fuller (Mark ix. 3). Some of the terms applied to these materials (e. g. DE, TAT) are connected with words significant of whiteness, while many of the allusions to garments have special reference to this quality (Job xxxviii. 14; Ps. civ. 1, 2; Is. lxiii. 3): white was held to be peculiarly appropriate to festive occasions (Eccl. ix. 8; cf. Hor. Sat. ii. 2, 60), as well as symbolical of purity (Rev. iii. 4, 5, iv. 4. vii. 9, 13). It is uncertain when the art of dyeing became known to the Hebrews; the cethoneth pissim worn by Joseph (Gen. xxxvii. 3, 23) is variously taken to be either a "coat of divers colors" (mounthos: polymita, Vulg.; comp. the Greek adorew, Il. iii. 126, xxii. 441), or a tunic furnished with sleeves and reaching down to the ankles, as in the versions of Aquila, dorpaydhecos, καρπωτός, and Symmachus, χειριδωτός, and in the Vulg. (2 Sam. xiii. 18), talaris, and as de-scribed by Josephus (Ant. vii. 8, § 1). The latter is probably the correct sense, in which case we have no evidence of the use of variegated robes previously to the sojourn of the Hebrews in Egypt, though the notice of scarlet thread (Gen. xxxviii. 28) implies some acquaintance with dyeing, and

the light summer robe (7)73: Oépistpoy: veil, A. V.) worn by Rebecca and Tamar (Gen. xxiv. 65, xxxviii. 14, 19) was probably of an ornamental character. The Egyptians had carried the art of weaving and embroidery to a high state of perfection, and from them the Hebrews learned various methods of producing decorated stuffs. The elements of ornamentation were -(1) weaving with threads previously dyed (Ex. xxxv. 25; cf. Wilkinson's Egyptians, iii. 125); (2) the introduction of gold thread or wire (Ex. xxviii. 6 ff.); (3) the addition of figures, probably of animals and hunting or battle scenes (cf. Layard, ii. 207), in the case of garments, in the same manner as the chcrubim were represented in the curtains of the abernacle (Ex. xxvi. 1, 31, xxxvi. 8, 35). These levices may have been either woven into the stuff, or cut out of other stuff and afterwards attached by needlework: in the former case the pattern tions. With regard to the figures which some have would appear only on one side, in the latter the identified as Jews in Egyptian paintings and As-

the singular and dual number, 707, needlework,

and רְקָמָתוֹם, needlework on both sides (Judg. v. 30, A. ∇ .), though the latter term may after all be accepted in a simple way as a dual = two embroidered robes (Bertheau, Comm. in l. c.). The account of the corslet of Amasis (Her. iii. 47) illustrates the processes of decoration described in

Exodus. Robes decorated with gold (געשבצות). Ps. xlv. 18), and at a later period with silver thread (Joseph. Ant. xix. 8, § 2; cf. Acts xii. 21), were worn by royal personages : other kinds of embroidered robes were worn by the wealthy both of Tyre (Ez. xvi. 13) and Palestine (Judg. v. 30; Pa. xlv. 14). The art does not appear to have been maintained among the Hebrews: the Babylonians and other eastern nations (Josh. vii. 21; Ez. xxvii. 24), as well as the Egyptians (Ez. xxvii. 7), excelled in it. Nor does the art of dyeing appear to have been followed up in Palestine: dyed robes were imported from foreign countries (Zeph. i. 8), particularly from Phœnicia, and were not much used on account of their dapansiveness: purple (Prov. xxxi. 22; Luke xvi. 19) and scarlet (9 Sam. i. 24) were occasionally wern by the wealthy. The surrounding nations was more lavish in their use of them: the wealthy Tyrians (Ez. xxvii. 7), the Midianitish kings (Judg. viii. 26), the Assyrian nobles (Ez. xxiii. 6), and Persian officers (Est. viii. 15), are all represented in purple. The general hue of the Persian dress was more brilliant than that of the Jews: hence Ezekiel (xxiii. 12) describes the

Assyrians as לְבָשֵׁי מִכְלוֹל, lit. clothed in perfection ; according to the LXX. eindoupa, wearing robes with handsome borders. With regard to

the head-dress in particular, described as קבולים (Tidpai Barral; A. V. "dyed attire [Ez xxiii. 15];" cf. Ov. Met. xiv. 654, mitra picta), some doubt exists whether the word rendered dyed does not rather mean flowing (Gesen. Thesaur. p 542; Layard, ii. 308).

3. The names, forms, and mode of wearing the robes. It is difficult to give a satisfactory account of the various articles of dress mentioned in the Bible: the notices are for the most part incidental, and refer to a lengthened period of time, during which the fashions must have frequently changed: while the collateral sources of information, such as sculpture, painting, or contemporary records, are The general characteristics of oriental but scanty. dress have indeed preserved a remarkable uniform ity in all ages: the modern Arab dresses much as the ancient Hebrew did; there are the same flowing robes, the same distinction between the outer and inner garments, the former heavy and warm, the latter light, adapted to the rapid and excessive changes of temperature in those countries; and there is the same distinction between the costume of the rich and the poor, consisting in the multiplication of robes of a finer texture and more ample dimensions. Hence the numerous illustrations of ancient costume, which may be drawn from the usages of modern Orientals, supplying in great measure the want of contemporaneous representacattern might be varied. Such is the distinction, syriar sulptures, we cannot but consider the evi-coording to Talmudical writers, between cumming at insufficient. The figures in the painting at

Beni Hassan, delineated by Wilkirson (Anc. Egypt. | like the Doric Xirtér; it may also have been, lika ii. 296), and supposed by him to represent the arrival of Joseph's brethren, are dressed in a manner at variance with our ideas of Hebrew costume: the more important personages wear a double tunic, the upper one constructed so as to pass over the left shoulder and under the right arm, leaving the right shoulder exposed; the servants wear nothing more than a skirt or kilt, reaching from the loins to the knee. Wilkinson suggests some collateral reasons for doubting whether they were really Jews: to which we may add a further objection that the presents which these persons bring with them are not what we should expect from Gen. xliii. 11. Vertain figures inscribed on the face of a rock at Behistun, near Kermanshah, were supposed by Sir R. K. Porter to represent Samaritans captured by Shalmaneser: they are given in Vaux's Nineveh. p. 372. These sculptures are now recognized as of a later date, and the figures evidently represent people of different nations, for the tunics are alternately short and long. Again, certain figures discovered at Nineveh have been pronounced to be Jews: in one instance the presence of hats and boots is the ground of **Men**tification (Bonomi, Nineveh, p. 197; comparing Dan. iii. 21); but if, as we shall hereafter show, the original words in Dan. have been misunderstoed by our translators, no conclusion can be drawn from the presence of these articles. In another instance the figures are simply dressed in a short tunic, with sleeves reaching nearly to the elbow, and confined at the waist by a girdle, a style of dress which was so widely spread throughout the East that it is impossible to pronounce what particular nation they may have belonged to: the style of head-dress seems an objection to the supposition that they are Jews. These figures are given in Bonomi's Nineveh, p. 381.

similar: there was sufficient difference, however, to mark the sex, and it was strictly forbidden to a woman to wear the appendages (יבָל: σκεύη), such as the staff, signet-ring, and other ornaments, or, according to Josephus (Ant. iv. 8, § 43), the weapons of a man; as well as to a man to wear the outer robe (מכלה) of a woman (Deut. xxii. 5); the reason of the prohibition, according to Maimonides (Mor. Neboch. iii. 37), beirg that such was the practice of idolaters (cf. Carpzov, Appar. p. 514); but more probably it was based upon the general principle of propriety. We shall first describe the robes which were common to the two sexes, and then those which were peculiar to women.

The costume of the men and women was very

(1.) The cethoneth (קרובה, whence the Greek λιτών) was the most essential article of dress. It was a closely fitting garment, resembling in form and use our shirt, though unfortunately translated coat in the A. V. The material of which it was made was either wool, cotton, or linen. From Josephus's (bservation (Ant. iii. 7, § 4) with regard to the me'il, that it was our in Suoir mepirunud-TOP, we may probably infer that the ordinary cethough or tunic was made in two pieces, which were sewn together at the sides. In this case the $\chi_{i\tau}\dot{\omega}\nu$ Loador worn by our Lord (John xix. 23) was sither a singular one, or, as is more probable, was sink (that $X \to 0$, cf. (cf. 11. 5.7), cc. 1. (cf. 11. 5.

DRESS

person in rapid motion was exposed (2 Sam. vi. 20). Another kind, which we may compare with the Ionian $\chi_{i\tau}\omega_{\nu}$, reached to the wrists and anklessuch was probably the *cethoneth* pussim worn by Joseph (Gen. xxxvii. 3, 23), and Tamar (2 San. xiii. 18), and that which the priests wore (Joseph. Ant. iii. 7, § 2). It was in either case kept close to the body by a girdle [GIRDLE], and the fold formed by the overlapping of the robe served as an inner pocket, in which a letter or any other small article might be carried (Joseph. Ant. xvii. 5, § 7). A person wearing the cethoneth alone was described

Fig. 1. An Egyptian. (Lane's Modern Egyptians.)

as D'ny, naked, A. V.: we may compare the use of the term yuurai as applied to the Spartan vir-gins (Plut. Lyc. 14), of the Latin mudus (Virg. Georg. i. 299), and of our expression stripped. Thus it is said of Saul after having taken off his upper garments (アブララ, 1 Sam. xix. 24); of Isaiah (Is. xx. 2) when he had put off his sackcloth, which was usually worn over the tunic (cf. Jon. iii. 6), and only on special occasions next the skin (2 K. vi. 30); of a warrior who has cast off his military cloak (Am. ii. 16; cf. Liv. iii. 23, inermes nudique); and of Peter without his fisher's coat (John xxi. 7). The same expression is elsewhere applied to the poorly clad (Job xxii. 6; Is. lviii. 7;

James ii. 15). The above wood-cut (fig. 1) represents the simplest style of Oriental dress, a long loose shirt or cethoneth without a girdle, reaching nearly to the ankle. The same robe, with the addition of the girdle, is shown in fig. 4.

In fig. 2 we have the ordinary dress of the modern Belouin: the tunic overlaps the girdle at the waist, leaving an ample fold, which serves as a pocket. Over the tunic he wears the alba, or striped plaid, which completes his costume.

(2.) The sadin (7, 70) appears to have been a wrapper of fine linen (ourder, I.XX.), which might be used in various ways, but especially as a nightshirt (Mark xiv. 51; cf. Her. ii. 95; Schleusner's

Digitized by Google

A. V.), Prov. xxxi. 24, and Is. iii. 23 (fine linen, A. V.); but in none of these passages is there any thing to decide its specific meaning. The Talmudical writers occasionally describe the talith

ż

٤

Fig. 2. A Bedouin. (Lynch, Dead Sea.)

[tallith, or tallith] under that name, as being made of fine linen: hence Lightfoot (Exercitations on Mark xiv. 51) identifies the σινδών worn by the young man as a talith, which he had put on in his haste without his other garments.

(3.) The me'il (מָעָיל) was an upper or second tunic, the difference being that it was longer than the first. It is hence termed in the LXX. ὑποδύ- $\tau \eta s \pi o \delta h \rho \eta s$, and probably in this sense the term 's applied to the cethoneth passim (2 Sam. xiii. 18), anplying that it reached down to the feet. The sacerdotal me'il is elsewhere described. [PRIEST.] As an article of ordinary dress it was worn by kings (1 Sam. xxiv. 4), prophets (1 Sam. xxviii. 14), nobles (Job i. 20), and youths (1 Sam. ii. 19). It may, however, be doubted whether the term is ased in its specific sense in these passages, and not rather in its broad etymological sense (from つびつ, to cover), for any robe that chanced to be worn over the cethoneth. In the LXX. the renderings vary between ἐπενδύτηs (1 Sam. xviii. 4; 2 Sam. xiii. 18; 1 Sam. ii. 19, Theodot.), a term properly applied to an upper garment, and specially used in John xxi. 7 for the linen coat worn by the Phœniciau and Syriau fishermen (Theophyl. in L c.) διπλοΐς (1 Sam. ii. 19, xv. 27, xxiv. 4, 11, xxviii. 14; Job xxix. 14), indria (Job i. 20), oroxf (1 ('hr. xv. 27; Job ii. 12), and inodirns (Ex. xxxix. 21; Lev. viii. 7), showing that generally speaking it was regarded as an upper garment. This further appears from the passages in which notice of it occurs: in 1 Sam. xviii. 4 it is the "robe" which Jonathan first takes off; in 1 Sam. xxviii. 14 it is the "mantle" in which Samuel is enveloped; in 1 Sam. xv. 27, it is the "mantle," the skirt of which 's rent (cf. 1 K. xi. 30, where the שלכם is simstarly treated); in 1 Sam. xxiv. 4, it is the "robe," under which Saul slept (generally the 737 was so med); and in Job i. 90 ii. 12, it is the imant's" Is. lxili. 3; Ez. xvl. 13; Zeph. i. 3). Another

mantioned in Judg. xiv. 12, 13 (sheet, shirt, which he rends (cf. Exr. ix. 3, 5); in these massages it evidently describes an outer robe, whether the simlâh, or the me'il itself used as a simlâh. Where two tunics are mentioned (Luke iii. 11) as being worn at the same time, the second would be a me'il; travellers generally wore two (Joseph. Ant. xvii. 5, § 7), but the practice was forbidden to the disciples (Matt. x. 10; Luke ix. 3).

The dress of the middle and upper classes in modern Egypt (fig. 3) illustrates the customs of the Hebrews. In addition to the shirt, they wear a long vest of striped silk and cotton, called kaftin, descending to the ankles, and with ample sleeves. so that the hands may be concealed at pleasure The girdle surrounds this vest. The outer robe consists of a long cloth coat, called gibbeh, with sleeves reaching nearly to the wrist. In cold weather the abba is thrown over the shoulders.

Fig. 8. An Egyptian of the upper classes. (Lane.)

(4.) The ordinary outer garment sonsisted of a quadrangular piece of woolen cloth, probably re-sembling in shape a Scotch plaid. The size and texture would vary with the means of the wearer. The Hebrew terms referring to it are - simlah (שַׁלְמָה occasionally שַׁלְמָה), which appears to have had the broadest sense, and sometimes is put for clothes generally (Gen. xxxv. 2, xxxvii. 84; Ex iii. 22, xxii. 9; Deut. x. 18; Is. iii. 7, iv. 11, though once used specifically of the warrior's cloak (Is. ix. 5); beged (그그그), which is more usual in speaking of robes of a handsome and substantial character (Gen. xxvii. 15, xli. 42; Ex. xxviii. 2; 1 K. xxii. 10; 2 Chr. xviii. 9; Is. lxiii. 1); cesith (COPD), appropriate to passages where covering of protection is the prominent idea (Ex. xxii. 26; Job xxvi. 6, xxxi. 19); and lastly lebush (לברש), usual in poetry, but specially applied to a warrior's cloak (2 Sam. xx. 8), priests' vestments (2 K. x 22), and royal apparel (Esth. vi. 11, viii. 15). A cognate term (mulbush (בקלבריש) describes specif ically a state-dress, whether as used in a roya' household (1 K. x. 5; 2 Chr. ix. 4), or for religious

festivals (° K. x. 22): elsewhere it is used generally for robes of a handsome character ('ob xxvii. 16;

622

DRESS

term, mad (TD), with its derivatives TJD (Ps.

exxxiii. 2), and T, (2 Sam. x. 4; 1 Chr. xix. 4), is expressive of the length of the Hebrew garments (1 Sam. iv. 12, xviii. 4), and is specifically applied to a long cloak (Judg. iii. 16; 2 Sam. xx. 8), and to the priest's coat (Lev. vi. 10). The Greek terms indrior and orosh express the corresponding idea, the latter being specially appropriate to robes of more than ordinary grandeur (1 Macc. x. 21, xiv. 9; Mark xii. 38, xvi. 5; Luke xv. 22, xx. 46; Rev. vi. 11, vii. 9, 13); the xirds and indrios (tunica, pallium, Vulg.; coat, cloak, A. V.) are brought into juxtaposition in Matt. v. 40 and Acts ix. 39. The beged might be worn in various ways, either wrapped round the body, or worn over the shoulders,

like a shawl, with the ends or "skirts" (D)? : πτερύγια: anguli) hanging down in front; or it might be thrown over the head, so as to conceal the

1.gs. 4, 5. Egyptians of the lower orders. (Lane.)

face (2 Sam. xv. 30; Esth. vi. 12). The ends were skirted with a fringe and bound with a dark purple ribbon (Num. xv. 38). It was confined at the waist

by a girdle, and the fold (Π: κόλπος: sinus) formed by the overlapping of the robe, served as a pocket in which a considerable quantity of articles might be carried (2 K. iv. 39; Ps. lxxix. 12; Hag. ii. 12; Niebuhr, Description, p. 56), or as a purse (Prov. xvii. 23, xxi. 14; Is. lxv. 6, 7; Jer. xxxii. 18; Luke vi. 38).

The ordinary mode of wearing the outer robe, called abba or abayeh, at the present time, is exhibited in figs. 2 and 5. The arms, when falling down, are completely covered by it, as in fig. 5: but in holding any weapon, or in active work, the ower part of the arm is exposed, as in fig. 2.

The dress of the women differed from that of the men in regard to the outer garment, the cethoneth being worn equally by both sexes (Cant. v. 3). The names of their distinctive robes were as fol-

www. - (1) mitpachath (חקפָרָם: περίζωμα: vallium, linteamen : veil, wimple, A. V.), a kind af shawi (Ruth iii. 15; Is. iii. 22); (2) ma'ataphah

DRESS

kind of shawl (Is. iii. 22), but how differing from the one just mentioned, we know not; the ety-mological meaning of the first name is expansion, of the second, enveloping: (3) tsá iph (列汉2: Bépiorpor: veil, A. V.), a robe worn by Rebecca on approaching Isaac (Gen. xxiv. 65), and by Tamar when she assumed the guise of a harlot (Gen. xxxviii. 14, 19); it was probably, as the LXX. represents it, a light summer dress of handsome appearance $(\pi \epsilon \rho \iota \epsilon \beta a \lambda \epsilon \tau \delta \theta \epsilon \rho \iota \sigma \tau \rho or \kappa a) \epsilon \kappa a \lambda \alpha \pi \ell \sigma a \tau o, Gen. xxxviii. 14), and of ample dimen$ sions, so that it might be thrown over the head at

pleasure; (4) rådid (TT: A. V. "veil"), a similar robe (Is. iii. 23; Cant. v. 7), and substituted for the tsa'iph in the Chaldes version: we

Fig. 6. An Egyptian Woman. (Lane.)

may conceive of these robes as resembling the peplum of the Greeks, which might be worn over the head, as represented in Dict. of Ant. p. 885, or again as resembling the habarah and mildych of the modern Egyptians (Lane, i. 73, 75); (5)

pethigil (דָרָיל : אָנדשׁא אנססד אין איז פּרָיביל) pethigil acher, A. V.), a term of doubtful origin, but probably significant of a gay holiday dress (Is. iii. 24); to the various explanations enumerated by Gesenius (Thes. p. 1137), we may add one pro-

posed by Saalschütz (Archäol. i. 31), 79, wide

or foolish, and "?, pleasure, in which case it = unbridled pleasure, and has no reference to dress at all; (6) gilyonim (جَלْنَرْنَا عَلَى الله الله على الله الله على المعني المعاري (13), also a doubtful word, explained in the LXX. as a transparent dress, i. e. of gauze (diapary Aakwrika); Schroeder (de Vest. Mul. Heb. p. 811) supports this view, but more probably the word means, as

in the A. V., glasses. The garments of females were terminated by an ample border or fringe לארל, שובל : לאוסטום: skirts), which concessed the feet (Is. xlvii. 2; Jer. xiii. 22).

Figs. 6 and 7 illustrate some of the peculiarities of female dress: the former is an Egyptian womas (in her walking dress): the latter represents a dress probably of great antiquity, still worn by the peasants in the south of Egypt: the outer robe, on (TODD): pallichum : manile, A. V.), another | hulaleeyeh, is a large piece of woolen stuff wound

Rg. 7. A woman of the southern province of Upper Egypt. (Lane.)

Having now completed our description of Hebrew dress, we add a few remarks relative to the election of equivalent terms in our own language. It must at once strike every Biblical student as a great defect in our Authorized Version that the same English word should represent various Hebrew words; e. g. that "veil" should be promiscuously used for radia (Is. iii. 23), tsa tph (Gen. xxiv. 65), mitpachath (Ruth iii. 15), masveh (Ex. xxxiv. 33); "robe" for me'il (1 Sam. xviii. 4), cethoneth (Is. xxii. 21), addereth (Jon. iii. 6), salmah (Mic. ii. 8); "mantle" for me'il (1 Sam. xv. 27), addereth (1 K. xix. 13), ma'atàphàh (Is. iii. 22); and "coat' for me'il (1 Sam. ii. 19), cethoneth (Gen. iii. 21): and conversely that different English words should he promiscuously used for the same Hebrew one, as ne'll is translated "coat," "robe," "mantle;" ad-lereth "robe," "mantle." Uniformity would be desirable, in as far as it can be attained, so that the English reader might understand that the same Hebrew term occurred in the original text, where the same English term was found in the translation. Beyond uniformity, correctness of translation would also be desirable: the difficulty of attaining this in the subject of dress, with regard to which the customs and associations are so widely at variance in our own country and in the East, is very great. Take, for instance, the cethoneth : at once an undergarment, and yet not unfrequently worn without anything over it: a shirt, as being worn next the skin; and a cout, as being the upper garment worn in a house: deprive the Hebrew of his cethoneth, and he was positively naked; deprive the English man of his coat, and he has under-garments still. The beged again: in shape probably like a Scotch plaid, but the use of such a term would be unintelligible to the minds of English peasantry: in use unlike any garment with which we are familiar, for we only wear a great-coat or a cloak in bad weather. whereas the Hebrew and his beged were **mesonarable.** With such difficulties attending the with the statements of Herodotus (i. 195, vii. 61) replace, any attempt to render the Hebrew terms in the following manner: -(1) The subdim

DRKSS

rectness and modern usage; and the English terms which we are about to propose must be regarded merely in the light of suggestions. Cethoneth answers in many respects to "frock:" the sailor's "frock" is constantly worn next the skin, and either with or without a cost over it: the "smockfrock " is familiar to us as an upper garment, and still as a kind of undress. In shape and material these correspond with cethoneth, and like it, the term "frock" is splied to both sexes. In the sacerdotal dress a nore technical term might be used: "vestment," in its specific sense as = the chasuble, or casula, would represent it very aptly. Me'il may perhaps be best rendered "gown," for this too applies to both sexes, and, when to men, always in an official sense, as the academic gown. the alderman's gown, the barrister's gown, just as me'il appears to have represented an official, or, at all events, a special dress. In sacerdotal dress " alb " exactly meets it, and retains still, in the Greek church, the very name, *poderis*, by which the *mr* il is described in the LXX. The sacerdotal ephod approaches, perhaps, most nearly to the term "pall," the wµoφόριον of the Greek church, which we may compare with the $i\pi\omega\mu is$ of the LXX Addereth answers in several respects to "pelisse," although this term is now applied almost exclusively to female dress. Sadin = "linen wrapper." Simlâh we would render "garment," and in the plural "clothes," as the broadest term of the kind; beyed, "vestment," as being of superior quality; lebush, "robe," as still superior; mad, "cloak," as being long; and malbush, "dress," in the specific sense in which the term is not unfrequently used as = fine dress. In female costume mitpachath might be rendered " shawl," mu'atâphâh " mantle," tai iph " handsome dress," râdid " cloak."

In addition to these terms, which we have thus far extracted from the Bible, we have in the Talmudical writers an entirely new nomenclature. The talith [tallith or tallith] (מלית) is frequently noticed; it was made of fine linen, and had a fringe attached to it, like the beged; it was of ample dimensions, so that the head might be enveloped in it, as was usual among the Jews in the act of

prayer. The kölbin (קולבין) was probably another name for the talith, derived from the Greek κολόβιον; Epiphanius (i. 15) represents the στο Aal of the Pharisees as identical with the Dubnatica or the Colobium ; the latter, as known to us was a close tunic without sleeves. The châluk

(הלוק) was a woolen shirt, worn as an under

tunic. The mactoren (270) was a mantle or outer garment (cf. Lightfoot, Exercitations on Matt. v. 40; Mark xiv. 51; Luke ix. 3, de:) Gloves (Celim, or うつ) are also noticed (Celim, xvi. 6, xxiv. 15, xxvi. 3), not, however, as worn for luxury, but for the protection of the hands in manual labor.

With regard to other articles of dress, see GIR DLE; HANDKERCHIEF; HEADDRESS; HEM OF GARMENT; SANDALS; SHOES; VEIL.

The dresses of foreign nations are occasionally referred to in the Bible; that of the Persians is described in Dan. iii. 21 in terms which have been variously understood, but which may be identified

(יבלים: A. V. "coats") = avatupides or trancers, which were the distinctive feature in the Persian as compared with the Hebrew dress; (2) the pattish (2) 29: A. V. "hosen") = κιθών πο δηνεκής Alveos or inner tunic; (3) the carbelà (ドノリン : A. V. "hat")= ざん s eiplreos Ki- $\theta_{\alpha, b}$ or upper tunic, corresponding to the me'il of the Hebrews; (4) the lebush (ビラコン: A. V. "gar ment") = $\chi \lambda a \nu (\delta_{ior} \lambda \epsilon v \kappa o r cloak, which was$ worn, like the beged, over all. In addition tothese terms, we have notice of a robe of state of fine linen, tacric (דְרָרָין: didonua: sericum palkum), so called from its ample dimensions (Esth.

viii. 15). The same expression is used in the Chaldee for purple garments in Ez. xxvii. 16. The references to Greek or Roman dress are few:

the xhaµús (2 Macc. xii. 35; Matt. xxvii. 28) was either the paludamentum, the military scarf of the Roman soldiery, or the Greek chlamys itself, which was introduced under the Emperors (Dict. of Ant. art. Chlamys); it was especially worn by officers. The travelling cloak $(\phi \epsilon \lambda \delta \nu \eta s)$ referred to by St. Paul (2 Tim. iv. 13) is generally identified with the Roman panula, of which it may be a corruption; the Talmudical writers have a similar name (פליניא or פליון). It is, however. otherwise explained as a travelling case for carrying clothes or books (Conybeare, St. Paul, ii. 499)

4. The customs and associations connected with dress are numerous and important, mostly arising from the peculiar form and mode of wearing the outer garments. The beyed, for instance, could be applied to many purposes besides its proper use as a vestment; it was sometimes used to carry a burden (Ex. xii. 34; Judg. viii. 25; Prov. xxx. 4), as Ruth used her shawl (Ruth iii. 15); or to wrap up an article (1 Sam. xxi. 9); or again as an impromptu saddle (Matt. xxi. 7). Its most important use, however, was a coverlet at night (Ex. xxii. 27; Ruth iii. 9; Ez. xvi. 8), whence the word is sometimes taken for bed-clothes (1 Sam. xix. 13; 1 K. i. 1): the Bedouin applies his abba to a similar purpose (Niebuhr, Description, p. 56). On this account a creditor could not retain it after sunset (Ex. xxii. 26; Deut. xxiv. 12, 13; cf. Job xxii. 6, xxiv. 7; Am. ii. 8). The custom of placing garments in pawn appears to have been very common, so much so that $\Box \square \square y$, pledge = a garment (Deut. xxiv. 12, 13); the accumulation of such pledges is referred to in Hab. ii. 6 (that loadeth

timself with D'DZZ, i. e. pledges; where the A.

. following the LXX. and Vulg. reads D'D, IV.

thick clay "); this custom prevailed in the time f our Lord, who bids his disciples give up the .dr. iov = beged, in which they slept, as well as the citáv (Matt. v. 40). At the present day it is not unusual to seize the abba as compensation for an injury: an instance is given in Wortabet's Syria, . 293.

The loose, flowing character of the Hebrew robes admitted of a variety of symbolical actions; rendung them was expressive of various emotions, as grief (Gen. xxxvii. 23, 34; Job i. 20: 2 Sam. i. 2) [MOURNING], fear (1 K. xxi. 27; 2 K. xxii. 11, 19), indignation (2 K. v. 7, xi. 14. Matt. xxvi. LXX.; Judg. xvii. 10). Where more than one in

65), or despair (Judg. xi. 35; Fath. iv. 1): generally the outer garment alone was thus rent (Gen. xxxvii. 34; Job i. 20, ii. 12), occasionally the inner (2 Sam. xv. 32), and occasionally both (Ezr. ix 3; Matt. xxvi. 65, compared with Mark xiv. 63) Shaking the garments, or shaking the dust off them, was a sign of renunciation (Acts xviii. 6) spreading them before a person, of loyalty and joy ous reception (2 K. ix. 13; Matt. xxi. 8); wrapping them round the head, of awe (1 K. xix. 13), or of grief (2 Sam. xv. 30; Esth. vi. 12; Jer. xiv. 3, 4); casting them off, of excitement (Acts xxii. 23); laying hold of them, of supplication (1 Sam. xv. 27; Is. iii. 6, iv. 1; Zech. viii. 23).

The length of the dress rendered it inconvenient for active exercise: hence the outer garments were either left in the house by a person working close by (Matt. xxiv. 18), or were thrown off when the occasion arose (Mark x. 50; John xiii. 4: Acts vii. 58); or, if this was not possible, as in the case of a person travelling, they were girded up (1 K. zvin 46; 2 K. iv. 29, ix. 1; 1 Pet. i. 13); on entering a house the upper garment was probably laid aside and resumed on going out (Acts xii. 8). In a sitting posture the garments concealed the feet; this was held to be an act of reverence (Is. vi. 2; see Lowth's note). The proverbial expression in 1 Sam. xxv. 22; 1 K. xiv. 10, xxi. 21; 2 K. ix. 8, probably owes its origin to the length of the garments, which made another habit more natural (cf. Her. ii. 35; Xen. Cyrop. i. 2, § 16; Ammian. Marcell. xxiii. 6); the expression is variously understood to mean the lowest or the youngest of the people (Gesen. Thes. p. 1397; Jahn, Archaul. i. 8, § 120). To cut the garments short was the grossest insult that a Jew could receive (2 Sam. x.

4; the word there used,) TO, is peculiarly expressive of the length of the garments). To raise the border or skirt of a woman's dress was a similar insult, implying her unchastity (Is. xlvii. 2; Jer. xiii. 22, 26; Nah. iii. 5).

The putting on and off of garments, and the ease with which it was accomplished, are frequently referred to; the Hebrew expressions for the first of these operations, as regards the outer robe, are בבל, to put on, קטָר, הספ, and אַכָּבָש, lit. to cover, the three latter having special reference to the amplitude of the robes; and for the second DWP, lit. to expand, which was the natural result of taking off a wide, loose garment. The ease of these operations forms the point of comparison in Ps. cii. 26; Jer. xliii. 12. In the case of closely fitting robes the expression is 727, lit. to gird, which is applied to the ephod (1 Sam. ii. 18; 2 Sam. vi. 14), to sackcloth (2 Sam. iii. 31; Is. xxxii. 11; Jer. iv. 8); the use of the term may illustrate Gen. iii. 7, where the garments used by our first parents are called הורה (A. V. "aprous"), probably meaning such as could be wound round the body. The converse term is TDP, to loosen, or unbind (Ps. xxx. 11; Is. xx. 2).

The number of suits possessed by the Hebrews was considerable. A single suit consisted of an under and upper garment, and was termed סידבי (סדסא) ipatlor, i. e. appuratus vestuum

φολο of, the suits are termed הליפות (מאאם) בליפות (מאאם אם) σόμεναι στολαί; cf. Hom. Od. viii. 249, είματα Equoibd: changes of raiment, A. V.). These formed in ancient times one of the most usual presents among Orientals (Harmer, Observations, ii. 379 ff.); five (Gen. xlv. 22) and even ten changes (2 K. v. 5) were thus presented, while as many as thirty were proposed as a wager (Judg. xiv. 12, 19). The highest token of affection was to present the robe actually worn by the giver (1 Sam. xviii. 4; cf. Hom. /l. vi. 230; Harmer, ii. 388). The presentation of a robe in many instances amounted to installation or investiture (Gen. xli. 42; Esth. viii. 15; Is. xxii. 21; cf. Morier, Second Journey, p. 93); on the other hand, taking it away amounted to dismissal from office (2 Macc. iv. 38). The production of the best robe was a mark of special honor in a household (Luke xv. 22). The number of robes thus received or kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job xxvii. 16; Matt. vi. 19; James v. 2), so that to have clothing = to be wealthy and powerful (Is. iii. 6, 7). On grand occasions the entertainer offered becoming robes to his guests (Trench on Parables, p. 231). Hence in large households a wardrobe (הקיתוה) was required for their preservation (2 K. x. 22; cf. Harmer, ii. 382), superintended by a special officer named שמר הבנדים, keeper of the wardrobe (2 Chr. xxxiv. 22). Robes reserved for special occasions are termed הקלצות (A. V. "changeable suits"; Is. iii. 22; Zech. iii. 4), because laid aside when the occasion was past.

The color of the garment was, as we have already observed, generally white; hence a spot or stain readily showed itself (Is. lxiii. 3; Jude 23; Rev. iii. 4); reference is made in Lev. xiii. 47 ff. to a greenish or reddish spot of a leprous character. Jahn (Archaeol. i. 8, § 135) conceives this to be not the result of leprosy, but the depredations of a small insect; but Schilling (de Lepra, p. 192) states that leprosy taints clothes, and adds "sunt maculæ omnino indelebiles et potius incrementum capere quam minui sub his lavationibus videntur " (Knobel, Comm. in l. c.). Frequent washings and the application of the fuller's art were necessary to preserve the purity of the Hebrew dress. [SOAP; FULLER.]

The business of making clothes devolved upon women in a family (Prov. xxxi. 22; Acts ix. 39); little art was required in what we may term the tailoring department; the garments came forth for he most part ready-made from the loom, so that ne weaver supplanted the tailor. The references

to sowing are therefore few: the term 72. (Gen. iii. 7; Job xvi. 15; Feel. iii. 7; Ez. xiii. 18) was applied by the later Jews to mending rather than making clothes.

The Hebrews were liable to the charge of extravagance in dress; Isaiah in particular (iii. 16 ff.) dilates on the numerous robes and ornaments worn by the women of his day. The same subject is referred to in Jer. 1v. 30; Ez. xvi. 10; Zeph. i. 8, and Ecclus. xi. 4, and in a later age 1 Tim. ii. 9; 1 Pet. iii. 3. W. L. B.

DRINK, STRONG () dinepa, [uéon; μέθυσμα; olvos: sicera; ebrietas; omne quod inebriare potest; potio]). The Hebrew term shecar, in its etymological sense, applies to any The Hebrew term beverage that had *intoxicating* qualities. It is generally found connected with wine, either as an exhaustive expression for all other liquors (e. g. Judg. xiii. 4; Luke i. 15), or as parallel to it, particularly in poetical passages (e. g. Is. v. 11; Mic. ii. 11); in Num. xxviii. 7 and Ps. lxix. 12, however, it stands by itself and must be regarded as including wine. The Bible itself throws little light upon the nature of the mixtures described under this term. We may infer from Cant. viii. 2 that the Hebrews were in the habit of expressing the juice of other fruits besides the grape for the purpose of making wine: the pomegranate, which is there noticed, was probably one out of many fruits so used. In Is. xxiv. 9 there may be a reference to the sweetness of some kind of strong drink. In Num. xxviii. 7 strong drink is clearly used as equivalent to wine, which was ordered in Ex. xxix. 40. With regard to the application of the term in later times we have the explicit statement of Jerome (Ep. ad Nepot.a), as well as other sources of information, from which we may state that the following beverages were known to the Jews: (1.) Beer, which was largely consumed in Egypt under the name of zythus (Herod. ii. 77; Diod. Sic. i. 34), and was thence introduced into Palestine (Mishn. Pesuch. 3, § 1). It was made of barley; certain herbs, such as lupin and skirrett, were used as substitutes for hops (Colum. x. 114). The boosch of modern Egypt is made of barley-bread, crumbled in water, and left until it has fermented (Lane, i. 131): the Arabians mix it with spices (Burckhardt's Arabia, i. 213), as described in Is v. 22. The Mishna (l. c.) seems to apply the term shecar more especially to a Median drink, probably a kind of beer made in the same manner as the modern boozah; the Edomite channels, noticed in the same place, was prohably another kind of beer, and may have held the same position among the Jews that bitter beer does among ourselves. (2.) Cider, which is noticed in the Mishna (Terum. 11, § 2) as apple-wine. (3.) Honey-wine, of which there were two sorts, one like the oirouth of the Greeks, which is noticed in the Mishna (Shabb. 20, § 2; Terum. 11, § 1) under a Hebraized form of that name, consisting of a mixture of wine, honey, and pepper; the other a decoction of the juice of the grape, termed debash (honey) by the Hebrews, and dibs by the modern Syrians, resembling the $\epsilon\psi\eta\mu a$ of the Greeks and the defrutum of the Romans, and similarly used, being mixed either with wine milk, or water. (4.) Dute-wine, which was also manufactured in Egypt (olvos pouruchios, Herod. ii. 86, iii. 20). It was made by mashing the fruit in water in certain proportions (Plin. xiv. 19, § 3). A similar method is still used in Arabia, except that the fruit is not mashed (Burckhardt's Arabia, ii. 264): the palm-wine of modern Egypt is the sap of the tree itself, obtained by making an incision into its heart (Wilkinson, ii. 174). (5.) Various other fruits and vegetables are enumerated by Pliny (xiv. 19) as supplying materials for factitious or home-made wine, such as figs, millet, the

com et barbaram potionem, aut palmarum fructus ezun inebriar- potest, sive illa, que frumento conficitur primuntur in liquorem, coctinque frugibus aqua pie

[&]quot; "Sicera Hebree sermone omnis potio nuncupatur, ive pomorum succo, aut cum favi decoquuntur in dui- guior coloratur

Hebrews applied raisins to this purpose in the simple manner followed by the Arabians (Burckhardt, ii. 377), namely, by putting them in jars of water and burying them in the ground until fermentation takes place. W. L. B.

DROMEDARY. The representative in the A. V. of the Heb. words becer or bicrah, recesh and rammåc. As to the two former terms, see under CAMELa

1. Recesh (D? : inπeber, Epua: jumenta, vercdarii) is variously interpreted in our version by "dromedaries" (1 K. iv. 28), "mules" (Esth. viii. 10, 14), "swift beasts" (Mic. i. 13). There seems to be no doubt that recesh denotes " a superior kind of horse," such as would be required when dispatch was necessary. See Gesenius (Thes. s. v.).

2. Rammåc (12): LXX. and Vulg. omit) occurs only in plur. form in Esth. viii. 10, in connection with bene, "sons;" the expression bene rammåchim being an epexegesis of the Heb. word achashteranim, "mules, the sons of mares." The

Heb. 122, "a mare," which the A. V. renders incorrectly "dromedary," is evidently allied to the ...

Arab. مرمكة, "a brood-mare." W. H.

• DROPPING, A CONTINUAL. It is said in Prov. xxvii. 15, that " a continual dropping in a very rainy day and a contentious woman are alike." The LXX. gives as the sense of this: "Drops of rain in a wintry day drive a man out of his house; in the same manner also does an abusive woman." The force of this comparison becomes evident when we know something of the construction of ordinary houses in the East. Many of them have mud-covered roofs; and hence the rains, especially if violent and protracted, are liable to loosen such coverings and allow the water, ac-cording to the extent of the injury, to drop or pour down upon the hapless inmates. Mr. Hartley (Travels in Asia Minor), relates an experience of his own which illustrates this inconvenience: " Last night, we retired to rest in what appeared to be one of the best rooms which we have occupied during the journey; but at midnight we were roused by the rain descending through the roof; and were obliged to rise and seek shelter from the incessant dropping, in the corridor, which was setter protected."

On the roofs of many houses (the writer observed his most frequently in northern Syria) they keep a cylindrical rolling-stone which the people employ, sepecially after a shower, for the purpose of amoothng and hardening the softened earth through which the rain so easily penetrates. This precaution will sometimes aggravate the evil. Dr. Lepsius relates (Briefe aus Ægypten, &c. (p. 393) 1852) that, being overtaken by a sudden shower at night, he took refuge in a house near Deir el-Kamar, on Mount Lebanon. Ere long the rain softened the mud on the roof and began to pour down on his bed. The family sent out one of their number to fill up the crevices and draw about the stone-roller. But in addition to the rain, heaps of stone and ubbish were precipitated on him, and he was

carob fruit, &c. It is not improbable that the compelled to beg his host to forego the wa meant kindness. He passed a sleepless night, and hailed the earliest dawn as the signal for departure.

We see therefore how much the proverb expressed, when it says, that "a continual dropping in a very rainy day and a contentious woman are alike."

DRUSIL'LA ($\Delta pour(\lambda \lambda \eta)$). daughter of Herod Agrippa I. (Acts xii. 1, 19 fl.) and Cypros; sister of Herod Agrippa II. She was at first betrothed to Antiochus Epiphanes, prince of Commagene, but, he refusing to become a Jew, she was married to Azizus, king of Emesa, who complied with that condition (Ant. xx. 7, § 1). Soon after, Felix, procurator of Judges, brought about her seduction by means of the Cyprian sorcerer Simon, and took her as his wife (ib. 7, § 2). In Acts xxiv. 24, we find her in company with Felix at Cassarea, on occasion of St. Paul being brought before the latter; and the narrative implies that she was present at the Apostle's preaching. Felix had by Drusilla a son named Agrippa, who, together with his mother, perished in the eruption of Vesuvius under Titus (Joseph. L c.; comp. Tac. Hist. v. 9). H.A.

• DUKE (from the Latin dux) as employed in the English Bible (Gen. xxxvi. 15, 40; Ex. xv. 15; Josh. xiii. 21, &c.) differs widely from the present usage. In the older English writers it often meant simply leader, chieftain, and is so used (A. V.) of the heads or sheiks of Arab clans which come forward so often in the earlier Hebrew history. See Eastwood and Wright's Bible Word-Book. н.

DULCIMER (Sumphoniah, TO): [συμφωνίa : symphonia]), a musical instrument. not in use amongst the Jews of Palestine, but mentioned in Daniel, iii. 5, 15, and at ver. 10 under the

shorter form of N'DD, along with several other instruments, which Nebuchadnezzar ordered to be sounded before a golden image set up for national worship during the period of the captivity of Judah. Luther translates it lute. Grotius adopts the view of Servius, who considers symphonia to be the same with tibia oblique $(\pi \lambda a \gamma (a u \lambda o s))$; he also quotes Isidorus (ii. 22), who speaks of it as a long drum. Rabbi Saadia Gaon (Comm. on Dan.) describes the sumphonich as the bag-pipe, an opinion adopted by the author of Shille hag-Gibborim (Joel Brill's Preface to Mendelssohn's version of the Psalms), by Kircher, Bartoloccius, and the majority of Biblical critics. The same instrument is still in use amongst peasants in the N. W. of Asia and in Southern Europe, where it is known by the similar name sampogna or za spogna. With respect to the etymology of the word a great difference of opinion prevails. Some trace it to the Greek oupporta, and Calmet, who inclines to this view, expresses astonishment that a pure Greek word should have made its way into the Chaldee tongue: it is probable, he thinks, that the instrument Dukimer (A. V.) was introduced into Babylon by some Greek or Western-Asiatic musician who was taken prisoner by Nebuchadnezzar during one of his campaigns on the coast of the Mediterranean. Others, with far greater probability, regard it as a Semitic worl. and connect it with 7520, "a tube" (Fürst)

e • To what is said under CANEL (Amer. e'.) re- the reader may add Dr. Bobinson's statement, Bie posting the obstinacy and moroseness of this animal. R-s. ii. 682-685, 1st ed.

The word [1900, occurs in the Talmud Surca, \$6a), where it evidently has the meaning of an air-

pipe. Landau (Aruch, art. 71000) considers it synonymous with siphon. Ibn Yahia, in his com-

mentary on Dan. iii. 5, renders it by 2717 (Joyara), organ, the well-known powerful musical instrument, composed of a series of pipes. Kabb. Elias, whom Buxtorf quotes (Lexic. Talmud. col. 1504), translates it by the German word Leier (lyre).

The old-fashioned spinet, the precursor of the harpsichord, is said to have resembled in tone the ancient dulcimer. The modern dulcimer is described by Dr. Busby (Dict. of Music) as a triangular instrument, consisting of a little chest, strung with about fifty wires cast over a bridge fixed at each end: the shortest wire is 18 inches in length. the longest 36: it is played with two small hamners held in the hands of the performer.

DU'MAH (77977 [silence] : [in Gen.,] Dound [Alex. Idouna: in 1 Chr.,] 'Idound [Comp. Dound; in Is.,]'Idounala: Duma), a son of Ishmael, most probably the founder of an ishmaelite tribe of Arabia, and thence the name of the prineipal place, or district, inhabited by that tribe. In Gen. xxv. 14, and 1 Chr. i. 80, the name occurs in the list of the sons of Ishmael; and in Isaiah (xxi. 11), in the "burden of Dumah," coupled with Seir, the forest of Arabia, and Kedar. The name of a town in the northwestern part of the peninsula, Doomat-el-Jendel,^a is held by Gesenius, and other European authorities, to have been thus derived; and the opinion is strengthened by Arab traditionists, who have the same belief (Mir-at ez-Zemán). The latter, however, err in writing "Dawmat-el-

101 Jendel" (دومة الجُنْدَل); while the lexicographers and geographers of their nation expressly state that it is correctly "Doomat-el-Jendel," or

. " Doomá-el-Jendel" (U, or

روماء الجندَل), signifying " Dumah of the stones or blocks of stone," of which it is said to have been built (Siháh, MS., Marásid, and Mushtarak, s. v.); not the "stony Dumah," as Europeans render it. *ELJendel* is said by some to mean "stones such as a man can lift" (Kamoos), and seems to indicate that the place was built of unhewn or Cyclopean masonry, similar to that of very ancient structures. The town itself, which is one of the "Kureiyat" of Wadi-l-Kura b (Marasid, a. v. Doomuh), appears to be called "Doomat-el-Jendel; " and the fortress which it contains, to have

he special appellation of " Márid" (عادى).

It should be observed that there are two " Doomaks;" that named in this article, and D. el Frak. The chief of one, a contemporary of Mohammed, is said to have founded the other, or

DUMAH (TOTT [silence, i. e. land of]: Peuva; Alex. [Comp. Ald.] Povua : Ruma), a city in the mountainous district of Judah, near Hebron (Josh. xv. 52). In the Onomasticon of Eusebius and Jerome it is named as a very large place (κώμη μεγίστη), 17 miles from Eleutheropolis, in the district of Daroma (i. e. " the south,"

from the Hebrew דרום). Eleutheropolis not being certainly known, this description does not afford much clew. Robinson passed the ruins of a village called ed-Daumeh, 6 miles southwest of Hebron (Rob. i. 212), and this may possibly be Dumah. (See also Kiepert's Map, 1856; and Van de Velde's Memoir, 308).« G.

DUNG (גָּלָל, גָּלָל, the latter alwaya, and the two former generally, applied to men; אָקָרָשׁ, דָּבָיץ, to brute animals, the second exclusively to animals offered in sacrifice, and the third to the dung of cows or camels). The uses of dung were twofold, as manure, and as fuel. The manure consisted either of straw steeped in liquid

manure (קְמָי מָדְמָנָה, lit. in dung water, Is.

xxv. 10), or the sweepings (TICAD, Is. v. 25) of the streets and roads, which were carefully removed from about the houses and collected in heaps

(IDDUN) outside the walls of the towns at fixed spots (hence the dung-gate at Jerusalem, Neh. ii. 13), and thence removed in due course to the fields (Mishn. Sheb. 3, § 1-3). To sit on a dung-heap was a sign of the deepest dejection (1 Sam. ii. 8; Ps. cxiii. 7; Lam. iv. 5; cf. Job ii. 8, LXX. and Vulg.). The mode of applying manure to trees was by digging holes about their roots and inserting it (Luke xiii. 8), as still practiced in Southern Italy (Trench, Parables, p. 356). In the case of sacrifices the dung was burnt outside the camp (Ex. xxix. 14; Lev. iv. 11, viii. 17; Num. xix. 5); hence the extreme opprobrium of the threat in Mal. ii. 3. Particular directions were laid down in the law to enforce cleanliness with regard to human ordure (Deut. xxiii. 12 ff.): it was the grossest insult to turn a man's house into a recep-

tacle for it (קרלים, 2 K. x. 27; גנלים, Ezr. vi. 11; Dan. ii. 5, iii. 29, "dunghill" A. V.); public establishments of that nature are still found in the large towns of the East (Russell's Aleppo, i. 34). The expression to "cast out as dung' plied not only the offensiveness of the object, but also the ideas of removal (1 K. xiv. 10), and still more exposure (2 K. ix. 37; Jer. viii. 2). The reverence of the later Hebrews would not permit the pronunciation of some of the terms used in Scripture, and accordingly more delicate words were substituted in the margin (2 K. vi. 25, x. 27, xviii. 27; Is. xxxvi. 12). The occurrence of such names as Gilalai, Dimnah, Madmenah, and Madmannah, shows that these ideas of delicacy did not extend to ordinary matters. The term σκύβαλα (" dung,"

c • Keil (Josua, p. 125) and Knobel (Josua, p. 437 recognize Dumah in this ed-Daumek, though Robin Winer, in his art. Dusna, quoting Hitrig (Zeller's son (i. 212, 2d ed.) expresses no opinion. Raume atrà. 1348), has complicated the question by making (Paldstina, p. 184, 4te Aufi.) ad pts this identification

[&]quot; The "t" in Doomat is thus written for "h - by mmatical construction.

D. el-Jendel distinct from D. of Wadi-Kurd.

A. V., Phil. iii. 8) applies to refuse of any kind [cast dust." (according to the Hebrew, and as in (cf. Ecclus. xxvii. 4). the margin of the A. V., "dusted him with dust."). (cf. Ecclus. xxvii. 4).

The difficulty of procuring fuel in Syria, Arabia and Egypt, has made dung in all ages valuable as a substitute: it was probably used for heating ovens and for baking cakes (Ez. iv. 12, 15), the equable heat which it produced adapting it peculiarly for the latter operation. Cow's and camel's dung is still used for a similar purpose by the Bedouins (Burckhardt's Notes, i. 57): they even form a species of pan for frying eggs out of it (Russell, i. 39): in Egypt the dung is mixed with straw and formed into flat round cakes, which are dried in she sun (Lane, i. 252, ii. 141). DUNGEON. [PRISON.]

* DUNG-PORT (Neh. ii. 13). [JERUSALEM, VIII.]

DU'RA (NJAT: [Theodot.] Decepd; [LXX. $\delta \pi \epsilon \rho(\beta o \lambda o s:]$ Dura), the plain where Nebuchad uezzar set up the golden image (Dan. iii. 1), has been sometimes identified with a tract a little below Tekril, on the left bank of the Tigris (Layard, Nin. of Bab. p. 469), where the name Dur is still found. But (1) this tract probably never belonged to Babylon; (2) at any rate it is too far from the capital to be the place where the image was set up; for the plain of Dura was in the province or district

of Babylon (בִּמְדִינֵת בֶּבְל), and therefore in the vicinity of the city; (3) the name Dur, in its modern use, is applicable to any plain. M. Oppert places the plain (or, as he calls it, the "valley") of Dura to the south-east of Babylon, in the vicinity of the mound of Douvair or Divnir. He has discovered on this site the pedestal of a colossal statue, and regards the modern name as a corruption of the ancient appellation. Ĝ. R.

* DUST shaken off from one's sandals (Acts xiii. 51), or his garments (Acts xviii. 6) was a symbolic act, expressive of disapprobation and renunciation. Its significancy lay in the idea that those against whom the act was directed were so unworthy that it was defiling to one to allow so much as a particle of the soil to cleave to his garments (see Wetstein's Nov. Test. i. 370). For other references to this custom, see Matt. x. 14; Mark ri. 11; Luke ix. 5, x. 11.

Dust thrown into the air by an excited crowd, as in the case of the mob at Jerusalem on hearing Paul's declaration that the heathen were to share .n the blessings of the Messiah's kingdom (Acts xxii. 23), was an expression of rage and menace, while at the same time it inflamed still further the cassion already excited. The oriental traveller, Sir John Chardin (Harmer's Observations, iv. 203) states that this form of popular outbreak is not inconimon among the Persians at the present day. The peasants there when they have a grievance to redress, collect at the palace-gate, howl, rend their zarments and throw dust into the air, in order to enforce by such frantic violence their demand for In like manner Shimei, as he cursed justice. David (2 Sam. xvi. 13), "threw stones at him and

Panting "after the dust of the earth on the head of the poor " is mentioned in Amos ii. 7 as a mark of avarice. Even those who were so wretched as to have nothing but the dust and ashes, which, in token of their misery, they had spread upon their heads, were still objects of the rapacity of the merciless miser. With an approach to this sarcasm, it is said in the old ballad of Gernutus the Jew (Connoisseur, No. xvi.) who, in default of the payment of his bond, insisted on having "his pound of flesh ":-

"His heart doth thinks on many a wile, How to deceive the poore His mouth is almost full of mucke. Yet still he gapes for more."

See under MOURNING in regard to the custom of sprinkling ashes on the head or person as a badge of sorrow. See SERPENT for what is meant by the tempter's being doomed to "eat dust all the days of his life " (Gen. iii. 14). H.

E.

EAGLE () Wil, nesher : deros: aquila). The Hebrew word, which occurs frequently in the O. T., may denote a particular species of the Falconida, as in Lev. xi. 13, Deut. xiv. 12, where the nesher is distinguished from the ossi/rage, osprey, and other raptorial birds; but the term is used also to express the griffon vulture (Vultur fulvus) in two or three passages.

At least four distinct kinds of eagles have been observed in Palestine, namely, the golden eagle (Aquila chrysaëtus), the spotted eagle (A. næria), the commonest species in the rocky districts (see Ibis, i. 23), the imperial eagle (Aquila Heliaca), and the very common Circaëtos gallicus, which preys on the numerous reptilia of Palestine (for a figure of this Lird see OSPREY). The Hebrew nesher may stand for any of these different species, though perhaps more particular reference to the golden and imperial eagles and the griffon vulture may be intended.ª

The eagle's swiftness of flight is the subject of frequent allusion in Scripture (Deut. xxviii. 49, 2 Sam. i. 23; Jer. iv. 13, xlix. 22; Lam. iv. 19, &c.); its mounting high into the air is referred to (in Job xxxix. 27; Prov. xxiii. 5, xxx. 19; Is. zl. 31; Jer. xlix. 16); its strength and vigor (in Ps. ciii. 5); its predaceous habits (Job ix. 96; Prov. xxx. 17); its setting its nest in high places (in Jer. xlix. 16); the care in training its young to fly (in Ex. xix. 4; Deut. xxxii. 11); its powers of vision (in Job xxxix. 29).

The passage in Mic. i. 16, " Enlarge thy baldness as the eagle," has been understood by Bochart (Hieroz. ii. 744) and others to refer to the eagle at the time of its moulting in the spring. Oedmann (Vermisch. Samm. i. 64) erroneously refers [?] the baldness spoken of by the prophet to point to the

teristic of the Nesher being more true of the Griffon Vulture than of any Eagle. H. B. T.

The reader will find the vernecular Arabic names of different species of Vulturidae and Falcouidae in Loche's Catalogue des Oiseaux observ. en Algérie and in Ibis, vols. 1., ii., Tristram's papers on the Ur

[&]quot; The modern Arabic term for the Griffon Vulture, including the V. auricularis and V. cincreus, is Nisr. This word is never applied to the *Neophron percoop-*teres or "Rachmah." The Engles are designated col-actively by *6gab* with a specific adjective for various I am inclined, therefore, to restrict the Heb. Mester to the majestic Valur, every Scriptural charac- nithology of North Africa.

EAGLE

Pultur barbatus (Gypzetus), the bearded vulture | hat :ne parent bird assists the first efforts of her r lammergyer, which he supposed was bald. It uppears to us to be extremely improbable that there is any reference in the passage under consideration to eagles moulting. Allusion is here made to the custom of shaving the head as a token of mourning; but there would be little or no appropriateness in the comparison of a shaved head with an eugle at the time of moulting. But if the nesher is sup posed to denote the griffon vulture (Vultur fulrus), the simile is peculiarly appropriate; it may be remarked

that the Hebrew verb karach (קרה) signifies "to make bald on the back part of the head;" the notion here conveyed is very app ... : able to the whole head and neck of this bird, which is destitute of true feathers.

Aquila Heliaca
